NEW YORK.—Matterhorn, exhibited by Peter Henderson & Co., New York. Jap. Ref. white, scored 75 points by exhibition scale. Klondike, same exhibitor. Jap. Ref. rich yellow, scored 68 by exhibition scale. Mrs. C. F. Diehm, same exhibitor. Jap. Inc. white with lilac pink suffusions and markings, scored 56 by exhibition scale. Florence Turner, same exhibitor. Jap. Inc. amber, scored 55 by exhibition scale. Mrs. Wm. Massie, same exhibitor. Jap. Inc. rosy pink, scored 81 by commercial scale and 80 by exhibition scale. J. R. McDonald, exhibited by John Marshall, Purchase, N. Y. Inc., canary yellow, scored 81 by commercial scale. Sea-foam, exhibited by D. Wm. Brainard, Thompsonville, Conn. Jap. Ref. cream, scored 31 by exhibition scale. Col. D. Appleton, exhibited by J. R. McDonald, Riverdale, N. Y. Jap. Inc., yellow, scored 66 by commercial scale.

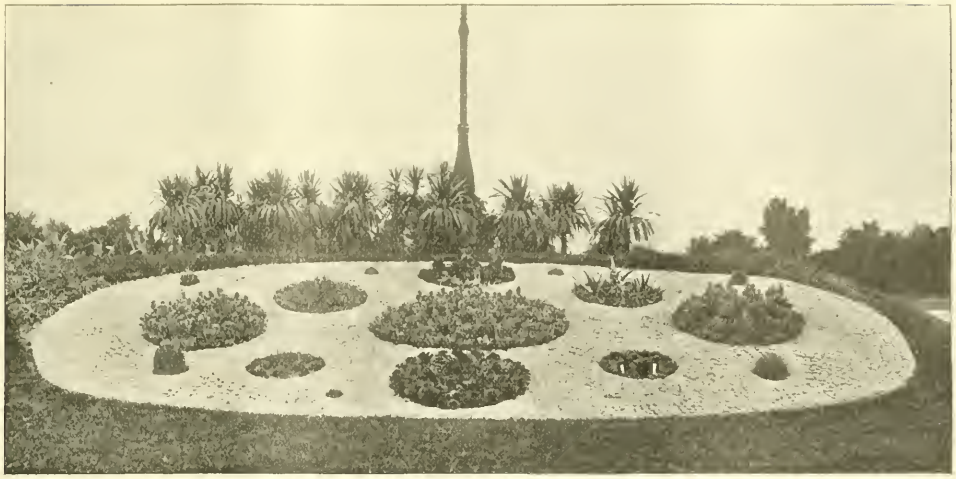
PHILADELPHIA.—No report.

CHICAGO.—No blooms submitted.

CINCINNATI.—No blooms submitted.

ELMER D. SMITH, Sec'y.

Chrysanthemums at Waban Conservatories, Natick, Mass.



To the visitor of last year it seemed as though further improvment in the chrysanthemums as grown here was an impossibility. But if he is fortunate enough to return this year he will find his standard of last season unquestionably outclassed for the chrysanthemums are better than ever before. To the progressive grower the limit of excellence is never reached. It is possible each year to find some point which may yet be improved upon; in fact, the moment a man stops going ahead and is content to stand still the other fellow who has been at his heels all the time will quickly catch up and pass him. To the active, ambitious grower the chrysanthemum is a sort of safety valve. It breaks the monotony of the season and furnishes him an incentive at a time when roses are uninteresting and there is little else in the line of ordinary commercial crops to fire his enthusiasm or put his cultural abilities to the test.

In the big central house at Waban Conservatories where the finest exhibition blooms are to be seen there are about four thousand flowers. One flower to the plant is the rule and they stand from six to ten feet in height. In style and finish Mrs. Jerome Jones still heads the list and of the well known varieties such as Golden Wedding, Major Bonnaffon, Philadelphia, Eugene Dailledouze, Edw. Molyneux, Mutual Friend, etc., there are plenty, all in wonderful perfection. But the more recently introduced sorts are the ones to which Mr. Montgomery calls special attention as he escorts his visitor about the houses and his comments on the behavior of some of them will be found interesting and valuable.

A new chrysanthemum cannot possibly have a more favorable opportunity to show what there is in it than is given by Mr. Montgomery and if he fails to find enough good points to entitle it to a permanent commercial existence then its prospects are poor indeed. Here we see Evangeline, J. N. May's introduction, a variety which as grown by Mr. Montgomery is entitled to class in the first rank, yet the flowers sent last year for examination by the Boston committee so inadequately represented it that the committee hesitated about giving it a certificate. The bloom is large and well built, the stem is stiff and erect actually growing thicker as it ascends and the abundant foliage, being of medium size, allows of the plants being grown near together, a good quality in a commercial variety. The importance of securing good specimen blooms for exhibition before launching a variety is well illustrated in Evangeline.

It is interesting to see Domination grown once more in old time perfection. This variety seemed to become diseased two years ago and to all appearances, had outlived its usefulness. But after being planted out doors for two successive seasons, the plants just lifted and cuttings taken off for the following season, it has now apparently fully recovered and the blooms are really better than Infatuation, which is a well tested variety of similar type.

Mrs. Perrin shows a decided improvement here over last year. It is much more vigorous and is a better flower altogether. In reference to the prevailing impression that Mrs. Perrin is a

FANCY BEDDING AT WASHINGTON PARK, CHICAGO, 1897.

"poor keeper" Mr. Montgomery says that this variety should be given thirty-six hours in water after cutting. This process hardens the petals and fills them so that they hold on well. This treatment is also applicable to Minerva.

One of the favorites of the year here is Modesto. In it we have a yellow that is hard to beat. Equal in brightness to the sensational Golden Wedding and excelling that variety in many points, it is destined to make a sensation in the coming exhibition. Golden Wedding, by the way, has seemingly outgrown its old trouble and is now clean and healthy.

Mrs. Peabody is a new one that is likely to fall by the wayside. A superb flower but a bad neck and not enough stem to carry it. Gold Standard is in the same list with an immense bloom but stem and foliage are sadly deficient and it hangs its head most disconsolately. How it would loom up exhibited on the old flat board plan!

Mr. O. P. Bassett, a sport from Mrs. Robinson, is regarded by Mr. Montgomery as one of the best things sent out for some time. It is identical with the parent variety in every point excepting that of color which in the sport is a soft delicate primrose deepening toward the heart of the flower. This should not be cut too soon, but should be allowed to stay on the plant till the petals are well reflexed which shows the tints better.

In new crimsons Defender seems to promise well and when strengthened up by a year's good cultivation will doubtless take a place as a good commercial variety. It is apparently free from the tendency to "burn" so common in varieties of this color. John Shrimpton still stands as one of the best all round useful crimsons. It never burns.

Sunstone is in habit, growth and foliage much on the style of the Queen. Its color is yellow but not so distinct and pure a tone of yellow as some varieties possess. It was represented to have a bronze base to the flower but it does not show this feature yet. Chas. Molin is one of the best European introductions in its class, being a nice grower and of clean habit, but bronzes are doubtful colors commercially.

A promising English variety is Mrs. H. Weeks. It is a good grower, with excellent habit, the flower white, massive and quite hairy but the petals seem rather soft in texture. Another English introduction not yet on this market is Australian Gold. It is well thought of in England. It did well here until very hot August weather came when the young growths burnt off and it proved very difficult to get a lead. Some good buds are now set.

Mrs. Farrington resembles Viviand-Morel but holds its color better than that once popular variety. Golden Harvest is a beautiful primrose tint and makes a very favorable impression. Constellation gives a shade of pink seldom met with in chrysanthemums and makes a desirable flower if the very terminal bud is taken. Otherwise it comes with too many petals and the color is less pleasing in the crown bud. The foliage is exceedingly pretty. One of the most important points in testing new sorts is to find out just what bud to take and it requires a year's experience with a variety to get at it.

Mr. Montgomery had Sunderbruch this year in bloom very early. There were but three or four days difference between it and Marion Henderson but a vast difference in the price it brought. No yellow sells better in the Boston market than Sunderbruch, and it is only necessary to start if off a little ahead in the spring in order to get it in among the very early varieties.

Chrysanthemum Notes.

Mr. Wm. Paul Binder sent more of his first year seedlings to Philadelphia for the committee to look at, and for early varieties they were all good. One especially attracted attention. It resembled in size and form, and very nearly in color, the W. H. Lincoln; as seen on Saturday the yellow was not quite as bright as is the old and well known variety. Mr. Binder it seems has struck a sort of a Klondike in his early seedlings. It will require a trial of another year or two before they can be recommended with any degree of certainty.

The discrepancy between the reports of the New York and other committees respecting the Mrs. Arthur Caton was under discussion, when one person present declared that some seafaring men must have been pressed into the service as a committee. This can hardly be true. We hope not. It will hardly be believed that out of a possible twenty-five points only five were awarded. It would seem that the committee expected a blue when they only received a bronze. Yet bronzes have their place in the gamut of color or they would not occur. Thomas Cartledge states that in their retail trade some call is made for the bronze colored flowers, yet there is not a good bronze chrysanthemum on the market to-day, which was two weeks after Mrs. Caton was turned down so unmercifully by the New Yorkers. The New York committee's range on shades of colors appear from a Quaker City standpoint very limited.

PHIL. A. DELPHIA.

A Free Flowering Chrysanthemum.

The notice published under the above title in your issue of October 23, has evoked numerous inquiries for stock of the new plant, and for further information concerning it. To save further correspondence, I wish to say that we have but one plant, and have no stock for sale. The notice contains all the essential facts in its history, and was sent to you as an item of news for your readers, and not as a covert advertisement. As a supplement to that notice, I will add that to-day, October 28, the plant has 23 open flowers on it.

W. T. BELL.

Franklin, Pa.

BULLETIN No. 42 of the Florida Agricultural Experiment Station is an exhaustive illustrated treatise on strawberry insects and means of combatting them. It should be very useful to all growers of strawberries. Copies can probably be had free on application to the director of the station, Lake City, Fla.

RAVENNA, O.—The Portage County Hort. Society will hold a chrysanthemum show November 11 and 12.

Peculiar Disease, What is it?

A. V. K., who sent to me a Bride or Bridesmaid plant for examination will please notice that it arrived safe and fresh, thus giving me a good chance of seeing the trouble almost exactly as it appears in his greenhouse. A case very similar to this one was brought to my notice only a short time ago; Bridesmaid, Bride and Meteor that started up finely after planting out and gave promise of being exceptionally good were suddenly struck with something and the oldest foliage became disfigured as if burned, and much of it dropped off, the plants took on a hard and stunted appearance, and whatever growth they made later was soft and pale and weak, and the flowers small, single and worthless; here and there a plant died off entirely, and when others were set in to fill up the gaps they soon turned yellow and died. Careful examination of the roots showed that they were in a very poor state, having few active rootlets and the skin of the larger ones was soft and slipped off easily; the bark also on the stem below ground was soft and dark colored.

I had never seen roses similarly affected but concluded the sickness arose from a something in the soil inimical to the plants, perhaps the manure, bone, or the chemical composition of the soil, the case being aggravated perhaps by a fungous growth on the bark similar to the anthracnose. To ascertain if my conclusions were correct I sent soil and plants to a professor, an expert in chemistry and plant diseases, for microscopic examination; in his report to me I was very much surprised to learn that he had failed to discover any specific disease, and gave it as his opinion that the soil was the cause of the trouble.

I have given these details in full because I feel sure after seeing the plant sent by A. V. K. that the two cases are parallel, there are also points of resemblance between this and the case of Barton Bros,, treated of in this issue, but the two are not identical. I should be very much pleased if some of the readers of this paper who have had experience along this line, and are able to throw some light on the subject, would do so through the columns of the FLORIST for my own benefit and also for the benefit of the gentleman seeking light. As an experiment I would suggest running the benches a little on the dry side, feeding once a week with nitrate of soda in solution, a 3-inch pot to a barrel of water, keeping everything inside the houses as sweet and clean as possible, and a thorough spraying weekly with the ammonia solution of carbonate of copper.

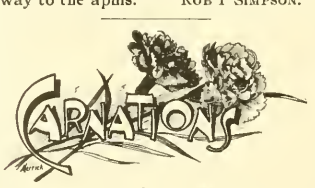
ROB'T SIMPSON.

Consumptive Roses.

Have received from Barton Bros., Pennsylvania, a specimen rose plant, badly diseased, also a plain statement as to treatment, soil, etc., and have been asked to make a careful examination of the specimen and report through the FLORIST. On the roots I found a considerable number of galls indicating eel-worms, and on the stem some signs of anthracnose, but neither or both of these would in this case be sufficient to account for the complete collapse of the plant. What the actual cause of death is in this and similar instances I have been unable to find out, though the trouble is by no means rare. It may be a weakness or disease inherent in the stock, but not showing itself until a certain stage of growth or season is reached, or there may be something in the soil that has a baneful influence on certain varieties of roses, notably Meteor and all of the Mermet family; certain it is that a healthy plant set out in place of one that has died from this cause, if put in the same soil will generally turn sick and die also in a very short time.

The soil adhering to the roots would be considered a very good article by the average rose grower, and as far as I am able to judge the treatment in all respects has been just what the very best growers would have recommended, and yet the result is sickness and dying off instead of being rewarded with luxurious growth and high grade blooms. I think these disappointments and difficulties that at times confront each of us only serve to show how much there is that we do not know, and as yet cannot understand; the longer we live and the harder we work the more we find to do. The solving of one puzzle in plant life will only fit us for and open up to us an opportunity for deeper study.

If the space can be utilized for any other crop it would pay better to throw out the sick roses than to try and doctor them.



ROB'T SIMPSON.

Small Flies in Rose House.

H. G. Z., Winnipeg, reports having been troubled in his rose house with myriads of small house flies, and despite the use of hellebore, whale oil soap, and liquid tobacco they remain to the serious injury of the plants.

We had thought that we had in these United States about every kind of weed, rust, insect, and disease that exists, but I don't know of any house fly so hungry as to eat roses. There is a very small black fly that is often very abundant in the greenhouses soon after a mulch has been applied, but these so far as I know are quite harmless. I am not acquainted with any species of fly except the green and black aphis that is in the habit of feeding upon the rose. Since we fail to recognize the insect we can hardly make any suggestion as to its extermination. Fumigating with tobacco stems, however may destroy it if it is allied in any way to the aphis.

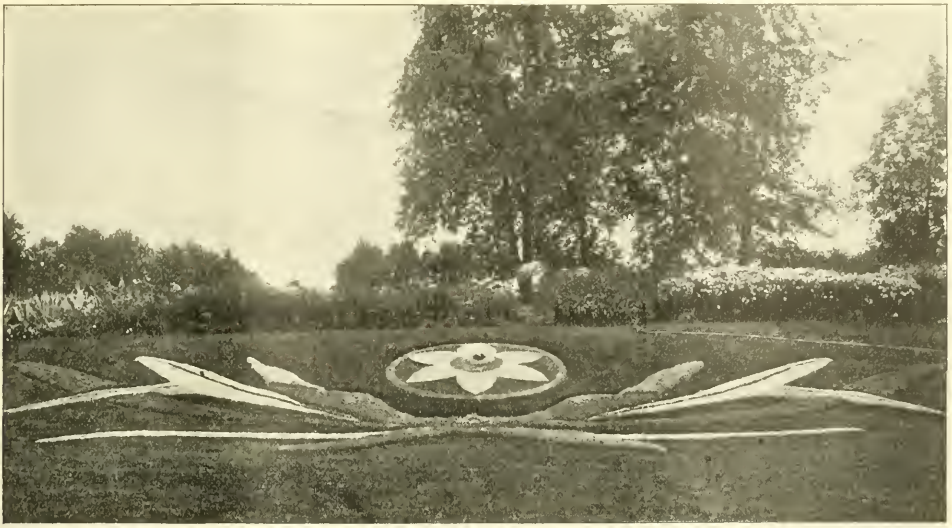
ROB'T SIMPSON.

Carnation Notes.

For two years I have given my experience in carnation culture through these columns, and it has been a pleasure to me to add my mite to the general knowledge, to be one cog in the wheel of progress in this important branch of floriculture. That my work has not been fruitless, that some have been benefitted by it, I have evidence in the many letters received congratulating me on my work, and the many questions I have been asked, and requested to answer privately. In these two years my store of knowledge to impart has been nearly exhausted, and although there are many things that would bear repetition it is unpleasant to me to repeat and place myself in the position of being persistent in my ideas, or to consider my methods of cultivation the best. What I have given is my experience, well knowing that the same shoe will not fit every foot, and I as thankfully receive knowledge as I am willing to impart. In this progressive age where one achievement so closely follows another, no one can say that he can not still learn. The humblest member of the craft may have ideas that the most learned and experienced might profit by.

The principles of carnation culture, based on the nature of the plant, are the same everywhere, but climatic differences, differences in soil and locality, may require difference in treatment, and it will be to the benefit of the reader to have these cultural notes come from other sections. My predecessors furnished these notes for the time of one year, I have probably overstayed my time and tired the reader.

Carnation culture is still advancing and no one can afford to stay behind. From whatever quarter recommendations may come we can always learn something. It may probably not suit every location nor circumstances, but may be the source of new ideas that will give the key to better one's own methods. I will read the notes of my successor with as much interest as I have read those of my predecessors, and am sure that I will profit by them. With best wishes to all I bid you goodby.



FRED DORNER.

[The carnation notes will be continued by a prominent eastern grower.]

Flower Show Advertising.

A great deal has been said by various authorities during the past few seasons on the proper way to advertise a chrysanthemum show in order to achieve the maximum of effect at the minimum of expense. I have but one fault to find with all of them, and that is that all this good advice has usually appeared after the season was ended instead of before it began. One would naturally expect that good advice of this sort would be given before the show season commenced, but the opposite has been the case. Few of us remember our reading of these things a whole year, and a large part of the good that the publication of these experiences ought to do is lost because published at the wrong time. This thought has prompted the writer to look over the files and cull some of the past experience for presentation at this time. The season of 1897 will be in full swing in a week or ten days, and a few hints will not come amiss to many an anxious committee. A little foresight is better than ever so much hindsight here as in other things.

In the first place I find that nearly all are agreed on the importance of the daily newspaper as an advertising medium and advocate spending anywhere from one-fifth to four-fifths of their appropriation in that channel. Next in importance is placed the poster, although there is more diversity of opinion about its efficacy and economy on account of the considerable cost of putting each copy on the boards. Window cards as a supplementary method are greatly in favor, as most of the shopkeepers will give such cards a prominent place in their windows. Signs and banners have also been used to a limited extent. Another scheme that is

FANCY BEDDING AT WASHINGTON PARK, CHICAGO, 1897.

sometimes worked is to put the cups and medals in some prominent show window on the main thoroughfare with a card on each and a larger card behind announcing that these are the prizes to be awarded at the show. When one considers that it costs very little to make this effective advertisement the wonder is that it should ever be overlooked.

Mr. Tesson, of St. Louis, mentions an idea which seems a good one—that of giving a ticket of admission to the boy and girl in each public school who shows the highest average in his or her studies from the time of opening in September to a specified date. It is not so much the effect on that boy or girl that tells, but the amount of publicity that is given the offer when it is announced to all the pupils and by them carried to their homes. Mr. Tesson's able article in the AMERICAN FLORIST for June 28, 1893, should be read by all interested. It contains many valuable suggestions besides the one given above.

If the newspapers are given a fair share of the advertising appropriation they are almost sure to be willing to throw open their news columns to the committee and give glowing accounts free, and the good effect of this cannot be measured in money. A hustling committee will get the big growers to donate flowers, which will be used to arouse a friendly feeling in the editorial sanctum. Then they will haunt the secretary for news of entries a week or ten days in advance of the show and keep firing in paragraphs about this to the newspaper offices. If these are well written and newsy they will always be printed, more especially if some bunches of flowers have previously broken the ice. It would surprise many to find how much space can be thus got in the newspapers. One committee reports that their free space in advance was worth several thousands of dollars (if paid for at the average advertising rates). This same committee had an appropriation for newspaper advertising of *two hundred dollars*! What impression could they have made on the general public with that small sum if they had not hustled to get free advertising?

Then there is the matter of complimentary tickets. The advertising committee should be given a free foot with them. The newspaper editors appreciate a few, and at least all heads of departments should receive three or four each. When one, two or more window cards are left in a store a complimentary should be given if said card is allowed in window. These complimentaries cost only the paper they are printed on and it is a big mistake to be stingy with them the same as if the society paid 50 cents apiece for them. The advertising committee is the proper channel to place them through. It is only such as do favors for the show that ought to get complimentaries, and the advertising committee knows best who these are. Again, many who visit the show by a complimentary will no doubt go home and talk to their friends on the glories they saw, and the result will be a visit of perhaps three or four people who will pay their way. Complimentaries if judiciously given out are undoubtedly good *free advertising*.

The labors of the committee are by no means ended the day the show opens. Much will depend on the newspaper reports next morning. And if the reporters get no assistance from those in charge of the advertising they will do the best they can, and that will be not so good as it might be. Therefore it is necessary for the committee to be on deck every day when the reporters get around. See that they catch on to all the novelties. Make a point of urging the management to provide said novelties every day. Do all this and a score of other things, and keep hustling until the curtain is rung down on the last day. If it's a good show, with good weather and good music and a live advertising committee, a big attendance is almost certain.

Phila., Oct. 27, 1897. G. C. WATSON.

Lilium Harrisii Bulbs Again.

Noticing Mr. Richard Uttenweiler's comment on old lily bulbs, I can state that I have had a similar experience. Having had about 200 lilies come in too late for Easter, we cut and shipped the blooms and as soon as the weather permitted we planted them outside in the field because Mr. Wm. Scott told us in his seasonable hints that they would produce blooms again though smaller, during summer. They did not grow one inch after planting, but died down to nothing. Reading Mr. Uttenweiler's comments we went and looked at our lilies, and behold we unearthed the finest Harrisii bulbs we ever had and far superior to any 7-9 we bought this season. We potted them of course at once and though our new bulbs are started we will report if it is possible to bring our own into bloom by Easter.

Waynesboro, Pa. HENRY EICHHOLZ.

Damage by Sow Bugs.

In your current issue Mr. Daniel K. Herr expresses his doubts of wood lice (sow bugs) eating green plants of any kind. If Mr. Herr grows violets he can very soon set all his doubts at rest for ever, by introducing a few of his "ten thousand" among the plants which are just coming into flower, for they (the wood lice) will soon clear off all traces of blooms and buds.

Last autumn I was very much annoyed in this way and for some time could not find out what was eating my violets, although I went around night after night hoping to discover the robber. At last I decided that it must be something which took its departure on seeing the approaching light and so it turned out, for the next night instead of taking an ordinary lantern I used a bull's-eye, which I carried into the house closed, and by suddenly turning on the light discovered the "shy little rascals tumbling over each other in their eagerness to get away from the light.

I can give Mr. H. another instance of wood lice eating living tissue. About five years ago I was growing mushrooms and everything had gone well until the

mushrooms began to appear on the surfaces of the bed, and then came vexation and sore disappointment, for every mushroom, by the time it was an inch in diameter was destroyed by woodlice, and as the application of a remedy, without running the risk of rendering unwholesome the mushrooms, was impossible, I had to allow the wood lice to gather my crops for me which they did in a very clean manner. JESSE ROBBINS.

Herbaceous Plant Notes.

The general condition of the soil and the exposure to sun, etc. has an influence on the growth of plants, as in a shaded situation and in moist places they grow taller than they would in dry ground or fully exposed to the sun. For this reason the height of plants can never be given with exactness, in one locality they may attain a height a foot or more over the ordinary and in another spot their growth may be dwarfed so much that an observer, unacquainted with the conditions, would suppose he saw a distinct variety before him. The difference is not so remarkable in very low plants, but their growth in shady positions is often less compact and dense, while their height is increased but very little.

We are called upon quite often to furnish a selection of various herbaceous plants which cover the surface of the ground effectually and at the same time do not grow more than 3 to 5 inches high. They are wanted either for edging the front part of a border or for beds of small size; a list of such things may come handy and assist the novice in making the right selection in color, habit or time of flowering, so I will here suggest a few names of plants which will answer for the purposes mentioned.

Aubrietia deltoidea and its varieties are all of dense growth and flower freely in the early part of the season in various colors and shades, looking neat at all times. Silene acaulis forms mossy tufts of green and its pretty little pink flowers last from June until August. S. saxifraga is looser in habit and opens its curiously colored flowers at the same time as the first. S. alpestris, with white starry flowers, begins to bloom as early as May and lasts as long as the others. S. Schaftæ was in good shape the latter part of June and is today (October 17) in full bloom; it is one of the very best late flowering dwarf things we have.

Campanula isophylla grows decidedly compact and flowers for a long period. It is covered with its large erect bells at this date although we had no rains for more than two months and it never was watered during that time.

The subulata section of phloxes are excellent for the purpose. They are clean at all times and give us a profusion of color early in spring. Alyssum alpestre is a sheet of gold in midseason and its small roundish, glaucous foliage is an ornament at all times; it lays close to the surface of the ground. The drabas form little compact rosettes and bloom freely early in summer. Arenarias form a dark green mossy carpet over the ground and their little white blossoms show distinctly on the dark surface, even as late as this some of them are in full bloom. Ajuga reptans var. is an early blue flowering little plant and its variegated foliage is exceedingly ornamental early and late.

Æthionæma pulchellum and Æ. coridifolium are such neat compact little plants everybody should have them; the bright pink flower heads are produced in midseason on the points of every little branchlet. Erysimum achroleucum and E. pulchellum, both with yellow alyssum-like flower heads in spring form dense smooth masses of green in the driest situation and do equally well in moist ground. Erythrea diffusa is a little beauty in the spring months when the bright pink flowers cover the little tufty plants. It often blooms again toward fall and is now fully as good with us as it was last spring.

Lotus corniculatus, with yellow and red pea-shaped flowers, grows luxuriantly in most any place and lays flat on the ground; flowering time extends over two months in spring. Erinus alpinus is a very compact little thing, bearing bluish purple or sometimes white flowers in midseason. The plant forms a mass of small rosettes which remain green in winter. Saponaria ocymoides in its long flowering season during summer is extremely showy and bright. Spergula (Sagina) pilifera is a mossy little plant with bright pea-like white flowers the whole summer through.

Hepaticas, when once well established in a spot, should be left alone, dividing puts them back. They are among the earliest flowers in spring, blue, white or pink in various shades are represented. Aster alpinus spreads out very slowly and keeps the ground well hidden from view. With us it usually perfects a second crop of its light blue flowers in the fall. Astragalus hypoglottis albus bears its large pea-shaped flowers during the summer months, has very pretty foliage and succeeds well in either dry or moist situations. Myosotis alpestris will flower all summer, fully exposed to the sun if divided into very small pieces either in fall or spring; when left undisturbed for a year it stops flowering before midsummer. Linaria alpina is constantly in bloom, the little flowers are dark velvety purple with an orange-yellow spot in the palate; a very desirable plant. Carolina acaulis with small spiny, glossy foliage, looks like a miniature thistle when not in flower; the unique and curious inflorescens has a satiny, silvery appearance, which it retains when dried. It is very large for so small a plant and blooms at various times in the year but most profusely in spring and fall.

The list is by no means a complete one and I may from time to time in the future mention other desirable little plants of low growth suitable for and easily grown in the front of the border.

Rochester, N. Y. J. B. KELLER.

Sulphur and Lime Fungicide.

I am a reader of the FLORIST and am interested in the queries and answers treating on the different fungous diseases which the rose, carnation, violet, and chrysanthemum are subject to, and would like to ask through the FLORIST why the cheap fungicide, sulphur and lime liquid, is not used? If used we never see it mentioned.

I always have a barrel on hand and am satisfied with the results. I would like to see it tried by some of the readers of the FLORIST, on any plants that may call for a fungicide, and to hear of the results later on. For those who may not know the mixture I give my way of preparing and using it. To an ordinary barrel slake one peck of good lime, at the same time while the lime is boiling add five pounds of sulphur, keeping the two well stirred until entirely slaked. Fill the barrel with clear water, let it stand three or four days when the lime and sulphur will settle to the bottom leaving a clear golden liquid. The barrel will stand refilling several times but must be stirred each time.

It is not necessary to use it full strength, about one part liquid to two or three parts water is about right. To use it in the field I prefer using it late in the afternoon when the ground is warm after a good hot sun. The fumes may be distinguished a good distance away. Chrysanthemums so treated I find will dry up all spotted and yellow leaves after three applications.

In the house use it early, before fire heat is started. If a bad case syringe the foliage and if after drying it leaves any lime on the leaf use it on the benches under the plants, on the walks, or any place where the sun may strike and evaporate it. When fire heat is started wet the pipes.

Somerville, N. J. WALTER TRIGALET.

Chrysanthemum Exhibition of the Mass. Horticultural Society, Boston.

The opening day, Tuesday, was about as dreary a November day as is ever seen. Rain came down steadily all day. The attendance of the public was light in consequence, but it gave the visitors in the "profession" a better opportunity to inspect the flowers and the blooms kept all the better for the prevalent dampness. The following day came out bright, and the halls were crowded for the balance of the time.

As compared with previous shows here it might be said that the cut flowers were far ahead and that the plants seemed hardly as effective, taken as a whole. One or two who have been large exhibitors in the past were absent this year, and the number of groups of specimen trained plants was smaller, leaving more room to walk around the upper hall, where the plants were located. With the exception of those shown in single specimens, the plants in competition were limited to 10-inch pots instead of 12-inch, as in the past. Wm. J. Martin, gardener to N. T. Kidder, won first on the big plant group with twelve wonderful productions, which were greatly admired by the expert growers from other places, and some even preferred the smaller, compacter specimens shown by John Barr, gardener to Mrs. B. P. Cheney. Among the latter was a plant of The Bard, color a striking dark red. Wm. Donald, gardener to J. S. Bailey, was the winner of third in this class. On single specimens, reflexed, incurved, pompon, etc., the prizes were well distributed between Messrs. Barr and Martin.

The plants grown to single stem and bloom were much better than ever before, and there was more room in which to display them well. There were also many more entries in these classes than on any former occasion. Kenneth Finlayson, gardener to Dr. C. G. Weld, cut a wide swath in the prizes here. Two varieties, especially effective, that are not seen often were Milbrook and Mrs. Geo. West. Geo. B. Green, gardener to Jas. L. Little, and Mrs. A. W. Blake were large contributors in these classes, and D. F. Roy, gardener to E. S. Converse, C. H. Souther, and Jas. Nichol were also in it. The groups, covering 100 square feet, arranged for effect, were not as effective as they would have been if loosely grown stock had been used instead of staked plants to make up the groups. There were five of these groups, the prizes being awarded to Mrs. A. W. Blake, Dr. Weld, J. L. Gardner, J. W. Howard and E. S. Converse respectively. A group of elegantly flowered orchids from J. S. Bailey made an attractive corner in the upper hall.

FANCY BEDDING AT WASHINGTON PARK, CHICAGO, 1897.

The lower hall was devoted exclusively to the cut blooms. In this department the exhibitors outdid themselves. Not only were the flowers shown remarkable for size, but they were uniformly good in every point. The list of varieties shown was very large, confined mainly, however, to the popular Japanese types. Only one little modest group of pompons was seen, and the incurved flowers were represented by but a few entries, looking smaller than ever before in contrast with the unprecedented size of the flowers in the other classes. There were no freaks or specially odd or novel things, but throughout the exhibition was one of solid worth and such as any society might well be proud of.

The prizes for long-stemmed blooms arranged for effect in large vases brought out seven competitors. These arrangements were superb in every case. Vase and flowers towered to a height of nine feet in the vase of Mrs. Jerome Jones exhibited by E. M. Wood & Co., which won first premium. The other vases were nearly as large and equally well displayed, a number of varieties being used in each case. The owners were John Jeffrey, gardener to Hon. John Simpkins; John Ash, gardener to Mrs. Clark; S. Sandiford, gardener to C. H. Souther; W. N. Craig and J. W. Howard, and the prizes were awarded in order named. Next to the large vases the most interesting competition was for the Bradlee Fund prizes for 25 blooms of 25 varieties, and 6 vases of 6 varieties, 10 blooms of each. On the 25 varieties E. M. Wood & Co. won first prize, Rob't Laurie, of Newport, second; and John Barr third. No finer displays of high-class blooms could be imagined than those above noted. They were beyond adequate description. On the vases E. M. Wood was again first, John Barr second and J. W. Howard third. Mr. Wood's varieties were Evangeline, Mutual Friend, Bonnaffon, Mayflower, Viviand-Morel and Philadelphia.

In the classes calling for 12 and 6 blooms of the different types there was an almost endless competition, and the poorest display would have swept everything before it a few years ago. E. M. Wood & Co., Jas. Wheeler, gardener to J. H. White; Alex. McKay, gardener to David Nevins; Geo. B. Green, C. H. Souther, D. F. Roy, C. Sandiford, John Barr and Kenneth Finlayson were all more or less successful. On 12 best blooms of 1897 introduction Mr. Finlayson took first with a set comprising Duchess of York, The World, Pres. McKinley, Gold Standard, Golden Trophy, Mrs. G. Sanders, Surprise, Marsia Jones, Mrs. R. D. Douglas, G. F. Atkinson, Lorna Doone and Oriental Glory. The vases of 10 blooms in special colors brought out a good showing also. On pink Rob't Laurie's Inter Ocean took first, Alex. McKay's Viviand-Morel second. On red McKay first with John Shrimpton; E. M. Wood & Co. second with Edwin Molyneux. On white A. Herrington, gardener to H. McK. Twombly, first with Frank Hardy, and E. M. Wood & Co. second with Mrs. Jerome Jones. The variety Frank Hardy created a genuine sensation. It is an English variety never seen here before, the petals incurving tightly in masses and swirls, the flower of great depth and finish. In yellow Alex. McKay was first with Maj. Bonnaffon, E. M. Wood second with Golden Wedding. On any other color Mr. Herrington took first with Silver Cloud and Alex. McKay second with Chas. Davis.

In the seedling classes there was little to interest outside of Robert Laurie's Peter Kay, which was best yellow, and Jas. Wheeler's Mrs. Gertrude Brydon, which was best incurved. A. Hunnewell showed a fine pink seedling, Maud Dean form, Inter Ocean color. Hugh Graham & Son got a certificate of merit for Pennsylvania, a noble yellow.

Special note should be made of a handsome collection of forty varieties staged by Rob't Patterson, gardener to Hon. Frank Jones, not for competition, and 12 blooms of J. H. White, shown by Rob't Laurie, which showed this variety in absolute perfection. Geo. B. Green's anemones were especially beautiful. A silver medal was given Arthur Griffin, gardener to J. J. Van Alen for blooms of hybrid Begonia semperflorens, and Jos. Hilburt received honorable mention for a lavender colored sport from the white swainsona.

There were some interesting collections of carnations from various exhibitors. Wm. Nicholson staged a fine lot of market varieties. Peter Fisher showed his famous 999 now under the name of Mrs. T. W. Lawson and got a certificate of merit for it. His Morning Star, a '94 seedling, was also fine. A. Roper showed some sensational seedlings, one of which, a flower of Scott style with Albertini color, deepening to the center, attracted much notice. J. Tailby's scarlet seedling Wellesley also showed up well.

A few of the visitors: A. Dimmock, Rob't Patterson, Rob't Laurie, A. Herrington, J. R. Fotheringham, Alex. McLeod, C. Warburton, E. O. Orpet, A. P. Meredith, P. J. Donohue, W. E. Chappell, Farquhar Macrae, W. B. Hazard, Ed. Johnson, Geo. McWilliam, A. J. Loveless.

Indianapolis.

THE CHRYSANTHEMUM SHOW.

The 11th regular chrysanthemum show and floral festival opened under very favorable auspices promptly Tuesday evening. The weather changed to beautiful sunshine and balmy breezes Tuesday afternoon and gladdened the heart of every member of the society and the exhibitors. The attendance for the first evening was the greatest of any show held. While the receipts were not so heavy as some years, the admission being reduced to 25 cents more patrons left the hall well pleased and will certainly help to bring a big attendance the balance of the week.

After an overture by the orchestra, Mr. E. G. Hill, of Richmond, introduced Gen. Benj. Harrison in a few well chosen sentences. Mr. Harrison was the picture of health and contentment, and made a very pleasing congratulatory address.

Mr. Harrison said: "I have no official title to surrender the city of Indianapolis, but I think I can say to these florists of Indiana as the mayor recently said to

another assembly, 'the city is yours.' (Laughter.) Certainly these florists never stimulate any disturbance of the peace. No man ever got inspiration to whip his wife at a chrysanthemum show, or at a flower exhibit of any kind.

"A great deal of pains has been taken by these florists in the production of these plants that are exhibited here tonight. They have given time to their artistic arrangement and invite, not for their profit, but for their art the patronage of the citizens of Indianapolis. The old idea about trees and plants was that like produced like. But nothing more unlike than these chrysanthemums are hardly to be found in the floral kingdom. Yet every one of these is a chrysanthemum. God does not use a stereotype plate in making flowers. After its kind—and yet nature admits the artist. Nature is willing to take suggestions. God himself will paint the lily, but He has so ordered nature that the plant will accept the pigment from the florist. As He combines the chemicals in the soil to produce those colors, nature itself will use the brush."

Mr. J. S. Stuart, of Anderson, president of our society, responded in his usual direct, but well chosen words. The audience filling the galleries and floor between the plants and everywhere applauded with a will, and if the general's wish is fulfilled we ought to be a rich society by Saturday.

Coming into the hall, the general appearance is very attractive. The decorations are generous, and while the colors are not just in harmony, the general effect is new and striking. The center-piece is a huge suspended canopy decorated with green and pampas and studded with colored incandescent lights; from this many strings of wreathing start in all directions. The balcony railing is draped with white and purple trimmed with galax leaves, asparagus and smilax. The main effect and the most beautiful is the two banks of decorative plants nearly covering the stage and reaching close to the ceiling. The groups were set up by Anthony Wiegand & Son and the Bertermann Floral Co. In points of excellence they are very close, and the judges will have a hard task in awarding the premiums. It is hard to imagine a more beautiful sight than these groups of greenery, shaded with much variegated foliage. Above the plants a canopy of laurel wreathing makes a fine effect, the back of the stage just looming up through the division of the two groups, an immense American flag finishing the decorations.

The beds from the galleries are very pleasing to the eye; a star of single stems forms the center; around this four beds are formed, and from these beds go in every direction. Two special beds of fancy decorative plants exhibited by Wiegand and Bertermann in between the chrysanthemum beds are splendid attractions with their wealth of fancy and variegated foliage in beautiful jardinieres and on pedestals. Two other large groups of decorative plants are shown by H. W. Rieman and Kelly and Cornelli. Two beautifully decorated mantels, one in pink by Bertermann and one in white by Wiegand, attract universal attention. One table decoration in yellow and one in red will be the attraction for Thursday, also the rose display. The orchid display is better and more varied than in former years, thanks to the selection by Siebrecht & Son, New York. The flowers came in perfect condition, and the crowds around the table caused a perfect jam all the time.

In bush chrysanthemum plants not many were shown. Bertermann and Stuart & Haugh were the only competitors. In single stem plants some beautiful specimens were on show; some elegant ferns and Rex begonias, cyclamens and geraniums formed part of the beds. The rose competition was very lively, also the carnation displays. Will report about these and the chrysanthemum blooms in my next.

The chrysanthemum blooms were all fine; no rubbish was to be seen. Pompons, Chinese and anemone-flowered were shown in better shape than ever before. Roses and carnations were never better in quality and varieties; most of them were excellent. Many beautiful baskets of chrysanthemums were in for competition, one of Major Bonnaffon, one of pink and white were especially attractive. Several combination baskets of plants and flowers made a very good impression. Singing canaries in cages and several aquariums added to the general effect.

The committee have this year fixed admission prices as follows—25 cents Tuesday and Friday evenings, 25 cents during the days, 50 cents Wednesday and Thursday evenings, and 10 cents Saturday for the auction. The proceeds from the auctions, however, are getting less everywhere, as many special premiums are given on plants with the provision that the donors should receive part of the plants, and then not many large plants are shown any more. They used to bring very good prices at the auctions.

Wednesday night the reception to the visiting florists and members takes place at the "Walhalla," in the Mannerchor Hall building. Prizes are set apart for bowling, and an evening of unusual pleasure is anticipated. The awards so far are as follows:

LARGE PLANTS.

Six plants bush chrysanthemums, 1st, Bertermann Floral Co. Specimen white, 1st, Stuart & Haugh, Anderson; 2nd, B. Floral Co. Specimen yellow, 1st, Stuart & Haugh; 2nd, John Heidenreich, Indianapolis; 3d, B. Floral Co. Specimen red, 2nd, B. Floral Co. Specimen pink, 1st, Stuart & Haugh; 2nd, B. Floral Co.

SINGLE STEMS.

Twenty-five white, 1st, H. W. Rieman; 2nd, B. Floral Co.; 3d, Wiegand & Son. Twenty-five yellow, 1st, E. G. Hill & Co.; 2nd, Henry Rieman; 3d, Stuart & Haugh. Twenty-five red, 1st, H. W. Rieman; 2nd, Fred. Rieman; 3d, Stuart & Haugh. Twenty-five pink, 1st, H. W. Rieman. Fifty white, 1st, Stuart & Haugh; 2nd, Huckriede & Son; 3d, H. W. Riemau. Fifty red, 1st, E. G. Hill & Co.; 2d, Fred. Rieman. Fifty pink, 1st, Huckriede & Son; 2nd, Hill & Co. Fifty yellow, 1st, Stuart & Haugh; 2nd, E. G. Hill & Co.; 3d, H. W. Riemau. Fifty in variety, 1st, H. W. Rieman; 2nd, Wiegand & Son; 3d, E. G. Hill & Co.

CHRYSANTHEMUM CUT BLOOMS.

Fifteen varieties, 3 blooms each, 1st, Nathan Smith & Son, Adrian, Mich.; 2nd, E. G. Hill & Co. Ten varieties, 3 blooms each, 1st, H. W. Rieman; 2nd, Nathan Smith & Son; 3d, E. G. Hill & Co. Ten yellow, 1st, H. Weber & Sons; 2nd, Nathan Smith & Son; 3d, W. J. Vesey, Fort Wayne. Ten white, 1st, Chas. Wheatcraft, Indianapolis; 2nd, Mrs. Larsen; 3d, Nathan Smith & Son. Ten red, 1st, Nathan Smith & Son; 2nd, Stollery Bros., Chicago; 3d, Stuart & Haugh. Ten pink, 1st, Theo. Bock, Hamilton, O.; 2nd, Stuart & Haugh; 3d, Hill & Co.

Twenty-five blooms, 5 varieties, 1st, Nathan Smith & Son; 2nd, Fred. Dorner & Sons Co.; 3d, E. G. Hill & Co. Twenty-five blooms, 8 varieties, 1st, Nathan Smith & Son; 2nd, E. G. Hill & Co.; 3d, Stuart & Haugh. Twenty-five blooms, 5 varieties, 1st, E. G. Hill & Co. Twenty-five blooms, yellow, 1st, B. Floral Co., 2nd, Theo. Bock; 3d, Hill & Co. Twenty-five white, 1st, Hill & Co.; 2nd, B. Floral Co.; 3d, Stuart & Haugh. Twenty-five red, 1st, Hill & Co. Twenty-five pink, 1st, B. Floral Co.; 2nd, H. W. Rieman; 3d, Theo. Bock. Ten sprays pompons, 1st, E. G. Hill & Co.; 2nd, H. W. Rieman; 3d, Smith & Son. Fifteen blooms anemone, 1st, Smith & Son.

CARNATIONS.

Fifty varieties carnations, 2nd, Stuart & Haugh. Fifty white carnations, 1st, Weber & Son, Oakland, Md.; 2nd, South Park Floral Co., New Castle, Ind. Fifty red, 1st, Weber & Son; 2nd, Stuart & Haugh. Fifty pink, 1st, Weber & Son; 2nd, South Park Floral Co.

ROSES.

Ten Perle des Jardins, 1st, M. A. Hunt Floral Co., Terre Haute; 2nd, W. J. & M. S. Vesey. Ten Brides, 1st, M. A. Hunt Floral Co.; 2nd, W. J. & M. S. Vesey. Ten La France, 1st, Chas. Wheatcraft. Ten Niphetos, 1st, Chas. Wheatcraft. Ten Bridesmaid, 1st, M. A. Hunt Floral Co.; 2nd, W. J. & M. S. Vesey. Ten Meteors, 1st, M. A. Hunt Floral Co.; 2nd, H. W. Rieman. Ten Mme. Testout, 2nd, Stuart & Haugh. Ten Kaiserin Victoria, 1st, W. W. Coles; 2nd, South Park Floral Co. Ten Beauties, 1st, South Park Floral Co; 2nd, W. W. Coles. Ten Mrs. R. Garrett, 1st, H. Weber & Son. Pres. Carnot, 2nd South Park Floral Co.

The committee in charge of this year's show are as follows: Fred. Dorner, E. G. Hill, Wm. G. Berterman, H. W. Rieman, Anthony Wiegand. J. S. Stuart, president; Robert McKeand, secretary; John Hartje, assistant secretary; J. I. Huntington, treasurer; John Heidenreich, superintendent. W. B.

On Wednesday evening the State Florists' Association of Indiana and the Indianapolis Florists' Club jointly combined to entertain the members of the two societies and the trade visitors to the flower show, Nine o'clock was the meeting hour at the "Walhalla" and about seventy were present including many visitors from neighboring towns. The bowling contest was the feature of the evening though a dozen card tables were provided and well patronized. Some forty-five took part in the bowling which resulted in a tie for first place between Theo. Bock and Ed. Berterman. In the roll off the former won by a score of 50 to 46. Mr. Carl Sonnenschmidt took third prize, and Geo. Stellhorn was awarded the "booby." Mr. J. D. Carmody in a very happy and humorous manner made the presentations of the prizes which consisted of three fine vases and two pairs of boxing gloves.

Messrs. Stellhorn and Langstaff amused the boys by a friendly bout in which everybody had trouble to keep out of the way. Referee Carmody called Mr. L. the winner on a foul and no damage was done. After refreshments in the way of a very bountiful lunch, another game was bowled. The Theo. Bock team beat the Ed. Berterman team by a score of 522 to 508. The gathering adjourned at 12 after a most enjoyable evening. Among those of the craft present were "World's Fair" Evans, of the Challenge Ventilator; Harry Balsley, of Detroit; and Mr. Giesy, of the Lockland Lumber Co.

New York.

OVERSTOCK AND LIGHT DEMAND IN ALL LINES.—CLUB MEETING AND NOMINATION OF OFFICERS ON MONDAY EVENING, NOVEMBER 8.

There is still an abundance of stock coming into the market for the demand. The conditions existing during the past two weeks remain unchanged. No one flower seems to have the preference, for the sale of all drags. While many of the chrysanthemums coming now are fine blooms, still the majority are the smaller varieties, which find their way to the street. The specimen flowers do not find buyers at anything near the figures of a season or two ago. Selected Beauties do not get above 25. The lower grades do not move at any steady figures. The average price of Beauties is fully 50% lower than a year ago.

Carnations are increasing in quantity and improving in quality, but have gone off in price during the past week. Violets are not blooming so freely the past week and an advance in price may be looked for in the event of a stir in business. There is nothing remarkable in the quality of Brides and Bridesmaids, the pro-

portion of really fine flowers with long stems being small.

The stormy weather now prevailing makes things very dispiriting. The wholesalers are crowded with stock and the demand is exceedingly light. The opening of the Astoria Hotel was expected to help a little, but its influence was not felt to any extent.

On Monday evening, November 8, the nomination of officers will be in order.

In our last report the age of the late Mr. Hauser was given as 91 years. It should have been 81.

Boston.

BUSINESS AT A STANDSTILL.—STOCK OF ALL KINDS ABUNDANT AND PRICES LOW.—THE EXHIBITION A SUCCESS — MANY VISITORS.—A TRIP TO WABAN CONSERVATORIES.—A DINNER AND A POW-WOW.—ELOQUENT SPEECHES.—EXHIBIT OF ORCHIDS.

There is nothing to report in the cut flower trade this week. Conditions remain as they have for a month—warm weather, stock abundant, customers shy and critical, chrysanthemums everywhere and prices nowhere. Quality is all right; in carnations, roses, violets and such other stock as goes to make up the ordinary market variety, one may get double extra stock in quantity unlimited at prices sub rosa and he has not far to travel to get it.

The main attraction at present is the chrysanthemum show at Horticultural Hall. Plenty of strangers are in town and Horticultural Hall is their Mecca. The front is brilliant at night with electric lights and the interior is resplendent with the finest display of cut flowers ever staged, not to mention the beaming and ruddy faces of the happy growers who have either won first prizes or had the honor of shaking hands with the man who did. Vases of cut blooms there are that required the use of a step ladder for their arrangement, and there are plants growing in ten-inch pots that if the flowers were cut off could not be crowded into a ten-inch vase. Altogether it is a grand exhibition and those who have travelled many miles to see it feel well repaid for their trouble, not to mention the enjoyable adjourned session that took place Tuesday evening when the merry side of the hard-worked gardeners was brought to light and all thoughts of election returns, stormy weather, premiums, etc., were lost in the shuffle and good fellowship reigned supreme. Come again, from Newport, from New Hampshire and New Jersey and other foreign countries and even though you do give us a little scare on the premiums we won't object and you are doubly welcome to all you can catch.

Mr. E. M. Wood's annual invitation to Waban Rose Conservatories was responded to by about seventy gentlemen high in horticultural art or eminent in public life who inspected with admiration and pleasure the products of this great establishment which is the pride of Boston floriculture. It took place on Thursday last. A special car had been provided and leaving the train at Wellesley the party were conveyed in wagons to the greenhouses at Natick. To some it was a new experience, others had been there often before but those who had seen the place oftenest were the most enthusiastic, and chrysanthemums and roses were pronounced to be in finer shape than ever before. After a couple of hours spent in going through the vast range of houses under the guidance of Mr. Wood and Mr. Montgomery the visitors embarked once more on the 'busses and were driven to Bailey's Hotel, of which they at once took possession, and it is safe to say that the dining room of this hospitable old inn never held a merrier crowd.

The dinner was of the sort that E. M. Wood knows so well how to provide. When all were satisfied Mr. Wood arose to say a few words of welcome and received an ovation which might have cracked the walls. It was several minutes before he could proceed and his assertion that "those who are interested in the growing or sale of flowers are jolly good fellows" was applauded in a manner that proved its truth. He spoke pertinently of the injury done to his fellow growers by the man who floods the market with inferior goods, looking only for momentary results and failing in a proper regard for the glory of his art, and paid a high compliment to Mr. Montgomery to whose skill, patience and assiduity he attributed all the credit for what the visitors had seen today. He then introduced Edward Hatch as toast master, who immediately responded amid tumultuous applause, and thereafter managed the proceedings with rare tact and ability.

Judge Hoitt was the first victim but he was equal, as usual, to the emergency, and with quick wit, humorous anecdotes and appreciative compliment to his host held his audience to the end and delivered it over intact to the next speaker, Hon. Jos. O'Neil. Mr. O'Neil's speech was also a good one, his amusing stories about government seed distribution and other congressional experiences being exceedingly entertaining, and his testimony that "there is no business on earth more elevating to the heart and the mind than the growing of flowers, and a man like Mr. Wood is a public benefactor" being cheered to the echo. Alderman Barry spoke of the influence of flowers in the home, referred with pride to the fact that his son was a first graduate of Amherst Agricultural College and was enthusiastically applauded when he asserted that on each Park Board there should be at least one member scientifically educated in the work. Joseph Conroy, president of the city council, also spoke entertainingly.

Among the speakers more accustomed to be heard at gatherings of this character were F. L. Harris, Patrick Norton, Lawrence Cotter, who pronounced the chrysanthemums at Waban to be the highest product of the highest skill of the floriculturists' art, Fred Mathison and Warren Ewell who were as witty as ever, John Galvin, J. M. Galvin E. N. Pierce and Jackson Dawson, who told briefly of some of his experiences in Cork on his late European trip. The singing of various popular songs under the leadership of Mr. J. M. Galvin was a feature. Among the decorations on the table was a pretty specimen of Begonia Gloire de Lorraine, grown by F. L. Harris.

On Saturday of last week Carl Blomberg made a notable display of orchids at Horticultural Hall. One spike of Cattleya Bowringeana had thirty-five blooms on it. There were thirty-five sorts of cypripediums, among them being the rare varieties Annie Ayling, Chamberlainiana, Aspasia, Behrensiana and Spicerianum aureum.

Visitors in town: A. Dimmock, New York; A. Herrington, Madison, N. J.; Robt. Patterson, Portsmouth, N. H.; Robt. Laurie, Newport; P. J. Donohue, Lenox; A. B. Knickman and J. E. Killen, New York.

Philadelphia.

MEETING OF FLORIST CLUB —PRESIDENT'S ADDRESS —MR. CAREY READS A PAPER ON CHRYSENTHEMUMS.— ANNUAL 'MUM DINNER CHANGED TO A SMOKER.—PRESENTATION OF PICTURE OF PRES. HARRIS IN COSTUME — HUGH GRAHAM'S NEW 'MUM PENNSYLVANIA —BUSINESS FAIR.—PRICES ABOUT SAME —VARIOUS PERSONAL ITEMS.

The November meeting of the Florists' Club held last Tuesday evening was well attended. Those present had the pleasure of listening to President Harris's inaugural address in which he laid out the work for the ensuing year. His address contained many practical points which if carried out will be of great benefit to the club. Mr. Carey's paper on "The best twenty-five chrysanthemums and the reason why," showed much thought and was a thoroughly practical essay.

The annual chrysanthemum dinner, after discussion, was changed to a smoker. This is to be given next Wednesday evening, tenth inst., and promises to be a great gathering of the craft. Cards of admission are placed at fifty cents. The entertainment committee, consisting of the officers of the club, augmented by John Westcott and several other members, will no doubt have a treat for the boys in an intellectual way and this, combined with the usual inner linings, will no doubt find everybody, when going home, in a happy mood.

The particular event of the evening was the presentation to the club of a picture of its present president in costume, that is the costume he wore when he made his debut in the play with the mighty Falstaff on the ocean pier at Atlantic City. Whether Mr. Harris looked his best on that occasion is a question, but the crayon drawing faithfully portrays him and is a most excellent piece of work. Mr. Burton made the presentation speech for Messrs. Whilldin & Co., who had the picture prepared and elegantly framed. When the covering was removed there was a shout and no one was more surprised than Mr. Harris himself.

The coming show promises to eclipse any of its predecessors, at least so says Secretary Rust, the entries at this date being much fuller than last season. One of the stars will be Hugh Graham's new Pennsylvania, which is a golden yellow Philadelphia, being a sport from this famous variety. It is similar in every other respect except color.

Business has been fair for the season, nothing great having happened to cause an extra demand. A boost to the 'mums was given by John Wanamaker, who placed on exhibition in his store about 2,000 fine blooms. These were not for sale being simply arranged for display; they made a fine show and attracted considerable attention.

Prices are about the same as last week, a few of the select Beauties have moved up a bit, $2.50 to $3 being asked for the best. There are plenty of 'mums, but the market for good stock holds fairly well, the best flowers bringing $2 to $2.50 per doz. at wholesale. Plants well grown sell in 6 inch pots for from $20 to $25 per hundred, 8-inch stock bringing $40 to $50. Palms are selling a little more lively, but with a tendency to lower prices.

Julius Wolff, Jr., is about putting a new wagon on the street. It is large and roomy for hauling decorative plants.

Miss Anna Ditter, for some time principal saleslady for J. Wolff, Sr., has opened a cut flower store at 1412 Susquehanna

avenue. This should be a good location and as the lady is thoroughly accomplished her venture will no doubt be a success. K.

Chicago.

TRADE SOMEWHAT SLOWER.—HORSE SHOW HELPS DEMAND.—PRICES.—THE CHRYSANTHEMUM SHOW.—CLUB'S BANQUET NOV. 11.—VISITORS.

Trade has been somewhat slower with most dealers the past week, though one commission house had an order for 42,000 flowers to go to Minneapolis. This, naturally, necessitated the purchase of flowers from other dealers in order to fill the order, thereby using up the accumulated stock and practically cleaning up the Chicago market. The Horse Show, which is the fashionable event of the season, has increased the demand all round. Beauties are used to considerable extent, but the principal call is for violets, for which the supply is woefully inadequate to fill the demand. This has a tendency to increase the price from 75 cents, as last quoted to $1 and $1.25 for extras. Yellow 'mums, especially Sunderbruch and Bonnaffon, were also in great demand for this event.

Good teas are in fair supply, Brides and Maids being quite abundant and rather slow sellers; $2 and $3 are the prices for fair stock. Meteors are rather better sellers and are held at $4, while Kaiserin still holds its own at $5. Carnations are not quite as plentiful. There are sufficient to go around but not enough to cause any noticeable glut. Prices are still about 75 cents to $1 with fancies held at $1.25 to $2 and in good demand at that.

Preparations for the chrysanthemum show are complete and all connected with the management are hustling to the limit. Present indications are that this exhibition will exceed in volume and effectiveness any previous one. The list of special premiums will be unusually large and the exploitation of the affair through the papers and other means has been very thorough. Freely illustrated special articles will appear in all the Sunday papers and the press seems more favorably disposed than ever toward the annual feast of flowers. Superintendent Rudd has everything in good shape for receiving and caring for the exhibits as fast as they arrive. A full report of the exhibition will appear next week.

The Chicago Florists' Club will give their annual banquet during the flower show Thursday evening, November 11, in the Sherman House banquet hall. Those wishing to attend and not being able to go with the delegation from the chrysanthemum show will kindly assemble in the gentleman's parlor, Sherman House, at 8 o'clock. The banquet will begin at 9 o'clock sharp.

The club will have representatives on the floor at Battery D during the afternoon to give full details and banquet tickets can be secured from the committee of arrangements, Messrs. John Reardon, Walter S. Heffron, and Chas. W. McKellar. There will be plenty of good things to eat and drink, intermingled with abundance of music, songs, etc. All should endeavor to attend.

Mr. Glover, of Winter & Glover, returned Saturday from Horican, Wis., where he had been called to attend the funeral of his wife's brother.

Recent visitors: Mr. M. Rice, of M. Rice & Co., Philadelphia; I. L. Pillsbury, Galesburg, Ill.; B. E. Niles, Blissfield, Mich.; A. C. Brown, Springfield, Ill.; R. Hoffman, Elkart, Ind.; Mrs. E. Wilson, Cleveland.

Mr. W. W. Barnard is away on an eastern trip.

St. Louis.

RAIN AT LAST.—HEAVY RECEIPTS OF ROSES.—BEST SELLING CHRYSANTHEMUMS.—SHIPPING TRADE GOOD.—SUPPLY OF BEAUTIES SOMEWHAT SHORT.—PRICES ON OTHER STOCK.—THE COMING CHRYSANTHEMUM SHOW.—VISITORS.—BOWLING.

The long drought is broken at last. It rained Sunday and Monday, this being the first in 98 days and everybody is happy. The heavy receipts of roses that were coming in last week still continue but we will hope that the cooler weather will decrease the receipts. The market does not improve for roses, however, owing to the increased crop of chrysanthemums. There are lots of fine blooms of the latter in the market. The best sellers are Ivory, E. G. Hill, Queen, H. L. Sunderbruch, Mutual Friend, Robinson and Major Bonnaffon. The best of these bring 25 cents and from that down. There is no southern stock coming in now and the few that did come in were very bad.

Trade is improving slowly. C. A. Kuehn, Mound City Cut Flower Co. and C. W. Wors, our enterprising commission merchants, report a good shipping trade.

In roses Beauties are about the only stock that is short in supply. Very choice stock brings $2.50 per dozen. Other roses such as Bride, Meteor, and Kaiserin are selling at from $1.50 to $2 per hundred. Perles, Woottons and Maids sell as low as 50 cents and $1 per hundred. Carnations were beginning to come in in large quantities last week with the price as low as 50 cents per hundred, but this week they are a little scarce and the price went up to $1.50 to $2 for prime stock. Good reds are still scarce. Scotts are more plentiful than any other. There is also a good call for white. Violets are scarce and only the small single and Californias can be had in small quantities, no double to be had. Valley holds its own at $4. Smilax is also a little scarce, price 15 and 18 cents per string.

The prospects of the coming chrysanthemum show are very flattering. The public at large is taking more interest this year than ever before. The committee reports that the exhibitors can bring their plants to the hall on Monday morning. Everything will be ready for them at 9 a. m. and every display must be in place by 4 p. m. on Tuesday, November 9. The premium lists are out and in the hands of the growers by this time and the entries are coming in from every direction, and all indications point to a successful show. M. Rice, of Philadelphia, L. Bauman, with Frank Netschert, of Chicago, and Mr. Durfee, of C. Strauss & Co., Washington, D. C., were our visitors last week.

Fred Ostertag, late of Ostertag Bros., has left St. Louis to open a floral establishment in Indianapolis, Ind. Good luck to you, old boy.

At the Bowling Club Monday night the attendance was good, considering the bad night. Emil Schray rolled high in three games, 485; Kuehn second, 475; and Beyer third, 470. In single score Beyer was high, 199; Kuehn second, 189; and Beneke third, 187. After rolling, a meeting was held and next Monday night we roll on our old alleys again. Mr. Weber invited the members to his home next Thursday night and a jolly time is anticipated. J. J. B.

Milwaukee.

TENDENCIES OF THE TRADE.—COMMISSION ROSES.—FLORAL ARRANGEMENTS.—THE FLOWER SHOW.—NOVEL DECORATIONS.

The matters pertaining to the florists' business in this city are interesting; whether they differ from those in other cities the writer will not discuss, but it is quite evident that we are evolving toward some condition far different to those which existed some time back. Five years ago the management of the Whitnall greenhouses quit growing roses, increasing their stock of ferns and palms. This season Mr. Ben. Gregory and N. Zweifel are following suit, excepting that they are devoting the room to carnations. Currie Bros. are also shortening their rose crops and increasing proportionately in other lines. A. Billings has not planted roses this season. This does not argue that less roses will be used here, but shows that the rose growers out of town are to be depended upon for all Milwaukee's roses. This change of management is developing in outside towns as well; many of the smaller towns of this state have increased their rose trade, but are growing weary of growing their own roses. One fact concerning these changes is interesting; the florists here have insisted all along that the commission roses were not so good, claiming that they would do at times to help out, but while they would speak discouragingly of them other stores would open a flower window, purchase the commission roses and "get away" with the "legitimate florist." A "fakir" will locate at some prominent corner and sell more roses in a day than any of our local florists would cut in a week; the consequence is that the florist is now forced to give up growing in order that he may compete with the druggist, grocer and other fakirs; it gives the outside growers a monopoly. With violets and carnations the same result will no doubt be obtained, but it will take much longer, as the larger growers of Illinois do not appear to be able to produce flowers of the best quality as a rule. The strong hold for these flowers is developing along the C. M. & St. Paul railway west of Milwaukee. The present lack of capital appears to be all that prevents this locality from absorbing the demand; the output is, however, increasing rapidly and as the quality of flowers advances the demand for quantity decreases, and the use of choice foliage is on the increase.

The demand for floral designs is decreasing. This has been the main dependence of several florists on which they have been able to live while other changes were making a hole in their pocket. This loss necessitates some other changes which many are unable to determine on. This dilemma confronts those principally who have greenhouses on their hands. The question arises, what shall they grow? The writer would be inclined to say, grow pot plants, but when a florist like Mr. N. Zweifel, who has grown the finest cyclamens for years, says he will grow no more as they do not pay, what would you advise? There has been more decoration for receptions this fall than for four years, but the work has been done by comparatively few florists. The flowers which have been sent in have been largely "Chicago-grown Beauties," a few other roses and a very few carnations, and lately some chrysanthemums, but as you look over the decorations you look almost in vain to find what there is there that will pay for the support of the Milwaukee florists' greenhouses.

As to the coming flower show, it will to some extent change its relation with the

local growers. While it is to be held under the auspices of the Milwaukee Florists' Club, it is being run by Mr. A. Klokner, who has guaranteed a certain amount of prizes and assumes the whole responsibility. There is no reasonable doubt but it will be a most satisfactory show both to its patrons and management. Mr. Klokner has had considerable experience and is progressive enough to adapt himself to the circumstances as they exist. The last year's show was managed without regard to the fitness of things, and had a tendency to discourage the members of the club. The enthusiasm which existed last year for specimens for the show does not exist here; there has been but little grown in Milwaukee expressly for the show, although the most of the flowers offered for sale up to date have been of a better quality than usual. Mr. Klokner has it understood with all exhibitors that the cut flowers are his property after the show and has arranged with the lady managers of the Infants' Home to auction them for their benefit at the last evening, it is quite certain that the ladies will secure a large attendance that evening at least.

The placards announcing "Fresh roses, 25 cents a dozen" are numerous on Grand avenue this month. Currie Bros., have improved the appearance of their Wisconsin street store very much by moving the door-way to one side, they now have a beautiful show window. Their display of Pancratium grandiflorum in bloom has been quite attractive lately.

There are more bulbs being planted in the residence portion of the city than there were for the past two seasons.

This locality is now supplied with common ferns from Michigan; they are highly satisfactory.

Some of the decorations this last month contained novel features which may be of interest to florists in other cities. One dining room had a grape vine twined over branches of autumn leaves from which were hung choice grapes, with a basket full of grapes on the side board as if just picked from the vine. It was simple in appearance but made quite a sensation. Another was arranged with a peach tree, the fruit being tied on. A most beautiful staircase decoration was made with bamboo plants at base and Alabama smilax running up banisters and over long fish poles suspended, which bent over gracefully, the foliage of bamboo and smilax blending well together. For mantel decorations where there were two shelves, the upper one was filled heavy with foliage, the lower one contained pansies or tuberous begonias, which were very much admired. Pots of variegated stevia were used with carnation foliage and blooms of Daybreak carnations. Several reception rooms were darkened, lit with gas and decorated suitably with ferns, the walls covered to the ceiling. Asparagus vine falling over branches carelessly in the form of initial letters. Perhaps the most striking departure from the ordinary was a large parlor which had the two walls covered with gorgeous maple leaves, yellow, crimson and green. They were preserved by having the ends of large bunches rest upon the floor in pans of water, filled with ferns; on the branches was wired large pots of yellow chrysanthemums, the pots being concealed by maple leaves, looking as though the flower stems extended from the floor; this was a big job but simple in appearance and created a sensation.

Coal dealers are warning us that there will be a coal panic and price will soon go away up, but this beautiful weather we are having seems to make the florist score-proof.

Violets suffered with the heat this fall, but are now coming in quite nicely. Mignonette will be unusually late this season. Cosmos is very good.

C. B. W.

San Francisco.

TRADE KEEPS UP WELL —OUTSIDE 'MUMS ARE VERY GOOD.—VIOLETS COMING IN SLOWLY.— CARNATIONS SCARCE.— MILDEW ON ROSES.—PERSONAL ITEMS.—SAN RAFAEL HOLDS ITS FIRST SHOW.—EXHIBITION OF THE SAN MATEO CO. FLORAL SOCIETY.

Trade has kept up very well during the past few weeks on account of good weather, and prices have also been fairly good. As a rule stock grown outdoors this season has been much superior to anything we have had for years past and consequently brought good prices. The outside grown stock of Major Bonnaffon has been fully as large as that grown inside, but of course was not so well shaped. Prices on 'mums of all kinds have dropped a little, but as we are now experiencing some very stormy weather, which will eventually spoil a large quantity of outdoor 'mums, prices will undoubtedly rise a little. Mrs. Robinson is the finest white coming into the market this season. We do not see so many Queens or Niveus as in seasons past. Western King has done splendidly. There is quite a steady demand for cheap white 'mums for funeral work. Well grown blooms from under glass bring from $1 to $2 per dozen and prices range from that figure down to 10 cents per dozen for small stuff.

Violets are still coming in slowly, Marie Louise being the only variety as yet. Carnations are a scarce article and are much in demand, Scott being the leader. Some Jubilee are to be seen, also Armazindy. Roses were rather poor during the past week or two on account of the cloudy weather. Quite a lot of the stock coming in seems to be badly affected with mildew. Roses from the present outlook will probably be scarce again this winter. Beauties are also poor in size.

Palms and decorative plants are beginning to move, now that the people are coming back to town for the winter. Palms in good salable sizes are rather scarce and high in price. Smilax and ferns are plentiful and are moving slowly.

The many friends of Tom Stevenson, the Powell street florist, will be glad to learn that success has crowned his efforts in the Alaska gold fields. Tom is now working a very fine claim on Minook Creek and from all accounts is doing splendidly.

The Santa Rosa Floral Society will hold its annual chrysanthemum show during the first week in November. It promises to be one of the most attractive affairs ever given here. The exhibition will be held in Ridgway Hall and from the large number of applications for floor space it will undoubtedly prove successful. Liberal prizes have been offered to professionals to compete. The show will probably last for three days.

The city of San Rafael has just been treated to its first chrysanthemum show and judging from the appreciative crowds that thronged the hall nightly it must have been an unqualified success. On the sides of the hall were many interesting displays made by amateurs, chrysanthemums being the chief flower in evidence, although there were many well grown roses and carnations to be seen. The hall was nicely decorated with palms, evergreens and various groups of decorative plants.

Mr. A. Pottett, accompanied by his foreman Mr. John Gilmore, spent some time in San Jose last week visiting the different growers.

Mr. A. W. Mitchell, who has for several years past been with Mr. Sidney Clack at Menlo Park, departed for his home in England last week.

Mr. George Angus, the well known gardener to Jas. A. Donahue, Esq., left for Europe, accompanied by his family, on November 1. George will visit all the leading growing establishments during his stay and will undoubtedly bring back many interesting things with him. He will be gone about four months.

The third annual chrysanthemum show of the San Mateo County Floral Society in Redwood City opened on the 21st and closed on the 23d. Mr. M. Lynch of Menlo Park was awarded first prize for the largest and best collection of cut blooms. He showed in all about seventy-five varieties, many of them being seedlings never before shown. On the center of the table was a very large vase of Mrs. Henry Robinson, on the left was a large bunch of Bonnaffon, and on the right a vase of Viviand Morel. A large vase of Nathan Smith & Son's Western King was greatly admired. By the way I may state here that this variety has proved a fine white for outdoor work, and from its good shipping qualities and splendid size is going to be one of our best sorts for outside culture. Among Mr. Lynch's exhibit was a pink seedling chrysanthemum which originated with the Japanese growers last season. It was much admired on account of its size and color.

The Sunset Seed & Plant Co. showed a large collection of palms and decorative plants very artistically arranged. Among the collection were some well grown kentias and phœnix. They also showed a fine collection of ferns, all of which not being for competition.

Mr. Thos. McIntyre, gardener to C. W. Smith, Esq., showed a splendid lot of well grown 'mums, chief among which were some extra fine Mrs. Robinson and Major Bonnaffon. This exhibit was awarded first prize for amateurs.

Mr. H. M. Holbrook, of Menlo Park, was also on hand with a fine lot of cut flowers and ferns, which occupied a circle on the left side of the hall. He showed some finely grown Golden Gate and Viviand-Morel. His collection of ostrich-plume chrysanthemums was also greatly admired. His ferns, particularly the Adiantum Williamsii, were very excellent.

On account of the stormy weather the show was not so well attended as in former years but I am informed that it was a financial success.

The California State Floral Society will hold its chrysanthemum show next week in San Francisco lasting one day only. No admission fee will be charged and the society hopes for its success.

METEOR.

Providence, R. I.

CHRYSANTHEMUMS IN DEMAND.— PINK VARIETIES APPEAR SCARCE —STEM ROT ON CARNATIONS. — FLORIST CLUB TO HAVE A LADIES' NIGHT.—VARIOUS ITEMS.

There is an active demand for chrysanthemums and some fine specimen flowers are now in the market; prices range from $1.50 to $3.00 per dozen. Pink varieties seem to be much in demand and somewhat scarce. 'Mums still hold the boards and there is not much demand for

other flowers. Roses are very low. Carnations are a little firmer in price and in rather better demand. Violets are coming in in small quantities but the grower that can cut one hundred 'mums in about the same time that he can pick as many violets, getting $8 for one and 50 cents for the other, does not care to bother with violets.

Many growers of carnations are complaining about stem rot this season. Many plants were lost in the field and still the trouble does not end after they are housed. Undoubtedly much of the trouble is due to too deep planting and perhaps over watering. I am satisfied that is the trouble with those that I have lost in that way.

At the last meeting of the Florists' and Gardeners' Club of Rhode Island much interest was taken in the matter of a "ladies' night," given as a compliment to the ladies who so kindly assisted the club at the convention held here in August.

The committee who have the matter in charge are N. D. Pierce, Jr., Ed. J. Johnston and Wm. Hill. The date will be on our regular meeting night in January. Since last reports ten names have been added to the club membership. Mrs. Farquhar Macrae was unanimously elected as an honorary member in recognition of services rendered the club.

Mr. A. M. Rennie is improving slowly but still confined to his room.

Mr. Bryant, representing A. H. Hews & Co., and Mr. Skidelsky, representing M. Rice & Co., were recent visitors.

LITTLE RHODY.

Buffalo.

'MUMS DON'T APPEAL TO VOTERS —BUSINESS NOT BAD.—NEEDED RAIN COMES.—SMALL SALE OF CHRYSANTHEMUM PLANTS —HARRY BAYERSDORFER TALKS DIALECT.—VARIOUS ITEMS.

The quantity and extra fine quality of our municipal campaign is so distracting to the mind that all other thoughts are temporarily expunged and as this moment is noon of the day of election our mind is more in sympathy with the poor office holders whose doom will be sealed tonight than with the consideration of what we will grow for an early pink next year. As the Chicago platform had to be worked into the contest we tried to raise the idea that a golden chrysanthemum was the right thing to adorn the staunch Republican as he marched to the galvanized iron tent to deposit the result of his serious reflections, but it is not working up to the hour of writing, the majority of the voters investing in 5 cents worth of amber colored liquid of the shade of old "Source. d' Or" and then, begorra, they'll vote for ——.

It's raining and has rained slowly but surely for forty-eight hours. It's gentle but fast enough to sink in and do good and not run off into the creeks and then to rivers and find its way to the Atlantic. It was never much worse needed in these parts than just now.

Business take it all round is not bad but there is a slight falling off in the demand for 'mums. The sale of chrysanthemum plants is this year very discouraging. Large quantities of them are sold in the markets but at a wretched price. Perhaps the people have had enough of them for a few years and perhaps when those yellow leaved attenuated field grown plants are gone the better stock will find a sale. There are some excellent pot-grown plants in town and we hope their quality will being their reward before long.

There have been no visitors in town except one most notable exception, Mr. Harry Bayersdorfer. He began to talk to me this morning over the telephone and was well started into some of the reminiscences of his last visit to Poland when the young lady suddenly shut us off; the time limit was not up but the accent was distressing, I suppose.

Mr. D. B. Long has just returned from a flying visit over a large portion of the Empire State but of what he has seen and done I have yet to come.

Prof. Cowell recently returned from a two week's trip through the center of "ornamental horticulture." He would linger but a while over a house of roses, but at the Arnold Arboretum would take a smile with congenial friends. W. S.

Pittsburg.

LONG LOOKED FOR RAIN ARRIVES —STOCK PLENTIFUL.—FLORISTS' CLUB DECIDES TO HAVE NO CHRYSANTHEMUM SHOW THIS YEAR.—FINE EXHIBIT AT PHIPPS CONSERVATORIES.—LIST OF PRINCIPAL VARIETIES OF 'MUMS —MR. FALCONER ARRANGING FOR AN EXHIBIT OF ECONOMIC PLANTS.

The trade situation during the past week remained practically in statu quo, but now that the long looked for rain put in an appearance on Sunday night (none since September in this section), continuing all Monday, and again on Tuesday night, and with its cessation cooler weather setting in, the florists are cheerfully and expectantly awaiting the improvement they have been predicting would manifest itself upon a change of weather that would drive people to indoor entertainments. Stock of all kinds is very plenty and especially chrysanthemums, which are coming in in large quantities, and very fine ones too.

The Florists' Club was to have held a meeting last week, but did not have a quorum present. The flower show project was talked over, and several charitable associations were willing to undertake one, but the florists concluded that it would not be for their best interests to agree to make an exhibit without the growers having made suitable preparations earlier in the year whereby they could show something other than designs and cut flowers, therefore the project is virtually dead for this season.

The greatest and finest chrysanthemum show ever given in America is on view now at the Phipps Conservatories in Schenley Park under the direction and supervision of Mr. Wm. Falconer, superintendent of the park. The above is the opinion expressed by experts. Mr. Wm. R. Smith, curator of the Washington Botanical Garden, who examined it on last Sunday, said: "While I have seen better single specimen flowers in some instances, I have never seen such a good general display. I do not think there has ever been a better show of the kind in the country. I have heard much of Pittsburg becoming a great art and music center, but if this exhibition is an average of your flower shows Pittsburg will soon be the center of horticulture also." Mr. Falconer, when pressed for his opinion a few days before as to how the display compared with similar exhibitions in the large cities of the east, said: "I think I can say without conceit that it is the finest display of chrysanthemums ever made in this country. There have been many notable displays in New York and other cities, where they have shown perhaps the six finest purple varieties, or the dozen finest white ones, or the 24 finest varieties of all colors, or something like that, but for a complete exhibit I think this is ahead of anything done before, and we have the space and surroundings to do the flowers full justice."

The extent of the exhibit can be imagined when one is informed there are 338 different varieties shown and over 9,000 plants in the exhibit. To Mr. Falconer and his able foreman, Mr. Joe Spring, great credit is due, but as Mr. F. says, the main credit belongs to Mr. J. W. Jones, who has had full and complete charge of the growing and developing of the plants that go to form this magnificent display, that the arranging of them was a comparatively easy job. The foliage is particularly fine and is universally commended.

The main exhibit is in the new addition to the conservatories, which is about one-fifth as large as the original ones; consisting of a large center house with two wings from it, all without partitions or divisions between them. One enters the main part directly from the palm house, but a great high fern-covered rockery with water falling over it shuts off a sight of the 'mums until you pass around a short distance, when you get an extended view.

There are no benches set up in these houses except at extreme sides. The walks are winding and the flower spaces are outlined with tufa stone, forming a wall on an average two feet high; inside this is filled and built up so that the highest parts are at least 10 to 15 feet high. The plants here are in pots arranged so that one can see them to their best advantage. At the sides next the glass, and wherever needed, are plenty of cosmos, etc., and a large display of pompon and single chrysanthemums, while at the top of the tufa stone walls, are used small plants of Grevillea robusta in profusion which render the pots invisible.

The varieties that have the most noteworthy blooms are: Purple—Mrs. Geo. West, Miss Eva Robinson, Mrs. A. J. Drexel; pink—Wm. Simpson, Viviand-Morel, Iora, Halloween, Zulinda, Dorothy Toler, Mrs. Geo. A. Magee, Indiana and Mrs. R. C. Kingston; cream pink—Silver Cloud; white—Mrs. H. Robinson, Mutual Friend, Mrs. Jas. Thompson, Cecil Ray, Ivory, Marie Louise, Nemesis and Gen. Dodds; yellow—Gold Dust, Minerva, Georgienne Bramhall, Mrs. Geo. H. Morgan, Golden Wedding, H. L. Sunderbruch, W. H. Lincoln, Clinton Chalfant, Pitcher & Manda, Philadelphia and Miss Johnson; bronze—Golden Gate, Marguerite Jeffords, Sunrise, Nianza, Chipeta and Robt. M. Laird; hairy section—L' Enfant des Deux Mondes, L. Boehmer, Plumed Knight, Mrs. Higinbotham, Mrs. Alpheus Hardy.

Of course the majority are grown to single stem, but there are numerous standards, and plants with 4 blooms to a plant and up to 20 to 25, the flowers of which compare very favorably indeed with many single stems. In fact, it is the general excellence of all that is the wonder in such a large number of plants. On Sundays the houses are crowded; over 3,000 from surrounding territory came in on an excursion to see our flower show and hear the grand organ recital by Frederick Archer in Carnegie Music Hall at the entrance to Schenley Park. These with our own citizens keep the conservatories crowded all the time. The employes are busy now planting for a bulb exhibit and have only 99,150 bulbs with which to make it. It will in all probability be as noted an exhibit as is this chrysanthemum exhibit. REGIA.

Tomato Disease on Forced Plants.

By an unfortunate slip I neglected to add to the directions for the treatment of tomato disease with the ammoniacal carbonate of copper in the FLORIST for October 30 (page 283), that the stock solution made as there directed should be diluted with 15 to 20 volumes of water before using. The intention was to suggest the use of the fungicide as generally applied, only somewhat weaker, as the indoor grown plants are more sensitive. The remedy is the best known.

THE SEED TRADE.

AMERICAN SEED TRADE ASSOCIATION.

JEROME B. RICE, Pres.; E. B. CLARK, 1st Vice-Pres.; S. F. WILLARD, Wethersfield, Conn., Sec'y and Treas.

THE Brown Bag Filling Machine Co. will supply machines for the execution of the government order by the Henry Phillips Seed & Implement Co.

ENOS S. HARNDEN, formerly special agent for the Dept. of Agriculture under Secretary Morton, is now in the employ of the Henry Phillips Seed & Implement Co. Toledo has become quite a Mecca for wholesale seedsmen and their representatives.

MR. C. P. BRASLAN suggests regarding the work of the Seed Trade Association, that if further gratuitous distribution of seeds by the Government is to be discontinued, more active effort within the next thirty days is necessary, otherwise the Government will again distribute seeds in the spring of 1899.

MR. ALFRED SUTTON, J. P., of the firm of Sutton & Sons, Reading, England, who died August 7th last, left a personal estate of $600,000. John and Herbert Sutton are executors. Besides a liberal allowance for his widow, Mrs. Ellen Sutton, his six sons are given approximately $35,000 each and his three daughters about $30,000 each.

CROP REPORTS on German grown flower seeds October 15 indicate that continued rains through September seriously damaged the aster flowers and plants which were finally destroyed by frost October 4. This same frost destroyed the plants of zinnia, marigold and salvia, the crop of which will be very light. The pansy crop may be called a moderate one. Stocks promise a fair yield. The verbena crop is poor, suffering from drouth early in the season and from the September rains.

NEW YORK.—The sale of remaining stock of the McAllister Company took place on Friday afternoon and Saturday morning last. The prices realized were exceptionally high. A great portion of the goods were bought by the Stump Walter Co. Mr. J. P. Cleary was the auctioneer. Mrs. McAllister will continue the seed business at 59 Cortlandt street. Bulbous stock is getting very scarce although on account of warm weather very little bedding has been done so far. Reports to the same effect come from Philadelphia. Some lots of imported Lillum auratum have arrived in poor condition.

Catalogues Received.

Baltimore.

CONTINUOUS RAIN INJURES STOCK.—NO FROST UP TO NOVEMBER 2.—PAPER ON ADIANTUM FARLEYENSE AT NEXT CLUB MEETING.

Two weeks of continuous rain and clouds has not improved the quality of flowers offered, though, no doubt, diminishing quantity has kept the bottom from dropping out of the price list.

A somewhat remarkable thing is that at this writing, November 2, good dahlias, from out doors are tolerably plentiful, no frost having injured the plants yet.

Now that the election is over, it is to be hoped the politically inclined florists and potters will turn their attention to the Gardeners' Club, and abandon the campaign clubs for awhile. Pres. Pentland is going to give us a paper on the cultivation of Adiantum Farleyense at the next meeting, and his experience and success will make it well worth hearing.

Now is a good time to take notes on the effect of a flower show on local trade. There are those among us who claim that a show does no good, and others who think it rather harmful than otherwise. As we have had big shows every fall for a good many years, comparison with a "no show" season was impossible until this year. By all means let us take notes, and make comparisons, and, when we have our show next year, we will have a further chance to verify the conclusions we come to. MACK.

Cincinnati.

The past week has witnessed the worst gluts of the season, affecting everything along the line in cut flowers. Prices of course have taken a great tumble, in fact there is no price to be quoted that would hold good for any length of time. The most popular man of the U. S., President McKinley, was with us on October 30 and 31, but his presence did not affect the trade at large.

The Sixth Street Flower Market has been in a deplorable condition all along and the market florists are compelled to take for plants what they can get. Prices have fallen since last year from 25 to 30%; this applies not alone to cut flowers but to pot plants as well.

Wm. Murphy is on the sick list.

Remember the meeting night November 13, a full attendance is expected.

H. SCHWARZ.

NEW BEDFORD, MASS.—Frank Buffinton has moved into a new and spacious store at 42 North Main street.

CHESTER, PA.—David Wilson formerly with T. Delahunt, has gone into business at Fifteenth street and Edgmont avenue.

Earth Worms.

How can I get earth worms (such as used in fishing) out of the soil in pots? The soil in which my palms are potted holds many of them. O. O.

Texas.

Earth worms may be driven out of the soil by watering the plants occasionally with clear lime water or weak tobacco water, and a weak solution of carbonate of ammonia has also been strongly recommended for this purpose.

W. H. TAPLIN.

For particulars write ELLIS & POLLWORTH, Milwaukee, Wis.

Always mention the American Florist when writing to advertisers.

A White Gloxinia.

A subscriber sends a flower of what was once a white gloxinia but it looked when it arrived here more like the little finger of an old and soiled kid glove. He inqulres if they are not a rarity and mentlons that only one firm of his acquaintance advertises the white variety, Sutton & Son, of Reading, England.

The white may not be as common as the purples and pinks of various shades but they are by no means very rare and among a few hundred bulbs which I purchase every spring there is always a few dozen that will have pure white flowers.

WM. SCOTT.

ANDOVER, MASS.—The officers of the Florists' and Gardeners' Club of Andover are as follows: J. H. Playdon, president; J. D. Fairweather, secretary and treasurer; Geo. Piddington and Geo. L. Bursley, executive committee.

TOLEDO, O.—Mrs. E. Suder's establishment was damaged by fire for the third time on the night of October 29, barn and shed containing baskets and florists' supplies, adjoining greenhouses being burned. Of the greenhouse stock that in one palm house only was injured. These fires are believed to be the work of incendiaries.

TRADE LESS SATISFACTORY.— WARM WEATHER PROBABLY RESPONSIBLE.—NO ALARMING SURPLUS YET.—CALL FOR 'MUMS NOT SO STRONG AS HERETOFORE.

The condition of trade is not as satisfactory as reported last week, whether the continued warm weather is wholly responsible for this falling off in business is hard to say, but nothing else is noticeable to cause a stagnation in trade just at this time. As yet we have accumulated no alarming surplus but at the rate stuff is coming in now it will take but a comparatively short time to demoralize the business, and make the condition of things as alarming as those reported from the larger trade centers.

Practically speaking there has been no increase in the quantity of stuff grown in this vicinity this season, a little more of one thing and a little less of some other, so if the threatened surplus does strike it cannot be blamed to anything but poor business conditions, for the quality of flowers and plants is fully up to former seasons.

It is true beyond a doubt, in my mind that the popularity of the gorgeous Queen of Autumn is not as strong as it has been heretofore, though perhaps it may be a little early to make this certain, yet everything points that way, notwithstanding that the earlier varieties sold well.

Just what to grow for next year is somewhat of a poser just now, but it is very certain that there is only a very limited sale for the $4 to $8 a dozen blooms in this market. Carnations and roses are good and of course improving all the time; violets are a shade better in quality and are moving as well as anything. Cold weather is what we are looking forward to, to quicken business activity. A. H. L.

Cleveland.

Preparations for the chrysanthemum show are proceeding satisfactorily in every way. Arrangements that are believed to be unusually advantageous have been made for advertising the event through experts and the work has already been begun in some of the city papers. Lithographs have also been distributed and other matters are moving.

The weather, which has been monotonously warm and fine this fall, has altered for the worse; we are now in the middle of the second day of steady drizzle with no immediate prospect of cessation. Perhaps it may tend to diminish the supply of flowers to more easily handled proportions.

Bowling club held their regular session Monday night and spent a pleasant evening. Four new members were added to the list. The bowling club is all right. A.

VARIETY OF WEATHER —COLLEGE RECEPTION INCREASES DEMAND FOR FLOWERS. —'MUMS SELL WELL —MEETING OF HORT. SOCIETY.—LECTURE OF PROF. GANONG.

The past fortnight has given a large variety of weather, varying from severe frost to 85° in the shade, compelling the florist to use ice on one day to keep roses for even a few hours, and on the next resorting to firing to keep up a growing temperature.

Business has continued very good, a reception at the college causing a big demand for flowers, and consequently broad smiles on the faces of the fraternity. Chrysanthemums are coming in quite freely and so far have met with ready sales at prices varying from $1 to $3 per dozen.

At the last regular meeting of the Horticultural Society Prof. Ganong, of Smith College, gave a very interesting lecture on the scientific principles underlying gardening operations. The need of protection from injurious parasites and pests, nutrition, air, drainage, warmth, were each taken up and explained in a very clear manner, charts and diagrams being used to illustrate the speaker's remarks. The professor spoke of the improvement of plants as the most important work of the gardener, and explained in concise language the process of cross fertilization and grafting. G. W. THORNILEY.

St. Joseph, Mo.

A visit to the different greenhouse establishments of this city shows well filled houses of choice stock. Wm. Krumm & Son's vegetable department of their range shows up well. D. M. Reichard is pushing a fine lot of carnations, and an immense quantity of self-sown ferns of good sorts are very handy in his special line of floral work.

L. J. Stuppy's stock is looking well. Phillip Heuschell has added two new houses to his range. J. N. Kidd is cutting some fine roses and 'mums; Robinson is the favorite early white. A fine lot of standard 'mums are the show at his place, and a neat clean place shows great credit to his foreman, Mr. E. D. Earlsworth. All report business considerably better than last year. A. M.

New Rochelle, N. Y.

H. A. Siebrecht & Son are putting in new water works at their establishment. They have laid 700 feet of 8-inch pipe and a new Worthington steam pump with a capacity of half a million gallons in twenty-four hours. There is a standpipe one hundred feet high and a tank holding 28,000 gallons of water.

DALLAS, TEXAS.—The Texas Seed and Floral Co. have just completed a new carnation house 20x130, even span, double continuous ventilators on both sides of roof and continuous ventilator on side; roof of the best clear cypress and double strength 16x24 glass, posts set 3½ feet in the ground in cement and gravel. They have also built another violet house 8x130, shed 15x30, and put up another 8 000-gallon tank and a steam pump. This gives them two tanks, steam pump and windmill.' Their roses look well; carnations not dug yet, and only fair, as they have had very dry weather. Chrysanthemums, of which they have about 5,000, are looking fine; they are dwarfer than usual. There will be a flower show held here next week during the state fair and Dallas exposition.

Nashua, N. H.

On Tuesday evening, October 28, occurred the 50th birthday of Judge C. W. Hoitt, and a few of his friends took the opportunity to call and extend congratulations to him at his residence on Concord street. The party included about fifty of Nashua's most prominent citizens. Gov. G. A. Ramsdell and the members of his staff, City Marshal A. S. Eaton, City Solicitor G. F. Jackson and many members of the bar were among the number.

On behalf of the visitors Gov. Ramsdell presented Judge Hoitt with a beautiful cut glass punch bowl and glasses, and to Mrs. Hoitt a handsome chair. The governor made a very felicitous speech, expressing the high regard in which the Judge is held by his neighbors and friends. Judge Hoitt made an appreciative response and said that the latch string to his residence is always out to his friends, after which the party partook of a most elegant spread. Had the Judge's Boston horticultural friends been apprised of the event in advance, it would have taken another house to hold them.

The Best Twenty-five Chrysanthemums.

BY ROBT. G. CAHEY.

[*Read before the Florists' Club of Philadelphia, November 2.*]

MR. PRESIDENT AND GENTLEMEN: Having been requested to name "The twenty-five best chrysanthemums, and why they are the best," I feel certain I could do much better if you had omitted the little word "best," but I will name twenty-five that I think will not all be discarded by the most critical of our "chrysanthemum" growers.

Why I think the following twenty-five varieties are good: I have been discarding varieties for years. I have about seventy varieties at present. The ones I name are all well tested varieties and good growers. I have avoided as much as possible all weak necked varieties and very tall growers. Not being familiar with the "best" new varieties, I thought it better to confine myself to the good old tested ones, such as the following:

Mrs. Jerome Jones. A beautiful broad petaled, incurved white. Stem and foliage extra good. An ideal flower for commercial or exhibition purposes. Height, 3½ feet.

Maud Dean. An extra large incurved pink, of great substance. Stem and foliage very good. One of the finest for exhibition. Height, 4 feet.

Mayflower. A grand incurved white. Lower petals reflexed. Habit, stem and foliage good. A grand bloom for exhibition. Height, 4 feet.

Major Bonnaffon. A soft, clear, high built incurved yellow. Form, habit, stem and foliage good. Ideal flower in every respect. Height, 3½ feet.

Viviand-Morel. Extra large reflexed pink. One of the grandest blooms for exhibition. Height, 5 feet.

Miss Georgiana Pitcher. Fine incurved yellow. Stem and foliage very good. A fine variety for all purposes. Height, 4½, feet.

Silver Cloud. A large delicate salmon. Slightly reflexed. Stem and foliage extra good. Height, 5 feet.

Wm. H. Lincoln. A grand golden yellow, with straight, flat spreading petals. Habit, stem and foliage extra good. A grand variety for all purposes. Height, 4 feet.

Autumn Glow. A large, incurved light bronze. Form like Mrs. Jerome Jones. Fine stem and foliage. Height, 5 feet.

Mrs. H. Robinson. A large broad petaled incurved white, of great depth. Foliage good, but I am afraid the flower is too heavy for the stem. A grand variety in every other way, height, 4 feet.

The Queen. A grand double white of great substance. Stem and foliage good. One of the best for commercial or exhibition purposes. Height, 6 feet.

VASE OF MRS. JEROME JONES, NINE FEET IN HEIGHT, AT THE BOSTON SHOW.

Catherine North. Large incurved bronze and yellow. Stem and foliage very good. Fine for exhibition. Height, 4 feet.

Mutual Friend. Extra large reflexed pure white. Stem and foliage good. When well done I consider this hard to beat for all purposes. Height, 5 feet.

Minerva. A fine incurved golden yellow. Stem and foliage very good. One of the best for all purposes. Height, 4 feet.

W. B. Dinsmore. Large golden yellow incurved. Stem and foliage good. Fine for all purposes. Height, 5 feet.

H. W. Rieman. Large exhibition yellow. Of high rounded form. Stem and foliage extra good. An ideal grower. Height 3½ feet

Miss Agnes L. Dalskov or Pink Ivory. A sport from Ivory, with foliage and habit the same, but a beautiful soft pink, a color good for all purposes. Height, 3 feet.

Eugene Dailledouze. Color, deep gold. Of extra size and form. One of the finest yellows for exhibition. If this flower had the habit, stem and foliage of Liberty then I would say of it "par excellence" in yellows. Height, 6 to 7 feet.

I would state the heights given are from present growth. I thought it would be a guide, when planting for cut bloom. As we often spoil good dwarf varieties by their being crowded between tall varieties, I think it would be a great help to us all if all the catalogue firms would state the height after each variety. I think this would save many a good variety from being discarded.

I thought it would not be out of order to give a few hints on the culture for cut blooms. I would advise a raised table six inches deep. If it is only a foot from the ground it will do. This gives a free circulation of air anderneath, which is a great advantage when using stimulants, as you can apply oftener with less danger of souring your soil or giving your plants cold feet. See that your drainage is perfect. I use about five inches of rather stiff soil with a little bone and cow manure added, prepared in the fall and turned two or three times. Plant early in June. Water sparingly till plants are well established. Give plenty of air night and day. Syringe morning and evening, during July and August when weather permits. Stop the use of stimulants when the flower buds begin to show color. I use no shading up till this time but would advise a slight shading from now, as some of the blooms are very near the glass. This fall the shade has been very beneficial.

As I have confined my paper to the older varieties, I would like some member of the club to name to us twenty of the best up to date varieties for all purposes.

Notes on Newer 'Mums.

There was an unusual number of new varieties placed upon the market the past spring both foreign and to the manner born—altogether too many. In these brief notes I will simply name some which are certainly deserving of culture and are varieties of much promise.

Baroness Adolph de Rothschild is a most magnificent white, with a highly built centre and of good contour; habit and foliage fine.

Mlle. Laura Faure promises to be a most valuable addition to the whites on account of its fine build and exquisite form. This variety won first in Paris last year and was justly praised.

Jubilee is a beautiful clear mauve colored

JOHN BARR'S GROUP OF SPECIMEN PLANTS AT THE BOSTON SHOW.

Ivory. I think the purest and best white for all purposes. Height, 3 feet.

Modesto. A grand incurved yellow, with very high, full centre. Foliage extra large. One of the best for exhibition. With me, inclined to be a little weak necked. Height, 5 feet.

Ruth or Marguerite Graham. A pure white, incurved. Fine stem and foliage, while not as large as many of the others, its general get up and good keeping qualities still make it a favorite. Height, 4 feet.

Chas. Davis. Golden bronze reflex. A sport from Viviand-Morel. Stem and foliage good. Height, 4½ feet.

Defender. Fine dark crimson. Slightly reflexed. Stem and foliage good. Height, 3½ feet.

Golden Wedding. A rich golden yellow. Broad long petals and high built centre. One of the grandest yellows when well done. Height, 6 feet.

Liberty. Deep golden yellow of beautiful form. At first a reflexed; when fully developed, a perfect globular incurved. Habit, stem and foliage good. One of the best late yellows for commercial purposes. Height, 3½ feet.

pink. A distinct and handsomely formed flower for which there is considerable promise. The three above named are from the French raiser V. Calvat.

J. H. Woodford is a white of much promise, broad petall[illegible] of grand incurving form. This has all the requisites of a good e[illegible] sort.

Evangeline when w[illegible]e, is a chaste and beautiful white, which would receive a welcome from the commercial growers for it will, undoubtedly, find a ready sale where fine blooms are des[illegible]

Lawn Tennis will make a single stem variety on account of [illegible] habit and fine foliage; color ma[illegible]k.

Mrs. J. Withers might be termed a low Mutual Friend. It has fine foliage, a stiff stem and is of good color; must be well grown.

Mrs. J. J. Glessner is of a pleasing shade of yellow; good massive build and in every way a very desirable variety; good for bench or single stem pot plants.

Dorothy Spaulding will make a fine exhibition sort but must have extra good care in its growing season; a fine pink of great depth of bloom.

Duchess of Fife, an English variety, has considerable Chinese blood in its veins

VIEW IN THE UPPER HALL AT THE BOSTON SHOW.

and builds up into a fine, massive incurved flower, which makes it a very valuable variety for exhibition purposes.

Sundew is chrome yellow in color, with broad incurving petals. Flower of great depth, and when the stock gets into good vigorous health we predict quite a future for this variety.

Golden Trophy is one of the money-making commercial varieties; comes about October 15; color rich golden yellow; needs no staking; foliage right up to the flower.

Geo. S. Kalb is a fine early variety, color pure white and perfects every flower, comes in from 10th to 15th of October. We commend this variety for commercial purposes.

Mrs. R. D. Douglass was heralded as a rival to Bonnaffon which it much resembles. This variety is well worth further trial. It is of good color, builds up well and has good commercial qualities.

Other of the new introductions are quite promising; many are not as yet finished so it would be out of place to either judge or pre-judge them. The prospect for new varieties for 1898 is somwhat uncertain. Few varieties thus far have run the gauntlet of the committees in the several cities. This is as it should be, and no matter the disappointment to the grower, or raisers of new varieties let us have closer scrutiny and a less number of varieties which are new in name only. We think the several committees should be commended for their guarded carefulness, and not condemned as some are inclined to do. E. G. HILL.

Chrysanthemum Notes

Judging by the conversation heard, the Quaker City committee on awards of certificates, acting under the auspices of the Chrysanthemum Society of America, had a few pleasant tasks to perform on Saturday last.

The Pennsylvania, a sport from the celebrated "Philadelphia," was entered, and ought to have scored high, as nothing in sight—in the writer's opinion—equals it in form, whether viewed from a shipping and selling standpoint, or for exhibition purposes. The petals or florets, or floret-petals, or petal-florets—which is correct?—are the very embodiment of grace and symmetry. Had this flower with its charming formality, the foliage of a Mrs. Jerome Jones, which gives it its constitution, and the petalage of say Maud Dean, it would live and be grown for its great beauty for many years to come. Personally, I always liked the coloring of the Philadelphia, it is so distinct, yet quiet. Others, I know, have found fault with the older variety on account of its naturally quiet color. This new comer will satisfy those who will have none others than decided colors. Pennsylvania is a delicate, yet pronounced shade of yellow, and certainly shows up well either as seen growing or on the exhibition table. Mr. Hugh Graham is to be congratulated on his good fortune in securing so valuable a novelty. Others have had sports from the Philadelphia, but it remained for Mr. Graham to hold on to it until it was "fixed."

Robert G. Carey had a seedling for examination, the Alice F. Carey. It is a reflexed Japanese as to type, and light pink in color, and the bloom is very full of its long narrow florets—the scientific writers call them—and according to Mr. Carey's account, it is a dwarf sturdy grower being only 3½ feet in height. It has strong wiry stems and it should prove to be a good shipper as a cut flower and a dwarf compact grower as a pot plant.

The imported Frank Hardy created a favorable impression. It may be termed immense in size, and its other good qualities make it one of the stars of the season. It has broad, incurving, creamy white florets, and it seems as though it would be great for either exhibition or commercial purposes. It was exhibited by Mr. A. Herrington, Madison, N. J.

Miss Gladys Vanderbilt was exhibited by Mr. John N. May, and a beauty it is. Creamy white in color of the Japanese type, with narrow petals. It ought to be good for either cut flower or exhibition purposes.

Mr. May took a run over to the City of Fraternal Affection in the early part of the week, and gave a glowing account of of another new importation, Mrs. H. Weeks. He declares it to be the best variety in the chrysanthemum line he has ever seen. He describes it as being a very much improved Mrs. Alpheus Hardy, possessing all the good qualities of that, at one time notable, and with none of its bad ones. It must be a dandy indeed.

In casual conversation about the name of Pennsylvania for a chrysanthemum, most people's minds, especially those

more or less sportively inclined, are prone to imagine a variety half red, the other half blue which are the colors of the football team of the University of Pennsylvania, and which have been carried to victory so many times in recent years on the gridiron. Someone suggested the name of Wm. Penn as being less likly to confuse people, whereupon Thos. Cartledge declased that he had known a variety by that name fifty years ago. It was of the Chin se incurving type and pink in color.

examined. Mr. Graham, in no unmistakable tones, stated that he thought it very queer that he had received a report from all the other committees before which Pennsylvania had been placed for examination, and yet could not get it from the Philadelphia committee. Mr. Graham's manners betokened those of a person who had granted a great privilege to the committee in bringing the variety before them and so he did, but that is not the only consideration.

ited by John N. May, Summit, N. J. Ref. Jap. Creamy white, scored commercial scale 92, exhibition scale 89. Pennsylvania, exhibited by Hugh Graham, Philadelphia, Pa. Inc. Jap. Yellow, scored commercial scale 91, exhibition scale 89.

CINCINNATI.—No. 57. Exhibited by N. Smith & Son, Adrian, Mich. Jap. Straw yellow, shading to white, scored commercial scale 73. Pennsylvania, exhibited by Hugh Graham, Philadelphia, Pa. Inc. Jap. Light yellow, scored commercial scale 87.

SOME BUSH PLANTS AND STANDARDS AT THE CHICAGO SHOW

one would naturally come to the conclusion that it must have originated even so long as a half century ago somewhere within the confines of Pennsylvania.

PHIL. A. DELPHIA.

As to Some of the Duties of the Committees Acting for the Chrysanthemum Society of America.

At the annual meeting of the Chrysanthemum Society of America held at Providence last August, it was on motion of G. L. Grant ordered that information concerning awarding of certificates be published in the trade papers, only through the secretary and that the judges be instructed not to give out the number of points scored by any variety examined by them. That seems to be quite plain and easily understood, and no doubt some good reasons existed for its introduction and adoption. My impression is that it passed without dissenting voice or vote.

To-day, Tuesday, I was called over the 'phone by Mr. Graham to give him the number of points scored last Saturday by his Pennsylvania. I could not do so because I had mailed the results of the deliberations by the committe direct to Secretary Elmer D. Smith, Adrian, Mich., and had not kept a memorandum of the points scored of any of the varieties

The resolution as above reported would seem to preclude any committee from giving anything more than a general idea as to how a variety fared at the hands of the committee, but according to Mr. Graham, he received detailed reports from New York, Chicago, and Cincinnati, to which I think he *may* be entitled because the more effectively a variety is advertised the more the owner thereof ought to be able to sell of it. One little matter, however, that Mr. Graham should bear in mind is that there may be a possibility that any and all of the members of the various committees may on certain occasions put themselves to some inconvenience to examine novelties for the benefit of the trade and public at large, and especially for those possessing meritorious novelties.

EDWIN LONSDALE.

Work of the Committees.

At the meeting on Nov, 6 seedlings were passed upon as follows:

PHILADELPHIA.—Frank Hardy, exhibited by A. Herrington, Madison, N. J. Inc. Jap. Creamy white, scored commercial scale 89, exhibition scale 88. Alice F. Carey, exhibited by Rob't G. Carey, Chestnut Hill, Pa. Ref. Jap. Light pink, scored commercial scale 78, exhibition scale 87. Miss Gladys Vanderbilt, exhib-

CHICAGO.—Snow Queen, exhibited by Fred Dorner & Sons Co., Lafayette, Ind. Nevius. White, scored commercial scale 85.

THE EXHIBITIONS.

St. Louis.

The seventh annual crysanthemum exhibition of the St. Louis Florist Club opened in the Public School Library Building at the corner of 9th and Locust streets. Promptly at 7 p. m. Tuesday, Nov. 9, the doors were opened to the public, the executive committee having completed their work. A better place could not have been found in which to hold a flower show.

The two floors were decorated with evergreen festooning. The twelve large columns on each floor were also handsomely decorated, and around each column on the lower floor were placed the chrysanthemum plants grown to standard, and the arrangements of the different classes and varieties was exceedingly artistic. For the past week the committee attended to every detail, and the exhibit was wonderfully well arranged; their associates have every reason to be proud of their success. The lower (ground floor)

Mayflower.

FIRST PRIZE VASE OF 40 WHITE AT CHICAGO.

hall was devoted to plants and the upper floor was given up to cut blooms of chrysanthemums, roses and carnations, also all single specimen chrysanthemum plants.

The orchestra was staged close to the staircase, so that the strains of music could be heard upstairs The orchestra is under the leadership of Prof. Guido Vogel, leader of the Olympic Theatre orchestra.

The display for the first day was 13 sections of cut chrysanthemums, in which there were 53 entries; 7 sections of cut roses, 40 entries; 5 sections of cut carnations, 15 entries; 2 sections of miscellaneous, 6 entries; all chrysanthemum plants and 21 sections of the Shaw prizes.

There were 73 entries for the Shaw prizes for the following plants: Collection of palms, 25 named begonias, 12 kinds of named ferns, largest collection of foliage plants, 25 blooming house plants, 12 named geraniums, 6 draceænas, 12 begonias, 6 named orchids, 6 bouvardias in bloom, 6 cyclamens, specimen of Areca lutescens, specimen Howea Belmoreana, specimen of Howea Forsteriana, specimen of Livistona chinensis, specimen of Pandanus utilis, specimen of decorative plant other than the above, largest collection of hardy chrysanthemums, best 6 species of evergreen shrubs for lawns. A full report will appear in the next issue of the AMERICAN FLORIST, giving all the names of those who captured the prizes.

J. J. B.

Major Bonnaffon.

FIRST PRIZE VASE OF 40 YELLOW AT CHICAGO.

Mrs. S. T. Murdoch.

FIRST PRIZE VASE OF 40 PINK AT CHICAGO.

Germantown, Pa.

The annual fruit and flower show of the Germantown Horticultural Society has become a matter of history. Its record is a good one—a little larger, decidedly better in quality generally speaking and far and away ahead in popularity, of its predecessors. The committee may, on the whole, feel encouraged at the result of their efforts, though there is great opportunity for future improvement.

The features of the show were the really magnificent collection of foliage plants. The cut flowers, especially the roses, were remarkably good for the time of year. The Beauties attracted the most attention; there were five fine vases, from John Burton, John Curwen, Jr., Joseph Heacock, Marmaduke Tilden and J. W. Young. The chrysanthemums in pots were disappointing in point of quantity; this has been more and more noticeable of recent years. Are they unsatisfactory to the private gardeners? Still there were some good plants, but the strength of the 'mums lay in the vases of cut flowers which Mr. Cartledge pronounced hard to beat. The vase attracting the most attention was Hugh Graham's new sport, a yellow from Philadelphia. "Pennsylvania," it is named, identical with the older variety excepting the color, which is a beautiful yellow, an improvement it is thought.

The class for seedling carnations brought out a very fine white from John Burton (Mr. Burton's exhibit was not for competition), a pretty pink from Joseph Heacock, a deep carmine from Stephen Mortensen, which is a cross between Meteor and Portia, well worth further trial, and William Swayne's "Empress," which captured the blue ribbon.

The display of crotons and ferns was excellent, there being four competitors in each class. The music added greatly to the enjoyment of the visitors. Three young ladies judged the decorations, violets and school children's plants. The

other classes were judged by Theo. Cartledge, Chester Davis and Wm. K. Harris and it is needless to add that the work was well done. Special praise is due Wm. Berger for his tasteful decoration.

In the chrysanthemum plant classes John F. Sibson, gardener to Thos. McKean, took three first prizes; Matthew McCleary, gardener to A. H. Mason, one; Frank Smith, one; Matthew Bracken, gardener to H. L. Townsend, one; Henry Dougherty, gardener to Stephen Green, one. For the best seedling not yet disseminated first went to Henry Diehl, gardener to Mrs. E. T. Steel.

In chrysanthemum cut blooms two firsts went to John Sibson, one to Herbert Cliffe, one to Marmaduke Tilden of Madison, N. J., two to Albert Woltemate, one to John Welsh Young.

In foliage plants John Welsh Young, Albert Waltemate, John F. Sibson, Edwin Lonsdale and Michael Sammon, gardener to Mrs. J. M. Shoemaker, each won a first. A special went to Robt. Craig for crotons.

Albert Woltemate won first for display of orchids and John Welsh Young was first on display of foliage and flowering plants arranged for effect.

so many that were single stemmed, the public taking better to fine bush plants. Years ago as high as 900 people would attend these sales but now only about 300 to 400 come in to see the fun.

To sum up in general the past exhibition, it was first-class in every particular, and was well advertised, the newspapers giving us their best reporters and good spaces. The editors were well taken care of with flowers; the school teachers were admitted free on the opening night, the boom of Gen. Harrison's opening speech. Low railroad fares and all other means were employed to invite the public. The weather, by the way, was finer than it ever has been at any show and still the attendance was ridiculously small, and consequently the receipts will not quite cover expenses and premiums, in spite of financial aid from the state and many large special premiums. Are the people tired of flower shows? Could we get more people to attend by making the admission 10 cents or free altogether and have a general sale? There must be some means employed to get the public to attend if any more shows are held.

Among the principal exhibits may be mentioned the new rose Mrs. Robert Garrett, exhibited by H Weber & Son, Oakland, Md. It is a beautiful hybrid tea, Testout style, only more full, and seems desirable. This firm also showed some of the finest carnations seen here, especially Triumph.

The only seedling chrysanthemum certificated was the Pennsylvania, a fine large pure yellow, same shape as Philadelphia, shown by H. Graham, Philadelphia.

F. H. DeWitt & Co., Wooster, O., showed seedling carnation Thomas Laird, a deep pink, very large but somewhat coarse. Conspicuous among the carnations shown were the following varieties: Triumph, Hector, Scott, Snow Queen, Armazindy, Uncle Sam, Buttercup, Jubilee, Portia, Daybreak, Storm King, Pratt, Tidal Wave, Flora Hill, Eldorado.

In the rose exhibits following were shown, very well finished: Beauties, Meteors, Brides, Maids, Cusins, Perles, Sunsets, Kaiserins, Testouts, La France, Morgans and Carnots all very fine.

In chrysanthemum cut blooms the following showed to best advantage.

Nathan Smith & Sons' collection: Mrs. H. Robinson, Charles Davis, Col. W. B. Smith, Lady Byron, Mrs. Geo. Morgan, Lady Playfair, Australian Gold, Mrs. J. J. Glessner, The Queen, Georgienne Bramhall, Harry Hurrell.

H. W. Rieman's collection: Mrs. H. Robinson, Modesto, Harry Hurrell, Mrs. Egan, Viviand-Morel, Queen, Lucilla, Lady Playfair, Mayflower.

E. G. Hill & Co.'s collection: Madam Carnot, Modesto, Mrs. Peabody, The Barrington, Golden Harvest, Gold Standard, Roger Chezelles, Australian Gold, La Garonne, H. Weekes, and a fine collection of pompons.

Bertermann's collection: Major Bonnaffon, The Queen, Mrs. Perrin, Nivens.

Theo. Bock's collection: Modesto, Bonnaffon, Mayflower, Evangeline, Mrs. Perrin.

Messrs. Vesey's collection: Simpson, Mrs. Robinson, H. L. Sunderbruch, La Garonne, The Queen.

Several specimen blooms of Golden Gate, Mrs. W. C. Egan, Red Warrior, were also excellent. Of the bush plants not much can be mentioned; the following varieties were noted: Fred Walz, Marion Henderson, Geo. W. Childs, Jos. H. White, Minerva, Bonnaffon, Mrs. Perrin, Ivory. Among single stemmed plants the following were prominent: Garden Queen, very good pink; Mrs. W. S. Harmon, The Barrington, Mrs. R. D. Douglass, Golden Wedding, T. B. Morse, H.

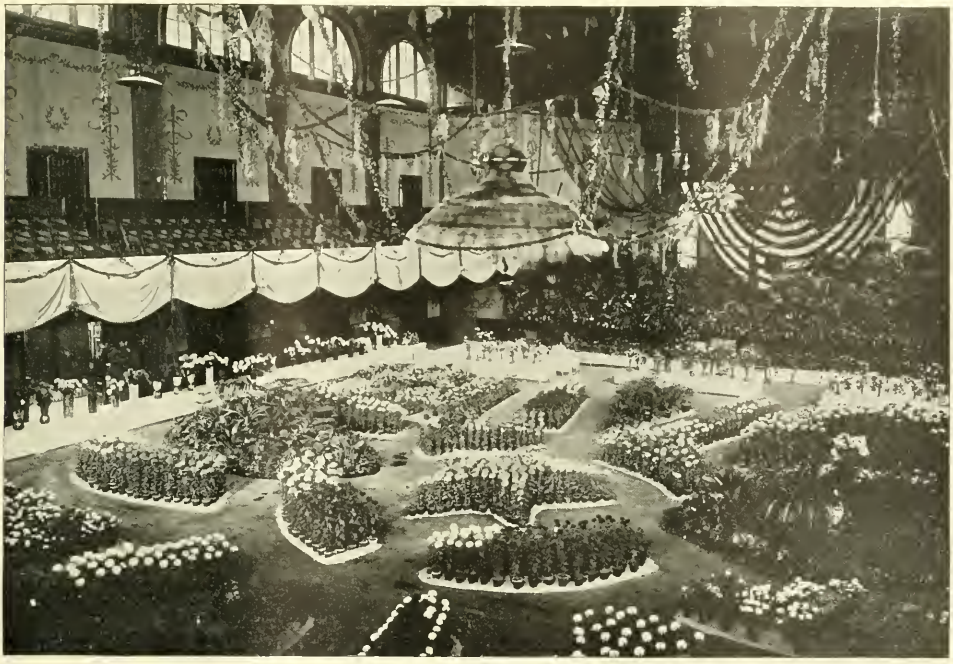
SOME OF THE FLOWERS IN THE INTERNATIONAL COMPETITION AT CHICAGO.

In cut roses Joseph Heacock received four first, Marmaduke Tilden one, and Herbert Cliffe one. In carnations C. W. Ward, Queens, N. Y., won two firsts, Wm. Swayne, Kennett Square, Pa., two, Thos. Meehan & Sons one, Stephen Mortensen one. In miscellaneous cut flowers John Welsh Young had one first, John Curwen, Jr., one and Albert Woltemate one.

The society's certificate of merit was awarded to Hugh Graham for the new chrysanthemum, "Pennsylvania;" to William Berger for large and effective display of foliage plants and chrysanthemums; to Herbert Cliffe for mantel decorations; to Matthew Bracken for a standard chrysanthemum, and to the Andorra Nurseries for elaborate and extensive display of evergreens on stairway and in hall of the building, to John Burton for new white carnation. Honorable mention was awarded to Edwin Lonsdale for a collection of Farleyense ferns; to John Welsh Young for exhibit of Boston ferns, and to Miss E. R. Johnson for a basket of Kieffer pears.

Indianapolis.

The Indianapolis show closed with the usual auction Saturday morning. The plants did not move as rapidly as in former years, very likely because there were



W. Longfellow, Duchess of Fife, Mrs. H. Robinson, G. Pitcher, W. C. Daviess, John C. Lager, Georgienne Bramhall, W. B. Dinsmore, Thanksgiving and Domination.

On Thursday the competition in rose displays was very lively. There were four entries as follows: Bertermann Floral Co., H. W. Rieman, Messrs. Vesey of Fort Wayne and W. H. Coles, Kokomo; the two former carried off the honors as the list called for arrangement and display. Many ferns and other plants, moss, fine vases and other accessories were used to make the tables beautiful. Bertermann's Premium Show Design consisted of two hearts leaning against one another, resting on an easel, above them a basket of Maid roses loosely suspended; it makes a beautiful wedding or valentine design.

The table decorations were Wiegand's in yellow chrysanthemums and ribbons; Bertermann's in red Meteor roses, center mirror and Farleyense ferns, red shaded candelabra. Following are the balance of awards:

Twelve best ferns, 1st, Stuart & Haugh; 2nd, H. W. Rieman. Fifteen cyclamens, 1st, Bertermann Floral Co.; 2nd, John Hartje. Ten Rex begonias, 1st, Stuart & Haugh; 2nd, Bertermann Floral Co. Twelve geraniums, 1st, H. W. Rieman; 2nd, Fred Rieman. Display decorative plants, 1st, Anthony Wiegand & Son; 2nd, Bertermann Floral Co.

Mantel decorations, 1st, Bertermann Floral Co.; 2nd, A. Wiegand & Son. Center table arrange-

PART OF THE INDIANAPOLIS SHOW.

ment, 1st, Bertermann Floral Co. Palm display, 1st, Anthony Weigand; 2nd, Bertermann Floral Co.; 3d, H. W. Rieman.

Ten large blooms chrysanthemums, 1st, Stollery Bros.; 2nd, Stuart & Haugh. Twenty-five blooms Carnations certificate, R. Witterstaetter with Evalina, a beautiful, finely shaped, white, good stem; Stollery Bros., Argyle. Display carnations, 1st, H. Weber & Son; 2nd, Bertermann Floral Co.

White roses, 1st, Stuart & Haugh; 2nd, W. J. & M. S. Vesey; 3d, W. W. Coles. Thirty yellow roses, 1st, Stuart & Haugh; 2nd, M. A. Hunt Floral Co.; 3d, W. J. & M. S. Vesey. Thirty red roses, 2nd, W. W. Coles; 3d, M. A. Hunt Co. Thirty pink roses, 1st, M. A. Hunt Co.; 2nd, W. J. & M. S. Vesey.

Best basket of chrysanthemums, 1st, Fred Rieman; second, Henry Rieman. Table center arrangement, 1st, John Hartje; 2nd, Bertermann Floral Co. Display of roses, 1st, Bertermann Floral Co.; 2nd, H. W. Rieman. Vase Pres. Carnot, 1st, Stuart & Haugh; 2nd, W. W. Coles.

Table decorations, Bertermanns, $25.00; A. Wiegand, $25.00. Best show design, 1st, Bertermann Floral Co.; 2nd, Ed. Schmidt. Best basket of roses, 1st, H. W. Rieman; 2nd, Bertermann Floral Co. Fifty Bridesmaid roses, 1st, Mrs. J. Larsen; 2nd, South Park Floral Co. Best 300 violets, 1st, South Park Floral Co.; 2d, W. W. Coles. Certificate to H. Weber & Sons, Oakland, Md., for new rose Mrs. Robert Garrett.

Among the visitors attending our show and entertainment were J. C. Vaughan, E. Stollery, W. Headsworth, Chicago; R. Witterstaetter, E. G. Gillette, Wm. Murphy, J. Peterson, Ch. Sunderbruch, Cincinnati; W. Giesey, Lockland, O.; Theo. Bock, Hamilton, O.; Harry Balsley, Detroit, Mich.; Elmer Smith, Adrian, Mich., besides many of our well known members of the society throughout the state.

One of the pleasant incidents during the week was a gathering Thursday afternoon around the long table in the "Walhalla." Theo. Bock, master of ceremonies and John Evans "the uncontrollable" made a bet on the bowling contest which was duly and honoarbly settled.

Mrs. Fred. Dorner, Sr., is in the city for a ten day's stay.

As many prominent stores had given liberal premiums, numerous plants and cut blooms were sent to them, making many show windows aglow with chrysanthemum baskets and designs.

Mr. Fred. W. Ostertag, formerly of St. Louis, has started in the florists' shop business in Huder's drug store, corner Wash. and Penn. streets, the same space occupied by Bertermann Bros. a few years ago.

Business is moving along slowly, at times rather brisk. Roses go slow while good chrysanthemum blooms sell moderately well at reduced prices.

The Public Market people complain very much about dullness all through this fall their sales being very slow. W. B.

Port Chester, N. Y.

On Friday and Saturday, November 5 and 6, a flower show was given here under the auspices of the Westchester Gardeners' Society, and it was an exceedingly fine show well arranged, and did great credit to the managers in every particular. Many of the chrysanthemum blooms were quite equal to any that the writer has ever seen exhibittd.

The most notable features were the vases of 25 blooms, in which class Golden Wedding carried off the first premium from seven competitors. Class for 12 blooms in 12 varieties on long stems brought out as many competitors and the competition was very close. In the classes for 6 blooms yellow, 6 white, 6 pink and 6 crimson there was a good competition and some exceedingly fine blooms staged. The judges had a hard matter to decide in the yellows between Modesto and Golden Wedding, but finally the latter won on account of its stem. In whites, Mrs. Robinson was an easy winner; in pinks Mrs. Perrin and in crimsons John Shrimpton. For the best 12 distinct blooms on boards there were 10 entries and a grand lot of flowers, the winning twelve especially so.

Another very strong feature of this show was the fine display of hot house grapes; for the best two bunches black Gros. Colman carried off the first premium and superb bunches they were with berries as large as green gage plums. There were five competitors in the class for two bunches white; the competitions were not there on one exhibit, but in that for one white and one black there were two competitors. Vegetables also found a very attractive feature, and two fine collections of cacti drew many admirers by their odd and independent appearance which distinctly indicated "keep your hands off, or you may get into trouble."

The group of ornamental foliage and flowering plants arranged for effect was also a very telling feature of the show, but as is often the ease with such exhibits they ran to extremes. Two of the groups while very beautiful were deficient in flowering plants to make them attractive, and the other though an extra fine exhibit, on the whole was overdone with flowers.

In specimen plants the show was rather weak, but one plant of Erminilda was certainly a grand specimen and deserves special attention. But the gem of the whole show was in the class for best single flower; this was easily won by the variety Mrs. H. Weeks a magnificent flower of the Mrs. Hardy type with grand stem and handsome foliage.

In roses and carnations the show was a little weak, but collectively the whole show was a grand success and to the following gentlemen and ladies, and their gardeners, must be given the whole credit and we trust that another season they will even excel themselves. The following were the principal exhibitors:

James M. Constable, Mamaroneck; T. Osborn estate, Rye Neck; Hicks Arnold, Port Chester;

James W. Quintard, Port Chester; Wm. H. Parsons, Rye; Mrs. A. A. Anderson, Greenwich; Mrs. E. C. Hoyt, Stamford; Edward Holbrook, Stamford; Commodore James D. Smith, Stamford; Estate of Mrs. Charles Mallory; Port Chester; H. M. Flagler, Mamaroneck; Whitelaw Reid, Purchase; T. L. Park, Purchase; Mrs. Sacket, Rye; Walter W. Law, Scarborough; G. F. Eastman, Tarrytown; Wm. H. Macy, Harrison; H. J. Park, Port Chester; Alex. Mead, Greenwich; Paul Bargervine, Port Chester; Siebrecht & Son, New Rochelle.

Milwaukee

The general appearance of Lincoln Hall was pleasing; in some respects the arrangement was far better than that made a year ago. Credit is certainly due Mr. Klokner for his efforts and accomplishments, and shortcomings as to striking features or expert production of flowers and plants that go to interest a large

A GLIMPSE OF THE MILWAUKEE SHOW.

number of the usual patrons of this display were not due to his management. A careful examination of all the entries and decorations shows that no special preparation has been made by the growers to produce anything of unusual interest for this show. The flowers and plants on the whole were of good quality but were of the standard commercial grade which are found on the counters of all first-class florists daily. The cause of this state of affairs appears to be due largely to the dissatisfaction caused by last year's show. A majority of the florists had determined not to participate in another show, but owing to Mr. Klokner's efforts a number changed their minds and brought the best of what they had to help out.

In awarding the prizes, the judges' ideas appeared to be at variance with the majority of the patrons, in respect to the arrangements. In judging the plants and flowers there was left room for criticism. The President Carnot rose, although in small numbers, showed off beautifully. The Argyle carnation was about as large and fine a bloom as has been shown in this city. Mr. Sylvester's violets were easily gixen first prize. There were no table decorations. There were three mantels, one in particular was somewhat strange in its construction, being filled quite heavily with ferns; on the top shelf were quite a quantity of Farleyense and a few valley, on the lower shelf, nestled as an undergrowth in the shade of the ferns, were American Beauty roses on one side, with Perle roses on the other. On the floor a mixture of pandanus and ferns. The next mantel had some pandanus and yuccas on the top growing up from the side; extending quite high were branches of euonymus with pink berries, also some white snow berry branches; growing up these stems from below were smilax which ran through the pandanus and asparagus, light colored, entwining some of the euonymus branches, on the lower shelf the projecting part was composed of ferns, the inner part also ferns of very light color and texture. The general effect was simple and in harmony. The third mantel was made of three groups of ferns, palms and pandanus and two bunches of red roses. Each one of these three mantels was distinct, one original.

Of the general display of plants arranged for effect, the judges picked out a pyramid of palms and a round bed of chrysanthemums. The arrangement of bouquets and baskets was ordinary. The attendance has not been encouraging.

The prizes as awarded were as follows: Chrysanthemums best 15 plants, second, A. Billings; third, F. Knoor. Best 4 white chrysanthemums, Billings; best 4 yellow, Billings; best 4 pink, Billings; best four red, Billings. Best specimen plant, first, Knoor; second, Billings. Best 10 plants single, first, Freytag; second, Billings. Best standard, first, Frank Dilger. Best 2 yellow, pink and red, first, Billings; second, Knoor. Best 12 any kind, 3 flowers to each, first, Fridock.

Best display of plants arranged for effect, F. Knoor; second, J. Freytag. Best group of ferns arranged for effect. first, J. J. Volum; second, A. Billings. Best 25 begonias arranged for effect, first, J. Knoor; second. Dilger. Best 12 cyclamens, first, S. Haash. Cut blooms, best 15 named varieties, first, H. Stapps; second, A Billings. Best 6 named varieties, first, H. Stapps; second, A. Billings. Fifteen blooms white, 15 blooms yellow, 15 blooms pink, 15 blooms red, each Billings.

In roses, American Beauties, J. Munel was first. Perles, A. Zender; Brides, H. Stapps; Bridesmaids, H. Munel; Cusin, A. Zender; Meteors, J. Munel. Best collection of 6 varieties, H. Stapps; best vase of 25 blooms, J. Muncl. In carnations 25 white, first, Longland & Hony; 25 red, A. Zender; 25 pink, Longland & Hony; Daybreak, H. Stapps. Best violets, first, O. Sylvester; second, Leoffler Bros.

Mantel decorations, first, A. Klokner. Basket chrysanthemums, first, J. Freytag; second, Espenhain & Co. Basket of roses, first, J. Freytag; second, Espenheim.

C. B. W.

Morristown, N. J.

The second annual chrysanthemum exhibition of the Morris County Gardeners' and Florists' Society which was held in McAlpin's Hall, Morristown, November 3 and 4, was an unqualified success both from a horticultural and financial point of view. The arrangement was good; the cut flowers were placed on longitudinal tables, and the groups of foliage plants, and foliage plants with chrysanthemums, (a special feature), were arranged prettily against the walls in half circles and stood out boldly against the white back grounds; in the dome of the hall the incandescent lights were covered with pink crepe paper which shed a soft "dim religious" light which gave the exhibition a unique appearance.

The champion prize for twenty-four blooms was secured by M. McNulty, gardener to M. Tilden, the following varieties deserving special notice—Modesto, Mayflower, The Queen, Major Bonnaffon, Lady Playfair, Pink Ivory, Good Gracious and Philadelphia; second, George Bird with some excellent blooms. In the class for six white, M. Tilden was first with The Queen and George Bird 2nd with Frank Hardy. Six yellow M. Tilden 1st, with good blooms of Minerva; 2nd, G E. Kissell, with Maior Bonnaffon. For any color H. L. Hand took first with Ivory and F. Sameson secured 2nd with Good Gracious.

The rose classes were all well filled and being, so to speak, right in the heart of the rose growing district, the blooms were *par excellence*. Mr. E. Brant swept the first for all varieties including collections, his Beauties being specially good. Walter Reed and J. Ryan divided honors with the seconds.

The groups of chrysanthemums, with foliage plants arranged on space, not to exceed 50 square feet, brought out some excellent competition and were the feature of the show. F. Keeser, was easily first with an excellent arrangement; 2nd, Mrs. A. R. Whitney, (gardener J. Davies), 3rd, G. Bird. For group of foliage plants F. Keeser was again successful; 2nd, J. Elliott. The table decoration of orchids, arranged with foliage was a very pretty class. J. Duckham, gardener to D. Willis James, carried off first honors with a mass of Cattleya labiata, Dendrobium Phalænopsis and cypripediums and foliage interspersed. Lager & Hurrell, showed a pretty lot of Cattleya labiata and Oncidium varicosum, while the modest president of the Society, Arthur Herrington, exhibited a pretty collection of cypripediums, Cattleya labiata, Odontoglossum crispum, Oncidium ornithorhynchum, and the rare Oncidium incurvum album, tastefully arranged, not for competition.

A group worthy of special remark was that by W. Duckham, in which quality, variety and tasteful arrangement, all contributed to a very evenly balanced display. Among the noticeable specimens were Cocos Binoti, Dracæna Sanderiana, some new seedling unnamed dracænas, Araucaria excelsa glauca, Cocos Weddeliana and some well colored crotons. The chrysanthemums arranged in the form of half moons through the groups were of exceptional quality. J. N. May sent, not for competition, six vases of chrysanthemums superbly grown, exhibiting the fol-

A GLIMPSE OF THE SHOW AT MORRISTOWN, N J.

lowing well known commercial varieties: Mayflower (undoubtedly one of the best whites in commerce). Evangeline an excellent Japanese incurved white, very deep flower with standard stem and foliage, and Major Bonnaffon and Pink Ivory. W. Duckham had some fine specimens of Mrs Peabody, Modesto, Philadelphia, Mayflower and Major Bonnaffon.

Arthur Herrington, had several non-competitive exhibits of notable excellence. A group of flowering anthuriums with their many scarlet flowers, attracted the attention of all. He also showed Frank Hardy chrysanthemum a variety "made in England" that has a future before it and bound to find commercial favor. It is an incurved Japanese form something like Good Gracious, petals somewhat broader and flowers much deeper. It is a creamy white with foliage up to the flower, erect stem, good keeper and follows right after Mrs. Henry Robinson, essentially a mid-season variety. Silver Cloud, a blush white, is a good exhibition variety.

A vase of anthurium flowers arranged with grasses and Symphoricarpus purpurea and Callicarpus purpurea, with red berried shrubs exhibited by Mr. Duckham, was very effective. D. W. Burnett staged a pretty epergne of violets; he also secured the honors for competitive violets. Mr. Holmes the Morristown florist secured first for a pretty jardiniere. Wm. Reed and D. H. Burnett also had some worthy exhibits.

Kansas City, Mo.

The third annual chrysanthemum show of the Kansas City Florist Club opened up at the Home Produce Show Building Nov. 3 and ran the balance of that week, opening up Monday again to run all the present week. Kansas City is a good show town and its people patronize a good show to a very liberal extent. As the program was changed every day the same people came back and will come again. The attendance has been good in spite of some bad weather; Friday and Saturday two floors of the big building were taxed to their utmost to hold the crowd. The display of 'mums this year was immense in both quantity and quality. It is doubtful if a better collection of 'mums has ever been seen together before, and certainly not in the west.

As usual, Mr. E. T. Heite, father of chrysanthemum growing in Kansas City, came to the front and in great shape. His specimen bush plants and single stems were beyond criticism, as also was his entry of '97 varieties, which was the special feature of the show. All the entries were good; some showed that they were a little early to be at their best, but all in all were good.

Among the exhibitors E. T. Heite, C. E. Heite and W. J. Barnes led in chrysanthemums, each one making all the entries on the list in pot plants and cut flowers, and W. J. Barnes and the Heite Floral Co. in design work, some pretty work being shown; the Heite Floral Co.'s piece representing Brooklyn bridge, and a basket of chrysanthemums Ivory in Adiantum Farleyense, made up by W. J. Barnes, being probably the best.

Among the new varieties grown by Mr. E. T. Heite were Madame Carnot, which is fine; Le Colosse Grenoble, this being the largest flower in the show (14 inches in diameter); Pride of Exmouth, Mrs. Geo. Carpenter and many others of the older kinds, among which were Wm. Simpson for pink, Mrs. Henry Robinson and the Queen for white, G. S. Conover, Golden Trophy and Yellow Queen for yellow, with Geo. W. Childs for red. These were the best of the colors, but there were hosts of each color in almost every tint and shade.

Cut roses and carnations were not overlooked and were well represented. Among the carnations were a bunch of the new seedling, Argyle, from Stollery Bros., Chicago, that were the admiration of everybody.

The attraction for this week, outside of the many 'mums that are being brought in as fast as ready, is the Flower Queen of the Topeka, Kan. carnival, Miss Edna Whitney, of Chillicothe, Mo. This young lady will preside at a booth erected for her for the purpose of selling cut 'mums, in which place her beauty and distinguished appearance make quite a sensation. There are quite a number of visiting florists in town, and all take in the show as a matter of course. W. J. B.

Worcester, Mass.

By far the best chrysanthemum exhibition we have ever held is the general opinion of the people who have followed up the shows, and it is very pleasing that the few that have worked hard and overcome many obstacles to keep the society up to holding a fall exhibition to hear this verdict. The arrangement of the hall is very striking and the palms and foliage plants are used in such a way that in viewing the whole from the gallery the picture is toned down to a pleasing harmony. Perhaps the greatest improvement noticeable is in the cut blooms; without a doubt they are the finest ever shown in this city.

The vases of twenty-five blooms of one variety were the most striking feature of the show, and there wasn't a poor vase among them. In this class Philadelphia, Mrs. Perrin, Modesto, Niveus and Queen were all exceptionally well done. The vases of twelve blooms of one variety were also a remarkably even lot of good blooms, and Minerva, Mrs. J. Peabody, Mrs. Perrin, V. Morel, Bonnaffon and Mrs. J. Jones stood out prominently in this class. In twelve and six distinct named varieties were some especially well-done blooms, and there was a greater showing in this class than ever before. E. V. R. Thayer, Fred. A. Blake and H. H.

A. Lange were well represented in this number.

It is always hard to get people with limited space to grow plants for this exhibition, as it takes such a lot of room to do it in; but this time we had all we could accommodate in our spacious hall, and the quality of the plants was much improved.

We had a splendid showing of carnations; fine displays were made by F. A. Blake, H. F. A. Lange, C. W. Ward (Cottage Gardens) and A. Ropert, Tewksbury, Mass., showed his two seedlings, Mayor Quincy and E. Sheppard. The display of roses and violets was also very fine, and always very popular with the public. H. F. A. Lange, C. D. Thayer, F. B. Madaus and Mrs. Thos. Ward showed large collections of decorative plants arranged on the stage and in pyramidal groups on the floor of the hall. The weather, as usual, was dead against us; it rained steadily all day Tuesday; and this fact, and a large concert given by a local militia company, made the attendance for the opening day very light. Mr. George McWilliams, of Whitinsville, was judge of plants and flowers. Continued in our next. A. H L.

Chicago.

The opening of the annual chrysanthemum show was preceded by a drizzling rain that boded ill but fortunately the skies cleared by noon and the first day's paid admissions were double those of the first day last year. The display is an advance on that of any previous show in both quantity and quality,and particularly in quality. On entering the hall the first thing to catch the eye is the magnificent lot of geraniums exhibited by W. N. Rudd. They are wonderful examples of cultural skill, and Mr. C. W. Johnson, the grower, is entitled to the highest praise. None of the visiting florists had ever seen such geraniums before. They were in 10-inch pots, three to four feet high, symmetrical in form with perfect foliage down to the pot and covered with splendid trusses of bloom. They were a revelation to the professionals and the general public found it difficult to believe that they were the common geranium simply grown to perfection. Back of these in the center of the hall is the superb group of decorative plants shown by John Algots, including a Kentia Forsteriana about twenty feet tall and perfect in every respect. Around the hall are grouped the various displays of chrysanthemum plants, standard and bush, and other blooming and foliage plants in profusion. In the center of the stage is a bunch of dried Eulalia Japonica plumes with stems eight or nine feet tall, displayed by Secretary W. C. Egan. and to one side of the stage is the superb display of chrysanthemum blooms backed by palms from E. Wienhoeber, which is not for competition.

The competing cut blooms are all in the adjoining armory. The vases (or rather jars or tubs) of 40 blooms are truly remarkable. W. N. Rudd's vase of Mayflower are undoubtedly the largest 40 blooms ever shown in this city, and his 40 Bonnaffons were also superb. He led in nearly all the vases of 40 blooms and they were a magnificent collection. In the armory are also many more chrysanthemum plants, groups of palms, etc, while in one corner is the art exhibit which experts say is excellent. "Flowers, Art, Music" was the line used by the press committee in all the advertisements and the combination seems to appeal strongly to the people. Following is list of awards for first day with notes on the winning collections.

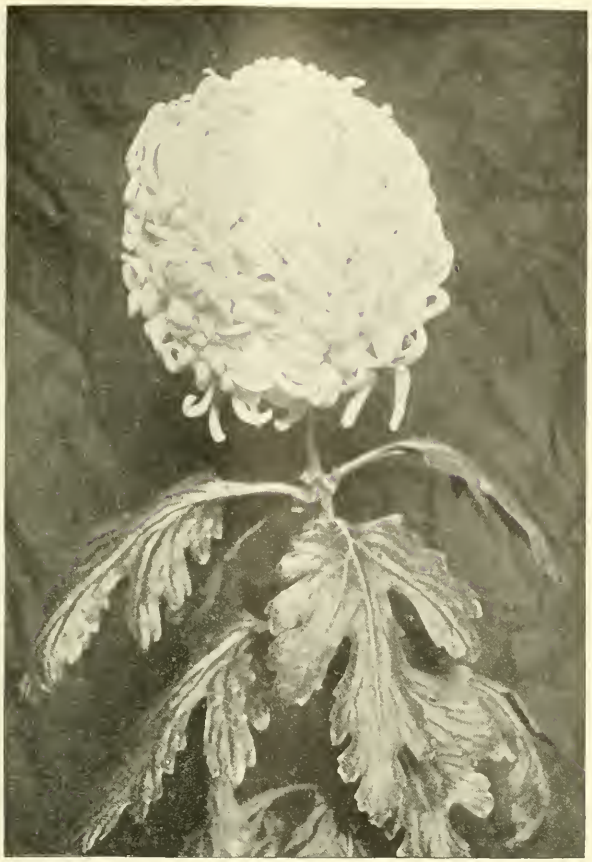
CHRYSANTHEMUM CUT BLOOMS.

For 40 blooms, one variety, white, 1st, W. N. Rudd, Mt. Greenwood, Ill., with vase of most magnificent blooms of Mayflower; 2nd, E. G. Hill & Co., Richmond, Ind., with a vase of very good blooms of Mrs. C. H. Weeks; Nathan Smith & Son, Adrian, Mich., staged a vase of Mutual Friend. For 40 blooms, one variety, yellow, 1st, W. N. Rudd, with a particularly fine lot of Major Bonnaffon; 2nd, E. G. Hill & Co., with Modesto; Fred. Dorner & Son, Lafayette, Ind., entered a vase of Bonnaffon. For 40 blooms, one variety, pink, 1st, W. N. Rudd with Mrs. S. T. Murdock; 2nd, Dorner & Sons with same variety. For 40 blooms, any other color, 1st, W. N. Rudd with Rinaldo; 2nd, Nathan Smith & Son with same variety.

For best 20 varieties, one bloom each, 1st, W. N. Rudd. Among the varieties staged in his exhibit were Mutual Friend, Evangeline, Modesto, Maud Dean, Western King, Mrs. Jerome Jones, Philadelphia, Viviand-Morel, Mrs. S. T. Murdock, Clara Goodman, Golden Wedding; 2nd, Nathan Smith & Son with a beautiful collection; 3rd, Crabb & Hunter, Grand Rapids, Mich.; among other exhibitors were E. G. Hill & Co., J. C. Vaughan and Henry Smith, Grand Rapids, Mich. For best 12 varieties, one bloom each, 1st, W. N. Rudd. This collection included blooms of Modesto, Mutual Friend, Mrs. J. J. Glessner, Philadelphia, Mrs. M. A. Ryerson, Viviand-Morel, Mrs. Perrin; 2nd, Jas. Hartshorne, gardener to H. N. Higinbotham, with Mayflower, Viviand-Morel, Reine D'Angleterre, Mrs. Henry Robinson, Mrs. A. J. Drexel, Modesto and others; 3rd, Nathan Smith & Son; other exhibitors were Crabb & Hunter, Henry Smith, both of Grand Rapids, Mich.; Stollery Bros., Argyle Park, Ill., Fred. Dorner & Sons Co., Lafayette, Ind., and H. Weber & Sons, Oakland, Md. For best 6 blooms, one variety, white, 1st, Hills & Jakobsen, Maywood, Ill., with Mayflower; 2nd, W. N. Rudd with same variety. For best 6 blooms, one variety, yellow, 1st, W. N. Rudd with vase of Modesto; 2nd, E. G. Hill & Co. with Major Bonnaffon. For best 6 blooms, one variety, pink, 1st, F. Bahr, Highland Park, Ill., with vase of Viviand-Morel, which were of exceptionally good color; 2nd, W. N. Rudd with Maud Dean. For best 6 blooms, one variety, red, 1st, Nathan Smith & Son, with Geo. W. Childs; 2nd, Crabb & Hunter, Grand Rapids, Mich., with Oakland. For best 6 blooms, one variety, bronze, 1st, Henry Smith, Grand Rapids, Mich., with Mr. Hicks Arnold; 2nd, W. N. Rudd with Harry May. For best 6 blooms, any other color, 1st, Nathan Smith & Son, with Silver Cloud; 2nd, Crabb & Hunter with Chas. Davis. For best 12 blooms Mrs. J J. Glessner, 1st. Nathan Smith & Son.

For best collection, named varieties, one bloom each, not less than 40 varieties, 1st, E. G. Hill & Co. Among the varieties staged were Miss Georgiana Pitcher, Autumn Glory, Mrs. S. R. Wilks, Mrs. Perrin, Mrs. C. H. Weeks. Mrs. C. Kingston, Major Bonnaffon, Corsair, Le Colosse Grenoble, Modesto, Bessie Hollis; 2nd, Nathan Smith & Son. For best collection anemone varieties, one bloom each, not less than 15 varieties, 2nd, Nathan Smith & Son. In this collection were included Mrs. F. Gordon Dexter, Enterprise, W. W. Astor, Mrs. Hugh Gardner, Grace Darling, Surprise, Delicatum.

In the international competition, in Michigan, 1st, Nathan Smith & Son with Western King, Mutual Friend, Mrs. J. J. Glessner, Nianza, Philadelphia, Golden Gate, Sunstone, Minnie Wanamaker, Iora; in Illinois, 1st, W. N. Rudd with blooms including the following varieties: Modesto, Mutual Friend, Mrs. M. A. Ryerson, Mrs. Jerome Jones, Maud Dean, Golden Wedding, Viviand-Morel, Mrs. Perrin, Western King. Modesto; in Minnesota, 1st, Aug. Swanson, St. Paul; in Colorado, 1st, Mrs. R. Mauff, Denver; in Wisconsin, 1st, Otto Speidel, gardener to P. D. Armour, Oconomowoc; in Kentucky, 1st, Nanz & Neuner, Louisville; in Massachusetts, 1st, Elijah A. Wood, West Newton; in Indiana, 1st, E. G. Hill & Co., Richmond; in Maryland, 1st, H. Weber & Sons, Oakland, with extra good flowers of Modesto and Mrs. Peabody (white). A prize of $50 for the best dozen blooms, among the winning state entries, went to Nathan Smith & Son for their dozen blooms, and they were well worthy of the honor. For best collection of orchid blooms, Mr. E. G. Uihlein took first prize with a pretty table of flowers.



CHRYSANTHEMUM PLANTS.

For best specimen plant, white, 1st, W. N. Rudd with Mutual Friend, (very formal in shape but beautifully bloomed); 2nd, John Reardon, gardener to Martin A. Ryerson, also with Mutual Friend. For best specimen plant, yellow, 1st, John Reardon with Miss Georgiana Pitcher; 2nd, W. N. Rudd with Lincoln. For best specimen plant, pink, 1st, John Reardon with Louis Boehmer; 2nd, W. N. Rudd with Chebeaque. For best specimen plant, any other color, 1st, John Reardon; 2nd, W. N. Rudd with E. M. Bigelow. For best 1 standard, not less than 30 inch stem, white, 1st, John Reardon with Dean Hole; 2nd, Crabb & Hunter. For best 1 standard, not less than 30-inch stem, yellow, 1st, Crabb & Hunter; 2nd, J. C. Vaughan. For best 1 standard, not less than 30-inch stem, pink, 1st, Crabb & Hunter; 2nd, J. C. Vaughan. For best 5 standards, not less than 12 inch stems, nor more than 24 inch stems, 5 varieties, 1st, John Reardon. (In this exhibit was included a most magnificent half standard, variety Miss Georgiana Pitcher.); 2nd, J. C. Vaughan with a very excellent collection.

For best 5 specimen plants, 5 varieties, not over 10-inch pots, 1st, John Reardon with Dean Hole, Mrs. M. A. Ryerson, The Bard, Golden Gate, Major Bonnaffon; 2nd, W. N. Rudd with W. H. Lincoln, Mrs. Perrin, Modesto, Dean Hole, Mutual Friend. For best 10 specimen plants, not less than 5 varieties, not over 8-inch pots, 1st, John Reardon; 2nd, W. N. Rudd. For best 25 plants, grown to single stem, white, 1st, Crabb & Hunter with Mrs. H. Robinson; 2nd, J. C. Vaughan with an excellent collection of white varieties. For best 25 plants, grown to single stem, yellow. 1st, Crabb & Hunter with majority of plants Major Bonnaffon; 2nd, J. C. Vaughan with mixed varieties. For best 25 plants, grown to single stem, pink, 1st, J. C. Vaughan with mixed sorts; 2nd, Crabb & Hunter with Jayne and Mrs. Perrin. For best plant not disbudded, not tied and with no artificial support, 1st, no award; 2nd, Crabb & Hunter. For best one plant, grown to single stem and bloom, 1st, Henry Smith, Grand Rapids, Mich., with Major Bonnaffon; 2nd, Crabb & Hunter with Mutual Friend.

MISCELLANEOUS PLANTS.

Most interesting grafted specimen plant of any kind, 1st, R. Mueller, gardener to A. S. Trude; 2nd, J. C. Vaughan. Best 10 geraniums, not over 10-inch pots, white, 1st, W. N. Rudd with the most magnifi-

NEW WHITE CHRYSANTHEMUM FRANK HARDY, AS SEEN AT THE BOSTON SHOW.

cent lot ever seen in Chicago. Best 10 geraniums, not over 10-inch pots, pink, 1st, W. N. Rudd (these were also magnificent flowers); 2nd, J. C. Vaughan. Best 10 geraniums, not over 10-inch pots, red, 1st, W. N. Rudd, (equal to his others); 2nd, J. C. Vaughan. Best 10 begonias, not less than 5 varieties, not over 10-inch pots, 1st, H. Smith, Grand Rapids; 2nd, J. Algots. Best 10 cyclamens, 1st, Kalous Bros.; 2nd, Fred Bahr, Highland Park, Ill.

Best collection cypripediums, in bloom, 1st, H. Skjoldager, gardener to E. G. Uihlein. Best collection of ferns, 1st, Geo. Wittbold; 2nd, J. Algots. Best 10 foliage plants, 6 varieties, not over 6-inch pots, 1st, E. G. Uihlein. Best one palm, 1st, J. Algots; (This was a most remarkable specimen of Kentia Belmoreana over 8 feet high; a superb plant.); 2nd, J. C. Vaughan. Best one araucaria, 1st, John Reardon; 2nd, Art Floral Co. Best decorative plant, other than preceding, 1st, J. Algots; 2nd, H. F. Halle. Best one fern, 1st, J. Algots with a beautiful specimen of Blechnum Braziliensis. Best one climbing foliage plant, 1st, J. Algots with a handsome specimen of Cissus discolor; 2nd, Art Floral Co.

Best display of stove, decorative and greenhouse plants arranged for effect, open to all, 1st, J. Algots, (This collection included a most remarkable specimen of Kentia Forsteriana about 20 feet tall with about a 12 foot spread and with every leaf perfect; 2nd, Geo. Wittbold. This collection was also a very excellent one. Best display of stove, decorative and greenhouse plants, arranged for effect, open to commercial florists only, 1st, H. F. Halle; 2nd, Geo. Wittbold. Both of these exhibits included excellent collections of commercial decorative plants. Best 2 hanging baskets or pots, 1st, J. Algots with handsome baskets of Panicum variegatum.

ROSES.

The rose competition on Wednesday brought out a beautiful display of fine blooms. A leading feature was the grand collection shown by Bassett & Washburn, not for competition. This included an immense jar of magnificent American Beauties, every one a specimen. The collection included all the forcing varieties, and there was also a vase of early Lilium Harrisii.

In competing classes Wietor Bros. were first on 25 Beauties and Reinberg Bros. took first on 6 blooms of same. In the vases of 40 blooms each Reinberg Bros. were first on Kaiserin, Testout, Bride, Bridesmaid, and Perle des Jardins. Wietor Bros. were first on Meteor, and Hills & Jakobsen won first honors on Mrs. Pierpont Morgan. For 25 any other variety Reinberg Bros. were first with a vase of Pres. Carnot.

In the classes for a dozen blooms of each Reinberg Bros. were first on Kaiserin and Testout; Wietor Bros. on Meteor and Perle des Jardins; Hills & Jakobsen on Mrs. Pierpont Morgan. For best dozen any other variety Reinberg Bros. were first with Pres. Carnot.

The silver cup for a dozen blooms of best variety never before exhibited in this country was won by H. Weber & Son, Oakland, Md., with Mrs. Robert Garrett, the fine pink rose that originated with Mr. John Cook, of Baltimore.

NEW CHRYSANTHEMUMS.

A certificate of merit was awarded to A. Herrington, Madison, N. J., for the grand new white variety Frank Hardy. The blooms arrived in fine condition and attracted much attention. Special mention was given W. N. Rudd for his yellow sport from Mayflower. It is identical with the parent variety except in color.

TABLE DECORATIONS.

There were seven entries in the class for table decorations. These must be maintained through the remaining three days of the show, which amounts practically to a new competition each day, and the one having the highest average of points during the four days wins first prize. The decorations for Wednesday, the first day, are described in the order in which they stood in the estimation of the judges.

W. J. Smyth, a round table with large cut glass trumpet vase of American Beauty roses in center and favors of valley and violets tied with narrow purple ribbon.

Art Floral Co., center piece a very slender trumpet vase of Bridesmaid roses, with a low mound of Bridesmaids in Farleyense fern at the base. Favors of the same rose.

P. J. Hanswirth, center piece a low cut glass dish of cattleyas and oncidiums in Asparagus Sprengerii, placed on a round mirror. Favors of orchids and asparagus, placed around the edge of the mirror. This was certainly the most novel arrangement and it was very graceful and effective.

John Algots, a low center piece of short stemmed American Beauties in Adiantum cuneatum. Around it were four small trumpet vases of the same rose and adiantum. Favors, Beauties and Meteors.

Samuel Muir, center piece a small round dish of lily of the valley interspersed with Adiantum Farleyense. Favors of violets and valley.

O. J. Friedman, a heart shaped table with center cut out. In the center was placed a vase of Mayflower chrysanthemums so that the blooms extended by a short distance above the table, while the inner edge of the heart was trimmed with Adiantum Farleyense.

Klunder Floral Co., center piece a bowl of Testout roses and at each end a small bowl of valley. Favors Testouts and valley.

THURSDAY.

In the dinner table arrangements for Thursday the board of lady judges was unable to distinguish between the tables of John Algots and the Art Floral Co. which were tied for first place. The former consisted of a centerpiece of Cypripedium insigne very gracefully arranged in Adiantum cuneatum, with favors of the same cypripedium—three flowers for the ladies and one for the gentlemen. The Art Floral Co. had a cut glass trumpet vase

of Mayflower chrysanthemums resting on a mirror around the edge of which were placed sprays of asparagus and Pteris argyræa.

Second place was awarded to Mr W. J. Smyth. This arrangement consisted of a low centerpiece of Cattleya Trianæ inserted in Adiantum cuneatum with Adiantum Farleyense at the base. Around the centerpiece were six small glass vases containing two cattleyas and one fern frond each; favors of lily of the valley.

Mr. P. J. Hauswirth was third with a mound of cattleyas in Adiantum Farleyense and sprays of valley intermingled. Favors for ladies were of cypripediums and oncidiums with Asparagus Sprengerii for foliage, and for the gentlemen lily of the valley.

The Muir table, which was fourth on the list, consisted of a low cut glass trumpet vase of Viviand-Morel chrysanthemums resting upon a small square mirror, around which were garnishments of Asparagus plumosus intermingled with Adiantum cuneatum and Farleyense and a few Morel chrysanthmums. Favors of lily of the valley and Farleyense for the ladies and carnations for the gentlemen.

Fifth on the list was that of Mr. O. J. Friedman, a heart shaped table, the same as the day before, in the center a vase of American Beauty roses, the taller ones rising about a foot above the level of the table, with garnishments of Adiantum Farleyense along the inner edge of the heart; no favors.

The Klunder Floral Co. arranged a long table with centerpiece of Kaiserin and Testout roses with long sprays of Kaiserins extending in each direction nearly the length of the table. Favors of same roses and lily of the valley.

CARNATIONS.

On Thursday the judges found a brilliant array of carnations in the vases that covered the long tables in the Armory, and their work progressed slowly owing to the unusually fine varieties on which they had to pass. The awards were as follows:

Best 50 blooms, white, Annie Lonsdale, 1st, Reinberg Bros. Best 50 blooms Lizzie McGowan, 1st, W. N. Rudd; 2nd, Wietor Bros. Best 50 blooms Alaska, 1st, Wietor Bros.; 2nd, H. Weber & Son. Best 50 blooms any other white, 1st, Reinberg Bros. with Harrison's White; 2nd, H. Weber & Son. Best 50 blooms red, Portia, 1st, H. Weber & Son. Best 50 blooms Jubilee, 1st, H. N. Higinbotham (J. Hartshorne, gardener); 2nd, W. N. Rudd. Best 50 blooms any other red, 1st, H. Weber & Son with Hector. Best 50 blooms pink, Tidal Wave, 1st, Henry Mundt; 2nd, J. Hartshorne. Best 50 blooms William Scott, 1st, J. C. Ure; 2nd, H. Weber & Son. Best 50 blooms Daybreak, 1st, Henry Mundt; 2nd, J. C. Ure. Best 50 blooms Mme Diaz Albertini, 1st, J. C. Ure. Best 50 blooms Triumph, 1st, H. Weber & Son; 2nd, Wietor Bros. Best 50 blooms Rose Queen, 1st, J. C. Ure. Best 50 blooms any other pink, lighter in color than William Scott, 1st, W. N. Rudd with Mrs McBirney; 2nd, Reinberg Bros. with Kohinoor. Best 50 blooms, striped variety, Armazindy, 1st, H. N. Higinbotham; 2nd, Wietor Bros. Best 50 blooms, any other striped except the yellow ground, 1st, F. Dorner & Sons Co. with Mrs Geo. M. Bradt; 2nd, Reinberg Bros. with Nancy Hanks. Best 50 blooms, yellow, 1st, W. N. Rudd with Mayor Pingree; 2nd, Reinberg Bros.

Best 25 blooms, white, introduction of 1897, 1st, W. N. Rudd with Flora Hill; 2nd, F. Dorner & Sons Co. Best 25 blooms, pink, introduction of 1897, lighter in color than William Scott, 1st, H. Weber & Son with Mrs McBirney; 2nd, W. N. Rudd. Best 25 blooms, pink, introduction of 1897, not lighter in color than William Scott, 1st, F. Dorner & Sons Co. with Mrs. C. H. Duhme. Best 25 blooms, red, introduction of 1897, 1st, Reinberg Bros. with Morello. Best 25 blooms, any other color, introduction of 1897, 1st, W. N. Rudd with Marie Louise; 2nd, F. Dorner & Sons Co with same variety.

MISCELLANEOUS.

In violets, best 100 double, 1st, O. Sylvester; 2nd, Loeffler Bros. The judges made honorable mention for the meritorious display of decorative plants for the following entries: Board of Lincoln Park Commissioners, J. C. Ure, J. C. Vaughan, Art Floral Co., Andrew McAdams and S. Muir; also for meritorious display of plants and cut flowers to Mr H Schiller. The silver gilt fruit dish for the most meritorious display of plants and cut flowers in the show was awarded to E. Wienhoeber.

Philadelphia.

The chrysanthemum exhibition of the Pennsylvania Hort. Society opened under most favorable conditions last Tuesday evening. Rain had fallen a good part of the day but the night was beautiful and clear, and the cool bracing air kept pedestrians moving along at a lively gait. The attendance for the first night was not, however, quite up to expectations, but it is hoped that later on the good record of last season will be excelled.

Taking the show as a whole it is much better than last year's, the character seems to be changing somewhat there being a more varied range of exhibits and particularly fine collections of ornamental foliage plants and palms. The H. A. Dreer Co's display was a grand one and did more to make the exhibition a success than that of any other firm. Their entries not for competition were to be seen at every turn and attracted much attention. Charles Fox, Jr. a new exhibitor, had some fine large palms in conspicuous places. His arecas were particularly choice some of them standing twelve to fifteen feet in height, these added greatly to the general decorative effect of the hall. The groups of palms arranged by Messrs. John Westcott. Albert Woltemaite for competition, and those of Chas. Fox and J. Kift & Son of house plants from their general stock filled up the sides nicely and made a good background and contrast for the chrysanthemum plants in flower that occupied the center portion of the hall.

A word about these latter plants: we believe there was a time when we may have gone into ecstacies over no better stock. We have in the past certainly admired well grown, well flowered and sufficiently staked chrysanthemums, but with few exceptions those staged the present season, were far from perfection in any of these details There were quantities of stakes and but few flowers and less foliage to hide them. We think that the schedule makers should establish a standard and make intending exhibitors live up to it. The many fine blooms on the cut flower tables, almost side by side with the plants, make the latter look so very insignificant that they scarcely attract the attention of the visitor.

There were three tables of orchid plants in flower which made a grand show and were the centers of attraction. Hugh Graham's display was very fine, the arrangement was good, cork bark together with Farleyense ferns was placed artistically among the plants and a few tree branches rising from the center of the table supported baskets of orchids from which hung great sprays of flowers. Mrs. Geo. B. Wilson's collection was also a beautiful one as was that of Albert Woltemaite. As a border to his table he used Asparagus Sprengerii with very good effect.

In the lower hall H. A. Dreer's display of aquatics was very fine, backed as it was by a beautiful group of kentias. Fine bays also from Dreers, were arranged all around the walls, two magnificent specimens standing like sentinels either side of the main stair case. A fine bank of Cibotium Schiedei from the same firm was to be seen to the right of the entrance.

The cut chrysanthemum display was quite up to the standard of recent years, in fact it excelled in some respects. The blooms from E. M. Wood, of Boston, were undoubtedly the largest ever exhibited in Philadelphia; there were two vases, six each of Mrs. Jerome Jones and Modesto, which were really remarkable flowers, and many were the "Oh's and Ah's" and "wonderful," or like exclamations to be heard as they came into the view of the passing throng. One man said they had been crossed with cauliflowers which accounted for their immense size. Two vases of fifty immense flowers in each, one Golden Wedding and the other Frank Hardy, exhibited by H. McK. Twombly of Madison, N. J., were of unusual merit. The cut blooms were, we think, not given the space their general excellence warranted, being crowded too closely together. The mistake of last year was made again this that of having the tables too high; eighteen inches is plenty high enough, while many blooms would look better on one twelve inches from the floor. The exhibit could then be looked over as a whole, which would give them an added effect. A railing attached to the edge of the table would protect the blooms from being rubbed or bruised.

Hugh Graham's new carnation, sport of Philadelphia, which he has christened Pennsylvania, was one of the striking features. At the first landing of the grand staircase were two large vases one of Philadelphia and the other of Pennsylvania. These showed the difference between the two varieties to be simply one of color, the sport being of a good golden color, like Major Bonnaffon. A vase of the same in the main hall was arranged in front of a background to which was attached the favorable notices and certificates of merit it had received at the various cities it had been exhibited in this season. So far as heard from it has passed seven national chrysanthemum committees in various cities, obtaining on an average ninety points. It certainly is a beautiful flower.

In the lecture room of the lower hall was placed the vegetable exhibit. This was quite an attraction for many. There has been a noticeable improvement in the fruit and vegetable departments of late years, this result being attributed to the more liberal and intelligent policy of the society and the public-spirited action of the large seed houses of the city in offering special premiums. Last year's display was a distinct advance on its predecessors and this year's exhibition shows marked progress not so much in quantity as in quality of the specimens. The discriminating and commendable action of last year's judges in ignoring mere size as against quality has borne good fruit this

OFFICERS OF THE ST LOUIS FLORISTS' CLUB.

year and has affected a distinct improvement in the specimens shown. On account of this enlightened policy the fruit and vegetable department are slowly assuming their proper place, and are receiving the attention they deserve from the public. The effect on the growers is also good. The incentive to grow better stuff is being responded to in a most gratifying manner.

In pears the honors went to Ellwanger & Barry for a fine collection for which they were awarded first prize, certificate of merit and special mention. R. C. Kaighn, G. M. Hay and P. Pederson had also some good exhibits. Foreign grapes were a creditable display, in fact better than has been seen here for several seasons.

The chief prize winners were Gebhard Huster, James H. Bull and James H. Fox. C. C. Corby made a fine display of native grapes and carried first honors. An interesting item was a dish of Alpine strawberries exhibited by Joseph Hurley gardener to James M. Rhodes, Ardmore, for which he received special mention. R. C. Kaighn received special mention for an exhibit of Spanish chestnuts.

The society's vegetable premiums were well contested. John McCleary got the coveted first for the best collection. John F. Sibson got first on cucumbers, M. Mitchell on celery, Chas. Leisy on tomatoes, and John M. Kaign on turnips. Other prize winners in this section were Edward Reiger, A. B. Plumley, Robert James and R. C. Kaighn. The Mitchell vegetable premiums brought out some fine exhibits. According to the *Times* reporter the cauliflowers were so large that no pot would hold them. They were certainly fine James Lawder was the exhibitor. M. Mitchell took the honors on celery, spinach and lettuce; Walter H. Adams on cabbage; John H. Dodds on mangels; John F. Sibson on potatoes and cucumbers, and Edward Rieger on tomatoes. A. B. Plumly was the most successful competitor for the Burpee prizes, being ahead on cabbages, carrots, onions, radishes and turnips. M. Mitchell took first on celery. Matthew Callahan on tomatoes and R. C. Kaighn on watermelons. The Dreer premiums were also well contested and brought some very choice exhibits. The principal prize-winners were Robert James, John McCleary, Jos. McGregor, Joseph Hurley, James Lawder, M. Mitchell and Edward Reiger.

Seedsmen's exhibits: Dreer, Faust and Mitchell had good exhibits of seasonable bulbs and sundries, that of the latter being the largest and very tastefully arranged.

Nurserymen's exhibits: The nurserymen made better trade displays than ever before. The two groups of evergreens at the street entrance shown by the Stoke Pogis Nurseries being nicely arranged and very attractive. W. H. Moon and the Andora Nurseries had large and fine displays of evergreens, rhododendrons, etc., which added much to the variety and interest of the show.

The unique exhibit was made by C. E. Cox. This consisted of a miniature dwelling house with grounds laid out surrounding it planted with ferns; the whole affair occupied a space of about ten feet square; electric lights in miniature illuminated the grounds. Robert Crawford kept a table to the right of the entrance in the lower hall filled with flowers and plants from his stock. They were nicely arranged and much admired.

On Wednesday there was an exhibit of roses and carnations. The roses were of good quality, no poor stock being shown. The display might have been larger and seemed rather out of place alongside of the vegetable exhibit; but the committee had no other alternative, all other places being occupied. There were about sixty vases of carnations, many of them fine. The principal exhibitors were: C. W. Ward, of Long Island; R. Witterstaetter, of Ohio; H. Weber & Son, of Maryland; C. W. Cox, Wm. Swayne, Wm. Craig and Jos. Heacock. Mrs. Thos. Lawson, raised by Peter Fisher, of Ellis, Mass., is a fine flower, a good, deep pink, and large, with good stem Mr. Nicholson brought it with him from Boston, and said that it now brings $5 per hundred flowers in that market.

The second day's attendance was a great improvement over the first—in fact, it was ahead of the same day last year, and is a guarantee that the show will be a financial as well as an artistic success. Nothing but the most favorable comments are heard from the visitors, who go about with that contented, happy "glad we come" look on their faces that puts the officers of the society in a good humor. We believe that Secretary Rust's smile has broadened a full inch the past few days. Hugh Graham carried off the most prizes, numbering seven firsts and three seconds for cut blooms or chrysanthemums.

The exhibit of design work on Thursday, the feature for that day, was not as full as it should have been. John Westcott had a very prettily-decorated dinner table, all done with variegated foliage, and for which he received first prize. J. Kift had a dinner table decorated entirely of American beauties, which received first prize in its class. There were a few plateaus and baskets of chrysanthemums; the mantel decorations did not develop. The prizes for the most part are liberal, and the local brethren should take more interest in the matter than they do. Some do not allow their very select and choice blossoms to be exposed to the vulgar gaze of the public except for a consideration, and wouldn't think of entering them into a competition.

The smoker on Thursday evening and Friday morning was a grand one, and might not inappropriately be called a howling success. W. P. Craig was chairman, assisted by Wm. Smith a former mayor of this city, who is a past master in the art of entertaining and bringing out all the fun there is to be had in the situation. There were songs, recitations and speeches galore; even a dance or two were thrown in. Refreshments there was to sustain the boys and brace them up when called on. Messrs. Walker, Hughes, Myers, Dumont and others, not forgetting the famous Duke, sang their pet songs, which were much appreciated by the large audience of over one hundred and fifty. Many visitors from a distance stayed over to the smoker, and all seemed to enjoy themselves thoroughly. The party broke up at an early hour Friday after singing Auld Lang Syne. K.

Manetti Cuttings.

Subscriber would like to know the best way to treat the trimmings of the manetti with a view to raising stocks for grafting purposes. A few suggestions bearing on this subject were made in the FLORIST last winter, but probably escaped Subscriber's notice. It has been said that we cannot grow the manetti in this country on the same lines as in Europe with equal success, and I know that in some instances those experimenting have met with only indifferent success. I would not care to go on record as saying positively that these stocks can be grown successfully, as my experience with them is limited to two seasons only, but I do not think it an impossible undertaking by any means, provided we give the kind of soil, location and treatment they require.

In the first place it is a waste of time trying to root and grow the manetti in high dry soil unless we can, and are prepared to give them frequent and copious waterings in dry weather; a dry summer in Europe is almost always fatal to a

large percentage of the crop. They should be planted in a low, moist piece of ground, without it we can hardly escape failure, with it we are in a fair way to succeed. If I were about to put in a batch of cuttings I would have the ground plowed deep in the fall and afterwards worked over thoroughly several times to pulverize and bring it into first-rate condition. I would take off the wood as soon after October 1 as climatic conditions would permit; the ideal time is immediately after a good rain, there is then little tendency to shrivel. When the cuttings are put in early good callus will be formed before winter, and as soon as the soil begins to warm up in the spring the roots will commence to strike out, and before any extremely warm or dry weather is upon them they will have become established and out of danger, whereas if put in very late, or the work left until spring, the rooting must in average seasons be done under very unfavorable conditions.

For grafting teas very strong heavy stocks are not as easy to handle as those which are about the same thickness as the rose-wood, but once the work is done plants worked on thick stocks with their strong roots will grow faster and do as well or better than in those on thinner wood. It is well to leave the cuttings pretty long, say from 9 to 12 inches, take out every eye on the lower half to avoid any trouble from suckers, plant two inches apart in the row and twelve inches between the rows, and from six to eight inches deep, pressing the soil very firm around the cuttings with the feet.

After the ground is frozen and winter is here in earnest, a four-inch covering of meadow hay or leaves will give ample protection and prevent the lifting which follows freezing and thawing. Good cultivation during the following spring and summer will prove as beneficial to manetti cuttings as any other crop, but if good strong roots are not formed the first season it will be necessary to carry them over the second before attempting to use them for grafting.

ROBT. SIMPSON.

Transplanting Hardy Roses.

Please answer the following in your paper: Would there be much risk in transplanting hardy roses at present, October 28, in the latitude of New York City? FERRIS.

There should be no more risk involved in planting hardy roses at the end of October than at any other season, in fact I consider that time, or very early spring, the best time to plant dormant stock. According to my experience there are very few if any of the very choice hybrid remontant roses that are positively hardy in the vicinity of New York City; we call them hardy, to be sure, but how many of them succumb every year. A little stable manure, dry leaves or meadow hay, or even loose soil, thrown around the stems will do much to insure them against the ravages of winter cold.

ROBT. SIMPSON.

Cut Worms.

C. P. N., Minn., wishes to know the name of the insect that is boring holes in the sides of his rose buds and eating out the inside, and which has thus far eluded his vigilance. I presume it is the cutworm, and its peculiar habit of feeding at night and covering itself with earth at the first approach of day will account for its not being in sight when search is made. If C. P. N. has had no experience with cut-worms I would suggest as the simplest and surest means of exterminating them that whenever a punctured bud is discovered careful search be made around the base of the plants in the immediate vicinity, and unless he has travelled off to other pasture grounds he will be located just under the surface of the soil; or they can be caught at night when feeding, but searching by lamplight is a rather tedious job. When fully grown they are about two inches long, sometimes dark brown in color, at other times almost yellow. They have tremendous appetites, and while they prefer something as choice as a rose bud, carnation or chrysanthemum they will devour rank weeds, or almost anything that happens in their way. ROBT. SIMPSON.

New York.

CONTINUED DULL BUSINESS.—GREEKS MAKING MONEY ONLY.—VIOLET GROWERS GO TO PEDDLING.—CLUB MEETING —WHAT WAS DONE —NOMINATION OF OFFICERS — LOCAL ITEMS.

Growers, wholesalers and retailers alike all continue to complain of dull business. While this condition applies to all lines, including the plant trade, yet the cut flower trade is by far the greater sufferer especially in localities where high-class customers are catered to. The street dealers and those who run stands or small shops in crowded centers for cheap trade have everything in their favor. The surplus of flowers over legitimate demands enables them to obtain their stock at practically their own prices and the dullness in high class trade places the finer grades of stock within their reach, while the same mild weather which retards general business favors the free exposure of their goods in the open air, and thus they are making money fast, while the legitimate dealer finds it a hard matter to pay his expenses and the grower works hard and gets nothing for it.

The rose growers seem to be in the worst fix, for, as a rule, their houses and general equipment are the most expensive. The chrysanthemum growers are thoroughly discouraged, also. Carnation and violet men have less to complain of. Many of the latter have adopted the plan of peddling their violets by hand from store to store, the smallness and lightness of the goods making this an easy matter, and in the face of the irregularity of values resulting from this course the wholesale dealers find it more difficult now than ever to maintain regular prices.

The Florists' Club met on Monday evening to listen to the report of the committee on the matter of a scale of points for use in awarding the gold medal as decided last month, and to nominate officers for the next year. Other diversions not down on the program were presented, notably an unrehearsed duet between Messrs. Cottam and Logan, which served to make the meeting one not soon to be forgotten by the twenty-five members present. President Hensbaw being sick, Vice-President Plumb presided over the exercises and other features. The exhibition committee having reported its inability to formulate a set of rules and points for the medal competition another committee, consisting of Messrs. Manda, Troy, Burns, Brower and Keller, was constituted for the purpose.

The nomination of officers, under the present custom, gives about everyone in the meeting a place on the preliminary list and the declinations and withdrawals that follow bring unforseen candidates to the surface. As the list now stands there are for election at the December meeting the following candidates: for president, Wm. Plumb; vice-president, J. M. Logan, Louis Schmutz; treasurer, C. B. Weathered, Theo. Roehrs; secretary, John Young; trustees, W. I. Brower, J. H. Troy, Alex Burns, C. H. Allen, J. Dowsett and J. A. Penman.

A. Herrington showed blooms of the new Frank Hardy chrysanthemum and received a certificate of merit for it. There were no entries in competition for the silver medal of the club which had been offered for the best twenty-five chrysanthemum flowers. Mr. Donlan was present and extended an invitation to club members to visit the exhibition of the Gardeners' Society at the Astoria on Friday and Saturday.

Summit avenue, as now laid out at West Hoboken, cuts through E. Leuly's place separating the dwelling house entirely from the greenhouses.

Reed & Keller have added another floor to their establishment at 122 West 25th street for florists' supplies.

A. Herrington is sending some of the finest chrysanthemums ever seen in this market to Thos. Young, Jr.

Baltimore.

MARKET IN CHAOTIC CONDITION.—CHRYSANTHEMUMS BRING POOR PRICES.—CLUB MEETING — VARIOUS QUESTIONS ANSWERED —SMALL SHOWS ARE HELD.

The market is still in a chaotic condition, one day being no guide for the next. The remarkably mild weather has made outdoor flowers a drug, and when fairly good chrysanthemums from the market gardens can be had at five cents an armful, it may be regarded as certain that fancy florist stock is not bringing fancy prices by any means. Pink 'mums of deep tint seem rather scarce, and occasionally a sale of them at good prices occurs.

President Pentland was not out last club night, which, on account of his years, and the exceedingly inclement weather, was hardly to be expected. Though missing his paper on Adiantum Farleyense was a disappointment, yet those who braved the weather were repaid by a very interesting, amusing and instructive meeting. Mr. Harry Quick exhibited a seedling chrysanthemum, Mrs. M. E. Quick, sulphur yellow, darker in center, large, full, strong stem, and generally a first-class flower.

The first question asked was "What is the best early white chrysanthemum?" Mr. Christy preferred Mrs. Robinson for general purposes, and thought extra early chrysanthemums of any color no advantage. Then some one wanted to know a new bedding plant, but the only suggestions were crotons and tuberous begonias.

The next question brought out a debate, "Does it pay to save seed of flowering plants?" Mr. Christy thought it of the first importance especially in petunias and pansies. Mr. C. M. Wagner had experimented with cinerarias and thought we ought to try to improve. Mr. McRoberts said as almost all improvement had been effected by careful seed growing it would be a good plan for everyone to take some one or two things for pets and try to improve them. Mr. Flitton said we should have an ideal and select and cross fertilize with that end in view. He also gave a good many valuable hints on fertilizing and hybridizing, and referred to the long but remunerative work of a number of English firms in improving particular plants. It was suggested by Mr. Mc-

Roberts that professional seed growers could produce the small quantities needed by individuals of much better quality and much cheaper than they could be saved at home. Mr. Christy said the question of fraud must be considered as home-grown seed was not mixed with inferior strains or with seed two or three years old. Mr. Binder always saved his 'mum seed since buying very high priced seed, out of which he got one hundred and forty-five varieties, not one of which was retained; had much better luck with seed of own saving.

The point whether 'mums could be cross fertilized with absolute certainty was then raised and debated, Mr. Wagner thinking it doubtful if pollen did not get in from the stamens of the flower as well as that introduced. Mr. Binder was satisfied this was not the case if care was used. The best early dark 'mum, the next question, was decided to be G. W. Childs with Defender and Mrs. Drexel good seconds.

The following list of chrysanthemums was given in reply to an inquiry for best three pink, white, and yellow for commercial purposes. Pink, Maud Dean, Viviand-Morel, Glory of Pacific; white, Mrs. G. S. Kalb, Niveus, Minnie Wanamaker; yellow, Eugene Dailledouze, Mrs. Whilldin, Mrs. J. E. Lager. For three best late, Golden Wedding, Wanless and Mrs. Jerome Jones were given.

The next question was "What should a florist be?" Some one said, "anything but an Irishman," whereupon Brother Christy took up the cudgels and told of a German gardener who advised him never to set his plants under an oak tree because the oakum would come out of it and kill them. The next question was "What should a private gardener be?" Mr. C. M. Wagner thought that too much was expected at most places where one man was kept, milking cow, driving, caring for carriage horses, chickens, etc., being mentioned as some of the work commonly expected in addition to flower and vegetable growing. Thought all should study and belong to the club as a means of advancing themselves. Mr. Harrigan thought much depended on circumstances, a first-class man could make no show on a third class place. Mr. Christy said men frequently took places as gardeners, who were totally incompetent, and told of one who had taken the sori on some ferns for bugs and spent much time trying to clean them off. Mr. Wagner told of a place he had built up, by interesting the proprietor in the greenhouse.

Six white leaf plants for bedding were then given.—Santolina tomentosa, Cerastium tomentosum, Centaurea gymnocarpa, Echeveria sec. gl., Cineraria maritima, Gnaphalium tomentosum.

A letter from Mr. Thomas Cartledge of the committee on seedling chrysanthemums was read highly commending two seedlings of Mr. W. P. Binder's. Numerous small shows are being held round about, one at Lehman's Hall by the Y. M. C. A., one at Mt. Washington by the Lend-a-hand Club, one by Mr. W. H. Perot at his country place. MACK.

San Francisco.

NO CHANGE IN TRADE CONDITIONS—BONNAFFON MOST POPULAR CHRYSANTHEMUM.—VARIOUS FLOWER SHOWS—PERSONAL ITEMS.

There has not been much change in the conditions of trade in this city since my last notes. Mums are still the flower and the probabilities are that they will continue to be for several months yet as there is not an abundance of other flowers at the present time. A very large percentage of the outdoor flowers are about over but we still have a sufficient quantity for all demands. The rain did considerable damage to some of the growers who did not have their plants covered. As yet we have had no damaging frosts. Bonnaffon is about over now and Dailledouze has taken its place to a certain extent. Large blooms are bringing fairly good prices. There is a steady demand for cheap white 'mums for funeral work. Some of the growers have had considerable trouble with Mrs. Robinson this season when it was grown under glass, the flowers being so large and the stems so weak, the blooms were not saleable. Judging by the demand this season Major Bonnaffon has proved itself to be the most popular variety in the market.

Roses have taken a little jump in price during the last few days and are now 50 cents per dozen for average stock. Beauties are scarce. Very few Testouts are to be seen, and I understand that several of our leading rose growers have discarded it entirely. Violets do not seem to improve very much, and as yet the quality is very poor. This is particularly true of Marie Louise. The Golden Gate is showing up very well, but on account of its short stems will never become exceedingly popular. The new Princess of Wales is coming in freely, and commanding a good figure, closely pressed by the California. Few if any Lady Hume Campbell have made their appearance, Carnations of good quality are very scarce. There is a very good demand, but the supply seems to be short. Scott and Portia are still leading.

Mr. Chas. Mitton, formerly with the Sunset Seed and Plant Company, has accepted a position with Mr. E. W. McFallon at Burlingame.

The flower show given by the California State Floral Society, at 16 Post Street last week, was a success so far as number of visitors and quantity of flowers were concerned. All the lower shelves in the Board of Trade Building were removed and the space filled with different exhibits of cut flowers. There was a noticeable absence of professional chrysanthemum growers, probably owing to the fact that no prizes were offered to the successful competitors.

Mr. O. M. Patto, of Ocean View, made a display of his specialty, violets, showing many different varieties, the most admired among which was the Princess of Wales. He also showed the other commercial varieties. Mrs. Sachan showed a large variety of roses, violets and begonias which attracted much attention.

C. Abrahams, nurseryman, exhibited quite a collection of ferns and palms, choice commercial varieties. They were all well grown and good stock and reflected much credit on their grower. Golden Gate Park was on hand with the largest collection of chrysanthemums, both cut blooms and potted plants. Some finely grown Bonnaffon, Viviand-Morel, Queen and Niveus were shown. This display attracted much attention by its neat arrangement. Mr. E. Gill, of Oakland, had the largest and best collection of roses in the hall, showing over 100 different varieties. This was a very creditable showing for this season of the year. The show lasted one day and one night.

The chrysanthemum show to be held in Stockton promises to be very successful. Invitations have been sent out to all the different growers to exhibit. This is the first chrysanthemum show held in this city and the society is doing its utmost toward making it a success.

Mr. Alfred Parker and Mr. Arthur Coan, who have been known as the Gardeo City Floral Company, of San Jose, have dissolved partnership and Mr. Edw. Parsons assumes control of the concern.

Mr. E. H. Bourguegnon, of San Jose, is building a very fine new rose house, and when completed will be the finest in the neighborhood.

Mr. Lester Morse, Mr. J. M. Kimberlin and Chas. Parker, seed growers, are now on their Eastern trips.

The chrysanthemum show at Cloverdale opened last week under very favorable conditions and was well attended. There were quite a number of exhibits, mostly made up of amateurs, several of whom showed some very finely grown stock. As it was the first affair of its kind ever given in this place the show was well patronized during its progress and a substantial sum was netted the Floral Society.

The flower show which was given at Redwood City did not prove to be much of a financial success owing to the very disagreeable weather that was experienced during the show. However the society did not suffer a loss.

Mr. Sidney Clack is sending in some extra good lily of the valley which is bringing good prices. Mr. Clack is probably our most successful grower of this flower, and annually forces many thousands of pips. METEOR.

Buffalo.

BUSINESS FAIRLY GOOD.—VISIT TO VIOLETVILLE—FORTY GROWERS OF VIOLETS IN ONE LOCALITY—HOUSES OF THE POUGHKEEPSIE GROWERS—A TRIP TO ALBANY.—NEW CARNATIONS AT UTICA.

Business is fairly good and promises to be better. It is a fact that after the first two weeks of the chrysanthemum season the demand began to drop. Perhaps a large lot of the midseason varieties coming in made the demand appear lighter than it was. Nothing has gone to waste with us yet, and is not likely to. I have heard more than one eastern rose grower say last week he wished they were banished from the land. We don't. They come mighty useful just now and will be gone soon enough. Violets are in good demand and more could be sold here.

I can't give much news of my brother florists, for I have been a week away from their more or less elevating society. I have been down the Hudson River as far as Poughkeepsie, which should be called Violetville. They have a fine place in the little city for a 'mum show, and I think the quality of flowers was equal to anything I have ever seen in the large cities. A local scribe will doubtless tell your readers all about the show, so I will not trespass on his domain. It was a great pleasure to meet so many sterling gardeners as hereabout make their home, as well as the commercial men, who are jolly good fellows. Mr. Lynch will not let you suffer any protracted drought and the energetic Secretary, Mr. Gommersall, likes genial society. Mr. Henry Siebrecht and Charlie Weathered gave the meeting a metropolitan air, while Peter Crowe and Sammy Goldring cast a rural radiance over us.

To one who has never stopped off in this lovely neighborhood the violet growing industry is a revelation. I don't be-

lieve there is anything in the air or anything in the soil that other localities have not got. I think it is simply in the men. Whoever sees and knows Messrs. George and William Saltford can quickly see that these solid men are students in their chosen specialty, and doubtless would be successful with any plant they turned their attention to. Rhinecliff was too far away for us so we had to be content with a visit to Mr. William Saltford. We went twice, and the visits repaid us well, even if we had broken a leg to get there. Five or six thousand a day is the pick, and the little beauties will about cover a silver dollar. They are so easy to grow, and it's so simple when you know how. Any style of house seems to do. The roofs of some were very flat and of others steep, but all the same the violets were there, and houses ran east and west as well as north and south, with results about equal. These gentlemen were the pioneers in the violet business in that section, but now they have plenty of imitators, no less than forty different people shipping violets daily from Poughkeepsie. That's plenty; don't go there; go to some big town in Ohio and grow them, for I know one big city in Mr. McKinley's state that buys all her violets.

All good things must come to an end, so we had to leave our friends under the high bridge and skip to Albany. What a glorious ride on a perfect day! A ride of eight miles out of the city famous for its big building on the hill and its pure water supply that has proved fatal in so many cases when taken straight, landed us at the growing establishment of Goldring Bros. It was my first visit, and I was amazed at the extent of glass. We found Mr. Fred Goldring deep down with a gang of men repairing a sewer, while Brother Sam was "on the Bowery" without permission. In a place where such a variety is grown it is impossible to comment on many, but if there was one thing better than another it was half a dozen long houses of violets. Great as are the violets of Poughkeepsie, these were about as good. You should not leave Albany without looking at the store of Mr. H. G. Eyres on Pearl street. The appointments are perfect and the taste displayed exquisite, even to the dress of the young men, whom you politely tell that you are not a customer but merely having a look.

We tried to pass Utica and remain on the train, but the herculean strength of Peter Crowe pulled us off. We were not sorry, for we saw how humbly young Mr. Frank Baker takes the honor of Alderman elect. Mr. Baker's two new carnations, "Oneida" and "Red Jacket," are in my opinion very promising. The former is a real pure pink of great size and substance and a profuse bloomer. We saw most all the boys, old and young, and one of the best sights was the fine long-stemmed roses grown on upper Genesee street. W. S.

Chicago.

MARKET FAIRLY ACTIVE.—SHOW HELPS TRADE.—BANQUET OF FLORIST CLUB.—ENJOYABLE EXCURSION —MANY VISITORS.

The market this week has been fairly active. The demand, however, has been to a large extent for the best grade of stock, while inferior quality, more particularly in roses, went very slow. On account of the show A1 stock of Beauties, Kaiserins and Carnots were at a premium. Ordinary good stock in the colored sorts is about equal to demand. Brides, however, appear to be overstocked. Carnations are none too plenty and even the poorer grades, though at low figures, move quite freely. There seems to be a constantly increasing demand for red; good stock of these is decidedly scarce. Tidal, which in a pinch often serves as red, has so far been too short-stemmed to be of much account. This sort is, however, improving rapidly in this respect.

Chrysanthemums are at their best this week. Although prices are lower than in former years, the demand is sufficiently large to market pretty much all the stock sent in, at fairly good figures. Violets are improving but still short of demand. Prices remain about the same as last quotation.

The annual banquet of the Florist Club on Thursday evening was a very pleasant affair. Fifty-three were present, including about ten guests from out of the city. After the menu had been discussed, entertaining addresses were made by Messrs. A. H. Fewkes, Newton Highlands, Mass; E. G. Hill, Richmond, Ind.; Harry Balsley, Detroit; C. B. Whitnall, Milwaukee; A. Dimmock, St. Albans, Eng.; Chas Dannacher, Davenport, Ia.; J. T. Temple, Davenport, Ia.; A. Klokner, Milwaukee; J. A. Evans, Richmond, Ind.; A. Bauer, Rockford, Ill.; J. C. Vaughan, Edgar Sanders; W. N. Rudd and others. C. W. McKellar, Chas. Balluf, James Hartshorne and A. Dimmock favored the company with songs. The party separated at a late hour, having passed a very enjoyable evening.

C. Frauenfelder, the West Madison street florist, has been seriously ill but is now improving.

The florists' excursion to the conservatories of Mr. Nathan M. Freer, at Oak Park, where genial Geo. Baldwin is gardener, was much enjoyed by those who participated. The party was entertained with open handed hospitality.

Visitors: Elmer D. Smith, Adrian, Mich.; H. Weber, Oakland, Md.; Challenge Ventilator Evans, Richmond, Ind.; A. Dimmock, St. Albans, England; Fred Dorner, Jr., and T. A. Dorner, Lafayette, Ind.; Harry Bayersdorfer, Philadelphia; J. C. Rennison, Sioux City, Ia.; Harry Balsley, Detroit; F. Lemon and wife, Richmond, Ind.; J. A. Valentine, Denver, Colo.; Miss Mullman, Cumberland, Md.; John Berterman and Henry Rieman, Indianapolis; E. G. Hill, Richmond, Ind.; Albert Sunderbruch, Cincinnati; A. C. Brown, Springfield, Ill.; Chas. Dannacher, Davenport, Ia.; C. B. Whitnall, Milwaukee; W. H. Ellis, Milwaukee; L. L. Olds, Clinton, Wis.; Wm. Schuchr, Milwaukee.

The attendance at the chrysanthemum show has far exceeded that of any previous year so far.

During the show Stollery Bros., of Argyle Park, kept on exhibition a vase of their new carnation Argyle. From comments passed on by growers they have every reason to expect a large sale when introduced next March, the opinion expressed being that it will supersede the old favorite Tidal Wave, as the color is a decided improvement on that variety.

Seasonable Notes.

CARE OF PERENNIALS, SHRUBS AND VINES SHOULD BE COMPLETED THIS WEEK.

In speaking of how gardens should be cared for, the writer wishes it to be understood that the northern and western states are referred to in particular. Florists catering to the retail trade are requested continually, to take care of grounds or give information that will enable others to do so. Such questions are asked as—What shall I do with my clematis this fall? My climbing rose was not a success, what had I better do with it? Should I not cut back my shrubbery now? What is the warmest way to cover vines, etc? To give inquiries of such a nature, acurate answers, it is as necessary to see the grounds and plants, as it is for a tailor to see the person he is to clothe, but a general method of observation and practical work can be explained, which must be mixed with brains before using.

The ground this season is dry; up to date we have not had the usual amount of fall rains. As one of the objects in covering is to exclude the water (which if allowed to fill the crevices and freeze, thereby excluding the air will smother the plant, and we call it winter killed) it is necessary to insure the requisite amount of moisture before covering is done. In doing this, the best way is the cheapest and most satisfactory. It is the fibrous roots which are the first to assimilate the moisture and nutriment, with these roots taken care of the balance require little or no attention from the garden. On a plant recently set out they will be most numerous, close to the stem and around the "original ball," but they soon lengthen and penetrate the ground more rapidly where they find good soil; the more "open" the ground the deeper will roots grow. In order to water properly, you must know where these "working roots" are. The foliage most always explains the situation for it is the nature of every plant to shed water, so as to fall on the "working roots." A pandanus or dandelion turns water down stem, because they have a "tap root," an elm tree sheds water frequently like an umbrella, but if planted in deep rich ground with a moist bottom, it will make strong upright growth and shed most of the water close to stem. A Norway spruce is careful to cover the ground well over the roots, etc.

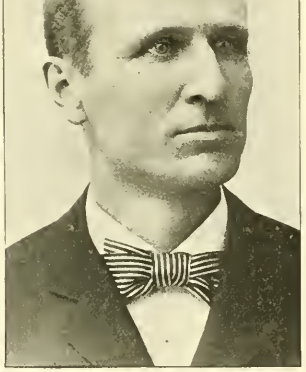
After determining where your working roots are, bore a hole with a fence auger, you can get a good one for 60 cents, go 3 feet deep and have the hole just a trifle beyond the roots. Put in a few pounds of sheep manure or other good fertilizer, pour in gently at least half a barrel of water. It will permeate the ground at a depth, insuring a constant supply of vapor upward all winter. The top or surface of ground being still dry prevents too rapid evaporation, at the same time remains open to admit air, *a most necessary* factor in preserving life through the winter. After watering fill holes with *good soil* (don't put back the original) cover the ground with a "non conductor"—leaves are the best—with a thin layer of straw or hay to shed water, to turn off sun's heat, and at the same time admit air. There is no shrub, tree or perennial but what will be benefited by such treatment. It is also well to bind the stems up for a distance, or in some cases bend the tops over and cover completely to hold the cover; a few pegs driven in the ground to hold twine stretched across is much better than laying on boards or heavy material.

As for pruning, it is as well and easier to do properly in spring, after new growth is started, because there is no guessing then where the strong shoots are the principal object being to insure all the light necessary for perfect development of the stronger shoots and cutting back enough of the inferior wood to insure this condition. The grass should be allowed to grow quite long in October; it will protect its own roots well if you allow it to have its own way as winter approaches. In spots, where it is usually killed during winter, it may be saved by

a few pieces of brush, holding a quantity of leaves in some places. This is unsightly but is a good remedy where it can be endured. C. B. W.

Harry Visits Omaha.

DEAR PAL:—When the editor of the "*Yankee Florist*" wrote to me and sez he, "I want you to go out west to Omaha and look over the city and see what them 'ponnickers' are doing out there." I jes tuk fright and had visions of indians, buffalo and sech. However, I ambles round to our general store, gathers up a couple of derringers and a bowie knife and sez I'll see what them fellers is doing out thar anyway. So I packs me carpet bag, puts in an extra boil'd shirt and a pair of jumpers, embraces the folks, and buys a ticket on the emmigrant express.



Well, Bill, after we had been scuttering thro' big towns and little towns and stepped off at a city whar folks was skating on the river (and it was summer time too mind ye) we scuttered some more thro' corn fields with corn (I never see sech corn), corn as high as some of the sojers monuments we have down east, we come to a big river, again mostly land and a town. Sez I, "what place is this pard?" And sez he, "Council Bluffs." Then sez I, "who's he?" and I reaches for me derringer. Well Bill it turned out to be a real large town, and sez he, "Yez see them abbatoirs over there? well," sez he, "that's Omaha." Sez I, "are there any florists over there?" And then he looks around and I suspects he is looking for his gun, so I turns the subject, but he comes back at me agin and sez he, "I spose they belong to the same order as you eh!" Then he looks at my badge, "S. A. F. A. O. H." and of course I had to admit it, but I could not give him the grip cause I only had my carpet bag with me.

Then he looks at me again kind of sadder like and sez, "I spose you are going over to learn the business, eh!" Of course I explained to him I was an eastern florist, so I could learn nothing over there; anyway, sez I, "what will it cost to drive me over with that thar mule of yours?" Then he sees I am a stranger, and instinctively I put my hand over my badge and my hand on my gun. "Don't get skeert," sez he, "I was a florist myself till I tuck sick cleaning scale off some palms you fellers sent out here; since then I have been hand picking bugs off the potato patch and carting grunts out of the pig-iron factory. You take the lectric car over the bridge," sez he, "and you'll be there in less time than it takes to find a consignment of 2-inch roses in one of those soap boxes you fellers ship out here. Say, you must think we are a lot of worm diggers; say, you wait till you get over to Omaha and you'll jump or I'm no weeder; so long."

Wal I jumps aboard and was figgering all the time what kind of people these far western florists looked like, and I was spectiag to see long, lean, laak fellows with their pants tucked in their boots, Pefferian whiskers and sech. Bless ye, bill, I was the most surprised feller you ever seed. The furst one I run agin was as good looking a chap as ever I seed in the east, no dude nor cowboy he, and chock full of knowledge and things about growing plants (maybe he'd been reading Scott's notes). Anyway sez I, "I spose you heard about us florists coming out here next summer." "Heard it," sez he, "we heard it the same day." "Well, I swan, you folks are right up to date ain't ye?" "Yes, but we don't try all the new roses you eastern men send out." "No" sez I, "there are a great many" and then I caught on. Sez he, "let me show you the city," and so we trundled along and we called at a great many "floral establishments." Say, you'd think you was east. I most lost my head. The place is an eye-opener I can tell you, and the city, bless ye Bill, it is a grate big hustling town; high buildings, hotels, 'lectric cars, policemen, city chaps with high collars and low shoes, and the "wimmen," they'r great, that is assorted sizes, but all the world like the gals in our town, ejjecated and fine dressed. Say, I think I'll live out here instead of doing literary work.

"Well," sez I, "you've got a grate town and I'll write my friend all about it. I'm sure you'll take good care of us. Some of them eastern fellers think you are out in the woods and don't raise nothing but corn and pumpkins and taters and don't know an American Beauty from a razor-backed hog. I swan if you aint just opened my eyes." But I'll write more later Bill of the inducements and sich. I can't write any more, cause, well everything is so like home. No thanks pard, I'll take a cigar this time. Yes I'm feeling right smart, thank you; right smart.

Yours as ever, HARRY.

F. W. TAYLOR.

Supt. Agriculture, Horticulture, Forestry and Irrigation at the Trans-Mississippi and International Expositional at Omaha.

F. W. Taylor.

We present herewith a portrait of Mr. F. W. Taylor, superintendent of the departments of agriculture, horticulture, forestry and irrigation of the Trans-Mississippi and International Exposition to be held at Omaha, June to October next year. To his efforts was due the vote which selected Omaha as the convention city for 1898. If he is as successful in working up the attendance at the convention as he was in securing votes at Providence the success of the Omaha convention is assured. He reports that many large eastern florists and seedsmen have already arranged for space in the horticultural department of the exposition and is confident that the display at Omaha next year will be representative of the whole country and a credit to the profession.

SITUATIONS, WANTS, FOR SALE.

Advertisements under this head will be inserted at the rate of 10 cents a line (seven words) each insertion. Cash must accompany order. Plant advs. not admitted under this head.

SITUATION WANTED—By good salesman and designer. Address SALESMAN, care Am Florist.

SITUATION WANTED—By first-class, all-round man, 25 years' experience, single, reference first-class. Address. N G W, care Am. Florist.

SITUATION WANTED—As rose grower, foreman; can supply good Chicago references; age 29, single, German. Address METEOR, care Am. Florist

SITUATION WANTED—As foreman or otherwise by young man well up in all branches of the business, 14 years' experience, good references, abstainer. Address P. O. Box 884, Knoxville, Tenn.

SITUATION WANTED—Under foreman in greenhouses, well up in all branches of the business; first-class references Address FLORIST, 9123 Erie Ave., Chicago.

SITUATION WANTED—Private or commercial; have been running present place as both for last 8 years; 6000 feet of glass, etc. Life experience. Age 40; married. Address JOHN MCMILLAN, St. Albans, Vt.

SITUATION WANTED—By German gardener, long years' experience in all branches; good rose, cut flower and general greenhouse stock grower; competent to take charge of small place. Address R, Spraul's Hotel, 20 Market St., St. Louis, Mo.

WANTED—Quick, experienced grower, single, $20 per month, as assistant. CURREY & Co., Nashville, Tenn.

WANTED—Six plantsmen for palm and fern departments. Also two packers. State last employer. ROSE HILL NURSERIES, New Rochelle, N Y.

WANTED—An experienced fireman, sober and thoroughly reliable. Address PROBST BROS. FLORAL CO., Kansas City, Mo.

WANTED—Farmer, man and wife, without children, to take charge of farm. Answer by letter only to MR. TAYLOR DICKSON, 320 Walnut St., Phila.

WANTED—To rent or lease greenhouses with from 15,000 to 18 000 feet of glass and prospect of buying. M. RASMUSSEN, West Toledo, Ohio

WANTED—Working partner with some capital to buy half interest. Good home trade, excellent shipping facilities, splendid opportunity. Would like to correspond with parties desiring to go into business. Address INTEREST, care Am. Florist

FOR SALE—In Warren, R. I., 5 greenhouses, nice 6-room cottage, barn, sheds, shops, etc.; about 10 acres of good land; young orchard, shade trees and grapevines. Greenhouses and cottage heated with hot water. Windmill supplies water over the premises. Can be bought on easy terms Apply to O. H. NYE, Warren, R. I

WANTED.

On a commercial place of about 9 500 square feet of glass, a good all-round man, steady and sober, who is capable of growing lettuce and other vegetables and pot plants for market; must be a good worker and capable of taking charge, state wages with board and room; house for married man; good references required. Good place for right man M L, 967 Grand River Ave., Detroit, Mich.

A Rare Opportunity.

FOR SALE—Florist store on Broadway between 31st and 32d Sts., and opposite one of the most prominent hotels in New York. Weekly profits up to the present time $100. Rent very low. Will dispose of same very reasonably. Reason for selling, other large business takes my entire time.

J. FLEISCHMAN, 25th St. & Broadway, New York.

GREENHOUSE PLANT FOR SALE.

EXCELLENT OPPORTUNITY.

Charlestown, West Virginia, 2 hours from Washington, D. C., 3 hours from Baltimore, B. & O. and N. & W. Railroads, 4 houses, 8,000 feet of glass, economically heated, stocked, 3½ acres of land, 100 peach trees in bearing, good water supply; terms easy. Address as above.

JOS. TRAPNELL, Special Receiver.

FOR SALE.

Greenhouses in one of the best cities in Wisconsin. A good investment and a money maker for a hustler. Owner must retire on account of poor health

For particulars write ELLIS & POLLWORTH, Milwaukee, Wis.

Always mention the American Florist when writing to advertisers.

There were twenty-one new members admitted and it looks as though the Newport Horticultural Society had started upon a fresh career. Mr. Robert Laurie enthusiastically attributes the new ambition to the incentive furnished by the recent visit of the Society of American Florists to Newport.

Always mention the American Florist when writing to advertisers.

THE SEED TRADE.

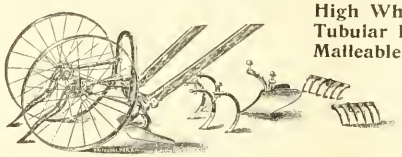
AMERICAN SEED TRADE ASSOCIATION.

JEROME B. RICE, Pres.; E. B. CLARK, 1st Vice-Pres.; S. F. WILLARD, Wethersfield, Conn., Sec'y and Treas.

Henry Phillips and Sons.

We give herewith portraits of Henry Phillips and Sons, representing the Henry Phillips Seed and Implement Co. of Toledo, O., who have lately been awarded the government seed contract. Henry Phillips, Sr., who established the business in 1852, died February 28, 1896, since which date Henry J. Phillipps, Jr., and W. T. Phillips have had active management of the business. Mr. Henry Phillips, Sr., was an active member of the American Seed Trade Association and with his wife attended the Toronto meeting of the association in June, 1894. He also attended the Detroit meeting in 1895. In his home city, Toledo, Mr. Phillips was well and favorably known among his fellow citizens. He was prominent in many city improvements as well as in real estate matters; he was also a member of the City Council and Produce Exchange.

HENRY PHILLIPS AND SONS.



B. F. BROWN, of Brown Bag-Filling Machine Company, returning from a Western trip called at Chicago, November 11. Mr. Brown is satisfied that the most satisfactory solution of the Government seed distribution question lies in the purchase of seeds in bulk by the Department. The Secretary, Mr. Brown says, is in favor of this policy and the result he believes would be a distribution of the newer and rarer kinds which would interfere less with the legitimate business of the seedsman.

SECRETARY WILLARD, of the Seed Trade Association writes that a new order has been issued by the traffic committee to the express companies, dated November 1 and taking effect November 10, allowing the 20% special reduction on all seeds shipped in cloth bags or boxes. This new ruling will be good news for the trade, and in good season for spring business.

POUGHKEEPSIE, N. Y.—On account of the exhibitions the regular meeting of the Dutchess County Horticultural Society, called for November 10, is postponed until November 17.

LOWELL, MASS.—Paul R. Burtt, for a long time connected with leading florists in this city, has opened a place for himself at the corner of Bridge and Merrimac streets.

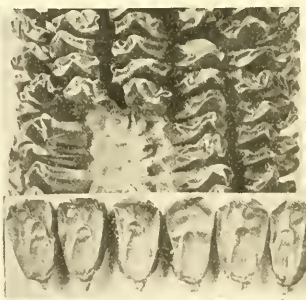
The "IRON AGE" Garden Implements

The "Iron Age" Double Wheel Hoe.

High Wheels
Tubular Frame
Malleable Castings

MAKE THEM THE LIGHTEST, STRONGEST AND EASIEST RUNNING . . . . . .

Our "Iron Age" Double Wheel Hoe can be converted into a practical Single Wheel Hoe, and also a Seed Drill in a moments' time. When using the combined machine as a Wheel Hoe the Seed Drill attachment is not in use. Saves wear.



SEEDSMEN who are looking for a complete line of satisfactory garden tools at right prices should write for the "Iron Age Booklet" for 1898 and dealers' prices.

Our Trade Directory

☞Please send us your business card if you have changed your address or firm name since our last book was issued.

PLEASE mention the AMERICAN FLORIST every time you write to an advertiser.

Stem Rot of Carnations.

We are troubled with dry or stem rot among our Portia and Scott carnations. It started after the cuttings were made and put in the sand but not to any great extent. Some few died of it in the field, and now they are dying off in the house. Will you kindly advise us what to do. They were propagated in ordinary road sand. S. & W.

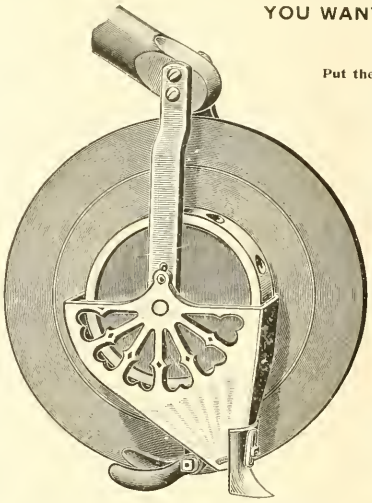
Stem-rot is the most dangerous disease the carnation is troubled with. A plant affected is lost; even if it does not show any visible signs it will succumb earlier or later. Therefore the first step to check the disease is to remove any plant that is showing the least sign, and not remove it carelessly, but be sure to take the soil for two to three inches around the stem with it; this is to prevent the spreading of the disease.

As I have said, a plant affected is lost, so all our efforts must be devoted to prevention; such as the spraying with the copper solution, and this should be so directed that it thoroughly washes the foliage and runs down on the branches and stem, making a settlement around the same on the soil. Flowers of sulphur can also be used; put a handful or two in a piece of cheese cloth, forming a dusting bag, only large enough to hold it between the plant, and dust the branches at their base, stem, and soil around the plant.

In fact any fungicide will be of benefit, but only remember that it is not needed on the foliage but on the soil, stem and lower part of the branches. Other general rules that never should be neglected are good ventilation and applying sulphur on the heating pipes.

FRED. DORNER.

Andover, Mass.



The recently organized Gardeners' and Florists' Club held its first chrysanthemum show on November 5–6. The display of chrysanthemums was excellent, the only criticism possible being that the stakes used to support the blooms on the pot plants were too numerous. The showing of carnations was especially fine, many of the most notable new varieties being staged. Edith Foster was particularly good. This variety seems to improve with age. The collection of ferns was very creditable, of violets fair and the loan of palms, tropical plants, etc., "for exhibition only" contributed in a large measure to the success of the show.

RAIN COMES AT LAST.—RANDOLPH & MCCLEMENTS DECORATE CARNEGIE HALL FOR PRESIDENT M'KINLEY'S RECEPTION. —MR. CHAS. SIEBERT OPENS A NEW STORE.

We are experiencing regulation fall weather this week, rain with damp cool atmosphere, but everybody is well satisfied, for the rain has been so very greatly needed; in many places throughout western Pennsylvania the drought has been so severe that water was hauled long distances from the river at a cost of from forty to fifty cents per barrel. Some of the florists report a slight improvement in the demand since election day, the 2d, and are of the opinion that business will get better from now on. Stock of nearly all kinds is plenty and good. Roses are much too plenty, and are likely to be until the 'mums are disposed of; carnations are both plenty and cheap. Violets are not coming in very freely at present, but have not advanced in price, remaining very low.

Mr. Fred Burki, wholesale florist of Bellevue, reports business very fair but prices low. He is cutting roses and chrysanthemums of very fine quality and also carnations. He has also just commenced cutting Harrisii lilies, being the first this season.

Messrs. Randolph & McClements, South Highland and Baum streets, E. E., have been very busy; on Wednesday of last week they decorated Carnegie Hall at Schenley Park for President McKinley's reception, he and his wife having come here in honor of "Founders' Day," it being the anniversary of the dedication of it. They also had two wedding decorations on hand at the same time. The decorations at Carnegie Hall were very much admired and added very much to the appearance of the hall. Messrs. R. & McC. report general business with them as good.

Mr. Chas. T. Siebert, of Stanton avenue, E. E., has opened in a new place, a store for the sale of cut flowers and general trade at 6015 Center avenue, near South Highland. He has a fine store-room, which he is fitting up in first-class style; the situation and room are much better than where he was on Frankstown avenue. His greenhouses are about 1½ miles distant, which will insure fresh stock at all times.

Mr. Julius W. Ludwig celebrated his 44th birthday on Tuesday, and in the evening was tendered a reception by the American Social Club, of which he is President. The occasion was a very enjoyable one. Between forty and fifty were in attendance and the evening was spent in card playing, singing, etc.; an elegant repast was served and congratulatory speeches made by many. Mr. Ludwig felt very much complimented by this reception and responded to the well wishes of his friends in a very feeling and happy manner.

Mr. M. Rice, of M. Rice & Co., Philadelphia, was a visitor this week.

Louisville, Ky.

The eighth annual chrysanthemum show and floral festival given by the Kentucky Society of Florists began today, Wednesday, Nov. 10, and was a pronounced success, the weather being very favorable for the show. The hall was handsomely decorated with large palms, flags and bunting, which gave it a striking effect. The music this year is given by Prof. Wherley's orchestra, and they play every afternoon and night. Mr. Kunzman, the president, opened the show. The judge selected for the show was Mr. W. S. Bell, of Lexington, and he proved a very competent one, too. The prizes were as follows:

In chrysanthemum plants, bush form, single stem, 1st, C. Schleeter; 2nd, Nanz & Neuner; 3rd, Jacob Schulz. Specimen plants, bush form, 1st, Nanz & Neuner; 2nd, J. E. Marret; 3rd, E. G. Reimers. Standards, stem not less than 18 inches, 1st, J. E. Marret; 2nd, Jacob Schulz, 3rd, Jos. Coenen & Co. Single stem, 1st, Nanz & Neuner; 2nd, Jacob Schulz; 3rd, J. E. Marret. Market plants, bush form, 1st, Nanz & Neuner; 2nd, C. Schleeter; 3rd, J. Schulz. Ten varieties, 3 blooms each, 1st, Nanz & Neuner; 2nd, Henry Lichtefeld; 3rd, J. Schulz. Ten blooms, white, one variety, 1st, J. Schulz; 2nd, C. Schleeter 3rd, Nanz & Neuner. Ten blooms, yellow; one variety, 1st, Nanz & Neuner; 2nd, J. Schulz; 3rd, E. G. Reimers. Ten blooms, pink, one variety, 1st, Jacob Schulz; 2nd, Nanz & Neuner; 3rd, A. Rassmusen, of New Albany. Ten blooms, any other color, 1st, Nanz & Neuner; 2nd, J. Schulz; 3rd, J. Marret.

The weather, being beautiful, helped to swell the crowd, and the hall was crowded all day long with flower-loving people. Large crowds are expected throughout the show.

The center of the hall is occupied by long tables, on which are displayed in jars the exhibits of cut blooms in great profusion. Among the claimants for new honors is a handsome yellow bloom of the incurved variety, which is called the Pennsylvania, which measures from 9 to 10 inches across. It was sent here by a Philadelphia florist to be introduced. The plants grown on single stems are far better than ever before and were beautifully arranged. Altogether the show this year is a success, and the florists are well pleased with the results. F. H.

DENVER, COLO.—Mr. J. A. Valentine, of Park Floral Company, left this week for an eastern trip via. Chicago. He will visit New York, Boston and Philadelphia.

BY DIRECTION of Congress the Department of Agriculture is investigating the character and extent of the adulteration of foods and drugs.

JOHN YOUNG,

51 WEST 28TH STREET, NEW YORK CITY.

The Establishment of Public Parks.

The importance of bringing together information concerning the establishment of public parks cannot be illustrated to better advantage than it is in a little publication that has recently come to hand under the above title and relating to the New York park system, which was prepared by Mr. Gherardi Davis of New York and read before the Historical Society of that city.

After making a brief statement as to the necessity of public parks in cities and the desirability of guarding them against encroachments, he gives the history of the park movement in New York from the first suggestion that was made in a letter published in the *New York Packet* in 1785 and addressed to the mayor and aldermen of the city, calling attention to the fact that "there is not in this great city one proper spot where its inhabitants can enjoy with convenience the exercise that is necessary for health and amusement."

He then goes on to give the history of Bowling Green, the Battery, and the various squares and parks of the city, from the time they were first suggested until they were acquired by the city and developed as public pleasure grounds, giving many interesting historical and other incidents connected therewith. It is difficult for one unacquainted with such matters to realize the amount of careful investigation that is required to bring together and verify the facts and interesting incidents related in this pamphlet.

This pamphlet should be the forerunner of similar publications in other cities, for the subject is well worthy of the careful investigation of students in local history, and such facts and incidents as are here brought together are not found in any other publications with the exception of the fragmentary and disconnected records in park reports and occasional newspaper and magazine articles.

There has never been made until very recently a systematic effort to bring together in any of the important libraries complete sets of park reports. Some park commissions even have not complete sets of their reports in their own offices, and almost every park commission is unable to supply many of its back numbers. The Park and Outdoor Art Association are bringing together as complete a set of park reports and other material relating to outdoor art as can be obtained. Information thus brought together will be of the greatest value to all persons who are interested in the park movement which has come to be such an important question in the development of American communities.

WARREN H. MANNING.

The Holly Supply.

Reports from regular dealers and shippers of this article in Delaware, Maryland and Tennessee, report well berried trees and good foliage this season. As an article of Christmas trade first-class holly has more than held its own even in "hard times" years and ought to do even better this "prosperity" season. Christmas to the florist, in all lines, is one of the days which may generally be relied on for good business.

BUSINESS FAIR—MR. F. WEBER ENTERTAINS BOWLING CLUB.—C. YOUNG & SONS HOLD A FREE CHRYSANTHEMUM SHOW.—VISITORS.

Business is only fair, with occasional spurts. The last few days have been cold and bracing, and the stock is showing up better, but the prices are low. Large quantities of roses and carnations are coming in and selling for almost nothing, and the best of roses can be bought for $1.50 to $2 per 100. Carnations can also be bought for from 50 cents to $1 per 100. Chrysanthemums are in full force and are crowding the other flowers to some extent. The best blooms are sold at 15 and 20 cents each; second quality at 75 cents and $1 per dozen.

An invitation was extended to the Bowling Club by Mr. Fred C. Weber to attend a house warming at his new and beautiful residence and store, 4326-28 Olive street. The guests began to arrive at 8 p. m. and found every thing in readiness to make it pleasant for them. After inspecting his most elegant store, conservatories and vaults the guests were asked up stairs to partake of an elegant lunch and refreshments. After the lunch speech-making and songs were in order by Messrs. Kunz, Helwig, Bauer, Koenig, Fillmore and Beneke. The party broke up shortly before 12 p. m. and everybody had a good time. Those present besides the host, hostess and their family were Mr. and Mrs. Kunz, Mr. and Mrs. John Young, Mr. and Mrs. Kuehn, Mr. and Mrs. J. J. Beneke, Mr. and Mrs. Carl Beyer, Mr. and Mrs. Julius Konig; Sr., Mr. and Mrs. James Young, Mr. and Mrs. C. C. Sanders, Mr. and Mrs. Al Bauer, Mr. and Mrs. Fillmore, Mr. Andrew Meyer and Dr. Henry Helwig.

C. Young & Sons held a free chrysanthemum show at their greenhouses last week. The magnificent display of plants attracted an immense crowd. The exhibition was complete and artistic in every detail.

Mr. Gullett, of Lincoln, Ill., and J. T. Williamson, of Memphis, Tenn., were our visitors last week; also Mrs. Vesey, Fort Wayne, Ind.; Mr. Hunt, Terre Haute, Ind.; W. W. Coles, Kokomo, Ind.; Mr. Heller, New Castle, Ind.; Mr. Tower, with E. G. Hill & Co., Richmond, Ind.; Mr. Riesing, with Nathan Smith & Son, Adrian, Mich.

Leguminous Root Tubercles.

A series of experiments were made at the Louisiana Experiment Station to ascertain the influence on leguminous root tubercles of deep and shallow planting, the depth to which the nutrifying organisms penetrate, and the results of transferring organisms from one host to another. Cowpeas were planted at depths of 1, 2, 3, 4, 5 and 6 inches. The best root formation and the greatest number of tubercles were obtained with seeds planted 2 and 3 inches deep.

After taking precautions to avoid infection from other sources, a number of pots were filled with soil taken from 1, 2 and 3 feet below the surface and Lima beans, New Era cowpeas, peanuts and white lupines grown in it. Only on the plants grown in soil taken at the depth of 1 foot were tubercles formed, but they were not so numerous as from surface inoculation. The experiment in transferring the organisms from one host to another indicated that each plant, or at most each genus of plants, supports a specific organism capable of developing root tubercles.

MARKET QUOTATIONS ON APPLICATION

Walter F. Sheridan

Wholesale and Commission... **Cut Flowers**

The finest grades of all leading and seasonable flowers. Retail trade supplied with best stock at daily market prices

39 West 28th Street **New York City**

Northampton, Mass.

A fairer November day never shone than that which marked the opening of the third annual chrysanthemum show of the Horticultural Society, and a finer set of chrysanthemums never graced City Hall than those which show the result of the skill and attention of the growers of the Meadow City, and attractive as have been the previous exhibitions that of '97 shows marked improvement.

As usual Donald McGregor, gardener to E. H. R. Lyman and E. J. Canning, gardener to Smith College, were the largest exhibitors, both showing groups of specimen plants never before equalled in this section. Mr. Canning's plants were for exhibition only. H. W. Field, Alex Parks, L.H. Dimock, R. B. Graves and N. L. Hospital all made fine displays of plants and blooms. E. D. Shaw of Holyoke also made a fine exhibit of roses and carnations, also a vase of Queen, that won admiration from all visitors. L. W. Goodell, of Pansy Park showed tuberous begonias of good size and color. One table of plants grown by children was quite an attraction and some of the plants were really good.

Mr. G. H. Sinclair of Holyoke acted as judge and made awards as follows:

PLANTS.

Best six plants distinct named varieties, 1st, D. McGregor. Three plants, same conditions, 1st, D. McGregor. Specimen white, also pink, D. McGregor. Specimen yellow, 1st, D. McGregor; 2nd, G. W. Thornley. Specimen red, 1st, D. McGregor. Any other color, 1st, D. McGregor.

Twenty-five plants grown to single stem, 1st, D. McGregor; 2nd, Alex Parks. Twelve single stem, 1st, D. McGregor; 2nd, A. Parks. Six single stem, 1st, McGregor; 2nd, G. W. Thornley. Best group arranged for effect and limited to 150 square feet, palms and ferns added, 1st, H. W. Field; 2nd, Alex Parks; 3rd, D. McGregor. Best specimen plant grown without aid of greenhouse, 1st, 2nd and 3rd, Geo. P. Campbell.

CUT FLOWERS.

Vase thirty cut blooms, not less than 6 of a distinct named variety, 1st, D. McGregor; 2nd, H. W. Field; 3d, A. Parks. Vase twelve distinct varieties, 1st, D. McGregor; 2nd, A. Parks. Twelve red, 1st, D. McGregor, Twelve pink, 1st, A. Parks; 2nd, H. W. Field; 3d, D. McGregor. Twelve white, 1st, D. McGregor; 2nd, A. Parks; 3d, G. W. Thornley. Twelve yellow, 1st, A. Parks; 2nd, H. W. Field; 3d, G. W. Thornley. Twelve any other color, 1st, McGregor; 2nd, G. W. Thornley. Specimen bloom, 1st, H. W. Field; 2nd, McGregor; 3d, A. Parks.

Best display of carnations, not less than 4 varieties twenty-five of each variety, 1st, A. Parks. Twelve white, 1st, H. W. Field; 2nd, G. W. Thornley. Twelve scarlet, 1st, H. W. Field; 2nd, G. W. Thornley. Twelve light pink, 1st, H. W. Field; 2nd, McGregor; 3d, A. Parks. Twelve dark pink, 1st, D. McGregor; 2nd, H. W. Field; 3d, A. Parks. Twelve any other color, 1st, A. Parks; 2nd, G. W. Thornley.

Fifty violets, double blue, 1st, D. McGregor; 2nd, R. B. Graves. Fifty violets, single blue, 1st, D. McGregor; 2nd, R. B. Graves; 3rd H. W. Field.

G. W. THORNILEY.

The Bouquet Green Market.

The supply of this article in northern Wisconsin and Michigan promises to be a full one. The pickers, although they began late, have improved the bright Indian summer weather and stimulated by good prices paid by the country merchants at the start have rolled up good round lots of it. Some new territory has also been opened. Here and there, as is often the case new buyers have taken hold in a speculative way and taken all in all while the market is yet unsettled the trade prices are already below the average and it is hardly probable that any material advance will take place. The quality is considerably better than the average and buyers as a rule are caring for and crating it in better shape.

CONCORD, N.H.—Geo. Main has removed his office from Pleasant street to the corner of Merrimac and Orchard street.

TRADE QUIET AND PROSPECTS NOT BRIGHT.—VIOLETS SELLING FAIRLY WELL.—CHRYSANTHEMUMS, CARNATIONS AND ROSES UNSATISFACTORY.—LECTURE BY ROBERT FARQUHAR.—DEATH OF N. GOODNOW.

Not much improvement is yet apparent in city trade. No doubt the quality of flowers sold daily now would a few years ago have been considered a big thing, but with the enormously increased production and the multiplicity of outlets there is little in it for either grower or dealer individually under present circumstonces. To make a shortage that would stimulate buvers to pay old values for flowers a demand must be created that would be far beyond the possibilities. The only flower that seems to fairly hold its own is the violet. Violets do not bring over fifty to sixty cents per hundred, but that is a fair price for the goods, as prices go on general run of cut flower stock and the quality of the violets in this market is not to be compared with the stock that New Yorkers enjoy and are willing to pay one dollar and upwards for. Chrysanthemums run from $2 to $8 per hundred, with sales slow. Four dollars is the prevailing figure for fair average Ivorys. Carnations are slow with evidences of overabundance for the demand and roses are, perhaps, the most unfortunate feature of the list at present.

Robert Farquhar gave an interesting talk, with stereopticon illustrations, at Tremont Temple on Monday evening, descriptive of his recent visit to the Pacific slope and Yellowstone Park. A very remarkable greenhouse was one of the many interesting pictures presented. It is situated in Yellowstone Park, at an elevation of about 6000 feet and heat is furnished by a boiling spring over which the greenhouse is built. In winter the structure is covered with from fifteen to thirty feet of snow.

N. Goodnow of Sudbury died on November 3, aged 53 years after a short illness with consnmption. He was the proprietor of an extensive range of carnation houses and his stock is well known in the Boston market.

Again the Sow Bug.

I have been troubled exceedingly this fall with some pest devouring my violet blooms. I find about 50% of my blooms imperfect and many with the petals entirely consumed. I watched closely to find the pest and at last I discovered that it was none other than the "Innocent Isopod" that your writer of October 30 is trying to shield from annihilation.

I am an observer that they will eat many kinds of green stuff, for instance violet blooms and Begonia Rex are favorite luxuries, and other things that I might mention.

I must agree with the writer that they do like decomposed vegetable substances like wood, straw, paper, etc. But in the case of my violet house everything is comparatively new, only having been built two years, and there is no decayed vegetable matter about the house; everything is as clean as a whistle. I for one unfortunate person would like to know of some easy remedy. The snail is an easy thing to get rid of as some of them are large enough to vaccinate with a double-barreled shot-gun, but the sow bng beats me every time.

Providence, R. I. WM. E. CHAPPELL.

TESTIMONIAL.

MR. C. HUMFELD, Clay Centre, Kans.,

DEAR SIR:—I cannot say too much for your plants of Verbena Rooted Cuttings and the condition they came in. They were perfectly grand, the best I ever saw. I used to be one of the largest growers of Verbenas in Central New York State but I never saw anything their equal both in strength and robust cuttings, perfectly clean and free from all disease; they were not heated in packing on account of the long distance they had to come. Yours Resp'y, (HENRY BURT, Florist, 211 E. Genesee St., Syracuse, N. Y.

RAINY WEATHER.—PINK IVORY NOT AT ITS BEST.—A. GRAHAM & SON HAVE A FREAK BATCH OF VIVIAND-MOREL.—LARGE ATTENDANCE AT CLUB MEETING.

Looking at the weather as it is at the time of this writing, it is a matter of great congratulation that the chrysanthemum show does not come off until next week, for a worse specimen of fall weather in Cleveland would be very hard to find; it blows, rains, does everything but snow, though it will very likely end up with that and a frost to put the final touches on everything. Speaking of weather, this fall is certainly a record breaker, as we have escaped even a white frost sufficient to kill coleus up to now.

There has been considerable uneasiness lest, owing to the warm weather, all the best exhibition chrysanthemums should be over, but there will not likely be any dearth owing to that difficulty, as nearly all the customary varieties will be on hand with not more than one or two exceptions.

Viviand-Morel, this year, as well as Pink Ivory, are very pale; Pink Ivory in most cases showing almost no trace of its beautiful color, while Viviand-Morel is with many a yellow white with a dash of pink only. A. Graham & Son have a pink batch of Morel in which every flower has the petals standing out straight and much quilled, instead of being flat petalled and drooping as is usual. This lot has normal color; two other lots in other houses are pale in color and normal in form. All the batches are from the same stock plants, struck, potted and grown together and planted in exactly the same soil. Plants grown in the same house last year were not abnormal in any way.

There was a very large attendance at the regular meeting Monday evening, the last before the show. Final arrangements were made and everything looks well for a very sucessful exhibition. A.

Building and Heating.

I am in want of a little information on building a greenhouse. I want to build one 16x50 feet and 8 or 10 feet high, double roof with sash bars and butt the glass. How many runs of 3 or 4-inch pipe will I want to heat it for raising a mixed lot of plants, cabbage, tomatoes and house plants? Also how high from the ground to the plate where the glass comes? R. G.

Replying to R. G., I would advise him to build his house which he proposes to make 16 ft. wide by 50 feet long, as follows: Have the plates about 3 feet 10 inches to 4 feet high for the sides, and the ridge plate 6 feet higher. This will make his bars for the glass 10 feet long and give a good pitch for the roof. If he does not want quite so much pitch, he can make the ridge plate 5 feet higher than the sides or 9 feet from ground level which will give him about 7½ inches fall to the foot. To heat such a house to the desired temperature for his section of the country will require at least seven ordinary cast iron hot water pipes which usually have about 3¼ bare inside measure or 4 inches in diameter outside measure; this of course is calculated for hot water. If steam is to be used, then smaller pipes not over 1½ inch should be used, and these should be wrought iron, but for such a greenhouse hot water would be much the best and safest.

JOHN N. MAY.

GERANIUMS.

Strong, well established stock from 2-in pots. The following varieties now ready: Mme. Jones, Mme. de la Roux, La Favorite, W. A. Chalfant, Pres. Duboise, Madonna, Alph. Riccard, Leonard Kelway, Beaute Poitevine, S. A. Nutt, Rev. Atkinson, Mme. Buchner, Mrs. A. Blanc, Marvel, Double General Grant, Mme. Ch. Molin, Gloire de France and Acteon.

FOR DECEMBER DELIVERY.—J. J. Harrison, E. Leguerre, Dr. Audiguere, Comtesse de Danne, Bonnatt, Mary Hill, Bonne de Villenova, Comtesse de Castris, Triomphe de Nancy, William Pfitzer, Mme. Jaulio, H. de Bornier, Comtesse de Harcourt, Athlete, Olivia, Dr. Rothera, James Kelway, L. Swartling, Mrs. E. G. Hill, H. Dauthenay, Mme. Bruant, Benj. Schroeder, Columbia, Midsummer, Gertrude Pierson, McMahan, Silver Queen, Gettysburg. Also a fine collection of IVY GERANIUMS and PELARGONIUMS.

CANNAS.

REMEMBER we hold the entire stock of James Dean's PEDIGREE SEEDLINGS.

PRESIDENT WILLIAM MCKINLEY. Color brilliant crimson, with scarlet shading. Plant dwarf, growing from 2½ to 3 feet high in rich soil. Foliage deep green, with heavy chocolate margin. Plant stools freely and is an abundant and very early bloomer. The flower sheaths are highly colored as in Alphonse Bouvier. The trusses are large, of good shape and held well above the foliage, and the growth is compact and even. This variety may be considered a marked improvement upon Chas. Henderson, Columbia and other crimson Cannas. The effect when massed is extremely brilliant, the color contrasting finely with the deep green foliage. We place this variety at the head of the list of crimson cannas, and believe that it will prove invaluable for bedding purposes. Certificated. Trade prices, 75 cts. each; $60.00 per 100, from 4-inch pots.

DEFENDER. Color clear yellow, striped with bright scarlet. Height, 3 to 3½ feet. Habit somewhat resembling Columbia. An early, very profuse bloomer, producing fine large heads of broad petaled flowers. Foliage clean, distinct, and a good grower. This canna will prove very effective for massing, as it produces a greater proportion of flowers to the foliage than almost any other yellow canna. Certificated. 75 cents each; $60.00 per 100. From 4-inch pots.

Also all the other standard varieties of cannas. It will pay you to send us a list of what you need and allow us to make you special quotations.

NEW Dwarf Sweet Pea, Burpee's PINK Cupid

THIS little wonder, like the original Cupid, hails from California, having been discovered by C. C. Morse & Co., to whom we paid *fifteen hundred dollars cash* for the exclusive ownership when there were only 1000 seeds in existence. It is not a sport from the original White Cupid, but an actual departure from its parent, the tall Blanche Ferry. In habit and manner of growth it is strictly a Cupid, spreading from the root, from a foot to eighteen inches around, growing from six to eight inches high, and shoots up stems about six inches long, which bear, in full bloom at once, from *three to four handsome blossoms*, all borne close to the end of the stem.

The flower itself is pretty enough, but its attractiveness is doubled by its association with CUPID—the first colored Cupid to follow the famous dwarf white.

The standard of the flower is wide, not infrequently measuring an inch and a half, but not over an inch high, being developed laterally. It usually curves over a trifle at the top, partly concave, which gives the standard a distinct shell-shaped appearance. The standard is a bright rose pink, while the wings are pure white or light pink. The wings are very large and finely formed; when pressed back against the standard they extend fully a quarter of an inch beyond it.

The substance of the blossom is peculiarly heavy and it will appear fresh and vigorous in a glass of water long after its long-stemmed parent has withered and and died. The plant itself is vigorous and hardy, and those who had poor or indifferent success with White Cupid will find this variety **easy to grow anywhere.** The seed, which is *black*, is of wonderfully strong germination, and the plant an early bloomer, coming into bloom simultaneously with White Cupid.

Though flowering early it continues in bloom very late, bearing a profusion of blossoms so thick as to completely hide the plant itself. It will be without a rival as a bedding and border annual, for its color and fragrance make it a rare novelty.

In our field crops the past season, both in California and New York, a large piece of them looks as if the ground were literally strewn with bright pink rose buds. No novelty of recent introduction has such beauty and grace combined to it as has **Burpee's PINK Cupid.** It is also delightfully fragrant, and will be admired by every one who sees it.

A Single Plant, exactly engraved from a photograph of Burpee's PINK Cupid.

The illustrationabove has been accurately engraved from a photograph of a single plant, grown in ordinary field culture, lifted and set in a pot on a platform, for the purpose of photographing on a level with the camera. Every plant in our fields in California and New York and at Fordhook Farm was absolutely true—a perfect "Blanche Ferry Cupid." The Flowers are always of full size, measuring from one and a quarter to one and three-eighths inches across the standard—covering a silver dollar.

Burpee's Pink Cupid bears generally three and sometimes four flowers to a stem. The illustration below was accurately engraved from a photograph EXACTLY NATURAL SIZE. The flowers are identical with the tall growing Blanche Ferry and always fully equal in size.

To regular sized packets (each containing twenty-four seeds): Per pkt. 25 cts.; 5 pkts. for $1.00; per doz. pkts. $2.00. **Per 100 pkts. $12.50.**

In half-sized packets (each containing twelve seeds): Per pkt. 15 cts.; 2 pkts. for 25 cts.; or 10 pkts. for $1.00. **Per 100 pkts. $7.50.**

Directions for culture in English, French and German printed upon each packet.

TWO OF MANY.

REPORT FROM MR. ECKFORD.

WEM, SHROPSHIRE, ENGLAND,
September 13, 1897.

MESSRS. W. ATLEE BURPEE & CO., Phila., Pa.

GENTLEMEN:—I am pleased to tell you that the "PINK CUPID" Sweet Pea you were good enough to send me for trial has been a great success. White Cupid has done much better than last year, but still not up to the Pink variety which holds its bloom better and consequently gives a much better display. I don't think too much can be said in favor of Pink Cupid. At present, it occupies a place of honor in dwarf Sweet Peas. I am, gentlemen,

Yours faithfully, HENRY ECKFORD.

AMERICAN GARDENING.

NEW YORK, September 9, 1897.

MESSRS. W. ATLEE BURPEE & CO., Phila., Pa.

GENTLEMEN:—I have just returned from a trip to Jefferson County, New York, where one of the most beautiful sights to me was a bed of PINK CUPID. It was a mass of blossoms exhaling a delicious fragrance into the air; and that its past had been equally grand was evidenced by the seed pods, while the promise for the rest of the season lay in the multitude of buds yet to expand. Truly as a flowering bedder Pink Cupid is a success.

Yours faithfully, LEONARD BARRON, Editor A. G.

Toronto.

FAIR DEMAND.—SHOW PROSPECTS GOOD — FIRST SNOW. — DECORATIONS FOR THE SHOW.—A NEW SOCIETY ON THE TAPIS.

Chrysanthemums have the swing now, and roses are being advertised at 30 cents a dozen by the biggest retailer in the city. There appears to be any amount of cut flowers offering and the demand for them is very fair. The fact of the chrysanthemum show being advertised so much just now helps to make the demand larger. There is some very fine stock coming in. Chrysanthemum plants are not so much seen now as in former years, the prices obtained don't pay for the growing, and badly grown plants don't sell at all.

Prospects for the show seem to be very good, but as it does not open until Wednesday (10th) afternoon it will be impossible to say anything about it in this week's notes, more especially as your correspondent has been appointed judge of plants, an office entirely unsought for on his part. It being a well known fact a prophet has no honor in his own country he expects a sharp fire of criticism; he has been practicing the "glassy stare" and will be heavily armored above the water line. Protests accompanied by $2 can be received by the secretary in any quantity.

The first snow of the season has fallen today (9th) and though it is not very cold, it can hardly be called an ideal day for moving plants; however, in spite of it all the boys are rushing their plants into the Pavilion, fearing probably that it may be colder tomorrow. The decorations of cedar and oak leaves are going to look very pretty when finished. Entries are coming in well in all the classes except "chrysanthemum plants". The big palms, the section for which was cut out this year (foolishly, I think), will be much missed; there is nothing like them for adding grandeur to the general effect.

On Thursday (11th) evening there will be a meeting to discuss the formation of a Canadian Gardeners' and Florists' Society. Mr. Gammage of London is engineering the matter. E.

Mound City, Mo.

Mr. R. B. Preston has sold his interest in the greenhouse here and will leave the city. The firm is now Bennett & Downey.

We had the first cutting frost on the morning of October 29, up to which time tomatoes were still ripening nicely and all flowers blooming as in summer. And even after having two sharp frosts and some ice, we were still able to gather enough flowers out of doors on the 1st of November to fill two good sized funeral designs. This fall must surely be a test case on the florists to see how long it would take them to have everything secure for the winter and I have no doubt that many were still unprepared when severe weather came. Everything is looking fine indoors. The only trouble being that spring stock is growing too fast and will cause extra propagating later on.

Chrysanthemums are coming in and as the weather gets cooler trade is increasing. The prospect for winter and spring trade is good. W. P. R.

THOMPSONVILLE, CONN.—Mr. D. Wm. Bralnard gave a very pretty chrysanthemum show at his greenhouses November 9 to 13.

Chestnut for Greenhouse Benches.

I would like to inquire through the FLORIST if anybody has used chestnut boards or planks for greenhouse benches, and if so what was the result.

As it is very durable I see no reason why it is not used almost exclusively except the bad smell it gives off when it becomes wet. I do not know whether the smell will last long or not, but while it does last it is simply abominable.

E. O. R.

The above inquiry brings back very forcibly my own experience with this material some seventeen or eighteen years ago when building some new benches in my greenhouses. I had among the workmen a carpenter who was a great advocate of chestnut timber as a very durable wood, and he tried his best to convince me that it was just the thing to use. "Why," said he, "look at those fence posts out there; I helped to put up that fence fifteen years ago, and nearly all the posts are sound to-day, and if they will stand in the ground out there as long as that why should not the same kind of wood stand in your greenhouses better than this abominable Pennsylvania hemlock?" He induced me to try the chestnut for my benches, and when they were completed his remark to one of the other workmen was: "And sure what a fool I was to be after persuadin' the boss to use this beautiful wood, for sure we will not git another job to do the like in a long toyme. It's myself that's to blame. Niver mind, the boss will be recommending me to all the other granehouse men for the illigent job."

Well, the "illigent job" gave off rather an unpleasant odor when we began putting water on it. This did not last long, neither did the chestnut lumber. Many of the 1½-inch thick planks were rotten and had to be repaired in two years, and the fourth year not one plank in the whole lot was safe to trust for another season. I do not want to say that all chestnut timber will go the same way, as there is a great difference in this material grown in different localities, but mine was taken from elevated ground where chestnut is supposed to produce the best quality timber for any purpose. One thing is certain, mine was rather a costly experiment, and one I did not care to repeat. The constant heat and moisture of the greenhouse proved too much for such porous wood, and I would to-day prefer the hemlock to the chestnut even at considerable more cost, though on that score the hemlock is very much the cheapest in first cost, but after trying nearly all kinds of lumber advocated for durability, I am now convinced to think that good cypress will prove much the best wood for greenhouse purposes, at least such proves to be for

Summit, N. J. JOHN N. MAY.

Thermostats.

R. W. S., Ohio, asks where he can purchase a thermostat and electric bell outfit for his greenhouses. Having had similar inquiries from other growers I have looked into the matter a little and have at last located a dealer in New York City, J. H. Bunnell & Co., 76 Cortlandt street.

The outfit that I experimented with, mentioned in a previous issue, was furnished by a house in Milwaukee, Wis., and cost about $5 a house and was fairly satisfactory. A Philadelphia firm, the name I have forgotten, handled this class of goods a few years ago and probably does at present. ROB'T SIMPSON.

THE MOST USEFUL NEW PLANTS FOR FLORISTS

Asparagus Sprengeri

This is now grown extensively by all the leading eastern florists, not only for cutting, but also for all decorative purposes. It forms specimens 12 feet in circumference, with plume-like sprays 8 feet long.

Fine Plants 2 1-2 inch Pots, $6.00 per 100; 3 1-2 inch, $10.00 per 100; 6 inch, $50.00 per 100; 25 at 100 rate.

Seed of above to arrive November-December, $1.75 per 100; $15.00 per 1000.

NEW GOLDEN CALLA (Richardia Pentlandii)

The only true GOLDEN YELLOW CALLA, flowers as large as the White Calla; very free bloomer and good grower. Not long ago 90 guineas were refused for two plants offered at auction in England. Strong blooming size bulbs, $1.50 each; $15.00 per 12.

PURPLE FRINGED CALLA Flowers 9 inches long, purple and white, curious fringed, 50 cents each, $4.00 per 12.

NEW CANNAS

The following New Cannas were originated in our establishment and first sent out by us.

Philadelphia, the finest crimson scarlet to date
Duke of Marlborough, the darkest of all Cannas, an improved Philadelphia.
Lorraine, pink broadly edged white.
Topaz, the only pure yellow.
Cuba, largest gilt edge.
Duchess of Marlborough, the only pure pink
Klondike, the only large pure orange.
Champion, largest and finest scarlet.
Maiden's Blush, rosy flesh.
Moonlight, nearly white.
Triumph, Mephisto, Sensation and others.

Parties wishing to catalogue these in 1898, will be given liberal terms. Electros and colored plates at cost. Send for list.

DAHLIAS Prize Winners, Grand Duke Alexis, Gilt Edge (new), Red and Black, Mrs. Agnew, Snowclad and all leading novelties.

Ruellia Makoyana Fine novelty for florists' use, $2.50 per 12

BUSINESS SHOWS MARKED INCREASE — SPORT FROM FLORA HILL CARNATION. —CHRYSANTHEMUM "PENNSYLVANIA" —VARIOUS ITEMS

Business this week has shown a marked increase, especially among the storemen and wholesale houses. Quite a number of swell weddings and other social events created a demand for flowers, while the Sixth Street Flower Market has been in an overcrowded condition all the week. Stock of all kinds has been in excess of the demand, and only with the greatest difficulty, and then at a great reduction in values, was a clearance effected.

At the market Mr. E. Fries, of Newport, Ky., showed a beautiful sport of Flora Hill carnation. The color of this sport is a shell pink splashed with white. Mr. Fries stated that the sport grew as well as the type.

Two vases of chrysanthemums were staged at the club room before a committee on November 6. One variety sent by Mr. Hugh Graham is a beautiful and pleasing shade of yellow named Pennsylvania, and is a sport from Philadelphia; stem, foliage and form of flowers identical with that of parent. Everybody fell in love with it. Mr. Elmer D. Smith, of Adrian, Mich., exhibited a seedling, a cross between H. L. Sunderbruch and McK. Twombly, color canary yellow shading to white, petals irregular, flowers good form.

Mr. Julius Peterson has his usual quota of high grade chrysanthemums. His Mutual Friend and Philadelphia are the best in town. They retail at his Fourth street store at from $3 to $5 per dozen. Mr. Peterson has abolished the cultivation of pot chrysanthemums as the demand for pot plants has fallen off considerably during the last few years, but more space has been devoted to the cultivation of decorative plants. In one of the houses a bench of Nephrolepsis davallioides furcans is making a grand showing.

Several of the craft attended the chrysanthemum show at Indianapolis. They all speak highly of the show in general and were royally entertained. Albert Sunderbruch left November 10 for the Windy City to attend the show there.

H. SCHWARZ.

American Grown Tulips.

Mr. J. C. Vaughan, of Chicago, is in receipt of some tulips of single named forcing kinds grown in Washington Territory. The bulbs are very large of their respective kinds, plump and sound, but the outer skin or shell which gives the Dutch bulbs a commercial finish is lacking in these. Their forcing qualities will be tested.

COLUMBIA, CITY, IND.—Miss Ida M. Lore has lately purchased the retail establishment, formerly conducted by Mrs. S. A. Amerman and will grow roses, carnations and miscellaneous stock.

M. Rice & Co.

25 N. 4th Street. PHILADELPHIA, PA.

Rochester, N. Y.

The retail trade in cut flowers was quite satisfactory for the past week; the demand for chrysanthemums is equal to any former week and consequently prices remain as they were; good large flowers find ready purchasers at $3 per doz., while inferior stock is sold at all prices down to 75 cents. Chas. Suhr sends in some excellent flowers which command the highest price in the market; his Robinson, V. Morel, Queen, Lager and Pitcher are the best we have seen here; $12 to $20 is paid for these willingly. By the way Mr. Suhr also has a sport from Robinson, which is identical with it in growth, foliage and shape of flower but differs in color, the under side of the petals being creamy white and the inside bright straw or sulphur yellow; it may prove a valuable addition to our market varieties and he is going to propagate it largely another year. Violets, double and single, bring 50 to 75 cents or even $1 per 100 for extras at wholesale; more of them could be disposed of if they were in the market. Carnations come in more freely now and quality improved considerably, still there are none too many; $1 to $1.50 is paid for them.

Roses are rather plentiful, especially the inferior grades, which are offered at very low figures; most of these come from our neighboring windy city and not more than $2 per 100 is paid for them, while ordinary and first-class stock have not declined in prices; some very fair Beauties are coming in now, they wholesale at $20 and are speedily disposed of at that price. Mignonette of extra size is displayed in the store windows and apparently is gaining in favor, notwithstanding the high price demanded for them.

Al. Salter and Chas. Vick returned from their hunting trip empty handed; the venison dinner which was promised to the Florist Club has not materialized so far. As the party was composed of several heavy weights who could not step on the dry limbs and brush scattered in the woods without making a terrible noise, the deer took warning and kept out of reach, but the club should not be put off in this sober way, when most every member looked ahead for the event with the greatest expectations, anticipating another enjoyable time, such as they had at the famous clambake this fall. K.

Parkersburg, W. Va.

The florists of this city are giving their first chrysanthemum show this week. Dudley & Son have a fine display of palms, ferns and especially fine cut 'mums, roses and carnations. G. Obermeyer is showing some fine specimen plants of 'mums in 8 and 10-inch pots, also a lot of other rare plants, altogether making a fine display. G. A. Hiehle is showing a nice lot of palms, begonias, geraniums, pot and cut 'mums. Weather bad. Full report later. G. OBERMEYER.

Hagerstown, Md.

The Floricultural Society held their second annual chrysanthemum show November 3, 4 and 5. The exhibits greatly exceeded last year and the cut blooms were exceptionally fine. Edwin A. Seidewitz, of Annapolis, Md., was judge.

Everything was done to make the show a financial success; a good orchestra was in attendance, it was open day and night, well advertised, admission low, and with all that it was financially a failure, and will not be held next year. XX

Grape Dust

is used effectually on Carnations, Roses, Violets, Lettuce, etc., as a preventive and check for Blights, Mildews, etc.

Facts for Flower Buyers.

Mr. J. M. Gasser, the Cleveland florist, has issued a neat 4-page folder with the above title, evidently addressed to his customers and possible customers in his city. We make some extracts below believing they may be suggestive to florists in other cities.

That the American Beauty holds first place as the best all-round rose to-day.

That chrysanthemums this season will be of better quality, more plentiful, of greater variety, and cheaper than ever before.

That the best flowers are the cheapest, as they last longer and give better satisfaction, besides a few choice blossoms "go farther" than a lot of poorer flowers.

That violets will be more sought for this season than ever. The large single or "California Violet" is becoming more popular every year.

That the way to keep flowers fresh the longest is to cut off the ends of stems when receiving them, and place immediately in fresh water in a cool place. Repeat this every morning, removing about one inch of stem each time.

That orchids—especially the cattleya varieties—will be the flower par excellence the coming winter, where daintiness and richness of effect are wanted.

That we have the best flowers that can be produced, but it costs more to grow a "specimen flower" than it does an ordinary blossom.

That we have the good ordinary grade of flowers, suitable for "all sorts and conditions of men."

That we also have a cheaper grade of flowers—sorted out from the above—shorter stems and perhaps not as perfect blossoms, but suitable for many purposes in decorating in various ways, or brightening up the house at a small outlay.

That, when sending a box of flowers to a friend you get more for your money when leaving the selection to the florist than by picking them out yourself.

That the late custom of sending a box of choice flowers immediately to the house of a deceased friend is growing in favor.

That, although the "Dingley Bill" put a heavy duty on "Dutch Bulbs," tulips, hyacinths, etc., they will be seen as plentiful as ever this winter, and the quality will be greatly improved.

That flowers for debutantes and engagement announcements should be of the very best quality and done up with the greatest care and taste.

That by placing your order twenty-four hours in advance, you will generally get better service than by ordering on short notice.

That all flowers arranged with simplicity—using their own foliage when possible—in a graceful and natural way, is considered in better taste than arranged in any so-called form or design.

That flowers for luncheons or dinners should be arranged either below or above the line of vision.

That decorations for buffet tables should be large and rather high.

That large, loose three-quarter bunches of long stemmed flowers are now very swell for weddings.

That a well filled fernery is cheaper in the end, and answers the same purpose as cut flowers for a small table.

That palms and other slow-growing plants should be kept moist and not wet nor dry, and have the leaves and stems sponged off every week with warm water and weak soapsuds.

That most all blooming plants should be thoroughly watered every day, but never left standing in water from day to day.

offered to obtain a boiler at a nominal cost.....

B. T. GALLOWAY, Chief Clerk of the Dept. of Agriculture, Washington, D. C.

"We have found the Little Giant fully as efficient and economical as any we have ever used."

FRED'K A. TAYLOR, Florist, Canastota, N. Y.

"The Standard Steam Boiler No. 3 is equal to what you claim. * * On Jan 6 it was 32 degrees below zero. * * * It kept me warm and would have done more."

C. R. OWENS, Florist, Whitesboro, N. Y.

"It gives to heat full value for every pound of coal it consumes."

C. A. VAN VALKENBURGH, Florist, Little Falls, N. Y.

"It was a surprise to me to see how quickly the pipes were filled with steam."

J. CULVER VORHEES, Florist, Somerville, N. J.

"Your Little Giant Boiler is the most powerful for the size and price I have seen and I have used several high priced heaters."

CHAS. T. SMITH, Florist, West Nyack, N. Y.

"Your No. 1 Boiler is the best steamer I have ever seen."

C. B. HUMPHREY, Florist, Rome, N. Y.

"It runs with very little attention and is very economical in the use of fuel, and in every respect a first-class boiler."

JOHN MAJOR, Florist, Cokeville, Westmoreland County, Pa.

"I purchased a No 13 Little Giant Hot Water Boiler from you last November and am well pleased with its work. It heated 520 feet of 4-inch pipe, and I had to use care in firing to prevent the water from boiling over in the expansion tank. I intend making it heat another house 80x12 feet that I propose building this coming summer. I have found the boiler all that could be desired."

SALTER BROS., Florists 78 West Main St., Rochester, N. Y.

"The No 3 Standard Hot Water Boiler we had from you last fall has been very satisfactory in every respect: works well, heats well and uses less coal than any boiler we have."

M. S. WORDEN, North Adams, Mass.

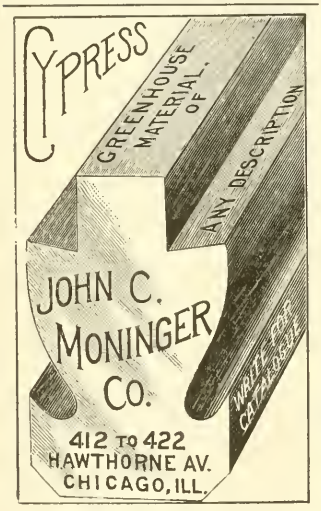
"I am very much pleased with my No. 12 Little Giant Hot Water Boiler, and it is a Giant indeed. It heats so much that I am thinking of building on just as much more greenhouse as I now have, and feel quite confident it will take care of it all right. You need not hesitate at any time if any one wants to know about this boiler to have them write me."

E. E. VENEN, Florist, Conneaut, Ohio.

"From what we have seen of the No. 13 Little Giant Hot Water Boiler we do not hesitate to say we believe it good for all you claim for it. We have never had need of a heavy fire, so do not know its power when urged to do its best. We shall be glad to recommend it to any one in want of a first-class heater."

GIBLIN & CO., Utica, N. Y.

Milwaukee.



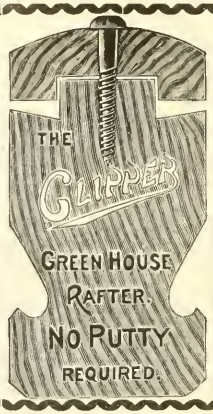
Some growers report entire loss of cyclamen by rust, others throw them out without report and say they don't pay. The beautiful weather this fall has increased the popularity of cosmos and salvia. Good chrysanthemum plants are scarce. Cut blooms are plenty and prices good. Roman hyacinths are in market.

There is an unusual amount of prominent weddings in German circles and "coming out" parties among the Yankees. The decorations of some are of a high order. For presents American Beauties take the lead. There has been very little funeral work of late.

Frank Dilger has been congratulated on the success of his standard 'mums at the show. Mr. Klokner wired an offer to Pitcher & Manda for the entire lot of orchids, which was accepted, they catalogued for $2,000, but came to Milwaukee for $150. Quite a number of florists are preparing to visit Chicago during the 'mum show. Mr. A. Zender, of Chicago, and Mrs. H. F. Coburn, of Whitewater, were recent visitors here.

Good roses are selling to-day for $10 per 1,000, carnations still lower; future orders for next week are quite large and encouraging but this week appears to be an off one.

Wm. Edlefsen and the Whitnall Floral Company both have a special sale of 'mums this week. Prices being obtained are low, but the idea appears to be that a low price is better than no price, and special effort was necessary to work them off promptly. C. B. W.



LOUISIANA Cypress Green House Material.

RED CEDAR

Write for Estimates.

Butted Glass.

This is no longer an experiment, it has come to stay. There are various ways of making Butted Roofs, but the best way is with the

Clipper Bar.

With this bar you can make a roof that is absolutely free from drip, and glass cannot be torn out by the wind. Butted glass makes a tight roof, a warm house and saves fuel. It lasts longer, looks better and costs less than the old-fashioned roof. But do not think that this is the only bar we sell, for it is not; we furnish what people want and there is nothing in greenhouse material that you cannot get from us, and all of open-air-dried Cypress clear of bright sap, stained sap, knots and all other defects.

IT IS ALL THAT ITS NAME IMPLIES, AND DON'T FORGET IT.

Cuts and full information mailed on application

FARMINGTON, CONN., March 9, 1896.
Dear Sir: The "INVINCIBLE" boiler you placed in my Carnation houses I am pleased to say has given me great satisfaction. It has done all that you claimed it would do and could have done more if called upon. I did not have to run the boiler hard even when the thermometer stood 18 degrees below zero outside. It has proven itself to be "Invincible" in every respect. I find it to be a very economical boiler.
The one thing I like about it is that the heat does not all go up the chimney, which cannot be said about other makes of boilers I have on my place.
Your PORTABLE boiler I have run for three years and find it to be very economical and has done its work well in every way. Your boilers will do a great deal more than you claim for them. They are both "Invincible." Yours very truly,
HUGH CHESNEY, Florist.

WESTBURY STATION, QUEENS CO., N. Y., March 10, 1896.
Dear Sir:—It gives me great pleasure to inform you that the "Invincible" boiler you put in my latest greenhouses has given me the greatest satisfaction in every detail.
All the good qualities you claim for it I have found to be just as represented by you and in every way I highly recommend it. Very truly,
MRS. CHAS. RUSSELL HONE.

For 1898.

Our friends who are freely renewing their subscriptions now for the new year, often ask for reduced rates for their interested employees in the store or at the potting bench; to stimulate this good educational work the AMERICAN FLORIST will accept such new names with every renewal from an old subscriber at half rates, 50 cents per year.

THE EXHIBITIONS.

Exhibition of the New York Gardeners' Society.

When it was announced a few weeks ago that the New York Gardeners' Society would invade the most exclusive precincts of New York's wealth and fashion and give a flower exhibition in the grand ballroom of the palatial Astoria hotel on Fifth avenue, as soon as it should be completed, the scheme looked like a wild dream or impossible romance, but it is said that "where there's a will there's a way," and to be persuaded that pluck, tact and determination will prevail over vast odds and that with the help of these qualities nothing is impossible, one had only to visit the beautiful place on the forenoon of Friday last.

The thousand electric lights of the richly decorated hall looked down upon an unwonted scene. Great boxes and crates, flower pots and vases were seen everywhere; an army of men in shirt-sleeves tramped over the paper and straw-littered velvet carpet; tall chrysanthemums leaned up familiarly against the crimson draperies, and carved walls made a strange setting for plebeian turnips and potatoes. In one department, however, no incongruity was apparent. In perfect accord with the costly accessories which surrounded them, looking as if they had always been there and had a perfect right to stay there, the great groups of orchids reposed with easy grace. Here and there through the busy scene flitted the "lady patronesses," suggesting and directing, solicitous and worried by the chaos that seemed to prevail; but finally in commendable good season, the last vase was filled, the last exhibit placed, the last crate was carried out, floors swept and rich rugs spread in the marble-floored corridors. The liveried attendants took their posts, the orchestra began to play, and the finest horticultural exhibition that New York has seen since the brave Lenox Lyceum effort, years ago, was open to the public at $2 per ticket.

The exhibition lasted three days and the prices of tickets were placed at $2 for the first day, $1 for the second and 50 cents for the third day; the profits, if any, to be devoted to charitable purposes. Fortunately the Gardeners' Society was under no obligation except to provide and arrange exhibits, all the expenses, including premiums, being assumed by the "lady patronesses," the names of fifty of whom were displayed on the schedule, for, notwithstanding the attractive surroundings, the high character of the exhibition and the much-advertised patronage of the select "400," it is discouraging to report that in attendance the affair was about on a par with similar attempts in this city in the past and it is evident that the key to New York's appreciation and support of flower shows has not yet been discovered.

The main hall was devoted principally to the plant exhibits, contributed from the private greenhouses of wealthy New Yorkers and arranged by the expert gardeners who had grown them. A stately Kentia belmoreana, 25 feet in height, from Richard Brett, gardener to J. B. Colgate, occupied a central position and at intervals throughout the hall were tall, well grown specimen palms, etc., from Mr. Brett and Charles Knight, gardener to E. R. Ladew. Mr. Knight showed a fine specimen of the rare Araucaria Rulei compacta Nepraski. Large groups in the various classes of decorative foliaged plants also came from these exhibitors and from Wm. Duckham, gardener to D. W. James, Charles Webber, gardener to Mrs. J. Hood-Wright, A. L. Marshall, gardener to J. B. Dutcher, J. McKenzie, gardener to Mrs. Charles Pratt, and others. In the chrysanthemum plant classes, the principal exhibitors were Peter Duff, gardener to J. Crosby Brown, Robert Whyte, gardener to Mr. Graeffe, G. B. Winslade, gardener to the Osborne estate, and J. M. Hunter, gardener to H. V. R. Kennedy.

The Whitney cup for best group of decorative plants covering 100 square feet, was won by Chas. Knight with the most artistically arranged group in the hall; second prize going to Richard Brett. Mr. Brett took the Gerry cup for 75 foot group, and second in this class went to Wm. Duckham for a superb collection. Mr. Brett also won the Cottenet cup for six palms, the J. Hood-Wright cup for group of crotons and silver medals for six foliage plants, best specimen palm, best specimen croton, best specimen foliage plant, best six ferns and best specimen fern. Silver medals were awarded to Charles Webber for three crotons, to Wm. Duckham for specimen Dracæna Sanderiana, to Wm. Scott, gardener to Mrs. T. C. Eastman, for three pans of lycopodium and for best six cyclamers; to Wm. Anderson, gardener to Mrs. F. E. Constable for Eucharis amazonica; to J. McKenzie for berried plants, to A. L. Marshall for Rex begonias; to G. B. Winslade for three chrysanthemum plants; for group of pompons and for one specimen each of crimson and yellow; to Peter Duff for specimen pink and for best specimen chrysanthemum plant in the show. Robert Whyte got the J. Pierpont Morgan cup for group of chrysanthemums.

Of chrysanthemum blooms there were some wonderful exhibits by Peter Duff, W. C. Russell and others. G. B. Winslade took the Speyer cup for best collection and S. A. Leuba was second. Peter Duff took the Loomis cup for best six varieties of six blooms each, W. C. Russell second, silver medals being the second prize in each case. Mr. Duff's Viviand-Morel, Mrs. Geo. West, Mutual Friend, Minerva

and Jeannie Falconer were all notable flowers. Silver medals were also won by W. Scott for 36 blooms in 36 varieties and 24 varieties; by Peter Duff for vase of 12 white and vase of 12 pink; by W. C. Russell for 12 yellow and for the 6 largest blooms (Viviand-Morel) and by G. B. Winslade for best crimson; T. Harvey, William Hunter, J. G. McNicoll, Wm. Anderson and Robert Angus received certificates in these classes.

In cut roses, Wm. Turner, Owen J. Owen, A. A. Taaffe and A. J. Wengerter won certificates, and the Aldrich cup for winner of the largest number of certificates went to Mr. Turner. In carnations, certificates went to Wm. Turner, Owen J. Owen A. A. Taaffe and Wm. Cowan, Mr. Turner getting the Trevor cup. J. M. Hunter got the Trevor cup for gardenias and Wm. Duckham the Trevor cup for violets. W. Scott took three silver medals and G. B. Winslade one, for greenhouse grapes.

The orchid displays from H. Clinkaberry, gardener to C. G. Roebling, and A. Herrington, gardener to H. McK. Twombly, were beautiful. Mr. Herrington took the silver medal for a group composed mainly of cattleyas and cypripediums and his big pan of Cattleya labiata with 75 blooms was much admired. Mr. Clinkaberry won the Dodge cup for arrangement of orchids with a most beautiful basket of rare blooms. A pretty cocos graced the center and the square handle, four feet high, was hung with sprays of oncidium, Dendrobium phalænopsis and asparagus. The Irving cup for best collection of orchids also went to Mr. Clinkaberry. This group comprised many gems, such as Cypripedium insigne Sanderiæ, Cypripedium Thayeranum, Cypripedium Henry Graves, Jr., and Ærides Lawrencæ. Adjoining it was a fine group, not for competition, from Lager & Hurrell.

Trade exhibitors were assigned to the foyer. Here were some fine groups of araucarias and pandanuses from John Scott and F. R. Pierson Company, Mr. Scott winning first prize in both classes, and a collection of decorative plants from Siebrecht & Son, not for competition. A. Schultheis took a silver medal for ericas, Hugh Graham, for chrysanthemum Pennsylvania, C. L. Trauth, for group of cyclamens and W. A. Manda for fifty varieties of fancy caladiums. A group of orchids in the form of a graceful mantel decoration by W. A. Manda was much admired for its artistic arrangement.

C. W. Ward made a very large exhibit of carnations. It included many hand-some novelties, such as White Cloud, Bon Ton, Gold Nugget, Maceo, New York, Blush, John Young, C. A. Dana, Flame and Mrs. James Dean, the latter being the prize winner at the Philadelphia exhibition as best American seedling not yet disseminated. A smaller display of carnations was made by C. Besold. The new pink variety Frances Joost in this collection looked very promising. Wm. Rockefeller also showed seedling carnations and Robert MacMillan a vase of fine mignonette.

A CORNER AT THE PHILADELPHIA SHOW.

Springfield, Mass.

The annual exhibition of the Hampden County Horticultural Society took place November 10, 11 and 12. Although not as many exhibitors as in some seasons, the high quality and excellence of all the flowers were noticeable. Seldom as many exhibits have been gathered together where all were as meritorious.

A. N. Pierson, of Cromwell, Conn., had the largest individual exhibit in the hall. His vase of 50 blooms of Mrs. Perrin were extremely perfect and beautiful. Minnie Wanamaker, Maud Dean, Mrs. G. M. Pullman, were also very fine flowers. He had in the class for yellows, an easy victory in a magnificent vase of Major Bonnaffon. He was also first in the class for 12 vases of 12 different colors, besides taking front rank in many other classes.

Among private gardeners, Mr. John Barr, gardener to Mrs. B. P. Cheney, So. Natick, Mass., took most of the first prizes, closely followed by Donald MacGregor, gardener to E. H. R. Lyman, Northampton, Mass. Mr. Barr's Viviand-Morel and Mrs. Jerome Jones were magnificent specimens.

E. H. Howland, of Holyoke, G. H. Sinclair, gardener, made a fine showing of exceedingly well grown flowers. His vase of Niveus was the best white in the exhibition. A new variety was noticed in his collection, a vase of Peter Kay, which promises to be a favorite and is especially good. Another good exhibit was from John Coombs, of Hartford, Conn.

Among chrysanthemum plants, E. H. Howland was the only commercial grower filling several classes. In the center of the hall was a fine cluster of bush specimens from Mrs. Cheney, So. Natick, Mass., and several seedlings from Alex MacLellan, Newport, R. I., were shown. A good yellow (No. 4) and also an old rose and gold (No. S. 3), were awarded diplomas.

The best exhibit of roses ever staged in this city was made this year by A. N. Pierson, of Cromwell, Conn. His Bridesmaids and Brides reminded one of the famous Natick roses. The President Carnot, Kaiserins, Meteors and American Beauties were exceedingly fine flowers. These took first award with E. H. Howland, of Holyoke for a good second. John Coombs, of Hartford, Conn., taking third.

Seldom does one ever see so good pansies as were set up by A. P. Wade and Geo. F. Gurgenback of this city. Pierson took 1st for double blue violets; 2nd for single blue; 1st for lily of the valley, Donald MacGregor being 1st in the single blue violet class.

Not as many carnations were shown this year as last season. For best display A. N. Pierson was awarded 1st; C. W. Ward, Queens, N. Y., 2nd. Several new and very promising varieties were in Mr. Ward's collection, including John Young, Gold Nugget, Dandy and No. 6.

H. Grout of this city took 1st for blooms of any one variety; 1st for 50 blooms and a special 1st all with Conch shell. This is a wonderfully pleasing color of soft rose, better color than Daybreak and several shades lighter than Scott with perfect calyx, full flower, good stiff stem and extremely fragrant. This variety was also awarded the silver cup offered by the Cottage Gardens, Queens, N. Y., for best seedling.

Andrew Griffin, gardener to J. J. Van Alen, of Newport, R. I., made an exhibition of Begonia semperflorens hybrids. Pompon and anemone flowered chrysanthemums were shown by E. H. Howland. Two large tables of chrysanthemums, roses, carnations, violets, adiantums, etc., were shown by E. D. Shaw, of Holyoke, not for competition.

The Inter-state contest was not as largely represented as last year's though all were excellent flowers. The Connecticut prize went to A. N. Pierson, Cromwell; Massachusetts prize to John Barr, gardener, So. Natick; Michigan prize to Nathan Smith & Son, Adrian; Rhode Island prize to Robert Laurie of Newport. The capital went to Mr. Barr, state of Massachusetts.

Rainy weather interfered somewhat with the attendance which without doubt will leave the society in debt. The arrangement of hall was about the same as for the last few years and was in the competent hands of manager and secretary W. F. Gale. B. M.

PART OF THE MAIN HALL AT THE PHILADELPHIA SHOW.

St. Louis.

The seventh annual chrysanthemum exhibition closed Saturday night. The display was larger and better than that of former years, and was well patronized by the public, yet the committee was not well pleased with the attendance. We did not make any money but we hope that when the committee meets it will not show a loss. The cause of the loss (if there is any) will be on account of the change of location.

The special prizes amounted to over $800 and the Shaw prizes to $500, the club offering all second and third prizes, except in the Shaw prizes. The first day's premiums were distributed as follows:

CHRYSANTHEMUM PLANTS.

Best pink, white and yellow, Wm. Schray 1st, Michel Plant and bulb Co. 2nd. Best 3 plants, pink, white and yellow, C. Young & Sons 1st, Andrew Meyer 2nd. Best 3 plants, pink, white and yellow, Andrew Meyer 1st, C. Young & Sons 2nd. Best 3 plants any color, C. Young & Sons 1st, Andrew Meyer 2nd. Best single specimen plant white, Frank Fillmore 1st, C. C. Sanders 2nd. Best single specimen plant yellow, Andrew Meyer 1st, F. Fillmore 2nd. Best specimen plant, pink, A. Meyer 1st, Carl Beyer 2nd. Best specimen plant any color, C. Young & Sons 1st, A. Meyer 2nd, F. Fillmore 3rd. Best 3 plants white, pink and red, Wm. Schray 1st, A. Meyer 2nd. Best 3 plants white, pink and yellow, C. Young & Sons 1st, Wm. Schray 2nd.

Best 3 plants, white, pink and yellow, A. Meyer 1st, Wm. Schray 2nd. Best 3 plants, white, pink and yellow, C. Young & Sons 1st, Wm. Schray 2nd. Best 3 plants, white, pink and brown, A. Meyer 1st, C. Young & Sons 2nd. Best 3 plants white, pink and yellow, A. Meyer 1st, Wm. Schray 2nd. Best 3 plants, white, A. Meyer 1st, F. Fillmore 2nd. Best 3 plants in 3 colors, A. Meyer 1st, Wm. Schray 2nd. Best 3 plants in 3 colors, Wm. Schray 1st, A. Meyer 2nd. Best 6 specimen plants, 2 pink, 2 white and 2 yellow, A. Meyer 1st, F. Fillmore 2nd. Best single specimen plant, yellow, C. Young & Sons 1st, A. Meyer 2nd. Best single specimen plant, white, C. Young & Sons 1st, Wm. Schray 2nd. Best specimen plant, pink, C. Young & Sons 1st, F. Fillmore 2nd. Best 2 plants any color, Wm. Schray 1st, A. Meyer 2nd. Best single plant, white, C. Young & Sons 1st, Wm. Schray 2nd. Best single plant, yellow, Wm. Schray 1st, A. Meyer 2nd. Best 3 plants pink, white and yellow, Wm. Schray 1st, A. Meyer 2nd.

STANDARDS.

Best specimen plant, white, A. Meyer 1st, Wm. Schray 2nd, C. Young & Sons 3rd. Best specimen plant, yellow, Wm. Schray 1st, F. Fillmore 2nd, A. Meyer 3rd. Best specimen plant, pink, Wm. Schray 1st, A. Meyer 2nd, F. Fillmore 3rd. Best specimen plant any color, A. Meyer 1st, Wm. Schray 2nd, F. Fillmore 3rd. Best specimen plant, white, Wm. Schray 1st, A. Meyer 2nd. Best 3 single specimen plants, Wm. Schray 1st, A. Meyer 2nd.

SINGLE STEM AND FLOWER.

Best 40 plants, one or more varieties, Wm. Schray 1st, C. Young & Sons 2nd, A. Meyer 3rd. Best 25 plants, white, one variety, C. Young & Sons 1st, A. Meyer 2nd, Wm. Schray 3rd. Best 25 plants, pink, one variety, E. G. Hill & Co. 1st, A. Meyer 2nd. Best 25 plants, yellow, one variety, A. Meyer 1st, E. G. Hill & Co 2nd, F. Fillmore 3rd. Best 8 white, 8 yellow and 8 pink, E. G. Hill & Co. 1st, C. Young & Sons 2nd.

CARNATION PLANTS.

Best 20 plants in bloom, Wm. Schray 1st, F. Fillmore 2rd, C. C. Sanders 3rd. Best 5 plants in 5 varieties, John Steidle 1st.

GROUP CHRYSANTHEMUMS.

Best arranged group of chrysanthemum plants, to cover not less than 100 square feet. There were five sections, and in the first section there were two entries, C. Beyer 1st, C. C. Sanders 2nd. Section 2. E. Schray 1st. Section 3. A. Meyer 1st. Section 4. Chas. Beyer 1st. Section 5. C. Young & Sons 1st.

SHAW PREMIUMS.—PLANTS.

For a plant of decided merit for cultivation, not previously an article of North American commerce and introduced to such commerce by the exhibitor during the year in which said award was made, Gold medal; value, $25. Luther Armstrong won this medal with his ever-blooming tuberoses. For the largest and best collection of named palms, not less than 12 kinds, Wm. Schray 1st, C. Beyer 2nd, Michel Plant and Bulb Co. 3rd. For the best 25 named begonias, not more than 2 of any one variety, Michel Plant and Bulb Co. 1st, Wm. Schray 2nd, C. Young & Sons 3rd. For the largest and best collection of named ferns, not less than 12 kinds, Michel Plant and Bulb Co. 1st, Wm. Schray 2nd, Jordan Floral Co. 3rd. For the largest and best collection of named foliage plants, other that the preceding, with variegated leaves, not less than 12 kinds, C. Beyer 1st, Michel Plant and Bulb Co. 2nd, Wm. Schray 3rd. Best collection of 25 blooming plants for house decoration, exclusive of chrysanthemums, not more than 3 varieties of any species, C. Young & Sons 1st, Wm. Schray 2nd, C. C. Sanders 3rd. For best 12 varieties of named geraniums in bloom, grown in not over 6 inch pots, F. Fillmore 1st, Michel Plant and Bulb Co. 2nd, A. Meyer 3rd. For best 6 named dracænas, C. Beyer 1st, Wm. Schray 2nd, C. Young & Sons 3rd. For best 12 named flowering begonias in bloom, not more than 2 of any one variety, Wm. Schray 1st, Michel Plant and Bulb Co. 2nd, A. Meyer 3rd. For best 6 named orchids in bloom, in 6 varieties, Wm. Schray 1st, C. Young & Sons 2nd. For best 6 named bouvardia in bloom, not more than 2 of any one variety, Wm. Schray 1st, F. Fillmore 2nd, C. Young & Sons 3rd. For best 6 named cyclamen in bloom, C. C. Sanders 1st, C. Young & Sons 2nd, Wm. Schray 3rd.

For best specimen of Areca lutescens, C. C. Sanders 1st, Jordan Floral Co. 2nd. For the best specimen of Howea Belmoreana, C. Beyer 1st, Jordan Floral Co. 2nd. For the best specimen of Howea Forsteriana, C. Beyer 1st, Wm. Schray 2nd, For the best specimen of Livistona Chinensis, C. C. Sanders 1st, Wm. Schray 2nd. For the best specimen of Pandanus utilis, C. Beyer 1st, C. C. Sanders 2nd. For the best specimen decorative plant, other than the above, Wm. Schray 1st, C. Beyer 2nd. For the largest and best collection of chrysanthemums perfectly hardy in the latitude of St. Louis, C. Young & Sons 1st, C. C. Sanders 2nd, Wm. Schray 3rd. For the largest and best named collection of chrysanthemums, hardy with slight protection in the latitude of St. Louis, C. C. Sanders 1st, C. Young & Sons 2nd, Wm. Schray 3rd. For the best 6 species of evergreen shrubs, for lawns, hardy in the latitude of St. Louis, C. Young & Sons 1st, C. C. Sanders 2nd, Wm. Schray 3rd.

CHRYSANTHEMUM CUT BLOOMS.

Bes 48 flowers, 8 sorts, 6 of a kind, Nathan Smith & Son 1st, C. Young & Sons 2nd, E. G. Hill & Co. 3rd. Best 24 white, in 3 sorts, 8 of each, Nathan Smith & Son 1st. C. Young & Son 2nd, W. J. & M. S. Vesey 3rd. Best 24 yellow, 3 sorts, 8 of each, E. G. Hill & Co. 1st, Nathan Smith & Son 2nd, Michel Plant and Bulb Co. 3rd. Best 24 pink, 3 sorts, 8 of each, E. G. Hill & Co. 1st, Nathan Smith & Son 2nd. C. Young & Son 3rd. Best 12 blooms Ivory, Michel Plant and Bulb Co. 1st, C. Young & Sons 2nd, Wm. Schray 3rd. Best 12 blooms of Niveus, H. Weber & Sons, Oakland, Md. 1st. Best 12 blooms Golden Wedding, H. Weber & Sons 1st, Michel Plant and Bulb Co. 2nd. Best 12 blooms, any yellow not mentioned, E. G. Hill & Co. 1st, N. Smith & Son 2nd, C. C. Sanders 3rd. Best 12 blooms yellow, E. G. Hill & Co. 1st, N. Smith & Son 2nd, C. Young & Sons 3rd. Best 12 blooms yellow, C. Young & Sons 1st, E. G. Hill & Co. 2nd. W. J. & M. S. Vesey 3rd. Best 12 blooms yellow, Michel Plant and Bulb Co. 1st, C. Young & Sons 2nd, E. G. Hill & Co. 3rd, Best 12 blooms white, C. Young & Sons 1st, W. J. & M. S. Vesey 2nd, Nathan Smith & Son 3rd. Best 12 blooms pink, E. G. Hill & Co. 1st, Nathan Smith & Son 2nd, Wm. Schray 3rd.

Best vase of cut chrysanthemums any color, Nathan Smith & Son 1st, E. G. Hill & Co. 2nd. Best vase of 24 flowers, assorted colors, C. Young & Sons 1st, E. G. Hill & Co. 2nd. Best vase of cut chrysanthemums, assorted colors, Wm. Schray 1st, Nathan Smith & Son 2nd. Best vase of 24 blooms, assorted colors, C. Young & Sons 1st, Wm. Trillow 2nd. Best vase of 50 chrysanthemum blooms, quality and arrangement to be equally

considered, Wm. Schray 1st, W. J. & M. S. Vesey, 2nd. Best vase of 24 blooms, assorted colors, Wm. Schray 1st, W. J. & M. S. Vesey 2nd.

CUT ROSES.

Best 20 Souvenir de Wootton, R. F. Tesson 1st E. W. Guy 2nd. Best 20 blooms Bridesmaid, Hunt estate, Terre Haute, Ind. 1st, W. J. & M. S. Vesey, Fort Wayne, Ind. 2nd, Wm. Trillow, Belleville, Ill., 3rd. Best 20 Perle des Jardins, J. F. Ammann, Edwardsville, Ill. 1st, W. J. & M. S. Vesey 2nd, Hunt estate 3rd. Best 8 American Beauty, South Park Floral Co., New Castle, Ind. 1st, C. Young & Sons 2nd, R. F. Tesson 3rd. Best 20 Brides, W. J. & M. S. Vesey 1st, F. J. Fillmore 2nd, E. W. Guy 3rd. Best 25 Pres. Carnots, W. W. Coles, Kokomo, Ind. 1st. Best 20 Meteors, Hunt estate 1st, C. Young & Sons 2nd, W. W. Coles 3rd. Best 20 Kaiserins, W. W. Coles 1st, W. J. & M. S. Vesey 2nd, R. F. Tesson 3rd. Best 20 La France, C. Young & Sons 1st. Best 20 Caroline Testouts, C. Young & Sons 1st, Best 20 cut blooms, one variety not mentioned, C. Young & Sons 1st, R. F. Tesson 2nd.

Best 5 varieties, 10 of a kind, American Belle and American Beauty excepted, South Park Floral Co. 1st, R. F. Tesson 2nd. Best 6 American Beauty roses, W. W. Coles 1st, C. Young 2nd, South Park Floral Co. 2nd. Best 20 blooms, Wootton, R. F. Tesson 1st. Best 25 blooms Kaiserin, not less than 24-inch stems, W. W. Coles 1st, R. F. Tesson 2nd. Best vase of 18 American Beauties, R. F. Tesson 1st, C. Young & Sons 2nd. Best 20 Meteors, C. Young & Sons 1st. Best 25 American Beauties, no more and no less, C. Young & Sons 1st, South Park Floral Co. 2nd. Best vase of Kaiserin, not less than 30 flowers, H. Weber & Sons 1st, South Park Floral Co. 2nd. Best 25 blooms of La France, C. Young & Sons 1st.

CUT CARNATIONS

Best vase of white carnations excluding McGowan and Alaska, Frank Fillmore 1st. Best vase, pink, excluding Wm. Scott and Daybreak, South Park Floral Co. 1st, H. F. Aue 2nd, W. Trillow 3rd. Best vase red excluding Jubilee, H. Weber & Son 1st, W. J. & M. S. Vesey 2nd. Best vase variegated, 50 flowers, one or more kinds, South Park Floral Co. 1st, H. F. Aue 2nd, H. Weber & Sons 3rd. Best vase of 40 Wm. Scott, W. J. & M. S. Vesey, 1st, H. F. Aue 2nd, J. Steidle 3rd. Best vase of 40 Lizzie McGowan, South Park Floral Co. 1st, J. F. Ammann 2nd, H. Weber & Son 3rd. Best vase of 50 Daybreak, South Park Floral Co. 1st, W. J. & M. S. Vesey 2nd, Wm. Trillow 3rd. Best vase of 40 Alaska, South Park Floral Co. 1st, Wm. Trillow 2nd, John Steidle 3rd. Best vase of 40 Jubilee, South Park Floral Co. 1st, H. F. Aue 2nd. Best vase 50 Albertini, South Park Floral Co. 1st. Best vase 50 Uncle John, Wm. Trillow 1st. Best vase of variegated varieties, H. Weber & Sons 1st. Best vase of 100 white carnations, H. Weber & Sons 1st, a silver cup, value $20. This cup was won by a vase of the finest carnations seem in this city for a long time, Flora Hill being the variety. Best vase 50 assorted carnations H. Weber & Sons 1st.

MISCELLANEOUS.

Best 100 double violets competition open to all, R. Tesson 1st, Wm. Lingenbrink 2nd, C. Young & Son 3rd. Best box of cut flowers, R. F. Tesson 1st, C. Young & Sons, 2nd. Best specimen of Pandanus Veitchii, C. Beyer 1st, Wm. Schray 2nd. F. Fillmore 3rd. Best 12 blooms of mignonette, A. Meyer 1st, C. Young 2nd, Walther & Mauer 3rd. Best 200 single violets, South Park Floral Co. 1st, R. F. Tesson 2nd, F. J. Fillmore 3rd. Best specimen palm Carl Beyer 1st.

SHAW PREMIUMS.—CUT BLOOMS.

Best 12 blooms of Viviand-Morel, West End Floral Park, Belleville, Ill., 1st, C. Young & Sons 2nd, Michell Plant and Bulb Co. 3rd. Best 12 blooms of any other pink variety; there were six entries. C. Young & Sons won first with a fine vase of Mrs. Perrin, E. G. Hill & Co. 2nd, with Autumn Glory and W. Trillow 3rd, with a vase of Mrs. Perrin, W. A. Chalfant, Springfield, Mo., showed Chebeaque, Michel Plant and Bulb Co.

WOLTEMATE'S TABLE EDGED WITH ASPARAGUS SPRENGERII, AT THE PHILADELPHIA SHOW.

Portia and E. W. Guy, Belleville, Ill., Mrs. Perrin. Best 12 blooms of the Queen, Nathan Smith & Son 1st, West End Floral Park 2nd, C. Young & Sons 3rd. Best vase 12 blooms of H. L. Sunderbruch, Wm. Schray 1st, W. J. & M. S. Vesey 2nd, C. C. Sanders 3rd. For best 12 blooms any other white variety. There were eight entries for this section. Nathan Smith & Son, of Adrian, Mich., won first with a fine vase of Mrs. Jerome Jones, West End Floral Park, 2nd with Florence Pullman and W. J. & M. S. Vesey, 3rd with Minnie Wanamaker. W. A. Chalfant showed Mrs. C. Molin; Michel Plant and Bulb Co. F. Pullman; E. Schray, Lenawee; C. Young & Sons, Minnie Wanamaker and E. G. Hill & Co., Mrs. Jerome Jones.

For best 12 blooms any variety introduced in 1895, 1896, 1897, there were eight entries; the winners being C. Young & Sons 1st, with Modesto; Nathan Smith & Son 2nd, with Western King and Michel Plant and Bulb Co. 3rd, with H. W. Rieman; The West End Floral Park showed W. S. Dinsmore; E. G. Hill & Co. Le Colosse Grenoble; W. E. Guy, Modesto; W. A. Chalfant, Mrs. Harry Toler and W. J. & M. S. Vesey, Lenawee. Best 12 blooms of Major Bonaffon, E. G. Hill & Co. 1st; W. A. Chalfant 2nd; Michel Plant and Bulb Co. 3rd.

The following florists were given certificates of merit: Richard Witterstaetter, Sedamsville, Ohio, for a new white carnation, Evelina; Hugh Graham, of Philadelphia, for his new chrysanthemum, Pennsylvania; H. Weber & Sons, Oakland, Md, for their new rose, Mrs. Robert Garrett; Stollery Bros., Argyle Park, Chicago, new pink carnation, Argyle.

Visitors at the show were A. Dimmock, St. Albans, England; H. Weber, Oakland, Md.; Geo. A. Kuhl, Pekin, Ills.; W. J. & M. S. Vesey, Fort Wayne, Ind.; Mr. Hunt, Terre Haute, Ind.; W. W. Coles, Kokomo, Ind.; Mr. Heller, of South Park Floral Co., New Castle, Ind.; Mr. Tower, of E. G. Hill & Co., Richmond, Ind., Mr. Reising, with Nathan Smith & Son, Adrian, Mich.; T. W. Guy, Kimswick, Mo.; J. F. Ammann, Edwardsville, Ills.; W. A. Chalfant, Springfield, Mo.; Mr. Emmons and Adolf Fehr, Belleville, Ills. J. J. B.

New Bedford, Mass.

The tenth annual chrysanthemum show was held at Adelphi Rink, November 4, 5, and 6. We were fortunate in choosing the latter part of the week, as the first was exceedingly stormy, like the whole week of last year. As an experiment we made it a general flower show, including chrysanthemums both plants and cut flowers, roses, carnations, decorative plants and design work; also a class of miscellaneous plants grown by amateurs, prizes in this line being liberally donated by various merchants, which brought out some fine specimens of home grown plants. It was more successful financially than for several years and the exhibition the finest ever shown here. A. H. Fewkes of Boston acted as judge.

First of interest were the six plants which won the silver cup, presented to the club by Fred. Grinnell, Esq., which now becomes the property of James Garthley, gardener to H. H. Rogers, he having won it two years in succession. The six plants were as follows: Mrs. Bullock, Mutual Friend, Iora, Mrs. Henszey, Major Bonnaffon and the old favorite W. H. Lincoln, which, by-the-way, was the best plant in the hall. Mr. Garthley also exhibited twelve bush plants, fine specimens, taking first prize. These were: J. Kupfer, Mrs. Henszey, Queen, L. D. Black, Ada Spaulding, Minerva, Mrs. Kimball, Silver Cloud, 2 John Shrimptons, and 2 W. H. Lincolns.

William Keith, gardener to T. M. Stetson, took first prize for group of chrysanthemum and foliage plants, artistically arranged, covering sixty square feet. Group of forty square feet, same arrangement was won by James Garthley. For three specimen plants Wm. Keith was first with following varieties—Minerva, Puritan and A. H. Fewkes. For one specimen, James Garthley took first with a mammoth plant of Mrs. Kimball against Major Bonnaffon entered by Wm. Keith, who took second. One Chinese, James Garthley first with L. D. Black; Wm. Keith second with Major Bonnaffon. Chas. N. Riley, gardener to E. D. Mandell, took first for standard, a fine specimen of Mrs. Perrin; Wm. Keith second, H. L. Sunderbruch. Peter Keith, gardener to Miss Delano, exhibited fine group of orchids and ferns.

Other awards were as follows: Twelve plants, single flowers 1st, James Garthley; 2nd, William Keith. In cut flowers, twenty-four distinct varieties, 1st, James Garthley; 2nd, Wm. Keith. Twelve distinct Japanese, 1st, James Garthley; 2nd, Alex MacLelland, Newport. Six distinct Japanese, 1st. Alex MacLellan; 2nd James Garthley. Six distinct Chinese, 1st, J. Eaton, Jr. Ten flowers, long stems, white, 1st, Wm. Keith; 2nd, B. J. Connelly, Taunton. Ten flowers, long stems, bronze, 1st, Wm. Keith. Ten flowers, long stems, yellow, 1st, J. Garthley; 2nd, W. Keith. Ten flowers, long stems, red, 2nd, C. N. Riley.

The commercial florists showed renewed interest, five having booths for sale of plants and cut flowers. Following took prizes in florists' classes: C. H. Waite, R. H. Woodhouse, A. B. Hathaway, S. S. Peckham, Jas. A. Russell. Jahn Brothers displayed an attractive booth, but did not enter the competition.

There were several good exhibits among the amateur class. J. W. Frasier

VIEW ACROSS THE MAIN STAIRWAY AT THE PHILADELPHIA SHOW.

took first for seedling from Wabau, fine flower closely resembling Sunstone. He has several other seedlings of promise. Alex MacLellan also showed seedlings, one taking second; also fine seedling canna. Finest of all cut flowers was a vase of Minerva, mammoth blooms, exhibited by James Garthley, closely followed by Wm. Keith's Mrs. H. Robinson.

Others worthy of note were Maud Dean, Mayflower, Lenawee, Le Colosse Grenoble, C. B. Whitnall, Zulinda, Mrs. Egan, Mrs. Peabody, Gold Standard, Mrs. A. J. Drexel and Gladys Vanderbilt. Sunderbruch proved a failure for exhibition, not lasting until the close of the three days. Thus ended our tenth annual; may the eleventh be even a greater success.

WHALING CITY.

Syracuse, N. Y.

The chrysanthemum show of the Central New York Horticultural Society opened under most unfavorable weather, rain, sleet and cold winds keeping away many visitors, and in some cases exhibits were injured with the drenching showers that came up so suddenly. The schedule called for judging to commence by 2 p. m., but it was after 5 p. m. before Grove P. Rawson could commence his work. The quality of the exhibits was below that of last year, especially in specimen plants, While the size of the flowers was very passable they lacked in foliage and shape. The only marked improvement was in single stem plants, which were much dwarfer and finer flowered than heretofore. The display of cut flowers was not so great, but among them were some very meritorious blooms.

P. R. Quinlan & Co. made a very nice exhibit in the centre of the hall, not for competition, composed of tropical plants interspersed with large vases of chrysanthemums and roses, Major Bonnaffon, Mrs. Jerome Jones, and Helen Bloodgood standing out brilliantly, being exceedingly well done. A vase of Carnot rose in this group was also greatly admired.

A very attractive exhibit was made by Grove P. Rawson, Elmira, N. Y., of a reproduction in nature of a picture of a pitcher of yellow chrysanthemums, frame size 7x5 feet. This was a piece of work in which rare taste was displayed. The frame was composed of ivy leaves, the inner flat and the corners being of the same bronzed, the pitcher proper of solid yellow chrysanthemums on a background of green carpet moss, the blooms in the pitcher being relieved with red berried native prunus and asparagus.

The display of native ferns made by M. H. Oschner, of Eastwood, was most interesting and instructive. It comprised 19 varieties, such rare kinds as Pelaca purpurea, Asplenium platyneuron, and Botrychium termatum being well represented.

The awards in the florists' class for 12 plants, chrysanthemums, 12 varieties. John Brouder was first with a grand dozen, Pink Ivory, Golden Wedding, and Georgiana Pitcher being nicely grown, W. Meneilly second. For 6 plants yellow, W. Meneilly first. For 6 plants while, J. Bronner first, Ivory again coming to the front. Display of foliage plants, L. E. Marquisee first.

In the gardeners' class, 12 plants, 12 varieties, D. Campbell first, W. Parsons second, Geo. Ham third. Six plants, 6 varieties, Geo. Ham first, 6 plants white D. Campbell first with a six that would be hard to beat, Geo. Ham second. Six plants yellow, D. Campbell first, Geo. Ham second, W. Parsons third. Twelve single stem plants W. Parsons first, (these were very dwarf and carried immense flowers) D. Campbell second, G. Ham third. Display of foliage plants D. Campbell first. Display of cut blooms C. Barson first. For the best single specimen plant on exibition, Geo. Ham easily carried off the prize with a magnificent Lincoln seven feet in diameter.

In the amateurs' class for 8 plants, 8 varieties, C. A. Phillips was first with a grand lot, Stephen Morey being a close second, T. Hobson third. Six plants, 6 varieties, C. A. Phillips was again first. Most notable amongst this six was a half standard of A. H. Fewkes. For 2 specimens, S. Morey first, C. A. Phillips second, T. Hobson third. Best display of cut blooms, Stephen Morey first. Twelve blooms, 12 varieties, C. A. Phillips first, S. Morey second.

In class open to all for best display of chrysanthemum plants John Bronner first, D. Campbell second. For 6 vases cut blooms, 6 varieties, 12 blooms of each, 1 vase yellow, 12 blooms, 1 vase pink, 12 blooms, and 1 vase white 12 blooms, there was no competition against L. E. Marquisee who carried off first honors with very beautifully finished blooms of Peter Kay, Philadelphia, Mutual Friend, Gladys Vanderbilt, Sunclad, Maud Dean and Mayflower. For 24 blooms, 24 varieties, Nathan Smith & Son of Adrian, Mich., were first with magnificent blooms of Minnie Wanamaker, Mayflower, Philadelphia, Western King, E. Dailledouze, Mrs. Geo. A. Magee, Viviand-Morel, Mrs. Jerome Jones, Mrs. W. C. Egan, Reine D' Angleterre, Silver Cloud, Marguerite Jefords, Col. W. B. Smith, Melinda, Mrs. J. J. Glessner, Sunstone, G. W. Childs, Golden Gate, Lady Playfair, Iora, The Queen, Mme. Phillippe Rivoire, and Admiral Avellan, L. E. Marquisee was second, C. A. Phillips third.

For 24 single stem and bloom, pots not to exceed 6 inches, 24 varieties, C. A. Phillips was the only exhibitor showing a

collection which in the opinion of the judge would be hard to beat in any of the large cities, the plants being very dwarf and carrying enormous flowers. The varieties were Golden Wedding, Niveus, Georgiana Pitcher, Peter Kay, Major Bonnaffon, Lincoln, Mayflower, Philadelphia, Maud Dean, E. O. Farrell, Viviaud-Morel, John Shrimpton, Mrs. Geo. Magee, Pitcher & Manda, Mrs. Geo. West, Jayne, A. H. Fewkes, White Boehmer, Helen Wright, The King, Minnie Wanamaker, Eda Prass, Mrs. Jerome Jones and Heron's Plume.

For the largest bloom on exhibition darker than Daybreak in color and is certainly a fine variety.

The Stearns Yellow Fellow Wheel, for a new and distinctive yellow chrysanthemum, to be named the Yellow Fellow, went to Grove P. Rawson. His variety, which is a nice yellow something after the style of Golden Wedding, was decided upon by the company's representative. F. C. Howlett's prize for best individual design of landscape gardening, space to occupy 3x5 feet, was won by Bannister Bros. The silver cup offered by Mrs. H. S. White for the best 6 plants of Adelaide White went to Walter Meneilly. Four

JOHN WESTCOTT'S FIRST PRIZE GROUP OF PLANTS AT THE PHILADELPHIA SHOW.

Mr. Phillips carried off the honor with a grand bloom of Peter Kay (grown in a 6-inch pot). For best collection and display of plants grown in 6-inch pots, for market purposes, L. E. Marquisee took first with a very neat lot being especially well grown. The varieties consisted chiefly of H. L. Sunderbruch, White and Pink Ivory, L. Canning, Gladys Vanderbilt and Mutual Friend. C. A. Phillips was second with a very creditable display. For table design, L. E. Marquisee was first with a centrepiece of Pink Ivory, very nicely arranged with favors of the same flowers; Charles Barson second, Lydia A. Barson, third.

The classes for cut roses were better filled than usual. For best collection and display Peter Crowe, of Utica, was first, staging some fine flowers of Bridesmaid, Bride, Beauty and Perle carried on long stems and heavy foliage. L. E. Marquisee won second prize. For 3 vases, 3 varieties, L. E. Marquisee first with Beauty, Bridesmaid and Bride, Peter Crowe being a close second. Mr. Crowe also had on exhibition a vase of the new red rose Christine de Noue which he thinks will soon become a popular favorite both from a connoisseur's and commercial standpoint.

Carnations made a fine display and were of excellent quality. For best collection and display L. E. Marquisee was first, Henry Burt taking second. Fifty cut blooms in one vase, any variety, L. E. Marquisee first, H. Burt second; 6 blooms, one variety, L. E. Marquisee first, with his new pink seedling Columbia, H. Burt showing some fine Flora Hill against it. This seedling is a little

certificates of merit were awarded to Messrs. E. G. Hill & Co., of Richmond, Ind., for seedling chrysanthemums Nos. 1003, 1000, B. H. and Autumn Glory. The latter is a very fine pink and large striking flower. Stollery Bros., of Chicago, for new carnation Argyle, certificate of merit. Frank Baker, of Utica, certificate of merit for carnations Red Jacket and Oneida. L. E. Marquisee, Syracuse, special mention for new yellow chrysanthemum, and highly commended for two seedling carnations Columbia and Ideal. Nathan Smith & Son, Adrian, Mich., certificate of merit for a new yellow chrysanthemum. The four blooms that represented this variety won the admiration of everyone and were the center of attraction during the entire show.

Financially the show was a failure. The expenses were $625 and the receipts $450. The number of adult tickets sold was 1650, number of children's tickets 97, while there were 755 complimentaries given out.

Visitors: Messrs. Crowe, Matthews, Seitzer and Baker, of Utica; Mr. Bechstedt, of Oswego, N. Y., and Mr. Paterick, of Auburn, N. Y.

I forgot to mention a bloom that Mr. Rawson showed of Wm. H. Chadwick. Unquestionably it possesses all the qualities of a first-class variety, color somewhat after the Carnot rose. ALPHA.

Toronto.

As predicted, the eighth annual chrysanthemum show held by the Gardeners' and Florists' Association was in point of quality of exhibits by far the best show that has been held here yet. The time was just right to catch the best blooms of the best sorts in the best condition. Only the roses would have been a little better perhaps with two weeks more in which to get substance and body. As it was they were very good, but not so superbly grand as they have been seen here.

The carnations were simply magnificent, exceeding both in quality and size those of other years. The carnation table was a center of attraction for the "boys" during the whole show, and the good condition in which they kept from Wednesday to the Monday following was another surprise, which, however, may be accounted for to a large extent by the fact that the incandescent light is now used where gas was in former years. Most of the flowers were as good when being taken away as when brought in. Great credit is due to Mr. Valr, the superintendent. The hall was never at any time too hot; the floor was well sprinkled every night and everything was kept in good order, clean and well swept; plants were watered and vases filled every day.

If someone does not come to the rescue the specimen chrysanthemum plants will soon be as scarce as the dodo; they grow less and less in quantity every year, Mr. R. Gore, gardener to Sir Casimir Gzowski, being almost the only exhibitor, his plants and standards being very well grown and in good trim. Exhibition Park, Horticultural Gardens and the North Toronto Floral Co. were the only other exhibitors of specimens. The 12 distinct varieties in 6-inch pots put up by Exhibition Park were well worthy of mention. Single stem, single flower plants were well represented and the competition was keen. Grainger Bros. were first for whites with 12 very fine Queens, Horticultural Gardens second with Niveus, Miller & Son third with some good Mayflower. Grainger Bros. were also first in pinks with President Smith. H. Dale, of Brampton, was ahead in yellows with Georgiana Pitcher, magnificent blooms. Horticultural Gardens, in any other color, was first with Marguerite Jeffords. In 12 distinct varieties, three in a 6-inch pot, H. Dale had the prettiest and best; Exhibition Park second best.

There were five entries for the best group of chrysanthemums, palms and ferns arranged for effect. Manton Bros. took first prize for the best arrangement ever seen in the pavilion. I much regret not being able to get a respectable photograph of it, but the windows at the back made it impossible. W. Jay & Son were second for a very pretty and tasty group, but a little too tightly packed and evenly banked. Grainger Bros., who were awarded third prize, also had a most beautiful arrangement, which probably would have been second but for a large cycas (a fine plant too) at one end which somehow seemed to mar the whole effect. The ten-foot circular groups of foliage plants round the gallery pillars were excellent too, the one put up by Horticultural Gardens was admired by everybody; Exhibition Park came second and Manton Bros. third. There were no mantels this year, and this exhibit was much missed; a sudden demand seems to have sprung up for mantels last month and even the manufacturers were run out or short.

The exhibit of palms in 10, 8 and 6-inch pots was very large and the competition keen. They made a great show and are altogether indispensable. The section for a single specimen palm must be put back in the prize list next year; they are wanted

CENTER TABLE AT THE TORONTO SHOW.

to complete the general effect. Manton Bros., J. H. Dunlop, W. Jay & Son, Grainger Bros. and Exhibition Park were the prize takers. Large ferns were a little off color, exhibitors probably not caring to bring their best out at this time of year. Small ferns in 3-inch pots showed up in large quantities and were of very good quality too; they come in most useful for placing round the tables of cut flowers, among orchids, etc. J. H. Dunlop, Grainger Bros., Manton Bros., Jay & Son had the best.

Orchids were in fine feather, and Manton Brothers were the chief exhibitors. They had a large and beautiful collection of cattleyas, cypripediums, etc. A fine spike of Oncidium varicosum was seen hanging from the tripod. J. H. Dunlop was first for three orchids in flower, one a fine Zygopetalum Mackayi. Horticultural Gardens had among their lot a Vanda tricolor, Peristeria espiritu sancto, etc. Exhibition Park had a grand piece of Cypripedium Spicerianum, also C. Sedeni and others. These orchids were a great attraction. Mr. Gore took first prize for his primulas, and Grainger Bros. for their cyclamen. J. H. Dunlop was first for six callas in 10-inch pots. Others had some fine large plants, but they were not in flower.

Mr. A. H. Ewing was the judge of plants. There were no protests, but Mr. Ewing begged me to offer his thanks to the exhibitors for their kind forbearance and to assure them of his deep regret at his inability to award them all first prizes, being well aware that they all thoroughly deserved them, although one did do a little better than the other. Mr. Ewing also instructed me to say that he had no use for the "stony stare" or a suit of armor; the "glad hand" was always extended.

In the chrysanthemum cut bloom class a large number of entries were made; the competition was very close and the judge had to come down to fine points in order to reach a decision. The vases of 20 blooms were really grand; some of them may be seen on center table photograph. H. Dale's Queens well deserved first prize; Grainger Bros'. Ivory were second, Miller & Son's Mayflower third. This latter sort, although they were magnificent blooms, did not seem to "fetch" the judge and it was the same all through, the plant judge being affected the same way. It is not by any means a pure white by day light, but by artificial light it is "all right" and very "fetching"; they were judged by daylight. Dale was first also for his vase of 25 any varieties, Miller & Son second. For the vase of 12 white Mills & Thompson took first with Queen, Exhibition Park second with Niveus. Miller & Son's vase of 12 Bonnaffon got there in yellows, Mills & Thompson's Georgiana Pitcher second. Dale's 12 Viviand-Morel, superb blooms, were the first pinks; Miller & Son's W. H. Smith second. In the vase of six yellows, Exhibition Park's Georgiana Pitcher were first; Mr. Geo. Hollis took second with his new Edgar Buckland, a very taking flower and one that should be in every collection, quite distinct. Dale took first for 25 distinct varieties. Dunlop second. Dale also took first for 12 distinct varieties, Mills & Thompson second. Miller & Son obtained a certificate of merit for a fine seedling and Geo. Hollis showed three seedlings, one a very pretty and distinct pale pink. He also was awarded a certificate of merit. Mills & Thompson also had a sport from Queen with a cream tinge, very pretty.

Floral designs, etc., were fully up to the mark and made a magnificent showing. The hand bouquet of any flowers, presentation baskets of any flowers and of chrysanthemums were judged by Lady Aberdeen, who visited the show on the second day. She did her work like an expert, though of course it was a matter of taste in a large degree. There were three bouquets entered. Dunlop, with Bridesmaid and lily of the valley, a very tasty bunch, was awarded first; Manton Bros. had a superb bouquet of cattleyas, but a little too flat perhaps, which was second; Tidy had a beautiful bunch of Bridesmaid, which took third. In the presentation basket of any flower Dunlop was again first; his basket was filled with Bride roses and mignonette, and decorated with cattleyas, zygopetalum and valley; Tidy was second with a basket of Meteors which some thought should have been first; Grainger Bros. were third with a beautiful basket of 'Maids. Dunlop's presentation basket, filled with the finest Golden Wedding in the show, was magnificent and well deserved first prize; Grainger Bros. were second with pink and white chrysanthemums. Grainger Bros'. flat basket of Viviand-Morel and Queens was first, Dunlop second with Dailledouze and Niveus, Jay & Son third. The first prize for standing anchor was as usual taken by Tidy for work which could not be beaten anywhere; the work

manship and taste were perfect; Dunlop was second with a beautiful piece, but the base was too heavy and the anchor too low; Grainger Bros. third for a better proportioned piece, but I suppose not quite so well done.

There now remains the carnations and roses. The former, as before mentioned, were the best ever shown here. The North Toronto Floral Co. (W. Muston) took first in whites for some magnificent Lizzie McGowans, first in reds with Jubilee, third for pinks with Scott, and third for bunch of 50 with Daybreak. Dale was first in pink with some superb Edna Craig, second in whites with Flora Hill, second in reds with Portia, first in yellows with Dean Hole (very fine), first in bunch of 50 with Edna Craig again. Dunlop took second with Triumph in bunch of 50, and third with Ontario in whites. Miller & Son were second with Triumph in pinks, third with Meteor in red and second with a yellow seedling. They also had many promising seedlings. In the bunch of 50 with green most tastefully arranged, there were many entries; Manton Bros. first, Dunlop second and Tidy third. In fancies the North Toronto Floral Co. was first with superb Minnie Cooks, Dale second with Mrs. Bradt, Milier & Sons third with seedlings.

In roses Dale took first for Perle, Bride, Bridesmaid, Mme. Hoste, Cusin and Meteor. Dunlop took first for Mermet, Wootton, Sunset, Am. Beauty and Carnot. For vase of 50 roses, arrangement to count in judging, Dunlop was ahead with a grand bunch of Am. Beauty; Dale second also with some very fine American Beauties, and Tidy third. All these roses made a truly splendid exhibit, one which I don't think could be beaten at any of the shows held this fall. There were violets galore, and fine ones at that. Dale, Grainger Bros. and Manton Bros. took prizes for doubles in the order named, and Manton Bros., North Toronto Floral Co. and Dale for singles.

The amateurs in their classes did very well, considering it was the first public show held by the Horticultural Society. In fact some of the cut blooms and the single-stem plants were as good as in the professional classes, Mr. G. R. Copping and Mr. H. Lucas being the principal prize takers. There were also exhibited some well grown palms, ferns and foliage plants and fruit, making in all a very creditable show for a beginning; we must creep before we can walk, and if only amateurs will get over that fear many of them seem to have of being beaten, we shall soon get a first-class show from them. There are points about showing plants and flowers which cannot be learned except in actual practice, and the sooner these points are learned the better for everyone.

This I think concludes the prize list. I must mention, however, that Mr. Wm. Gammage, of London, acted as judge of cut flowers and designs (outside of those judged by Lady Aberdeen) and gave great satisfaction by his conscientious work. There were no protests and I heard no kicking at all. From a social point of view among the trade the show was certainly the best we have had; everyone "took their medicine like little men," and one heard none of that jealousy and bickering that so often mars the pleasure of these exhibitions. This is a phase that should be kept up and even improved. There were many more florists from outside points present than we have had before. I was unable to get all their names, but I can mention Messrs. F. Mitchell, of Innerkip; W. Hunt, S. Aylett, F. G. Foster and E. J. Townsend, of Hamilton; H. McLean, St. Thomas; H. Groff, Simcoe; W. Gammage, A. G. Stevens and Cole, of London.

And now I am sorry to have to state that the show was not a financial success. We did not take in as much at the door during the four days as in other years we have taken on Thanksgiving day, and this for no lack of advertising and energy in getting it before the public. On the Saturday it was expected there would be a big turn out, but a reception at Government house and an exciting football match in the afternoon and Nansen in the evening, were counter attractions which the show could not overcome. However, all expenses will be paid and as far as can be seen at present the prize winners will get about 50% of their money, perhaps a little more. It is extremely gratifying, though, to hear the boys say that in spite of the loss they will not be deterred from endeavoring to make as good a show next year. That is the right spirit and it does one good to hear it.

During the show a most enthusiastic meeting of the trade present (about 50) was held in order to form a Canadian society, somewhat on the lines of the S. A. F. The name chosen was the "Canadian Horticultural Association," and Mr. Wm. Gammage, London, was elected president; Mr. Hugh McLean, St. Thomas, secretary; Mr. J. H. Dunlop, Toronto, treasurer. A meeting will be held some time in January next to elect permanent officers and an executive committee, and to confirm the constitution and by-laws arranged at this preliminary meeting. There appeared to be an urgent need for something of this sort in Canada, and it is expected that the trade in all the provinces will join in and make this association a howling success. Mr. Hugh McLean, the secretary, is a hustler, and as these societies depend mainly on that officer, there is no doubt about this one going ahead and getting there. I shall have more to say on this head hereafter.

I omitted to mention that some blooms of two or three Japanese seedlings grown by Messrs. Walker & Robinson, florists, of Vancouver, B. C., arrived on the last day of the show in good order, having been six days on the road. They were not show blooms, but were much admired for all that. E.

Poughkeepsie, N. Y.

The Dutchess County Horticultural Society had good reason to be proud of its third annual exhibition which was held at the Armory on November 3–4–5. Five hundred dollars in regular prizes, besides numerous special premiums of considerable value were competed for and the expert private gardeners as well as several of the trade growers in this section entered into the contest with much enthusiasm and put up an exhibition that was highly creditable.

The classes calling for specimen plants were the only ones that did not draw out abundant competition. In fact there were but two plants of this description in the hall, contributed by W. C. Russell, gardener to C. F. Dieterich, and his assistant, James Maharg, but they were very good. In the smaller plants in groups, and those grown to single stem and flower, there were several entries; those from U. G. Agor, gardener to Fred. Vanderbilt, being excellent in every respect. Thomas Emerson, gardener to W. B. Dinsmore, and Thomas Harrison, gardener to L. P. Morton, staged fine groups of decorative foliaged plants and large contributions in this line, including specimen bay trees, came from F. R. Pierson Co. Thos. Emerson and F. Newbold exhibited in the fern classes and from Mr. Emerson came also a beautifully arranged table of orchids including well flowered specimens of Cattleya Bowringiana, C. labiata, Dendrobium Phalænopsis and a variety of cypripediums.

The system of exhibiting chrysanthemum blooms without foliage, on green boards still prevails here to some extent. W. G. Gommersall, Hamilton Scott, Richard Grieg, gardener to C. DeRahm, and James Blair, gardener to Ogden Mills, were especially successful in these classes, the latter winning the special Butterfield prize. The blooms shown with stem and foliage, in vases, were the greater attraction and many of the exhibits were of high order.

The Henderson prize for twelve white of one variety went to I. L. Powell's Mrs. H. Robinson, that variety beating by a close margin A. Herrington's Frank Hardy. A. Herrington, W. C. Russell and U. G. Agor were all winners in the various cut flower classes. The Rives prize for the best arranged basket went to Owen G. Owen, gardener to Wm. Crawford, for a fine arrangement of yellow blooms with asparagus, and Richard Grigg took the prize for vase of twenty-five blooms arranged for effect, with white flowers and autumn foliage.

Among the gardeners "up the Hudson" violets hold a very high position and on no other can so sharp rivalry be engendered. Violets are judged here by a scale of points, as follows: Fragrance 20, color 25, size and weight of flowers 25, length and weight of stem 20, foliage 5 and bunching 5. The Plenty prize for best one hundred blooms brought out eight competitors. Stanton Rockefeller was first and C. F. Bahret second in this class. Mr. Bahret got the society's cup for best two hundred and fifty blooms for which there were five entries, second going to J. F. S. Banks, and Paul Gindra was winner on singles.

There were a good many roses of the standard varieties shown by several exhibitors. Wm. Turner won the Morton special prize for forty-eight flowers and I. L. Powell's Beauties were especially fine. The Osborne prize for centre piece went to Owen G. Owen for a pretty arrangement of Meteor roses and Adiantums. Carnations from Herman Asher, gardener to Dr. Miller, Owen G. Owen and Wm. Turner were good, also mignonette from I. L. Powell.

Good music was provided during the continuance of the show and the attendance of the public as well as of the profession from neighboring towns was satisfactorily large.

Montreal.

The following is a list of prize winners at the chrysanthemum show:

George Robinson received 1st prize for 12 specimen plants; 6 specimen plants; 3 specimen plants; 1 specimen plant; 6 plants in 7-inch pots; 12 plants in 6-inch pots; 6 plants in 6-inch pots; 12 plants in 5-inch pots; 1st for best plant in the show; 1st for 12 blooms; 1st for 3 blooms white; 1st for 3 blooms yellow; 1st for 12 bronze; 1st for 12 blooms pink; 1st for 12 blooms yellow; 2nd for 24 blooms; 2nd for 6 blooms.

T. McHugh, gardener to Forest and Stream Club, 1st for 24 blooms winning challenge cup; 1st for 6 blooms winning challenge cup; 1st for 3 red. A. Pinneteau, superintendent Logan Park, 1st for group

of chrysanthemums and foliage plants, 1st for group of chrysathemums only; 1st for 25 white carnations; 1st for 25 light pink; 1st for 25 dark pink; 1st for 6 palms; 1st for 2 pot callas; 2nd prize for 1 ruellia; 2nd for 25 red carnations; 3rd for 25 ferns.

C. A. Smith, gardener to T. A. Dawes, Esq., 2nd for 12 specimen plants; 2nd for 6 specimen plants; 2nd for 3 specimen plants; 2nd for 12 plants in 6-inch pots; 2nd for 6 plants in 6-inch pots; 2nd for 6 palms; 3rd for 3 palms.

W. H. Harobin, gardener to R. G. Reid, Esq., 1st for 3 blooms pink; 2nd for specimen tree fern; 2nd for specimen fern; 2nd for 12 blooms; 2nd for 6 blooms; 2nd for 3 white; 2nd for 3 yellow; 2nd for 3 red; 4th for 24 blooms. Fred Bennett, gardener to Robt. McKay, Esq., 1st for specimen fern; 1st for specimen palm; 2nd for 6 solanums; 2nd for 12 yellow and 12 pink chrysanthemums; also 2nd for 12 blooms; 3rd for 6 blooms; 2nd for 25 ferns in 5-inch pots. W. J. Wilshire, gardener to R. B. Angus, Esq., 1st for 6 orchids; 1st for 3 orchids; 1st for 1 orchio; 1st for tree fern; 1st for 3 palms; 3rd for 24 blooms chrysanthemum, and a certificate of merit for bunch of Barbarossa grapes, weight 8 lbs. 3 oz.; also 1st for specimen Ruellia macrantha.

Joseph Bennett, florist, 1st for 12 Bride roses; 1st for Bridesmaid; 1st Perle; 1st for Morgan; 1st for Meteor; 1st for any other variety; 1st for 100 ferns in 3-inch pots; 1st for 50 ferns in 4-inch pots; 1st for 25 in 5-inch pots. Wilshire Bros., florists, 1st for wreath of flowers; 1st for wreath of chrysanthemums; 1st for basket of chrysanthemums; 2nd for 100 ferns in 3-inch pots; 2nd for 50 in 4-inch pots. R. W. Whiting, gardener to H. S. Mussen, 1st for 6 Primula sinensis; 2nd for group of chrysanthemums; 2nd tor 1 orchid.

W. Alcock, gardener to Hugh McClennan, Esq., 1st for epiphyllum; 2nd for group of chrysanthemums. Geo. Cadman, gardener to A. A. Ayer, Esq., 2nd for specimen palm; 3rd for 6 solanums; 3rd for Primula sinensis; 3rd for table decoration. J. Stenning, gardener to W. Yulle, Esq., 2nd for 12 plants in 5-inch pots; 2nd for epihyllum. F. C. Smith, florist, 3rd for 6 specimen chrysathemums; 3rd for 3 specimen chrysanthemums. R. Spillman, gardener to J. Joseph, Esq., 2nd tor 3 blooms pink. P. McKenna & Sons, 2nd for 25 white carnations; 2nd 6 primulas. J. Eddy & Sons, 2nd wreath of flowers.

The following special prizes were awarded: Colin Campbell, florist, for 2 groups of foliage plants and chrysanthemums; to A. Pinneteau for group of foliage plants; to T. McHugh for largest and best bloom in the show; for variety Mrs. Henry Weeks; to Walter Wilshire for vase of new seedling white carnation.

BEAVER.

Milbrook, N. Y.

The fifth chrysanthemum show was held November 9th and 10th. To say that this entire show was excellent in every particular is only a very tame expression, for it certainly deserves the highest commendation that can be bestowed upon it. The usual weak spots or exhibits to be found in most shows were practically not to be found in this one, and this reflects much greater credit upon the exhibitors who worked so hard to make it a beautiful show, because there were not over a dozen exhibitors in the whole list, and it might safely be said that for the main part of it there were only four large contributors, the balance were simply contributors of a few specialtics.

To enumerate all the specially fine things would take a large proportion of this paper, but an extra fine vase of 25 Niveus arranged with scarlet berried berberries and handsome colored ampelopsis by Mr. Thomen, gardener to Mr. Wing, was strikingly beautiful in this class; also Mrs. Perrin arranged with fern was very effective; there were five competitors and the premiums went in the order given above.

In the class for 6 vases, 6 of a kind, on long stems, the competition was particularly close. Five vases in each exhibit were so nearly equal in perfection that no distinction could be made, but in the last pair tested Mrs. J. Jones outpointed Nellie Elverson, but only by one, thus giving the first to Mr. Russell, gardener to Mr. Dietrich, and the second to Mr. Powell, gardener to Mr. S. Thorne. In the class for 25 blooms of one kind the competition between Minerva and Golden Wedding was again so close that no advantage could be given to one over the other; both were superb vases of blooms. In pot plants there were some grand specimens. The best plant in the hall was one of W. H. Lincoln measuring nearly 10 feet over, with 210 exhibition blooms on it. But the sensation of the show was the best individual bloom, Mrs. J. Peabody, 27½ inches in circumference around the body of the flower without any spreading out of the petals.

These were not only a few of the extra features of the show, but every part of it was particularly good; not the least attractive portion was the excellent concert given in the evening which helped to fill the hall with an appreciative audience. Great credit is due to the managers, the exhibitors and everybody interested in making not only an excellent show, but one of very superior quality all through. There were many visitors from distant points and all were unanimous in their praise and commendation. J. N. M.

Chicago.

The chrysanthemum show closed Saturday last with an attendance for the day that broke all records. The attendance was excellent during the whole show, in spite of two disagreeable days, and the members of the society are much gratified at the success scored, both financially and otherwise. There is talk of having the exhibition in the Auditorium next year and several very influential gentlemen are quite enthusiastic over the plan.

On Friday came the competition in seedling chrysanthemums. In the classes for two year old seedlings, 10 blooms of each, E. G. Hill & Co. were 1st in the pink class with Autumn Glory, a light pink with good substance, and it looks like a good commercial variety. The same exhibitor was first in the red and bronze classes with Black Hawk in the red, and Madison, bronze, the former being very dark in color but still lively, the latter a little dull but with fine stem and foilage. H. W. Buckbee, Rockford, Ill., had on exhibition a vase of a sport of Mrs. S. T. Murdock, a light pink, almost white, and was awarded a certificate. A. McAdams exhibited a vase of May Foster, white, from late struck cuttings. E. G. Hill & Co. entered both Enchantress, white, after the style of Mutual Friend, and No. 111, yellow, a seedling of Harry May, a flat open flower.

E. G. Hill & Co. made a clean sweep in the first year old seedling class, the judges awarding them 3 first prizes in the yellow class, for Guinea Gold, Elma and Carolina, and first in white for Washington; pink, Onyx; red, Phil. Sheridan.

There was only one certificate awarded on carnations, and this went to Peter Fisher, of Ellis, Mass., for Mrs. Thomas Lawson. In the darker than Scott class, Stollery Bros. exhibited Argyle, W. N. Rudd, No. 34, a deep pink; Thos. DeWitt, Wooster, O., deep pink but in poor condition; Hopp & Lemke, Grand Rapids, Mich., exhibited Kathleen Pantland, light pink, fine color, but a little small as shown.

There were no entries in the one year old classes of carnations. W. N. Rudd showed several two year old seedling, but not enough flowers of each to enter them for competition. A vase of Evelina was staged by R. Witterstaetter, Cincinnati, O.

In the table decoration competition W. J. Smyth won the first prize of $125, and the Art Floral Co. the second prize of $90.

The judges in all classes except floral arrangements were Messrs. A. H. Fewkes, Newton Highlands, Mass., and Prof. L. R. Taft, Lansing, Mich. But these gentlemen being obliged to leave the city Friday evening, the Saturday awards were made by Messrs. Edgar Sanders and Geo. Wittbold. The awards on floral arrangements were made by a large committee of leading society ladies.

NOTES.

Where-we-are-at now, in Chicago, as I see it. Never has there been seen anywhere such a completely artistic, satisfactory display of plants, of flowers, of arrangements and general equipment made before. Of chrysanthemums in all phases nothing could be better; of palms and foliage plants I say the same.

Of flowering plants no geraniums have been seen to approach the display. No cyclamen have hitherto been seen equal to what we have here, in fact, words cannot be found to express what there is now here in any or all of the classes.

The picture part, I mean the art display of paintings, is not only an innovation which has not before been attempted, but is a step in the right direction and should be encouraged in the future to a greater extent. One picture particularly, "The Hard Toilers," is so expressive of Rudd, of Chadwick, of Egan and all of the executive committee, that I think this picture presents what hard toiling means. Let us have pictures, and flowers, and music; which are companions in all that makes life worth living. J. T.

Cleveland.

The third annual chrysanthemum show given by the Cleveland Florist Club opened at Army and Navy Hall, Tuesday, Nov. 16th, under decidedly unfavorable conditions, at least so far as weather was concerned. It had been raining nearly every day for a week, and this particular day witnessed the windup of the six day continuous performance in rain making. Toward afternoon, however, it cleared somewhat, although the air was exceedingly disagreeable and the streets were in a most unpleasant condition. These untoward circumstances may have contributed their share in keeping down the attendance, which was much lighter than the first day last year. The hall was tastefully decorated overhead with southern smilax and other greens, the cut flower exhibits being mostly arranged on long tables running lengthwise of the hall, with the plant groups at the sides and against the walls. The necessary musical feature was furnished by the orchestral element of the Great Western Band.

Speaking first in a general way of the exhibition as a whole it was fully as good

as in other years. In the pot plants of chrysanthemums there was considerable improvement in quality. The cut flowers, while there may not have been much advance in the quality of the prize winners, certainly showed a higher average of grade throughout. The carnations were of good quality, some of the newer ones showing up in very good form, while some seedlings shown by various parties gave promise of developing something of merit. The rose display was not very large, but in quality, with the exception of American Beauties, was certainly as good as any heretofore.

In the chrysanthemum exhibits, classes of ten and fifteen varieties respectively, five blooms of a sort, Nathan Smith & Son, Adrian, Mich., carried off first with an excellent display. The fifteen varieties shown were Mrs. Perrin, Major Bonnaffon, E. A. Kimball, Mrs. H. Weeks, Viscountess Hambledon, Zulinda, Madame Phillipe Rivoire (an excellent commercial white, apparently), Sunstone, Minnie Wanamaker, Chito, Mrs. M. A. Ryerson, Silver Cloud, The Egyptian, Marguerite Jeffords and Philadelphia. Mrs. Weeks, the new English white, was beautifully done, and on its appearance should make one of our finest and most useful sorts. As exhibited it had a splendid stem, was a beautifully built and finished flower, and was of a most desirable tone in white, very difficult to improve. Old reliable Wanamaker showed well in comparison with other sorts. Chito, a bronze sort, was good. Mrs. Ryerson and Marguerite Jeffords showed up well. Philadelphia was unusually fine in quality. Silver Cloud, not new, but seldom or never seen hereabouts, was of a beautiful shade of pink, somewhat lighter than V. H. Hallock.

The ten sorts shown by the same firm were Western King, Modesto, Dailledouze, Niveus, Mayflower, G. W. Childs, Golden Wedding, Madame Octave Mirabeau, Dorothy Seward and Mrs. Jerome Jones. The Niveus and Jerome Jones in this lot were very fine.

The three firsts for thirty blooms each of white, yellow and bronze, respectively, that were captured by James Edie, were won with Queen, Modesto and Harry May. The winning blooms were magnificent stock and certainly well worthy of the premiums they took. The same exhibitor also showed some Maud Dean in the competition for fifteen pink that were plenty good enough for the first premium they took. In the class for the fifteen white, Mayflower, shown by The Essex Greenhouses, took first and were remarkably good.

As said before, the rose exhibit was not very large, but the stock was all very good; first went to Edie for Bride, Bridesmaid and Meteor. Bridesmaid in this lot was particularly fine in color and even in size.

Wamelink Bros. showed Bride and Bridesmaid, not for competition, however, that, had they been entered for premiums, would have been hard to beat.

To revert to the carnation display and some noteworthy matters in relation thereto, a very attractive variety was a new one shown by Caspar Aul of this city. It was somewhat like Tidal Wave in color, but darker and richer, with a better stem in the matter of length. It received special mention. Carl Hagenberger of Mentor, Ohio, showed a vase of seedlings, among which were three, a white one, a very large, full, light red and one in the way of Daybreak that were very good. Stollery Bros., of Chicago, showed some fine Argyle. Maud Dean and Mayor Plagree, exhibited by J. M. Gasser, were also particularly good. Note well that the premium for best white went to Flora Hill and Jubilee got first for red.

In the various groups shown there was nothing much out of the usual line. The stock used was all very good, but owing to necessary arrangement of other exhibits competitors were somewhat handicapped. Among the pot chrysanthemums, some bush and standard plants, shown by Merkel & Son, of Mentor, were excellent; a plant of Mutual Friend and one of W. H. Lincoln being extra good.

Tables were all of uniform excellence, making the matter of deciding the question of superiority one of extreme difficulty. J. M. Gasser showed a round table with centerpiece of Aldantum gracillimum and Cypripedium insigne. The whole arrangement was peculiarly graceful in finish and appearance and the color scheme was beautifully carried out in all the accessories. This table was awarded first. A. Graham & Son showed a round table also. The center was a tall vase of selected Brides with a garland of white roses and pink cattleyas. Favors were white roses; awarded second.

Third prize went to E. J. Paddock, who showed a decoration of pink roses with a tall vase of same. Favors pink roses and carnations.

James Eadie got honorable mention for a very pretty arrangement of pink roses. Ella Grant Wilson showed a rather unique arrangement of a star shaped center of chrysanthemums and Carnot roses under a canopy of chrysanthemums and swainsona.

First in designs was a very dainty fan, beautifully worked out in pansies, Meteors and lily of the valley on a back ground of adiantum. First for chrysanthemum basket went to J. M. Gasser for basket of Maud Dean.

The list of awards were as follows:

PLANTS.

Ten plants white, 1st to Mollenkopf Bros., G. M. Stenger 2d. Ten plants pink, Casper Aul 1st, Mollenkopf Bros. 2nd, G. M. Stenger 3rd. Ten plants yellow, J. M. Gasser 1st, F. Aul 2nd, Mollenkopf Bros. 3rd. Ten plants red, J. M. Gasser 1st, Mollenkopf Bros. 2nd. Six plants, 6 varieties, not over 10-inch pots, J. M. Gasser 2nd. Best single specimen bush plant, C. Merkel & Son 1st, C. Cunningham 2nd. Best single specimen standard, C. Merkel & Son 1st, C. Cunningham 2nd, Wm. Stade 3rd. Ten single stem plants, white, F. Aul 1st, Mollenkopf Bros. 2nd, E. J. Paddock 3rd. Ten single stem pink, E. J. Paddock 1st, J. M. Gasser 2nd. Ten single stem yellow, Mollenkopf Bros. 1st, E. J. Paddock 2nd, J. M. Gasser 3rd. Ten single stem red, E. J. Paddock 1st, Mollenkopf Bros. 2nd.

CUT BLOOMS.

Fifteen varieties, 5 blooms each, Nathan Smith & Son 1st, C. Merkel & Son 2nd, H. Tong 3rd. Ten varieties, 5 blooms each, Nathan Smith & Son 1st, C. Hagenberger 2nd, Mollenkopf Bros. 3rd. Best vase, 50 blooms, one variety, white, James Eadie 1st, J. M. Gasser 2nd, A. Schmitt 3rd. Best vase, 30 blooms, pink, H. A. Hart 1st, James Eadie 2nd, Fred Aul 3rd. Best vase, 30 blooms, yellow, James Eadie 1st, Nathan Smith & Son 2nd, Fred Aul 3rd. Best vase, 30 blooms, red, James Eadie 1st, Nathan Smith & Son 2d, A. Graham & Son 3rd. Fifteen blooms, white, Essex Greenhouses 1st, James Eadie 2nd, Nathan Smith & Son 3rd. Fifteen blooms pink, James Eadie 1st, H. A. Hart 2nd, Nathan Smith & Son 3rd. Fifteen blooms, yellow, James Eadie 1st, H. A. Hart 2nd, Nathan Smith & Son 3rd. Fifteen blooms, red, E. J. Paddock 1st, A. Schmitt 2nd, Nathan Smith & Son 3rd. Pompon sorts, 5 varieties, 10 blooms each, Nathan Smith & Son 2nd. Best and largest display in one vase, private establishments, E. Cunningham, certificate. Best seedling, H. Tong, certificate of merit. E. G. Hill & Co. with Autumn Glow, certificate. In roses, American Beauties, J. M. Gasser was 2nd. Fifty Brides, James Eadie 1st, J. M. Gasser 2nd. Fifty Meteors, James Eadie 1st, Fifty Bridesmaids, James Eadie 1st, J. M. Gasser 2nd. In carnations, white, one variety, 50 blooms, C. Merkel & Sons were 1st, A. Graham & Son 2nd, C. Hagenberger 3rd. Fifty blooms, red, A. Graham & Son 1st, J. M. Gasser 2nd. Fifty blooms, yellow, J. M. Gasser 1st. Fifty blooms, lighter than Scott, C. Hagenberger 1st, H. A. Hart 2nd, J. M. Gasser 3rd. Fifty blooms, pink, Scott or darker, J. M. Gasser 1st, same 2nd, N. Smith & Son 3rd. Fifty blooms, any color, J. M. Gasser 1st, H. A. Hart 2nd, C. Hagenberger 3rd. One hundred blooms, best arranged vase, J. M. Gasser 1st. In violets G. P. Rawson was 2nd.

MISCELLANEOUS.

Best group in decorative plants, 150 feet, A. Graham & Son 1st, Ella Grant Wilson 2nd, J. M. Gasser 3rd. Best display 75 square feet decorative plants, S. N. & W. J. Pentecost 1st, A. Schmitt 2nd, C. J. Paddock 3d. Best 10 decorative plants, not over 10-inch pots, J. M. Gasser 1st. Best 10 window plants, not over 8-inch, H. A. Hart 1st, Mollenkopf Bros. 2nd, E. J. Paddock 3rd. Best single specimen plant, H. A. Hart 1st, H. B. Hyatt 3rd. In table decorations J. M. Gasser was 1st, A. Graham & Son 2nd, E. J. Paddock 3rd, James Eadie 4th. Ella Grant Wilson, honorable mention. Chrysanthemum baskets, J. M. Gasser 1st James Eadie 3rd, Ella G. Wilson 3rd, H. A. Hart honorable mention. Bridal bouquets, J. M. Gasser 1st, James Eadie 2nd. Best floral arrangement, J. M. Gasser 1st. A.

Philadelphia Show Notes.

It was a wise move of our Boston friends in arranging the dates of their show not to conflict with those of Philadelphia. It was not, however, taken advantage of so fully as it might have been, especially by Philadelphians. If they could not exhibit anything to do credit to themselves nor to the city, they could have taken a run on to see how well they do things over there. A start has been made, and it is to be hoped it will be kept up, and mutual benefits result by the arrangement.

Alex. Montgomery did nobly in bringing an exhibit here, more so on account of the opportunity it afforded Philadelphians to see some of the products of the Waban Conservatories located at Natick, Mass., belonging to E. M. Wood & Co., the widely known growers of cut flowers for the Boston and other markets. The varieties exhibited were Mrs. Jerome Jones and Modesto, and they certainly were a revelation to all who had the good fortune to see them. The foliage had the appearance and texture of leather. It was large, heavy and glossy, the very picture of robust health. Many were the sad sighs heard by those who have been making what now appears to have been feeble efforts for these many years to grow the Queen of Autumn.

Mr. Montgomery states that he just fools with them nights and mornings for the fun he gets out of them, as that is the only time he can spare, not allowing the chrysanthemums to interfere with the regular routine of rose growing. He has a son taking an agricultural course in one of the colleges, who spends his summers at home, and he partly blames the boy for the grand results achieved. Is it potash, or phosphorus or nitrogen, or a correct commination of all three given at the proper time and in suitable doses that has made these particular Mrs. Jerome Jones the envy of growers hereabouts who have seen them?

A new hybrid cypripedium was exhibited at the Philadelphia show for the first time, and we believe it is the first hybrid orchid ever shown before the Pennsylvania Horticultural Society with the object in view of receiving for it the just recognition to which it may be entitled. And it has also been stated that it is the first cross on record from the species Rothschildianum that has so far flowered, either in America or Europe. It was raised by Mr. Henry T. Chinkaberry, gardener for C. G. Roebling, Esq., Trenton, N. J., from the not very common Rothschildianum above referred to, and which was fertilized with pollen from C. barbatum superbum. It is described by Mr. C. T. Akins as near as we can remember as follows:

"Foliage intermediate between the two parents in appearance. It is very fleshy,

and similiar in texture to some of the concolor crosses. The plant is in perfect health evidently being a free grower. The flower stem is 12 inches long. The slipper resembles Rothschildianum in form with the coloring of barbatum superbum. The petals are three inches long, profusely blotched with brown spots on light green ground, rosy purple points, hirsute appendages along edges; dorsal sepal somewhat broader than that of Rothschildianum and of similar markings, suffused with rose." It has been named Edwin Lonsdale. The silver medal of the society was awarded to this rare and beautiful novelty. L.

Worcester, Mass.

We were rather disappointed at the small attendance at the chrysanthemum exhibition, it being about thirty per cent lower than last year, although we had a much better show than in '96 and it was well advertised in weekly and daily papers, from one to two columns of reading matter in all the papers on the opening day, yet the public didn't respond.

We had no side-shows, no music or other attractions, but we did have a splendid showing of plants and blooms that was surely worth the price of admission. It looks as if the public did not care enough about it to make the game worth the candle. The largest attendance was on the second day, probably called out by the mantel decorations. These were an attractive feature and some beautiful arrangements were shown. H. F. A. Lange, W. E. Sargent, Chas. D. Thayer and F. B. Madaus were awarded premiums in the order named. Following are the winners of the first premiums, three and four premiums being awarded in each class:

PLANTS.

Best twelve plants, best six, best white, F. A. Blake; best three, best pink, best palm, H. F. A. Lange; best yellow, best fern, F. B. Madaus; best red, Wm. Darling; best decorative plants, C. D. Thayer.

CUT BLOOMS.

Best vase 25 white, 25 yellow, 12 pink, 12 white, 12 yellow, 12 sprays, six cut blooms—H. F. A. Lange; best 25 pink, single bloom white, single bloom pink, display of pompons, F. A. Blake; best 25 mixed, 12 cut blooms, single bloom yellow, E. R. V. Thayer; carnations, F. A. Blake; roses, H. F. A. Lange. A. H. L.

Louisville, Ky.

The chrysanthemum show closed Saturday night after the most successful exhibition of these popular autumn flowers ever given by the Kentucky Society of Florists. The indications are that the society has fared well from a financial standpoint. At 8:30 o'clock Mr. J. C. Marrett mounted a table and auctioned off the pots of chrysanthemums, roses and carnations. The purchasing was spirited and by 9:30 o'clock the flowers were all sold.

The cut carnations and roses were as fine as any seen at any exhibition. In carnations Mr. Kunzman was first on 25 white and 25 pink, Nanz & Neuner on 25 red. In roses Mr. Kleinstarink was first on Perles, J. Schulz on Bridesmaids and American Beauties, Julius Buser on Brides and Meteors, Nanz & Neuner on La France, Kaiserin and Gontier; E. J. Marrett on Niphetos. The M. A. Hunt Floral Co. sent some very fine roses that would undoubtedly have been prize winners, but as they had failed to pay the entry fee they were barred from competition.

On funeral design Mr. Mann was first. Nanz & Neuner were first on table decoration and Mr. Kunzman was at the head on basket of carnations. Jacob Schulz took first on violets, both double and single.

Special prize on 12 white carnations went to L. Lichtefeld & Son, on 12 red to Jos. Coenen & Co., on 12 pink and 12 all colors to Mr. Kunzman. Special to Jos. Coenen & Co. for best 12 roses.

F. C. H.

Omaha, Neb.

Omaha's first chrysanthemum show was opened on November 15. The day was stormy but the attendance was good. The show bids fair to be a grand success in every way. It was the out growth of suggestions taken at the last moment, but the entire Florists' Club took hold of the idea with such enthusiasm that it is doubtful if a finer show could have been produced if the stuff had been grown for that purpose alone. Bassett & Washburn have already sent a fine bunch of Am. Beauties, Vaughan, McKellar & Winterson have sent an exhibit of cut mums; J. C. Vaughan, an elegant bunch of new varieties; and The Mendenhall Greenhouses, of Minneapolis, have sent in a fine display of cut 'mums. Many other growers have intimated their intentions of sending in cut flowers to the Omaha show but as yet their exhibits are not in place.

Business is improving. First-class 'mums sell at $2 a dozen. Good violets are scarce and sell readily at $1 per hundred. Some A1 American Beauties are coming in but a great percentage are affected with thrips. Very few good carnations are offered in our stores and most of those come from Lincoln; they sell at 25 cents a dozen. Wilcox, of Council Bluffs, is sending in some fine Brides and Am. Beauties. Hess & Swoboda are cutting strictly first-class 'mums, and Donaghue shows some La France, Meteor and Am. Beauties that are good in size and color. A. D.

Work of the Chrysanthemum Committees.

BOSTON, Nov. 2.—Grace E. French, exhibited by Geo. Hollis, South Weymouth, Mass. Creamy white, Ref., 87 points. Nov. 6.—Frank. Hardy (imported). exhibited by A. Herrington, Madison, N. J. White, Jap. Inc., 94 points. Pennsylvania, exhibited by Hugh Graham, Philadelphia, Pa. Sulphur yellow, Jap. Inc., 90 points. Kineo, exhibited by C. S. Goddard Estate, Woodfords, Me. Yellow shaded orange, Ref., 80 points. Ophis, same exhibitor, deep yellow, Jap., 84 points.

NEW YORK, Nov. 6.—Frank Hardy, exhibited by A. Herrington. White, Jap. Inc., 95 points. Pennsylvania, exhibited by Hugh Graham. Canary yellow, Jap. Inc. (Sport from Philadelphia), 90 points. Nov. 13.—Silver Wedding, exhibited by W. G. Gomersall, Fishkill, N. Y. Pure white, Jap. Ref., 76 points. Autumn Glory, exhibited by E. G. Hill & Co., Richmond, Ind. Shell pink, Jap. Ref., 87 points. No. 1, same exhibitor. Yellow, Jap. Inc., 67 points.

PHILADELPHIA, Nov. 13.—No. 2., E. G. Hill & Co. Deep yellow, Com. 87, Ex. 88 points. No. 3, E. G. Hill & Co. Pink, Ref., Com. 87, Ex. 86 points. Robert G. Carey, exhibited by Robert G. Carey, Chestnut Hill, Pa. Creamy white, Jap. Inc., Com. 90, Ex. 85 points.

CINCINNATI, Nov. 6.—Pennsylvania. Light yellow, Jap. Inc., 87 points. Nov. 15.—Mrs. E. N. Roth, exhibited by J. A. Peterson, Cincinnati, Ohio. Canary yellow, Jap. Inc., 81 points. Mrs. Samuel Higdon, same exhibitor. Blush white, Jap., 87 points. No. 1, exhibited by E. G. Hill & Co. White, Jap, 82 points. No. 2, same exhibitor. Yellow shaded bronze, Jap., 78 points. No. 3, same exhibitor. Light salmon pink, Jap., 87 points. Chas. W. Crouch, exhibited by Chas. W. Crouch, Knoxville, Tenn. Magenta pink, Jap. Ref., 85 points.

CHICAGO, Nov. 12.—Autumn Glory, exhibited by E. G. Hill & Co. Pink, Jap. Ref., 87 points. No. 111, same exhibitor. Yellow, Jap. Inc., 87 points. Black Hawk, same exhibitor. Intense crimson, Jap., 85 points. Iowa, exhibited by John Reinford, Milton, Iowa. White, Jap., 74 points. Frank Hardy, exhibited by A. Herrington. White, Jap. Inc., 93 points. Pennsylvania, exhibited by Hugh Graham. Yellow, Jap. Inc., 86 points. Bloom from Redondo Beach Floral Co., Redondo Beach, Cal., arrived in too poor condition for judging. ELMER D. SMITH, Sec'y.

Chrysanthemum Notes.

The Quaker City experts, acting under the fraternal wing of the Chrysanthemum Society of America, had three new varieties to deliberate over last Saturday, two of which were without either numbers or names from the celebrated Indiana chrysanthemum connoisseurs, E. G. Hill & Co. If they could only bring themselves to realize for a moment how unsatisfactory it is to discourse upon varieties with neither name nor number they would never offend again. The exhibitors of meritorious novelties are the losers by this procedure, for in chrysanthemums numberless tones among the yellows, the so-called pinks and the various shades of white are almost innumerable. The nearest your correspondent can approach to a just description of what was seen is from his own individual point of view. The yellow variety could with some degree of truthfulness be described as an exaggerated "dandelion" both in color and form, as it was certainly a reminder of that well-known weed. In general make-up it is reminiscent of W. H. Lincoln; the yellow color in the new variety, however, seemed to be very much more brilliant. The pinkish variety was after the style of Viviand-Morel, but whether it will prove to be superior to that well-known variety can only be proven by trial.

Robert G. Carey was again an exhibitor. This time he had a creamy white variety to show. It is gracefully globular in form, its curly incurved florets giving it a character, which at this writing its prototype cannot be recalled. Mr. Carey thought so well of it that he has named it "Robert G. Carey."

We frequently hear a little wail go up as to to the duties or the province of the Chrysanthemum Society of America. I would like to refer to it as the National Society, but as that title has already been adopted by the British society, I have to refer to it fuller than may appear necessary. The society in question occupies a position between the buyers of new chrysanthemums and the sellers thereof. The committees representing that society are perfectly willing, as it is explained to me, to examine all varieties presented, provided all the conditions have been complied with, which are, as near as I can remember, to the effect that six blooms of any given variety must be on hand for examination, and also an entrance fee of $2 should be forthcoming at the same time. Wide-awake commercial floricult-

ural men can see the benefits to be derived by this plan of action, and they are quite satisfied to "pony up," but there are a few people still left who do not seem to mind giving a committee the trouble of examining inferior seedlings to gratify their own personal vanity, and it must be distinctly understood that it shall be at no cost whatever to themselves. The present plan of posting a $2 entrance fee makes a probable exhibitor more critical of his own products, consequently committees' duties are correspondingly lessened. This is a selfish world, and the raiser of seedling chrysanthemums generally—even if 'mums are flowers—are not exempt from the feeling of *gain*, if the opportunity presents itself, legitimately many times, to be sure, and oftentimes *illegitimately*, let it be recorded.

PHIL A. DELPHIA.

Evidently a Misunderstanding.

In your number of November 13, page 328, you publish a communication from Mr. Lonsdale. I do not wish to take up your valuable space with any prolonged discussion, but feel it my duty to place myself in proper position before your readers.

In the first place I know nothing about the resolution passed at Providence to which Mr. Lonsdale refers. In sending flowers to Cincinnati, Boston, Chicago and New York, I requested the committee to telegraph the results. I received replies from Cincinnati and Boston by telegraph and from Chicago by mail. On last Tuesday a gentleman from New York told me what it scored there. I did not think that after paying entrance fee and going to the trouble of shipping flowers to the various committees, that there was to be any secrecy as to the results of their deliberations, until I telephoned to Mr. Lonsdale to ascertain the Philadelphia result. He refused to give it to me, saying they were bound by Mr. Grant's resolution, and that I would have to send to Mr. Smith in Michigan for it. I told him I thought it queer that I could get all the others except our own city. He in a very angry way told me that he wanted me to distinctly understand that I was the party who was being accommodated and would have to abide by the committee's rules.

Now, had I known of such a rule I would not have bothered Mr. Lonsdale, but at the same time I do not consider the accommodation, as he calls it, is all on my side. As I understand it, the committees are appointed to examine new varieties not only for the accommodation of the man showing a new variety, but particularly for the benefit of the trade at large, so as to keep growers from filling their houses with worthless stock. I am sorry Mr. Lonsdale takes a personal view of the matter, as I certainly have no objection personally to any member of the committee, in fact I do not know how the committee could be improved on, but, as I have to pay an entrance fee for the privilege of having my new variety examined, I certainly have the right to expect to hear the result without having to wait to see it published in the trade papers after all the shows are over.

HUGH GRAHAM.

ED. AM. FLORIST: In justice to the Chicago Chrysanthemum Committee, allow me to correct a quite natural mistake made by Mr. Graham as set forth in Mr. Lonsdale's letter in last issue. The Chicago committee, which is Messrs. Johnson, Stollery and Kimball, did not give out the points on Mr. Graham's seedling. I obtained the points from Mr. Elmer D. Smith, secretary, who was in Chicago at the time, and wired Mr. Graham. I presume the latter gentleman overlooked the fact that I was no longer a member of the committee when making the statement mentioned by Mr. Lonsdale.

W. N. RUDD.

Philadelphia.

SHOW IS NOT A FINANCIAL SUCCESS.—NEW CYPRIPEDIUM EDWIN LONSDALE.—BUSINESS TRIFLE IMPROVED.—STOCK IMPROVES IN QUALITY.—BOWLING CLUB TO HAVE A BENEFIT.—BUSINESS CHANGES.—THOS. CARTLEDGE UNDER THE WEATHER.

The show is over and the officers and friends of the society have every reason to congratulate themselves on the general excellence of the exhibits in all the departments. There was only one point in particular that might have been much improved upon and that was the box office, the receipts of which fell off about twenty-five percent from those of last season. It is hard to account for this state of affairs. There was only one stormy day and that was not very bad. The show seemed to be well advertised, the morning and evening papers being very generous with their notices, which in some instances were nicely illustrated with pen sketches of the hall and some prize winners. With all this the fact remains that the exhibition did not draw as it deserved to and the individual who has any theories to advance should bring them forward at once as now is the time to lay the plans for next year's show while the merits and demerits of the past one are still fresh in the mind.

We forgot to mention last week the new cypripedium Edwin Lonsdale, the first American seedling "cyp." ever raised and flowered. It is from the Roebling collection of Trenton, Mr. Roebling naming it after Mr. Lonsdale on account of his love for and interest in this aristocratic family. It is a beautiful flower and will be fully described in a future number.

Business has been better, although it yet lacks that snap and go that cleans out the ice boxes and keeps the telephone bells ringing calling up the growers for special lots of stock. With few exceptions the city stores are fully equipped with 'phones, and quite a number of the growers have found them advantageous, the rent being easily made in the time saved and sales made over it. The Evans nurseries at Rowlandville put one in last week and Wm. K. Harris, the bard, will no doubt be sending some of his poetic effusions over the phone which is to be in place in a few days. Wm. K. never lets his "Dear Friend" stand in the way of necessary improvements. His November cut of 25% will no doubt bring him many visitors.

The stock of flowers is fully equal to the demand, in fact a little more so, still there is no such state of affairs as your New York correspondent is wont to describe of the market of that city. A noted grower for that market stated recently while on a visit to this city, that if seventy-five per cent of the greenhouses in the vicinity of New York would burn up or blow up or somehow go out of existence, the rest could supply all the legitimate demand and make a decent living.

The quality of the stock is still improving, everything getting a trifle better as the cool weather increases. A few of the fancy grades of roses have advanced a trifle but for the most part prices are about the same as last week. The best Beauties command $3 per dozen. The select teas $4, with the exception of a few choice Carnots, which sell quite well at $8 per hundred. Good double violets are scarce at $1 per hundred; poor ones sell for 25 cents to 50 cents, according to grade and demand. Large single go for 25 to 40 cents.

Plenty of 'mums or "bums," as some rose growing gentry call them, are still to be had. The rose growers don't like the 'mums, but the fellow with a big decoration on hand says "they are just the thing for me and here's the money," and next season is likely to find the market full of them. Good flowers with three foot stems have brought $12.50 per hundred all the season, while quite a few extras have sold at $15 to $25 for the same quantity. There are quite a few to be cut yet and they should bring good prices.

Carnations are still $1 for the best average stock, with a trifle more for select grades. A number of the growers in this vicinity have found Boston to be a good market for their product, which relieves the strain here to a certain extent. S. S. Pennock in struggling with a box the other day said that the flowers inside must be very precious they were so hard to get at. He said that boxes were nearly always nailed up to the extreme, half the nails and half the size generally used would be ample to protect most shipments.

The Florists' Bowling Club are to have a benefit at the Walnut street theatre on December 15. It is in order now for every fellow to go and take his best girl along.

There has recently been a change in the business of the Floral Exchange, 614 Chestnut street. Mr. Joseph Morowitz has retired and Mr. Fuerstenberg, a partner, now assumes full control not only of the city store and business but of that of the nurseries at Edgely, Pa. They are making a specialty of the Meteor rose, forcing this season 10,000 plants, and it is the intention next season to increase the quantity up to 15,000. The flowers they are sending in are fine and many are shipped to outside points. Lilium Harrisii was first cut with them October 25.

Thos. Cartledge is under the weather and has by the advice of his physician given up business for awhile. His genial face is greatly missed. K.

Buffalo.

THE DEBUT OF SOCIETY BUDS HELPS THE STOREMEN.—FOOTBALL GAME DID NOT AROUSE MUCH DEMAND FOR FLOWERS.—VARIOUS CHANGES.—ALFRED LABIATA DIMMOCK AMONG THE VISITORS.—VISIT TO CONSERVATORY AND AQUARIUM OF MR. HALE.—EVOLUTION OF A GOLD FISH.

A week or two of sloppy weather through which business has pushed her welcome presence has prevailed here. We could not but think of the many societies holding their shows and our sympathy went out toward them. That best of all event for the florist, the entering into society of the sweet bud, has been of frequent occurence the past two weeks and has kept the store people busy. Roses and violets were used almost exclusively for these occasions, the former when in abundance. But for violets there was quite a scramble and if it were not for the enterprising Wm. Kastling procuring a large lot from the Hudson

territory I don't know what we should have done. His busy mart from 7 to 10 a. m. reminds one of the New York Cut Flower Exchange, only the region of distribution is wider and longer. I noticed a box addressed to Mr. Sanguine Scrcher, Dawson City, Alaska, possibly immortelles.

We have no horse show to help us out, and the football game between Williams and Cornell colleges, gotten up by our sassity people, did not arouse the demand that was quite expected. Violets for Williams, with a red carnation stuck into a white chrysanthemum, signified that your sympathies were with the boys from Ithaca. Some ribbon on a stick weat with rooters ahead of flowers. The game passed off without any fatal results. The Cornell full back got his bump of combativeness crushed in and their left tackle lost his vermiform nepenthese, and one of the Williams mopheads got his hair tangled up in a barb wire fence; they sacrlficed the hair and left the fence.

As some greenhouses are demolished others spring up in their places. Mr. Jansen, nephew of Mr. C. D. Christensen (retired), has built two useful houses on the Hager place. There is also a new firm started on Glenwood avenue, but the name and nationality of the owners I have yet to learn.

I was awakened a few mornings ago from my quiet studies by two gentlemen from the rural district who were very welcome. Mr. W. J. Palmer, Sr., never blows. If he tells you that he is picking two thousand roses a day you can bet it is nearer three thousand, so his society does not produce a feeling of unrest. Mr. Wise of Aurora, the other half of the delegation, reminds me of Abraham Lincoln at forty; tall, thin, angular, sarcastic and cute, ever ready to draw a simile or tell a story. Mr. W. J. P. wanted me to give him a game of bowls, but I had to refuse on principle. I never let sport interfere with the routine of business.

Mr. Alfred Labiata Dimmock was here this morning. It is pleasant to have a call from him for he knows what is going on on both sides of the Atlantic and does not protrude business beyond the limits of a pleasaat conversation, but he gets there just the same.

Last week I paid a long promised visit to the conservatory and aquarium of Mr. George Hale of Elmwood avenue. He is in the heart of a good residence district and has all he can do. While looking at his aquarium he pointed out a large gold fish, possibly a great grandmother, which has jumped out of the aquarium so many hundred of times that in its wiggling attempts at locomotion there has appeared on its lower surface a number of embryo feet. This is, indeed, a remarkable instance of evolution. W. S.

Chicago.

THANKSGIVING TRADE WILL BE GOOD.—SUPPLY ABOUT EQUAL TO DEMAND.—VERY LITTLE INCREASE IN PRICES.—MOREL 'MUMS OFF COLOR.

The indications for a lively Thanksgiving trade are very encouraglag, and the dealers feel that they will have all the business they can handle. Trade the past week has been very good, with supply and demand about equal, though extra grade stock was rather scarce.

There will not be much of an increase in prices for the holiday. Good Beauties will be held at $10 to $25 per hundred, teas $4 to $6, carnations, ordinary stock, $1.50 to $2, with fancies scaling a few points higher. For lily of the valley $4 to $5 is the price. There will be considerable Harrisii on the market, which will be much appreciated at so early a date. The unusual carliness is due to the growers giving their orders for the bulbs before the tariff bill took effect.

'Mums will be in good supply, especially in the larger sizes, the smaller sizes being nearly all gone. Viviand-Morel in most cases are very poor, the majority coming white and when pink, of a very pale color. In many cases this is due to tobacco smoke which is used as a remedy for greenfly, which are more or less plentiful this season.

As the date for the next regular meeting of the Florist Club falls on Thanksgivlag day, no attempt will be made to hold a meeting. The following regular meeting will be held December 9.

SITUATIONS, WANTS, FOR SALE.

Advertisements under this head will be inserted at the rate of 10 cents a line (seven words) each insertion. Cash must accompany order. Plant advs. not admitted under this head.

Every paid subscriber to the AMERICAN FLORIST for the year 1898 will receive on request, a coupon for one five line want "adv." free, to be used at any time during the year.

WE GIVE above photo view of field of pumpkins grown for D. Cummings & Co., of Conneaut, Ohio, taken in October last.

VISITING New York and Philadelphia: J. H. Beagley, Sibley, Ill.

CONTRACT PRICES for onion and other seeds are generally stiffer than last year, though prices differ widely.

ONION SET PRICES in the West are now about $1.10 to $1.35 for yellows, $1.60 to $1.85 for whites, with reds scarce and unsettled.

NEW YORK.—J. M. Kimberlin, Santa Clara, Cal., is here on his regular eastern trip. Charles Parker of Santa Clara is also in town.

VISITED CHICAGO: E. Schaettel, with Vilmoriv-Andrieux & Co., Paris; L. C. Routzahn, manager McClure Seed Co., Arroyo Grande, Calif.; R. H. Shumway, Henry A. Salzer.

Hartford, Conn.

The annual chrysanthemum show of the Connecticut Hortlcultural Society, which was held on the 9th, 10th and 11th insts. at Putnam Phalanx Armory in this city, was in all respects a notable one and an improvement generally over any of its predecessors. The perfection and uniform quality of the exhibits in the cut-flower section were especially noticeable.

A. N. Pierson was the largest exhibitor of cut blooms, securing first prize in many classes. Stephen Delbar was very successful and Geo. S. Osborne, a new contributor, was first on single specimen bloom. W. B. May and John Coombs were also well represented.

On plants Thos. Dryden, a new comer, captured first on many classes, James Smith being his closest competitor and beating him in some cases. It is worthy of remark that Mr. Dryden's plants were grown out of doors with no protection other than a cold frame during the last few weeks. G. Minge took the first prize in class for private gardeners only. A.N. Pierson and John Coombs showed fine collections of roses and carnations.

Address THE AMERICAN FLORIST CO., Chicago.

Boston.

The general complaining about dull business has not abated and there is nothing yet in sight excepting the progress of the season as indicated on the calendar to give promise of any relief from the stagnation. On last Saturday anything blue or crimson sold at sight, thanks to the football game. Since that time violets have been in rather limited supply but the price has not advanced materially yet. Chrysanthemums already show signs of weakening in quality as well as influence and the responsibility for dull business will soon have to be placed somewhere else.

N. F. McCarthy & Co. sold a fine lot of palms, bulbs, budded roses and miscellaneous stock at auction on Saturday. Auction prices are low this season.

Thos. J. Grey & Co. will remove about December 1 to 32 South Market street.

W. W. Rawson & Co's formal opening occurs this week.

Visiting Boston. J. A. Valentine, of Park Floral Co., Denver, Colo.

St. Louis.

COLD WEATHER ARRIVES.—SOME IMPROVEMENT IN BUSINESS.—STOCK IN MARKET.—HARRY BAYERSDORFER CALLED HOME BY DEATH IN FAMILY.—PERSONAL ITEMS.—BOWLING.

During the past week quite a change has taken place in the weather, the glass going down to freezing point. It had the effect of shortening up the large supply that has been coming in to this market and it has also caused some improvement in business.

Chrysanthemums are still the leading flower and will be until after Thanksgiving day. Beauties are also in good demand and bring from $1 to $2.50 per dozen. The best Meteors, Brides, Kaiserins, Carnots and fine 'Maids are selling for $4 and from that down to $1 per hundred. Carnations are not overplentiful and the best are bringing $2, second is go for $1 per hundred. Good red, Scotts and Daybreak are in best of demand just now. Violets are coming in better. Californias are selling at $1, small single 35 cents, no double in this market just now. Some very fine valley can be had at $4. Smilax is selling a little better at $12.50 and $15 per 100 strings.

Mr. Harry Bayersdorfer, of Philadelphia, was in the city last week, his first visit in seven years; but on his arrival he received the sad news by wire that his brother-in-law had died, and he returned home the same night without calling on the trade.

Mrs. Wm. Ellison, of Ellison & Tesson, left for Chicago last week to attend the flower show in that city. Mrs. E. will also visit Philadelphia, New York and Boston before returning home.

Mr. Fred. Weber was taken suddenly sick Sunday night and was quite ill for two days, but is now recovering and expects to be out in a few days, especially by next Monday, to be in time for the bowling.

The Bowling Club rolled three games last Monday night at the old alleys at Compton and Park avenues, and will continue rolling there until the members are notified by the secretary. Kunz was high man in the three games, rolling 594; Helwig second, 554; and Kuehn third, 482. The high single game was by Kunz, 235; and Helwig second, 231. The attendance was slim as some of the boys were tired out working at the chrysanthemum show, but next Monday we will be out in full force and expect to roll the games of their lives, so they say.

J. J. B.

Ivory Chrysanthemum.

Mr. E. D. Ellsworth, foreman for Mr. J. N. Kidd, St. Joseph, Mo., sends us some excellent blooms of Ivory which he advises us were grown four blooms to a plant and in four inches of soil. These sold at $3 a dozen in preference to larger flowers of other varieties. He says that some doubt has been expressed as to whether he had the true Ivory. The flowers sent were undoubtedly that variety, which not only holds its own, but seems to increase in popularity with flower buyers.

Rooted Cuttings of the

New Geranium Mme. BRUANT

I am able to furnish this wonderful and distinct variety now by the hundred and thousand. No florist can be without this variety, being certainly the finest plant novelty of the year. A large, well rooted stock, ready now. Shipped to any part of the United States by mail or express PREPAID, 75 cts per dozen, $3.00 per 100; $25.00 per 1000. Cash with order. Order at once. No better stock to be had. Address

New York.

LITTLE BENEFIT TO BUSINESS FROM THE HORSE SHOW.—VIOLETS AND VALLEY FIND A BETTER MARKET.—ROSES AND CHRYSANTHEMUMS STILL LOW.—TWO VICTIMS OF APPENDICITIS—MIKE HART'S WIT.

It was expected that the Horse Show which is on this week would prove a benefit to the flower trade and stir up some life among the high-class buyers, but the results have not been as anticipated and business is still in a most unsatisfactory condition. At the end of last week violets took a moderate jump but not by any means the impetus felt on former occasions, $1 per hundred for good and $1.50 for extra quality being the average price quoted. This little spurt is not alone owing to the demand, for it is evident from the receipts that crops are off for the present and there are not nearly as many of them on the market at present as was expected.

Roses continue very low for the season, $10 to $12.50 per thousand being selling price for the bulk of those that are received and higher rates being obtainable only on very small lots of selected specimens. Lily of the valley is selling more evenly than for some time past, and bringing $2 to $3 per hundred with fair regularity. Chrysanthemums move along at very low figures and no longer create any special interest or curiosity. The great bulk of them must be sold to peddlers and consequently at peddlers' prices.

Appendicitis seems to be epidemic in the floral profession. President Henshaw of the New York Club has just got out of St. Vincent's Hospital where he has been confined for ten days with that disease, and Chas. Erich of Siebrecht & Sons, has just been admitted to St. Mark's Hospital afflicted likewise.

The Long Island News Company is about to establish flower stands in the railroad stations of the Long Island R. R. Co.

Overhead in Mike Hart's: Customer (patronizingly) "Mr. Hart, I think you get as good chrysanthemums as anybody in the city."

Mr. Hart (showing dimples): "You'll think I do when I see what I'm charging you for them."

Visiting New York: Ben. Elliott, Pittsburgh, Pa., and A. J. Valentine, of Park Floral Co., Denver, Colo.

F. A. Rolker retired from business on Tuesday, Nov. 16.

SPRINGFIELD, MASS.—All the plants, flowers and personal property in the greenhouses of C. F. Fairfield were sold at mortgagee's sale on Wednesday, November 10. It was bought by A. B. Maynard, the mortgagee, for $900. The real estate is understood to be heavily encumbered with taxes and interests overdue. It is not known whether the business will be continued or not.

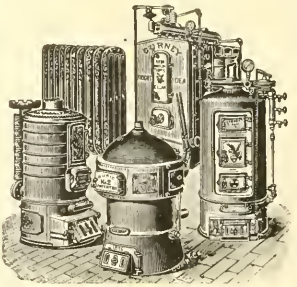
BUSINESS FAIR WITH OCCASIONAL SPURTS.—STOCK SHOWING UP BETTER —CHRYSANTHEMUM SHOW. — FREE EXHIBITIONS DRAW WELL —AWARDS.—NEW 'MUMS.

Business has been fair with occasional spurts. The last few days have been wet and disagreeable. Stock generally speaking is showing up better, with prices about the same as the week previous. Chrysanthemums are in full force yet and crowding the others from the field to some extent. Violets are more plentiful and much better in quality.

The special chrysanthemum show of November 13 was complete and artistic in every detail. The 'mums, which were naturally the chief feature of the exhibition, were unusually fine and included the choicest as well as the most popular varieties. The other flowers, roses, carnations also palms and ferns, attracted a great deal of attention. It seems as though free exhibitions as a rule draw well, which was fully demonstrated by the large crowd that attended. The show had been advertised to open at 3 p. m. and Geo. Walker, our able Supt., had his hands full at 2 p. m. to keep in check the mob which crowded around the stairway. Judge Theo. Bock was so badly frightened when the crowd broke loose that he dropped his pencil and came downstairs humming the popular air "Tell them that you saw me."



Mr. Bock gave the following awards: Hoffmeister Floral Co., Golden Wedding and Queen chrysanthemums and Perle roses; Corbett & Wilson, single and double violets; Wm. Murphy, Flora Hill, Bradt, McGowan, Jubilee, Peach-Blow, Portia, Bridesmaid, Emma Wocher and Armazindy carnations; W. W. Coles, Kokomo, Ind., Kaiserin and Carnot roses; C. C. Murphy, Harrison's White carnation and Golden Wedding; Theo. Bock, Miss Beckert, Walz and Autumn Glow; Jul. Shuman, Geo. W. Childs and Ivory plants; R. Witterstaetter, Modesto, Pres. Smith, Bonnaffon and Lenawee; George & Allen, Meteor, Beauty, Morgan and Bride roses, Romans, Narcissus, Valley and Lincoln 'mum; A. Sunderbruchs' Sons, Cardinal, Daybreak, Queen of the West, Scott and Ruby carnations, 6 cyclamen plants, Ficus elastica and Mrs. Perrin 'mum; City Greenhouses, 6 specimen ferns and 6 pot 'mums. The following, under rule 8, received awards and certificates: Hugh Graham, for Pennsylvania; J. A. Peterson, for Mrs. Samuel Heyden, cross between Queen and V. H. Hallock; Ed Roth, incurved lemon yellow, good flower.

E. G. Hill showed three varieties, white, yellow and pink, the latter a grand flower, color salmon pink, straight petals on the order of L. Canning. Karl Schweizer, Ch. W. Crouch, large flower, bronze and yellow. Fred Walz, dark pink, Jap. with much substance.

In the evening the regular monthly meeting was held and called to order by President Gillett. Mr. Giesy, of the Lockland Lumber Co., was appointed a committee to arrange for a social in connection with the December meeting. After the regular routine of business was transacted the meeting adjourned.

Mr. J. B. Heiss, of Dayton, O., paid us a visit during the week. Mr. Heiss is making a specialty of small palms and ferns for shipping. He took several large orders with him. Mr. Chas. McCullough is spending a week's vacation with some friends in Michigan hunting. He is said to be as handy as W. Scott with the gun.

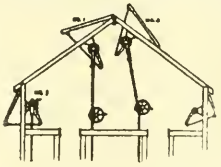
The Right Cypress for Greenhouse Material.

Have you heard of Cypress Greenhouse Material that has not been satisfactory? If you have it does not follow that Cypress is not the best lumber to use. There is White Cypress, Yellow Cypress and Red Cypress; there is Cypress that grows on the high lands and Cypress that grows in the swamps.



All of these different kinds are not suitable for greenhouse purposes. Do you know which kind is best and do you know that kind when you see it? If not you would better buy from those that do know and will deliver exactly what they sell. We introduced Cypress for greenhouse construction and pushed it to the front. We know all about it. For fifteen years we have made a specialty of furnishing it, and during this time we have built up a reputation that we can not afford to jeopardize. We send out the best only.

Our Thanksgiving.

The first issue of the AMERICAN FLORIST announced the birth of the Society of American Florists. It was imbued with the heroic spirit of the pioneer. It saw all of that now historic gathering and was a part of it. The directing minds of this paper made up no small part of the "faithful few" who created the Society of American Florists. They and it have continued to labor loyally, unselfishly and boldly for what seemed right, without fear or favor. Its reading columns have never knowingly been debased to low or selfish ends. The clean purposes of those noble spirited men who first unlocked their greenhouse doors, with such open handed giving of their best knowledge have been and will remain the high heritage of the "Dear Old FLORIST."

Let us be thankful.

The President of the American Chrysanthemum Society Speaks.

In the last two issues of the FLORIST there have appeared articles referring to rule adopted at the last meeting of the Chrysanthemum Society of America, which stipulated that all reports of the work of the committees should be issued only by the secretary of the society. This rule was adopted for three reasons:

In the first place the report should be authentic. In former years the trade papers have always had a representative present at the meetings of the committees in the different cities, who would interview the chairman, and get a report of their deliberations. While this has never resulted in any error being made, yet it was thought it would be far better to have all reports emanate from the proper officer of the society and bear the stamp of authenticity.

Second, the society had never provided for the withholding of a certificate in case of a protest having been made, no matter if made immediately after having been awarded, and if the reports were to be published without passing through the hands of the officers of the society, it would be useless to make a protest, for if made, it should of course be made to the secretary of the society and if the reports were to emanate from the chairmen of committees, a letter to the secretary would be too late to stop the publication of the award.

Third, the suppressing of the report of a committee upon a variety which did not score high enough to receive a certificate. The work of the society is not only to award certificates to meritorious novelties, but also, to place its disapproval upon a variety which is not an improvement upon those already upon the market.

Consequently it was decided at the meeting held at Providence last August, that all reports of judging should be issued by the secretary only, that the trade papers should receive each week a full report of the deliberations of the committees of the week previous (thereby making the report more full and more authentic and just as early) and that each exhibitor be forwarded a report of the different committees as soon as received by the secretary.

It was not intended that there should be any secrecy in regard to the matter, but it was thought that the society would have a more complete control of its work by conducting its business under this form, and while everybody fully understands that a raiser of novelties is always anxious to know how "his baby" has been received by the judges, yet it was thought that he could afford to wait until the reports of the committees could reach the hands of the secretary and a full report be forwarded to him.

ELIJAH A. WOOD.

[We give especial prominence to the above statement of the excellent reasons for the adoption of the rule in question. The present tendency to careless criticism of trade societies is greatly to be deplored. —ED.]

Chrysanthemum Notes—Phila.

On Saturday afternoon there were some new chrysanthemum flowers on hand to be examined by the committee. One was an undecided light purple variety after the style of Mrs. Irving Clark in that respect, but in form not so spreading or flat, or as large as that old variety. Another was an incurved light bronze after the get-up of Harry May, but lighter in color and not any larger in size, the florets, however, appeared to be somewhat broader.

Robert G. Carey had another of his good seedlings, making three that he has had before the committee this season. In color it was light yellow, similar in that and many other respects to Major Bonnaffon, but it seemed larger than the "Major" is generally seen. It was named "Spottswood." A silver cup is promised to be competed for at the next chrysanthemum show to be held in Philadelphia next fall for the best specimen blooms of this new variety. It has the characteristics of a good commercial sort, being a close compact incurved Japanese, the petalage of the florets being of good substance, thus indicating good shipping qualities.

Fred Dorner & Sons sent a new one all the way from Lafayette, Ind. It was a yellow incurved Japanese. It was good in color and form; excellent in fullness and stem; petalage and size fair. It did not land at 1514 Chestnut street until Sunday morning.

Incidentally in conversation it was stated that the "Frank Hardy" which came off with flying colors wherever

exhibited and was entered a few weeks ago for certificate honors in the Quaker and other cities, is a sport from our old friend Good Gracious.

Mrs. Perrin was noticed among others in Pennock's store, and the remark was made that it was still a pleasing color, but the wonder was how it scored 100 points before a committee acting under the auspices of the Chrysanthemum Society of America, but so it did for it was so recorded. One of the trade papers named the committee acting in Philadelphia as having awarded that honor; this, however, has been denied. So far as I can learn New York has the honor of having awarded 100 points up to date for a variety. But to return to what we were about to say: How the mighty have fallen! Has this variety deteriorated, or is the standard higher now than it was at the time the "Madam" made that high score?

It is a matter worthy of record that all the committees which examined and scored "Pennsylvania" gave it enough points to entitle it to a certificate, and Mr. Graham was not slow in showing to the chrysanthemum public all the telegrams and other evidences received from the different cities how it had fared at their hands. This was made known in connection with his exhibit of this variety at Philadelphia. This is interesting because it has been talked over among some of the raisers of seedlings that each new variety should be expected to be shown before all the committees located at the several centres, New York, Chicago, Philadelphia, Boston and Cincinnati, and after the aggregate of points had been determined divide the total by five and the result would decide whether a certificate would be awarded or not. This may have to be the plan in the future, and it may be that this idea inspired the thought that all reports of the committees should come through the secretary. They generally do in all other organizations. It certainly would have to be done in that way should that plan ever become a rule of the Chrysanthemum Society of America. It costs now $1 only per year to be admitted to the legislative councils of the C. S. A., so whoever has any good ideas to formulate, now is the time to get them tabulated ready to spring upon the next annual meeting to be held at Omaha, August, '98.

PHIL. A. DELPHIA.

Color of Viviand-Morel.

TO THE EDITOR: I noticed in the FLORIST of November 13, that many growers have Viviand-Morel turning lighter in color. I have a pot plant of the same turning pure white with the exception of one bloom which is of the original color. Having never heard of a white Morel, I would like to know if any one else has had a similar experience. F. E. VETTER.

All chrysanthemums of the color of Viviand Morel are inclined to vary in color, more or less, according to the conditions under which they are grown. In a temperature of from 55° to 60° at night, most varieties of that color can be bleached to a white. The indications are, however, that the one referred to by F. E. Vetter is a "sport," and an attempt should be made to "fix" it. There may be a white Morel in cultivation, though I do not remember having seen one. Under the circumstances my advice would be to propagate that part of the plant producing the white flowers and await developments.

E. LONSDALE.

The Lily of the Valley Industry.

How is it grown in Germany from its first planting until ready for harvest, to be sold to the commercial grower, and, why not grow it at home, when it will do even better under the same treatment and care; but, will it pay?

When I was an apprentice, thirty years ago, lily of the valley was grown quite differently from nowadays. It was grown in beds close together like so much sod, and matted close together; it was a hard job to keep it clean of weeds for three years, and then to pull it apart was another sweet job in the fall of the year. But shortly after, when valley came into great demand, also in this country, an easier way for handling it was generally adopted, which has been kept up ever since.

To attain the best results for the prime forcing pip at the end of a three years' growth, prepare, say one acre of your richest land to start with; sandy loam, very heavy cow and horse manure, mixed

LILY OF THE VALLEY 1-YEAR PIP.

and well rotted. Put on all the manure you can get under with your plow, but deep. Have four men beside the plow and let them keep raking the manure into the trench after the plow to make a snug even piece of well manured land and it will be ready for planting after the plow leaves. As the men put in the manure, rake the lumps down in the furrows, as this ground will not see a plow again for three years.

Planting is generally done in the months of October or November and sometimes very early in the spring; but fall is the best time. Take the 50,000 planting pips as in the cut one year old, put your line down and open with a spade a small trench, say about five inches deep along the line a little on the slant, so the small planting pips will lie rather than stand, about one inch apart. Next, fill in with loose soil so as to cover and over about two inches and so on. The distance from line to line is twelve inches, no more. This will allow any hoe to go easily between after they are all planted. It is best to give them a very light covering with horse straw manure to keep the frost from acting on the ground and raising the roots; but during the summer they must be kept clean of weeds, and hoed occasionally to allow the rain to soak in freely.

The next winter, give them another mulch of horse and cow manure and put it on during the early part of winter, to give the snow and rain a chance to wash all the best of it into the ground, and also the roots will readily take it up in the month of May, and will look quite different from those which did not get the mulch. Now all there is to be done is to keep them free from weeds and hoe to keep the ground loose; but during the summer and fall you must prepare a final mulch of all and any kind of manure, namely, chicken, horse, cow, blood and fish, etc., a general mixture turned over several times to burn and kill seeds which it might contain, and put on between the rows of your valley, which is getting pretty hungry and will take anything in the feeding line without injury, that you may have a mind to give it, but this being its last and final year for it to make its best growth, it is best to put the stimulant on early in the winter to get all the benefit possible from it, and during this summer use a prong hoe for loosening the ground.

When the leaves begin to turn yellow, which is October 1 to 5, you can start digging up your valley roots with spades, and put the clumps in a cart to be taken to sheds where they are assorted, one, two and three year old. The one year old pips, as per illustration, are the ones

LILY OF THE VALLEY 2-YEAR PIP.

you need for planting and are buried until wanted. The two and three year old are put 25 in a bundle and tied with a willow or wire and are also put under ground as soon as possible, being especially careful not to expose them to the air and sun any more than you can possibly help. This is one of the main secrets of success in forcing, to keep the roots from getting wilty or air dry; for if they do, in due time after getting damp again, they will rot and get mouldy.

After you have your one acre all taken up and cleaned, and know just how many you have, two and three year old, you know how many you have to sell and are ready for shipment. The two year olds are sometimes used for replanting, also for forcing for leaves in the early part of winter, because those which have no flowers will grow leaves sooner than the three year old pips which possess the

LILY OF THE VALLEY 3-YEAR PIP.

flowers. Rarely, the two year olds possess flowers, and if they do the flowers are small If you are short of planting stock, it is advisable to plant two year old pips and they will repay you.

Lily of the valley, if left on the same spot more than three years, will flower; but the flowers become smaller and weaker, because they become so dense that you cannot give them enough nourishment. Therefore, it is a rule to take them up every three years and plant your amount of one year old on new fresh manured ground, clean and sweet. Valley pips grown and treated in this way are worth having, and can be sold for Berlin, Hamburg, Russian, yes, *even American*, as shown in the illustration of half an acre that can be seen in Astoria where this photo was taken. The only question is the price. Can we grow it as cheaply as we can import it? for this is the point to be considered. Labor in Germany for this kind of work is worth 25 cents a day for a woman and 40 cents for a man. In America the same would be $1.50 for a man.

Lily of the valley grown around Berlin is considered the best for early forcing on account of the sandy soil. It ripens early, consequently likes to start early. Hamburg pips are grown in the vicinity of Hamburg and generally in heavy clay, cold and damp; and Hamburg valley is, in general, a late grower, but there are exceptions. Russian pips are grown more in the central or southern part of Germany, well taken care of and fed as you see some of the monster pumpkins in the fall in New York.

Astoria, N. Y. WM. H. SIEBRECHT.

Valley and other Bulbs in Oregon.

Some time ago I saw in your valuable paper an inquiry whether "lily of the valley" could be grown successfully in California. So far I have not seen a reply and as this question may be of some importance to somebody I send you a sample under separate cover proving that these plants can be grown to perfection in Oregon. Not only valley, tulips and narcissus grow and mature in this part of the country, but I venture to say, that hyacinths can be grown and ripened here fully up to Holland bulbs. I have seen hyacinths grown by an amateur, both from seeds and side sprouts, which were perfect in every respect. Without doubt Oregon is most similar to Holland in regard to soil and climatic conditions. Since there has been a heavy duty imposed upon bulbs, I think it will pay somebody to look into this matter as suitable land can be bought reasonably.

Portland, Ore. GEO. OTTEN.

(The sample pips referred to were very good indeed.—ED.)

Diseased Roses.

The specimens sent by J. H., Indiana, arrived O. K., also letter accompanying the same. I do not think the plants are suffering from any specific disease, though they are undoubtedly very sick. Mr. H. says his Perles were similarly affected last season, but having changed his stock of this variety this spring he now has healthy plants, and on that account is led to think the trouble is not in the soil or present treatment, but is in the stock itself. I cannot enlighten Mr. H. as to the exact nature or cause of this sickness, neither can I suggest a positive remedy. The plants have been brought to their present unhealthy condition undoubtedly through improper treatment, either this season, or some time previous. The foliage and wood are in that soft and pithy state which indicates deterioration, and presages ultimate death. Many things may have contributed to bring about this result,—too much manure in the soil is alone sufficient cause; too much or too strong liquid manure, or a fair dose and proper strength, but given when the plants do not require and cannot utilize and assimilate it, is often ruinous. Too much water at the root in warm and cloudy weather during the early fall, in conjunction with a high night temperature and insufficient ventilation, may have sown the seeds of weakness and death. But if in addition to any or all of these, and while the plants are in a soft, unhealthy state, we take the wood and root it, what should we expect but disease and disappointment?

It is the easiest thing in the world, once vigilance is relaxed, to have rose or carnation stock become run down and sick, and one of the most difficult tasks to build up and vitalize such stock. I have always held that few things contribute to failure in rose growing to the same extent as indiscriminate, hap-hazard propagating, and that perfect health and original vigor can only be maintained by the most careful selection of wood for propagating purposes.

I would suggest that Mr. H. abandon feeding with liquid manure or otherwise, any stock so affected, keep it a trifle on the dry side, aim to have the surface of the soil loose and clean all the time, have the night temperature as near 55° as possible, and as much ventilation during the day as it is safe to give, the object being to harden up the wood and give tone to the foliage; but above all to avoid using any but perfectly healthy wood for cuttings for next year's plants.

ROBT. SIMPSON.

LILY OF THE VALLEY—CLUMP FROM PIP PLANTED 3 YEARS.

Disfigured Foliage.

H. P., Kewanee, have forwarded some rose foliage to show the condition of the plants in one of their new houses; house was built this summer and plants set out in August before the glass was put on the roof. Soon after glazing the upper surface of the young tender leaves began to blacken, then curl up, and finally die. I am asked to explain the cause and remedy for the trouble.

The appearance of the leaves upon arrival here would indicate scalding or scorching as a result of being too dry at the root, lack of moisture in the air, or too high temperature, or perhaps a combination of the three. When the heat is very intense and the air dry the evaporation or exhalation of moisture through

the foliage is more rapid than nature can supply through the ordinary channel (the roots), the consequence is the foliage wilts, becomes drained, and the juices are dried up and scalding follows. Moisture in the form of fine spray over the plants, paths and benches just at the critical moment is the best preventive.

Roses seldom burn in this manner, even in the hottest weather, if the ventilation, soil and atmosphere have had due consideration. Cement paths, brick walls, etc., which retain little moisture and radiate considerable heat, are apt to give trouble in this respect unless frequently damped down during extremely hot weather. It is best to cut off the disfigured tips, and with reasonable care the burning should not occur again at this late date.

ROBT. SIMPSON.

and bushy there is often considerable wood near the base, the first made after planting out, that has become denuded of most of its foliage, is half smothered by the stronger and taller growth, and is practically at a standstill. Such wood cut out judiciously would not be missed by the plant and would permit a freer circulation of air; a few such sprigs might be taken off at each tying, and might prove beneficial all round. On general principles, however, I object to much thinning for all winter-blooming roses and prefer to allow sufficient room at the time of planting for the full development and spread of the plants without being compelled to resort to thinning out in order to let in light and air. Still in this as in almost everything else we do not all think alike and it is possible that many

(2) The disease is quite serious on Lilium longiflorum and L. Harrisii, and also attacks L. auratum and L. candidum. It is very prevalent in Bermuda, and in the United States where the bulbs are forced it destroys from 20 to 60 per cent of the crop. It also doubtless occurs in Japan, France and the Netherlands.

(3) There are many theories as to the cause of the lily disease, the principal ones being worn-out soil, premature removal of flowers and flower stems, premature harvesting of the bulbs, carelessness in the selection of stock for propagating purposes, bad treatment during forcing, and the work of insects.

(4) The work done shows that the disease is due to a combination of causes. In the first place the bulbs have become weakened through improper selection and improper propagation, and this weakening is further increased by the attacks of mites and certain fungi and bacteria. Bulbs which have been weakened in this way might regain their strength if the mites and fungi could be kept down, but those which are naturally weak cannot be made strong. During the time plants are being forced they may also be weakened by overwatering and consequent asphyxiation of the roots, or

LILY OF THE VALLEY FIELD ASTORIA, L. I.

Meteor, Trimming Out Blind Wood.

J. F. W., Iowa, asks my opinion as to the wisdom of cutting out the old bushy growth, the original plant, and leaving only the younger, stronger, and finer wood; the reply to have special reference to Meteor planted July 1 and now in splendid condition, but also to include all forcing varieties.

I have for the last ten or twelve years had a settled conviction, and every experiment made only strengthens it, that every active healthy leaf taken from an ever-blooming rose means robbing and weakening the plant to just that extent. The present demand for long-stemmed blooms compels us to shear off almost half the plant every time it produces a crop, and if along with this we cut out the blind wood how is the regular flow of sap to be continued without serious interruption when the flowers are cut? What is there then left for the roots to feed? To my mind there must in all such cases inevitably come a severe check, and injury instead of good will follow.

When plants have grown very large eminent growers may hold views on the subject that are entirely opposed to mine. I have long since learned that in most things there are many roads to success, and it matters little which road we take so long as success is attained.

My advice in the present and similar cases would be to leave the plants alone, they are vigorous, healthy, and look fine, take no chances of spoiling them. When stock is doing well it is seldom if ever the part of wisdom to reverse the treatment in any particular; I do not desire, however, to discourage experimenting, only do it on a small scale. ROBT. SIMPSON.

The Bermuda Lily Disease.

A report of investigations by Prof. Albert F. Woods on the Bermuda lily disease has been issued by the Department of Agriculture at Washington. The summary of results reached is given below. Copies of the report, Bulletin No. 14, which is illustrated, may be had free on application to the Department.

(1) The lily disease is characterized by the spotting and distortion of the leaves and flowers and usually the stunting of the plant.

by allowing the roots to become too dry, and then overwatering. The foliage of such plants may be free from spots and distortions, but usually the leaves are badly diseased.

(5) The spotting and distortion of the foliage is often due to the direct attacks of several genera and species of aphides and of the young of the bulb mite, to the injection of water into the young leaves in watering or syringing and to the presence of water between the young leaves of plants having soft foliage. The injuries from the attacks of organisms are always more severe on the susceptible or naturally weakened bulbs.

(6) The disease cannot be cured or even prevented by adopting any single course of treatment. The fact that the bulbs have become more or less weakened by improper cultivation, selection and propagation shows the importance of adopting rigid measures to improve the stock. Only the strong and vigorous plants should be used for propagation. Crop rotation should be practised in order to prevent the increase of mites and injurious fungi. Leave the stems on the bulbs until ripe, and in all cases avoid premature digging. The florist who forces the bulbs should exercise care in planting. Throw out all injured bulbs, and plant in well-drained, well-aerated soil. Endeavor to keep down aphides and mites from the start, and exercise care in watering and ventilating. Avoid feeding with solutions of horse, cow and sheep manures, and use chemical fertilizers.

MR. CHAS. W. GARFIELD, the well known horticulturist, was married this week at Denver, Colo, to Miss Jessie Smith formerly of Grand Rapids, Mich.

Philadelphia.

INCREASE IN DEMAND ALL AROUND.—A WORD ABOUT VIOLETS.—PALMS AND FERNS SELL WELL.—VARIOUS ITEMS.

A decided change has taken place since last week the weather is decidedly cooler there having been both frost and snow. This has been the most open fall for years; to have scarlet sage blooming outside the second week in November is indeed a very rare occurence in this locality, but this and other tender plants were to be seen in good condition as late as the fifteenth of the month.

Another welcome change is to be seen in a very marked increase in the demand for flowers. Last Saturday was a great day. The football game between Harvard and Pennsylvania called out all the violets, red roses and crimson carnations and chrysanthemums to be found and increased the demand for all kinds of stock, at least four or five times that of an ordinary day. There was great hustling among the store men for stock and yet with all the increased demand there seemed to be enough to fill all orders and have a little left. This gives rise to the query what becomes of all the flowers with only the regular demand to consume them.

The cold weather while it has made stock scarcer has improved the quality, this is particularly noticeable in the Pres. Carnot, as this rose is now coming in it is bound to be a winner. It is well colored, of good shape fine foliage and with stem stiff and of any length desired. Carnots are now asked for frequently; $8 to $10 per hundred, when such a quantity can be had, is now the price. Other tea roses are a notch higher, good stock bringing readily $6, with a prospect of $8 before long. Beauties are also climbing; $4 per dozen is now asked for the specials 36 to 40-inch stems and $1, $2 and $3 per dozen for the smaller grades. Carnations are getting there, some selling even as high as $2, the past week; $1.50 is now the price for the best average stock and in the opinion of one of the commission men it is not enough for the season of the year. Valley is plentiful at $4.

Violets are scarce, both single and double being in great demand. If somebody would only give us a little lecture on how to grow good double violets. We think he would draw a crowded house, for what the average violet grower of this vicinity don't know about violets would fill a greenhouse. It does fill more than half a dozen in most places where violets are being nursed, around here, fills them with diseased stock, with starved looking plants bearing little short stemmed poor colored flowers, fills everybody that has to handle them with disgust and the purse that ought to be filled goes empty. Wake up farmers and let's have something different, something that will sell, never mind the price, that will come and keep pace with the quality.

'Mums have sold well the past week everybody who had good stock had all they could do to fill orders. Coles, of 55th and Walnut streets, had a very fine lot of pot plants which went rapidly and he could have sold many more, his Maud Dean, Bonnaffon and Lincoln being especially fine. Rob't Craig had a splendid lot of his new late yellow Liberty. He sold some three thousand blooms the past week many of them going to New York. There seems to be room for the 'mum yet.

Palms have been selling freely lately as also has the Boston fern. Wm. Craig has a fine lot of large plants very well grown. Rubbers in small sizes are nearly all gone. This plant is very popular and for all that more seem to be grown each season the demand seems to keep pace the supply. K.

CUT FLOWER TRADE ACTIVE.—PRICES DOUBLING UP.—VIOLETS IN THE LEAD.—PLANS FOR A PERMANENT PLANT MARKET.—A DECORATION BY SIEBRECHT.—A FLATBUSH EPISODE.—A NEW CARNATION.

The cut flower market has at last assumed an appearance of hopeful activity and the despondent feeling so prevalent since September seems to have vanished. It is too early, however, and conditions are of too uncertain a character to make predictions of permanent prosperity safe. New York has had its first touch of winter weather, not merely a passing chill but several days and nights of genuine winter, and receipts of flowers have fallen decidedly short and this, together with the calls for Thanksgiving festivities, has presented the first opportunity of the season to give prices a boost and immediate advantage has been taken of the situation. On an average it might be said that the prices have doubled on all grades of marketable flowers excepting chrysanthemums. This does not make them too high nor place the value of anything beyond what would have been considered by buyers a reasonable basis in past seasons, excepting in the case of violets which have once more gone beyond the limit, if their future good is to be considered. When the wholesale price of violets jumps to $3 or more per hundred it is, momentarily, a very pleasant experience for the violet grower, but his specialty suffers eventually from the resentment which is sure to follow, on the part of the flower buying public, over what they regard as an imposition. Many a customer makes his last flower purchase for the season when he walks out of the florists, at such a time as this, with a five dollar bunch of violets in his hat and a "cuss-word" between his teeth.

The movement which has been on foot for some time for the establishment of a permanent plant market gathers strength as it progresses and the outlook is now bright. It is proposed to secure Clinton Market, which is well adapted to the purpose, and it can be done if all interested will take hold now and help. The next meeting will be held at Lynch's restaurant, corner of Canal and West streets

on Wednesday, December 1, at 7:30 p. m. Long Island and Jersey plant growers should be present to a man.

One of the finest table decorations of the season was made by Siebrecht & Son at Delmonico's new establishment, on Tuesday evening, November 23, on the occasion of the 129th annual banquet of the Chamber of Commerce. American Beauty and Bridesmaid roses were the only flowers used. They were arranged in flat baskets four to five feet in length with round handle baskets alternating and connected by scrolls of smilax. The Beauties were used on the head table and Bridesmaids on the six other tables. The walls were festooned with southern smilax, and the balconies were decorated with palms.

The Flatbush Bowling Club bowls for turkeys on the evening of Thursday, Thanksgiving Day. Bowling with a regulation Thanksgiving dinner inside one's ribs is a very serious matter, and it is a question whether even the elastic Louis Schmutz will be able to stoop over. This contest for a turkey after it has been eaten will go down into history as a shining example of Flatbush honor.

Jerome Sundam has given the name of Manhattan to his dark pink sport from Wm. Scott carnation.

Visiting New York: Robert Kift and D. D. L. Farson, Philadelphia; J. A. Pettigrew, superintendent of parks, Boston, and Chas. Fleming, Bridgeport, Conn.

Boston.

TENDENCIES OF THANKSGIVING TRADE.—BUSINESS OUTLOOK BRIGHTER —EXHIBITION AT HORTICULTURAL HALL.—PROGRESS IN PARK CONSTRUCTION UNDER SUPERINTENDENT PETTIGREW —OPENING OF GALVIN'S NEW ESTABLISHMENT —DEATH OF PROF GOODALE'S FATHER.

Thanksgiving week! Not much cause for thanksgiving yet in this vicinity except that there is reason for thankfulness that the poorest fall on record in the flower trade has at last passed into history and that the privilege of hoping for better things is now granted us. The approach of Thanksgiving has put new life into all departments of the business, and prices for all grades of cut flowers are advancing in consequence. Bleak November weather has prevailed during the past week and the decreased production has had a healthy effect on the movement of stock at wholesale, reasonables values being obtainable for fancy grades, and the surplus of the inferior kinds being reduced to a point where competition for its possession is developed.

Street peddling has grown to be quite a factor here, using up the vast accumulation of ordinary and inferior grades that remain unsold after the fastidious storekeepers get their little selection of the top notch stock. While not equal to the New York Greeks in effecting combinations and "bearing the market," the street fakirs of Boston are by no means simple, and the wholesaler or grower who deals with them soon learns that all his wits are required in order to keep up with them. When there is an abundance of stock for all, they work together and manipulate things about as they please, and it is only when the supply is diminished to the danger line that they turn competitors and the dealer sees a chance to get even with them. It might be mentioned in passing that this latter condition is getting to be a very rare occurrence in this vicinity.

There are still plenty of chrysanthemums in market, and they bring all the way from $4 to $16 per 100 for specimen blooms, the poorer grades and sprays being sold in bunches for whatever they will bring. Roses are plentiful in all varieties and all grades, there being no scarcity in any class. Carnations are beginning to look up a little, but cannot be called scarce. The crop of violets seems to have shortened up considerably within the past two weeeks, and better prices are now quoted. The prospect of higher rates has always had the effect at this season of inclining the violet growers to hold back on picking, and this may be the cause, in part, of the present shortage.

The November fruit and vegetable exhibition at Horticultural Hall was held on Saturday last and was fairly good, as to most of the exhibits, excepting apples, which are a very short and inferior crop in this section this year. The hothouse grapes from Geo. McWilliam, including Alicante, Lady Downes and Mrs. Pearson, were very good. On the side tables were a few flower displays, among which were some well grown carnations from M. A. Patten, a promising yellow chrysanthemum, named Mrs. C. H. Peirce, from Fred Dorner & Son, and a plant in bloom of Cypripedium insigne Ernestii, for which W. W. Lunt was awarded a silver medal.

Great progress is being made in the construction and opening out of the vast park reservations. Eight hundred and forty men are employed at present. The manner of the road building and the thoroughness, system and foresight with which the whole business of the department is managed are good evidence of the wisdom shown in the selection of the chief officer, and we now begin to realize something of the high abilities possessed by Superintendent Pettigrew, and his eminent qualifications to direct the work of laying out and embellishing Boston's magnificent park system. The only regret is that we did not have him twenty years ago.

The new establishment of Thos. F. Galvin in the Back Bay district is now open to the public, the first three days of this week being devoted to the formal opening. It is a combination of store and conservatory, a splendid structure of iron and glass richly decorated and illuminated, designed and erected by Lord & Burnham. The store proper has a frontage of 28 feet, with an area in front 12 feet in depth, which is planted with choice conifers. Over the store is an open dome of stained glass with galleries for palms and hanging plants, the counters and floor are of colored marble and tiles, and the walls are tinted apple green and gold. There are window beds and stands of marble, and carved wood for plants, and the corners are fitted with small refriger-

HALF STANDARD CHRYSANTHEMUM—CHICAGO SHOW. GROWN BY J. REARDON

ators. The conservatory opens from the store and is 30x70 and 32 feet in height, with an auxiliary greenhouse for storage of decorative plants. In the basement are cold storage apartments and spacious work rooms. The conservatory is illuminated by hundreds of small electric lights and with the beautiful decoration in flowers and plants which mark the opening festivities, the place is a wonder and delight to the throngs of visitors.

News comes of the death of Stephen Lincoln Goodale at his home in Saco, Me., on Saturday, November 13, at the advanced age of 82 years. Mr. Goodale was the father of Prof. Geo. L. Goodale, of Harvard University, Botanic Garden, Cambridge.

Visiting Boston: Mr. R. H. Warder, Superintendent of Parks, Cincinnati, O.

Chicago.

THANKSGIVING DAY TRADE.— PRICES.— OBITUARY OF MR. FRANCIS LUDLOW.— VARIOUS PERSONAL ITEMS.

Thanksgiving Day is past once more. Growers, retailers and wholesale dealers are now figuring in how far the "thanksgivings" offered are commensurate with profits realized on the amount of business transacted. As usual, the reports of the retailers are varying. While a few claim an increased amount of business, the majority have figured up an average of about the same results as last season. Others again report a more or less percentage of loss compared with former seasons. The weather was very bad, with a drizzling rain on Thursday, and it is small wonder that the trade suffered.

The week opened up with a decided shortage of stock in all lines. As results showed later, this scarcity, more particularly in carnations, was not altogether due to a short crop, but to the fact that large amounts were held back up to the last day, with the inevitable consequence that thousands of carnations, which on very good Harrisii were in. Valley moved quite briskly, at $5 for select eastern stock. Good Romans brought $4. Chrysanthemums could be had in quantity, although large numbers of these were disposed of. Prices averaged rather low, $8 to $15 being the ruling figures for good quality stock; a few extra fancy up to $25. The first stevia of the season was cut, selling at 25 cents per bunch of 25 sprays.

Prices to-day (Friday) have settled back to $3 to $4 for average small roses, $5 to $6 for extra select; Beauties, first grade, $20 to $25, second $10 to $18; carnations, good common, $1, fancy $1.50 to $2; violets $1 to $1.50; valley $4 to $5; Romans $4; 'mums $5 to $15; stevia $1.

Mr. Randall is receiving some very fine Flora Hill carnations from Mr. J. F. Klimmer, the specialist in this flower at Oak Park.

Mr. Blair Winter, of Winter & Glover, has evidently found a congenial spot in New Jersey, as we learn he has postponed the date of his return.

TABLE DECORATIONS—CHICAGO SHOW, 1897.

Monday and Tuesday could easily have been disposed of at $1.50 to $2 per 100, had to be disposed of at half that figure, some of the poorer grades being difficult to move even at these low figures.

Roses remained steady through the week, with a brisk demand. The market was cleaned up every day. In the select grades 'Maids were short of demand. Beauties being in fairly good crop, proved about equal to demand. On the whole, prices of these ruled lower, considering quality, than in former seasons, the price for select quality being $2.50 to $3 per dozen, a few specials going a little higher. The price for average good stock of the smaller roses varied between $4 and $6. Pres. Carnot and a few special high grades in other sorts were held at $7 to $8, but a large amount of inferior grades ranged down to $1 per 100.

Violets very scarce, commanded $1.75 to $2 for the best and down to $1 for poorer grades. In bulbous stock some

OBITUARY—FRANCIS L. LUDLOW.

"Frank" Ludlow died in Chicago November 25, of pneumonia. The deceased was one of the old-time gardeners and florists of this city. He was born near Derby, England, December 31, 1833, learning his trade in England, coming to this country in 1853 direct to this city. For a time he was with Samuel Brooks, the first florist in this city, afterwards being gardener for E. B. McCagg at his once fine place on North Clark street. He was for many years after, foreman for Edgar Sanders, marrying in 1871 his eldest daughter, Sarah Jane. Mr. Ludlow leaves a widow, one son and three daughters, the youngest 13 years of age.

In 1872 he started in business for himself. Shortly after, he moved the houses and merged his interests into the pioneer commercial plant firm of Miller, Hunt & Ludlow. This terminated by limitation, and afterwards he rented Louis Ellsworth's greenhouses at Naperville, Ill. For the past 16 years he has been one of the staff of the Lincoln Park greenhouses. He was always a faithful workman, honest in his profession and in all his dealings.

Funeral services will be held at St. Peter's Episcopal church, 1871 Belmont avenue, Sunday, 3 p. m.

Omaha, Neb.

With a sigh of satisfaction the management closed the doors on the first of Omaha's chrysanthemum shows. From the first to the last of its six days it was in every way a success. As the visitors entered the first of the spacious halls, which contained the cut flower displays they were held entranced by the beauty and magnificence of the scene, here in her most voluptuous and enticing mood that regal monarch the Queen of Autumn held her inspiring sway, transporting her subjects far across the seas to old Japan. The exhibits were twenty-three in number and were arranged in great vases in a very artistic manner.

J. C. Vaughan's exhibit occupied a very prominent position and contained fine specimens of Modesto, Thanksgiving, Mrs. Jerome Jones, The Times, New York, E. M. Bigelow and a vase of exceptionally fine yellows, containing Eugene Dailledouze, Golden Wedding and Major Bonnaffon.

E. G. Hill & Co. were well represented with vases of H. H. Rieman, Modesto and a splendid pink, which all regretted was not named.

Jordan & Sons, of St. Louis had a good display of Golden Wedding, Modesto and an unnamed white.

Mendenhall, of Minneapolis, had several huge vases of very good 'mums including well known varieties.

Dorner & Sons' display of 'mums was much admired, particularly a new yellow Mrs. C. H. Pierce a truly fine variety. This firm's display of carnations attracted great notice from the trade. It included Mrs. Geo. M. Bradt, Gold Nugget and many other fine varieties.

J. F. Wilcox, of Council Bluffs, staged a display which compared favorably with any. It consisted of a large vase of American Beauties and a number of vases of 'mums of good size, such as V. H. Hallock, Geo. W. Childs, Mrs. Perrin, Mrs. Jerome Jones, Chas. Davis, Silver Cloud, Indiana and other varieties.

Hess & Swoboda's new seedling was much admired, in form and color a fine bronze, it promises well. Their vases of Domination, Major Bonnaffon and The Queen compared well with any sent in from the east.

In the second hall, divided from the first by dense masses and pyramids of luxuriant tropical verdure, were the exhibits of

pot plants. A fine pyramid of Ivory, exhibited by Donaghue, occupied a central position. Flanking it was a large bank of Golden Wedding displayed by Hess & Swoboda. Half of one side wall was occupied with a fine display of pot 'mums from Chapin Bros. of Lincoln, while tastefully arranged in banks, pyramids and many varied forms, were displays of pot 'mums from Henry Peterson, Ben Haas, Robt Unger, Paul Paulson, Eddever & Sons and Paul Floth. Eddever & Sons had some novel decorations of palm leaves.

E. C. Erfling had a fine specimen of Ficus elastica with very artistic and unique leaf decorations. A. Delaney displayed some good ferns. R. H. Davy, had a fine display of cacti. Peterson Brothers Cycas revoluta were well worthy of the conspicuous position they occupied. A team of six doves drawing a chariot, over a flower strewn race course with cacti to mark the quarter posts, made a very dainty floral scene disigned by Lewis Henderson. A. D.

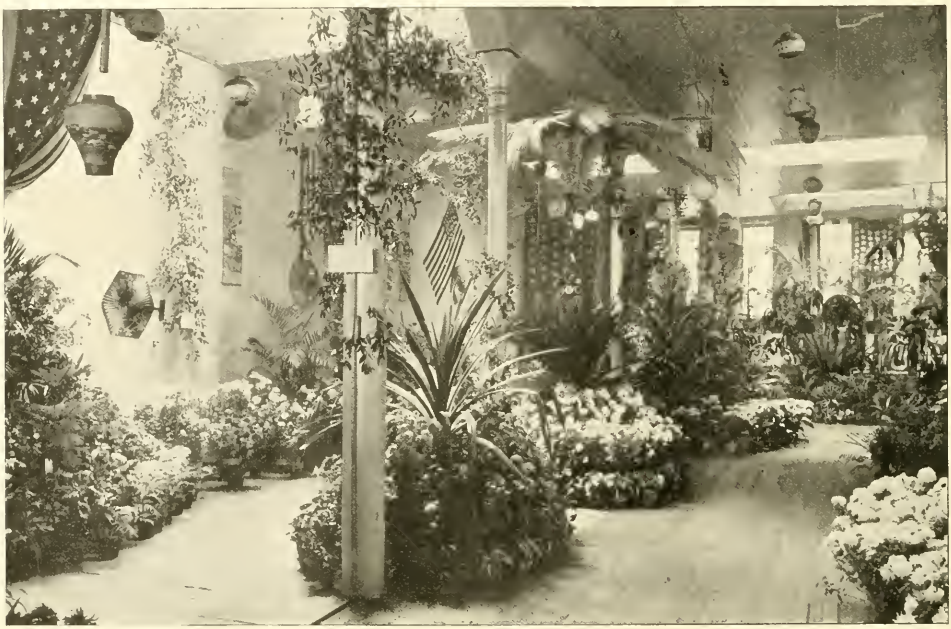
San Francisco.

FLOWERS SCARCE WITH PRICES STIFF — VIOLETS TROUBLED WITH SNAILS —ROSE CARNIVAL AT PASADENA —NEW BOTANICAL BUILDING AT BERKELEY NEARLY COMPLETED —'MUM SHOW AT AUBURN.— BALL OF THE FLORIST CLUB —VARIOUS ITEMS.

Flowers of all kinds are getting rather scarce now and prices of everything in general have taken a jump. The heavy frosts we had during the past week destroyed a large quantity of outdoor chrysanthemums which of course shortened the supply considerably as the largest supply comes from outdoor stock.

Major Bonnaffon and Mrs. Robinson, two of our most popular sorts, are over for the season and In yellows Eugene Dailledouze is now the leader and is bringing very good prices. There is a demand for red chrysanthemums but we have no red here to amount to anything at this time. This week the florists are preparing for a heavy run on yellow and red 'mums on account of the great inter-collegiate football game on Thanksgiving day between Stanford and University of California. In whites Mrs. Geo. Ils is the best we have now and is bringing fairly good prices, but the one objection to this sort is its very weak neck. Cheap whites for funeral work are selling fairly well.

Violets are very scarce, in fact they have never been so scarce at this season of the year before. This is probably accounted for by the woeful lack of rain and cold frosty mornings. They are bringing from $1 to $1.50, Marie Louise being of much better quality than any other sort we have at present. Many of the growers have been troubled with snails this season which in some cases have destroyed thousands of violets. Roses are rather scarce and good stock is now up to 75 cents per dozen for Brides and 'Maids with 50 cents ruling for average stock. Some good Caroline Testout are also bringing fair prices. We also note some Papa Gontiers which sell for 50 cents.



Carnations are in good demand and bring fine prices. The supply is rather short. The writer saw some extra fine Flora Hill during the week and they certainly were excellent. This variety will probably be largely grown next season as a standard white. Lily of the valley coming from Mr. Clack's place is really fine and brings a good figure. Smilax is of excellent quality but as yet is not much called for. Red berries are beginning to come into the market and seem to be of very good size and color this year.

F. Edward Gray, the seed grower of Alhambra, Cal., has been spending a few days in this city during the past week. He also looked over some of our largest growing establishments with much interest as he is also a large grower of cut flowers.

Mr. Waldo Bohnert, the young Gilroy seed grower, was with us during the past week.

The annual mid-winter rose carnival of the city of Pasadena is to take place January 1, and preparations are now under way to make it a grand success. Pasadena is the only city in this country that has an open air carnival on New Year's Day. It surpasses many of the carnivals given by larger cities in June and July and has made that beautiful city famous throughout the country

Emile Serveau, of Serveau Bros. spent a few days at Menlo Park during the week.

GENERAL VIEW—OMAHA, NEB., SHOW, 1897.

Chicago Chrysanthemum Committee.

Four seedlings came before the Chicago committee on the 20th.

Mrs. C. H. Peirce a light yellow of fine form, stem and foliage, a perfect globe in shape, of the Ivory type and apparently with all of the substance of that variety, was sent by the Fred. Dorner & Sons Co. of LaFayette, Ind.

From Nathan Smith & Son, Adrian, Mich., came Klio, a large, reflexed flower of a light yellow, Sunderbruch × Modesto. Color very bright and general effect striking, but apparently a little lacking in stem, also Rustique, a large inc. Jap., light bronze in color and Mezza white inc. Jap.

Miss P. Constine and Miss F. Guckenheim have opened a flower store at 22 Geary street near Kearney.

The new botanical building of the University of California at Berkeley is nearing completion. Prof. W. A. Setchell and his assistants began moving from the old building on the 17th inst. The old botanical laboratory will be removed entirely.

The annual chrysanthemum show held in Auburn on November 11, and lasting three days was very successful from a financial standpoint. A very neat sum was netted the society as the result of its labors. The displays were numerous and artistically arranged. E. O. Smith was in charge of the show. On former occasions a queen was always voted for, to rule over the show, but this year that feature was dispensed with.

The first grand annual ball given by the San Francisco Florists' Club took place on the 21st at Washington Square Hall. As this was the first reunion that the florists of this city have had in several years all joined in to make it a success. Our leading florists were at the head of it and everybody had a jolly time. Mr. Frank Pelicano was the floor manager and Pete Matrai assistant.

Mr. John Carbone is bringing in his usual lot of fine roses and chrysanthemums. His 'mums this season were very fine and Mr. Carbone is much pleased with his fall trade.

Rosaia & Co. have an immense stock of cut flowers and plants in their Sutter street store which attracts much attention from passersby on account of its artistic arrangement.

Mr. Thos. Stevenson has returned from the Alaska gold fields. Tom says that they can do nothing up there for many months to come so he decided to leave his claim for the winter and return and work it again in the spring. METEOR.

Exhibition of the New York Gardeners' Society.

Later returns indicate that the exhibition of the New York Gardeners' Society was financially more successful than our notes of last week showed. On Sunday, the last day, when the admission was reduced to 50 cents there were nearly 2,000 visitors and the result was that about $800 will be available for charity purposes after all expenses have been paid.

The only regrettable feature of the whole affair has been the disposition to protest against the decisions of the judges in making their awards and the unfortunate wrangle precipitated in consequence at the meeting of the society last Saturday evening. An exhibitor having submitted his contribution to the judgment of a committee selected for that purpose should make up his mind to accept the result gracefully even though it be a disappointment to himself. The position of judge on such occasions is an unenviable one at best, and if it is to be made intolerable by protests and accusations of incompetence or unfair bias afterwards, it will soon be impossible to secure good men who will be willing to submit themselves to such abuse.

Lenox, Mass.

Mr. James Clifford, an enthusiastic member of the Lenox Horticultural Society, died on Wednesday, November 10.

At the meeting of the society on November 20 Mr. A. J. Loveless read a paper on violet culture. On December 4, Mr. W. Russel will talk on carnations and on December 18 Mr. E. J. Norman on orchids.

Carnations at the Chicago Show.

The carnation exhibit at the late Chicago show contained several novelties of 1897. Among the most prominent were Mayor Pingree, which was grand in two or three places, with fine stem, large and well shaped flower, and bids fair to prove an acquisition; a little light in color perhaps, but if put on the market in as good form as exhibited it will surely bring the top price. Flora Hill was grand as regards flower but a little weak in stem, which may strengthen as the plants get older, and this will place it at the top as a fine white. Unless a carnation has a strong enough stem to hold the flower erect it is of little use in this market no matter how fine the flower is. Mrs. McBirney was also shown in fine form but light in color as yet, due no doubt to the continued bright weather of the last few months. We noticed a vase of Morello, though not so good as shown on previous occasions by the originators; the same with Mrs. G. M. Bradt and Mrs. C. H. Duhme.

Among the 1896 novelties Triumph was the most conspicuous, a grand variety as shown here. Jubilee was also exhibited but not nearly so good as this variety can be done later in the season.

We are now entering a critical period when a little mismanagement or neglect will cause lots of trouble and loss and you cannot give the carnation too much care just now. Have all the plants wired or staked, and be sure to get all shoots up off the soil; if not they are bound to decay and cause disease. I believe in tying each plant separately but not too tight, so as to allow a circulation of air all around and through each plant. Look out for any leaks in the glass, as one of the worst things for the health of any plant is a constant drip and the most vital point in growing good carnations is to keep the soil in as even a condition as possible, never too dry or too wet. By this time a little fire heat is necessary and it is a good plan to give one of the steam pipes a painting of lime and sulphur to check any disease and keep down red spider. CHAS. W. JOHNSON.

St. Louis.

BETTER PRICES PREVAIL.—SPECIAL MEETING OF THE FLORIST CLUB.—VISITORS.—BOWLING CLUB.

The week after our not-so-successful show (that is financially) business has been but fair but there has been a marked change in the condition of the market since last reports. The great supply of chrysanthemums has shortened up considerably and much better prices are obtained for all kinds of stock, owing to Thanksgiving Day. Still there seems to be plenty of stock coming in.

The Thanksgiving Day prices took effect Tuesday, November 23, and for the best of roses such as Brides, Meteors, Bridesmaids, Kaiserins, Carnots and La France from $6 to $8 per hundred is realized with seconds from $3 to $5; Perles and Wottons $4 and $5. American Beauties, first-class stock are scarce and sell for from $25 to $50; short stemmed stock is selling at $8 and $15.

Carnations have also taken a jump. The fancy stock is bringing $2.50 and some extra fine ones go as high as $3 per hundred; common varieties $1.50 and $2 and are not over plentiful. Scotts and Daybreaks are the best and are very scarce. Violets are coming in quite plentifully and some extra fine Californias bring $1 to $1.50 with doubles $1; small singles 25 and 40 cents. Neither Harrisii nor Romans have as yet made their appearance at any of the commission houses. Smilax is selling better this week at $12.50 and $15.

A special meeting of the Florist Club has been called for on Thursday afternoon at 3 p. m., December 2, when the executive committee will make their report on the late chrysanthemum show. Every member of the club is requested to be present at this meeting without fail.

Mr. Phil. J. Hauswirth and a party of friends from Chicago and Taylorville, Ills. spent Sunday with us. We had a good time. If you don't believe it just ask Phil.

Martin Reukauf, representing H. Bayersdorfer & Co., Philadelphia, was in the city a few days last week with novelties for the holiday trade.

The bowling club rolled three games Monday night with a good attendance. Emil Schray was high man in the three games rolled with 497, Chas. Kuehn second with 485 and John Kunz third with 480. The highest single score was made by Emil Schray with 217, Kuehn second with 191 and Kunz third with 170. The club will roll at the same place next Monday night. J. J. B.

Milwaukee.

MARKET CONDITIONS —A NEW FIRM.

The sudden change in prices and supply from Saturday, the 20th, to Monday, the 22d, was noticeable. Roses were offered in some windows at 25 cents per dozen Saturday and Monday. Some florists were not able to get what they wanted in the afternoon at any price. Flowers are of good quality and sell well at the higher prices, which are moderate and will no doubt result in a greater mutual benefit to grower and storekeeper than when prices are put up so very high for three or four days.

A new firm has just been established at 314 Third street, being half way between Chas. Baumgarden's and Wm. Ellefsen. The firm name is Binzel & Kellner. Mr. Binzel is a druggist by profession. Mr. Kellner has been in the business for several years, mostly with Whitnall Floral Co. and Wisconsin Flower Exchange and a short time with Currie Bros. They will conduct a general retail trade in cut flowers, plants and decorations. Both young men have a large circle of acquaintances who appreciate their good qualities and will insure them a liberal patronage. C. B. W.

That Misunderstanding.

I have no desire to prolong a discussion which cannot be profitable to either of the two principals or to the readers of the AMERICAN FLORIST, only I just want to own up that I *was* annoyed at Mr. Graham's tone and manner in connection with his inquiries about the score of "Pennsylvania." In order to have the matter as nearly correct as possible this time; it was William (Hugh Graham's son) against whom I hold the grievance. It was on the Tuesday following the Saturday when the examination of the flowers of Pennsylvania was made that he telephoned for the number of points scored, when I told him as pleasantly as I know how over a 'phone that I had forwarded the report of the committee to the secretary, and I also stated that I had not retained a memorandum of the same. Most people would have been satisfied with that statement, thanked me and said good-bye, and proceeded to get the desired information from Secretary Smith. But not so with William; he wanted those points, and he wanted them then, and he could not restrain his impatience, and as his manner was so infectious, I was influenced thereby and feel justified in every word that I said under the provocation. Committees are entitled to courteous treatment at all times, and that is what *this* part of the Philadelphia committee did not receive on the occasion complained about. EDWIN LONSDALE.

Omaha.

The park commissioners are putting up a palm house 22x60 at Hanscome Park. The large collection of palms recently purchased of W. J. Hesser of Plattsmouth, together with the gift of Mr. Herman Kountze, to the city, required a much deeper house than the old ones, which will be crowded with the stock for the park track at the Trans-Mississippi Exposition next year.

Mr. Bunde, representing J. C. Vaughan, of Chicago, called upon the trade the fore part of the week.

The Nebraska Seed Co. have moved to a new location at 1309 Farnum street, and are putting in a line of cut flowers and plants.

C. G. Anderson, of C. G. Anderson & Co., Atlantic, Ia., came up on business the middle of the week. G. R. H.

Nov. 22, 1897.

Florists' Mutual Fire Insurance Association.

We have received from Mr. W. J. Vesey, 537 Broadway, Ft. Wayne, Ind., secretary of the S. A. F. Committee on Fire Insurance, copies of proposed by-laws of the new association and blank applications for insurance. We hope that the troublesome problem of fire insurance on greenhouses at reasonable rates has at last been solved.

The ability and standing of the gentlemen who have brought about the organization of this association entitle any proposition coming from them to careful and favorable consideration.

The association has been brought to the point of permanent organization by a vast amount of work, of careful consideration and thorough study of the mistakes made by other similar organizations in the past. Many regulations and restrictions, resulting from this careful study, will be presented for adoption. Hasty and ill considered action in rejecting any proposed restrictions looking to the security of its policies and the permanence of its organization, however irksome they may appear on superficial examination, must not be taken, or all the good work thus far done will go for naught.

The Florists' Mutual Fire Insurance Association has the best wishes and most cordial support of the AMERICAN FLORIST.

Special Advertising Cards.

Special designs for advertising cards can be executed through the engraving department of the FLORIST in the most artistic manner, either by best modern types, black and white pen drawings, the half-tone process, or a combination of any of them. Specimens of each class which will be readily recognized by our advertisers will be found in this and former issues. No extra charge is made for such plates where advs. run six months or more and duplicate plates may be had for use elsewhere, as may be desired.

Did You Receive the Special Number?

We wish to hear from every subscriber who did not receive it. Special numbers, especially those with colored title page, frequently disappear after mailing and never reach the party addressed. A number of complaints to this effect have already been received. We have enough extra copies to supply all.

Advance in Price of Glass.

On November 22 an advance of about 10% was made in the price of glass, making a total advance of 30% since August. A representative of H. M. Hooker & Co. summarizes the situation as follows: Only about 5% of the factories are running, because of trouble with employes. These troubles are made more difficult of settlement by reason of disagreement among the men themselves. Glass stocks are very short all over the country and continued and rapid advances are sure, if an early settlement of the labor troubles can not be made.

Chrysanthemums from Marion, Ind.

A box of chrysanthemum blooms has been received from Mr. Carl Anderson, of the National Home, Marion, Ind. Among them we note Eugene Dailledouze in prize winning form. Mr. A. speaks very highly of the keeping qualities of Mrs. G. M. Pullman, stating that blooms sent have been fully open for four weeks; its defective form, however, is against it for commercial purposes.

Chrysanthemum Day in Southern Cemeteries.

The mayor of Knoxville, Tenn., is endeavoring to establish the custom of decorating cemetery lots and graves with chrysanthemums in November yearly. Good idea.

AMERICAN IDEAS will penetrate even into such conservative bodies as the English horticultural societies. An English horticultural journal, in commenting on exhibits of six long stemmed chrysanthemums in vases, at a recent exhibition says: "These, placed in prominent positions in the principal hall produced a delightful effect and created much interest among the exhibitors."

Heating Notes.

It is surprising how little attention is often given by those entrusted with the management and care of the fires in greenhouse boilers, to the proper and economical manipulation of the several draught regulating appliances with which these boilers are usually provided.

Before considering this subject, we must assume that the chimney has a fairly good upward draught, that the ashpit is fitted with convenient means, either by door or slide, for the admission of fresh air under the fire and that the smoke flue is fitted with a check draught of some convenient form. Many boilers are fitted with only a sliding or butterfly damper in the smoke pipe; I do not consider this sufficient for clean and economical firing. A cold air inlet of some kind into the smoke pipe near its connection to the boilers is desirable, with a conveniently hinged cover or door, covering the inlet, which can be opened or closed at will; such as the common "Boston damper" or any convenient modification of same.

For obtaining a bright effective fire, the necessary intensity of which is governed by the heat desired in the greenhouse, two points must be considered, namely, the feeding of fresh air to the fire and the quick removal of the products of combustion, and in many boilers, of the unconsumed coal gas produced by the fire. This unconsumed coal gas would not be present with ordinary firing in properly constructed and proportioned boilers, but unfortunately we find it in large quantities in a majority of the boilers sold for greenhouse use.

After having started the fire, having the ashpit door or slide wide open, the fire door closed, the damper slide pulled wide open and the fresh air inlet to the flue closed, until the fire has reached the desired intensity, the heat should then be checked, first, by reducing the flow of fresh air to the fire, which is done by partially or wholly closing the ash pit door or slide, and afterwards further checking it either by admitting fresh air into the smoke flue by opening the inlet or Boston damper, or where such is not provided, by partially closing the damper slide in the smoke box.

I cannot caution the fireman against the very common practice of using the damper slide in smoke box as the first means of checking the fire, for it results in but a slight and slow abatement of the heat, and floods the celler, shed, and often the greenhouse with coal gas, which result is further intensified by throwing open the fire door. The fire door should be kept tightly closed at all times except when necessary to replenish the fire with fuel, and should never be opened to act as a check to the fire, as when used for such a purpose it not only allows the gas to escape, as above stated, but in allowing a current of cold air to pass over the heated surfaces of the boiler, causes an unusual and unequal contraction of the plates, the strains from which can but be detrimental and destructive to the boiler, and further by deflecting the heat downwards causes an over heating of the grates.

It would not be possible to lay down any set rule as to the distance the several dampers and checks should be opened or closed, these points must be learned by actual observation and experience in each individual case, but the rules to be followed are to check a fire; *first* withhold fresh air from the bottom of the fire, and *then* check draught by partially closing damper slide, or better by admitting fresh air into the smoke pipe; and to increase the intensity of the fire, *first* obstruct the entry of fresh air into the smoke pipe and open damper slide, *then* admit air under the fire.

If these rules are followed, economy of fuel as far as it lies in the fireman's power will be effected, and you will not be troubled by prematurely burned grates or by the flow of coal gas into the greenhouses. A careful fireman will see that the damper slides, door hinges, etc., do not become clogged and obstructed by rust, a little attention given occasionally to the cleaning and greasing of these parts will quickly pay for itself.

HENRY W. GIBBONS.

NORTH EASTON, MASS.—Mr. John McFarland has a violet, a sport from the Farquhar, which has now been in his possession two years, and is remarkable for size of flower, stem and foliage, and general vigor of plant. It is probably the largest double violet ever grown in this vicinity.

Merion, Pa.

About fifty of the leading gardeners of Upper and Lower Merion dined together at Ardmore, Penna., on the 17th inst., to celebrate the successful flower show held by them recently and to talk over the formation of a permanent gardeners' club for their vicinity. John G. Gardner presided. It was decided to organize at once under the title of the Merion Gardeners' Club and M. Benz, Wm. Fowler, Jno. Thatcher, J. G. Gardner and Joseph Hurley were appointed a committee to draft a set of rules and regulations to be presented at next meeting. George Dumont, H. Dougall, Jno. Thatcher and others entertained the company after the special business was disposed of and a very happy evening was spent. Most of those present signed their names to the membership list. K.

FLORISTS WIRE DESIGNS
— AND SUPPLIES. —
ESTABLISHED 1866.
335 EAST 21ST STREET, NEW YORK CITY.

Baltimore.

The show at Mt. Washington was a nice little affair in the Casino, gotten up by the Lend-a-Hand Club, a local social organization. The first prize for chrysanthemums was awarded to Mr. John Barton, second to Mr. M. Sands. Prize for decorative plants was secured by Mr. Wm. McRoberts, Jr. As this was the limit of the premium list it was a wonder that anyone contributed, but very fair stuff was sent by Mr. I. H. Moss, Mr. P. Welsh, Mr. Robt. Graham and Mrs. M. J. Thomas in addition to that sent by the prize winners. At the show in connection with the Y. M. C. A. Bazaar, Messrs. Fisher & Ekas showed a seedling named Miss Emily Wilkens, a very large bronze ten inches diameter about the color of Geo. W. Coles, but perfectly double, slightly incurved and highly built up, with good stems. Another named Joshua Levering was strongly incurved, and of a very peculiar color, what might be called a shrimp pink. Another was on the order of Good Gracious, flat, full, strongly incurved, one sided very large bronzy yellow. The best thing shown by them was an anemone flower fully six inches in diameter, pure white and by all odd, the very best anemone flowered chrysanthemum that has yet appeared. The same gentlemen exhibited Evangeline a pure white erect flower as strongly incurved as Kloto, but much larger. Also Eureka, a large white very much like the last, and Modesto a large globular incurved yellow as deep tinted as Golden Wedding.

Next to Fisher & Ekas came the booth of Montgomery Bros. who had a collection of standard varieties that would haved taken premiums in any competitive exhibition. Better finished Golden Wedding, Niveus, Bonnaffon and Minnie Wanamaker, would be hard to imagine. A single stem plant of Millbrook, with a flower eight inches in diameter, composed of perfect tubes of pink, deep inside, shell tint outside, attracted much attention. Next came a very pretty lot of decorative plants sent by Mr. I. H. Moss.

Mr. Philip B. Welsh who came next had a select lot of chrysanthemums backed by foliage plants. Mrs. Perrin was the very prettiest flower in the lot which is giving it high praise, but for an openly built, full, incurved, flower of a most exquisite shade of clear pink it would be hard to equal. Mr. Welsh had some very well grown plants, among which three of G. W. Childs were especially fine, Queen, Mrs. Jerome Jones, Bonnaffon and Erminilda were all very good. Mrs. Wm. C. Egan, an enormous full, highly built, incurved shell pink, was one of the most attractive among his cut flowers. Mr. Jno. Cook had a large group of palms, rubbers, crotons and aspidistra in the center of the room.

The room which was the supper room of Lehmans Hall, the main hall being devoted to booths of many kinds, was entirely too small for the display and being out of the way, up stairs, and having 10 cents extra charged for admittance, rendered it less a success than it might have been. There can be no doubt but that the spirit of emulation provoked by a large premium list is a great attraction to the outside world, and the number of exhibitors being limited to the five mentioned lessened the variety which was another charm of the shows which have been held by the Gardeners' Club. We must surely have a show of our own next year. There can be no question of it paying under prudent management in cash as well as notoriety. These little side shows make the fact that the public wants a flower show unquestionable.

Trade has been rather better during the week, and although prices have not greatly improved demand for cut flowers is decidedly better.

H. S. Roop has opened a store, corner Eutaw and Fayette street. MACK.

Newport, R. I.

At the regular monthly meeting of the Newport Horticultural Society on November 10th there was a very large attendance to listen to an interesting paper on chrysanthemums by Arthur Griffin. The discussion following the paper was animated and instructive. Seventeen new members were enrolled, including Mayor Boyle.

There was an attractive display of flowers and certificates of merit were awarded to Robert Murray for two vases of chrysanthemums and to Andrew Meikle for orchids; a silver medal was awarded to Arthur Griffin for fibrous-rooted begonias and one to Alex MacLellan for seedling chrysanthemums.

THE SEED TRADE.

OBITUARY.

OLIVER LANDRETH.

Oliver Landreth, of the widely known seed firm of David Landreth & Son, Philadelphia, died suddenly of heart disease on the 20th inst., at his residence on West Walnut street, Philadelphia. Mr. Landreth was born in Philadelphia in 1830, and after graduating from the high school entered his father's place of business, subsequently becoming a member of the firm. He married Miss Linton, of Bristol, Pa., who survives him with two sons, William Linton Landreth and Lucien S. Landreth.

The deceased was a member of the Board of Trade and other business societies in Philadelphia and took an active interest in many social and religious organizations. He served with distinction during the war and during his whole life was noted for his ardent patriotism. He was of an exceedingly genial and courteous personality, and exerted a wide influence in his profession, both at home and abroad. The firm of which he was a member, is one of the largest in the world and is the oldest in the United States, having been founded by David Landreth in 1784.

W. W. RAWSON & CO.'S NEW STORE.

BOSTON.—W. W. Rawson & Company opened their new seed warehouse at 12 and 13 Faneuil Hall Square on Wednesday, November 17. The establishment is centrally located for the transaction of a wholesale and retail seed and implement business and is unique, as compared with other Boston seed houses, in that the retail department is on the ground floor. A great many florists and others visited the new establishment on the opening day, which was prettily decorated with bunting and ornamental plants and all were generously entertained. Mr. Rawson's employes presented him with a fine eight-day clock, as a souvenir of the occasion.

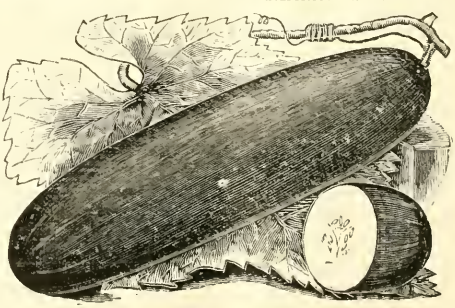
THE third annual reunion and ball of the employes of Joseph Breck & Sons Corporation at Boston was held at Berkeley Hall, the evening of Friday, November 19. Nearly 100 employes, with their friends and families were in attendance.

Government Seed Distribution.

TO THE AMERICAN FLORIST: The present position of the free seed distribution by the government calls for earnest work from all seedsmen in the United States, as all are so greatly interested in stopping the appropriation. There is a certain class of seedsmen who say they sincerely desire the appropriation stopped, but they have not subscribed funds and have done very little toward it except grumble. Some of these seedsmen are accusing the committee and other large seedsmen of want of consistency because they bid to supply the government seeds.

The facts are as follows: The appropriation by the government was made, and a large quantity of seeds had to be supplied, and if the large seedsmen had combined not to offer the government seeds, or had abstained from doing so, it would have been known by many of the smaller seedsmen and they would have rushed in to take the contract, and would have obtained probably twenty to thirty thousand dollars more for supplying the seeds. This would have elevated them to a position which their present status does not warrant, and the declination of the larger seedsmen would have accomplished no good. As a large quantity of seeds had to be bought, it would have been folly to refuse to sell, though they object to the distribution. If their refusal would stop the nuisance, they would be justified in not offering seeds to the government, but as it will not, there is no inconsistency in the matter.

Some of the committee have worked arduously for the killing of this distribution, and have injured their business thereby, but they have been willing to sacrifice their own interests for the good of all.



We ask earnest aid from those who will work to kill this injurious free distribution of seeds, and request them to write at once to the congressmen and senators who represent their states, pointing out the injury that is being done to the seed trade by this appropriation, which was admitted by Gen. Le Duc, who said that "Thousands and thousands of dollars worth of seeds have passed through the hands of members of Congress, and it is safe to say that not a dozen reports have been made that have been available by the department as data." And a recent report of the department said: "A careful review of the department reports during the last decade, in which over a million of dollars have been expended for the free distribution of seeds, fails to reveal a single instance of benefit to agriculture attributable to this distribution."

In addition to writing to their representatives, seedsmen can aid in bringing influence to bear upon newspapers with whom they have spent such large sums in advertising in the last few years, and which is now curtailed through the baneful appropriation. The government is destroying individual enterprise, and teaching the people to depend on the state as a foster mother. Yours very truly, T. WOOD, Chairman.

NEW GREENHOUSE CUCUMBER.
LIVINGSTON'S EMERALD.
For those who grow under glass, or for long distance shipping, it will prove a boon, on account of holding its deep green color much longer than any of either the Yellow or White Spine sorts: In size about one-fourth longer than White Spine, but about same thickness. The skin always a handsome green of the darkest shade—when grown under glass is not excelled for beauty in color and form, even by the English Frame varieties. It is almost entirely free from "warts and spines," so much so that it may be called spineless. No greenhouse grower should fail to try it. Sold only in packets this season.
PRICE (Postpaid)—Packet, 10cts.; 3 Packets, 25cts.; 15 Packets for $1 00.
The CATALOGUE TRADE is invited to list this variety. Terms on application.
A. W. LIVINGSTON'S SONS, Columbus, Ohio.

Pittsburg.

BUSINESS CONDITIONS.—UNIQUE FUNERAL DESIGN.—MR. W. BRIETENSTEIN RESUMES BUSINESS.—MEETING OF FLORIST CLUB.—MR. O. S. HEID GOES INTO BUSINESS ON HIS OWN ACCOUNT.

Business is very fair, considering the unseasonable weather we are experiencing this fall, very warm and exceedingly dry. If we could only have a good soaking rain to help in the country and some cold weather to put a quietus on people staying out doors nearly as much as in summer time, the florists say business would pick up very rapidly, but even with the conditions as they are a good fair trade is carried on. 'Mums are at their best now and can be had in any quantity and at almost any price. Other stock is plenty and good quality without any noticeable change in prices.

Mr. James Dell, 508 Smithfield street, reports business pretty good with him. He has been fortunate enough to have had several very swell wedding decorations lately and these, along with his general trade, enable him to report as above. Mr. Dell arranged a very elaborate funeral design this week. It consisted of a railroad with block signal house and telegraph lines and poles. The chief dispatcher at the Sewickley station, Ft. Wayne road, died, and having filled that position for over 20 years, his friends desired something unique in a design and the above was the result. It was perfect in the resemblance, was over 6 feet long on the base and over 4 feet in height. There were several other very handsome pieces furnished but none so unique in design as this one.

Walter Breitenstein, 541 Smithfield street, also reports business pretty good considering conditions prevalent and confidently looks forward to a good season's business. He re-opened the latter part of September and is satisfied that closing his place during the heat of summer is no detriment to business for the year. This is the second year of his doing so and affords him an opportunity of judging results.

At A. Patterson's, 511 Market street, Mr. Flemm, manager, reports business good and his opinion coincides with all the other florists regarding the present condition of affairs and the main thing required to remedy them for the better.

Mr. Oscar S. Heid, Spring Garden avenue, has commenced business for himself. He will grow a general variety of bedding plants for the present and gradually work into the cut flower trade. He has one greenhouse erected now; it is 100x20 ft. and in addition to it has over 100 hot bed sash 4x7 feet. He will in all probability succeed, as he is well up in the business, is young and energetic. He now has a stand in the Allegheny market. Mr. Heid has a place of six acres, which he says is quite large enough for a beginner.

The Florists' Club is to meet on Thursday, 28th inst., when the committee on flower show is to report. Of course until the club takes action it is not certain what will be done, but the outlook is very favorable for a show being held. Mr. Chris. Reiger will give the club a "talk" on artistic wire working, which ought to be very interesting, as Mr. Reiger is an adept in that line. REGIA.

CHICOPEE, MASS.—The florist business of Mrs. Dexter Snow has been purchased by O. A. Slosser and Isaac Andrews, who will continue business hereafter at the old stand.

BUSINESS QUIET —PRICES A LITTLE STIFFER. —NEW SEEDLING 'MUM, MRS. GRAHAM.— SHOW A SUCCESS IN ALL WAYS BUT FINANCIALLY.

Business continues rather quiet on the whole with most of the stores, although one or two report trade as fair. Flowers have been plentiful and cheap, although during the past few days there has been a better feeling and a slight stiffening all around owing to the near approach of Thanksgiving as well as the fact that the chrysanthemum season is now over its worst period of overstock. Indeed, instead of a glut there has been during the last day or two some inquiry for good stock which now can command about $1.50 per dozen instead of a grin of derision for the would-be seller.

In going over the report of the show, it appears that no mention was made of a new seedling shown by H. Tong of Erie, Penn. It is a very large, well built flower, white, with a pinkish tinge to it that in many ways suggests kinship to our old friend Pres. W. R. Smith. It bore a label inscribed with the name of President Graham.

At the club meeting on Monday evening reports and bills from the late show came in as to the quantity and quality of the exhibits there can be no complaint. The stock shown was of uniformly high class in all departments. The exhibition was better advertised than any previous one. The weather, barring only the first day, was as good as any one could possibly hope for in November. The fact remains that the club must go deep down into the old sock and produce the necessary simoleons to make good the deficit, owing to the light attendance. In looking back there does not appear that there was any mismanagement or neglect in any essential particular, so to the public belongs the blame. The only consolation is that according to reports from other cities, there are a number of other pebbles about on the same beach. A.

Lancaster, Pa.

Messrs. Landis & Co. have dispensed with their retail department, intending to confine themselves to their wholesale trade exclusively. Goldbach Bros. formerly connected with Messrs. Landis & Co., have bought out and taken charge of the retail store. Messrs. Goldbach Bros. are well and favorably known in this and in surrounding towns, and with the general improvements in trade circles they have certainly embarked in business under the most auspicious circumstances. HOMO.

Montreal.

The committee who had charge of the chrysanthemum show spared neither pains nor expense to make their tenth annual chrysanthemum show ahead of all its predecessors. The only thing they neglected was to arrange with the clerk of the weather for a continuance of what we were having, for three days longer. The result was that on Tuesday morning a regular "Klondike" snow storm set in which continued for 24 hours straight, by which time there was about a foot of snow on the streets, so though Wednesday was fine overhead very few people ventured out on account of the state of the streets. Thursday the closing day was a repetition of Tuesday, snowing all day; so, under the circumstances, it is not to be wondered at, that the attendance was very slim, I believe the smallest on record. The display of plants and cut flowers although not quite so large as last year, was excellent and in quality ahead of anything ever seen here before. The four lots of 24 blooms each, staged by T. McHugh, G. A. Robinson, Wm. Wilshire and W. Harobin were really magnificent. Among Mr. McHugh's lot were several new French and English varieties never seen here before, among which was Mrs. Henry Weeks an extra fine flower, it was a perfect globe over seven inches in diameter and of the purest white. I regret that I cannot give a list of the other varieties, having mislaid my notes.

In the class for 12 specimen plants Messrs. Robinson and C. A. Smith put up two magnificent dozens, Mrs. Perrin, l'Enfant de deux Mondes, Ivory and Pink Ivory being very well done, a plant of the last mentioned being four feet through. A plant of Mrs. Perrin got the diploma for the best plant in the show.

The 6-inch pot plants were very well done by the same two gentlemen, in the class calling for not more than three blooms on each were some magnificent flowers.

The display of roses was rather smaller than usual, but in quality was all that could be desired. Mr. Bennett led easily right down the list.

The display of carnations was rather poor, Walter Wilshire showed a vase of his new white which was very much admired. It is a cross between McGowan and Haettel with the erect habit of the former and the form and perfume of the latter. In made up work there was not much competition, Messrs. Wilshire Bros. leading in every section.

The table of orchids put up by Wm. Wilshire was of rare excellence, also a bunch of Barbarossa grapes by the same grower was very much admired.

Two magnificent banks of palms and foliage plants were put up by Colin Campbell.

The special feature in the way of decoration was an immence four arch grotto, twenty feet high, in the center of the hall, composed of palms, foliage plants and chrysanthemums, and the under part of the arches covered with asparagus and bitter sweet berries. Also there was a Japanese flower booth formed of a Japanese umbrella 15 feet in diameter, under which three young ladies in "Geisha" costume sold 'mums and distributed smiles.

A Japanese fan dance and tableaux was put on the stage each evening by a company of 18 amateur young ladies in full Japanese costume. A first-class orchestra was also in attendance every evening.

BEAVER.

Novel Flower Show Attraction.

At Galesbueg, Ills., the culminating feature of a floral exhibition at the Pillsbury greenhouses, was the wedding of a young couple which took place in the midst of the exhibits at the close of the show.

The special inducements offered were superb floral decorations and the marriage license and ministerial services free, besides a large and interested crowd of witnesses.

Peoria, Ill.

Cole Bros. have rebuilt four of their houses, making each 20x100. Messrs. Cole Bros. are exceptionally successful with their roses and carnations.

Florist Schaaff has disposed of his business being now at Gen Oak Park.

Mrs. M. Cation has removed her flower store from 405 Main street, having found more commodious quarters on Adams street next to the opera house.

Mr. Jas. C. Murray reports a brisk trade all along the line. HOMO.

RICHMOND, IND.—Beach & Co. have built three additional houses, each 22x65. Two of these are intended for carnations and one for palms.

Mt. Kisco, N. Y.

The third annual flower show of the New Bedford Flower Club, under the management of the Westchester County Horticultural Society, was held on Tuesday and Wednesday, the 9th and 10th inst. The exhibition, which was under the superintendency of Herbert Spavins, was most creditable, and taken as a whole was a decided improvement over its predecessors, the general average of flowers and plants being better and the number of individual exhibitors larger.

W. A. Manda and John Shaw were the judges. The keenest competition was for the Balley prize, a cut glass vase, valued at $40, offered for the best 25 chrysanthemum blooms. It was won by J. D. Layng (P. J. McDonald, gardener), and the James Wood silver cup, for second prize, went to J. B. Dutcher (A. L. Marshall, gardener). A. Brill, gardener to Miss M. B. Monahan, won the Carpenter silver cup, for best collection of cut blooms, J. Dutcher being second here also.

Other large exhibitors in the cut flower classes were, M. J. Green, gardener to Jas. Wood, Mrs. J. W. Brown and Charles Weise, gardener to W. W. Lord. All the above mentioned exhibitors were also prominent in the plant classes, the Curry cup, for best collection, going to J. D. Layng.

The Male cup for collection of roses was won by J. D. Layng. In the class for collection of decorative plants, the first prize, the Turner cup, was won by Doyle Bros.; the Layng cup by J. B. Dutcher, and Herbert Spavins was awarded second prize. The Sutton silver cup, for collection of ferns, was won by Herbert Spavins.

J. B. Dutcher, W. W. Lord, Doyle Bros., J. D. Layng, Clarence Whitman and James Wood made attractive displays of carnations, and in the miscellaneous classes, geraniums, begonias and cyclamens were shown by a number of exhibitors.

The amateur classes were well filled, the silver cup offered by Dr. Carpenter for best collection of decorative plants grown by an amateur, being awarded to J. H. Crane. Non-competitive displays of palms and decorative foliage plants was made by the Kensico Cemetery Company and by F. R. Pierson Company.

Erie, Pa.

Mr. Henry A. Niemeyer has recently added two more carnations houses to his already extensive plant and has extended one of his palm houses about 40 feet. I need hardly add that Mr. Niemeyer never does things by halves and that his recent addition is fully up to the standard in greenhouse construction.

Mr. John Trost has put the last finishing touches on his new houses and is now fully equipped to do business at his new stand.

Business is decidedly improving.

HOMO.

WESTMINSTER, MD.—Mr. J. Grattan Doyle has just completed a new carnation house 18x125. He has also built a dwelling, attached to his rose houses, and is heating both greenhouses and dwelling by steam.

ELLIS & POLLWORTH, Milwaukee, Wis.

Worcester, Mass.

MEETING OF HORT. SOCIETY.—VERY LITTLE CHANGE MADE IN OFFICERS.—TRADE IMPROVED CONSIDERABLY.—H. F. A. LANGE IS HUNTING CARIBOU.

The annual meeting of the Worcester County Horticultural Society was held on November 3, 1897, with a large number of members in attendance. Very little change was made in the officers and committees. O. B. Hadwen, who has just completed his fiftieth year as a member of the society, was unanimously re-elected president, and Stephen Salisbury, George E. Francis and James Draper were re-elected vice-presidents; Nathaniel Paine, treasurer, and A. A. Hixon, secretary and librarian. But slight changes were made in the board of trustees and standing committees, and George McWilliams was elected judge of plants and flowers. Henry E. Rich on fruit, and Chas. Greenwood on vegetables. Some changes were made in the by-laws.

Trade has improved considerably during the last ten days, and everything is moving fairly well. 'Mums are a bit overplentiful, but not alarmingly so. The supply of carnations, roses, violets, etc., is about right to suit the demand. The first Romans are in.

H. F. A. Lange is up in the provinces after caribou. A. H. L.

LENOX, MASS.—At the last mening of the Lenox Horticultural Society, Messrs. Huss, Wingett and Northern were appointed a committee to prepare resolutions on the death of Miss Isabel, daughter of William Henry.

Every piece well BERRIED, $2.00 per bbl.; $15.00 per 10 bbls.

BAKER BROS.,
FORT WORTH, TEXAS.

Plant Market.

A number of plant growers, both from New Jersey and Long Island, have met and discussed the advisability of forming an Association for the purpose of engaging a large part of the Clinton Market building as a permanent Plant Market. To better enable the committee to formulate plans, the meeting was adjourned in order to enable growers who were not present to become interested.

The next meeting will be held at Lynch's Restaurant, Cor. Canal and West Sts., New York City, Wednesday, December 1, at 7:30 P. M.

Reply to Query.

The AMERICAN FLORIST stated in a recent issue that to raise large 'mums one must use rotten cow manure and nitrate of soda, but man must be some kind of a chemist. Not being a chemist will you please state in your next issue how much manure and soda is required to one barrel of water. GEO. A. BAILEY.
Virginia.

For cow manure in liquid form we use fresh manure about half bushel to barrel of water. By using the Kinney pump this gets diluted one-half, we fill up barrel three times without changing manure.

We had some difficulty in using the Kinney pump owing to particals of manure getting in and clogging up the hose. To avoid this we made a cylinder of ordinary chicken wire netting that reached from bottom of barrel to the top; inside of this we placed another cylinder of mosquito bar. In this we put manure. The chicken wire gives strength and the mosquito bar prevents any manure getting into the hose. We make the cylinder one foot in diameter and it can be lifted out of barrel and replaced again very easily.

Nitrate of soda we use one pound in 50 gallons of water. GEO. STOLLERY.

Moosic, Pa.

Mr. Wm. McDonald has rebuilt and enlarged two of his carnation houses and has somewhat overhauled his entire plant.

About a year ago Mr. John Palmer, of Scranton, Pa., and Mr. McDonald formed a partnership under the name of Palmer & McDonald, and have opened a flower store on one of the principal thoroughfares in Scranton. HOMO.

COLUMBIA CITY, IND.—Miss Ida M. Lore has lately purchased the retail establishment, formly conducted by Mrs. S. A. Amerman and will grow roses, carnations and miscellaneous stock.

Flower Shows East and West.

ED. AMERICAN FLORIST: As I have had the pleasure of attending both the Boston and Chicago chrysanthemum shows, I will, at your request, endeavor to give you my impressions of the latter as compared with the former. I was much pleased with the general excellence of the Chicago exhibition and the way in which many objectionable features about the hall were overcome. They had a very large space to fill and the managers are to be congratulated upon the way in which the exhibitors responded.

Owing to the comparatively limited space in which the Boston show must be made, many of the exhibits that helped the Chicago show greatly, such as the palms, ferns, geraniums and the table decorations, could not be accommodated. As a chrysanthemum show, pure and simple, yours undoubtedly falls behind, not so much in quantity as in the general finish and the excellence of the flowers from certain growers.

The Massachusetts Horticultural Society is an old and well-established concern, and they have made exhibitions their business for many years. They have spared no expense which long experience has taught them is necessary to the accomplishment of a first-class, finished exhibition. This, with the friendly rivalry existing between the growers, has given them a high degree of excellence which seems to be seldom attained elsewhere.

It is in the matter of detail in which I noticed the greatest difference between the two exhibitions. The Massachusetts Horticultural Society believe that their exhibits of flowers should be presented in as tasty a manner as though they were to be used in some parlor or drawing room, and they, fortunately, have been able to spend much money in providing suitable vases for this purpose. Their small ones are all of clear glass of an artistic pattern, and their large ones are either glass or porcelain. This is an important consideration, as the effect of fine flowers is materially injured by being shown in unsuitable receptacles. Another thing which tends to make their exhibitions more attractive is the manner in which they cover their tables, that is, with white cloth on the sides and white paper on the top. It gives the exhibition a much more cheerful appearance and does not conflict in any way with the colors of the flowers.

Another matter of importance is the manner of staging flowers, and the Boston exhibitors have learned, what also must be learned sooner or later by exhibitors everywhere, that it pays to be particular about the arrangement of their flowers. It is not sufficient that the flowers be cut and simply stuck in vases, without reference to length of stem, the alignment of the blooms, when shown in specimen bloom classes, or the combination of colors. Many in departing from the old exhibition board system of showing flowers have gone to the other extreme and cut their stems much too long. This is a great mistake, for the flowers not only do not keep well but have a very untidy appearance. One flower will perhaps look you in the face while another will present a back view, and still another will be trying to hide itself beneath its neighbors, and so on through the entire collection. In this class of exhibits no flower should show more than one foot above the vase, and that in the rear row; the other rows in front should each be a little lower than the one immediately back of it, and the largest flowers should always be placed in the back rows. In large vases of blooms the long stem is another matter, and should, of course, be in proportion to the size of the vase.

Another difference which seemed to me to be slightly in favor of Boston, was in the variety of classes. While there were not so many as would seem desirable, the few they did get gave more variety to their show than was noticeable at Chicago. The Massachusetts Horticultural Society offers prizes in all the different classes of chrysanthemums with the object in view of keeping alive the interest in the many curious and beautiful varieties that are overshadowed by the giant Japanese kinds. Where the schedule does not designate any particular class, these monstrous blooms are sure to make up all the exhibits. The contrast offered by these other classes is very pleasing and is sure to attract the attention of visitors.

In plants, several of the Chicago specimens were equal to the best shown in Boston, but averaged smaller. The manner of staking practiced by some of the Chicago growers seemed to me to be an improvement upon that in use about Bos-

ton, the plants having a much lighter appearance, but their severely trained specimens would not be well received there. I was very favorably impressed with the management of the Chicago show, and Boston might learn some points to its advantage from there. Under continued wise management the Chicago chrysanthemum show should become the most important in the country, for the location is so central that they should have a very wide circle of contributors, and great numbers of novelties and seedlings are sure to be shown there.

I surely should not close this letter without making special mention of the magnificent collection of geraniums, which took all the first prizes at Chicago. They were marvelous, and the grower of them should have suitable recognition for his cultural skill. If such specimens could always be had at our exhibitions the geranium would never cease to hold the place it occupies in the estimation of the people. A. H. FEWKES.

Newton Highlands, Mass.

Chrysanthemums.

Chrysanthemums for 1897 will soon be things of the past. It will profit us to review and deduce what lessons can be learned from experience of the past year.

It seems to be generally admitted all over the country that the days of fancy prices have passed, yet there is great satisfaction in knowing that so far as this market is concerned a fair price can be obtained for extra good stock. The aim therefore must be to produce this stock and right now is the time to begin.

Go over your list of varieties throwing out any and all that have proved unsatisfactory. It don't pay to fool with them while there are a large number of others that are satisfactory. If you have tried any novelties and they have proved to be wanting in some quality that makes a good cut flower don't make too many excuses for them. Our experience has been that a variety that proved unsatisfactory the first year very rarely does much better the second. It is very interesting to note that such varieties as Mayflower, Bonnaffon, Mrs. Jerome Jones, Yellow Queen, Golden Wedding, etc., varieties that are old as chrysanthemums go, still are ahead of the newer kinds as is witnessed at the exhibitions.

After deciding what you intend to grow, take up the stock plants and give them the coolest and lightest house possible.

According to reports of the chrysanthemum committees, novelties will not be so plentiful next season, for which let us be thankful. What we really are in need of is a good pink (midseason). For want of a better we have to fall back on Maud Dean, a variety that would be all that could be desired if it would keep its eye closed. Can't some of our hybridists close that eye? There is money in it for him that does. Good whites and yellows are over abundant. G. S. Kalb is in our judgment the best introduction in whites for 1897, coming in early it fills a much needed want? I think that Elvena will will make a good companion in pink. Mayflower for Midseason fills the bill completely when grown as it was exhibited at the recent show. Modesto for yellow is a very fine color, but its stem is against it and it must take a back seat to Major Bonnaffon. Some of the novelties that promised good things in 1896 have proved disappointing. Evangeline that beautiful white has been especially so, the flowers spot before they are finished; it also has a bad habit of dropping its petals. Western King another promising white has been a disappointment owing to its poor growing qualities; this may possibly be overcome by care in selecting stock.

G. STOLLERY.

Chrysanthemum Modesto—Outdoor grown.

In the extreme south, on the gulf coast, interest in chrysanthemums has increased during the past season rather than diminished. Most of the new varieties have been tested under such conditions as the climate affords, and usually in the open garden. It is astonishing how few of them stand the test and are able to bring their flowers to perfection. Sundew and Mrs. H. Weeks probably gave the best results of last year's introductions. Modesto is by far the best variety sent out in recent years and the treatment is simple, with almost certain results.

The flowers shown in the illustration were grown in raised beds in the open air and protected against weather after the buds began to show color. The scale shows the size. They measured, average, twenty-two inches in circumference, with the tape measure drawn closely around them and could have been shown with five feet of perfect foliage and able to stand without support. The leaves were of the richest green and nine to ten inches long. The south suggests Modesto as the king of yellows.

Chicago Chrysanthemum Committee.

The chrysanthemums before the Chicago committee, November 27, were Wm. H. Chadwick, from Grove P. Rawson, Elmira, N. Y., inc. Jap., pearly white, inside of petals suffused with pink, giving it a beautiful coloring much the same as found in the Carnot rose. In style of flower it resembles Mrs. Jerome Jones, but full to the center, stem and foliage grand. President Chadwick, of the Horticultural Society of Chicago, who was present, seemed much taken with this variety, named for him.

Mrs. Wm. B. Brown, from Theo. Bock, Hamilton, O., is a Chinese, color white, somewhat after the style of Mrs. L. C. Madeira, incurved, pointed petals, slightly tipped with green, giving it a rather dull appearance and hardly up to the standard of other fine whites in commerce today. The stem and foliage are good for the size of flower.

Cincinnati Chrysanthemum Committee.

Six seedling 'mums were presented for the inspection of the committee Saturday, November 20, and while the number shown was one of the largest of this season, the quality was certainly the least desirable. The only one of the set that scored the necessary number of points to secure a certificate was Mrs. C. H. Peirce, exhibited by Fred. Dorner & Son, Lafayette, Ind. The blooms arrived in good shape; flower a bright yellow, size medium, petals straight, similar to Lincoln.

E. G. Hill & Co. exhibited two vases, as also did Nathan Smith & Son, Adrian, Mich. One of the best on the table was Mrs. Wm. B. Brown a delightful pure white flower, globular, size medium, stem bold and foliage up to bloom; good for commercial and exhibition purposes. This gives promise of being a valuable variety. Theo. Bock, of Hamilton was the exhibitor. H. SCHWARZ.

Chrysanthemum Notes.—Philadelphia.

Three new candidates for public favor lined up for examination last Saturday. One from Reading, forwarded by Ferdinand Heck, gardener to George F. Baer, Esq., is a sport from that grand old variety, Mrs. Jerome Jones, and appears to resemble it in every way, excepting in color which is a sulphur yellow. Mr. Heck has a prize sure in this variety, especially if it possesses the sturdy constitution of its parent, and we are assured by the originator that it does.

Grove P. Rawson, Elmira, N. Y., sent on his creamy white incurved Japanese variety, "W. H. Chadwick." In color, petalage and form it was fair, fullness, size and stem, good.

Wm. K. Harris exhibited one which he has named "Our Dear Friend," presumably because he believes it to be a money maker. It is beautifully incurved and fine in form, with excellent petalage, making it a good one for shipping, good in size and color.

Thus endeth the chrysanthemum season for 1897, that is to say, as far as the C. S. A. is concerned; though I suppose if any person has what he thinks is a good enough one to entitle it to a certificate and give the committee ample time to meet, they will deliberate over it and award points according to its merits.

There appears to be a falling off in the number of chrysanthemum seedlings this year in this city. Many of the old standbys who have done good work in the past did not exhibit at all, so far as I can learn, during the present year. The price paid for seedlings with the control of the stock for dissemination, is not so good as it was at one time, and this may in a measure account for the number shown having fallen off. Ten or a dozen first-class new varieties is enough.

I was pleased to see President Wood come out in the last issue of the FLORIST, explaining the course of the Chrysanthemum Society, and it is to be hoped that everybody is satisfied now.

PHIL A. DELPHIA.

Work of the Chrysanthemum Committees.

Since last report the following seedlings have been examined:

CHICAGO, November 20.—Mrs. C. H. Peirce, exhibited by F. Dorner & Sons Co., La Fayette, Ind., Jap. deep yellow, commercial scale 90. Stellata, exhibited by Nathan Smith & Son, Adrian, Mich., Jap. ref. yellow, commercial scale 83. Rustique,

same exhibitor, Jap. inc., light bronze, commercial scale 85. Merza, same exhibitor, Jap. inc. white, commercial scale 85. Madison, exhibited by E. G. Hill & Co., Richmond, Ind., Jap. inc. bronze, commercial scale 79. November 27.—Wm. H. Chadwick, exhibited by Grove P. Rawson, Elmira, N. Y., Jap. inc. pearly white, commercial scale 93. Mrs. Wm. B. Brown, exhibited by Theo. Bock, Hamilton, Ohio, inc., white, commercial scale 78.

BOSTON, November 20.—Arline, exhibited by Nathan Smith & Son, inc., white, commercial scale 87; exhibition scale 90. Thornden, same exhibitor, Jap., deep chrome yellow, commercial scale 92; exhibition scale 94. Mrs. C. H. Peirce, exhibited by F. Dorner & Sons Co., Jap., bright yellow, commercial scale 91. November 27.—Wm. H. Chadwick, exhibited by Grove P. Rawson, Jap., inc., white, commercial scale 92; exhibition scale 93.

PHILADELPHIA, November 20.—Spottswood, exhibited by Robt. G. Carey, Chestnut Hill, Phila., inc., commercial scale 91; exhibition scale 88. Minnewaska, exhibited by John N. May, Summit, N. J., Jap., pink, commercial scale, 81; exhibition scale 77. Dolores, same exhibitor, commercial scale 84; exhibition scale 83. Mrs. C. H. Peirce, exhibited by F. Dorner & Sons Co., inc., yellow, commercial scale 90; exhibition scale 87. November 22.—Wm. H. Chadwick, exhibited by Grove P. Rawson, Jap. inc. blush white, commercial scale 89; exhibition scale 89. Sport from Mrs. Jerome Jones, exhibited by Ferdinand Heck, gardener to Judge Baer, Reading, Pa., Jap., inc., light yellow, commercial scale 90; exhibition scale 90. Our Dear Friend, exhibited by W. K. Harris, Philadelphia, Pa., Jap., inc., canary yellow, commercial scale 89; exhibition scale 88.

NEW YORK, November 27.—Wm. H. Chadwick, exhibited by Grove P. Rawson, Jap. inc., white, commercial scale 86.

CINCINNATI, November 20.—Arline, exhibited by N. Smith & Sons, Adrian, Mich., inc., white, commercial scale 84. Rustique, same exhibitor, bronzy yellow, commercial scale 73. Mrs. C. H. Peirce, exhibited by F. Dorner & Sons Co., Jap., ref. yellow, commercial scale 87. No. 169, exhibited by E. G. Hill & Co., Jap., inc., white, commercial scale 81. Wm. B. Brown, exhibited by Theo. Bock, Jap., inc., white, commercial scale 84.

Stelleta was exhibited as Clio, the change being made to avoid a clash with Clio exhibited this season. Thornden was shown as Golden Gem. This change became necessary as the latter name has been applied to a chrysanthemum. In last report No. 111 (Bessie Hollis), shown at Chicago, should have read 83 inttead of 87 points.

ELMER D. SMITH, Sec'y.

NEW CHRYSANTHEMUM WM H CHADWICK

Impressions of Eastern Floriculture by a Western Florist November, 1897.

A prominent western florist returning from a three week's trip through the east tarried long enough in Chicago to give a few rough notes of his sight seeing.

In the vicinity of Boston nearly all the growers seem to be devoting their best efforts to producing a large stock of the Boston Fern and as the result, there is almost no stock in sight of 4 inch size or larger, everything having been sacrificed in the effort to produce a large quantity of 2-inch stock. This stock is grown here entirely in the benches—very little stuff being seen in pots—and possibly it may be due to this that western purchasers have had occasion to find fault with the condition of the stock received. The growers all through the Cambridge district seem to be having a good retail trade in addition to their wholesale orders for the fern. At "Little Woodie's" I saw the only plants of Flora Hill growing with good stiff stems.

At Beckert's place there was a fine lot of Azalea Simon Mardner and Deutsche Perle which were in fine shape for Thanksgiving, being an unusually fine lot for so early in the season. Mr. Beckert is likely to surprise the Boston florists with Von Sions at Xmas. At West Newton, Mr. E. J. Wood is growing Flora Hill in exceedingly good shape, the stem being stronger than seen elsewhere. He has some very promising seedling chrysanthemums which we will likely hear from later.

At Brighton, Elliott's asparagus house was of course a point of special interest. He grows the plants until they are four or five years old before renewing although the older ones show considerable naked growth at the base before throwing out fronds. In order to get a good light in his house he cuts three rows of strings and lets the next three grow, in this way giving openings to the bed for the light. He has a fine lot of Bougainvillea Sanderiana in 6 or 7-inch pots which will undoubtedly bring him good money next Easter.

At Queens, L. I., C. W. Ward's houses are a delight to all visitors. His carnations are looking exceedingly well. New York is a promising new one of good size although not the largest. The stem is strong and long and color clear, being between Scott and Daybreak. From the appearance of the plants in the benches this is likely to prove a very free bloomer and is certainly a new variety of great promise. Maceo is another new variety which will probably attract a good deal

of attention on account of its color. It is very dark—considerably darker than Meteor—and yet the color is pleasing. The size is only medium and the stem not long but it is such a distinct class by itself that there will doubtless be a demand for it. White Cloud is a fine white of large size but from appearances is not going to be a very free bloomer. John Young, another one of Ward's new ones, is a good white not so large as White Cloud but with a long strong stem and every evidence of being a very free bloomer.

Julius Roehrs at Carlton Hills is growing orchids in large numbers; and must be preparing to supply nearly all New York with valley from the appearance of his houses. At this place they are growing a large number of diminutive azaleas for florists use in working up baskets of flowers and they will doubtless prove exceedingly useful. From the appearance of the orchid house Mr. Roehrs must be making money if any one can make money out of orchids and the report from all orchid growers is that there is a demand for everything they can get.

At Tarrytown, the principal feature of Mr. Pierson's place is his stock of Pandanus Veitchii. It would be hard to imagine anything finer than the color he has in his plants of medium size.

At Summit, N. J., Mr. May is growing Lily Dean to perfection. Could others grow this variety as he does it would be hard to beat. The rose Clara Watson is being grown quite extensively by Mr. May and is surprising him as well as others by its very vigorous growth. Nothing on the place except Beauty is growing so strong. All the stock on this place justifies the very high reputation which Mr. May holds.

At Philadelphia one is perhaps most strongly impressed by the spirit of good fellowship which exists among the florists and on the contrary there seems to be an entire absence of this feeling in New York and this may account in a measure for the chilly atmosphere at the N. Y. Flower Shows. Mr. Robert Craig has as usual a large stock of palms in all varieties and all in fine condition. His stock of crotons are especially attractive. A number of these were planted at the best season on Mr. Craig's lawn and made a very fine display. They were brought in early and seem to rather enjoy the treatment they have received. Mr. Craig is preparing to furnish Crimson and Yellow Rambler in large numbers for Easter. His stock of Asparagus Sprengerii is especially fine. He is growing Livistonia rotundifolia planted out in benches and seems to be having good success with it. I may also add that Mr. Craig is one of the few men who succeed in carrying over azaleas. His carried over stock looks much finer than that recently imported.

Wm. Craig has a fine lot of Boston Fern in 6 to 7 inch pans which he is selling at $2 each and which he ought to find profitable at that price, but the scarcity of these sizes ought to enable him to dispose of the stock with little difficulty. He has a wire carnation support which has many points of excellence to recommend it, not the least of which is its low price. At Lonsdale and Burton's, Beauties are being grown in solid beds and seem to be doing well. The blooms which they are shipping are certainly hard to beat though neither of these gentlemen speak very confidently about the wisdom of this manner of growing. They seem to look at it still in the nature of an experiment. Mr. Burton is bringing on a fine lot of Brunners for Christmas.

Mr. Redfield, of Glenside has an unusually nice stock of 2-inch ferns in variety. He seems to be a very successful grower in this line and seems to find it profitable. They appear to have some trouble here and in fact nearly everywhere with Pandanus utilis.

At H. F. Halle's, West Madison street, Chicago, I saw the most artistic window, barring Thorley's, of the whole trip.

take lots of water and need looking over two or three times a day, and by the middle of August they will be ready for the final shift into 10-inch pots, using a little heavier and richer soil at this potting. Also pot good and firm or they will get away from you and become straggling. After the pots are well filled with roots use a weak application of liquid manure

GERANIUMS—CHICAGO SHOW 1897. GROWN C. W. JOHNSON

Geraniums.

If we want to have good specimen plants of the geranium, clothed with luxuriant blooms and foliage, the most important point to be considered is to keep them in steady growth all the time from start to finish. If they are wanted for the fall chrysanthemum shows choose clean healthy stock from 4-inch pots about the middle of May. Shift them up into 6-inch pots, using a good rich light compost, and see that the pots are well drained. Place in a light airy position where they can get the full benefit of the sun as near the glass as practicable, to insure a nice stocky growth. Water rather sparingly. I find it better to keep them a little on the dry side than too wet. Remove all buds as they appear and pinch out the ends of the shoots every little while to keep them dwarf. If they are getting the proper treatment they will be making very rapid growth in a little while and by the middle of July, will be ready for another shift into 8-inch pots, using the same soil as before. Pot rather firm but do not pound the soil. They will then require but little attention for a while except to remove any yellow leaves and see that they are not neglected in regard to water, for at this time they about twice a week, but do not apply when the soil is too dry; in which case give them a watering with clear water first. If the plants are wanted for the first week in November allow the buds to come about six or seven weeks previous to this and keep in a dry temperature of about 52° at night with plenty of ventilation on all favorable days.

C. W. JOHNSON.

Carnation Notes.

The weather is getting now so that the proper carnation temperature can be maintained, and should be as even as is possible, as that is essential in producing fine carnations. We keep a night temperature of from 52° to 54° on all our carnations, with the exception of Daybreak, which does best a little cooler, and Lizzie McGowan seems to do best with a night temperature of about 55°.

On bright days raise the ventilators a trifle, as soon as the temperature reaches 60° from the sun shining on the glass, raising them gradually as the temperature rises until on bright days the normal temperature of 70° is reached without any artificial heat, though it is better to have a little steam running through the

STORE OF F. EDWARD GRAY—LOS ANGELES CAL

pipes to prevent any cold draughts.

Lower the ventilators the same way as the temperature falls, and have them closed by the time the temperature reaches 58°, when steam should be turned on to prevent a sudden fall. Never let your houses go below a night temperature before turning on steam. On dull and murky days keep a temperature of 60° with a crack of ventilation.

We are now approaching the holiday season and the extra prices obtained for the flowers at that time tempt many to run their carnation houses with a higher temperature to get a big cut at that time, but this is a serious mistake, as the result of the few extra blooms at Christmas will be weak stems and small flowers for some time after, not counting the injury to the plants which the unnatural temperature causes.

If fumigating is the means used for keeping down greenfly, do it lightly and often, for if greenfly once gets a foothold in the young growths it is a hard matter to rid the plants of them, but always fumigate *after* the flowers have been cut.

WALLINGFORD, CT.—The greenhouses of Geo. H. Rowden were burned on the morning of November 24. The establishment was practically ruined and the loss on buildings and stock is estimated at $5.000. The origin of the fire is unknown.

Cypripedium Charlesworthii.

The subject of the accompanying illustration has worked its way into the hearts of orchid lovers on account of its distinct and beautiful character. It does not appear to have created quite the sensation that the one which seems to be its nearest relative in habit of growth enjoyed, namely C. Spicerianum.

In conversation a short time ago, respecting the subject of this sketch, Mr. Alfred Dimmock stated in relation to its history as to its probable discovery briefly as follows: "A gentleman in Bradford, Yorkshire, England, had a brother prospecting in the Stan States, East Indies, and discovered the plant in his travels, and being interested in orchids was much struck by its wonderful diversion from any cypriped known to him. He dispatched a few plants home to his brother, which were afterward purchased by a wealthy merchant named Charlesworth, with whom they eventually flowered and were exhibited by this gentleman in London, creating considerable amount of excitement, especially as it differed from any species hitherto introduced from the tropics. Its popularity was soon established and its native country divulged, so much so that such large importations have found their way to Europe that today wherever cypripediums are grown in any quantity Charlesworthii may be found."

I find in the *Orchid Growers' Manual* (Williams) that this striking cypripedium was exhibited before the Royal Horticultural Society on September 26, 1893, by Messrs. Charlesworth, Shuttleworth & Co., so that it has not been so very long in cultivation, for an orchid. Its resemblance in growth to C. Spicerianum has frequently been commented upon by orchid experts and some have gone so far as to say that Spicerianum *may* be one of its parents and that collectors are on the *qui vive* to find the other parent. The formation of the flowers of each of the varieties is, however, very distinct from the other. It is apparently a variety easy to manage, though at one time I was not inclined to think so, and because I have had occasion to change my mind is the main reason why this is being prepared for the AMERICAN FLORIST.

I had an unfortunate experience with it last year, so bad did the plants look that I was afraid I would lose the whole lot. The leaves were so thoroughly affected with spots which destroyed the tissue so effectively that the plants became an eyesore. They were growing, or rather barely existing, in a shady palm house, where the temperature would frequently be as high as 65° at night in

the winter time. On this disfigurement of the leaves becoming so manifest, I attributed it to some fungous disease and sprayed the plants with copperdine; this killed the growing sphagnum completely. The plants were removed to a rose house where the temperature rarely reached 60° at night and they were subjected to more light and air. After what seemed to be a long time the plants began to show signs of improvement, and they have continued to improve ever since. We have now come to the conclusion that the spots upon the leaves are not the result of fungous disease but that of an orchid insect. In the house where they are growing we have evaporating pans attached to the steam pipes and in these pans we put liquid tobacco for the purpose of killing the green flies (aphis), and no doubt the vapor from the nicotine is responsible for the death of this insect which appears to be peculiar to orchids. We have found the little fellow and we believe him to be a species of beetle. The next chap we capture will be submitted to an entomologist just to find out where he shall be placed.

The plant which we had photographed, and from which the illustration is made, was growing in a 3-inch pot. There are few varieties of cypripediums which will produce five flowers at one time in so small a pot. I do not know of any other that will bloom so freely. To those who have not seen flowers of this species, the dorsal sepal is broad and flat, two and a half inches wide, in color rosy pink veined with white, pouch brown—petals are also brown. In a batch of plants received before they have flowered will be found many variations from the above description. Some have self-colored rosy purple sepals and darker brown prevails in other parts of the flower, and I have one which I prize very highly. This has a delicate pink dorsal sepal and yellow pouch. Some of the plants we have here have produced somewhat short stems, so short that some of the retail florists have complained about them on that account. We hope, however, to remedy this defect when we have given our different method of treatment a more extended trial, for we notice indications of longer stems coming on the plants which have bloomed later and are on the stronger growths.

It is of interest to note that Carl Blomberg, gardener to Oakes Ames, Esq., North Easton, Mass., sent one hundred flowers of this cypripedium to the American Institute show recently held in New York, among which were a number of different varieties, including one bloom of the variety known as C. Charlesworthii unicolor. Does not unicolor belie its name? It is *not one color* any more than the other varieties, but it has a much smaller pouch and the pouch is darker than the type. Who can explain why it was thus named?

We have some tiny seedling plants the result of crosses from this species where insigne, Leeanum, Lawrenceanum, Spicerianum and some others are the other parents. These will be watched with some impatience and great interest, with the hope that something valuable will be produced. There may be no money in raising seedling orchids but it is mighty interesting. EDWIN LONSDALE.

PEORIA, ILL.—Mr. Geo. A. Kuhl now occupies the whole building at 413 Main street as a cut flower establishment.

Read "Special Offer to Subscribers" on first page.

CYPRIPEDIUM CHARLESWORTHII.

Buffalo.

MARKET CONDITIONS.—VIOLETS EXCEEDINGLY SCARCE.—NEW RETAIL STORE OF HARRY J. MILLATT.—VARIOUS ITEMS.—A VISIT AMONG THE CRAFT.—MR. KEITSCH'S NEW AMERICAN BEAUTY.

We are having quite a little touch of winter here, and the ground is frozen so hard as to put a stop to outside planting. The market is about cleared out of 'mums, though a few fair blooms are still to be had. There seems to be plenty of roses of common grades, but first-class stock is scarce and high. Carnations are fine and in good supply. Violets—well, violets, that is good ones, are hard to come by honestly. Most of those in market are shipped stock and almost odorless. The near-by growers do not seem to be in it at present, but I hear that all of them will have a big crop for next summer. Corfu, which usually produces a great many violets, is at present a desert, and but a very few are coming in from Lockport. There is a rumor that Palmer has some good ones out at Lancaster, and I am going out to see some day when I know that the proprietor is not at home. I don't know what the trouble is; it can't be the "disease," for that is as rare as carnation rust. They seem to be like the "wicked flea." "Put your finger on him and he ain't thar." We do not see many flowering plants in the stores yet, though Scott had some nice Chinese primroses in his window to-day.

We are to have a new retail store on Main street, and Harry J. Millatt is at the bottom of it. Mr. Millatt has had long experience both here in Buffalo and in Elmira, where he has been for the last few years with Rawson.

Stafflinger finds his Seneca street store too contracted for his business and is adding a branch on Elk street.

Buddenborg, not satisfied with the profits of what is undoubtedly the most lucrative business going, has branched out as a grower and has erected some glass somewhere in the great south side district, just where I do not know, but when I get time I am going to hunt him up, and then I will tell you all about it.

Last Saturday afternoon I started out to do the west side establishments, but failed to finish many. You do not know until you try it what a large contract it is, not merely on account of the size and number of the places and the interesting things to see, but because they are such hospitable places that it is hard to break away. The start was made early and

the first stop was at the Niagara, where is one of the finest specimens of Pritchardia pacifica to be found in the country. A speedy adjournment was made to Mrs. Lewis' private place, as we were in search of Mr. Fitzwilliam, the gardener. We found Mr. F. just recovering from the 'mum fever, and judging from the remains I think he had it pretty hard. It is wonderful how fine some of the old varieties are when well done, Col. H. M. Boies for instance that would be hard to beat with any of the newer varieties of its color. But the chief glory of the place just now is the show of cypripediums. Of insigne and its varieties there is a grand lot of well flowered plants, and some fine pieces of Stonei and Spicerianum. There are some good vandas too and well flowered plants of Dendrobium Phalænopsis Schroederæ, and D. formosum giganteum. A house of mixed roses, Beauties, Perles, Brides, Carnots, etc., was in very fine condition and full of bloom, showing what can be done under rather adverse conditions, though they have a plenty of good fresh air from Lake Erie, which is a great help. We found Mr. F.'s assistant on his knees before the mushroom beds, which are quite extensive, and it seemed from the appearance of the numerous buttons that his genuflexuous had been successful.

At Mr. Albright's home on West Ferry street we found everything looking just about as near right as could be expected under the circumstances. Mr. Swift is a *gardener* and has a genuine love for plants. The glass, however, is not of such character as to produce the best results. There is a very pretty conservatory here containing some exceptionally fine plants, but the growing houses are utterly inadequate to keep up a succession of young decorative plants. We saw here the finest lot of Cattleya Percivaliana that I have seen this year—all extra fine varieties. Here too we saw some canes of Dendrobium Wardianum that promise well for bloom. The collection of orchids here is quite varied and contains some extra fine specimens. Some time I must write you about some work that Mr. Swift has been doing outside, work of more than ordinary merit.

The last stop was made at Scott's, but as he was not at home, and we did not wish to take any unfair advantage, and being a long way from our base of supplies, we prudently deferred our examination of the houses.

Extra! We have just heard of a new American Beauty that promises well. It is a daughter, and Mr. Chas. Keitsch is happy. C.

OBITUARY.

William Grey died on Thursday, November 25. This will be sad news to many a gardener and florist who knew the grand old man. No kinder-hearted man ever lived than William Grey. He was a man of the most generous impulses, unselfish and thoughtful always for the comfort and welfare of others. He was thorough in all he undertook and upright in all his dealings. It was his pride that he owed no man a penny. His death removes one of the landmarks of the profession and he will be greatly missed.

William Grey was born in Scotland on February 14, seventy years ago, and came to this country at the age of twenty-two. He filled several positions as head gardener until he finally settled with Erastus Corning at Albany, N. Y., some forty years ago, where, as is well known, he established the largest collection of orchids in this country at the time, and so increased it that it rated among the finest in the world.

He was a reader and student all his life and was much devoted to his fine library. He did much to advance the art of gardening, both in his practice, which was liberal, and by his writings, having been a frequent contributor to the horticultural periodicals of earlier days. In connection with the cultivation of plants, in early life he took up the study of insect life, and at his death left one of the best entomological collections in America.

He was a Mason and Knight Templar and belonged to the St. Andrews Society of Albany, the Albany Caledonian Club, of which he was the first chief, and other societies. His old friend Wm. R. Smith, of Washington, sends us the following heartfelt tribute to his memory:

THE LATE WILLIAM GREY

The sad news of William Grey's death fills me with dismay. I am led to exclaim with Charles Lamb, "All are gone, the old familiar faces." An acquaintance of nearly forty years, made during honeymoon times and renewed annually at one place or another, always with great pleasure and profit intellectually and professionally, to me, at least; he was acute in his observations, exact in his description of natural objects, well read and perfectly honest in his expressed opinions. A friendship with such a man was a joy indeed.

As a high priest in orchid culture and one of the best all-round plantsman in the United States, it will be long ere we meet his like again. His essay on orchid growing for the New York Club, and his catalogue of orchids, are both out of print. I think they are valuable, especially for beginners.

I might mention many things of him as a social companion, but this is not the time. W. R. SMITH.

Botanic Garden, Washington, D. C.

CHICAGO SHOW, 1897—DECORATIVE GROUP OF GEO. WITTBOLD.

Parkersburg, W. Va.

The first chrysanthemum show ever held in this city was a credit to our florists and quite a treat to the public, but was not nearly the success financially that was hoped for. The weather was against us, it having rained the whole week. Being the first exhibition of this kind, there were no prizes awarded, although the flowers shown would have won prizes at any show.

The principal exhibitors were Dudley & Son, who showed decorative plants and 'mums; G. A. Hichles, showing principally decorative and blooming plants; and G. Obermeyer, who confined himself almost exclusively to chrysanthemums.

G. O.

Boston.

QUIET AFTER THE THANKSGIVING RUSH.—FLOWERS MORE PLENTIFUL AT LOWER PRICES.—CHRYSANTHEMUMS NEAR THEIR END.—CHILDREN'S HERBARIUMS ON EXHIBITION.—FRANK WALSH RECOVERING.—A LITTLE RECEPTION.—VISITORS.

The customary reaction after a holiday has been experienced in the cut flower trade since Thanksgiving Day and stock has begun to accumulate once more in the supply centers. It has not been possible to maintain prices at the Thanksgiving notch although there was nothing about them as quoted in this market either unseasonable or unreasonable for the season as average quotations. All indications point to a range of lower rates this coming winter than heretofore and the discrepancy between the Boston market and those of other large distributing points is practically a thing of the past. Carnations are coming in more freely than during the past month, quality averaging high but prices resist any permanent advance. On roses some favorable prices, from the growers' standpoint, are quoted but after one has seen the high quality of the selected stock that must be provided in order to realize these figures it is easy to realize that the average prevailing prices are far below these top figures. Chrysanthemums are about finished as a factor in the market. A few fine late ones are available, among which it might be noted that Wm. Edgar is sending in some fine Minnie Wanamaker that bring $1.50 per dozen and it is difficult to find anything that will run any higher. Violets are coming in more freely and selling at an outside price of $1 per hundred.

The annual exhibition of dried and pressed specimens of native plants, flowers, grasses, sedges, ferns, etc., collected and mounted by the children, was held at Horticultural Hall on November 26 and 27. The exhibits were better than ever before and highly creditable to the young contributors most of whom were under fourteen years of age. The specimens were displayed on tables there being sufficient to fairly fill both halls. Several exhibitors showed over one hundred species and varieties, botanical and common name, habitat, etc., being specified on each card.

Frank Walsh of the firm of John Walsh & Son, Melrose Highlands, who was accidentally shot a week ago Monday is improving and is now considered out of danger. He had a very narrow escape.

A little reception in a quiet way to Edmund M. Wood is on the list for Thursday evening of this week by a few of his more intimate friends in the business.

Visitors in town: Paul Berkowitz of Bayersdorfer & Co., Philadelphia, Winfried Rolker, New York, James Paul, Lenox, Mass.

A New Bedford Specimen.

The illustration shows a plant of W. H Lincoln grown by James Garthley and shown at the New Bedford exhibition, which was pronounced by Mr. A. H. Fewkes, who judged the plants, to be the finest plant he had seen, unexcelled by any specimens ever exhibited by the noted Boston growers. Note especially the size and evenness of the blooms, the abundance of foliage, the absence of visible stakes, small size of pot and dwarf character shown in height of plant as compared with its great spread. Mr. Garthley also appears in the photograph.

CHRYSANTHEMUM PLANT—NEW BEDFORD SHOW, 1897. GROWN BY JAMES GARTHLEY.

Denver, Col.

THANKSGIVING TRADE.—ROSES GOOD.—AN ARTISTIC CHRYSANTHEMUM DECORATION.—SALVIA AND METEOR ROSES EFFECTIVELY USED.—NEWS ITEMS.

Thanksgiving in Denver was accompanied by rather more than the usual demand for flowers, with a fair supply of good quality. The unusually warm weather brought chrysanthemums early, and the demand for Thanksgiving exhausted the supply except a few late ones held in cold houses for Christmas. Roses are good, and enough for home use, carnations rather scarce, but fine and good. Mr. Jacobson of the Park Floral Company has some unusually good Cartledge, also fine mignonette. Fred Hall is sending in some good roses from the Gallup place at University Park. Denver climate and soil can beat the world in Wootons, the stems and substance vie with the Beauty.

Weddings have been plenty this fall, but no elaborate decorations. The present style of bringing out young debutantes at an afternoon tea hardly suits the florists, as decorations are very simple compared with the elaborate parties so much in vogue to introduce the pretty buds a few years past. A reception a few weeks ago was particularly attractive. Yellow chrysanthemums, asparagus, glimmering with small electric lights, framed a bower in a large hall, where pretty maidens served the frappe. The table was decorated with French wired bows of yellow ribbon, while the entire room was effective in yellow mums tied and twisted with ribbon to match their fluffy heads. In the parlor electric lights peeped from bouquets of pink roses on the mantel, and a Royal Danish jardinier on the piano held a hundred long stemmed Maids. The dining table was in valley, with green and white ribbons and the room in pink chrysanthemums.

As Denver has not received so much attention as she deserves the past two months, it may not be amiss to mention a dinner table arranged just before frost. Twenty guests were seated at a round table in one of the most beautiful banquet rooms in the city. A tall embossed vase held an immense bunch of salvia, around this ten baskets of Meteor roses were tumbled, each handle tied with wide scarlet ribbon, eight crescents of salvia surrounded these with large bows where the points came together, making a continuous garland in Dresden style around the table. The baskets were given to the ladies as favors while the gentlemen had Meteor roses.

Mr. Valentine, president of the Park Floral Co., has just returned from the East, where he has called on the leading florists.

Perry Gallup, of the Gallup Floral Co., will play football and in consequence of the Thanksgiving game has a broken collar bone, which rather interferes with work at Pueblo, where he is laying out and superintending a new fifty acre park for the city, his plans having been accepted in competition with eight or ten older heads. This necessarily takes him from Denver while good weather lasts and will give him enough to do when spring opens.

Christmas always comes a few minutes after Thanksgiving and florists are looking for shipments of holly and green which will be the most popular decoration for the next month.

NEW CARNATION ARGYLE.

One of the leading department stores of the city has just put in flowers; if plate glass and white tiles and stylish surroundings can draw custom, they will get it.

Cincinnati.

GENERAL IMPROVEMENT NOTED.—SOME FINE BONNAFFONS AT THE FLOWER MARKET.—VIOLETS SCARCE.—MR. ED. FRIES ON THE SICK LIST.—BOWLING NOTES.

I am glad to be able to report a general improvement in the cut flower market. Since the first of last week there has been a steady improvement, until at time of writing, values have increased fully 50%. The last week's business may be recorded as one of the best this fall and for the first time it has been in favor of the wholesaler, and also satisfactory to the grower. Thanksgiving brought a decided increase in business especially in cut flowers; pot plants move slowly. All our store men report having done a big trade and in most cases much more than was anticipated. There was a scarcity of violets felt on Wednesday and the wholesale dealers were using the wires in all directions. Roses, carnations and 'mums were sufficient to meet the demand.

At the Sixth street flower market several vases of Bonnaffon and Dailledouze, as seen at Charles and Will Pfeifer's stand, were hard to beat, one vase of 50 Bonnaffon at Pfeifer's stand made a gorgeous show and I doubt whether this grand variety has been shown in better shape at any of our late exhibitions. E. W. Mack has been cutting extra good Marie Louise violets, Sunderbruch's Sons receiving the whole output averaging 2,000 per week. The first cold spell this fall arrived here from Chicago on the 29th, on Tuesday the thermometer recorded 8° above zero.

I am sorry to report the illness of Mr. Ed. Fries; he is still confined to his room; the boys wish him a speedy recovery.

The store boys have organized a bowling club which will meet every Friday night, dues 25 cents a week. The club contains a number of good bowlers and promising youngsters. The following officers were elected: C. Critchell, president; E. G. Gillett, secretary; Frank Ball, treasurer. They bowled their first game last Friday night on one of Walnut Hill's fashionable alleys. Mr. W. Gray was high man, his two century scores being made on several difficult spares. The growers have also organized a bowling club, and will be heard from in the near future. H. SCHWARZ.

St. Louis.

BUSINESS FOR THE HOLIDAYS AVERAGES ABOUT SAME AS LAST YEAR.—A HOUSE WARMING.—JOS. F. DICKMANN SEED CO. INCORPORATED.—BOWLING NOTES.

Business on Thanksgiving day averaged about the same as last year, some dealers claiming an increase, while others claim the reverse. The supply was sufficient to meet the demand, with the exception of carnations and violets, Californias being exceedingly scarce, and wholesaling at $1.50 to $2.

The members of the club have received an invitation from Mr. C. W. Wors to a house warming next Saturday evening, it being the occasion of the opening of Mr. Wors' new store at 2740 Olive street, which was formerly occupied by Mr. Connors. "No flowers sold at retail" is a prominent sign in Mr. W.'s window.

The Jos. F. Dickmann Seed Co. has been incorporated with a capital of $20,000, full paid. The business was established by Jos. F. Dickmann, the president of the new company, in 1878.

At the meeting of the Bowling Club last Monday evening, the highest scores were made by Messrs. Beneke, Young and Kuehn. All members are requested to be present next Monday night as business of special importance is on hand.

Chicago.

MARKET CONDITIONS.—VIOLETS SCARCE, 'MUMS NEARLY OVER.—FUNERAL OF FRANCIS LUDLOW.—DEATH OF MRS. K. SCHINDLER.—VARIOUS ITEMS.—VISITORS.

The market this week has been somewhat quiet, but stocks have not accumulated in any one line. The cut of roses appears rather light. In good stock the supply is nearly equal to demand, and the poorer grades are easily disposed of though at low figures. Beauties are still in fairly ample supply. Medium length stemmed stock has the call and brings proportionately better prices than extra long. While the latter may be had in quantity at $25 to $30 the medium easily commands $15 to $20, the proportion of rather short stemmed stock being very small. Meteors have suffered a little by the cloudy weather, but are comparatively free from bull heads yet. Brides and Maids are good on the average. Perles are in little demand and unless of real good quality rather slow to move.

The week opened up with a short supply of carnations but towards the middle and latter part stock ruled more easily, with the exception of whites, which are still rather scarce. Prices in this line have weakened a little in colored sorts of inferior grade particularly. The supply of violets is still limited, the better grades being far short of supply. Many houses in this vicinity which are planted to violets have not yielded a single blossom yet, although the stock is apparently sound and healthy and covered with plenty of buds, which, however are very slow in developing.

In bulbous stock valley remains in moderate demand, selling for from $4 to $5. Romans are more plenty and have dropped to $3 for average quality. Paper whites move rather slow at $3 and $4. Harrisii, considering the early season, are very fine and meet with a brisk demand at from $15 to $18 for the best.

'Mums are nearing their end. A few good blooms are still to be had, a few choice late varieties commanding $18 to $25, but the demand appears to have fallen off considerably. Flower buyers are now looking forward to something else.

At Reinberg's some exceedingly fine La France roses were seen, with stems averaging from 15 to 24 inches, color excellent and decidedly first-class in every particular.

Vaughan, McKellar & Winterson report a brisk demand for wreathing, holly, lycopodium, etc.

Among visitors in town were W. L. Morris, Des Moines, Ia. and S. H. Church, with the Vail Seed Co., Indianapolis, Ind.

The funeral of Francis Ludlow on Sunday, November 28, was very largely attended by representative florists. Among a score or more of beautiful floral pieces was a large standing crescent wreath from the Lincoln Park gardeners and a handsome casket decoration from Mr. and Mrs. Geo. Wittbold. The interment was at Graceland. Among those present were Aug. Dressel, E. Wienhoeber, S. J. Pearce, John C. Ure, R. J. Donovan, Chas. Hartwig, Geo. Wittbold, C. Stromback, Harry Packham, E. Newsome, John Lang and Wm. Chadwick.

Mrs. Katherine Schindler, widow of Wm. Schindler, 43 Marion Place, died Wednesday, November 24. Mrs. Schindler was a woman of noble spirit and sterling honesty, and esteemed by all for her genuine worth. The funeral was at Graceland on Sunday at 2 p. m.

New York.

BUSINESS QUIETED DOWN.—TESTOUT AND CARNOT ROSES ARE POPULAR.—CHRYSANTHEMUMS SCARCE.—THORLEY'S NEW DELIVERY SCHEME.

Trade quieted down immediately after Thanksgiving Day and ordinary conditions prevail once more. Brighter weather has improved the color and quality of stock in general, the receipts being also increased with a slower outlet, which has brought prices down to normal range.

Nothing specially new in tendencies has been noted in the Thanksgiving demand, but it is true that New York trade is inclined to prefer its roses in a less advanced stage of bloom and the roses on the wholesalers' tables are more in the bud form than in previous years. This is better for the retailer, better for the ultimate buyer and better for the reputation of the rose. In roses Testout seems to have taken a new lease of popularity and it is undoubtedly true that Carnot is beginning to be a favorite, deservedly so, the writer thinks. John H. Taylor is growing his new Dean Hole and proposes to give it a fitting formal introduction to the trade at an early date.

Business at the wholesale establishments is much more satisfactory than during the early part of the month. The busy season is now fully on and the wholesalers realize the necessity of hustling for the coming three or four months if they are to keep the roof over their heads through another long hard summer. Walter Sheridan has taken the latch off his door and put a spring on it, so now all one has to do is to push and there you are.

Chrysanthemums are getting scarce and prices are stiffening somewhat. Violets are more plentiful, top figures being $1.50 per hundred. Harrisii lilies are coming in freely and selling at $5 to $6. per hundred. Highest price on American Beauties is $4 per dozen, and there is a good supply.

Thorley now delivers his special orders on a white bicycle, with a nice brass sign suspended from the frame, the machine being ridden by a colored man by way of contrast.

Pittsburg.

THANKSGIVING TRADE GOOD.—A UNIQUE DECORATION BY LANGHANS & CO.

The Thanksgiving trade was fairly good with all the florists this year, and since then the demand has been about the same as for the previous few weeks, with prices very low on general stock, and it looks as though they would not improve much before the Christmas rush begins. Stock of all kinds is plenty, with the exception of violets, which have been rather scarce; the dark weather of the past two weeks has had a very appreciable effect on blooms, but not enough to cause any scarcity so far.

Messrs. Langhans & Co., Allegheny Market, put up a very unique decoration on Thanksgiving, the table arrangement consisting of a prepared, large wild Mexican turkey, standing on a base decorated with yellow chrysanthemums; the favors, numbering 150, were the wish-bones of chickens gilded, and within the bow a bunch of violets tied with pale green baby ribbon. The balance of the decorations were palms and foliage plants. Mr. Langhans had quite an experience in getting so many wish-bones, but after a regular hunt among restaurants and hotels he was successful. Mr. L. has been confined to the house for several days with an attack of tonsilitis, but is now able to attend to business part of the day. His assistant, Miss Mary Britenhaugh, is also laid up with a very severe cold.

Mr. E. C. Ludwig, Allegheny Market, reports business very fair, and plenty of funeral work in demand. He has a large decoration for Sunday night, consisting of the decorating of a large hall in which memorial services of one of the largest lodges of "Elks" in the country are to be held. Mr. L. says the decoration will be chiefly of palms, plants, etc., which will be in keeping with the occasion.

Business with Mr. Jas. Dell, 508 Smithfield avenue, is moderate for the season, and Mr. D. is satisfied that he is getting his share of it too. His Thanksgiving trade was all O. K., having had enough to clean up the stock ordered for that day.

Mr. Geo. W. Duff, 108 North Highland avenue, E. E., also reports trade very fair in his new location and looks for increased business in the near future, as the erection of a large department store building opposite to him will no doubt materially assist in bringing the people to that location; heretofore it has been mainly a residence street.

Mr. C. J. Ford, Jr., representing Mr. A. Herrman, New York; Mr. Thos. Hill, with D. Landreth Seed Co., of Philadelphia; S. S. Skidelsky, of Philadelphia, representing M. Rice & Co.; H. F. Michell, The Whilldin Pottery Co. and Robert Craig were recent visitors, and report trade very good. REGIA.

St. Paul.

TRADE FOR THANKSGIVING DAY ENCOURAGING.—SUPPLY EQUAL TO DEMAND.—VARIOUS PERSONAL ITEMS.—RECENT CALLERS.

Thanksgiving trade was very good, giving the florists an extra opportunity to be thankful they are not all in the poorhouse or dependent on charity. Stock was good with the supply about equal to the demand. Retail prices on roses ranged from $1 to 1.50 on the smaller ones, and $3 to $5 for Beauties. Carnations went at 50 cents per dozen and violets at 50 to 75 cents per bunch. 'Mums were in good demand selling at $1 to $3 per dozen.

The chrysanthemum season is about ended here and the demand for them is rapidly dwindling away. Frank Berry of Stillwater is still sending in a few good blooms.

Holly and bouquet green have made their appearance, the first harbingers of Christmas.

In roses there is a good steady demand for Beauties, which cannot be supplied by flowers grown here. Why some of our enterprising growers do not erect a range of houses for growing this beautiful rose and grow nothing else I cannot understand. Other roses are in fair supply, though a good many are being shipped in from Chicago and Milwaukee.

Carnations are fairly abundant, though there are not enough to go round. More good flowers could be sold here if obtainable. Violets are now coming in of fair quality. There is a good call for them, the demand being in excess of the supply.

Palms and ferns, umbrellas, 'mums and all ornamental and flowering plants meet with quick sales.

Hoitomt & Co., doing business on Western avenue, have sold out to Vogt Bros., this store now being conducted by August Vogt, and the place run by him on West Third street, being discontinued. C. Anderson has also recently started a store on Western avenue.

Chris. Hansen has rented a large store on East Sixth street, in the best retail district, and has a good display.

James Souwden is smiling over the advent of daughter number 5.

B. F. Brown, of Fitchburg, Mass., has recently set up a bag filling machine for L. L. May & Co. This firm report a very gratifying trade in packet goods.

Violet handkerchiefs have made their appearance here, and take well. There's nothing like knowing how to make your flowers attractive, and in this day of cheap boxes, wax paper, etc., there is no excuse for sending out flowers in old shoe boxes and other worn, soiled, second-hand affairs.

Norfolk, Va.

Mrs. C. Reynolds, the Huntersville florist, has sold out to Mr. L. G. Blick and has left for Ft. Wayne, Ind., where she intends to make her future home. Mr. Blick has made some substantial improvements about the place and has built an additional house for violets. He has also equipped a fine flower store on Granby street, one of the finest and busiest thoroughfares in town, and reports a marked improvement all along the line.

Messrs. Taggart & William have retired from the flower business.

HOMO.

The new Directory will be published February 1, 1898. Everything revised to January 1, 1898. Price $2. Advertisements for the Directory should be sent in at once. AMERICAN FLORIST Co., 324 Dearborn street, Chicago.

SITUATIONS, WANTS, FOR SALE.

Address THE AMERICAN FLORIST CO., Chicago.

OUR ISSUE of December 11 will be full of valuable holiday matter. It will be one-third larger than usual and go to every live florist. Send your adv. early.

Omaha.

Thanksgiving has once more come and gone but only a small percentage of the trade seem to be very thankful and they are not wild with enthusiasm. This day was dark and rainy and in all one of the poorest of Thanksgivings.

The dark cold weather of the last few weeks has affected all kinds of stuff and first-class roses or carnations are scarce; some good chrysanthemums are still shown, but the best are past. Prices on all stuff still remain low. A. D.

Dayton, O.

One of the most interesting of school exhibitions was the chrysanthemum show. This was entirely the work of the children, all the 'mums exhibited having been grown by the children themselves.

The idea of this exhibit originated with Mr. J. B. Heiss, who offered prizes of palms to the most successful of these little florists. Mr. Heiss is receiving great praise by the public and local press, and is certainly deserving of considerable credit for the success which the affair has met.

W. A. MCFADDEN.

SATISFACTORY TRADE THANKSGIVING DAY.—MEETING OF FLORISTS' AND GARDENERS' CLUB.—ELECTION OF OFFICERS.—A NEW PREMIUM FUND.—PERSONAL NOTES.

Thanksgiving, one of the days florists look forward to for a little boom in business, has come and gone, with quite satisfactory results so far as trade was concerned. The fortunates that had a good lump of violets and colored carnations were in luck; violets sold at sight. Roses and chrysanthemums were in good demand and found ready sale at an advanced price. The weather was all that could be expected for the month of November; that naturally helped things along our line.

The regular monthly meeting of the Florists and Gardeners Club of Rhode Island, was held on the evening of Nov. 26th and the following officers were unanimously elected for the coming year: President, James B. Canning; Vice President, Wm. E. Chappell; Secretary, Alex. M. Rennie; Treasurer, Farquhar Macrae; Executive Committee: Wa't r Nichol, Wm. Hill and Ed. J. Johnston.

At the last meeting of the Rhode Island Horticultural Society a letter was read from Charles H. Smith, of Elmwood, eulogizing the late librarian, Thos. K. Parker; with it a check for $100 was enclosed to perpetuate Mr. Parker's name and establish a fund to be known as the Thos. K. Parker Premium Fund. A committee of three was chosen to consider the best way to invest the same. The "Chalk Talk" by Prof. W. W. Bailey followed; subject, "How pollen is protected from rain and snow." It was very instructive and entertaining.

The greenhouses of Wm. Appleton, Jr. and Wm. Goddard, were broken into last week; plants and flowers to quite a value were taken therefrom. The thieves displayed good taste, but their principles were not commendable.

A. M. Rennie, who has been confined to the house for a number of weeks is slowly recovering, and has been at his desk a few hours a day for business.

George Johnston, of Johnston Bros. and Wm. Butcher, are again off duty on account of illness.

E. J. Collamore has opened a store on Upper Westminster Street in connection with his Franklin Street greenhouses.

M. J. Leach, of Pawtucket, reports an unusually good Thanksgiving trade and lots of funeral work.

Alvertus Martin, (Olneyville) has accepted the local agency of The American Jadoo Co. LITTLE RHODY.

IT COSTS NOTHING to get your name and address in the NEW DIRECTORY. Send your business card to the AMERICAN FLORIST CO., 324 Dearborn street, Chicago.

W. P. SIMMONS & CO.

Make the following statement to the readers of the American Florist:

As originators and introducers of
"Silver Spray,"
"Tidal Wave,"
"Daybreak,"
and "Rose Queen,"

each of which has, we believe, proven even better than we claimed for them. We NOW say for 1898 that

"Mrs. S. A. Northway"

possesses all the good points that go to make up a **first-class** and **profitable** cut flower sort, and that we introduce it with even more confidence than we did the others.

It is an extra strong grower.
It is free from rust or disease.
It is a profuse bloomer.
It has exceedingly strong stiff stems.
It is of exquisite form full and double.
The flower is high built, petals serrated.
The calyx does not burst.
It is delightfully fragrant (a quality lacking in many new ones.)

OUR PRICE LIST now ready, contains prices on many other plants. SEND FOR IT.

Vine Seeds and Sweet Corn in Nebraska.

In the spring of 1897 the seed growers of the West again and for a third consecutive season found themselves carrying quite heavy surplus stocks that had accumulated through an excessive zeal in the production of seed crops for the purpose of insuring against the possibility of being unable to fill contract orders in full. Large sales were made to a few of the larger seed houses at sacrifice prices so as to reduce this surplus, the prices being made at below cost as an inducement to effect sales.

This procedure, together with the general condition of depression at the time, resulted in a heavy shrinkage in the volume of the contract business of 1897 crops and as a consequence not more than one-half of the usual acreage was devoted to the production of vine seeds and sweet corn this year.

The season of 1897 has been a peculiar one. Musk melons and summer squashes have generally made only a fair crop. Watermelons have in some instances proven fairly satisfactory, but altogether considered, the crop has turned out very poorly. Cucumbers have been a great disappointment, the general yield having been not more than one-half the usual average owing to the dry early fall months. Pumpkin and winter squash have fallen way behind and are the poorest crops in their lines ever grown in this locality, owing to the ravages of cutworms, borers and the large squash bug, all of which having been more destructive than ever heretofore known.

The acreage devoted to sweet corn this past season has also been greatly reduced, as compared with the area planted during the past five years. There was no surplus carried over from last year and as the season progresses it is found that the yield is proving much shorter than estimated, although the quality is excellent. Stowell's Evergreen and several other varieties will be short and contracts for same will only be filled on a basis ranging from 50 to 75% of the quantities contracted.

The season of 1898 is a problematic matter to the seed grower of the West. Owing to the extraordinary success farmers have obtained this past season in growing small grain and corn, and feeding sheep and cattle that have been, and are now being brought into the seed-growing district from every direction, thousands of sheep and cattle to be fattened for the South Omaha cattle market but 15 miles distant, it will be absolutely impossible to secure an acre of land for the cultivation of seed crops next season at anything like the prices recently paid for same.

There has not even been the exchanging of an old dollar for a new one without loss in growing seeds for the past five years, and it has been the common occurrence to be unable to even obtain the cost of labor alone out of the proceeds of the crop. At the prices that have prevailed during the past several seasons there is no inducement to continue seed growing in Nebraska while there is every inducement to carry on any kind of farming but that of seed growing. Every acre of soil will be needed in this locality next season for the production of grain and corn for sheep and cattle feeding.

It is only reasonable then to feel assured before hand that if seeds are to be produced next season here in Nebraska very much higher prices must be obtained. We have got to look the facts directly in in the face. Opinions may vary as to how much higher prices will advance, but it is an opinion that they will not fall short of an advance of from 30 to 60%, according to kind.

Starting in last spring with surplus stocks reduced to the smallest quantity known for several past seasons, with a greatly reduced volume of contract business on hand, a consequent largely reduced acreage this season and crops reduced far below the average yield on the one side, viz.: that of production. Seed dealers on the other hand, throughout the country should in making up their catalogues and price lists govern themselves accordingly "making hay while the sun shines" by advancing their prices and not waste the opportunity now presented for the first time in several years whereby they may regain some of the lost profits of the past.

THE assignee of Crosman Bros. will continue that business until June 1, 1898.

NEW PEA "GRADUS."

LAXTON'S Finest Early Pea of the Century. Large Podded, Wrinkled, First Early.

Highest Award, First Class Certificate from the R. H. S. after trial.

--WITHOUT doubt this is the greatest advance yet achieved in early Peas, for although the variety ripens with "William 1st" and "Eclipse," the deep green colored pods are of the size and as well filled as those of Duke of Albany, with large wrinkled Peas of the "Ne Plus Ultra" color when ripe and quite equal with that famous, as yet unvanquished variety for flavor. "Gradus" is also the most distinct early Pea yet raised, and is alike good for table and for show. PRICE—$5.00 per bushel. We have already booked large orders for the States for this variety. TERMS—Cash with order or London reference.

CLUB MEETING.—ADVISABILITY OF HOLDING A SHOW NEXT YEAR DISCUSSED.—THE THE QUESTION BOX.—DEATH OF THE MOTHER OF MR. I. H. MOSS.

Another rainy night did not prevent the club from having an enjoyable and live meeting, President Pentland was out in spite of the weather, but did not favor the boys with his promised essay on Adiantum Farleyense because there was so much talk he didn't have time.

The matter that stirred up such vigorous debate was a recommendation by the executive committee that a flower show be held next November. After the members of the committee had expressed their individual reasons for favoring the plan a lively debate ensued. Mr. E. A. Seidewitz expressed a decided aversion to holding a show unless a guarantee fund of one thousand dollars could be raised. The New York show with all its advantages and splendor was a financial failure and there was no use in our trying where New York had failed. The only successful show we had held was the first and it was a success mainly because Mrs. Pres. Harrison had visited it. Mr. Christy said "Heaven helped them who help themselves," and if we all worked together we could hold a show. Mr. McRoberts thought a guarantee fund of one thousand dollars sheer nonsense, and equivalent to voting not to hold a show. We had held profitable shows when we had no guarantee fund and could do it again. Our first show had paid every cent of premiums to exhibitors before Mrs. Harrison's foot crossed the threshold of the building where it was held. If New York held a ten story show and failed, Baltimore need not fail by trying to hold a ten story show. Let us hold a one story show such as we began with and succeed.

Mr. Flitton advocated a general show not confined exclusively to chrysanthemums. Mr. Donn thought the club capable of holding a good show, and was sure some of the members would give their best efforts toward making it a success. Mr. Sands deprecated the guarantee fund idea which seemed too much like begging. Thought one chief reason of the club's existence was holding annual shows, and had no doubt that if ordinary prudence and judgment were shown instead of lavish expenditure in non-essentials, we could have as good a show in 1898 as we had ever held. Mr. C. M. Wagner was also heartily in favor of a show, as were apparently most of the members present. The matter was finally closed by a motion to have the executive committee prepare plans for holding a flower show in November 1898, and lay them before the club at our next meeting.

GEORGE C. WATSON,

Juniper, below Walnut. PHILADELPHIA, PA.

A Florist Poet's Troubles.

The court has said that Isaac H. Poole's poetry is worth $15. Captain Peter Lawson had insisted that it wasn't, or at least that he had not agreed to pay anything for it, even if it was, but Justice Underwood held yesterday that he must pay Poet Poole $10 for the verses and $5.25 for the cost of getting them printed.

October 27 Captain Lawson was married to Carrie M. Specht at 1198 Lincoln Avenue. Miss Specht owned a florist's store and was acquainted with Poole (an old-time florist once located on Western avenue). She asked him to dash off a few lines to be dedicated to the couple at the time the ceremony was performed. The poetry was written, and submitted to Captain Lawson and his prospective bride for inspection. According to Poole, the lines so charmed the young couple that they ordered 250 copies printed and sent to the bride's home in time for the wedding.

Two of the verses dedicated to Miss Specht and Captain Lawson are as follows:

Clang! clang! clang! There's a fearful, wild alarm,
And all the heroes hustle to save from death or harm.
Alas! They cannot quell it with all their skill and art,
For the flame that is consuming is in the captain's heart.

The ladders cannot reach it; the hose will not avail;
The engine under pressure in idleness must quail;
There's only one can reach him and save the faithful chief,
For the loving heart of woman is the measure of relief.

Poet Poole was elated over the judgment given him. "If that poetry, all printed, isn't worth $15," he declared, "then may I never again invoke the muses!"—*Chicago Times-Herald.*

SEEDLING CARNATIONS.—Regarding the proposition of sending seedling carnations to other growers for trial, we do not like it, and would not submit to letting a seedling leave our hands, except a partial interest was sold. What we would suggest would be a committee of three to visit all seedling introducers and provide necessary means for that purpose.

Asparagus Sprengeri,
GREATEST NOVELTY FOR FLORISTS.

Read what Mr. F. W. Burbidge says of it in "The Garden":

"It well merits the attention of all interested in greenery for bouquets, wreaths, and sprays. It is most handsome, drooping gracefully and naturally from pot or hanging basket. The growth thrown up in a free and plumose manner 4, 8 and 10 feet in length, of a fresh green hue and is admirably adapted for all decorations indoors. **I have had fronds in water that were quite fresh six weeks after cutting.** The wonder is that such a distinct plant has not long ago found its way into Covent Garden by the hundreds. It should, as it deserves, soon become known to all growers or select decorative material."

—o—

We were the first to grow Asparagus Sprengeri in quantity and have sold it in lots of 10,000 to those who know it is a good thing. a few thousand more left.

Price, 2½ inch, ready for 3½	$6.00 per 100, $1.00 per doz.
" 3½ inch, " " 5	10.00 " 1.50 "
" 6 inch, " " 7	50.00 " 6.00 "
Seed to arrive this month	15.00 per 1000.

Cleveland.

FLOWERS SCARCE. — BOWLING NOTES. — NEXT MEETING OF FLORIST CLUB.—W. H. BEAUMONT BARELY ESCAPES BEING BURNT OUT.—VARIOUS ITEMS.

The chrysanthemum season is about over now and the principal feature of the situation at present is the consequent scarcity of flowers. A very few second grade chrysanthemum blooms are still coming in, but in most cases are not very satisfactory as those that are not suffering from extreme senile debility, seem to be of very poor substance in many instances.

Carnations are very short in supply, owing probably largely to the dull, cold weather we have been having for some time. Fairly good stock wholesales at $1.50 with not enough to go around. Roses likewise are short in supply, although very fair in quality on the average. They also, consequent upon shortages in other flowers, have stiffened in price and good stock in standard sorts are worth $5 and $6. Violets have been chronically scarce all the season so far, at no time have they been in really good supply. A few of the earliest Harrisii were in for Thanksgiving and retailed at $3 per dozen. They do not seem to be especially popular as an early venture and sold rather slowly. A wholesale price of $2 per dozen, express charges on bulky packages and incidental risks, will not tend to popularize them with the retailers either.

The bills incurred during the chrysanthemum show are in process of payment and by the time of the next meeting, the club will know just exactly how much must be forked over to make good the deficit.

The bowling club met as usual Monday. There was a good attendance and a good time for everybody, as usual. It should be noted that the next meeting of the Florists' Club falls not on next Monday, but on the following Monday, the second in the month.

W. H. Beaumont on Erie street, had a very narrow escape from being burned out Monday night. The building next door being entirely destroyed.

The F. R. Williams Co. moved their wholesale office on December 1, to 60 Huron street, where they will henceforth conduct operations

Mr. Killen, travelling for C. H. Joosten, has been in the city lately.

Note that Monday evening, December 6th is an extra meeting for the bowling club. As this will be ladies' night a large attendance is expected to be on hand to bowl and do justice to the good things that will be provided. A.

Syracuse, N. Y.

THANKSGIVING DAY REPORTS SATISFACTORY.—'MUMS SOLD WELL. — PLANT TRADE VERY GOOD.—BANNISTER BROS. GO INTO BUSINESS.

For the past three or four weeks we have been experiencing very unpleasant weather, which has shortened up the supply of flowers very considerably. Thanksgiving week started in with a scarcity, with the exception of chrysanthemums, and brisk trade. Reports from the various establishments for Thanksgiving day are most satisfactory, despite the bad weather, a drizzling, cold rain falling all the time. While some claim an increase of 15%, others figure up an equally good trade, probably a trifle better than last year. Unquestionably more trade could have been done had it not been for a scarcity of flowers towards evening, and, as usual at such times, a large amount of funeral work had to come in. Although the prices on outside stock were rather stiff, especially violets, retail prices ranged more reasonable than last year.

Chrysanthemums were much in evidence and sold extremely well, bringing from $1 to $3 per dozen, according to quality. American Beauty, as usual, was the favorite rose. There were quite a number on sale, but before noon they were sold out clean, bringing from $4 to $9 per dozen. Other roses ranged from $1 to $2 per dozen, a few extra fine Meteors and Carnots bringing $2.50. Carnations were of fine quality and many more could have been sold; 50 cents per dozen was the general price, and it was a hard matter to get 75 cents for extra fancies. Violets were largely called for, and although the wholesale price, $3 per hundred, was asked for them, this put a damper upon the majority of would-be buyers.

In the pot plant line there was an extraordinary large call for ferns, nice plants in 5 and 6-inch pots, and pans of the hardiest kinds for house culture, such as the different varieties of nephrolepis, pteris and adiantums. Prices ranged from 50 cents to $1.50 each. A great many flowers with small ferneries were also sold. Palms did not have much call. In flowering plants, primulas at 25 cents, begonias at 50 cents to $1, and cyclamens at 50 cents sold well, which is more than can be said of chrysanthemums, people preferring them cut, to the plants.

Bannister Bros. have opened a very attractive store on the corner of West Genesee and Clinton streets. They are progressive young men, and it is to be hoped they will be as successful in their new venture as they are in landscape gardening. ALPHA.

A. FARLEYENSE,

Extra strong plants from 3-inch pots in excellent condition at $3 per dozen; $20 per hundred.

NEPHROLEPIS EXALTATA at $5.00 per hundred.

THANKSGIVING TRADE NOT PARTICULARLY BRISK.—H. W. FIELD ENTERTAINS AT A LUNCH.—A NEW FLORIST ARRIVES AT ALEX. PARK'S.—FRED BARTLETT JOINS THE BENEDICTS.—E. P. COPELAND ALSO ENTERTAINS.

Thanksgiving day opened clear and cold and was nearer the old-fashioned ideal than many of its predecessors, but trade was not particularly brisk, in fact many Saturday afternoons were quite as good. However, it helped to work off most of the late chrysanthemums, and the end is now near. We all say there is no money in them, yet next year will probably find just as many grown, for what would we do without them to cheer and brighten the dull dark days of late fall, and though the exhibitions do not seem to pay yet, the chrysanthemum still holds a place in the fancy of the public that no other flower can fill.

A very pleasant prologue to the show was the dainty lunch to which H. W. Field invited the directors of the Horticultural Society on the closing night of the show, and which also marked the discontinuing of Mr. Field's lunch rooms. He will use the space for his increasing flower trade.

Alex. Parks has moved into larger quarters down the street, and just now Alex. is the happiest man in town, all on account of that new florist in his family.

Fred Bartlett has at last yielded to the wiles of the fair sex and taken to himself a wife. He has the best wishes of all in the trade.

E. P. Copeland entertained what he was pleased to call the "working element" of the society at its last meeting, and that they were entertained royally all who know that gentleman will have no doubts. G. W. THORNILEY.

New Carnation Gold Pearl.

We have received from the Morris Floral Co., Morris, Ill., a sample bloom of their new yellow carnation Gold Pearl.

It is said to be a cross between a cream colored seedling (parentage not stated) and Buttercup. The color is a clear yellow, deeper than any American commercial variety we remember to have seen and without trace of red or pink markings. The sample bloom was of good size, form, calyx and stem.

Greenhouse Building.

Monroe, N. Y.—Glen Lea Nursery, one palm house.

Brooklyn, N. Y.—A. F. Walsh, one greenhouse 21x60.

BOUGAINVILLEAS.

Beautiful for "cutting" or pot sale.

Free and durable, and blooming for four to six months of the year. Very easily handled and not subject to any insect pests.

Send for "Comments and Facts."

PAUL MADER, East Stroudsburg, Pa.

Notes.

If you have any crocus or tulip bulbs not sold they should be planted at once. Cover well when planted so late, they don't pay to grow inside. Have you potting soil and sand enough under cover? Are your pansies covered? Have you stopped up all the places where cold winds may come in? If you have a large tree to move this winter, have you dug the trench around it and filled in with leaves, so as to save labor of so much picking in winter? Is your storm door ready? Have you selected the variety of chrysanthemums most desirable for next season and put stock plants in proper place? Have you everything ready for the holidays? Is your dormant stuff for Easter well rooted and covered, where you can get at comfortably?

Have you prepared to meet any demand for Asparagus Sprengerii, Spiræa Anthony Waterer, Spanish iris or white and yellow snapdragon this season? Are you positive that you watered your azaleas? Do you not remember that they are frequently potted as they arrive and the water when poured in pot runs *around* the ball and out the bottom of pot? You know you have been told to soak them all in a tub of water before potting them. Just take another look at them to be sure they are not wilting. Are you growing any foliage or fancy grasses to go with lilies this season? It is a good plan to do so. C. B. W.

Red Spider on Carnations.

What is the trouble with the carnation foliage I send? SUBSCRIBER.

Your plants are infested with red spider and the way the branches look there must be a good dose of them. The only remedy against this pest is water, judiciously applied. If your benches have good drainage use the hose freely for several days in succession on the infested plants with the whole force at your disposal, spraying so all sides of the plants receive a share of the dousing. This is especially effective on sunny days when the little rascals are more active in their perambulations over the leaves, often spinning very fine webs. In this state a sudden dousing comes unawares and is more effective. FRED. DORNER.

MIKE: "What was it Pat said when he fell through the roof of the greenhouse?" Denny; "Oi have a pane in me soide, begorry!"—*Fun.*

Grand New Lily of the Valley.

Convallaria Majalis Alba Grandiflora. "Fortin Variety."

First Class Certificate R. H. S. of France.——Award of Merit R. H. S. of England.

Worth Your Notice

THIS Grand New Lily of the Valley, which we are now able to offer in large or small quantities, is **twice the size and substance** of the best strain of the Berlin variety. From the photo reproduction herewith it will be seen as photographed side by side with first-class Berlin stock. The foliage is particularly robust, and the flower spikes equally so, averaging 1 ft. in height; the individual bells are quite double the size of the ordinary variety, of purest white, and **average at least 18 to 20** on a spike.

American growers who anticipate growing their own Valley should begin with our 1 year planting crowns of Fortin's.

Strong Flowering Crowns, **$3.00** per 100; **$25.00** per 1000. Strong one year planting crowns, **$5.00** per 1000; **$40.00** per 10,000. Special prices for large quantities.

LAXTON BROTHERS, Bedford, England.

"CARTER'S DECORATIVE EVERGREENS."

Dame Nature has put a gloss on our greens this season; they are greener than grass and as smooth as glass. Especially our Wild Smilax, which is the finest I have ever seen. Carter's Wild Smilax is packed only in three different sizes. Size No. 1, "our largest"; cases contents of same will cover 600 square feet; net weight 50 pounds, price $8.00. Our No. 2 cases will cover 400 square feet; net weight 35 pounds, price $5.50. Size No. 3, our smallest, "little but loud," cases will cover 200 square feet, net weight 25 pounds; price $3.75.

WILD SMILAX.

Brothers, there is a "heap" in the name when it comes to decorative evergreens, especially Wild Smilax, and you want to see that you get "CARTER'S." Let me tell you why it pays to get "CARTER'S" because they are carefully selected, free from trash or sticks, neatly packed in well papered nice light cases, fresher than others because his goods are gathered and shipped the same day. Weather cuts no figure, his teams are running, rain or shine.

PALM LEAVES, "Chamaerop," "Sabal."

Chamaerop Palm Leaves—These beautiful palm leaves will not wilt in decoations and will last quite a while, cut with long stems. Can furnish any size—any quantity—$3.00 per 100. Sabal Palm Leaves, "the steam heated room kind," a close second to your prepared palms. We can furnish any size, any quantity, cut with long stems, $4.00 per 100.

PALM CROWNS... ...NEEDLE PINES.

Chamaerop Palm Crowns, 3 to 5 feet high, 4 to 10 leaves, per dozen, $4.50. Long Needle Pines—Florists are continually increasing their orders for "CARTER'S" superb brand of Needle Pines. Last season was a "Record Breaker." I have another lot that is fit for a king. Assorted sizes, per dozen, $3.00.

GEORGE M. CARTER, Evergreen, Ala.

Providence, R. I.

The annual exhibition of chrysanthemums under the management of the Rhode Island Horticultural Society opened in Music Hall on the 11th and continued three days. The rain of the first evening prevented a large attendance; on other days the patronage was very fair. The hall was well filled with exhibits and about all space was occupied. There was a noticeable falling off in fine specimen plants. Judging from that standpoint, the show was not quite up to some former exhibitions. Cut chrysanthemum blooms were superior on the whole, being better grown than last year. Not many new varieties were shown.

The arrangement of groups about the hall was much better than ever before. Groups of chrysanthemums, palms and miscellaneous plants were very artistically massed, it being the desire of each exhibitor to carry off the first prize for the most artistically arranged group. The display was not confined to any particular class, commercial men, private gardeners and dealers taking equal interest. The Providence Ladies' Orchestra was a pleasing feature of the show. They gave a concert each evening.

J. J. Jensen, of the Park Greenhouses, made a very artistic display of mixed plants, foliage and blooming. In the center stood a broken column about 9 feet high made of yellow and white chrysanthemums, Daybreak carnations and English ivy, on top of which was a large dish of growing ferns surmounted with a white dove. The effect was very pleasing and represented much labor. Miss Willard, of the Hope Greenhouses, made a lavish display of plants usually grown in a greenhouse. They were grouped with good effect.

Wm. E. Chappell made a very pleasing display in pyramidal form of miscellaneous plants under a Japanese canopy. Around the base were yellow chrysanthemums in pots and Nephrolepis Davallioides, also a group of palms and Ficus elastica. Fairbrother & Wood made a big display of the Boston fern banked to the ceiling under the balcony. They also displayed cut flowers. Wm. Goddard, Alfred Powell, gardener, made a fine group of choice plants not grown for profit about here which were beautifully arranged. Wm. Hill made the banner exhibit from the critic's standpoint, displaying about the same line of plants as is usually found in private places. Ed. J. Johnston's display was all right; he always does things that way. Hazard Weeden Co. had a very creditable display of well grown plants beautifully arranged. LITTLE RHODY.

Nurserymen,
GENEVA, N. Y.

Mansfield, O.

The Berno Floral Co. have added another rose house to their plant, covering 12x50. Mr. Berno reports trade as being quite encouraging. Their new delivery wagon, if I may put it thus, is a "thing of beauty and a joy forever"—a joy to Mr. Berno, who can take out his palms in zero weather and rest assured that Jack Frost cannot touch their tender leaves. It is a handsome as well as a most serviceable construction and attracts a deal of attention as it flies along the business thoroughfares of the town.

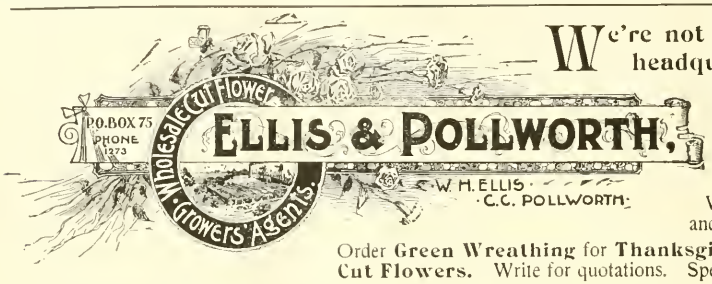
Mr. Henry Beam was "beaming" with pride as he took us through his houses. His stock, both roses and carnations is doing splendidly, and his 'mums never looked finer. HOMO.

Council Bluffs, Ia.

McPherson & Reid have opened a retail store down town with Bert Cole in charge.

J. F. Wilcox has purchased the stock of candy and fixtures on Broadway just west of Pearl street and his opening took place on the 20th. The front of the store was handsomely decorated and the display in the windows was fine. Inside were palms, chrysanthemums and potted plants galore, also a decorated dinner table and sideboard. These attractions and music by the orchestra crowded the place. It was a grand success.

G. R. H.



TOPEKA, KANS.—The Kansas State Hort. Society will hold its 31st annual meeting in this city December 28–30. Wm. H. Barnes, this city, is secretary.

Brockton, Mass.

A call for a meeting of Gardeners and Florists to consider the matter of organizing a club brought together a party of about forty on Tuesday evening at the Metropolitan Hotel. Temporary organization was effected and a committee appointed to nominate permanent officers, etc. The delegation from North Easton numbered sixteen. A lunch was served at the close of the meeting.

Grate Bars.

Reading Mr. Henry W. Gibbons' heating in last issue of FLORIST, that part of it relating to grate bars suggests to me the propriety of giving your readers my experience in that line, hoping that some one who has shared with me the inconvenience of grate bars breaking perhaps in the middle of the coldest night of the season, may be enabled to make a change as I have done, whereby any difficulty of this sort may be avoided and advantages gained.

Some fourteen years ago I put in one of John Dick's saddle boilers, in the construction of which the grate bars are merely tubes as were also the sides of the boiler, filled with water, connected with the circulation. For twelve years the boiler ran in every way satisfactorily more especially did the grates, which did not cost one cent for repairs during that time, while right beside it stood another style of boiler with ordinary (improved) grates which was, as Mr. Gibbons suggests, in need of a new set of grates every two or three years and perhaps oftener, and that not through the accumulation of ashes in the ash pit. This necessarily entailed the expense and trouble of putting in the grates to say nothing of the inconvenience of their giving away, as they generally did, just at a time when they were most wanted.

One year and a half ago in overhauling and resetting a 50 horse power tubular boiler for hot water, close system, it occurred to me to borrow an idea from past experience and try and replace the common cast grate in the boiler with something that would be less expensive and inconvenient. The front of this boiler being movable was taken off and two 1½ inch holes bored, one on level with grate and one near the top. A grate was made with two manifolds, in length the width of grate seat, threaded right and left and connected with 1-inch pipe the length of the grate seat, and connections made through the holes in front of boiler with the circulating pipes leading to greenhouse, forming flow and return through the series of pipes in grate.

The result is after one severe winter, and so far towards another, increased power to the boiler, with no appreciable increase in fuel, no trouble of grate breaking down and with thorough combustion of fuel. In fact we would not exchange for common grate under any consideration. We burn hard coal with some wood. There are "doubting Thomases" who will read this and to those I say try it and be convinced. Cannot say how it would work for steam system, not having had opportunity of trying it, but an opportunity of trying is all that is needed to find out how it will work. I am convinced in the case of hot water, where it can be applied, of its great advantage over other grates. R. G. MILFORD.

Rochester.

Geo. J. Keller, our principal violet grower here, had the larger part of his violet houses planted to early chrysanthemums and had to delay planting his benches until these were ready to cut, which retarded most of his violet crop for a time, but now the houses are all in shape and as his stock is all pot grown, it will not be long before he will be able to double or treble his present output.

A visit to Geo. Savage at the Kimball greenhouses revealed the fact that he can grow chrysanthemums as well as orchids, for the few select varieties which he planted this year are remarkably well done; grown to single stems the flowers are real monsters, his Philadelphias being extraordinary in size and would take premiums in any exhibition. Special mention should also be made of his house of Cypripedium insigne, which just now is at its best. More than a hundred varieties can be seen here and it is a most interesting pastime for the lover of these plants to compare and study the different shaped dorsals with their markings, the pouches and their various shades, etc. The rare C. i. Kimballianum, with the large dots in the somewhat compressed dorsal running into the white and with a coppery lustre in the pouch, is one of prettiest among them. A strange freak also originated here five or six years ago. It is one with a distinctively ribbed or corrugated pouch, a good large flower with broad dorsal sepal and large spots. The plant is now in an 8 inch pot and has opened about 15 or 18 of these peculiar flowers. Every one of them shows the same corrugation and Mr. Savage has named it very appropriately C. i. corrugatum. Several of the pure yellows are fully out, but Laura Kimball, with three flowers is the peer of all, as everybody must admit when they are seen side by side.

Mr. Alfred Dimmock, of England, was a visitor in town and as usual looked over the interesting Kimball collection carefully. His generous offer for another growth of Laura Kimball was refused this time; George wants to grow a big plant of it before he divides it again. Several plants have found their way to England since it bloomed first and dividing so often may weaken the mother plant, which at present is in very thrifty condition, promising several new growths from each lead. Mr. Savage's latest seedling, of which I spoke a short while ago, has received a first-class certificate in New York, although the flower was badly faded on its arrival there and no wonder for it had been open seven weeks before it was cut from the plant, which is kept at all times in the strong heat of the stove house. The bright colors had by this time faded out and in my opinion the New Yorkers have not had a chance to do full justice to this marvel; another year they may have a chance to see a fresh, well colored flower and then look out for a sensation. K.

Grand Rapids, Mich.

The third annual chrysanthemum show of the Grand Rapids Florist Club was held in Lockerby Hall, November 10–12, and from a horticultural point of view proved a success, but financially was a failure; the prize winners will realize only about 20% of their money.

The arrangement of the hall was very good. In the center was a large mound of palms and tropical plants staged by Henry Smith and Crabb & Hunter, the Grand Rapids Floral Co. and Wm. Cunningham occupying the corners which were banked with palms. On the sides of the hall were many well grown standards interspersed with handsome bush and single stem plants. On the stage was a handsome display of cut flowers and in the rear of the hall a bank of palms, exhibited by W. Cukerski of the City Greenhouses, not for competition, attracted much attention.

Mantel and table decorations were in evidence and a display of pansies, made by Mrs. E. Arnold, was greatly admired. The single stem, standard and bush plants, grown by Crabb & Hunter were magnificent and well worthy the premiums awarded each, as were likewise the chrysanthemum cut blooms staged by the same firm. In roses, Henry Smith and the Grand Rapids Floral Co. made some fine exhibits, as did also Wm. Cunningham, Geo. Hancock & Son and others.

Mr. Breitmeyer, of Detroit, acted as judge, and the prizes were distributed between Crabb & Hunter, Henry Smith, Grand Rapids Floral Co. and W. Cunningham.

St. Joseph, Mo.

The 'mum show at Krug Park attracted many visitors and was a decided success, thanks to Supt. Rau.

Mr. J. N. Kidd held a fine chrysanthemum show, some 1,500 well grown plants being included in the exhibition. A decorated mantel and wedding table attracted much attention.

Mr. D. M. Reichard reports business as very encouraging.

Mr. E. Wiseman has taken charge of the conservatory at the State Asylum No 2.

The chrysanthemum Society of Oregon, Mo., visited this city to compare the different varieties of 'mums. N. J.

Madison, N. J.

The fourth annual exhibition of the Madison Rose Growers' Club was held at Waverley Hall on November 16, 17 and 18. With the exception of Tuesday, when disagreeable weather prevalled, the attendance was gratifyingly large, and the exhibition throughout was unquestionably the best the club has made.

The hall was beautifully decorated with festooning and groups of foliage plants. The exhibition was auspiciously opened by Mayor Albright with a brief address, in which the local history of rose growing was reviewed and the excellence of Madison's chief product praised.

Naturally roses occupied a prominent place and the prize winning vases were superb. On American Beauty, L. M. Noe, L. A. Noe and M. Tilden were the most prominent prize winners. On Bride and Bridesmaid, James Conroy, Wm. Charlton, J. D. Burnett and Walter Reid were winners in the order named. In the other classes, C. R. Christie and Wm. McCormack were leading contributors. Mr. Christie's mignonette was very fine and the stove and greenhouse plants from Wm. Charlton and M. B. Maguire, added to the attractiveness of the hall.

C. A. Work made a pretty exhibit of flowering plants, not for competition. Other exhibitors of note were: H. Quimby, who showed carnations, Cosgrove & Son, flowering plants, Thomas Keefe, J. J. Ryan, J. Querney, George Nichols and Wm. McCormack, who staged roses in variety.

The judges were Alexander Burns, Patrick O'Mara and Peter MacDonald.

Jackson, Mich.

A carnation house, covering 20x156, built in the best possible way and equipped with all the modern appliances, is a recent addition to Mrs. C. Brown's greenhouse plant. With this new addition Mrs. Brown will have a total of 15,000 feet. Both Mrs. Brown and Mr. Joseph Blessing were unusually busy with funeral work during my recent call. HOMO.

WRENTHAM, MASS — M. Meyer has leased the greenhouses of the late G. A. Draper for two years and will open for business about December 1.

PORTSMOUTH, N. H.—The magnificent conservatories of Hon. Frank Jones have been visited during the past fortnight by nearly 4,000 people, who came to admire the superb chrysanthemum display. This large public attendance was very gratifying to Mr. Robert Paterson, the gardener, although nothing more than such a fine exhibit of the gardener's art was entitled to.

GREENHOUSE WOODWORK.

Open-air-dried Cypress Lumber is more durable, and better suited to Greenhouse conditions, than kiln-dried stock. But you cannot get it from those that are engaged in the business in a small way—even though their entire business is confined to greenhouse material—for it takes a long time for the lumber to thoroughly dry and this means an investment in lumber that only those of large capital can make. The only way to have air-dried lumber is to buy green lumber and hold it until it dries. Those that order dry lumber from the producers of Cypress get kiln-dried stock. It is cheaper for them to kiln-dry than to hold the stock long enough to season it in the open air. We carry a large stock and fill all orders with open-air-dried Cypress clear of knots, sap and all other defects.

AMERICAN CHRYSANTHEMUMS AT ENGLISH SHOWS.—Major Bonnaffon, Col. W. B. Smith, Modesto, Inter Ocean, Western King, Shasta, G. W. Childs, Golden Gate, Mrs. E. G. Hill and W. G. Newitt were very much in evidence at the English shows. Australian Gold, exhibited in this country for a certificate as an importation, was a winner at many English exhibitions.

SUGGESTIONS FOR THE HOLIDAY TRADE.

Plants Suitable for Christmas Gifts.

Most all the palm family may be recommended for this purpose. The Kentias—Belmoreana and Forsteriana—are perhaps the best, closely followed by the Latanias (Livistonia) and Areca lutescens. The latter, being of quicker growth than the kentia, is perhaps more profitable for the florist to handle because he can conscientiously give his customers more for the money expended. It will not bear neglect quite so well as a kentia, but I do not believe in encouraging neglect in house plant culture. The Araucaria excelsa is also good, especially for a cool room, whereas some of the plants recommended would not last very long in a temperature that the subject under consideration would delight in.

Adiantum Farleyense makes an elegant Christmas gift, and although many people cannot keep it very long in good condition in a dwelling house, still we know of cases where it is grown with great satisfaction in a sitting-room where the temperature never or rarely ever goes below 70 degrees at any time, either at night or in the daytime; and it must be borne in mind that in the dry atmosphere of a residence it receives water at least once every day and sometimes twice. The cool air from the outside must be kept away from this tender child of the tropics or it will surely suffer.

In a recent number of a contemporary the editor in randomly guessing at the probable origin of this remarkable Adiantum states that it is supposed to be a sterile form of Adiantum Capillus-Veneris. The best authorities give it as a possible form of A. tenerum, though some experts suppose it to have sprung from A. scutum either as a sport or as a seedling. I have seen and handled hundreds of these plants and have never yet noticed it produce a fertile frond. The only way to propagate it is by the division of the crown.

The Nephrolepis exaltata, whether it be the Bostoniensis or some of its near relatives, also makes a grand plant for this season, especially when grown with sufficient room to give the fronds that graceful arching form, which our Boston friends have developed so much as to give it an international reputation. It is more readily propagated and grown into a large size than is the Farleyense fern, and it is bound to become one of the most popular plants for the purpose indicated that we have in the whole list. It will flourish in a lower temperature than will the adiantum above referred to, and if it is used to decorate a room cooler than the comfortable temperature of a sitting-room, water at less frequent intervals will have to be given. Any fern which may be grown to generous proportions may be recommended for the purpose under consideration. The idea which I wish to convey in this connection is that we must keep in mind what is profitable to handle. In the larger cities where all plants, no matter how small they may be, are expected to be delivered, it does not pay to deliver a plant the price of which is twenty-five cents where the cost of transportation alone may be ten cents, leaving out of the question the time consumed and the original cost of the plant. In this connection we have to be guided altogether by circumstances. In smaller towns where the purchaser carries the plant or plants he has bought with him, a cheaper class of plants may be handled.

Flowering plants are always popular at this gay and festive Christmas time, but if the weather happens to be cold there is much valuable time taken up in the packing if we would have them delivered in good shape. Azaleas are among the most showy subjects for this purpose, and if kept in a cool room will last in good condition for some time.

A well-flowered cyclamen with ample foliage is an ideal plant for Christmas. I have known individual flowers of this plant remain perfect for six weeks in a window having a northern exposure in a cool room.

Nearly all the begonias may be recommended. The bright metallic lustre of B. Thurstonii makes a telling contrast among other plants, and although it is not a free bloomer it may be sold as a small plant and may be grown easily to as large as it can be easily handled.

Chinese primroses are about as useful as anything can be in a flowering plant, as they may be sold as a small plant cheap, or may be grown in size to occupy an 8-inch pot or a 10-inch pan. Plants of that size healthy and strong ought to retail readily in limited quantities at from seventy-five cents to a dollar each.

Lilium Harrisii for variety can be used to some extent, and if the buds are showing from half an inch to one inch in length by putting them in a temperature from 70 to 75 degrees at night and an increase of 20 degrees in the daytime, they may be had just right for Christmas.

Most of the showy and beautiful crotons may be recommended, and if given a sitting-room temperature and carefully protected from cold drafts of air there is no reason why they should not

present a bright appearance all through the winter; but if allowed to become chilled and remain so for any length of time some of their leaves will surely fall. All the varieties suitable for bedding purposes may also with confidence be used in the home.

The use of plants for home adornment is on the increase, and can be still further used if florists themselves would only take plants to their own homes for the purpose of experimenting. Intelligent advice can then be given to those purchasing plants. I wish to emphasize the point that I believe more plants are killed by neglecting to water them than all other causes combined, and especially is this the case in the hot and dry atmosphere of American homes. If a plant is not over potted and the pot is full of live working roots when taken in a dwelling-house it will require a good watering at least once a day and very often twice—that is to say, if it is placed in a temperature of from 65 to 70 degrees. The first few days of a plant's life in a dwelling-house generally seals its fate. The change from the moisture-laden atmosphere of a greenhouse to the dryer one of the residence is very great, and if water is not given in generous quantities at the root in the two or three first days of its new and radically different environment its doom is sealed.

Enough thought and experiment by practical men has not been given this branch of the retail trade, but it will come in time and the volume of business largely increased thereby if accurate and thoughtful advice is given along these lines. Is there such a thing as a plant remaining too long in a house in perfect condition? I think not. Every healthy plant in a home is a constant advertisement and will encourage everybody who sees it to go and do likewise. Make a rough estimate of the number of homes there are in America, you who are mathematically inclined, and that will give you an idea how many plants could be used in this broad land if only one in a hundred made an intelligent effort to grow them therein. W.

Holiday Trade.

Trade is always assured on holidays, and especially at Christmas. One does not need so much to push it at this time of year, as to wisely prepare for the rush. One thing that is possible to do is to get up a lot of salable plants suitable for the season, and see that they are in the pink of condition. They will sell, as every report of Christmas trade intimates. Besides the palms and plants in general of this description, don't neglect blooming plants; everybody seems to want them, and while there isn't the variety to be had as at Easter, the trade isn't nearly as critical. Some of the newer begonias are compact growers and at this season of the year are fairly smothered in pink white or blush bloom. Those of the semperflorens type seem to do well in the house and give satisfaction. Primula obconica, grandiflora type are really beautiful in growth and flower, notably Grandiflora fimbriata which is equal to Sinensis fimbriata, and much more graceful. These new hybrids are such an advance that the older obconica must give way.

The cyclamen trade is immense at this time of year, and is to Christmas what azaleas are to Easter simply indispensable. Try it for plateaus, bedded in green moss and bordered with small ferns. Speaking of ferns, Nephrolepis cordata compacta in many respects is more useful than the so-called Boston fern. It sells at sight in all sizes. Pteris serrulata cristata nana, is altogether the best one fern for ferneries. It is so lasting, and not nearly so perishable as are many others.

Compact plants of Otahcite orange well fruited in a neat jardiniere, are excellent for table use at the Christmas season and are often used, set inside a wreath of holly—made to order, not the common stuff—hawked about. That is generally quite too common for any nice use. Christmas greens can be profitably handled by the florist provided he deals in first-class stock only. The common grade is piled up everywhere, and there is no money in it.

The best selling cut flower in quantity, of course, is a colored carnation. If all white flowers just at this particular time could be dyed-in-the-wool anarchists, what a boon it would be to the Christmas trade. White flowers being naturally in preponderance, colored ones must bring more money and therefore quote accordingly.

There will be no surplus of cut flowers. The season is not at all favorable for big crops in any of the usual lines. Violets will be good, but not in extra supply. From what I have learned there will be a shortage of good carnations and first-class roses will be scarce. I am quite sure there will be no slump and the disconsolate wail that is becoming a chronic "chestnut" at head centers will let up for the time being. The fact remains, good flowers are bound to sell, but there always seems to be a flood of worthless trash, that in these days of critical buying is not only superfluous, but a folly to accept at any price. It is no use to attempt to sell anything but fresh cut flowers at Christmas.

As might well be expected there is considerable friction in holiday trade, supplies don't pan out as expected or promised, and in the rush some blunders occur in filling orders, and many customers are Shylocks to deal with. Altogether, one sometimes wonders where the "good will to man" comes in. As we grow older in experience we learn, however, that tact and finesse overcome much of the friction, and philosophically accept exasperating competition. GROVE P. RAWSON.

Holiday Trade in the Retail Store.

The first thought that comes to the writer's mind is an attractive store, not from the window alone, but inside as well. Windows can be made to look very attractive by being adorned with holly to form the border, and some choice plants of adiantum in front as close to the window as possible, then a row of cyclamens raised above the adiantums, and a background of kentias and Pandanus Veitchii with a vase of poinsettias, and a few bright colored wreaths of cape flowers suspended from the ceiling. I think we all make a mistake in waiting until the last minute to decorate our store for the holidays. The store should be in shape at least one week before Christmas with every temptation to induce the purchaser to buy and order ahead. It will not only help us financially, but gives a certain prestige to the place, and the customer will say, "They are alive and up to date."

Last year taught us a lesson not to be forgotten this year. The demand was greatly increased over the previous year for potted plants, and the sale of roses and cut flowers was less, for the simple reason that cut flowers are expensive and the grower will not be induced to not "pickle" his stock, so nothing is gained in this respect, for by the time the retailer sells that stock it is anything but fresh, and our customers are awake to this fact, as they make more substantial purchases in the line of palms and blooming plants, thereby having something to show for their money after Christmas day is over; take, for instance a choice Kentia Belmoreana in a jardiniere or pot covered with crepe paper with a bow of ribbon on each side.

We had last year a big demand for azalea plants, the pot being covered with crepe paper, keeping the color of the paper in harmony with color of the flower. These plants can be sold from $2.50 to $5 and $6 each. For a cheaper present primroses can be adorned in a similar manner and sold for 50 cents each. The Boston fern also makes a pretty present, if fixed in the above manner and can be sold for $2. We are filling small baskets with cocos, small Pandanus Vietchii, pteris and other assorted ferns, placing a pretty border of ribbon on top of handle, and selling them for $5, with a nice little profit. S.

Washington Park, Chicago.

NEW CONSERVATORIES AND GREENHOUSES.

For several years the Washington Park conveniences have not been adequate for plant cultivation. The South Park commissioners fully realized this fact, but were anxious not to take any steps toward building until work could be well and satisfactorily done.

The president of the board, Mr. James W. Ellsworth has been ably supported by his coadjutors and the result is a series of horticultural buildings that are up to date and possess all modern conveniences, so that, after all, it has paid to wait. The plans for the conservatory building were designed by the D. H. Burnham Co. of Chicago, and for elegance of outline, utility and convenience they have no equal. A block of houses has also been erected for supplying the conservatory and grounds, which are worthy of being described separately so will defer any further mention at this time.

The conservatory buildings end north and south, with frontage to the west of about 440 feet in length. The material for the basement is stone, surmounted by a skeleton structure of steel and iron, the glazing being mostly ribbed or ground glass.

The dimension of houses are:

	Length.	Width.	Height.
Center dome,	82 ft.	59.	45
North dome,	63.4 ft.	53	37
South dome,	63.4 ft.	53	37
North curtain,	114 ft.	39	25
South curtain,	114 ft.	39	25

The treatment of the interior is entirely away from general usages, there is not a single bench or structure of any kind to be seen, everything is either planted out permanently or plunged temporarily in position. The collection of plants one need hardly say is very rich and after a year's growth the permanent plants will become magnificent, particularly this applies to palms, ferns, aroids and marantas, not forgetting broad-leaved Japanese plants that were secured from the World's Fair. These permanent plants are to be found in the three domes, but it is the treatment of the curtains in which the most interest is displayed by the general visitor. Running through the center is a broad brick walk 9 feet wide, red in color and well laid, the edges have bricks on end forming a herring bone line from end to end, next to this is a belt 10

inches wide of the finest grass turf, then comes the border which extends back to the pipes being about 3 feet high there and sloping to grass verge. The margins in north curtain are red and rose Chinese primulas, about 2,000 plants plunged to the pot rims. Then come masses of the two stevias, great groups of poinsettias, boxes of paper white narcissus. The old yellow cestrum, fine bushes of hibiscus, here and there a fine European laurel and at each end are miscellaneous groups of conifer, agaves and yucca.

The other curtain is treated on the same lines, the objective features being just now a splendid collection of shrubby flowering begonias, of which Mr. Kanst has always had a fine collection. There are boxes containing 4 and 5 plants, each nearly 3 feet across. There are others in 6-inch pots to fit in the margins; then there are big bushes of yellow and white daisies, and numbers of abutilons of nearly every variety known, with some yuccas and agaves. The end north of the house has a semicircular group of cacti, the south end has groups of agaves and yuccas.

Climbers have been planted to cover main ribs of curtain, such as passifloras, jasmines, cledendrons, cobeas, allamanda, bougainvillea, etc.

The curtains are rearranged every other week, and as there is about 3,400 feet of surface in each to be changed some idea of the number of plants required for this purpose can be imagined, as it is intended to have a succession of all.

The heating plant is elaborate and complete. The source of heat is the electrical power house and is the exhaust steam which is virtually what otherwise would be entirely wasted. There is not more than ¾ lb. to 2 lbs. pressure on steam guage when the whole of the plant is running. The system is known as the vacuum plan of treating steam and works perfectly in every detail. Provision has been made so that in case of accident live steam from another source can be used.

The main pipe is 14 inches diameter for 700 feet to where it enters the conservatory buildings. It is carried underground to this point where it enters the south dome and is raised about 8 feet from the floor surface, branching right and left and continuing on either side of the dome. The main is reduced to eight inches on each side of this dome, continuing the same through the south curtain, also through the main dome; coming to the north curtain it is further reduced to 6 inches and ultimately in the north dome to 4 inches. The total length of mains to and through conservatory buildings is 2350 feet. All mains are felted and covered with asbestos canvas.

The heating proper is through lines of 2-inch pipes, nothing but 2-inch pipes being used throughout the entire system. The lines of pipes are placed near and within 8 inches of the exterior walls, with the exception of a 2-inch pipe which is placed along the gutter roof line, which is an excellent idea. No more simple or satisfactory arrangement could be made taking up little space and easily controlled.

The lines of 2-inch pipes in the main dome are, 4 pipes wide and 8 deep (32), south dome 4 pipes wide and 8 deep (32), each of the curtains 44 and north dome 24.

Automatic drip cups are placed on lower points of each line, which work splendidly. The condensation, which is remarkably small, is returned to the power house. There is not the slightest disturbance in any of the pipes or uneven circulation.

The ventilator in general use is the challenge.

The entire charge of the indoor department has been intrusted to Mr. Edwin A. Kanst who has been brought up under the tuition of his father and will no doubt fill the position with credit to himself and all those concerned. Mr. Kanst informed me that what with the extra outside work at Jackson Park together with many changes in Washington it is much better to have a responsible head for each department.

J. T.

WASHINGTON PARK CONSERVATORIES, CHICAGO MAIN DOME, LOOKING SOUTH. DECEMBER, 1897.

One of the first requisites for the successful culture of orchids, as with most other plants, is a suitable compost for them to root in, and to the beginner it is a source of much perplexity as to what is meant by "peat." It may be here explained that there is no such material in commerce here for general use in horticulture; it is a term borrowed from the European cultivators, and while some growers go to the expense of importing it for their plants, it is neither indispensable to success nor even desirable. In a conversation once enjoyed with an excellent European plantsman, he stated it as his belief that the material that was furnished naturally in the country in which the cultivator lived, was always the most suitable for the culture of orchids. At that time our fern root was under trial in the best English collections, and I learn since has been condemned after a fair and exhaustive trial. In Ireland, as well as on the European continent, the Polypodium vulgare grows freely on the oaks in the damp woods, and there is no better fibre to use than this in those places, but again in England it is said to be a failure. The English peat is unsuitable here because of the great amount of water we give our plants, mostly with the hose too, this has the tendency to sour the mass which speedily kills all roots, where with the use of our native material, it is difficult to give too much water in the growing season in summer, and the greater amount of fire heat used here in winter dries out the plants, making it necessary to apply as much water in winter as in summer.

And now a word as to what is meant by "fern root." I do not think there is any part of the United States were moisture is present in soil and where ferns grow naturally, that we do not find the osmundas common in a wild state; they always form huge tufts of fibrous roots that are each year formed layer on layer above the last year's growth. In our section it is possible to tear up mats of osmundas that cover a square yard and are as much as to two men can lift The species that produce these mats are Osmunda cinnamomea and O. Claytoniana, or interrupta. O. regalis does not make as suitable material as the preceding, as it frequents swampy places, and one should never look for material in such a location, no matter how good it may seem; always dig it on dry high land if possible, it will be sweeter, less full of water, fern spores, lichens and other extraneous matter. We are getting in our winter supply now and the men use axes and a mattock to get it up, it is then cut in slices with a cross-cut saw, about an inch or more thick, and when all loose earth is teased out and the fern rhizomes removed it is ready for use. If not all needed at once it is put into barrels until wanted, only taking care to cover the barrels to make it air tight to prevent drying out. If the material be stored in this way, there will be no tendency to decay or mould over directly water is applied as when the root fibres are allowed to become dry and dead, the material is living and fresh always and easily cut into pieces suitable for the size pots to be used.

Anyone who has undertaken to manipulate a mat of the "raw material," as it is dug, will readily understand the need of a saw in the first stages of its preparation. A sharp axe will make little impression on it, and after the slices get dry and dead, it is even harder still to cut, so for the easy cutting into shape on the potting bench, we have a carpenter's draw-shave with one handle cut off and the other made straight; it looks like a narrow meat-axe, and is an excellent tool to work with, as it is easily kept sharp. It will be found that there will be two grades of fibre as the result of a large piece of osmunda; the lower strata will be black roots devoid of root hairs, and the upper ones will be bright red-brown, much the color and consistency of a sponge. The latter is the best to use for a top layer when potting, as it presents a free surface rooting medium, and the coarser fibres will be best to place first round the plants as it will take a long time to decay. It will stand good for four years in a pot watered continually, and this is where our material has the advantage over the foreign peat. For odontoglossums, dendrobiums, miltonias, and all fine-rooted orchids we use the brown fibre alone, with of course the addition of moss, and for the coarser rooted plants the coarser fibre is very useful.

When moss is used in the potting material, it is always sphagnum, and it answers a two-fold purpose if used in a living state and induced to grow on the surface of the pots. It is a sweet live material that orchid roots love to ramble in, and is an excellent indicator as to the amount of moisture present; one can tell at a glance if the plant be dry by the whitened appearance it assumes, enabling one to pick out ten dry plants among a thousand in as little time as it takes to write it, so it is a great labor-saving device as well as pleasing to look at. There is an old saying that was drummed into us in our 'prentice days, "that where the moss grew well the plants were sure to be happy," and it may be freely translated to mean that while there is no sympathy between the moss and the plants, the constant and careful application of water, necessary to keep the moss in a living condition is just what the plants themselves need. Sphagnum moss will never grow when watered with water that is impregnated with lime, and in lime-stone districts the moss is never found growing wild. I know of an enthusiastic cultivator who constructed tanks to conserve all the rain water that fell on the roofs, and until the newness of the tanks wore off it was impossible to get the moss to grow on his plants. It is thriving now nicely and he feels happy, for nothing adds more to the appearance of a well grown plant than a nice surfacing of moss in a living state. For cattleyas we never use a particle of sphagnum, having found that it is too apt to decay and sour the rest of the material, and it is not easy to take it out and replace it with new as in the case of odontoglossums and dendrobiums that bear root disturbance better.

In gathering sphagnum moss for use, all that is white including all the lower portion must be rejected; it is dead and of no value, just the live growing tops are all that is of value, and these will soon grow even if chopped up before use.

Many people have the impression that orchids are parasites; they have got the word parasite and epiphyte mixed up, for while the majority of orchids are air plants or epiphytes, that is, living on other plants but not at their expense, true parasites are not common in the vegetable world. The mistletoe and dodder are two most common examples, and

WASHINGTON PARK CONSERVATORIES, CHICAGO. NORTH DOME, EAST SIDE, LOOKING NORTH DECEMBER, 1897

these live at the expense of their hosts, indeed the mistletoe is eventually the death of the plant that bears it. I well remember a willow tree four feet through at the base that gradually became ever green with its load of mistletoe, and then was blown down in a gale, being sapped dry by the crop of mistletoe.

There is no doubt that orchids do derive benefit from the trees they grow on as instances are known where the tree having died the plants ceased to thrive, and again in greenhouses, plants that are difficult to grow in any other way, proved tractable when attached to tree-fern stems that were living and growing; we have a lesson to learn here, that anything sour or inert, in a word, dead, is inimical to the welfare of epiphytal plants. It is best where possible to replace the material at the roots as often as once a year with such kinds as bear root disturbance readily, such as most cypripedes, miltonias, odontoglossums and some dendrobiums. It will be found that the new roots will start off with much greater vigor when they have fresh live material to root in instead of sour dead particles that have done duty for the year past. Cattleyas are most impatient of root disturbance, and where possible at all times it is best to repot very carefully, even to sometimes placing the whole plant, pot and all within a large receptacle rather than cut so many roots.

Just here a word as to receptacles. We used to grow all cattleyas in wooden baskets or cribs, and it must be admitted they grow well suspended from the roof of the houses that were used for roses, but we found that with the best intentions possible to do what was necessary in the way of watering, there were sure to be times when water was not given when necessary and the plants suffered, simply because they were up out of sight. And again it was noticed that when a plant had filled the receptacle and the roots were wound round the bars so tightly, it was necessary to cut them off in the effort to save them, and at the corners they were so tightly laced together that it was impossible to re-basket a plant without half killing it, and it often took years to get it back again to the same vigor, some not having recovered yet. So we gave up the system and adopted earthen pans, made deep and perforated round the sides with holes proportionate to the size of the pan, and all are now stood on benches in full view so that none are neglected, and when we have a plant firmly established in a perforated pan, the same can either be cracked in pieces and the old soil removed, or the pot and all can be placed entire in a larger one. Growers have their preferences for each system, but as for us, we shall never return to wooden baskets. But if one must use the latter, see that the wood composing them is round, and then when the point of a root reaches the wood, it will cling and run round it instead of going off at a tangent directly it reaches an angle, only to be broken off the first time the plant is dipped in water. All of these may seem small matters to the reader, but it is just these that go to make up the difference between failure and success, and the conclusions reached have been the result of much inquiry and some personal observation, and it is always the case that in taking up anything new, it is the small details that are the stones in the path; things that are thought too trivial for elaboration in the classics, and yet when the beginner meets them, they rapidly assume the appearance of mountains.

E.

Precautions Against Fires.

In the past, I have often wondered why the old line insurance companies were so shy in accepting greenhouse risks, as it has always seemed to me, that with proper care in building, and reasonable precaution afterwards, there should be no more danger of loss by fire in the florist's place, than in plenty of other establishments which are not nearly so expensive to insure. Greenhouses are not generally a total loss by fire, as other frame structures usually are. The benches and the other inside material is generally water-soaked, and the amount of wood needed in the frame is small, when you consider the ground it covers.

There must be a cause for the stand the insurance people take, as their agents are apparently always anxious for business. The cause, I firmly believe, lies, in a great measure, with the florist himself. A great many of them do *not* use proper care in building or reasonable precaution afterwards. How often you see fire-pits under the working sheds, with scarcely an air space between the floor of the shed and top of the boiler or furnace, these pits too often being the receptacles for waste packing material, paper, etc. This has often been the cause of fires, not only in greenhouses but also in dwelling houses, when they make the ash pile also the rubbish pile for combustible material. Again, chimneys and short connecting flues will be built directly in contact with the side of a frame building, this would be all right, were our boilers so perfect that they would use all the heat, but unfortunately this is not the case and the smoke flue will often get hot enough to ignite wood or other inflammable material that has had months, perhaps, in which to get perfectly dry. The ladder or steps leading to furnaces, generally made of wood, will sometimes be found dangerously close to fire door, with the cinder heap near enough the foot of the ladder to leaving the top of bricks fully exposed to view. The flue connecting chimney and boiler, should be well clear of all wood work, and the steps leading to the fire, if they be made of lumber, should be as far as possible from the fire, and do not throw hot cinders near them. The boy who does the chores should be positively prohibited from sweeping anything into the stoke hole, and it should be his duty to look carefully over the top of the boilers and flues once each week, to see if any leaves or other easily ignited trash had lodged there by accident. Follow him around yourself once in a while at this work, and call his attention to any rubbish he has failed to clean off, and he will soon understand that it is of the most importance to keep that part of the boiler clear of such things.

As I said above, a greenhouse is not an especially inflammable building, but the potting or connecting sheds are at times terrors. Packing boxes, of paper or wood, old or new, are scattered around, bundles of stakes covered with cobwebs, which have been there so long getting ready and dry, shavings from carpenter work done yesterday, and a few bundles

WASHINGTON PARK CONSERVATORIES, CHICAGO GROUP OF CACTI END OF NORTH CURTAIN, DECEMBER, 1897.

WASHINGTON PARK CONSERVATORIES, CHICAGO. SOUTH CURTAIN, LOOKING SOUTH DECEMBER, 1897.

of excelsior or hay, left over from packing the last shipment of plants, and all this in that part of your establishment, I might say the only part of your establishment, where a fire can start. When such conditions exist, and they do exist in many places, is it any wonder insurance companies ask a large premium for insuring greenhouses? While it is well to take every precaution against a fire, it is only prudent to have some means of extinguishing it, if so unfortunate as to have a fire on your place. As every florist uses a large quantity of water in his business, it seems right to suppose he has a good supply to draw from, either stored by himself or in elevated tanks or drawn from the town water company, and I would strongly advise keeping a hose always attached to a pipe in or convenient to all boiler houses or work sheds. A small ¾-inch garden hose is better than nothing, but better still would be a 2-inch linen fire hose, with a brass discharge pipe reduced to ¾-inch hose to be connected direct to water main, and folded on a bracket set up for that purpose, in such a manner that it can be run out, and water turned on at a minute's notice, as in the early stages of a fire a short delay in getting your apparatus to work is often the cause of considerable loss. If linen hose is used it should be stretched out and tested with the full pressure of water at your command every three or four months, to see that there is no decay or rot going on in it. After testing it should be thoroughly dried before folding again on the bracket, which of course should be in a dry place. The cost is not great, as such hose may be bought anywhere from 10 to 30 cents a foot; if rubber lined it would cost a great deal more. It would only be necessary to use a length sufficient to reach through the shed in which it was hanging, unless you wished to give that much protection to other outside buildings.

I do not wish to convey the impression that I have avoided mistakes mentioned or used all precautions suggested, for I have not, but must plead guilty to having had sometime during the twenty years of my commercial life, all the conditions spoken of. N.

Carnations Summer Planted Under Glass.

We are giving the growing of carnations under glass all summer a trial this season and are well pleased with the trial made so far.

It is a little too early to shout much in favor of the plan, as yet, but comparing plants of several varieties treated both ways, the best results are from those grown inside all summer, particularly so, as regards stem and health of plants though treated the same, or as nearly so as possible, as the plants lifted from the field. The only thing we have found against those grown inside is that they are a little later coming into flower, though we cannot decide definitely about this, as most of the varieties under trial are novelties of 1897, and a great many of the plants were very small when planted.

We have one house of Flora Hill and one of Mrs. McBirney (this variety, by the way, seems to us to be one of the best that ever came from Richmond). The plants came to us May 20, rooted cuttings from the sand, and were potted into 2½-inch pots and placed in a light house without any shading on the glass, and remained in these pots till planted on the benches July 20. Of the shading that was on the glass at time of planting, a 6-inch strip down the center of each pane was left for about fourteen days, after which time we gave them the full sunlight, with an occasional light syringing, and were very careful to only water just around the plants till thoroughly established. The plants were not long in taking hold of the soil and since then they have made rapid growth. Most of them today are showing ten to fourteen stems, with buds three parts developed, but the best thing we find in favor of indoor grown stock is the very few malformed or even second grade flowers and also scarcely a trace of disease of any description.

We have only given three applications of liquid manure to our carnations, so far, this season and this is the only stimulant they have had except what is in the soil. We now have them in a clean healthy condition, the roots have a thorough hold of the soil and the plants are ready to take up the stimulants when judiciously

applied, a good condition surely when we have to figure on the next two months of dark cloudy weather with scarcely any sunshine. The most objectional point raised among the growers in this section is that you have to throw the old plants out too early, but I have always found that about the middle of July it is time to think about cleaning out your houses. I don't mean all of them for there is a demand at this time for white carnations but taking for instance Daybreak and some of the deep pink varieties, they are by that time of little value so that you only lose about a month, to what you would if planted with plants from the field. C. W. JOHNSON.

New York.

The usual complaint on the part of the commission men and the growers over what is to them dull business is heard again. Receipts of flowers are light and the demand seems correspondingly small. The retailers do not talk so despondingly and, as a rule, seem satisfied with the present volume and general condition of business so far as cut flowers are concerned, their only trouble being with the plant trade, which they say is greatly injured by the competition of the department stores this season, remunerative prices being out of the question under such circumstances. In looking for an explanation of the difference in sentiment between the retailers and the wholesalers and growers as to present business, it is evident that even on the dullest days, in the wholesale districts, an enormous quantity of flowers is distributed, and much of the prevailing complaint may be attributed to the fact that there are too many greenhouses, too many growers and too many wholesalers to allow of any of them getting anything like the results of former years out of the business. When a meal is divided among too many hungry people, no one of them can expect to get a full dinner. As none of them are inclined to go without food for the sake of the rest, there is little prospect of a satisfactory change in this respect for some time to come.

The rose question, at present, is in doubtful shape. Of American Beauties there are too many of the extra special quality in sight and these are sold with difficulty at prices that would have been considered ruinous in past Decembers. The medium grades find the readiest sale just now. On Bridesmaids the conditions are exactly reversed, for there is a call for more of the selected stock and a disposition to ignore the poorer grades, which, by the way, constitute the great bulk of the receipts. In this variety, especially, there is entirely too much undesirable stock, irregular in color, weak in stem or out of plumb in some respect, and the grower who figures on getting encouraging returns from it will surely be disappointed.

Harrisii lilies have been too plenty and have sold at unprecedentedly low prices. There is but little need for them during fall and the market will digest only a limited number. The overproduction has, apparently, not been the fault of the growers, who did not make any special effort to place a large quantity on the market early, but is to be attributed to something in the lilies themselves. The season in Bermuda is said to have been peculiar, the dry spring having ripened up the bulbs in May, much ahead of the normal time, and the early blooming tendency is probably due to this fact. The market is full of smilax, and most of it is disposed of at half price, and even then with difficulty.

The meeting of plant growers interested in the establishment of a permanent plant market in New York city, which was held on December 1st at the corner of Canal and West streets, brought together about twenty-five gentlemen. The meeting was called to order by Mr. Lehnig. Mr. Rapp, representing the comptroller and city market authorities, described the vacant space in Clinton market, and explained very fully the conditions on which the stands can be rented. They are 65 in number, and 32 of them have the advantage of fronting on Canal and Washington streets. After much deliberation it was decided to form an organization so as to give more stability to the movement. The officers chosen were F. Lehnig, president; W. Schultheis, vice-president; A. D. Rose, secretary; Herman C. Steinhoff, treasurer. Twenty members joined the association, and 17 stands were bespoken.

The new organization is called the New York Florists Market Association, and is to have its next meeting on first Tuesday in January.

The Thanksgiving bowling contest of the Flatbush Bowling Club resulted in great good fortune to Eugene Dailledouze, who won the 28 pound turkey for the highest score, and another one for the highest average. Alfred Zeller and P. Riley were also fortunate winners.

Chrysanthemum Mrs. C. H. Peirce.

This is an important new variety raised by Fred Dorner & Sons Co., Lafayette, Ind. The flowers are of a fine, rich, yellow color; stems sturdy; foliage pleasing and well arranged on the stem. Awarded several certificates.

NEW YELLOW CHRYSANTHEMUM MRS. C. H. PEIRCE.

Review of Chrysanthemums Disseminated 1897.

At the last meeting of the Florists' Club of Philadelphia the subject for the evening's discussion was as above. Mr. Robert Kift was appointed to open the subject, and the officers of the Chrysanthemum Society of America were each invited by the committee to give their views also, which are as follows:

REPORT BY ELIJAH A. WOOD, PRESIDENT CHRYSANTEEMUM SOCIETY OF AMERICA.

I grew but few of the '97 novelties and only saw a small number growing outside, so can hardly give you any review that would be at all complete, but will jot down a few opinions of those that I did see.

C. W. WARD. A rather pretty dahlia-like white flower; good grower and good foliage, not large enough for the exhibition table, but should think it would make a desirable commercial flower, for it is a good keeper and does not drop its petals as the flowers of this form are so apt to do.

DEFENDER.—A very good dark crimson; foliage and stem both good, and the flower is so arranged that the chamois reverse found in the reds does not show, making the bloom in my idea the best dark red yet grown. The flower is not, however, large enough to show in best twenty-five collections hardly reaching the size advertised by its disseminators, that is, eight inches, and if grown to crown bud is a little apt to scorch.

EUREKA. A beautiful white, but far too small as I saw it in the hands of a good grower to obtain a place in good collections.

EVANGELINE. An A 1 white in all respects. Many growers consider this variety the first rival Mrs. Jerome Jones has had.

GOLD STANDARD.—A large brilliant yellow that is bound to force itself to the front and be grown by all those striving to obtain the best.

GOLDEN TROPHY. A very pretty light yellow; dwarf, and carries beautiful foliage, something after the form and color of Major Bonnaffon but with many more petals, and while advertised as earlier than Bonnaffon with us it was later.

HENRY NANZ.—A light yellow sport of Mes. Jerome Jones, and has the good qualities of the variety from which it sprang, This was advartised as a golden yellow, but is far from that shade, being a light yellow with apricot shadings.

J. H. WOODFORD. A very high built white bloom from crown buds, shell pink from terminals. Not quite large enough with me for exhibition purposes.

MAUD ADAMS. A beautiful soft late yellow, makes a very handsome bloom and easily finished, though very tall.

MARCIA JONES. One of the best white anemones.

MRS. R. D. DOUGLASS. A very beautiful yellow bloom of good depth and substance. Will probably be classed in the incurved section in England, and as a member of that division deserves a good position in all exhibitors' collections.

MRS. B. MCARTHUR. A very handsome Japanese incurved white of the purest shade. The plant lacked health with me.

MRS. JOHN J. GLESSNER. A very distinct light yellow, of beautiful form and quite attractive. While rather tall, yet should be grown by all intending to exhibit.

MRS. MARTIN A. RYERSON. A very deep white bloom. A beautiful flower from terminal bud, but grows too tall for most houses devoted to chrysanthemums.

SUNSTONE. A very distinct and handsome brouzy yellow. A decided acquisition and will find a place in a great many exhibitors' twenty-five.

MERULA. A very pleasing flower of white, shaded light pink throughout, would be classed as a pink; dwarf; and beautiful foliage clear up to the flower; early; rather undersized.

THE BARRINGTON. Advertised as on the style of Mrs. Geo. West, but not nearly so well or closely built as that variety and much darker in color. A loosely built flower of wide petals and dull in color, reminds one somewhat of G. F. Moseman, Prince Kamontaki and that class, but a trifle better; not very desirable.

WESTERN KING. Supposed to be one of the best introductions of the year, but a very poor grower with the majority. I had two plants which were quite healthy and produced two very fine blooms, maturing a little late for exhibitions. It will take yet another year for this variety to be placed where it belongs.

YELLOW MONARCH. A light yellow sport from Merry Monarch and like that variety too single and without substance enough to meet with general favor. This variety would hardly receive recognition except for its extreme earliness.

This embraces all of the American novelties of 1897 with which I have become intimately acquainted, and there were two or three European novelties that should be noticed, namely Bonnie Dundee (Inc.), L'Amethyste, Mrs H. Weeks, Pride of Exmouth, Reined' Angleterre and Surprise (Anem.)

A variety introduced, I think, in '96 by Pitcher & Manda has just begun to show up in grand form. It is Henry Hurrell, and is by long odds the best early yellow on the market. It can be best described as an early H. W. Rieman, fully as large and double, with excellent stem and foliage, and can be matured as early as October 20.

REPORT BY E. G. HILL, VICE-PRESIDENT, CHRYSANTHEMUM SOCIETY OF AMERICA.

The set sent out by M. Calvat the past spring contains many very fine novelties. We did not flower all the set, but what we did see impressed us all as being out of the usual from that side.

MME. EDWARD ROGER. A citron yellow with greenish tinge, with broad petals and large flower, impresses one as a good thing, being unique in color and broad in petal.

M. D. NERLOT. A lilac pink with deep rose shadings; strong growth; good foliage, with a massive bold flower. This, we think, has many of the good points we are looking for in a commercial pink.

MADAME FORLAT. Pure white petals, regularly incurving gold. A chaste and beautiful flower.

MLLE. LUCIE FAURE. A most conspicuous white variety, with compact massive flowers borne on good wiry stems. A little like Evangeline but larger and with better texture. This, we surmise, will prove of great value.

JUBILEE. Pale mauve with silvery reverse; a large high-built, full-centered flower; growth and foliage fine.

PRESIDENT NONIN. Chamois yellow with lighter reverse; flower forms an enormous ball; dwarf habit; good foliage.

The above have figured conspicuously at all the London shows, and are the subject of extended notices from the press.

DUCHESS OF FIFE. A large massive incurving flower of purest white; a good bold flower.

BARONESS (OR BARON) ADOLPH ROTHSCHILD. Another white of massive build and of large size.

BELLE OF CASTLEWOOD. A lovely shrimp pink at times, sometimes white, but a well done flower is a most chaste object.

CASCO. A most novel and unique colored introduction; color garnet red, nicely illuminated; a good bold flower.

DOROTHY SPAULDING. A large well built incurving pink. This has extra good qualities. Think this will make a grand exhibition variety.

DEFENDER. Splendid color; free and easy to do, but lacks petals, not large enough. A good cross between this and Geo. W. Childs would be desirable.

EVANGELINE. A unique and pretty flower; white in color; a perfect incurved. Lacks a little in texture, but this may be the fault of those growing it. Look for it to be prominent next year.

EUREKA. With us perhaps the finest of the year. A most charming white variety; substance, style, texture are all combined in this beautiful sort.

GOLDEN WONDER. A very fine flower of a rich golden yellow. While quite promising it is not equal to Golden Wedding in form; worthy, however, of further trial.

J. H. WOODFORD. This is an ideal exhibition variety; a high globular bloom; creamy white with broad petals. If it has texture enough it will prove a superb exhibition variety.

MRS. R. D. DOUGLASS. A fine yellow. Has lots of good points. If it comes large enough will be an acquisition.

MAUD ADAMS, MRS. J. J. GLESSNER and SUNSTONE are three remarkably fine yellows. They all differ in form, but the three varieties are worthy additions to our yellows. The first named will prove an excellent commercial cut bloom. The two last are fine exhibition varieties.

THE BARRINGTON. A fine deep bloom; color bright maroon with silver reverse. There will be quite a future for this an exhibition variety.

WESTERN KING. This is a superb variety; a model incurving flower of splendid build; not pure white, but white enough. The weak point is its lack of constitution.

GOLDEN TROPHY and GEORGE S. KALB are two desirable early varieties, The first is a rich yellow, the last named a most excellent white.

MIDGE is good; comes early, but the foliage is too heavy for the flower. Difficult to keep from wilting after being cut.

LEONIDAS. Poor color.

GOLD STANDARD. Too much like a grape-vine in growth. Flowers good, color charming.

LAWN TENNIS Good for single stems; not a desirable color.

T. B. MORSE. Is fine in its wealth of golden hue in its petals, but it is soft and spots badly. No finer color, however, in any yellow.

MRS. H. WEEKS. This as an exhibition white certainly heads the list. It is soft in tone and of a tint which pleases the most fastidious; foliage and stem excellent.

AUSTRALIAN GOLD. One of the acquisitions of the year. An easy doer; a pleasing color; stiff stems; comes uniformly of good size Its only drawback is about 8 inches of stem between foliage and flower.

REPORT BY JOHN N. MAY, TREASURER, CHRYSANTHEMUM SOCIETY OF AMERICA.

Among those introduced this season there are several which are decided improvements over existing kinds, and will prove valuable either as commercial cut flower varieties or as exhibition sorts. In enumerating the following, I shall name such as have proved valuable in their respective seasons, starting with the very earliest.

YELLOW MONARCH. The principal value of this is that it is the very earliest yellow yet introduced—closely followed by Midge, a nice compact white of the Bergman order. G. S. Kalb is another of the same class, but hardly as good. As a very early pink Elvene is one of the very best, and a very beautiful color.

Following these as second early is Belle of Castlewood, a very fine pink of delicate shade with broad incurving petals and handsome foliage.

G. F. ATKINSON, another pink, and a bold handsome flower.

J. H. WOODFORD did not come up to standard with us. In whites, Evangeline has more than sustained its reputation as a sterling novelty; A 1 in every particular.

MRS. R. D. DOUGLASS is a good yellow, but hardly comes up to our expectations.

MERULA. A dwarf second early pink; will prove valuable where a solid compact flower is wanted; dwarf grower and good constitution.

CASCO. Is a fine bold flower; garnet color, and would be a good thing if it could be kept from burning which destroys its value.

DEFENDER, another deep plum shaded crimson has the same disagreeable trait of burning.

Following these for midseason comes Western King, a very fine white with habit and constitution good.

CASTLETON is also a promising variety. C. W. Ward is not quite up to the standard quality. Eureka is a very handsome flower when well grown. Halcyon is a handsome anemone where variety is desired. Lorna Doone with us did not fill the bill.

MRS. J. WITHERS is a very handsome flower; in color a little lighter than Minerva but fine. Pres. Wm. McKinley is somewhat disappointing, although if well grown it is a handsome flower of good habit.

THE HARRIOTT will prove a valuable late variety; deep silvery rose. Mrs. M. A. Ryerson, pure white and a valuable addition. Thanksgiving proves a valuable late variety also; its greatest fault is that it takes a long time to fully develop, which causes the lower petals to get somewhat pale in color. Among varieties suitable for collections where distinction either in form or color is desired, Symphonia, beautiful shade of carmine pink; Leonidas, amaranth; Sunstone, yellow and red; and lastly the gem of the season is in my estimation Mrs. H. Weeks, a mammoth white, very pure in color with petals distinctly hairy; this is an importation. Also Frank Hardy, another white, a sport of Good Gracious, and like its parent distinct in form.

There may be some others among this year's introductions which may be valuable for particular purposes, and where they are better grown than with us, but in the foregoing I have named such as have done extra well with us under general cultivation, without special care.

Chicago.

Market opened this week with a decided scarcity of better grades of stock. Pink carnations, especially, were short Monday, all that came in being disposed of before 9 a. m., and at relatively better prices than they have brought at any other time this season. Since Monday the stock of carnations has been about equal to the demand, with the exception of whites and reds, some extra McGowans and Tidal Waves bringing $3.

The chrysanthemum season is virtually over; the few that are coming in have a weary and dejected look, as though conscious that their glory had departed and they were intruding upon affections that had already been bestowed upon fresher favorites. Owing to a slight decrease in quantity of stock and largely increased demand the price of Beauties has nearly doubled during the past week. Brides are fair, quality and quantity about equal to the demand. Selected Maids are short in quantity, and many of inferior quality. Meteors are in fair supply, although many a little dark in color. Perles have moved rather slowly. Valley is in fair supply.

Reinberg Bros. are cutting some fine La France and Kaiserin. At Geo. Klehm's some very good Belle Siebrecht are shown. Heim Bros.' Tidal Waves, seen at Vaughan, McKellar & Winterson's, were phenominally good.

Harrisii lilies were never seen before in this market so good as they are now at this time of the year, and are quoted at $12 per hundred, supply about equal to demand. The prospect is that there will be plenty in for Christmas at slightly increased prices. Violets are coming in a little more freely, and are slightly improved in quality. Many growers have already commenced to send in stock that shows plainly the effect of the pickling proeess.

Wholesalers report orders for Christmas stock coming in freely, which is much earlier in the season than ever before. The prospect is that all the good stock will be sold at Christmas at prices fully equal to last year's. Large quantities of Lycopodium wreathing is being made. Wholesalers report sales brisk.

It now appears that strictly fancy holly will be very scarce. Early lots so far have been thinly berried and the leaves rather dry, as if cut too early. If later receipts are not decidedly better the trade will not only be badly disappointed, but be called upon to pay advanced rates for all good stuff. Reports from Delaware state that leading packers are already refusing new orders.

Small ferns for filling ferneries have sold better this season than ever before. The stock of ferns suitable for present use is nearly disposed of.

Albert Fuehs has filed a claim in the Circuit Court in which he sues Andrew Weber for $25,000 for alleged trespass. The filing of the suit is a sequel to several lively incidents which, it is alleged, occurred in the florist's store about ten days ago.

F. Steelow, of Niles Center, who has been very sick, is reported as improving.

The Chicago bowlers will leave for St. Louis via the Wabash Saturday evening, returning so as to be in Chicago early Monday morning. The braves from the tribe of the Illinois who will make this foray into the land of the Missouris, hoping to return with many scalps and much plunder, are: Phil J. Hauswirth, G. L. Grant, John Zeek, Walter Kreitling, John B. Deamud, J. S. Wilson, Charles Held, Chas. McKellar, Ed. F. Winterson.

At the meeting of the Florists Club Thursday evening a large attendance and 10 applications for membership were the cause of the expansive smile and contented expression which appeared on the countenance of every member of the faithful few. The admission of Ed. Winterson, Lloyd Vaughan, of Vaughan, McKellar & Winterson, makes this firm very much in evidence in the club. John Degnan, of Vaughan's seed store, was a new accession, and Messrs. Barnard and Ringier, of W. W. Barnard & Co., were present. Members of other wholesale houses were conspicuous by their absence, and the retail trade was not well represented.

Messrs. Hauswirth, Wienboeber, G. Stollery, Wilson and Hartshorn were appointed a committee on the Carnation Society Convention, and were instructed to request all the principal members of the trade to join with them in preparing for the reception of the Carnation Society in true Chicago style.

The topic for discussion for the evening, Fumigation vs. Insecticides, was introduced by Edgar Sanders, who was followed by various members of the club.

A representative of Nikoteen was present and joined in the discussion. Samples of the new Nikoteen fumigating paper were shown. This would seem to be a very simple and easily used material for the destruction of green fly and thrip.

The meeting adjourned to the bowling alleys, and the boys proceeded to demonstrate how they were going to "put it all over" St. Louis; but perhaps St. Louis may have something to say about it.

Philadelphia.

BUSINESS MOVING AT A LIVELY GAIT.—GROWERS READY FOR CHRISTMAS TRADE.—MEETING OF CLUB LAST TUESDAY.—ROBT. CRAIG ILL.—J. WARNER HARPER ALSO SICK.

Business is moving along at a good rate of speed, the supply of flowers about keeping up with the demand, although violets and Beauty roses can hardly stand the pace and a number of times lately have had to be hurried up.

The debutantes are with us once again, and right glad all hands are to welcome them, for each important event uses up from one to two thousand roses, and as the best are hardly good enough the prices are sure to be right. A popular young bud is generally presented with anywhere from forty to eighty bouquets, composed of two to four dozen roses each, combined often with other flowers such as orchids, valley, violets, etc. Where so many bouquets are being sent there is much chance for variety and great taste is displayed in their arrangement by the up-to-date artist.

The demand for so many bouquets is a great boon to the florist, but it is feared that it will soon be overdone, as the desire of Miss Smith, who is coming out, to have more bouquets than Miss Brown, who came out last week, fairly swamps the resources of the parlors to hold them. They are piled over mantels, cover the

top of the piano, and in many cases small folding tables have to be hired on which to properly display the trophies, so that the donors will have chance to see their particular bunch.

Roses are up a bit, the best grade of teas bringing $6 per hundred, carnations are up to $1.50, and select specials $2. Violets are $1.50 per hundred for the best doubles, while singles sell, for California and Princess of Wales, $1 per hundred for first grade. Beauties are selling from $3 to $5 per dozen and quite scarce. More planted them than ever before and yet the demand keeps pace with the extra supply.

The palm men are moving their plants quite lively, stocking up for the Christmas trade being the order now with the storekeepers. We have never seen a finer assortment of foliage plants than that offered by the growers this season. W. K. Harris's stock is quite up to his reputation, and his collection of fine plants reflects his skill as a grower. His specimens of all the popular kinds of palms, dracæna, pandanus, etc., would take prizes in many exhibitions. His oranges full of fruit are very ornamental, and the house of well-flowered azaleas, almost up to the Easter standard, are welcome additions to the Christmas assortment.

J. W. Colflesh, of Fifty-third street and Woodland avenue, has several large houses filled with palms. His large kentias are fine specimens, and some well grown latanias make good decorative plants. A house of arecas, together with a table of pandanus, make up his assortment.

Robert Craig has, as usual, a splendid collection of standard decorative plants. Everything suitable for store trade is grown in quantity, his medium or popular sizes suitable for everyday business being varied.

A lot of crotons coming on make fine stock for working into jardinieres and fern baskets for the holidays. His large house of cyclamen is full of strong, healthy plants, full of flowers. This is one of the very best of Christmas plants.

Mr. William P. Craig is on top with a house of the Boston Fern, mostly large sizes. His plants would be hard to beat anywhere. The next two weeks will no doubt relieve him of their anxious care.

Jacob Becker has a handsome lot of azaleas, of which he is very proud, and justly so. This batch will all go for the holiday trade.

Joseph Heacock is right "in it," so to speak, with his arecas. They are certainly fine plants and great value for the money. Palms are comparatively new residents of his place, but he has shown skill in raising them equal to the best.

Charles D. Ball has his usual fine stock. He is exclusively a grower of palms and foliage decorative plants, and his establishment is noted for its always neat and tidy appearance; nothing seems ever to be out of place. His plants have the same neat and precise look, and in a house of this or that kind of palm it seems difficult to select one plant better than another.

Lemuel Ball is also a palm specialist, and his kentias, arecas, cocos, and other plants are fit to take place in any company. His large 10 and 12-inch pot arecas are hard to beat.

Bradley Redfield, of Glenside, Pa., is a fern specialist, and has a great assortment of fern pan stock. An order for a hundred or a thousand of any kind is all the same to him, and is filled with alacrity. A house of the Boston fern in pots and pans is rapidly thinning out.

John Welsh Young, of Germantown, is strong with Pandanus Veitchii and Boston fern. J. Wolff, Jr., of Nineteenth and Columbia, also has a fine house of primulas, which are elegant, well flowered plants. Wm. Meckie, of Sixteenth and Tioga, with begonias, stevia, poinsettias, and other blooming plants about makes up the list, from which it would be a most fastidious dealer who could not get everything he needed to both fill and swell his Christmas bill.

The Florist Club meeting last Tuesday evening was quite well attended. There was not much to disturb the even tenor. President Harris now handles the gavel like a veteran, making his announcements and appointing his committees in such an authoritative voice that there is no backing out.

Robert Kift read a review of the new mums of the past season, written at the request of Secretary Lonsdale by President Wood, of the National Chrysanthemum Society; also one from Mr E. G. Hill and another from Mr. John. N. May. These reviews were full and complete, and contained much information about the new varieties, showing their merits and demerits. They were given to the publication committee to be sent to the press.

Albert H. Herr was present, wearing a pretty deep pink carnation in his buttonhole a few shades darker than the healthy color in his cheeks. The Lancaster County air is a great tonic for both flowers and people. Mr Herr is to read a paper on "Carnations of 1897" at the next meeting.

Robert Cary had two large blooms of a late mum Robert Edgerton, a pale lilac, very double.

Robert Craig is very sick, having bronchial pneumonia, and typhoid fever. He has been confined to his bed nearly two weeks, and his case is quite serious.

J. Warner Harper has also had a bad attack of pneumonia, but is now considered out of danger. K.

Boston.

CUT FLOWER BUSINESS SLOW—PLANT TRADE ACTIVE—CARNATIONS AND VIOLETS LOWER—HOLIDAY PROSPECTS—PREPARATIONS FOR A LARGE HOLLY TRADE—TESTIMONIAL TO E. M. WOOD—MR. HATCH IS SURPRISED—A FINE BEGONIA.

The wholesale cut flower dealers have found business inclined to settle back into the old rut since Thanksgiving, and the cold weather of the past few days has apparently had an unfavorable rather than advantageous effect, for it has made the street peddling business precarious, and the surplus stock that in mild weather finds its market through this outlet is left to accumulate in the hands of the wholesalers, to be sold finally, when faded and limp, at any figure it will bring, to get rid of it. This has been particularly noticeable in the case of carnations and violets, which have been very sluggish. Roses of the ordinary grade are similarly situated, and prices are low all through the list. All are now looking to the holiday season to replenish their depleted bank accounts and put the long-delayed boom in motion.

The retail establishments put on a bold front and are making a hustle for whatever trade is presented, but there is not enough to divide among so many and provide any of them with a profitable share, although they have the advantage, which the wholesalers have not, of the plant trade, which is at this season of the year fairly brisk. A gratifying call for palms, rubbers, and other desirable subjects for window or hall adornment is reported generally, and most of the retailers are carrying a good stock of such plants this fall, the window displays being composed mainly of these, while the cut flowers are kept in the refrigerator until they are wanted.

One hears but little talk, as yet, about Christmas cut flower prices, conditions not being favorable to hopeful speculation on the basis of advanced rates. A few years ago such weather as we have experienced for the first week of December would have set values soaring and the terrible famine in prospect for the holiday season would be the daily topic with those most interested in the inflation process of which these sleep destroying predictions were an important part. In the present relations of supply and demand a resort to arguments of this kind would be a waste of time and barren of any result, so it has apparently passed into history as a sweet or bitter memory of "the good old times," according to the side of the fence the individual may have found himself.

Those who have facilities for the transaction of a large business in holly and Christmas "greens" are making the usual preparations for a rush. Prices are lower on most of these goods than ever before, not because the stock can be handled any more cheaply nor because it is not well worth the old rates, but as a result of sharp competition and the consequent cutting of prices, which are now down to where very little profit is left in it for any one.

The "surprise" banquet to Mr. E. M. Wood came off as arranged, at the cozy Hotel Crescent at Waltham on Thursday, Dec. 2, and was a grand success in every respect excepting that the surprise, like the flea, lit in the other place. When the guest of the evening, who was supposed to have been in ignorance of the preparations to honor him thus, being called upon, pulled from his pocket and proceeded to read a nice typewritten response, Toastmaster Ed Hatch struck a snag which almost paralyzed him and created no end of fun for the balance of the party, but an auctioneer does not stand long disconcerted, and when Mr. Hatch had recovered and found his voice he made the supreme effort of his life and put every one into hysterics by his vigorous condemnation of the deception that had been practiced on him. It was altogether a grand time for the eighteen participants, and Fred Mathison, who fully realized the importance of such an historical event occurring in his bailiwick, was beamingly hospitable. The decorations of the room were especially fine.

On Saturday, Dec. 4, F. L. Harris exhibited a superb plant of Begonia Glorie de Lorraine at Horticultural Hall, for which he received a silver medal. It was covered with a multitude of flowers, and attracted much notice. There were some interesting cypripedium seedlings from J. C. Rothwell and C. G. Roebling.

At the meeting of the Gardeners' and Florists' Club on Tuesday evening Q. A. Ward read a paper on "Fixed Alkalis as Plant Food."

The Botanic Garden at Harvard University received a large case of plants from Alaska.

Visiting Boston: J. Austin Shaw, representing Seibrecht & Wadley, New Rochelle, N. Y.

Florists' Fire Association.

The meeting of the members of the Florists' Fire Association was fixed for last Monday. No election was held and the meeting adjourned for one week. The principal reason for the postponement was that a number of the persons whom we were instructed to vote for as directors had not filed their applications for insurance. The applications were not sent out until late and all are coming in rapidly, but it takes time to round up matters. As soon as sufficient applications are in policies will be issued.

A misunderstanding has arizen over the requirement that heating pipes shall be properly insulated. The present committee are of the opinion that steam pipes in contact with wood near the boiler, when it is very dry, are dangerous, but that in the greenhouses or away from the boiler, under ordinary circumstances, are not dangerous.

The rate fixed is thought by some to be too high. It is believed by this committee that it is higher than future assessments should be or will be. But it is safer to start too high than too low and all will benefit by it in the future if too high.

W. J. VESEY.

BELOIT, WIS.—Mr. John Kindfleisch has recently purchased about twelve acres of land near the Rock River, where he will move his greenhouses next summer, and will also add several new houses.

SOUTH ORANGE, N. J.—Michael Lyons, of Orange, has bought the Lyons estate at Mountain Station, which has been leased and conducted by H. F. Haase for some time. Mr. Haase has now rented a greenhouse from Mr. H. A. Page at Mountain Station, where he will continue business.

SITUATIONS, WANTS, FOR SALE.

Advertisements under this head will be inserted at the rate of 10 cents a line (seven words) each insertion. Cash must accompany order. Plant advs. not admitted under this head.

Every paid subscriber to the AMERICAN FLORIST for the year 1898 will receive on request, a coupon for one five line want "adv." free, to be used at any time during the year.

VAUGHAN'S SEED STORE, Box 688, Chicago.

FOR SALE CHEAP—Five greenhouses heated with hot water, everything in good running order, and convenient, shipping cut flowers; a good trade; have a store to ship to; likewise Milwaukee health is too poor to run same. MRS. ENGLISH, Oconomowoc, Wis.

BUSINESS OPPORTUNITY.

One of the most valuable florists' establishments in the Middle South, ½ interest for sale, or will lease to an enterprising, wide awake business florist; 7 modern greenhouses, 25x150 ft., one 30x75 ft., three 20x50 ft., 75-foot violet house, frames, splendid windmill and watering facilities, packing sheds, office, 5 acres of splendid land for rose growing situated within easy access of Atlanta, Ga., on one of the most beautiful driveways of the city. Florist store in the Kimball House block with first-class facilities, and the best stand in the city; connections with several of the largest tourist hotels in Florida, with shipping trade to all Northern started. This is an established business with unlimited opportunities for enlargement. Aside from the cut flower trade there is a large opening for building up a shipping trade in nursery-grown roses, which thrive and make more growth here in one year than in three seasons in the North. The owner has other large interests which occupy his whole time and wants a thoroughgoing man who has some means and an ambition to extend an already well established business in this exceptional field. This is not a broken down or failing establishment. The owner does not desire to sell out the greenhouses, but would dispose of an interest or lease, so that an enterprising florist would have such interest as would insure his exclusive application to maintaining the high character of the present business and working for its extension. Address JOS. THOMPSON, Atlanta, Ga.

For Sale or Lease.

Three greenhouses containing 2,500 sq. ft. of glass. Only one in county in a town having a population of 5,000 inhabitants and a great watering place.

The reason of getting rid of the business is ill health. None but those meaning business need apply. Address
BOX 456, Martinsville, Ind.

FOR SALE OR RENT.

In one of the best cities in Ohio, 12,000 inhabitants, 6 000 square feet of glass building only one year old, heated with steam, stocked throughout with Palms, Ferns, Roses, Carnations; a fine assortment of plants. $3,300 buys it, part cash, rest on long time; good place for a hustler. Must sell on account of other business. Cost $6 000.
Address BARGAIN, care Am. Florist, Chicago.

A Rare Opportunity.

FOR SALE—Florist store on Broadway between 31st and 32d Sts., and opposite one of the most prominent hotels in New York. Weekly profits up to the present time $100. Rent very low. Will dispose of same very reasonably. Reason for selling, other large business takes my entire time.
J. FLEISCHMAN, 25th St. & Broadway New York.

FOR SALE.

At less than half its cost, or for rent, about 28,000 square feet of glass witb grounds and modern 12-room dwelling, built a year and a half ago; greenhouse nearly new, all heated by steam, well stocked and in good order; located on street car lines between St. Paul and Minneapolis, and a well paying wholesale business established. A splendid opportunity for a good live man. Sale price, $10,000; rent $150 per month. If you mean business, address CHRIST HANSON, St. Paul, Minn.

FOR SALE.

Greenhouses in one of the best cities in Wisconsin. A good investment and a money maker for a hustler. Owner must retire on account of poor health

For particulars write ELLIS & POLLWORTH, Milwaukee, Wis.

CONDITION OF MARKET. — FIRST HOLLY DECORATION. — ANTIRRHINUM BECOMING POPULAR. — VARIOUS ITEMS.

The zero weather last week elongated the face of the florist, while the coal man had on a broad grin. The furnace was like what the child said of the locomotive, a big iron horse that ate coal and water all the time, and is like Oliver Twist, always crying for more. The night fireman gets hot before the boiler, he raises steam with the man who he says don't clean out the flues and ashes, he in turn brings his woes to the foreman, who has troubles of his own, for water pipes will burst, glass will break, drafts will strike the roses where you are sure there are none, transportation is blocked, and flowers must be cloaked and hooded like a baby to withstand the weather. Still our friends say, "such a lovely business," "such a pleasure to pick flowers I am sure." But for a time "the winter of our discontent is over," the mercury hovers around 60, the sun is shining, and if he did not get up so late and go to bed so early we might imagine it was April instead of December. The Park Commissioners have about negotiated the purchase of a park site of sixty acres on the south side, and all hope for its improvement in the near future. The proposed ground surrounds a natural lake and can be made most attractive. They are also building new greenhouses at City Park. This addition will help the able superintendent to supply the endless number of bedding plants required to beautify the numerous parks of the city.

The flower trade is fair, society very gay, but using inexpensive decorations. The first holly decoration appeared this week. An abundant supply of mistletoe is reported in Texas, and will appear in this market in about ten days.

In visiting greenhouses we notice nearly every one has a large bunch of mammoth white antirrhinum, most attractive and useful. For the introduction of this in our market we are indebted to Elijah Wood, who spent a year in our city.

The stock of roses is unusually good and abundant, carnations scarce yet, but a good promise for the holidays; Romans, violets and stevia coming in well.

Colorado Springs seems to have soil and climate suitable for violets, and good growers too. Their violets are unusually large and fine this season.

C. R. GALLUP.

DEFIANCE, O.—Mr. Christ. Winterish, who started in the florist business in this city some two years ago, has added two new houses to his plant, each 18x100. His stock, which is a general line is in excellent condition. In connection with his florist business, he carries on quite an extensive trade in the nursery line.

HOUSTON, TEX.—The Fruit, Floral and Vegetable Festival, to be held in this city December 6 to 11 will, from all indications, be a decided success.

Grand Rapids, Mich.

MEETING OF FLORIST CLUB.—PAPER BY MR. GEO. CRABB ON NEW CHRYSANTHEMUMS.—ELECTION OF OFFICERS JANUARY 4.—BUILDING NOTES.

The Florist Club held their regular meeting Dec. 7 with a fair attendance. Mr. Geo. F. Crabb read a paper on New Chrysanthemums. All were very much interested in the paper, as many have been considering what is best and most profitable to grow. It was the opinion of all present that it does not pay to grow late varieties. Extra early, early and mid-season varieties, which mature by not later than Dec. 10, were considered most profitable. Mr. A. Hanna was appointed to read a paper on Christmas Flowers, What Sells the Best, and What is the Most Profitable.

The club has about finally decided not to hold any more shows. It is hoped that all members will be present at the annual meeting Jan. 4, 1898, as officers will be elected for the following year. Hereafter the secretary of the club will be the official correspondent, and the office of press reporter will be abolished, as we understand the trade papers have been at a loss to know just whom to depend upon for a report; the matter having caused considerable confusion.

Wm. Cunningham completed, about a month ago, a house 12x100 for carnations.

Jas. Schols has just put in a 75-horse power boiler.

Instructor in Horticulture.

St. Louis.

MARKET REPORT.—PRICES.—CARNATIONS SCARCE.—VIOLETS ALSO IN SHORT SUPPLY.—CHICAGO FLORIST BOWLING CLUB TO VISIT US DEC. 12.

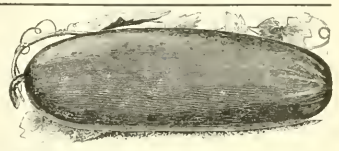
The weather this week has moderated considerably and is a relief from the disagreeable weather that we experienced the week before. The market in the beginning of the week was ushered in with a decided falling off in trade. However, all the retail stores are hopeful and contemplate doing an immense business the balance of the year. The main trouble at present which the wholesaler has to contend with is not sufficient fancy stock to supply the trade. Consequently all fancy stock that is shipped to this market is snapped up at once at top prices.

Beauties are in very good demand and will continue so until the holidays are over, fancy stock readily bringing $4. Carnots are very scarce in this market and bring top figures. Other teas are in fair supply and meet with good demand.

Carnations continue to be a very scarce article. Most of the growers in this territory are of the opinion that their crops will hardly come in for the holidays. Everybody finds the market cleaned up at good prices, fair stock selling at from $1 to $3, with fancies held a few points higher.

The supply of chrysanthemums is about over, A 1 stock being exceedingly scarce and selling readily at good figures.

Violets still continue to be in very short supply, there not being nearly enough to go around.



Bulbous stock has made its appearance and good prices are generally realized for same. Valley is a little more plentiful than for some time past.

The South Park Floral Co., of Newcastle, Ind., who captured all the carnation prizes at our show, still continue to send along their fancy carnations in liberal quantities, and we must say they are the finest that are received in St. Louis.

W. J. & M. S. Vesey, of Fort Wayne, Ind., continue to send their large cut of flowers to this market, and find that St. Louis is one of the best markets in the country all the year round.

The Chicago Florist Bowling Club are coming down Sunday, Nov. 12, to roll a match game with the home club. The famous florists' quartet of the city by the lake will accompany them, and if St. Louisians experience any wind storms, cyclones or tornadoes they will know to whom to attribute the cause. Our bowlers are confident that the lads from the windy city will have to go home via the "all tie" route. The bowling club had their regular roll last Monday night, with a full attendance. Emil Schray was high man with 257, Chas. Kuehn second with 246. Kuehn also rolled 671 in three games. A. J. B.

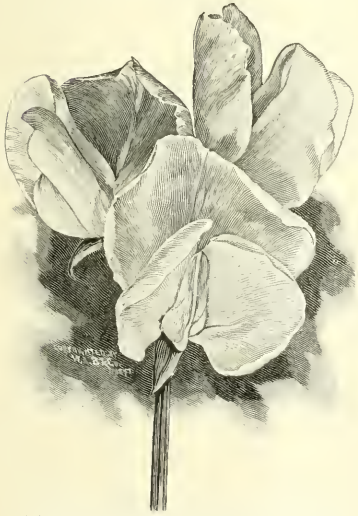
NEW PEA "GRADUS."
LAXTON'S Finest Early Pea of the Century.
Large Podded, Wrinkled, First Early.



Highest Award, First Class Certificate from the R. H. S. after trial.

--WITHOUT doubt this is the greatest advance yet achieved in early Peas, for although the variety ripens with "William 1st" and "Eclipse," the deep green colored pods are of the size and as well filled as those of Duke of Albany, with large wrinkled Peas of the "Ne Plus Ultra" color when ripe and quite equal with that famous, as yet unvanquished variety for flavor. "Gradus" is also the most distinct early Pea yet raised, and is alike good for table and for show. PRICE—$5.00 per bushel. We have already booked large orders for the States for this variety. TERMS—Cash with order or London reference

LAXTON BROTHERS, Seedgrowers, Bedford, England.

SWEET PEA prices are steadily stiffening.

SWEET CORN though scarce is not readily salable at any material advance.

MR. S. F. WILLARD secretary of the American Seed Trade Association has just completed his annual fall trip through the west.

THE Sunset Seed and Plant Co. issue a neat photographic hanger showing their sweet peas in bloom at the Hamburg Horticultural Exposition.

THE SEED TRADE lost an ornament in the death of Mr. Oliver Landreth, and also lost the best posted man in the trade on peas and beans in the death recently of Mr. T. V. Maxon, of Adams, N. Y.

W. M.

MR. EUGENE SCHAETTEL, the representative of Messrs. Vilmorin-Audrieux & Co., Paris, who has been visiting the trade here during the last few months, returns home on S. S. La Bretagne sailing December 11.

Asparagus Sprengerii.

We would like to know the best way to propagate Asparagus Sprengerii.

SOUTH.

We have not been able to root A. Sprengerii from cuttings; it may be propagated by division, but much the best and most economical way to multiply it is to grow it from seed, which germinates in four or five weeks from date of sowing, in a night temperature of 65°. The seed usually reaches this country from Europe in December, and if sown without delay, will make good plants in 2-inch pots for mailing in April, or these young plants may be shifted on and will fill a 6 or 7-inch pot with roots by fall. It is a gross feeder and is benefitted by frequent manure waterings; it requires full light at all times. The glass over it should not be shaded at all, even in summer; if grown under shaded glass it lacks vigor.

ROBERT CRAIG.

CHOICE SEEDS.

VERBENA GRANDIFLORA.

This improved strain of Mammoth Verbenas gives perfect satisfaction to my many customers, and is justly claimed to be the finest in cultivation; florets and trusses of extra large size, all the finest colors.

STOCK IN FAIR SUPPLY.—WM. SCOTT CONFINED TO THE HOUSE WITH SORE FOOT.—CARNATIONS AT CHAS HEWSONS.—VISITORS.

We have had a little break in the winter, with mixed rain, snow and mud which has of course had its effect on the retail trade, and things have been quiet for a few days Flowers continue in fair supply, with no tendency to overload the market with good stuff, and prices are strong. Violets remain scarce and high with few offering, and there is no present prospect of a better supply. American Beauties seem to prevail in the store windows just now, and Harrisii lilies are getting more abundant. Some call is made for greens and the wholesale men are exhibiting samples of various things in that line.

Harry Millatt opened up his new retail store at 515 Main street as predicted last week, and is busy as one could expect.

Thrall & Peck are fitting up a new retail store on Main street a few doors above Rebstock's, and they say it is to be a dandy.

Wm. Scott is confined to the house with a sore foot—no, I don't think it is gout, but rather the result of too much walking up and down the Corfu hills in search of Hassenpfeffer.

A visit to Chas. Hewson's place on the Abbott Road a few days ago convinced me that there will be some good carnations in the city for the holidays. They stand up like a field of wheat, and are in A. 1 condition. He is one of the few growers who still grow "Silver Spray" and anyone who sees it as he grows it does not wonder that he retains it. It was at one time the leading white grown in this section of the country, but of late years has developed so much weakness that it has been generally abandoned.

I heard a rumor on the street the other day that the Florist Club was still alive and had money in the treasury; the rumor lacks confirmation, however.

Visitors in town this week were Walter Mott, representing Henry A. Dreer, of Philadelphia and Mr. Skidelsky of the same town. C.

When writing mention the American Florist.

"Only an Old Geranium."

Under this head may I be permitted to say a few words in behalf of a class of plants which so far as our florist papers are concerned one would hardly know were in existence, and still during the past ten or twenty years the improvement in varieties has been fully equal to that of any other class of plants. I remember some nineteen years ago when Mr. John Thorpe sold the stock of Mrs. Hayes, J. H. Klippart and Henry Cannell, that the superintendent of one of the largest establishments stated that we had reached the top notch in geraniums and need not look for much more in the way of improvement.

For a moment let us compare varieties. Take for instance George Sands, the double white of twenty years ago and place beside it the La Favorite or Mme. Buchner of today; in single whites compare Emily Voucher with L'Aube or Marguerite De Layre; in scarlets compare Henry Cannell or J. H. Klippart with Alphonse Ricard or J. J. Harrison, and then consider some of the decided breaks in color such as Souv. de Mirande, Mme. Bruant, Beaute Poitevine, Fleure Poitevine, Mme. Jaulen and many others that space will not permit me to mention here, and you can then get some idea of the vast improvement in geraniums; still such remarkable varieties as Souv. de Mirande and Mme. Bruant will be exhibited at the Society of American Florists convention and not even a word will be said of them in our trade papers. "It's only an old Geranium." Yet these same old geraniums constitute a large majority of the stock in trade of hundreds of market growers in this country who are just as interested in the good things in their line as the grower of roses, chrysanthemums and carnations are. While I do not think any too much space is devoted to them I do say, "Give the old Geranium a show."

A. T. SIMMONS.

DAVENPORT, IA.—On Nov. 27 a fire occurred at the establishment of Mr. Chas. Damacher. The loss consisted of boiler house, several greenhouses, together with all the plants, those which were not burnt being frozen after the fire. The total loss amounts to $2,000, with only $550 insurance.

TRADE EXCEEDINGLY GOOD.—TABLE DECORATION OF 'MUMS AND BEAUTY ROSES.—CARNATIONS SCARCE.—A NEW STORE.

Trade has been exceedingly good the past week, almost every available flower being sold, several swell weddings and social events having occurred. Among these Sunderbruch's Sons had the decoration of the Freiberg wedding at the Phœnix Club. The table decoration consisted of chrysanthemums and Beauty roses; 700 'mums and 200 Beauties were used for this occasion, also 200 strings of smilax and four loads of decorative plants. Messrs. Peterson and Critchell have also booked several prominent weddings for this month.

Carnations are none too plentiful at present, and bring from $1.50 to $2.50 per 100. The supply of roses is equal to the demand, with the exception of Beauties. A glut in violets had been predicted the early part of the season, but judging from the present outlook they will be very scarce for the holidays. Chrysanthemums are diminishing both in quality and quantity, and will soon cease to occupy a prominent place in the store windows.

A new enterprise is talked of in the store line. Messrs. J. O'Malley and Foley are announcing the opening of their store at Walnut and Sixth street.

H. SCHWARZ.

St. Paul.

'MUMS PRACTICALLY OVER.—INDICATIONS FOR CHRISTMAS TRADE GOOD.—VIOLETS SCARCE.—VARIOUS ITEMS.

Trade has fallen off a little since Thanksgiving though it is still quite active. 'Mums are practically all gone, Swanson being the only one here who has any good blooms left. Other stock is not very plentiful. Roses are of quite good quality and in good demand, as are also carnations and violets.

The cold wave of last week had its usual effect in shortening the cut and deteriorating the quality of all blooms. From present indications Christmas trade will be good. Green and holly have made their annual appearance and most of the stores are putting on holiday attire.

Dr. Schiffman, our orchid king, has just returned from an eastern trip having visited several large orchid growers and added a good many plants to his collection. He expects to visit British Guiana, Yucatan and other Central American countries next month on an orchid hunting expedition.

John Nilsen is bringing in some very choice Swanley White and Marie Louise violets. C. F. Haupt has also some very choice violets. More violets are being grown here than ever before and still the supply seems largely inadequate, and thousands are shipped in monthly from eastern cities.

Chris Hansen is offering his entire plant for sale or rent. Mr. H. has built up a big trade in a few years, by strict attention to business, and has the second largest range of houses in the city.

Mr. Roach, of Cambridge, N. Y., and J. M. Kimberlin, of California were recent callers.

FELIX.

PLANT DISEASES DISTRIBUTED BY INSECTS.—Recent experiments by Italian scientists demonstrate conclusively that moulds and other fungoid diseases are readily carried by insects from diseased to healthy plants.

NEW CARNATION

"Mrs. S. A. Northway"

A soft shell pink, developing to nearly pure white.

W. P. SIMMONS & CO.

Make the following statement to the readers of the American Florist:

As originators and introducers of
"Silver Spray,"
"Tidal Wave,"
"Daybreak,"
and "Rose Queen,"

each of which has, we believe, proven even better than we claimed for them. We NOW say for 1898 that

"Mrs. S. A. Northway"

possesses all the good points that go to make up a first-class and profitable cut flower sort, and that we introduce it with even more confidence than we did the others.

It is an extra strong grower.
It is free from rust or disease.
It is a profuse bloomer.
It has exceedingly strong stiff stems.
It is of exquisite form full and double.
The flower is high built, petals serrated.
The calyx does not burst.
It is delightfully fragrant (a quality lacking in many new ones.)

OUR PRICE LIST now ready, contains prices on many other plants. SEND FOR IT.

WEATHER UNFAVORABLE. — CARNATIONS OFF CROP.—BOUVARDIA FOR CHRISTMAS.

Although the weather has not been at all to our liking, warm and stormy, trade has about held its own; not as good as we would like to see it, of course, but very fair compared to the rather mournful reports from the larger trade centres. Society has not yet awakened from its summer lethargy. Charity Ball, which is on for the early part of this month, may start the other balls a-rolling.

We are still getting good chrysanthemums, H. W. Reiman, Maud Dean, Jones and Yanoma being especially well done and moving fairly well.

Carnations are a little off crop, but we are getting enough for present demand. Storm King, Daybreak, Scott and Albertini are in most demand, and of the new ones grown here Victor and Maud Dean are showing up the best so far. The color of C. A. Dana is very taking, but the blooms up to the present have not enough substance.

Roses are plentiful and of good quality, and though somewhat off crop we are getting about enough.

Violets are in good demand, and are not at all plentiful; quality could be much improved. Roman hyacinths and paper white narcissus are plentiful now, and we are getting a few Harrisii.

Lange has a house of bouvardia, loaded with flowers, which will be in full crop for Christmas. Although this old flower has generally been discarded there is money in it if handled right.

A. H. L.

Marechal Niel—Swainsonia.

What can I do to get my Marechal Niel to bloom? Have had it three years. It is a strong grower and has been cut back twice but will not bloom.

What makes Swainsonia drop their leaves? SUBSCRIBER.

The Marechal Niel is probably growing in a house altogether too warm to suit it, as a result the wood fails to mature, and when pruned the buds break and run to stem and foliage only. When the Marechal Niel makes a good wood there should be no difficulty in blooming it, provided the growths are properly ripened, pruned at the right time, and started up in a suitable temperature, 50° at night is about right, to be gradually increased to 55°. Thorough ripening of the growths is the prime requisite for abundant and superior bloom.

Swainsonia when at home grows like a weed and should hold its foliage almost down to the root. When growing plants shed their foliage in quantity, without there being any satisfactory reason apparent, we may rest assured they have received a severe check of some kind, and in all probability to the root action. It may be brought about by too much or too little moisture in the soil, or rapid and extreme change from one condition to the other, again an abnormally low temperature may be the cause. There is less cause for apprehension when lack of moisture has caused the leaves to fall, than when an excess of water is at fault; in the first instance the foliage alone has suffered while in the other both root and foliage are gone. ROB'T SIMPSON.

IT COSTS NOTHING to get your name and address in the NEW DIRECTORY. Send your business card to the AMERICAN FLORIST CO., 324 Dearborn street Chicago.

CUT FLOWER TRADE UNSTEADY.—PRICES FLUCTUATE.—VIOLETS WORTH THEIR WEIGHT IN GOLD.—PLANT SALES NOT SO SATISFACTORY.

Cut flower trade was rather unsteady during the week past, some days the demand was very brisk and at other times business dragged along very slowly. Prices were equally unsteady. Roses of all grades had advanced over former figures, but dropped to the old price again for a day or two, and then another rise was caused by an increased demand but at the time of writing the lower prices prevail again. Carnations are coming in more plentiful and bring fair prices, but the scarcity of violets is felt in every store only a very limited quantity is offered and any price, which the grower may ask, is willingly paid for them, though they may not be of the very best quality.

Chrysanthemums are on the wane, but a few whites of questionable quality are in the market still. Romans and paper whites go off better now than before Thanksgiving and generally all of the available supply is used up clean. Undoubtedly the prevailing unpleasant stormy and snowy weather had an influence on the falling-off of the trade on some days, for whenever the day was fair and mild, a material improvement was felt in every quarter.

Plant sales are not quite so satisfactory as we might expect at this time and the prevailing prices are considerably lower than those in other cities, though the stock compares favorably with any other; our profits on palms for instance are only nominal when we have to buy the plants from the leading growers and in other lines it is not much better. In flowering plants most of our florists are better off because these are grown on in their own houses and if they don't get a high price, they are contented with a reasonable profit.

The cyclamens offered in this city in some of the leading stores are probably as good as the best in the country but they retail for less than half the New York prices and so it is with nearly all other stock, the public is not to be blamed for these conditions we have too many small concerns here, who are trying hard to make a living, but are afraid to ask a fair price for their product because their neighbor and competitor may have the reputation of selling cheap and the sale of a plant might be lost if the price is not satisfactory. The stock offered by these concerns is seldom up to the standard but the fact that it is sold very cheap has a detrimental influence on prices obtained for the superior article. J. B. K.

Distance Apart to Plant Chrysanthemums.

In Mr. Stollery's article on "Chrysanthemum Culture" in your issue of November 6, he says, "As we grow all of our plants (with one or two exceptions) to two flowers to the plant we plant farther apart than we would if grown to single stem. The average distance is about 8 inches in the rows and 9 inches between." Are we to understand from this that Mr. Stollery gets two blooms from this space or does he allow 8x9 for each bloom? I would be pleased to hear from different prominent growers in regard to the distance they plant. In my house this year I allowed 6x7 for single stem plants and the largest blooms were on ends of rows. R. W. SMITH.

In answer to above inquiry Mr. Smith should substitute "ordinary" for the word "average," making the sentence read "The ordinary distance is about 8 inches in the rows and 9 inches between." From this space we get two blooms. While this will not work with some varieties with others it does. With such a heavy grower as Golden Wedding this year our entire cut averaged 30 cents per bloom wholesale and these were grown as I have described. Mr. Smith will always find that along the sides of the benches and ends he will get the best flowers owing to the plants getting more air and light. GEO. STOLLERY.

Newport, R. I.

BUSINESS DULL.—WEDDINGS HELP FLORISTS.—VARIOUS CHANGES.—BUILDING.

It is very much in evidence that business in the florist line is very dull. The Dresser-Merrill wedding, which took place on the 1st inst, stirred up for the time being the demand for choice flowers. Hodgeson was the decorator for this event. Although the decorations were not elaborate they were considered artistic in the arrangement of palms, roses, valley and 'mums. Large bouquets of white 'mums adorned the altar table at the church. At the house roses, valley and moire ribbon were liberally used in festooning, and in the construction of a large suspended bell, under which the bride and groom received. The background around this formed a semi-circle consisting of palms, the effect of which was quite striking.

Mr. J. M. Hodgson has purchased a large palm house from Mrs. M. Brooks, a summer resident, and has had same erected on his place on Bellevue avenue. In addition to this he has has built a large iron frame plant house and has thoroughly strengthened and improved other houses in a decorative manner. This place for several seasons has looked artistically attractive, and is a source of much admiration from summer visitors.

The former Gardiner Brewer estate, now owned by Mrs. M. Brooks, has always contained in its greenhouses a rare collection of plants. This fact is largely due to the efforts mrde by Mr. Brewer who when owner spared no expense in obtaining plants. Much credit is due to Mr. James Hill, one of Newport's most experienced and best informed gardeners, and who has held the position of gardener on this estate for over twenty years, for the preservation of this costly collection, which has no equal of its kind in Newport. On this estate a pond is being built in which to grow lotus, the pink variety of those plants will be mostly used. The first water lilies cultivated to any extent in this city were grown on this place, and large tanks of the best varieties of those plants are still in existence there

The greenhouses built last fall on the estate of J. J. Van Alen, Esq., are advertised to be let on reasonable terms. Mr. Arthur Griffin, the former gardener has severed his connection with this place.

J. J. BUTLER.

Pittsburg.

BUSINESS QUIET.—VARIOUS DECORATIONS.—A SON BORN TO MR. F. BURKI.—MEETING OF CLUB.

Business this week has been quiet with no special features to mention, except that most of the large growers have finished cutting chrysanthemums for this season, and now roses, carnations, etc., will have the call and in all probability better prices will rule. In the Allegheny market American Beauties advanced to $8 per dozen. The demand for funeral work is good, but there are no new designs or ideas in that line lately to report, regular designs and ribbon tied bunches of flowers still prevailing.

Mr. Gustave Ludwig, Allegheny Market reports business fair, but he, like many others, could do more without over-doing himself. This week he had a large decoration at the Monongahela House for the Presbyterian Union. The rooms were beautifully decorated with palms, etc., and in the banquet room there were 24 tables decorated, besides the general decoration of the room. Mr. Ludwig displayed some fine blooms of orchid zygopetalum at his store (they were grown by Mr. John Murchie, of Sharon, Pa.); also a carnation of Mr. M.'s seedling No. 2, which is very fine, flower large, white marked with a color very near crimson lake. As a novelty it is very taking. The blooms were shown in same vase with the orchid mentioned, the colors harmonizing beautifully.

The Secretary, Mr. Langhans, of the Florist Club, has issued notices for the meeting on the 9th inst., which is to be a "smoker" in all probability. As this will be the only meeting this month, it is expected there will be a good turn-out of the members.

Mr. Fred Burki, Bellevue, Pa., is receiving the congratulations of his brother florists in the recent arrival of his second son.

Mr. Renkauf, representing Messrs. H. Bayersdorfer & Co., visited the trade here this week. REGIA.

The Yellow Fellow Winner of the $100 high grade Stearns Bicycle Prize in a strong competition. It gives a large, graceful bloom under ordinary treatment and can be grown a "whopper" for exhibition. Bud tinted bronze, maturing rich bright yellow; constitution ironclad. Mid-season variety. 50 cts. each; $3.00 per dozen.

Wm. H. Chadwick A phenomenal seedling, the grandest of the year. A star production. Certificated at Chicago, Boston, New York and Philadelphia. An immense, graceful incurved bloom, waxy white, occasionally tinted pink. Growth, habit, stem and foliage simply perfect. Mid-season or late. Anybody can grow it satisfactorily. It cannot be praised too highly. Per single plant, $1.00; $6.00 per dozen.

Madeline Pratt Certificated 1896. Named for the sweet little miss on the Chrysanthemum certificate; snowy white, high built bloom. A very beautiful flower. Early mid-season. Best four terminals grown cool. 35 cts. each; $5.00 per dozen.

Strong, healthy young stock from 2½-inch pots distributed March 1st. Advance orders already numerous.

THE CONARD & JONES CO., WEST GROVE, PA.

Milwaukee.

There were two receptions Thanksgiving week of special importance, which brought the florist out in "high relief," one of which was a private affair. The reception room was peculiarly decorated. In the corner, beginning four feet from the floor, were kentias extending to ceiling; at the top plants five feet tall were used, which projected far overhead. It was a novelty, and was strikingly beautiful. Underneath there was a representation of an undergrowth of ferns extending farther along the wall than did the palms, taking in the grate and part of mantel shelf. No flowers were used, but very pleasing contrasts were produced by use of light-colored fronds.

The contrivance for putting up the kentias was so simple that it may be of interest for readers to know about same. A few strips were put up, extending from floor to picture moulding, the top end being fastened to moulding; paper being placed between wall and strips to keep wall clean; wire nails were driven in sides of strips. A copper wire was looped around one nail, then around the pots just under the rim and a twist on opposite nail, and a 25-pound kentia hangs gracefully with just the required tip. It is so easily done that any florist can put up a strip with ten minutes' practice and find that the demand for "tall palms" is easily supplied. On the opposite side of this room were arranged the American Beauty roses, which were sent in as gifts. There were a trifle over 1,000 of them. The "Albany smilax" was hung on the walls, being suspended from picture moulding, and numerous Mason jars hung with wire, being half filled with water. A mound of foliage was arranged on floor and some heavy stems of the smilax made bare for two feet, which looked as though the vine grew from that point. This spread over the wall irregularly and over on large archway. The roses were arranged in clusters of from six to nine, and numerous rose branches were arranged at conspicuous points. The smilax foliage resembles the rose so much that when the job was completed it looked like an immense climbing rose.

Another novelty used here recently was an effect in a dining room produced by a large apple tree branch fastened on sideboard and suspended part way over table. It was made by taking a branch of willow tree stripped of its foliage and a number of red apples tied on. Foliage was made of pieces of Alabama smilax. It was easily made and pleasing. The largest decoration lately was the annual ball and reception of the Deutcher Club. The striking feature here was the arrangement in center of floor. Six immense palms were clustered, reaching six feet high, and under these were smaller palms which covered the boxes. Growing out from between the palms were thirty-six chrysanthemums plants, with large flowers made of tissue paper with an incandescent light in each. They were pink and yellow.

CLINTON, MO.—The engine and boiler room, also one end of greenhouse, belonging to Mr. E. A. Barnhart, were recently destroyed by fire, the origin of which is not known. Unfortunately Mr. Barnhart carried no insurance.

Keeping Canna Bulbs During Winter.

In answering inquiry of H. H. K., "How to Keep Canna Bulbs During the Winter," will say as good a place as can be had around most floral establishments, is under the benches, first placing boards raised one or two inches above the soil, (or the dampness of the ground will start them into growth). We keep our large stock of cannas in this way, until about March 1, when we divide up and start them into growth. Avoid benches which are used for pot stuff, as in watering the drip is very apt to cause rot. Also avoid warm houses; carnation houses are just the right temperature for them. If you find they are drying out too much and inclined to shrivel, sprinkle a little damp soil over them.

Grand New Lily of the Valley.

Convallaria Majalis Alba Grandiflora. "Fortin Variety."

First Class Certificate R. H. S. of France.——Award of Merit R. H. S. of England.

Worth Your Notice

THIS Grand New Lily of the Valley, which we are now able to offer in large or small quantities, is **twice the size and substance** of the best strain of the Berlin variety. From the photo reproduction herewith it will be seen as photographed side by side with first-class Berlin stock. The foliage is particularly robust, and the flower spikes equally so, averaging 1 ft. in height; the individual bells are quite double the size of the ordinary variety, of purest white, and **average at least 18 to 20** on a spike.

☞American growers who anticipate growing their own Valley should begin with our 1 year planting crowns of Fortin's.

Strong Flowering Crowns. **$3.00** per 100; **$25.00** per 1000. Strong one year planting crowns, **$5.00** per 1000; **$40.00** per 10,000. Special prices for large quantities.

LAXTON BROTHERS, Bedford, England.

TERMS—Cash with order or London reference.

The Public Likes to be Humbugged.

This was clearly proved at an auction sale of plants in this city. The plants in question belonged to the Japanese Tea Garden the great and popular attraction of Atlantic City. The sale was liberally advertised in the daily papers, and thousands of very neat and attractive catalogues printed on the finest paper, well bound, and illustrated were distributed Some of the most attractive and rarest specimens were exhibited in the show windows of the salesrooms and as a result a very large and refined company of purchasers were present—more than could crowd in the rooms notwithstanding the unpleasant rainy weather.

The plants offered were undoubtedly direct importations from Japan and all were planted in Japanese porcelain pots of quaint and unique design. The variety was not great. Latanias, cycads, magnolias, camellias, rhaphis, bamboos, oranges, ferns, ardisias and quite a number of dwarfed pines. The latter were the greatest attraction by all means and no doubt the high prices they realized helped the sale of the commoner plants materially.

Dwarf pines 8 to 12 inches high, brought all the way from $4 to $30 each according to age. It was a case of "any old thing will do" as they certainly brought the highest prices. Several specimens measuring 2 to 3 feet across brought $60, $80 and as much as $85 and these were cheap compared with the ordinary "stuff" such as bare legged camellias (15 years old?) worth perhaps 25 cents, but which, planted in a 50 cent pot brought readily $2, $3 and $4; ardisias (7 years old?) which could have been had anywhere for 30 to 50 cents brought the same price; a cycas with 6 to 8 small leaves $8; a few scrawny tea plants bunched in one pot $10; small clumps of bamboos (20 years old?) $16; tree fern, stem 1 foot, 3 leaves, (15 years old?) $9, which I put down as being worth $2 pot and all. Small clumps of ophiopogon which many a florist would gladly have sold for 50 cents or less brought $5 to $8. Any quaint little pine, rambling shrub, long legged rhaphis, stunted bamboo providing it was said to be "10 or 30 years in pot (and they were all said to be as old or older) brought 5 to 10 times its actual value.

It must be admitted that the show was nicely and attractively arranged, miniature gardens, here and there, neat bamboo etageres holding tiny pots of one-half to two inches planted with little ferns and other small plants; clumps of rocks holding ferns and bamboos, placed in flat square pans filled with water. Designs of well and water bucket (the well holding gold fish, the bucket filled with blooming primulas) all helped to attract the crowds. The pots themselves were a great attraction. "There'll be a time some day" when there will be some subdued "blessing", when the pines will shed their verdure, when the camellias will "not" bloom and the oranges will sour!

What does seem provoking is that, a few blocks away fine specimen plants of the same class in fine healthy condition could have been bought for one-fourth to one-half the prices paid at this sale, and thousands of people would pass them by without even glancing at them. It appears to be altogether a question of advertising. But then the public will be humbugged and it will ever be thus.

Philadelphia. A. B.

Another Yellow Sport From Jerome Jones.

Mr. Henry C. Smith, of Grand Rapids, Mich., sends us a bloom which is stated to be a sport from Mrs. Jerome Jones. It is a little brighter and livelier in color than the other sports of this variety which have come to our notice and is really a very pleasing flower.

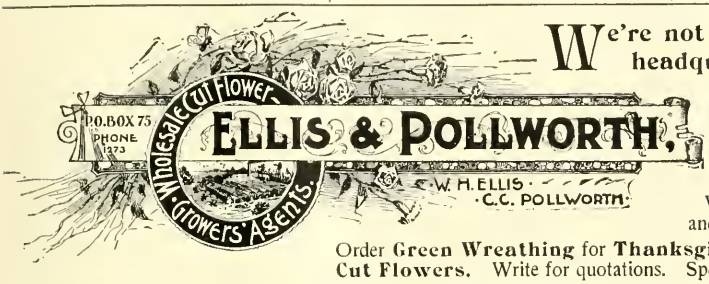
Adiantum Cuneatum.

Replying to inquiry of W. J. M., Pontiac, the cultivation of Adiantum cuneatum (which we infer is the species meant by our correspondent) does not present any great difficulty, and may be briefly stated as follows:



The spores should be sown in pots or pans of about six inches in diameter, said pots to be half filled with drainage material, on top of which some finely sifted soil is pressed down firmly, the soil consisting of sandy loam or peat, either answering for this purpose.

The spores are sown on the surface of the soil, and the pots should be well watered *before sowing* the spores, and they should then either be covered with panes of glass or else be placed in a propagating frame in a shaded house with a night temperature of 65°, the object being to keep them moist without further watering until the seedlings are up.

This operation having been fully described in former issues of the FLORIST, we need only say that the seedlings are pricked out in little clumps after the first frond shows, still keeping them in the shaded house, and finally when large enough to handle are potted off into thumb pots, and when well-rooted are shifted on into 3-inch pots, this being large enough for filling ferneries. If the intention is to grow them on for cutting, the best method is to plant out strong 3-inch pot plants on a side bench, that is, filled to a depth of six inches with the same compost that would be used for carnations.

The plants should be firmly planted in this bed about one foot apart, the best time to do this being April or May, and the bed should be kept moist at all times, though not over watered before the plants become established. The house should be shaded through the summer, and kept well ventilated both night and day, but during the winter no shade will be required, and a night temperature of 60° to 62° will be right.

Such a bed should give an abundance of fronds and keep in good condition for about three years, after which it would be best to renew it. W. H. TAPLIN.

WELCH BROS.,

..... 15 Bromfield Street, BOSTON.

Sharon, Pa.

Messrs. E. McConnell & Son, the carnation growers, have several seedlings which from present indications, look very promising. One designated as No. 2A. is a cross between Lizzie McGowan and Lizzie Gilbert. It is white, with a pink center, a free and strong grower, requiring no special treatment. As a commercial flower, Mr. McConnell thinks it will be just the "thing." No. 2A has been tested two years. Another one designated as No. 5C is a cross between Scott and Daybreak and while possessing the merits of its parents, it shows some splendid features of its own, chief of which is its tendency to surpass either in size. The color is somewhat lighter than Scott.

Mr. John Murchie's red sport from Tidal Wave, looks very promising and there are reasons to believe that the "long felt" want for a good red carnation may soon be filled.

The recent ball given by the Acorn Club, an organization composed of the 400 of Sharon, was an event of unusual social prominence. The Ashton Hall, one of the finest structures in town, was most elaborately decorated, American Beauties, chrysanthemums and orchids having been used to splendid effect. An immense acorn, composed of roses and carnations, was suspended from the chandelier, lending a charming effect to the general surrounding. Mr. I. M. O'Brien, the veteran florist, had the decoration in charge and it is needless to add that whatever he undertakes he executes in the best possible way.

HOMO.

Nashua, N. H.

If I were asked who of the two leading florists in town grew the best 'mums this season, I should be inclined to answer in the words of the puzzled youngster, "both were best." Evidently both Messrs. Gaedeke & Co. and Geo. Buxton know the secret of producing fine flowers and insuring good results. Their chrysanthemums were decidedly "superb," as the average school girl puts it.

Weddings galore, and of the kind that "count." Among the most noteworthy ones, I may mention that of Tolles-Bickford. The First Congregational Church presented a sight, the like of which one seldom sees in a town of this size. A bridal path of five imposing arches, trimmed with laurel and smilax, led from the parlor to the steps of the altar. Through this winding pathway of green the bridal party wended its way until it reached the large arch of laurel, trimmed with roses and carnations, which extended across the platform and under which the matrimonial knot was tied. Florist Gaedeke had this decoration in charge.

HOMO.

CHICOPEE, MASS.—Mrs. Dexter Snow has sold her florist business to Schlosser & Andrews, two popular young men of Chicago, the former having been in her employ for the past year. It is with regret that she leaves her life-long work, having been associated in the business with her husband for over forty years and since his death carrying it on alone. She has always done the floral work. The business has increased under her supervision and everything is left in excellent condition for her successors.

AN 1898 CALENDAR bedecked with FLOWERS AS THEY GROW, and not as artists try to Draw them.

"Art that itself is Nature."

A SAMPLE SET of LONG'S NEW FLORISTS CALENDARS mailed for only 20 CENTS IN STAMPS.

The prettiest office ornament yet seen for the new year.

Address DAN'L B. LONG, Publisher, BUFFALO.

Our 1898 DIRECTORY.

We are now at work on a corrected edition of our Directory and Reference Book which will be issued promptly on February 1, 1898. The list of those in the trade will be corrected up to date and the A. B. C. lists of Roses, Chrysanthemums, Carnations and Cannas will be carefully revised to include all new varieties, by men who are authorities on such matters. Valuable reference matter will be added, with other features. The advertising pages will be handsomely embellished, and add to the attractiveness of the book. Rates for this advertising on application.

AMERICAN FLORIST COMPANY,
324 Dearborn Stseet, Chicago.

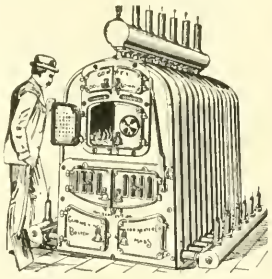
Physalis Alkekengi and Franchetti.
(*Winter Cherries.*)

The past season must have suited these plants to a dot, for we never before had such a profusion of bright pods on them; two and sometimes three were produced on each growth, a thing which seldom has happened in other years. The dry weather in August and September favored the setting of the flowers I think, for we have not attempted to give the plants different treatment from that of other seasons, and for several years they have been in the same place, growing and flowering freely each summer.

Generally we had a good showing of bright pods and they were admired, as they deserved, but this fall's crop was so abundant that it deserves to be mentioned. Especially the newer and larger-fruited variety, P. Franchetti, had a very fine, highly-colored calyx, and they are now on the vines, although the frost has spoiled all the foliage. If these plants can be relied upon to fruit as freely as they did this year we should certainly introduce these largely everywhere for fall effect; vivid colors are most welcome in the borders at this time.

They belong to the solanum family and are not fastidious as to the treatment they receive, are perfectly hardy, increase rapidly by underground runners, each one of which will make a good plant if separated from the old stock, but unless stock is to be increased we think it advisable to let the plants alone for some years because old plants invariably flower more freely, though it may be questionable whether all these flowers set fruit or not.

A dry and sunny situation seems to suit them best, for formerly we had them in a lower place where a mass of foliage was the principal show they made and growth was taller there than in their present quarters. About 12 inches is their average height, and the calyx, enclosing the berry, varies in size from 2 to 3 inches in length by 1 to 2 inches in diameter. J. B. KELLER.



PHYSALIS FRANCHETTI.—A good deal has been written lately about this, and it appears as if some people had found a difficulty with it. I can quite believe that in some cold soils and situations there might be a difficulty about it, but in most places where the soil is light it is easily grown. I am not quite sure that it will be such a weed as the older form, Physalis Alkekengi; this will be no disadvantage. This new Physalis, which is distinct in color from the older species, will be found very useful for winter decoration, and in most parts of our islands it will be found a hardy and easily grown perennial.—*English Exchange.*

[Seed of Physalis, catalogued as Chinese lantern plant, was extensively advertised last year.—ED.]

HENRY W. GIBBONS, 134 LIBERTY STREET, NEW YORK.

ALWAYS mention the AMERICAN FLORIST when writing to advertisers.

Washington.

The florists of the city met lately and organized the Commercial Florists' Association of Washington, D. C. After the adoption of a constitution and by-laws the election of officers resulted in J. R. Freeman being chosen president; Robert Bowdler, vice president; John Boyle, secretary, and C. F. Hale, treasurer. An auditing committee, consisting of J. H. Ley, G. Henson, and J. R. Morgan, were appointed by President Freeman. It was unanimously agreed that the association should meet every second and third Tuesdays during the month.

The association has for its purpose the uniting of florists throughout the city in an effort to put a stop to the free distribution of cut flowers by the government. They will arrange to have petitions sent to Congress asking that such legislation as is necessary to put a stop to this practice be passed. From the tenor of the addresses last night it is quite probable that if redress cannot be obtained from Congress within a short time the courts will be appealed to and asked to grant an injunction restraining government officials from distributing the products of greenhouses.

The florists claim that if the government will stop this distribution they will raise the wages of their employes from 10 to 25 per cent. Several labor organizations will doubtless have committees present at the next meeting of the association in order to investigate the justice of their charges.

Greenfly and how to make a Hotbed.

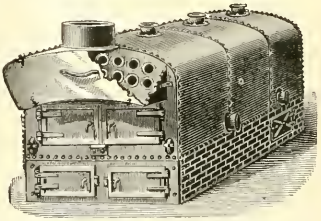
I have a small greenhouse of mixed plants which I must keep free from aphis without fumigation if possible. So far I have used weak tobacco water for syringing and also tobacco dust. I have carnations and violets at one end and smilax and maidenhair ferns at the other. Please tell me how to do this. Can you also give some instructions about hotbeds and the growth of lettuce? I. E. B.

Massachusetts.

Dusting the plants and syringing with tobacco water are both effectual if thoroughly done, but are somewhat unsightly, especially on plants in flower. If you syringe them use the "Rose Leaf Extract" diluted in fifty times its bulk of water. You will find it much more readily made and effective than the home made article. Another plan to keep down fly, which is better than either, where smoke is not permissible, is what I may call "steaming." Into a tin or iron dish (I use pie dishes), put a quart of the liquid mixture, one part of the extract to 10 of water. Into this drop a piece of red hot iron (if you don't have that, a brick heated will do); the vapor that arises will kill the fly and will not injure the most tender plant or even be very disagreeable to your nose. Where steam is used a more expeditious plan is in vogue but where hot water is the system of heating this steaming system is an excellent one.

Hotbeds are of little use in Massachusetts or north of it before beginning of March. The most economical way to use hotbeds is to dig out a space two feet deep and the length and breadth desired. The bottom should be either naturally drained or drainage provided for. When two feet of properly prepared material is filled in and well trodden down, the heat will last a long time. There is little exposure for the cold to attack. But if this is not convenient a hotbed can be made on the surface; the deeper and wider, if well made, the longer the heat will last. The trouble with most of these primitive hot houses is that the material is wrongly or carelessly prepared. Stable manure, where straw is used for bedding, is the usual material and there is nothing better, but it should not be thrown on in big forkfulls, when very fresh, lightly trodden down and expected to hold any length of time, it will heat violently for a week or two and then quickly cool.

I have told you how *not* to do it, now how to do it. Stable manure with one-fourth spent hops from a brewery is an excellent mixture. Whether the material is procured all in one day or it is the accumulation of two weeks it should be turned over at least once and thoroughly shaken up before being made into the bed. If allowed to run itself out in a pile before making into the bed, the less heat you will get afterwards. When forming the bed, which if on the surface should be 18 inches wider and longer than the frame, spread thin layers of the manure evenly and keep well firmed down by walking over it. If the material is dry have the hose near and every 5 or 6 inches of depth give a good heavy sprinkling. Keep on on adding material till you get the desired height, which for an early bed should not be less than 30 inches. After the frame is put on the same material should be banked up to the height of the frame. In 4 or 5 days a strong heat will take place and in 2 or 3 days more you can put on your soil for plants, seeds or plunging material.



Lettuce wants a good rich, light soil and plenty of ventilation. Water in the morning when it will dry up soon and kept free of aphis. WM. SCOTT.

Onions.

Our howling poet has been at it again. This time it's the "Onion Club." There's a "Potato and Herring Club" in London but Philadelphia is unique in having an "Onion Club." It's the first of its kind, I believe, and its fragrance permeates the atmosphere here in all directions so that poets, philosophers and florists must all take cognizance perforce. To waft the delectable and odiferous exhalations to less favored localities the onions could not have selected a better than our poetical friend, James D. Law. Onion prices are stiffening up a bit. When the seedsman meet to celebrate this agreeable state of affairs this will be a good chorus for the occasion. G. C. WATSON.

FOR THE SEMI-OCCASIONAL BANQUET OF THE ONION CLUB.

"It's a fine thing, an Ingan."

If Tennyson had nerve to sing
"The Lady of Shalott,"
Why should we all unlauded fling
The Onion in the pot?
"The rose of roots" it has been styled,
And, everywhere around,
In all degrees, from strong to mild,
It's in good odor found!

CHORUS.

The Onion forever! Huzzah, boys, huzzah!
Take it as it suits you—pickled, cooked or raw,
Of all Dame Nature's esculents I'm sure we never saw
The better or the equal of the Onion!

THE ONION CLUB! While I shall sing
Its praise with all my heart,
Could I but to my subject bring
Rare Howlett's ready art;
Or, in my stanzas intersperse,
To help along my Muse,
Some honied lines from Phillips' verse,
The theme might get its dues!

CHORUS.

THE ONIONS forever! Huzzah, boys, huzzah!
Take them as you find them—polished, plain or raw,
They're such a happy, jolly lot, I'm sure we never saw
The betters or the equals of THE ONIONS.
JAMES D. LAW.

MEMPHIS, TENN.—The Magnolia Floral Co. has changed hands, Mr. Sollye renting the place and buying the stock. Otto Schwill is building greenhouses preparatory to entering the business next spring. Mr. Schwill is one of our leading seedmen. Our city is preparing to extend its limits and improve generally. The people are in good spirits and trade promises to be good, for we don't expect an overflow of the river nor the yellow fever and every florist here has his business better in hand than for many seasons past.

HOLIDAY TROUBLES.

The time is about here when there will no doubt be more or less said of the bad effects on business by the rapid advance of prices in the cut-flower trade.

From the consumers' point of view, it does no doubt seem strange that the cost of flowers should advance one hundred or more per cent. in a few days. The majority of buyers cannot understand it and the retailer has not the time or inclination to explain except in cases of a few favored customers. He knows all the flowers he has will be sold at a good price and is very often more independent than is necessary. The people who are steady or regular buyers are beginning to appreciate the question of supply and demand at the holiday season, and therefore expect an advance in rates, but there are hundreds to whom the radical change seems entirely uncalled for, and to these, in fact to all, due notice should be given of the probable increase in prices by speaking about the matter whenever the opportunity may occur, and in no case take a Christmas order without a thorough understanding as to prices unless you have a good knowledge of your customer.

The whole question is, of course, one of supply and demand, and always will be so, no matter what may be said or written about it. But the interests of both the retailer and grower are at stake when the consumers of flowers are dissatisfied, let the cause be what it may; therefore they should work together to give the best possible service at these times.

The Christmas trade, for several reasons, is a hard one to handle, both for retailer and grower. The grower is expected to have for each store, triple or quadruple the amount of flowers he has been selling them previously, and, at the same time, must have them fresh. Should he not serve the full amount ordered or promised, he is accused of giving them to a more favored customer, when the chances are he has divided up his stock as equally as possible, and is short because of cloudy days or warm weather, when flowers will not keep after being cut, or so cold he could not bring them forward as fast as expected.

Every year there are public complaints of growers or their agents sending stale flowers when filling Christmas orders, such flowers, it is said, often being entirely unfit for use. That there is cause for such complaints is unfortunately true, but no grower should intentionally send such stock. It may at times be accidental, for it is not always possible to tell the condition of flowers after they have been kept for several days, but he is in a much better position to judge them than the buyer, as he knows when they were cut and what their surroundings have been since, so he should examine them carefully before shipping. When he secures the increase in price demanded at these times, he is in duty bound to send reasonably good stuff, and sell the poorer quality for what he can after calling attention to its condition

The storekeeper also has his troubles at this time. He must get a lot of extra help, most of them quite new in the flower-selling business, so more destructive of stock and less likely to give satisfaction to customers. His stock costs more, and some of it poor in quality, also the chance that he may not be able to get enough. It may get very cold, making delivery difficult, unless packing is done very carefully, and this, when the wrapping department is in the hands of new men.

But in spite of all the trials and troubles, both producers and distributors are generally well pleased on account of the profits they realize. To keep on getting these profits they must be careful not to kill the goose that lays the egg.

Let the grower be careful to send only such stock as can be safely recommended to a lady or gentleman, and he will not hear so many complaints from the retailer about exorbitant prices. Then if the retailer will use equal care to see that his customers get good service, and be satisfied with the usual profit on his medium stock, without asking one hundred per cent. on every fallen petal, I do not believe we need fear any bad effects on the business from the high prices at Christmas.

Chrysanthemum Forecast for 1898.

Below we give our readers a summary of the chrysanthemum situation and a forecast for 1898, as to commercial varieties, from the point of view of the men who buy the plants and grow them for flowers, of the men who wholesale the flowers and of the retailer who disposes of them to the public. The gentlemen who make these reports are to be understood as giving their own experience, gained through actually growing or handling the varieties in question and uninfluenced by any personal interest in the success or failure of any particular variety.

It is evident that the demand in the different cities varies greatly as to varieties and the grower will do well to give especial attention to the reports from the market for which he grows.

NEW YORK GROWER.

Mr. Eugene Dailledouze states that Niveus, Marion Henderson, Viviand-Morel and Mrs. Perrin are likely to be grown sparingly by next season.

The following well known varieties will still be largely grown: Mrs. Robinson, Ivory, Mme. Bergmann and Merry Monarch, white; Major Bonnaffon, Modesto and Lincoln, yellow; Maud Dean, Mrs. S. T. Murdock and Pink Ivory, pink; Geo. W. Childs, Cullingfordi and John Shrimpton, crimson.

Of the introductions of 1897 likely to be largely grown, he names: Western King, Evangeline and Mrs. Martin A. Ryerson, white; Golden Trophy and Mrs. John J. Glessner, yellow; there being no pinks or other colors of special promise as advances on old sorts. He declines to specify any 1897 introductions as failures, as it will take another year to find out (and he might also offend); but of the entire list of introductions of 1897 a large proportion will never make any permanent impression. He qualifies the entire above statement to the effect that varieties give different results with different growers and that his neighbors would undoubtedly list differently.

NEW YORK WHOLESALERS AND RETAILERS.

Among the wholesale cut flower dealers in New York City but little attention is paid to *names* of varieties. Blooms are now sold simply on their quality. If they are fine flowers and the price is cheap enough they find a customer and the name is of no interest. White and yellow varieties have found the most ready sale this season. Among those that seem to have pleased are Mrs. Robinson, Golden Wedding, Major Bonnaffon, Evangeline, Glory of the Pacific, Ivory and Pink Ivory; but the knowledge of these names comes through contact with the growers, rather than through their relations with the retailers who care nothing for the name of a flower, if only it has the color, size and stem they require.

The retailers endorse the above. They say that the former curiosity regarding eccentric forms and freaks and interest in special names no longer exists among the buyers. Their own contact with the chrysanthemums extends over but a brief period, not sufficiently long for them to become familiar with varieties, whereas the grower in his months of association with the different names learns them by heart. There is a demand for some good pink sorts that will have more brilliancy of color and decided character than anything yet offered.

BOSTON GROWER.

Mr. Alex. Montgomery, of Natick, Mass., suggests the following old favorites that will be dropped for next season: White, Minnie Wanamaker; yellow, Minerva; pink, Ermenilda; other colors, Robert McInnes.

These old varieties will still be largely grown: White, Mrs. Jerome Jones; yellow, Modesto, Major Bonnaffon; pink, Viviand-Morel, Maud Dean; other colors, John Shrimpton.

These introductions of 1897 will be largely grown: White, Evangeline; yellow, Golden Trophy; pink, Symphonia; other colors, Charles Molin, Defender.

The introductions of 1897, which have proved failures are white, Dorothy Devens, stem out of proportion to flower; yellow, Gold Standard, weak neck; other colors, Sunstone, not decided enough.

Of the new seedlings to be introduced in 1898, Frank Hardy and Pennsylvania are likely to find a permanent place.

BOSTON WHOLESALER AND RETAILER.

The list of varieties enjoying any special popularity with wholesale and retail trade is very limited. Major Bonnaffon, Ada Spaulding, Mme. Bergmann, Mrs. Perrin, Geo. W. Childs, Minnie Wanamaker, Ivory and Pink Ivory comprise about all that can be named in such a list. If the flowers offered in the market by a grower are of good and regular size the stems stiff and the foliage well up to the flower, the trade will buy them, but care nothing about the name under which the stock was grown, the above listed varieties only from their long-keeping qualities, having made a permanent impression.

Of the old favorites of 1889, Lincoln is the only one now found in the market and of '90–'91, Minnie Wanamaker, Ada Spaulding and Mme. Bergmann alone are left.

CHICAGO GROWER.

Mr. C. W. Johnson states that of the older varieties Viviand-Morel is too variable in color, Mrs. H. Robinson gives too small a percentage of perfect blooms (Ivory if propagated early and grown 7–8 inches in diameter being much more profitable); Bergmann and Merry Monarch will be dropped.

The older varieties which will be largely grown are, in yellow, Yellow Queen (there is no good yellow till this comes in); H. Hurrell, Bonnaffon (no other yellow wanted when this can be had); Modesto (moderate quantity only, as the weak stem is a little against it); Dailledouze (same qualifications as Modesto); Golden Wedding (in the hands of careful growers only will it succeed) and Clara Goodman.

Very late varieties do not pay enough additional to make up for the extra use of the glass. The old white varieties to be retained and grown largely are: Ivory (if propagated early and grown to the limit is the most profitable 'mum after Jones and Bonnaffon); Mayflower, well liked and Mrs. Jerome Jones still the best and most profitable of any color.

Much is still to be desired in pink—it is largely a choice of evils. Mrs. Perrin from crown buds, Mrs. Murdock and Maud Dean will be grown for want of better. Pink Ivory has everywhere sported white again. A few Drexel, Childs and Chas. Davis will be grown.

Of the 1897 introductions, a few Midge may be grown for very early (good flower but too much foliage); Mrs. Glessner (moderate quantity, must be cut before fully developed or will fade); Western King (caution to be used until we see whether it gains in vigor); Maud Adams, Sunstone (moderate quantity) and Mrs. C. H. Weeks (fine flower but a little soft).

The following 1897 novelties, while not especially bad, are not *good enough*; Evangeline (fine growth and beautiful bloom but spots and drops it's petals) Mrs. M. A. Ryerson (not valuable commercially); Defender, Elvena (too small).

Of varieties to be introduced in 1898 the following are promising: Autumn Glory, Solar Queen, Wm. H. Chadwick, Mrs. C. H. Peirce, Frank Hardy. Pennsylvania as shown here was a beautiful thing but Philadelphia, from which it sported, never has been a success here.

Mr. Geo. Stollery says the following old favorites are to be dropped: White, Mrs. Henry Robinson (to a large extent), Vanoma; yellow, Modesto, Sunclad; pink, Mrs. S. T. Murdock; other colors, Mrs. A. J. Drexel. And these are to be largely grown: white, Ivory, Mayflower, Mrs. Jerome Jones; yellow, Yellow Queen, Major Bonnaffon, Golden Wedding, Liberty; pink, Miss Agnes Dalskov, Maud Dean, Viviand-Morel, Mrs. Perrin, Chebeaque.

These introductions of 1897 will still be favorites: white, G. S. Kalb, Mrs. Henry Weeks, Mrs. Martin A. Ryerson, Lorna Doone; yellow, Maud Adams, Mrs. J. J. Glessner, Mrs Withers (limited); pink, Elvena, The Times, Merula; other colors, Sunstone.

The following introductions of 1897 have proved failures: White, Mrs. Harry Toler, too long neck: Dorothy Devens, too small· Western King, poor growing qualities; Evangeline, small, spots, drops petals; yellow, West Newton too small; G. B. Morse, too small; pink, G. F. Atkinson, poor color and long neck; other colors, Defender, small, poor color.

Of the new seedlings to be introduced in 1898, was favorably impressed by these: white, Snow Queen, Wm. H. Chadwick; yellow, Solar Queen, Mrs. C. H. Peirce; pink, Autumn Glory; other colors, Black Hawk.

CHICAGO WHOLESALERS.

Kennicott Bros. Co. submit the following:

Market for all you can grow: yellow, Golden Wedding, Major Bonnaffon, H. L. Sunderbruch, Modesto; pink, Maud Dean, Mrs Murdock, Mrs. Perrin, Viviand-Morel; white, Ivory, Western King, Minnie Wanamaker, Mrs. Jerome Jones, Mayflower.

Market for a fair quantity: yellow, Golden Gate, Mrs. J. J. Glessner; pink, Lady Playfair; red, Geo. W. Childs, John Shrimpton, Mrs. Drexel; white, Mrs. Robinson; bronze, Chas. Davis.

Market for a few, some are new varieties: yellow, Lincoln, Pennsylvania, Eugene Dailledouze; white, Frank Hardy; pink, Mrs. Higinbotham, Autumn Glory, Mrs. Allerton. They do not advise the growing of many varieties.

Vaughan, McKellar & Winterson condemn Mrs. Robinson, Mrs E. G. Hill and Dailledouze. Of the older varieties they recommend Wanamaker, Ivory, Jones, Mayflower, Niveus (moderate quantity) in white; Lincoln, Modesto, Bonnaffon, Yellow Queen, yellow; no good pinks but Viviand-Morel, Maud Dean and Perrin are best. Drexel and Childs, crimsons can be sold in *quantity*. Evangeline drops its petals. Frank Hardy looks promising.

The Illinois Cut Flower Co. condemn Merry Monarch, Yellow Monarch, Dailledouze, Wanamaker, Modesto, Yellow Queen and Sunderbruch; they advise growing Mayflower, Mrs. Jerome Jones, Lincoln, Ivory, Robinson (where can be well done) Bonnaffon, Perrin, Murdock and Maud Dean and say that Evangeline is not a good shipper

Bassett & Washburn (growers and wholesalers) will drop Queen, Whilldin, Dailledouze, Yellow Monarch and Lincoln, will still grow Fitzwygram (a few), Robinson, Ivory, Domination, Mrs. J. Jones, Niveus and Mayflower, white; M. M. Johnson, Bonnaffon, Modesto (a few), Golden Wedding and Mrs. O. P. Bassett (moderate quantity), yellow; Vivand-Morel, Maud Dean and Perrin, pink; no red or bronze. Will try Autumn Glory Solar Queen, Mrs. Peirce and Pennsylvania.

Among the retailers, Mrs. J. Jones (whether white or pink) Mayflower, Ivory; Robinson (when good), Golden Wedding and Maud Dean are general favorites.

CINCINNATI GROWER.

Mr. Witterstaetter says, white, Bergmann; yellow, Yellow Queen; pink, Viviand-Morel, will be dropped.

White, Lady Fitzwygram, H Robinson, Queen, Ivory, Yanoma; yellow, Bonnaffon, Modesto, Dailledouze, Lincoln; pink, Mrs. E. G. Hill, Pres. Smith, Mrs. Perrin; crimson, Geo. W. Childs; will be extensively grown as will these introductions of 1897, white, Mrs. H. Weeks (importation), Evangeline; yellow, Golden Trophy; other colors, Chito.

Can give no information as to 1897 varieties, as very few came to his notice, but Evangeline which has not exactly been a failure nor entirely satisfactory, will be tried another season.

Of the new seedlings to be introduced in 1898 these varieties impressed him as likely to find a permanent place: Pennsylvania, C. H. Peirce, Glory of Autumn.

CINCINNATI WHOLESALERS.

H. L. Sunderbruch Co. give the following old favorites that will be dropped for next season: White, Bergmann; yellow, Yellow Queen and Kioto; pink, Marquis de Montmort and Viviand-Morel; other colors, John Shrimpton.

Old varieties will still be largely grown: White, Robinson, Queen, Ivory, J. Jones; yellow, Marion Henderson, H. L. Sunderbruch, Bonnaffon, Golden Wedding; pink, Mrs. Perrin, Mrs. E. G. Hill, Pres. Smith, Betty Fleischmann; other colors, Geo. W. Childs.

Introductions of 1897 that will be largely grown: White, Mrs. Weeks, Evangeline; yellow, Golden Trophy.

Of the new seedlings to be introduced in 1898 Pennsylvania and Glory of Autumn have pressed us as likely to find a permanent place.

CINCINNATI RETAILERS.

B. P. Critchell Sons' list the following old favorites that will be dropped for next season: White, Mme. F. Bergmann; yellow, Dailledouze; pink, Viviand-Morel; other colors, all shades not positive colors.

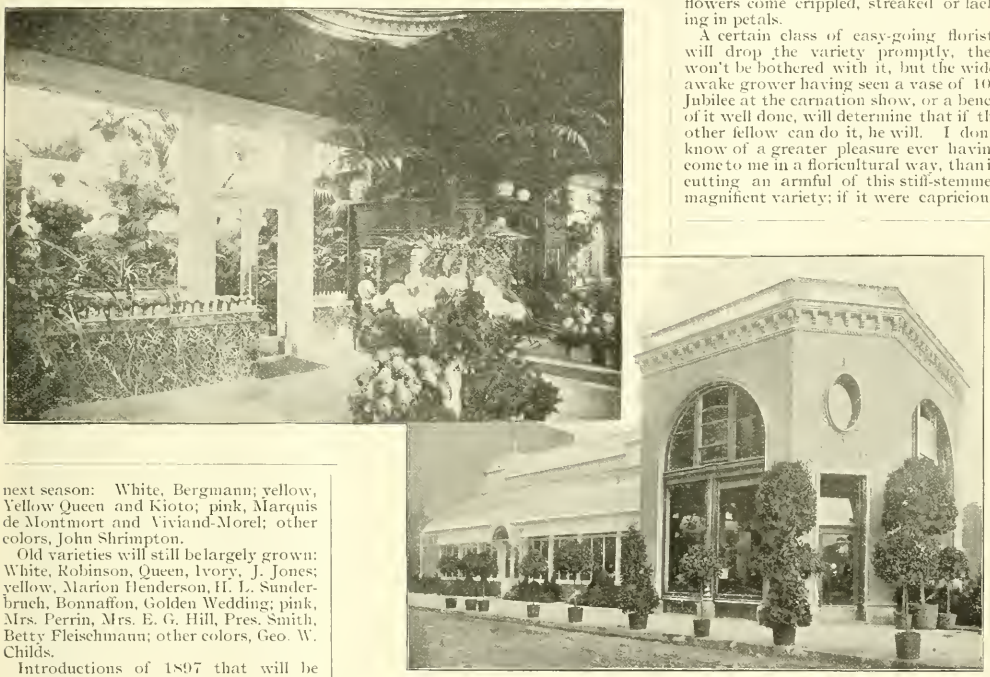
Old varieties will still be largely grown: White, Fitzwygram, Robinson, Queen, Jerome Jones; yellow, Bonnaffon, H. L. Sunderbruch, Golden Wedding, Lincoln; pink, Maud Dean, Murdock, Mrs. Perrin, Pres. Smith.

Of the new seedlings to be introduced in 1898, Pennsylvania, Bessie Hollis and Baroness Rothschild have impressed us as likely to find a permanent place.

About Carnations.

The carnation has been so ably written up for the AMERICAN FLORIST that it would seem difficult to add anything new to the subject. The papers contributed must have been of the greatest value to the general grower, judging by our own appreciation of them, and yet there are still unsolved problems before us, and still we acknowledge a "long felt want" which has not yet been supplied.

Run over the most popular varieties in the different colors and we are led to exclaim "none is perfect, no not one" unless it be Scott which is admitted to have fewer faults than any other variety extant, and yet paradoxical as it may seem, its most valuable characteristic—its easy management—often works directly against it as a moneymaker. Every grower, with little pains, can do it well, and in its season whole acres of it are dumped upon the market, and almost instantly its value depreciates with its over abundance. Every commercial grower must foresee this fact in balancing up his stock, or he will have the fact forced upon him later by a serious loss of money.



With the retail grower, who supplies his own home trade, the case is different, and for a long time to come, Scott will be his staff-of-life among carnations.

Daybreak is grand "if" only it did not rust; yet a great many growers who had thrown it out, are again buying it in, since the trade at large are learning how to hold the rust at bay. In rooted cuttings, good clean stock of this variety ought to bring about $25 per 1,000, for it is none too free in throwing cuttings, and only at this price can the grower make any profit if he selects his cuttings carefully. The same is true with Jubilee, though this variety is easy to free from rust when its requirements are known. It likes a good stiff soil; much more so than any other variety of our acquaintance, and requires systematic and regular feeding after once it comes into growth and bloom. The careless and unobservant florist will never make a success of this grand variety any more than he will of American Beauty rose.

The close observer will note the heavy "bloom" on the foliage as long as growth is going right—will note the roots like white silk threads coming to the surface—the heavy broad foliage and the large full flower will tell him that nutriment must be leaving the soil rapidly to supply the same, and a light but rich top-dressing will be given, neglect or delay this, and flowers come crippled, streaked or lacking in petals.

A certain class of easy-going florists will drop the variety promptly, they won't be bothered with it, but the wide-awake grower having seen a vase of 100 Jubilee at the carnation show, or a bench of it well done, will determine that if the other fellow can do it, he will. I don't know of a greater pleasure ever having come to me in a floricultural way, than in cutting an armful of this stiff-stemmed magnificent variety; if it were capricious, and scant in bloom. I would not persuade the trade to persist in its growth, but its grandeur of size, color and stem combined with its freedom, make it more than worth while. Grow it in a pure dry atmosphere, select your cleanest cuttings, start it as early as convenient, study its requirements it will pay you handsomely; opinions differ as to field planting versus indoor growing, but with us we prefer the latter for Jubilee.

From present indications Mayor Pingree is the most promising yellow. We like its general way of behaving itself, and the flower is very beautiful both in form and color. Our plants were late and small when benched, which makes it late of course in blooming, but we shall

STORE OF THOS F GALVIN, BOSTON—INTERIOR AND EXTERIOR.

not charge this fact up against the variety.

We certainly have not "hit it" with Harrison's White; this variety made very strong growth in the field, and was one of the best looking, when brought in, but it is very susceptible to rust (which we have never seen on Scott); and the flowers, very freely produced, are still almost single; we would like to hear from other growers, for the writer saw this in elegant condition last January at Mr. Harrison's.

Mrs. Bradt is a beauty; in our soil it comes with a good stem which on first seeing it last year, we feared would be its only drawback, for it takes a stem of iron to support so large and heavy a bloom. Our soil contains considerable lime and this we think is a help in the direction of a good stem.

The careful handling given Flora Hill both in growth and propagation last year ought to tell in its favor this year, if only the same care is exercised now that it is in other hands; the great danger to the variety is that the good words spoken for it will convince holders of it that it will be in large demand, and consequently nearly every grower will propagate all that he can, which is ruinous to a variety if allowed to bloom at the same time. We are not writing these notes to bolster up our variety, but we certainly do want the variety to continue a success and if we can help point the way, we shall be helping the trade at large, as well as all introducers and growers of novelties. Flora Hill is not fussy about the soil in which it grows, a little lighter or heavier seems to make no difference; we have never seen a spot of rust on it; it is a free, strong grower by nature; it is impatient of overfeeding and overwatering, the former will yellow the foliage, the latter will produce soft stems. Take off too many cuttings and you have weak stems and a burst calyx; brought in from the field it is one of the first to recover and to produce large bloom; September and October are the only months that see the stem at all weak if properly treated, and every day it is growing away from this fault until midwinter should see it at perfection—the best white, till a *better* comes along.

Victor promises well; we hear of an occasional reversion to the parent, but in our stock the percentage is very small indeed; there is every reason for believing that it will prove one of the year's successes; the color is right, and lights up at night in elegant style.

Morello is showing an exquisite color, is making nice free growth and we shall watch its freedom of bloom anxiously, also if the stem takes on stiffness as the days lengthen.

Maud Dean we have not been able to suit in its requirements; we shall try again, for this elegant fancy is too fine to give up without trying it further

Triumph is another variety that revels in a stiff clayey soil, but otherwise is easy to please, for length of stem, stiffness, size and brilliance of bloom, it is almost unapproached, and pays handsomely for space given it. One thing every grower must bear in mind, we think, no variety extant can be depended on to bring enormous flowers on stiff, long stems, continuously from October to May, yet this is what we are sighing for. We think that this type of bloom will always be found coming in crops.

A variety bearing the largest crop of 3-inch blooms to the area, and with the shortest intermission between crops, is to be the winner of the future. Go on raising seedlings, gentlemen, there is room for improvement, and novelty is still a potent factor.

In a contemporary the point system of judging novelties is still criticised and the present system set at fault, but the fact will ever remain that the most competent judges can only add up the points that are there to see, and intending growers must either take the originator's statement as to freedom, or would-be purchasers must visit and see for themselves. Suppose 200 points are allowed as a total, or suppose they are cut down to 50, where does the difference come in, except as the number required for passing slides up or down?

It has been suggested that the Carnation Society award a second grade certificate to those sorts scoring below 85. I see no particular harm to come from it, but where is the use? And it would be apt to lead to confusion, and the fact would remain that the exhibitor who missed his second grade certificate by a single point, would have a right to ask that a third grade be awarded; has not Mr. Dorner solved this difficulty in the sensible way by announcing that a variety that he is sending out scored 84 and by saying in what respect it fell short? He will not miss sales by his frankness.

The value of the certificate has been called in question; it seems to the writer that the certificate admirably draws a broad and distinct dividing line between the seedlings that show to the eye the value as summed up by the footing of the score—and those that fall short; the points of freedom and earliness only are left indeterminate. Do away with the society and the certificate, and the intending buyer of novelties has every seedling grower's pet to try, on all the points tried by the judges as well as on those other two indeterminate points. The society does nine-tenths of the work for him, and does it well. E. G. HILL.

Carnation Notes.

We are now getting treated to weather that is enough to give any grower the blues, dark, cloudy, with the temperature hovering around 34° outside, and it behooves us to use the greatest caution or it will soon begin to tell on our stock. I have always been taught to gauge the temperature inside a greenhouse according to the outside temperature, for there is a great difference between a temperature of 52° obtained by having the steam going full force and a like temperature without any artificial heat at all, and I find it better in such weather as this to keep a little steam going at all times and regulate your temperature more with the ventilators; the idea is to keep a buoyant atmosphere. At the same time, prevent any draughts. We have to aim at keeping the plant gradually working along without carrying it to extremes, either way. It is best to keep the plants drier, now, watering only when absolutely necessary, and then only in the day, so that all surplus moisture will be dried up before night.

In regard to staking your carnations—i there are many ways of doing this, and most every grower has his own device. To all appearance, the ideal is yet to be found, but if the different seedling raisers keep putting on stem at the rate found in some novelties of the last few years, we shall have to resort to the same mode of staking and tying as practiced with roses. We find now 3 feet stems, and the season only just begun We have never found the chicken-wire scheme to work at all satisfactorily with us except with stocky growers like Tidal Wave. It also makes lots of difference what kind of houses you grow carnations in. We have several houses running north and south, and in such houses it is necessary to tie each plant separately, so as to get all the light and air possible through and around each one. The best way we find of doing this is to take two lengths of wire four feet long and bend them the same as croquet arches, but square at the top. Two of these arches are used to the plant, crossing each other at the center. This gives four legs surrounding the plant at equal distances apart. Tie them with string. For very large plants the wires would need to be longer and can then be spread to any distance required.

C. W. JOHNSON.

William Plumb.

The newly elected president of the New York Florists' Club was born in Huntingdonshire, England, in the year 1850. In early youth he was apprenticed at Seven Oaks, Kent, and his capability and fondness for his profession quickly brought him forward as a gardener of recognized ability. As a journeyman at Greenroyd, Halifax, he won many awards at the local exhibitions. The first place he had full charge of was Swinton Park, Manchester, where he remained two years, and then came to America, he having visited this country for a brief time

WILLIAM PLUMB

previously, and took charge of Robert Colgate's place, and later on S. D. Babcock's estate and several other large places at Riverdale, N. Y. He now superintends the fine estate of C. P. Huntington at Throgg's Neck.

Mr. Plumb has been for years an enthusiastic worker in the New York Florists' Club, also the S. A. F., and there is no man more popular among his fellow members in both organizations than he. Fault-finding or contrariness find no place in his sunny disposition; he is uniformly cheerful under any and all circumstances, and always ready and willing to render a service when opportunity presents. No president ever came to the chair in the

New York Club with more friends and fewer critics than president-elect Plumb, and there is no doubt that a year of prosperity and advancement is assured during the coming administration.

AVONDALE, N. J.—Henry Weindheim, a well known florist of Franklin township, was found unconscious in one of his greenhouses on the morning of December 1. Before the doctor arrived he expired, heart disease being given as the cause. He leaves a widow and nine children.

manufactured goods are all provided for in the schedule and all that is required of exhibitors is that they have their goods in readiness for the judges at 6 p. m. on the second Monday in each month at the club room, and hand a list of same to the secretary.

The election of officers was the next thing on the program, and resulted as follows: President, Wm. Plumb; vice-president, Jas. M. Logan; secretary, John Young; treasurer, C. B. Weathered; trustees, A. S. Burns, W. I. Brower, J. H. Troy.

made the vase of handsome Frances Joost carnations on the exhibition table dance in unison. A vote of thanks was tendered Mr. Besold for these carnations.

Little can be said of business this week. Much bad weather has been experienced and trade shows little activity, but it is only the calm before the storm, let us hope, which is to come with the holiday season and which will fill the empty coffers of growers, wholesalers, retailers and clerks, and the horticultural press as well, with an overflowing supply of cash. A

CHRISTMAS ARRANGEMENT, STORE OF W. J. SMYTHE, CHICAGO.

New York.

N. Y. FLORISTS' CLUB.—ELECTION OF OFFICERS.—RULES FOR MEDAL COMPETITION. — ENCOURAGING OUTLOOK. — BUSINESS QUIET.—SOME GOOD ROSES COMING IN BUT MANY POOR ONES ALSO.

The meeting of the Florists' Club on Monday evening was one of the most interesting of the year. President Henshaw made a very hopeful address and the sanguine sentiments expressed seemed the keynote for the evening's deliberations. Mr. Manda came in with practical rules for the guidance of the committees who are apt to judge the exhibits which are to be brought to each meeting of the club during the coming year in competition for the coveted gold medal, and they were unanimously adopted. Cut flowers, plants, collections, designs and decorations, fruit, vegetables and

An invitation from the Dutchess County Horticultural Society was read, inviting the members to attend the annual dinner of that organization on January 5, 1898, and a vote of acceptance and thanks was recorded. An ample appropriation was voted for the use of the essay committee for the ensuing year and something interesting and entertaining may be looked for at every meeting hereafter. A proposition to copyright the essays and discussions brought out a lively discussion in which many members participated, among them being John Morris, who sailed in and fairly stampeded his listeners with his Bryanic eloquence in defense of the rights and in praise of the benefits of the public press which drew from "Jim the Penman" the oft-repeated response of "hear, hear," and from the rest of his audience enthusiastic applause which

moderate quantity of wonderfully fine specimen Brides and Bridesmaids are seen at the various wholesale establishments. Among the best are those from R. M. Schultz, which are handled by John Young. If the main stock were of this quality, a great deal of satisfaction would ensue, but the market is, unfortunately, badly overstocked with small, unevenly colored and weak-stemmed stuff that must necessarily be sold for prices that beget neither satisfaction nor pride.

Visiting New York: James Delay and Frank Haughton, Boston; H. H. Battles, Philadelphia.

HUNTINGTON, W. VA.—A. C. Daniels died of Bright's disease December 8, 1897. He started in the florist business in the year 1871 and has been ever since in this business in and about Huntington.

Boston.

BETTER GRADES OF ROSES SELLING WELL.—BEAUTIES INJURED IN HANDLING.—USUAL HOLIDAY SPURT OF RED CARNATIONS.—WHITE CARNATIONS MOVE SLOWLY.—OTHER FLOWERS AND THEIR PROSPECTS. A CARNATION EXHIBITION.—PROMISING NEW SORTS SHOWN.—VISITORS.—AN EXPLOSION AT WELCH'S.—A NEW WHOLESALE ESTABLISHMENT.

Trade continues pretty regular, although not heavy in any line, and an advance in prices of some things may be looked for within a few days. The weather has been for the first part of the week very warm and spring-like, and this furnishes grounds for the prediction by some that should a cold spell follow for the Christmas period there would be some old-fashioned hustling for Christmas flowers. Time will tell. At present there appears to be a better demand for the higher grades of roses. Big Beauties are coming well to the front; the only thing that stands in the way of their realizing cheerful prices is the very common one of careless handling on the part of packers or expressmen; for, be it understood, that most of Boston's big Beauties (in the cut flower line) come from afar, and that very few of our otherwise talented growers have solved the mystery of Beauty growing, so we must depend upon outside supply. A Beauty, be it ever so handsome to start with, is a hopeless cripple when once its nose has come in contact with the end of a packing box.

Carnations begin to show the effects in advance of the usual holiday preference for colored varieties, scarlet particularly. Thrifty growers are keeping the colored varieties on the plants as long as possible in anticipation of better prices, and without doubt they will get it, where the keeping is not overdone. White carnations have been decidedly weak for two weeks, bringing less than any other color even when of unusual excellence of quality. It is feared by some that the proportion of whites planted for this season is too heavy and that the present sluggishness in the market for them will continue through the winter. Nivea is the best all-round white coming in. The old standard for Boston, Mrs. Fisher, is grown but sparingly now and usually of inferior quality, although an occasional grower, Chas. Ingram for instance, shows it up in as good form as it has ever been seen.

Violets are in fair supply, but, with the exception of No. 1 Farquhars, $1 per 100 is the outside price they command here. Lily of the valley and Roman hyacinths move at an average pace and price, but paper white narcissus drags badly, and there seems but little room for it in the market of to-day. As to the general flower market, it might be said that all stock of good quality will be sold without difficulty for some time to come, and all conditions fail to show any prospect of a surplus or slump in any line. Plants are also finding a good demand. Poinsettias in convenient sizes are offered in good supply, and of the bright berried things such as solanums and ardisias there is also a good salable stock in sight.

The carnation exhibition under the management of the *New England Florist* at the Park street market on Saturday brought out a good attendance of the local growers to see the display, which was large and interesting. As usual, C. W. Ward showed a superb collection of the newer sorts, including Maceo, New York, White Cloud, Gold Nugget, Mrs. James Dean and John Young, all of which were in fine condition and are already familiar to most of our readers from former descriptions in these columns. The new scarlet, F. A. Blake's Bon Ton, was also shown by Mr. Ward, and its excellent color, stiff stem and other good points made a favorable impression.

Peter Fisher exhibited his new white, Morning Star, rather small, but of excellent quality otherwise, and fine fragrance. He also showed well grown blooms of Mrs. Geo. M. Bradt, Flora Hill and Mrs. Thos. Lawrence, the latter a finely formed dark pink. H. F. A. Lange exhibited Ensign, a seedling of 1894, the finest variegated we have ever seen, superb in form and marking. From Patten & Co. came well grown specimens of Edith Foster, Mrs. Geo. M. Bradt, Emma Wocher, Flora Hill, Nivea and C. A. Dana.

Other exhibits noted especially were: Empress, from Wm. Swayne, a crimson, rather too dark, with long, stiff stem, but received in poor condition; Priscilla, white, from E. A. & W. K. Wood, rather weak stem, otherwise a fair flower; Mayor Quincy, from A. Roper, dark pink with fringed petals and good form, but the buds on the plant showed a tendency to burst; seedling No. 1, from H. A. Cook, a trifle darker than Daybreak, good form, but a little weak in stem and texture of petals; Wellesley, from J. Tailby & Son, a very good scarlet of fine form and stiff stem, but hardly up to the size demanded in the carnation of to-day. W. S. Phelps was represented by Flora Hill and Lizzie McGowan in nice condition.

The exhibition brought to Boston quite a sprinkling of visitors from outside localities. New York was represented by Eugene Dailledouze, Chas. H. Allen and Ernst Asmus. Other New York visitors of the week were Paul M. Pierson and L. C. Bobbink.

While a photographer was taking a flash-light picture of the interior of Welch Bros'. store last Saturday the apparatus exploded. No one hurt and no damage done excepting to window glass.

It is understood that a large rose grower for the New York market is about to open a salesroom in Boston for the disposal of his surplus cut.

Wm. H. Long has taken a position in the establishment of Julius A. Zinn on Beacon street.

Philadelphia.

THE MARKET.—BURTON'S WHITE CARNATION.—HEACOCK'S NEW CARNATIONS.—ORCHIDS IN DEMAND.—WHITLEY-CONWAY MARRIAGE.

The store trade still shows considerable life and it seems as if there will be a good demand for flowers right up to the busy holiday time. All kinds of good stock is sold readily at good prices, which, by the way, are advancing having taken quite a leap the past few days,

John Burton is cutting a few Brunners. Carnations are plentiful but seem to sell readily. John Burton's new white readily commands the best price. Jas. Heacock's new large light pink is a good one and sells quickly at the top. The stock of his new white carnation has been purchased by a Washington florist. It is a fine flower. Violets are becoming a trifle more plentiful and sell very well. The large single varieties if properly bunched seem to please and but few go to waste. Ed. Reid is getting some good Californias. S. S. Pennock is getting a few fancy doubles.

There is a good demand in the green goods. Fine maidenhair moves lively at $1 per hundred. Asparagus in bunches and strings sell for 50 cents, with a demand for the bunches that is greater than the supply. The 'mums are down, peace to their ashes, may they come early next fall with renewed vigor and not tarry quite so long in the winter month.

Orchids are in quite good demand; cypripediums sell for 12 to 15 and cattleyas

GREENHOUSES OF MRS. E. A. WILLIAMS, PITTSBURG, PA.

A Successful Lady Florist—Pittsburg.

Mrs. G. A. Williams, 1713 Carson street, has effected improvements this summer that make her establishment fully equal to any in this vicinity, being modern in every respect. The greenhouses shown in the illustration are located at Knoxville, on the hill top, on the south side of the city, and are seventeen in number. This season Mrs. Williams had six new ones put up, 20x100 feet, together with a new propagating house, and had them all well stocked. She is making a specialty of plant decorating, having a very large and fine lot of palms and foliage plants. Mrs. Williams has the distinction of being the only woman florist and grower in this section. She is a progressive business woman enjoying the confidence and respect of the trade. The illustration will give a very good idea of her place.

are very scarce at 50 cents. The preparations for Christmas are to be seen on every hand and there promises to be a large stock of all kinds of greens and holly. There are more people interested in this stock every season and as a con

BEGONIA GLOIRE DE LORRAINE

sequence prices fall. Good holly can now be bought at a very low figure as compared with the prices of three years ago; from $2.50 to $3.50 per case is about the price for good stock. Ground pine is offered at 6 to 7 cents per pound. In a few days the streets will be lined with the men and women who gather and market their stock themselves.

Robert Craig, we are glad to say, is better and though recovering will be obliged to remain in bed for two weeks at least.

Miss Conway, of Brooklyn, was married to F. W. Whitley of Smith & Whitley, December 4.

Ed. Reid is first out with a calender for 1898. It is both useful and ornamental.

S. S. Pennock's addition is now completed and he will now have room to handle his business for a year to come, at which time another addition may be looked for.

Bayersdorfer & Co. are up to their eyes in business but will find time to show a fellow around the warehouses when he drops in. The visitor is generally touched for an order before he leaves, not being able to resist the temptation, as it were.

M. Rice & Co. say their business was never better, they having to work overtime to get their orders out. K.

Begonia Gloire de Lorraine.

It was gratifying to note in the last issue of the FLORIST that the Massachusetts Horticultural Society had awarded a silver medal to the begonia, the name of which heads these notes and which is well shown in the illustration. That public-spirited gardener, Mr. F. L. Harris, who has charge of Mr. Hunnewell's estate, Wellesley, Mass., had the honor of exhibiting this new plant on the occasion referred to.

It is not only destined to play a very important part in floriculture, where begonias have hitherto held their own, but it will go further, for on account of its free blooming qualities it cannot fail to make a place for itself both as a pot plant and also for cut flowers in general.

In color it is a bright and cheerful pink. It certainly is most valuable, and belongs to the fibrous species of begonias; or is it a hybrid? Am inclined to believe it to be a hybrid.

This same begonia was on exhibition at the last show held in Philadelphia. The name it bore there was Gloire de la Reine! I have seen it growing since that time in a greenhouse and it was there correctly labeled "Gloire de Lorraine." I am a thorough believer in labeling every article, no matter how insignificant it may be, at an exhibition, because even a display for effect only loses more than half its value if the plants composing it are not correctly labeled.

What are we to do when an article comes so nearly being correct as was this one and yet be named wrongly? Such carelessness (or worse) is the direct cause of much erroneous and misleading horticultural nomenclature being diffused, and it is certainly to be deplored. It is to be hoped that this particular exhibit was

not thus wrongly named and yet so nearly true for the purpose of throwing those who might likely be hunting in other catalogues for so valuable a plant. We trust not.

If there ever was a mule begonia this variety must be one, for notwithstanding the fact that there are hundreds of flowers on the few plants that I have seen, not one among them was known as seed-bearing—possessing no pistilate flowers; there were flowers bearing bright yellow stamens in abundance, but so far as I could see not one ripe grain of pollen was visible. The two parents of this begonia are as dissimilar as possible, B. Socotrana being a distinctly winter flowering species requiring rest in summer, whereas B. Dregii, its other parent, may be depended upon to flower in summer. S. DALE.

Chicago.

WHOLESALE HOUSES TO MOVE.—LARRY KELLEY IS HELD UP.—CHICAGO BOWLERS MAKE EXCUSES.—CHICAGO FLOWER SHOW STATEMENT.—MR. NEUNER STABBED AND ROBBED.—S. BLAIR WINTER HOME AGAIN.—MARKET NOTES.

The Atlas Building on the northwest corner of Wabash avenue and Randolph street is rapidly coming to the front as a wholesale cut flower center. Three firms have secured quarters in the building within the last week or ten days. Others have been negotiating for room and may move to this locality later on. Mr. E. C. Amling, formerly at No. 88 Wabash avenue, has secured the room formerly occupied by the Illinois Cut Flower Co. at 51 Wabash avenue. He will have ample room in his new place to handle his largely increased business. Poehlman Bros. will occupy the first room next south of Reinberg Bros. Rogers Park Floral Co. have leased the room next south of Amling's.

CHICAGO SHOW, 1897. RECEIPTS AND EXPENDITURES.

RECEIPTS.

Gate receipts	$4,389 35
Cut flower booth, commission and programme advertisements	355 98
Total receipts	$4 745 33
Premiums given by friends of the society	$1 393 39
Total receipts from all sources	$6,138.72

EXPENDITURES.

Installation maintenance and rent	$1 444.16
Advertising	894 64
Preliminary	87 00
Recording and accounting	117.50
Art exhibit	162.24
Music	165 00
Judges	133 94
Admission	99.60
Programme	204 80
Premiums	1,748.00
Total	$5,056.28
Excess of receipts over expenses	$1,082 44
Deficit of the show on its merit (that is, if donated premiums are not considered)	330 95

A. Neuner, formerly of the firm of Nanz & Neuner, Louisville, now with Vaughan's Seed Store, was assaulted, stabbed and robbed the night of the 11th. He is mending and will be out this week.

Larry Kelley, with Kennicott Bros. Co., was met by two footpads as he was going home a few nights ago and relieved of his small change (60 cents). Larry says when he received the command "hands up" he executed it in double quick time.

The Chicago Braves returned from St. Louis Monday morning highly pleased with their trip to the city across the bridge, though we have failed to discover any scalps in their girdles. Each of the bowling teams lays the blame for not making a better score on the others, Walter Kreitling alone accepting his share of the blame. Walter claims he got dirt in his eyes from washing in the waters of the "Big Muddy" and he could not see the pins.

S. B. Winter, of Winter & Glover, wholesale florists, has returned from the East, where he has been on a pleasure trip for the past two months.

There is a general complaint of slow sales with the retail trade, but with the wholesalers it is quite the reverse. It is quick sales at good prices with them. Their only complaint is short stock.

Beauties are in great demand for out of town orders. It would require all that are being cut to fill shipping orders alone. Good Bridesmaids are the scarcest flowers on the market. Many are off color, caused in part by dull weather, and I fear in too many instances by being cut too soon and left to open in the cellar or ice-box instead of on the plant. The stock of light colored roses is somewhat shorter, though up to the present about equal to demand.

Violets are coming in more plentifully, though held too high to move freely, except to shipping trade.

Carnations are more plentiful, except white, which are still very scarce. The prices of the better grades of carnations have stiffened a little this week. Bulb stuff is in limited supply, valley bringing from 3 to 5 cents, according to quantity; Roman and paper white slow at 3 to 4 cents; there are fewer Harrisii lilies, and they bring 15 cents readily.

Mr. Turner, of Kenosha, in town.

Chicago Bowlers' Trip to St. Louis.

The Chicago bowling team, with three or four other members of the trade took the Wabash train for St. Louis Saturday night last. They were met by a goodly delegation of the St. Louis boys and after a substantial breakfast at the "Rosier," made the rounds of the wholesale and retail stores. Bowling began about one o'clock and continued until six with occasional intermissions for discussion of a very palatable luncheon. Over one hundred members of the craft were spectators at the alleys during the game. At 6:30 the visitors, the St. Louis bowlers, with others partook of an elaborate dinner at Lippe's; 28 covers were laid, with President Halstedt of the Florist Club, in the chair. After the dinner a few short speeches were indulged in and a cordial vote of thanks passed by the visitors on motion of Captain Wilson of the Chicago team. Cordial good feeling prevailed the whole day and at 9 p. m. most of the Chicago party were escorted to the train and given a hearty good-bye. The success of the St. Louis team makes a third game necessary and it will be looked forward to with much interest.

Cincinnati, O.

CARNATION SHOW.—MEETING AND NOMINATION OF OFFICERS.—ENTERTAINMENT.—E. G. HILL AND J. BERTCHE ON THE SICK LIST.

The carnation meeting of December 11 was the most attractive meeting this year. The exhibition of carnations brought out the best growers of this vicinity, as well as some from a distance. Mr. Fred Dorner and Hill & Co. were prominent exhibitors; their display was well arranged and deserved credit. Although the show was called a "Special Carnation" show, the display of roses was as usual the center of attraction. Messrs. George and Allen's collection of roses, some twenty vases, were fine, and many favorable comments were passed upon them by the visitors.

The most conspicuous vase in the hall was that of carnation Evelina; stems stiff, flowers large and bold, color white and foliage clean, shown by R. Witterstaetter. The house of Evelina should be seen to be appreciated, and if she behaves as well in the future as she has done in the past, will be *the* white. Flora Hill made as good a showing as usual, but lacks stem alongside of Evelina. One of Mr. Hill's new varieties Psyche on the order of Armazindy, heavily pencilled with pink, was a favorite; another of the same firm, Painted Lady, on the order of Bridesmaid was considered fine. Arbutus, James Whitcomb Riley and Nobilis are good flowers and will be heard from later.

F. Dorner & Sons exhibited four new and some standard varieties. Among the late introductions Marie Wood, a white Bradt, Gold Nugget yellow pencilled with pink; too much can not be said of this variety. Gold Nuggett comes as near to perfection as any, the color a pleasing yellow, stems strong enough to hold the flower up gracefully, foliage robust and clean. John Young white and J. H. Grane scarlet, the latter I would call fair. C. H. Duhme, Bradt and White Cloud were well done. Wm. Murphy staged fourteen standard varieties and one vase of seedlings, and received a full share of certificates. Sunderbruch Sons' made the best general display of plants and cut flowers; several specimen plants of Cyclamen giganteum in 6-inch pots were well done and praised highly. The only vase of Poinsettia pulcherrima also in the Sunderbruch collection showed off immensely with a green background of palms and ferns. This firm received a special certificate for best display. Our city greenhouses came in with orchids and ferns, also several well-grown plants of Primula obconica.

Corbett & Wilson took the plum on violets, their Californias were surely grand with stems 8 inches long.

In the evening the regular monthly meeting was called to order by Pres. Gillett. The meeting was fairly well attended, fifteen members being present. Nomination of officers for the ensuing year was put on docket, and the secretary instructed to mail a copy to each member to select five of the roll of members to be voted on at the next meeting, these to serve as directors. After the routine of business was transacted, Mr. Giesy of Lockland, who was appointed a committee on entertainment, was called upon and in his usual witty way recited several selections, which were well received. Mr. Ben George was next on the programme; he spoke his piece well, which, by the way, he says he learned in a Sunday-school in old h'England. Ben George behind the footlights would make James Whitcomb Riley, the Hoosier poet blush. Mr. Will Murphy and Witterstaeter took up a discussion on "Carnation Culture" and were listened to with much interest.

Bowling notes: The Growers' Bowling Club, bowled their second game December 8, at Monmouth and 10th streets, Newport. The following scores show their average in six games. R. Witterstaetter, captain, 130; J. Fries, 106; Thomas Jackson, 150; W. Rogers, 146; F. Walz; 116. December 14 the store men and Growers' Club bowled a friendly game at Kern's alleys. Will Gray is said to be a great pin knight.

The funeral of Mr. Ch. Fleishman (of yeast fame) the philanthropist and multi-millionaire, created the largest demand

ever experienced in this city. Several hundred pieces of every description were arranged on the platform at the Scottish Rite Cathedral.

I am sorry to report the illness of Mr. E. G. Hill, who has been confined to his bed with lumbago. The boys here wish Mr. Hill a speedy recovery. Mr. Joe Bertche is also on the sick list.

H. SCHWARZ.

St. Louis.

FLORISTS' CLUB MEETING.—VISIT OF THE CHICAGO BOWLING CLUB.—ST. LOUIS WINS.—WEBER'S NEW STORE.—GRAND OPENING AT C. W. WORS'.—MARKET NOTES.

Thursday, December 8, the Florists' Club held their regular monthly meeting. The report of the chrysanthemum show committee was presented and adopted, and a vote of thanks was tendered to that body for the able manner in which the show was conducted. The essays rendered were instructive to both grower and dealer. The Chicago delegation of florists and bowlers consisting of Messrs. Wilson, Grant, Hauswirth, Zeck, Winterson, Kreitling, Stollery, Vaughan and Lange, arrived last Sunday morning to play the return game with the St. Louis Club. They visited most of the wholesale houses and took in as many retail stores as time permitted. The visitors were impressed with the growth of the city. It is to be hoped that their pleasure was not marred by their defeat. The appended score tells the tale.

The weather during the past week has been anything but favorable to both the grower and dealer. Notwithstanding that the receipts of stock were light, prices continued to drop. Shippers are evidently holding back their stock for holiday week, and from all indications good prices will prevail.

Roses: The supply of Beauties for this market was very limited and all fancy stock sold at good figures. Dealers have already put in large orders and prices should rule high for the coming week. Bridesmaids were received in liberal quantities; the majority, however, were very poor in color. Meteors are scarce and poor in color, Perles arriving in good shape, La France scarce; Carnots bring big money and are very scarce.

Chrysanthemums are practically over. California violets have held up in price all the week, supply limited. Double violets scarce and readily sell at good figures. Home grown singles are becoming more plentiful. Southern violets are arriving in larger quantities. Valley is scarce. Narcissus and smilax in good supply. Harrisii lilies are backward this year and prices will be higher than usual. Mignonette continues to arrive in fine quality.

Riessen Floral Co. were very busy during the past week, having no less than eight large decorations to take care of.

Mr. G. C. Weber reports good trade in the west end, and his magnificent new store was the admiration of the visitors.

W. W. Coles, of Kokomo, Ind., still holds up his reputation as the "King of Growers" of Kaiserin and fancy Beauties.

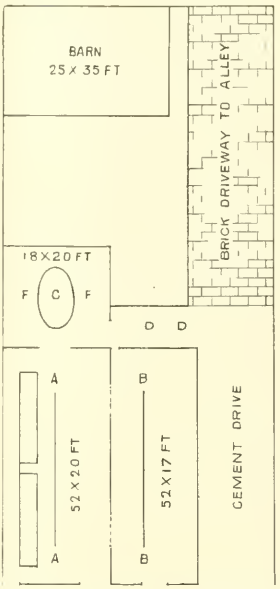
C. W. Wors had a grand opening at his new quarters on Olive street; the boys report a good time and extend best wishes to the young heir, Master Robert Fitzsimmons Wors.

A. J. B.

Fred C. Weber's Model Store—St. Louis.

With the present strong competition among retail florists in all our large cities, the question of a store especially adapted to the business and with a location convenient to the best and most profitable class of trade are matters of the greatest importance. Recent experience has undoubtedly demonstrated that a flower store arranged with one or two practical greenhouses immediately adjoining and opening into the salesroom is very attractive to customers.

As to locality, many of our most successful retail dealers in flowers and plants we find now located in or near the best residence districts. Their customers—most of whom are ladies—find it pleasant and convenient to visit the nearby flower stores and conservatories, and trade is increased by this convenience.



Mr. Fred C. Weber, of St. Louis, has recently erected at 4326 and 4328 Olive street a floral establishment consisting of a store with a residence above and two greenhouses adjoining, which may well be considered a model place. Mr. Weber at our request has very kindly written explaining the leading features of his place and their adaptability. We present two illustrations, a photographic front view and an outline sketch of the ground plan, with notes.

Mr. Weber says: "I consider it of first importance to secure a location favorable to trade, and second to so locate the greenhouses that all possible light is available. For this reason I have located on the south side of a street running east

STORE OF FRED C. WEBER, ST. LOUIS

and west, getting an excellent light for the greenhouse in the rear of the store. In building the store I have taken into consideration several points—compactness, neatness, pleasant outlook, color of walls and fixtures, the whole to harmonize so the customer receives a pleasant impression on entering the store. Next in importance I consider the store fixtures and here again the color must be considered. In my opinion nothing will display palms so well as white fixtures with a pea green tint for the color of the walls; when I speak of fixtures in a flower store the refrigerator

GROUND PLAN OF F. C. WEBER'S PLACE.

A A Store. *E E Blooming Plant House*
B B Palm House. *C Aquarium.*
D D Plants unloaded here.

is a feature. My arrangement gives 2-inch pans of water covering the bottom of the box with an overflow for the surplus. I think it important that a thoroughly moist atmosphere pervade the box rather than that flowers be kept too cold, and my experience is that the flowers so kept are much more satisfactory to my customers.

"We have used a few large mirrors—not too many—for a duplicate effect of the flower and plant display, and the ladies always like them. Our counter we have made of tile. It is easily kept clean with a sponge and chamois, is very handsome and displays the flowers to the very best advantage. Tiling is also used in the large show window. The store floors and the base board running around the same are laid in mosaic and are always neat, clean and attractive.

"The greenhouse for palms is in front and at the right of the store, as shown in the ground plan. It is connected by one large 12-foot door, a 12-foot plate glass window and a smaller door in the rear. Ample light is supplied for the side of the store with sunshine from 10.30 A. M. to sunset. This palm house is supplied with side and center benches. In the rear of the store is the smaller greenhouse used mainly for flowering plants, with a cement aquarium in the center available for aquatic plants, goldfish, etc. The walks of both the houses are of granitoid. Through the door at the right of this show house we pass to a receiving place in the yard where palms, flowers and other material are unloaded. This place is cemented.

"The cellar work-room is well lighted and also has a cement floor with a sheltered outer area well adapted for storing Christmas green, holly etc.

"The telephone closet is boxed into the

stair area just at the rear of the desk, where it is not only convenient, but entirely separate from the store and shows no wiring on the walls.

"The entire establishment is lighted by electricity, as is also the refrigerator, which has mirrors at the back."

St. Louis. F. C. WEBER.

Baltimore.

TWO THOUSAND BOXES OF CUT FLOWERS DISTRIBUTED FREE PER MONTH IN THE DISTRICT OF COLUMBIA.—OTHER NEWS ITEMS.

The club was treated to a bit of magic at its last meeting, for when Mr. J. R. Freeman, of the delegation from Washington, waved his hand and made a few passes and uttered a few incantations, the walls of the room disappeared, and the astonished gaze of the members rested upon enormous ranges of forcing houses, hundreds of skillful employees, acres of neglected and shabbily-planted public grounds, thousands of boxes of choice cut flowers distributed in bribery to senators and congressmen, broken laws, misappropriated public money, suffering florists and demoralized business, all caused by the iniquitous distribution of plants and cut flowers to influential people and members of congress by the Department of Buildings and Grounds in Washington, D. C.

Mr. Freeman, who made a very forcible speech to the club, began by explaining that their reason for asking Baltimore men's assistance was because they had been told by Col. Bingham, the officer in charge of the department, in answer to their earnest and repeated complaints that the Baltimore florists approved of the free distribution; then again, Baltimore being so near, must be almost identical in interest with them, and naturally seemed the point through which they might reach the outside world and bring influence to bear on the official world of Washington.

He then described the growth of the public gardens of Washington from the humble position it occupied in 1865 to its present state, with about two acres of glass used, ostensibly for the protection of plants for the public grounds but really to grow carnations, roses, chrysanthemums and other florists' flowers to be given away to senators, members of congress, judges of the supreme court and people of influence generally. He said Col. Bingham had admitted having distributed two thousand boxes of cut flowers per month, one to every member of congress, two to every senator and eleven or twelve hundred to various men of influence. The colonel stated that one-half of the flowers were sent to hospitals, but he (Mr. Freeman) had failed to find the hospitals that received them. These flowers were admitted to be worth three dollars a box at least. About forty thousand long stem chrysanthemum flowers were distributed this season.

The chief official excuse was that in the production of plants for the public grounds some flowers were necessarily grown which, when cut, had to be thrown away or given to some worthy institution or person, also that some were needed in decorating the White House. The truth of the first excuse might be tried by a list of some of the houses. Three, two hundred feet long, being filled with smilax; three, the same length, with carnations; two with roses, one with azaleas, one with adiantum, one with swainsonia, poinsettias, etc., all of which was evidently fine stuff for planting the grounds with.

As for the White House decorations; which were invariably and unchangeably the same, the conservatory there furnished the plants, and in spite of the vast quantities of flowers in the public garden greenhouses, they had been known to use artificial flowers to eke out the supply at the White House, which was furnished altogether by the White House conservatory.

The whole business was in violation of a law expressly prohibiting it, as found in United States Statute at large, 45th Congress, 2nd session, vol. 20, page 220. After the ordinary appropriation the words "provided that hereafter only such trees, shrubs and plants shall be propagated at the greenhouses and nursery as are suitable for planting in the public reservations to which purpose only the said products of the greenhouses and nursery shall be applied."

Mr. Freeman was followed by Messrs. Hale, Boyle and Woods who all added to the distressing picture touches of their own, mentioning two reform schools supported by the government, which make a business of growing plants and flowers and selling the same in competition with the regular trade.

The members of the club were greatly stirred up and on motion Messrs. Seidewitz, Burger and McRoberts were appointed to draft resolutions. Judge Sands happening in just then assisted and the following resolution was offered and passed unanimously.

Resolved, That this organization reprobates and protests against the existing and still further growing practice of the free distribution to officials and private persons, of cut flowers, decorative and flowering plants in the District of Columbia by the sub-departments of the U. S. Government as contrary to justice, to the correct principles of business, and to public policy, as well as to the very letter of the law governing the production of plants, etc., adapted to uses in the public grounds, and also as working great detriment to the florist trade of Washington and vicinity.

Several members of the club expressed their hearty desire to do all that could be done for the brother florists in their trouble and a motion was carried instructing the secretary to send copies of the resolution to the heads of departments at Washington, and to our representatives and senators.

Naturally after all this there was no time to talk flower show, so the executive committee's report went over to the next meeting.

Since the chrysanthemum has almost disappeared from our markets flowers have been decidedly scarcer, and the numerous balls and entertainments have increased the demand to such an extent that those fortunate enough to have flowers in spite of the dull weather are finding ready sales and good prices.

The La France buds shown at the club meeting by Madsen & Anderson were truly remarkable in size, color and stems. Mr. I. H. Moss showed a La France sport color of Bridesmaid at the same time, which was a very pretty variety.

S. N. Peck, the Broadway florist, has started a branch business in Bowling Green. Miss Bertha Peck is in charge of the business

Buffalo.

WILLIAM M'MILLAN SUPT. OF PARKS REMOVED—WM. BELSEY'S PLACE—WM. SCOTT'S HARRISII LILIES.

It will be a surprise to many of your readers to hear that the Park Commissioners of this city have dispensed with the services of Mr. William McMillan, Supt. of the South Parks.

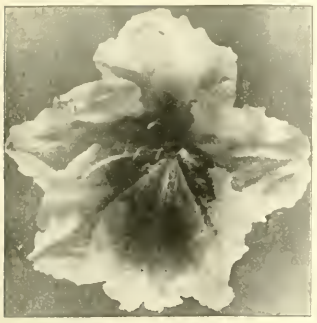
While not unexpected yet it was hoped for a time that existing differences might be adjusted amicably, but matters had evidently gone too far, and the rupture came. Mr. McMillian has been in the department for twenty-six years, and until quiet recently has been superintendent of the entire system, and the present conditions of the parks is in a great measure due to his careful management. His interpretation of the Olmsted plans was most happy, and that firm has, on more than one occasion, complimented him on his success in carrying out the details.

No successor has been appointed. It is to be hoped that no hasty action will be taken, but that the commission will wait until the services of a thoroughly competent man can be secured.

Trade is quiet, probably on account of the very unseasonable weather.

It is a real pleasure, in these days of specialists, to get into a place where a snug little retail business is done, and where about everything sold, is raised in the establishment.

Of course it looks queer to see roses and palms growing in the same house, but "The proof of pudding is in the eating," and at Mr. William Belsey's place on Brayton street the two seem to get along nicely together. Mr. Belsey has been for years one of our most successful cyclamen growers, and has a very nice lot coming on, though they will hardly be in for the Christmas trade. He usually has fine primulas and this year is no exception to the rule. I notice that he still grows Asparagus tenuissimus quite extensively, though he has some plumosus. Some fine crowns of Adiantum cuneatum, now resting, give evidence that in their season he must have had some fine specimens. I observed that his stock chrysanthemums were out in cold frames for the winter and he informs me that such is his usual method. He thinks the stock is more vigorous, treated in this way.



While waiting at Scott's the other day, I noticed that he adopts the method of starting his Harrisiis in small pots and when well started and rooted shifting them into larger pots.

This seems to be a growing practice, and doubtless an excellent one. At shifting time about all the diseased bulbs can be detected and discarded. Here too, I saw some very attractive pans of poinsettias, several planted together in pans of various sizes. They were propagated in August, are a little more than a foot high, well bracted, and furnished with dark green foliage to the ground. Mr. Scott takes objection to some recent remarks of mine in which I characterized Corfu as a desert in regard to violets. He says there are oases in the desert and that from his old house he is picking good violets in quantity.

My remarks were not aimed at him, but, however, the apology is accepted.

Thrall's new store is a beauty. It is furnished in white and gold, is roomy, and his show window is one of the best on the street.

McKEESPORT, PA.—A. J. Deitz & Co., have sold out to J. H. Orth & Co.

American Grown Azaleas, Rhododendrons and Kalmias.

Thirteen years ago Jackson Dawson read a paper before the Massachusetts Horticultural Society on the propagation of trees and shrubs from seed. Last August the visitors to Providence at the S. A. F. convention were surprised and delighted to see an object lesson of fine healthy looking 3 year old rhododendrons and Azalea mollis grown from seed at Swan Point cemetery, equal and in some respects superior to the best imported stock.

Mr. Timothy McCarthy, Swan Point's talented superintendent and his enthusiastic foreman, Mr. Dillon, modestly declined to accept any credit for the results of their work and the well awarded medals of the S. A. F. found them protesting vigorously against "sailing under false colors and borrowed fame" as Mr. McCarthy expressed it. Because, as he further claimed, "the incentive and encouragement to undertake anything in this line must be given to that veteran propagator and best friend to horticulture our country has to-day, Jackson Dawson," and to the paper on propagation referred to was attributed wholly the success attending the effort to raise home grown rhododendrons and azaleas.

Twenty years ago the visitor to the Arnold Arboretum had an opportunity to see seedling rhododendrons successfully grown in frames. There was no mystery or egotism and Jackson Dawson was as ready and willing then, as now, to initiate anyone sufficiently interested to listen, yet our nurserymen have gone on propagating maples and deutzias, spruces and spiræas, while men of wealth have been sending thousands upon thousands of dollars abroad for rhododendrons, to protect and care for which has cost as much as the plants themselves, and our plant lovers possessed of smaller means have spent many a dollar for worthless imported varieties, grafted on tender stock, and discouraged by their failure the cottage gardeners have been concontent to relinquish the rhododendron to their wealthy neighbors as an exclusive possession, an aristocrat among aristocrats, whereas it should be a conspicuous ornament of every home garden.

Suppose that twenty years ago some enterprising nurseryman had gone into rhododendron and kalmia growing; what would the results have been worth today? Low, mucky land, of little value for anything else, might have been utilized, and what better asset could a nurseryman leave his family than a fifty acre plot so planted? A nursery of undisturbed conifers and deciduous trees and shrubs at that age would be almost valueless, in fact few of the popular garden shrubs would be worth digging at ten years of age, but rhododendrons thirty years old can be guaranteed to live even if so large that it takes a yoke of oxen to move them. Yet if one wants to buy a few hundred plants there is not an establishment in all America that can furnish them!

Mr. McCarthy regrets that his work loses much of its merit from lack of system. The seed from which his plants were grown was taken haphazard, a pod here and there, without any regard to varieties or selection. The seedlings, in a general way, however, seem to be as good as the named imported varieties and are, of course, superior from the fact that they are on their own roots, and grown in our own climate and soil they should and do show a vigor rarely seen in foreign grown stock He regards the old idea of the necessity of a deep peat bed for rhododendron culture as erroneous and finds that a border of ordinary soil with turf and leaves from the garden suits them better. Rhododendrons from Germany do not seem to succeed here even as well as the English grown plants and this he attributes to the use of too much peat by German growers.

The interest developed by the Providence exhibition leads us to feel that at last our American growers begin to recognize their opportunity and it will not be many years before we shall see at some of our S. A. F. conventions as fine specimens as those produced at Swan Point Cemetery, grown by commercial nurserymen and offered to the public at reasonable prices. No lawn is complete without a group of these lovely plants and there is room in all our public parks for miles upon miles of Rhododendron maximum and Kalmia latifolia. Home grown stock will give birth to public confidence and the nurseryman who takes advantage of the present opportunity, going about it in a systematic manner, will in the near future gather in a substantial reward.

Mr. J. P. Dilion has kindly furnished us with the following history of the plants shown at Providence and the method followed in their culture.

"On one of my collecting trips (December 21, 1893) I collected some seed from several varieties of hybrid rhododendrons which after cleaning I sowed on the 3rd of January, 1894, in pans prepared as follows: I first got some light sandy soil to which I added an equal amount of well rotted leaf mold and thoroughly mixed, the pans being about 3 inches deep and drained well with broken crocks about an inch deep, over which a layer of sphagnum was placed and the pan filled with the compost, upon which after being pressed firm and well watered the seed was sown. These were covered very lightly with some old dry sphagnum ground up fine and sifted over them with a fine sieve. In 2 weeks time they commenced to come up, and in 3 weeks were up fine, and 3 weeks later or 6 weeks from sowing they were transplanted into flats one-half inch apart, using the same sort of compost. This, I believe, is their dangerous period and they want to be kept in a shady location and watered carefully, as one hour's hot sun will destroy a whole batch by scalding; it is equally true that an over-dose of water is just as injurious, so constant care and watchfulness are necessary all the time.

Just as soon as the leaves of the plants begin to touch each other I reset into other flats, sorting into sizes and putting them from 1 inch to 2 inches apart according to size; this was done the last week in June and the flats put into the coolest part of the house. After two weeks they were taken out and placed in a frame shaded with lattice work and treated as any hardy plant, covering them during storms with sash to protect them from drenching. During the last week in September I again sorted and transplanted putting plants as close as the foliage would admit and let them remain in the frame until the following May, when they were taken and planted into frames made specially for them.

The soil used in the frames was the top sod of our native soil in which the kalmia, azalea, huckleberry, black alder and other native plants make their home. The seedlings which were at this time from 2 to 4 inches high took kindly to the soil and grew rapid and robust, making nice stocky plants 6 to 10 inches high at end of season. Among a batch of over 600 we did not lose 20. With a light covering of brush and litter to protect them during the winter they came round all right in the spring ready to make a splendid growth and to set flowering buds for the following year (which was the past spring). Among those that flowered there was not one that was not the equal of some imported named varieties, besides the growth was luxuriant, being from 10 to 18 inches and stout in proportion.

Our native R. maxima is a late flowering variety coming into bloom when the season is advanced and the weather hot and dry which may have a tendency to keep the seed from maturing as vigorously and plump as the earlier kinds. I have both maxima and the hybrids growing in flats side by side, the maxima slow growing hardy looking little fellows while the hybrids are plump and vigorous.

The Azalea Mollis we have grown under the same treatment, being equally successful, having plants from 2 to $2\frac{1}{2}$ feet with from 10 to 20 shoots and in bud. The rhododendrons are just as high with from 6 to 14 shoots, a great number of which are set with buds and all grown from seed sowed on the 3rd of January, 1894.

As regards the proper time to pick the seed I should say it would be just as soon as the seed pod commences to burst, which I find to be from the middle of November to the middle of December, some varieties maturing and ripening much earlier than others. I believe that cold weather and frosts tend to ripen and perfect the seed and am satisfied it is no injury to them, for I have picked in January pods with seed in them that were exposed to the severest kind of weather and they germinated all right. I would say the temperature maintained during nights and cold and cloudy weather is about 55°.

Form and Value of the Fixed Alkalies as a Plant Food.

BY A. W. WARD.

[*Read before the Gardeners and Florists' Club of Boston.*]

There are two fixed aikalies, potash and soda. For agricultural purposes they are used in the form of muriates, sulphates, carbonates or nitrates. Sir John B. Lawes says: "Although potash, phosphoric acid and nitrogen are the chief manure ingredients in barnyard dung, the manure ingredients in artificial foods and in artificial manure, still the difference in form in which these substances are met with greatly affects their value. The present method of analyzing manures does not properly recognize these

distinctions, and the valuations founded upon these analyses are altogether false and erroneous." Thus it appears that the form in which alkalies are applied to the soil greatly affects their value.

Muriates and sulphates are in a very inferior form to the carbonates. Their action on the soil and plant is entirely different. Muriates and sulphates are plant poisons; carbonates and nitrates are plant nourishers. Alkaline muriates are beneficial, however, when added to the manure heap, keeping down the heat and preventing fermentation. They are sometimes used to check vegetation and employed not infrequently to hinder the growth of grain crops, or, rather, to prevent the stalks from becoming nitrogeneous matter. Muriate of potash closely resembles muriate of soda (common salt) in appearance, solubility in water and action on the soil.

Sodium salts are, however, not characteristic of vegetable life in the same sense that potassium salts are. Thus, while the latter alkali is always present in larger quantities in certain organs of the plant than in others, sodium appears to be generally equally diffused throughout the whole organism. It is also a remarkable fact that the sodium salts contained in the ashes of plants are insoluble in water, as they combine with the phosphates of the alkali earths to form insoluble compounds. For this reason the presence of sodium compounds has been often overlooked.

It is a well established chemical action of the alkaline carbonates (potash and soda) on vegetable or other organic matter to render it more soluble and thereby cause it to more speedily and effectually reduce insoluble and inert organic matter to the state fit to be taken up by the roots of plants and enable them to be more completely consumed as food. They may be said to prepare the food of plants, forming readily soluble compounds with the humic acid and the organic substances existing in the soil.

Under the influence of the alkaline carbonates (not sulphates or muriates) the organic matter disappears more rapidly than it would otherwise do, and after it has thus disappeared fresh additions of the carbonates produce no further good effects. Putrefactive fermentation will shortly set in where a soil rich in organic matter is mixed with enough alkali in the form of a carbonate to saturate it, and it is then left moist in a warm place.

Conversely, it is known that acid and acid salts hinder putrefaction. The presence of the alkali favors the growth of the microscopic ferments and that of an acid hinders it. The real significance of the alkali carbonate added to the soil containing much organic matter is, that besides neutralizing its natural sourness it favors to a remarkable degree the growth of the nitric ferments and so promotes nitrification. A trace of alkalinity in the soil, and air, moisture, warmth, carbonaceous food and ammonium compound constitute favorable conditions for nitrification. On an acid soil most crops, and especially grain crops, are subject to disease, and root crops are apt to fail altogether on such land, even if it has been liberally supplied with dung.

Up to a certain stage, grain and root crops, grown under such conditions, appear to thrive well, but as the season advances they receive a check, and at harvest time yield a miserable return. It is impossible to doubt that carbonate of potash or soda are useful in agriculture. Carbonate of potash has hitherto been considered too high in price to admit of its extensive application to the culture of the land. This reason, however, does not apply to the carbonate of soda, which is sufficiently low in price to allow of its being applied with advantage, under many circumstances. In the case of grass lands which are overrun with moss, or such as abound largely in vegetable matter, it may be expected to produce good results. It may be applied in a fine powder as a top dressing, and generally where wood ashes are used.

It greatly hastens the growth and increases the produce of the strawberry and should be applied early in the spring. Many experiments have shown that both of these alkaline carbonates may be employed in the field with advantage to the growing crops. In reference to their mode of action it may appear that potash is the more likely of the two to be beneficial to our cultivated crops, inasmuch as the ash of those plants which are raised for food is generally much richer in potash than in soda. This arises from the more abundant presence of potash in the soil generally, for it has been demonstrated that soda may take the place of potash in the plant without materially affecting its growth.

It is stated in "Dana's Manual," fifth edition, page 66: "The inorganic elements of plants exist in combination chiefly with organic or vegetable acids. Each plant forms acids in definite quantity, proportionate to the size, age and part of the plants; the acid being constant, the bases to saturate them will be equally constant.

"It is a well established fact that plants growing on soil containing a due mixture of earthy ingredients always select a due proportion of each, according to their functions; yet, if to such soil an excess of either of the alkalies or of the alkaline earths is given, an excess of potash, soda, magnesia may be taken up by the plant, to the exclusion of the usual proportion of another; hence it may be established as the seventh principle in agricultural chemistry, one base may be substituted for another in equivalent proportions.

"This is a very important law in the agricultural relations of the inorganic parts of soil. Whatever may be the office performed by these in the living structure, none is of higher value than this, that they may be thus substituted, the one for the other. It is a fact of the highest practical value. Its value will be perceived when it is considered that in soil containing originally all the elements essential to a crop becomes exhausted of one, yet another may be substituted, which combining with the organic acid of the plant, enables this to perform and perfect all its functions."

SITUATIONS, WANTS, FOR SALE.

Advertisements under this head will be inserted at the rate of 10 cents a line (seven words) each insertion. Cash must accompany order. Plant advs. not admitted under this head.

Every paid subscriber to the AMERICAN FLORIST for the year 1898 will receive on request, a coupon for one five line want "adv." free, to be used at any time during the year.

SITUATION WANTED—By Colin Ogston, West Atlanta, Ga., who is a first-class grower of wholesale and retail stock.

SITUATION WANTED—By a reliable young man, single, age 23, seven years' experience in private and commercial place; good references. Address G, care American Florist.

SITUATION WANTED—By well recommended young German; good grower of all foliage and pot plants. Please state wages and address N N, care American Florist.

SITUATION WANTED—All-round florist, good propagator, grower and designer; carnations and violets; good references. I. P. HERSEY, Stafford Springs, Conn.

SITUATION WANTED—As grower in commercial or assistant in private place; best of references; single, age 26; sober and reliable. Address GUSTAV JOHNSON, 48 West Huron St., Chicago.

SITUATION WANTED—By an A1 grower of roses carnations, mums, etc., as working foreman of commercial place; age 27, single, best of references. Address E H, care American Florist.

SITUATION WANTED—By a young florist, 22, as assistant on private or commercial place; 7 years' experience in general greenhouse work. Good references. GEO. N. PHILCOX, Valley Park, Mo.

SITUATION WANTED—By a competent gardener and florist; could manage gentleman's estate or institution with success and economy; thoroughly reliable. Address "BOX," care American Florist.

SITUATION WANTED—By an experienced grower of roses, carnations, mums, etc., to take charge of commercial place; age 27, single; strictly temperate; steady position. Address B, care American Florist.

SITUATION WANTED—As foreman or manager in large commercial place by a first-class grower of roses, carnations, mums and general stock; life experience, married, age 36; has been foreman in large establishments for the past ten years; only reliable parties who wish a first-class man need answer; best of references Address ROSE GROWER, care American Florist.

WANTED—Two young men to assist in propagating. Apply at once. BASSETT & WASHBURN, Hinsdale, Ill.

WANTED—Partner in Chicago, with $1,000 cash, to take half interest in well established, paying florist and greenhouse business; experienced man preferred. Address L F, care American Florist.

WANTED—To lease for a term of years, greenhouse plant containing 2,500 to 5,000 feet of glass heated by hot water; must also be stocked and doing business. Address CARBONDALE FLORAL DEPOT, Carbondale, Pa.

WANTED TO RENT, with privilege of buying, by two practical growers, greenhouses, 15,000 to 20,000 feet glass, with land and dwelling house. All particulars at once to RELIABLE 3, care American Florist.

FOR SALE—Florist's single covered wagon; height about 5 feet, width about 4 feet, length about 7½ feet; built to order, costing $250. Used but two years. Will be sold cheap for cash VAUGHAN'S SEED STORE, Box 688, Chicago.

BUSINESS OPPORTUNITY.

One of the most valuable florists' establishments in the Middle South, ½ interest for sale or will lease to an enterprising, wide awake business man. Contents: 7 modern greenhouses, 25x150 ft., one 50x75 ft., three 20x50 ft., 75-foot violet house, frames, splendid windmill and watering facilities, packing sheds, office, 5 acres of splendid land for rose growing situated within easy access of Atlanta, Ga., on one of the most beautiful driveways of the city. Florist store in the Kimball House Block with first-class facilities, and the best stand in the city; connections with several of the largest tourist hotels in Florida, with shipping trade in cut flowers started. This is an established business with unlimited opportunities for enlargement. Aside from the cut flower trade there is a large opening for building up a shipping trade in nursery-grown roses, which thrive and make more growth here in one year than in three seasons in the North. The owner has other large interests which occupy his whole time and wants a thorough-going man who has some means and an ambition to extend an already well established business in this exceptional field. This is not a broken down or failing establishment. The owner does not desire to sell out the greenhouses but would dispose of an interest or lease, so that an enterprising florist would have such interest as would insure the exclusive application to maintaining the high character of the present business and working for its extension. Address JOS. THOMPSON, Atlanta, Ga.

For Sale or Lease.

Three greenhouses containing 2,500 sq. ft. of glass. Only one in county in a town having a population of 5,000 inhabitants and a great watering place.

The reason of getting rid of the business is ill health. None but those meaning business need apply. Address BOX 456, Martinsville, Ind.

FOR SALE.

At less than half its cost, or for rent, about 28,000 square feet of glass with grounds and modern 12-room dwelling, built a year and a half ago; greenhouse nearly new, all heated by steam, well stocked and in good order; located on street car lines between St. Paul and Minneapolis, and a well paying wholesale business established. A splendid opportunity for a good live man. Sale price, $10,000; rent $150 per month. If you mean business, address CHRIST HANSON, St. Paul, Minn.

FOR SALE.

Greenhouses in one of the best cities in Wisconsin. A good investment and a money maker for a hustler. Owner must retire on account of poor health

Born to the S. A. F.—Another Child.

On December 13, at Fort Wayne, Ind., the Florists' Mutual Fire Insurance Co. was formally organized and its board of directors elected.

Now is ushered into the world another member of the growing society of the S. A. F. (let us again, for once, use the old title, so endeared to us by time and kindly associations.)

How many children has the dear old mother society borne and what a stir they have made in the world! What a kindly, loving and indulgent parent has she been, and alas! what ingratitude has been her reward!

To each in turn as they have come into the world, owing their existence to her, has she given freely and without stint of her best and brightest. With what maternal fostering care has she sheltered and nourished her fledglings until they in the arrogance of youth have departed from the parent nest, turning even in their wayward flight to taunt and revile her to whom they owed life itself. When storms overtake them (the clouds even now are dark on the horizon), and when they are buffeted and beaten, will they return again to her sheltering wings, will they accept of her ever forgiving love, will they bring back the strength they have drawn from her?

Let us trust to the experience which comes as the result of trouble, to the waning of youthful recklessness and to the sober thoughtfulness which age brings.

We shall watch the course of this latest born with anxious hope. Will it, too, forget its obligations?

Between the S. A. F. and its offspring no bonds are wanted, no contracts required. They should proceed hand in in hand, each free and independent yet ever closer and closer drawn by ties of mutual interest, mutual friendship, each helping, each helped.

Orange, N. J.

The regular monthly meeting of the New Jersey Horticultural Society, which was held on Monday evening, December 6, was made interesting by a fine address by Dr. Dodge on the violet disease, and still further interesting, as well as amusing, by a discussion which followed between Prof. B. D. Halsted and Mr. Louis Batt. Dr. Dodge illustrated his lecture with charts, showing microscopic views of cross sections of diseased foliage, and Prof. Halsted described the growth and spread of the bacteria spores minutely. Louis did not take kindly to these scientific views, and created no end of merriment by his very outspoken opinion on the subject. There were about fifty members in attendance. Officers were elected for next year as follows: President, Malcolm MacRorie; vice-president, J. Hayes; secretary, Peter Duff; treasurer, Geo. Smith.

Indiananoplis.

The Florists' Club held its monthly meeting on December 6, in Huntington and Page's seed store. This being the last regular meeting, election of officers for the coming year took place. Robert McKean was re-elected president by unanimous vote; Henry Rieman declining re-election as secretary and treasurer, Fred Huckride was elected to take his place.

The main topic was the chrysanthemum show. As our last show came very short of expectations financially, most members were opposed to a show in '98, but no conclusion was reached The final decision will be made after the state society meeting, to be held in this city the first or second week in January.

Alfred Pahud and John Sould were elected members of the club. Refreshments had been provided for by Messrs. Huntington & Page and were greatly appreciated.

Business is quiet as is usual before the holiday rush especially so on the market, while some funeral work helped out the store trade. B

Azaleas.

W. C., New Glasgow, N. S., inquires about the treatment of azaleas,—heat, syringing, watering, etc.

These plants will give satisfactory results in a night temperature of 50°, which may be increased to 60° in order to hasten the flowering period. The plants should be syringed daily in bright weather until the blooms commence to expand, and the roots should be kept moist at all times.

ALBANY, N. Y.—Fred. A. Danker, formerly with Eyers & Co., has taken the place at 40 Maiden Lane, where he will conduct a florist business on his own account.

THE SEED TRADE.

AMERICAN SEED TRADE ASSOCIATION.

JEROME B. RICE, Pres.; E. B. CLARK, 1st Vice-Pres.; S. F. WILLARD, Wethersfield, Conn., Sec'y and Treas.

LILIUM LONGIFLORUM, Japan grown, in the larger sizes, are likely to be higher next year.

MR. LESTER MORSE has returned to California.

SANTA CLARA, CAL.—We have just had a fine rain which will give all the seed crops a good start.

Belle Siebrecht.

ED. AM. FLORIST.—Can some of your readers inform me how to procure strong growth in Belle Siebrecht rose? I have planted it in raised beds, in fine compost, and while the growth seems perfectly healthy it is very small, not over twelve to fifteen inches high from rooted cuttings put out last April. Other forcing roses, planted in the same beds, have made very vigorous growth and I can see no good reason why this one should not have done the same. F. P. D.

Replying to F. P. D., to start with Belle Siebrecht is a rose of quite weak nature. It will not under any circumstances acquire the growth of the other roses generally grown, Brides, Bridesmaid, La France, etc. We should advise F. P. D. to replant in new soil, and disbud stock until next fall. He will then have plants with strong shoots.

REINBERG BROS.

A Correction.

The price per dozen for Madeline Pratt should have read $2 and not $5 in the ad of Grove P. Rawson, Elmira, N. Y., which appeared in last issue.

Floral Calendars.

We have received from Mr. D. B. Long, of Buffalo, samples of a number of different styles of floral calendars printed in various colors from half-tone plates. The designs are very delicate and graceful conventional arrangements of natural foliage and flowers, and the calendars should find a ready sale.

CHOICE SEEDS.

Flower Show Suggestions.

ED. AM. FLORIST:—I was very much pleased with the notes in a recent issue from Mr. A. H. Fewkes regarding flower shows EAST AND WEST with the exception of the part relating to staging the flowers. I must frankly admit that blooms with short stems look much better and last longer than with long ones where they are staged with one in a vase. However, this does not give full justice to the grower, who has been aiming to stage good stiff stems as well as fine blooms.

For instance an exhibitor stages Golden Wedding and Mayflower, thinking to score full points on stem and foliage, where he might just as well have staged Modesto and Mrs. H. Robinson, which would put the two former varieties in the back ground if all had 2 foot stems, but stage Modesto and Robinson with 3 feet of stem and they will for a certainty, be rubbing their noses into the necks of the ones in front of them.

I think it would be better to allow the exhibitor to stage his blooms to suit himself and if he can gain a point or so on stem let him have it. The society holding the exhibition can easily cut them shorter after the judges have passed on them or else let the society state in its premium list the limit in length the stem shall be as well as the limit in shortness, then it will be as fair for one as another.

JAS. HARTSHORNE.

S. A. F. Photographs at Newport.

I have received a number of complaints from parties who claim to have paid money in advance to the photographer, Frank H. Childs, for copies of the group photograph of the S. A. F. at Newport, but who have, up to the present time received no pictures. Four months is an unreasonably long time to have to wait and it is not reassuring to know that letters written to Childs in reference to the matter have failed to elicit any response. This is not the first time that trouble has come from paying money in advance for convention photographs and for which the best remedy in future would be for individuals to refuse to pay until they receive the goods as it is something over which the society can exercise no control. In the present instance, if all members of the society who paid money at Newport for pictures which have not been received will forward their names with such proof of the transaction as they may hold, to the undersigned, he will see what can be done to compel the photograper to fulfil his obligations.

WM. J. STEWART, Sec'cy.

American Carnation Society.

PREMIUM LIST.

We are in receipt of the premium list of the American Carnation Society for the exhibition to be held in connection with the convention in Chicago February 17 and 18, 1898. Papers will be read at the convention by Prof. Arthur, of Purdue University, Mr. Fred. Dorner, of La Fayette, Ind., and Mr. Flint Kennicott, of Chicago.

Certificates are offered by the society for new varieties (50 blooms required) which have been grown three years, also preliminary certificates for new varieties (12 blooms required) which have been grown two years.

All seedlings will be judged under the following scale of points:

Color	15
Size	15
Calyx	15
Stem	15
Substance	10
Form	15
Fragrance	10
Plant	10
Total	100

To secure a certificate a carnation must score not less than 85 points, and all varieties which do score 85 points will receive certificates.

First premiums of $10 and second premiums of $5 each are offered in each of the following classes: Best vase (100) blooms, white, light pink, dark pink, scarlet, crimson, yellow variegated, white variegated and any other color.

First premiums of $4 each are offered for the best vase (50 blooms) of each of the leading standard varieties.

Various other premiums are offered, including liberal premiums by J. Breitmeyer & Son for Mayor Pingree, and E. G. Hill & Co. for Flora Hill and Triumph.

The silver cup offered by the Cottage Gardens is this year to be competed for by yellow or yellow variegated seedlings.

Contributions to the premium list have been made by the F. Dorner & Sons Co., Bassett & Washburn, H. Weber & Sons and the AMERICAN FLORIST.

The advertising pages have been liberally used by a number of firms.

Copies of the premium list may be had by addressing Albert M. Herr, secretary, Lancaster, Pa.

The premiums offered are very liberal, and the honor to be gained by winning is great. Let every one take his best and enter it for competition.

Do not forget that entries must be made ten days in advance.

A few PTERIS SERRULATA at $3.50 per hundred, strong.

R. WITTERSTAETTER,

SEDAMSVILLE, OHIO.

Marechal Niel not Blooming.

I have a house running north and south devoted to roses. In it I have a Marechal Niel rose eleven years old, which has bloomed very sparingly for three or four years. Every year it makes a most luxuriant growth, yet nearly every shoot is blind. Can any of your readers suggest a remedy? The rose in question is planted in a solid bed at north end of house; temperature same as for Brides, etc.

Stamford, Conn. SUBSCRIBER.

The Marechal Niel requires a season of rest to ripen wood and develop buds. If "Subscriber" will stimulate strong growth in spring by giving several waterings of liquid manure, cutting out all small wood, then during summer, say for two months or ten weeks, allow the plant to dry off and rest, then towards fall trim off some more of the surplus brush, tie up his strong canes and gradually start it into growing, he should have no trouble in having splendid Niels in his house with Brides. J. G. H.

Alliance, Ohio.

Notwithstanding the unseasonable weather, market conditions are rather favorable, and business on the whole is reported to be most gratifying. A visit to Mr. L. L. Lamborn's place is worth recording. Your correspondent found that gentleman exceedingly busy, though, as usual, in the best of humor; between preparing funeral work, superintending a small army of men, and getting out the flowers for his Canton flower store on the early morning train, there was a hustle and bustle, something akin to the proverbial bee hive.

Since my last visit Mr. Lamborn's greenouses have undergone a general overhauling, quite a number of improvements having been introduced throughout. His new carnation house, covering 52x100, is decidedly one of the finest commercial houses of the kind to be found in the Buckeye State. Mr. Lamborn grows a general stock, though roses and carnations are his specialties. Both look healthy, vigorous and in the best of condition.

And now comes florist Zimmerman with his sport of Daybreak! It is a beauty, to be sure, but there are others, chief among them being Mr. Graham, of Philadelphia, with his "Victor." Verily, to Mr. Graham belongs the victory, he having been the first to introduce this magnificent carnation on a large scale. That the "Victor" has achieved a victory and has come to stay, seems to be the opinion of many prominent members of the craft.

W. P. SIMMONS & CO.

Make the following statement to the readers of the American Florist.

As originators and introducers of
"Silver Spray,"
"Tidal Wave,"
"Daybreak,"
and "Rose Queen,"

each of which has, we believe, proven even better than we claimed for them. We NOW say for 1898 that

"Mrs. S. A. Northway"

possesses all the good points that go to make up a **first-class** and **profitable** cut flower sort, and that we introduce it with even more confidence than we did the others.

It is an extra strong grower.
It is free from rust or disease.
It is a profuse bloomer.
It has exceedingly strong stiff stems.
It is of exquisite form full and double.
The flower is high built, petals serrated.
The calyx does not burst.
It is delightfully fragrant (a quality lacking in many new ones.)

OUR PRICE LIST now ready, contains prices on many other plants. SEND FOR IT.

W. P. SIMMONS & CO., Geneva, Ohio.

FIREFLY

A RUST PROOF .....CARNATION.

Bright scarlet and positively **RUST PROOF**. It is as prolific as Scott, of good size and form, and its keeping qualities are unsurpassed. We have tested it four years.

Our stock also includes all the Novelties of '97 and '98. Send for prices.

GEO. HANCOCK & SON, Grand Rapids, Mich.

NEW YORK CHICAGO

PLEASE mention the AMERICAN FLORIST every time you write to an advertiser.

Bangor, Me.

"Compared with previous seasons, business, it may be said, is in a flourishing condition" remarked a leading florist to your correspondent during a recent visit. Such and similar reports come also from various parts of the Pine Tree State and taken all in all, there is no gainsaying the fact that things have assumed a much brighter aspect.

The most notable event of the season, thus far, was the Peirce-Hubbard wedding. As usual on such occasions florist Sekenger was master of ceremonies and his artistic decoration was highly commended on all sides. The drawing room, where the ceremony took place, was transformed into a sort of fairyland, palms, ferns and Asparagus plumosus having been used in profusion and to splendid effect. Two immense kentias, placed in the center of the room, formed a bower under which the bridal couple stood, this arrangement being unique as well as attractive.

Mr. Sekenger's general stock is in splendid condition. HOMO.

Des Moines.

At this writing the outlook for Christmas flowers is very poor. Roses are off crop and carnations are not producing many flowers. In fact, the entire cut is not one-quarter that of former years at this season. Bulbous stock is only tolerably good yet. Violets scarce.

The annual meeting of the Des Moines Florist Club was held at J. F. Marshall's Monday evening. The following were elected officers for next year: Peter Lambert, president; John Lorenz, vice-president; Julius Ledig, treasurer; J. T. D. Fulmer, secretary. The club will attend the convention at Omaha in a body, and from the talk one is led to believe there will be no lack of enthusiasm.

The State Horticultural Society meets in our city to-day (14th) and some good papers are looked for. J. T. D. F.

Carnations Going to Sleep.

Am troubled with carnations closing up next day after being cut, and cannot account for it. Can you give me any light on the subject? They are grown as cool as was possible, considering the warm weather we have been having. We have a nice cool store in which to keep them, but they are all worthless the second day. G. A. H.

This is rather a hard question to answer, simple as it appears. To hit the right cause of so many reasons that may be responsible for it one should have the power of a clairvoyant and know their full past treatment. I have had some very poor flowers, but not so poor that they would not keep from the day of cutting to the next.

The first care should be given to the place where they are kept, and the receptacle and water they are placed in; and here I will call attention to the fact that gas in the slightest perceptible quantity has sent many a carnation bloom to sleep where the cause has been attributed to something else, generally to the weakness of the variety or the inability of the grower. Still the flowers may be of poor substance. Then the cause has to be looked for in the soil, nourishment, and poor ventilation. I have noticed that flowers when grown in a rather high temperature and placed in cold water in a cold room were wilted the next day. The sudden shock destroyed all power to absorb water.

The lack of potash is chiefly the cause of flowers being of poor substance. The flowers may be left too long on the plants, but to my mind, in either case, if otherwise uninjured, when cut and placed in water the flowers should keep until the next day. I would advise Mr. G. A. H. to look first for the cause of his trouble in his store. FRED DORNER.

Special Offer to Subscribers.

Carnations—Notes on Varieties.

Mr. Albert M. Herr, of Lancaster, Pa., has issued a circular giving his experience with the newer carnations. From it we extract the following:

WHITE.—Among the whites Flora Hill is ahead of all others. Harrison's White is a sport from Scott, and has many of the characteristics of that variety, but seems, wherever I have seen it growing, a bit late in coming into bloom. Lizzie McGowan, long the best white, now is second only to Flora Hill. Alaska has many friends and is a really good sort where it does well; but it does not do well in all soils. Mrs. Fisher is a good one for summer blooming, but I never saw real fine flowers in the house. Nivea also has made a name for itself in the east, but mine up to date are not much of a success.

PINK.—Am growing Triumph for main supply. Emma Wocher has made excellent growth and is full of bloom. Victor gives promise of being a good one—fuller and stronger than Daybreak, from which it sported. Abundance is good when quantity is wanted more than quality. Good for summer

SCARLET.—Jubilee leads all others. For best results cuttings of this variety should be struck in January.

YELLOW.—El Dorado has both quality and freedom of bloom, but I never saw it free from rust. However, if a variety is good rust does not bother me. It is not so serious a matter as has been supposed. Yellow Jacket has done remarkably well up to date.

CRIMSON.—Iago is not large, but good shape, long stems. Maceo and Empress are both of good merit, and will probably take the place of all others in this color.

STRIPED.—Helen Keller with me is always fine. Armazindy will do well with every one, and is the greatest bloomer of any carnation I know of. Mrs. Bradt sent out last season, has caught the popular fancy and is certainly a fine flower.

CERISE OR RED.—Thomas Cartledge is an excellent variety in every way, and the only one of this color that it really pays to grow.

SALMON OR LIGHT PINK.—Daybreak, of course, leads all others Della Fox has not been much of a success with me. Mrs. McBurnie, sent out by Hill last season, is doing well with me.

Review of the Chrysanthemums Disseminated 1897.

REPORT BY ELMER D. SMITH, SECRETARY CHRYSANTHEMUM SOCIETY OF AMERICA.

MIDGE. First flowers marketed September 28. Larger than Bergman. A splendid pot plant also. Foliage rather dense for close planting.

MERULA. All who grew this are well pleased so far as heard from. Foliage and habit like Perrin; flower light pink and earlier. Also good for pot plants.

MRS. JOHN J GLESSNER. Fine flower; strong grower; keeping qualities excellent.

CHITO. A very large flower; good in the way of variety for exhibition collections.

MRS. MARTIN A. RYERSON. Very artistic and graceful; from late bud building high and interlacing.

SUNSTONE. Has many admirers; color pleasing; habit strong.

WESTERN KING. Difficult to propagate, but one of the finest in every particular. Foliage, stem, color, form and size unwonted.

MIZPAH. Excellent as a decorative variety; easy to grow and free.

ADELAIDE and ALLEGRO will be given further trial before making any comments.

BELLE OF CASTLEWOOD. Very promising; fine habit. Our stock planted late so cannot vouch for its earliness.

CASCO. A distinct color, bright garnet, and possesses all the qualifications for a good pot plant variety.

CASTLETON and C. W. WARD were disappointing; will give further trial.

DEFENDER was not what we expected to see. Color is good, but flower ill-formed; earlier planting may remedy this defect.

EVANGELINE. Was shown in good form at many shows.

GEO. S. KALB. A very promising early white.

GOLDEN TROPHY. A very good second early yellow.

HENRY NANZ. Yellow sport from Mrs. Jerome Jones, having a tinge of bronze on outer petals. Habit same as parent.

KENTUCKY. Commercially of no great value, although useful for exhibitions.

MRS. R. D. DOUGLASS. A very promising yellow; color, form and habit all good.

MRS. R. MCARTHUR. A very good incurved white. It would not be surprising if it becomes very popular when better known.

THE HARRIOTT. Very late, but of no great value otherwise. The flowers are not yet finished.

Balance have been rather indifferent with us. Commercial places are not always best authority on these subjects the first year, as they are often obliged to plant late for want of stock, particularly so if the variety is slow in making cuttings.

[Mr Smith's report was received too late for publication in last issue.—ED.]

A NEW INSECTICIDE. Kraft's Plant Tonic, a new preparation made by N. J. Kraft & Co., Rockford, Ill., is claimed by the manufacturers to be not only sure death to insects but to greatly improve plant growth and leaf coloring. It can be used for all greenhouse plants but is especially adapted to palms and foliage plants.

Sharp Practice.

J. F. Sullivan, of Detroit, Mich., lost fourteen large palms recently in a peculiar way. At the request of a stranger, he delivered the plants to the residence of Mrs. C. E. Lothrop, at 613 Jefferson avenue. When the driver called to deliver the plants the stranger was there to receive them and ordered them put in the barn in order that the pots could be cleaned. In the meantime he had gone to the Lothrop residence and asked permission to store the plants in the barn for a few hours. His request was granted and later in the day he called and removed them. When Mr. Sullivan's driver called after the plants he was informed that the Lothrops did not order them and that they were taken away by the well dressed stranger. The police are looking for him.

The Yellow Fellow Winner of the $100 high grade Stearns Bicycle Prize in a strong competition. It gives a large, graceful bloom under ordinary treatment and can be grown a "whopper" for exhibition. Bud tinted bronze, maturing rich bright yellow; constitution ironclad. Mid-season variety. 50 cts. each; $3.00 per dozen

Wm. H. Chadwick A phenomenal seedling, the grandest of the year. A star production. Certificated at Chicago, Boston, New York and Philadelphia. An immense, graceful incurved bloom, waxy white, occasionally tinted pink. Growth, habit, stem and foliage simply perfect. Mid-season or late. Anybody can grow it satisfactorily. It cannot be praised too highly. Per single plant, $1.00; $6.00 per dozen.

Madeline Pratt Certificated 1896. Named for the sweet little miss on the Chrysanthemum certificate; snowy white, high built bloom. A very beautiful flower. Early mid-season. Best four terminals grown cool. 35 cts. each; $5.00 per dozen.

Strong, healthy young stock from 2½-inch pots distributed March 1st. Advance orders already numerous.

.....GROVE P. RAWSON, Elmira, N. Y.

Cleveland, O.

BUSINESS FAIR.—SUNSHINE IS WANTED.—WHOLESALE HOUSE CHANGES HANDS.—STOCKS OF FLOWERS NOT LARGE.

Nearly all the growers upon whom your correspondent has called lately, have said that they could sell their stock readily enough, but they all add the statement that they can't cut much stock. A little sun would do a good deal toward helping matters, but his solar majesty stubbornly maintains a position behind various impenetrable clouds and absolutely refuses to come out and show himself. It has rained nearly every day for over a week.

The stores report business as quiet in general, a little funeral work at times helping to keep the landlord satisfied at least. One or two report business as fairly good, but nothing better than it should be, or in fact must be, at a time of year when the florist expects to get a little ahead, if he ever shall.

The establishment heretofore owned and run by Heiser & Co., has been rented by Bates Bros., who intend seeing what can be done with it; the houses are all stocked, mostly with roses and violets. They will do a wholesale business.

The stock of flowers is not large either as to quantity or variety with any one at present, so nothing goes to waste which is one good thing, tending to help stiffen prices a bit.

Monday evening, December 6, was devoted, by the bowling club to the entertainment of their lady friends. A very enjoyable evening was spent by all who were fortunate enough to be present. The 20th of the month is again bowler's night.

Mr. Martin Reukauf, representing Bayersdorfer & Co., of Philadelphia, has been in town lately. A.

Manure for Roses.

A subscriber living in North Carolina asks an opinion as to the advisability of using horse manure in preparing the compost heap for next season. To secure cow manure he says, they must haul it twelve miles, whereas he can obtain near home without cost, well rotted horse manure in any quantity. Unless the soil is very heavy I prefer cow manure every time for composting as it is not so apt to fill the soil with fungus as is the lighter article from the stable; still if I could get the latter well rotted and for nothing I should feel strongly tempted to use it in preference to carting the other from a dairy twelve miles distant. As to the question, "Can we grow good roses in it?" I would answer, what has been done may be done again; there are those who prefer it, and others again make use of it because they have no choice, but succeed sufficiently well to show that there are things in rose growing more difficult of solution than the question of whether we shall use horse or cow manure in the compost.

ROBT. SIMPSON.

PHOENIX NURSERY COMPANY,

Established 1852. P. O. Box 625. BLOOMINGTON, ILL.

Pittsburg.

Business has been of the quist order that prevails just prior to the Christmas rush, and it looks now as if the holiday trade would be up to the standard. Stores are as usual putting on their Christmas trimmings, the main part of which consists of laurel wreathing in festooned and outline effects. Christmas trees are coming in freely, the bulk of them from Massachusetts. Ground pine from the East has the preference for quality this season. Holly is very good. Prices on all this kind of stock will be about same as last year, holly excepted. There was a large overstock of it last Christmas, with the very natural result of a slump in price, which is not likely to happen now.

Mr. Wm. Flemm, manager for N. Patterson, Market and Liberty, reports business fair, he is anticipating their usual holiday business, and no doubt his expectations will be realized, for their location is one of the best and their clientage of the reliable stick-to-a-house kind.

Some of the Allegheny florists have been offering tulips in bloom, in a pan, and have found good sale for them at from 50 to 75 cents; they were grown chiefly by Mr. Koenig of Millvale, Pa.

The Pittsburg and Allegheny Florists' and Gardeners' Club held a regular meeting on Thursday night, 9th inst., with quite a fair attendance; it was a "social" with refreshments as well as a business meeting. The executive committee will meet and endeavor to arrange for something that will bring about an increase of interest and improve the club. There will not be any meeting until January 13, the one scheduled for December 23 being entirely too close to Christmas to even hint at the probability of a quorum attending, therefore it was abandoned. Election of officers for ensuing year will be the main object of interest at our next meeting. REGIA.

Sandusky, O.

"The Christmas of '97," remarked Mr. J. C. Gooding to your correspondent during a recent visit, "bids fair to surpass that of a year ago by a good margin; all we want is some of that old-fashioned Christmas weather and things will come our way in fine shape."

The weather during the past week has been anything but seasonable.

Two carnation houses, each covering 20x100 built in fine style and equipped with all the modern appliances, have been added during the past summer to Mr. Gooding's plant. Strolling through the houses I noticed among other things that the Carnot rose is doing remarkably well, the flowers being large and perfect, the foliage fine and vigorous.

"Any special treatment?" "Nothing of the kind," replied Mr. Gooding, "We simply treat them in the ordinary way; the right sort of soil at the start, proper ventilation and no overwatering,—therein lies the whole secret." The Carnots as grown by Mr. Gooding are well worth seeing.

The decoration on the occasion of the Elk's annual banquet, was one of the finest that was ever attempted in town, Mr. J. C. Gooding, an Elk of no mean calibre himself, being master of ceremonies. HOMO.

Newport, R. I.

At the last meeting of the Newport Horticultural Society, a large group of exceptionally well grown begonias was on exhibition, and the display was much admired. The committee on awards granted two certificates to Robt. Laurie gardener for Cornelius Vanderbilt. Those two awards were for Begonia Socotrana and Begonia incarnata (improved). A series of lectures has been arranged by this society, viz: On December 22d, next, illustrated lecture by Mr. J. K. Farquhar, of Boston; on January 26, illustrated lecture by Prof. H. J. Wheeler, Ph.D., of the R. I. Agricultural College, on "Experiments with Lime on Various Crops;" and on February 23, on "Influence of Horticultural Societies," by Prof. L. F. King, of the same institution.

The annual election of officers of the society will take place January 12, and a general shaking up of the society's affairs is talked of.

Mr. John Allan, manager of the Caswell greenhouses, has six houses under carnations, principally McGowan and Scott. He is also cutting some nice Brides and Bridesmaids. A house of fine smilax is going to waste, and brought forth the statement that it would not pay to pack, ship and sell same for six cents a string.

Mr. G. McIntosh has leased the greenhouses on the estate of millionaire J. J. Van Allen.

Secretary W. J. Stewart, of the S. A. F., was in this city on the 11th inst.

TRADE SOMEWHAT LIGHTER.—VIOLETS STILL SCARCE.—PLANT TRADE PROMISES WELL.

Trade in general was not very brisk for the past week, no remarkably great event happened to come along, and though J. W. Keller reports receipts of the wholesale house lighter than usual, there was about enough flowers in the market to supply the demand, with exception of violets and roses. Several of our local growers are off crop now, but a prospect of a fair supply is expected to come in at about Christmas, if the weather is not altogether too unfavorable. What we get from out of town is mostly not up to the mark but fairly good at times. The cut of carnations has increased lately, else there would have been a decided scarcity in spite of the week's light demand, but violets, oh! how scarce they are, everybody is looking out for them and but few can be supplied By all present appearances smilax and also asparagus will be short for the holidays, not much of it is grown here and most of this has been cut down lately.

Our storemen are beginning to fix up their windows and to decorate the interior of their stores. Not many flowering plants are seen there as yet but palms and other ornamental stock are greatly in evidence, finer specimens and cleaner plants than in former years are seen in most of the places, but prices are not any higher so far. Begonia incarnata is selling well, poinsettias are rather scarce everywhere, only at Geo. Savage's, but we can not get these, he has them in all sizes and in quantity, large and small. They are used by him to decorate the conservatory at the residence of the Kimball family, and make a grand show interspersed between large palms and other ornamental plants. The immense heads are something unusual even on the smallest plants in 5-inch pots, but Mr. Savage says he does not feed them any too heavy, though we suspect that he does not starve them either at any time during their growth.

Many of the merchants and shop keepers begin their annual store decorations 2 or 3 weeks before the holidays and it is well for the florist that this should be so, because if left for the last week, they would not have the time to attend to hanging up wreathing, etc. Ground pine is very good this season and lots of it is used up already. The prospects are for very large sales in this line. Very little holly has arrived so far; it is not good policy to have it too early, especially when the weather is quite warm as at present. J. B. K.

Black Aphis.

E. A. M., St. Louis, wishes to know the name and how to destroy the insect which is on his roses (specimen received). They are nothing but the common black aphis which is occasionally found in our rose houses; they are not very common or destructive to roses and may be got rid of by the same means that we use for exterminating green fly.

Carried-over Woottons.

In reply to "Ontario Florist," carried-over Woottons seem to have a tendency to produce flowers in great abundance, but often quite short stemmed; the same is true of nearly all roses of this class. To remedy the trouble a more vigorous growth is necessary. If the plants are healthy and vigorous, with ample foliage, I would suggest a liberal mulch with well rotted manure, or else a systematic feeding with liquid manure. Unless the stone wall is banked with earth on the outside the foundation should certainly go down below the frost line, as there is a strong probability of its being toppled over in the near future. It occurs to me that with lumber as cheap as in Canada, stone walls will be by far the most expensive, and in a country where the cold is so intense neither stone nor brick walls are very satisfactory for a greenhouse. The warmth and moisture within and the frost penetrating from without soon loosen the mortar and rack the masonry unless the very best materials and workmanship are employed. For a greenhouse of moderate cost nothing can be better than locust or red cedar posts, and properly designed weatherboards with building paper between. If something more permanent and expensive is desired the next best thing is solid concrete, which is almost indestructible. I might add that many of the most successful rose growers in the "States" would not have walls of masonry in their greenhouses under any consideration.

Florists' Fire Insurance Association.

PERMANENT ORGANIZATION.

On Monday at the adjourned meeting of the Florists' Fire Insurance Association, the following persons were elected directors: E. H. Michel, St. Louis: Mo.; J. C. Vaughan, Chicago, Ill.; Elmer D. Smith, Adrian, Mich.; Wm. Scott, Buffalo, N. Y.; John G. Esler, Saddle River, N. J.; M. A. Patton, Tewksbury, Mass.; E A. Seidewitz, Annapolis, Md.; E. G Hill, Richmond, Ind.; Adam Graham, Cleveland, O.; W. F. Gude, Washington, D. C.; L. L. May, Minneapolis, Minn.; P. J. Berckmans, Augusta, Ga.; W. J. Vesey, Fort Wayne, Ind. W. J. Vesey was elected secretary.

The by-laws as printed were adopted with immaterial changes and with some formal additions the principal of which are; requiring the directors to fill all vacancies occuring during the year; permitting directors to vote on all questions submitted in writing by letter.

Two or three of the gentlemen named as directors have not yet completed their applications for insurance, but have made informal application therefor. Unless they do so, it will be necessary to substitute others in their places. You will also notice that two places are left unfilled from lack of good names in other territory.

Any person in the business will be supplied with a blank application for insurance on request. W. J. VESEY.

Youngstown, O.

"Does advertising pay?" "It does," says Mr. E. Hippard, and in order to prove it, he produced a batch of orders, showing that his investment in printer's ink, in the AMERICAN FLORIST—the dear old FLORIST, which has stood the test of time—had amply repaid him. His orders for carnation plants and palms surpassed his most sanguine expectations. He likewise reports an increased sale for his standard ventilating machine, which, by-the-by, he has somewhat improved, bringing it up to the highest point of perfection.

What promises to attract some attention is Mr. Hippard's new chrysanthemum, a sport from E. A. Wood. It is a splendid pink flower, perfect in shape, a free grower and possessing all the merits of the best varieties extant.

Mr. Hippard has recently returned from a trip to Cleveland. HOMO.

A Bunch of Violets.

'Tis but a bunch of violets,
Nestling upon her breast,
Blue eyed, odorous violets,
But perhaps you know the rest?
No? then you never have felt, sir,
What I feel for this maiden fair,
Never lunched upon one ham sandwich,
Never dined upon water and air,
And never with quivering emotion,
Beheld your last dollar bill,
Softly and silently drop sir,
Into the florists' till.

Syracuse, N. Y.

ANNUAL MEETING.—ELECTION OF OFFICERS. — INTERESTING LECTURES.— QUESTION BOX.—TRADE GOOD.—CARNATIONS AND ROSES SHORT.

The annual meeting of the Central New York Horticultural Society was held December 8, at the St. Cloud Hotel. President A. D. Perry in his annual address announced that better work had been accomplished during the past year than ever before, and the attendance at the last flower show was one third larger than on previous occasions.

The following officers were elected for the ensuing year: president, S. T. Betts; vice-presidents, A. D. Perry, C. W. Snow, E. A. Powell, F. C. Brower, L. E. Marquisee and W. Judson Smith; treasurer, F. H. Ebeling; secretary, D. Campbell; executive committee, Geo. Ham, R. Bard, C. Barson, W. Parsons, J. Huller and J. L. Porter. It was with great reluctance that the society complied with Mr. Perry's views in regard to his retiring from the presidency, but it was inevitable. The expenses of the recent flower show exceeded the receipts to the extent of about $200 and in view of such heavy expenses occurring each year, and that the chrysanthemum show should be made a permanent feature, an amendment was adopted to the constitution that a sinking fund be secured for such contingencies in the feature of membership which shall be known as sustaining members. The annual dues of said sustaining members to be $5 and members of this to have and enjoy all the privileges the society may hereafter desire to extend to them.

A large vase of G. P. Rawson's W. H. Chadwick chrysanthemum adorned the assembly room which to all appearances seem destined to become a favorite standard variety, both for commercial and exhibition purposes, he also exhibited two vases of Golden Gate rose. The name does not seem at all applicable to this rose, as its color is a little lighter than Watteville, which variety it somewhat resembles, especially in foliage, it is a fine large flower, borne on long stiff stem. Mr. Rawson considers it a very profitable and indispensable variety with him.

At the close of the afternoon session the members adjourned to the dining room where supper was served. At 8 o'clock the session was continued in the assembly room; the Rev. W. M. Beauchamp of Baldwinsville, N. Y. spoke on native ferns and the work of collecting them—giving his personal experience that was not only interesting, but at times amusing. Prof. S. A. Beach, of the Geneva Experiment Station, next talked on "Hydrocyanic gas for fumigating greenhouses," the professor handled his subject in a masterly manner which led to great discussion, which would take up too much space in this journal; however, to boil it down, the general sentiment was that it was far too dangerous under present conditions to be used practically both to ourselves and vegetable life. Mr. C. E. Hunn, of Cornell University, spoke on their general work of horticulture at the university. The wonderful results he had had with the artificial manuring of strawberries and the size of the berries was a staggerer for some of our Onondaga growers, he also incidentally remarked that strawberry plants brought in about the third week in December, could be fruited well by Easter, at which time they sold remarkably well as a pot plant at a good price. Grove P. Rawson followed with a talk on general topics of interest to florists. Mr. Rawson is a brilliant speaker, and his remarks were listened to with intense interest, being very instructive and finely drawn.

A new feature at this meeting was the question box which contained more than one conundrum, here is one: "How can a chrysanthemum show be made to pay?" and there were quite a number of other such corkers.

Despite unseasonable weather trade is very good indeed, giving every prospect of a heavy holiday trade. The warm weather has made flowers of all kinds more plentiful, but it is by no means a hard matter to dispose of them all. There will undoubtedly be a great scarcity of carnations for Christmas, all the growers around here have their cut already bargained for. Roses, too—especially Beauty—will be short. There are lots of fine Harrisii now in and they sell quickly, bringing 25 cents a flower; also Paper White narcissus and Roman hyacinths.

Seldom have the buyers in this city ever had such a large and varied assortment of flowering plants for the Christmas holidays to select from—azaleas, lilies, cyclamens, primroses, cinerarias, begonias and poinsettias are especially fine; in azaleas, Simon Mardner, for a rose colored, and Deutsche Perle for white, are two favorites and are very easily flowered at this time of the year.

ALPHA.

English Funeral Work.

Floral tributes to the memory of the late Duchess of Teck, were sent to White Lodge and Windsor in enormous numbers, and were for the most part of surprising beauty. Those sent to White Lodge when removed from the mortuary chamber to the courtyard to be packed for transmission to Windsor occupied an area of nine hundred square yards, and two large private omnibuses and a landau were barely sufficient for their conveyance. On Tuesday, wreaths, crosses, and other floral devices poured into Windsor, and the vans of railway companies were busily engaged throughout the day in conveying them to the Lord Chamberlain's department. In consequence of their numbers, the floral tributes were placed in the Albert Chapel, and as they were carefully arranged the effect produced by the immense number of exquisite arrangements was of great beauty.

The Royal Botanic Society, of which the Duke of Teck is president, sent a large wreath of white flowers comprising Lilium Harrisii, Roman hyacinths, and lily of the valley. The King and Queen of Italy sent a magnificent wreath. It measured about sixteen feet in circumference, and the rim is composed of a frill of Roman hyacinths falling on a foundation of foliage. It was then built up with row upon row of white roses, gardenias, and chrysanthemums, the top row being of arums, and the sequence of flowers being continued down the other side. At the base there was a huge cluster of cattleyas and dendrobiums interspersed with branches of asparagus and slender yellow and green croton leaves. The cluster was tied with a large bow of pale mauve ribbon exactly matching the orchids in color. The young Queen of Holland also sent a large round wreath of exquisite white flowers, the rim of the wreath solid, and with a large cluster of white orchids, eucharis, liliums, lily of the valley, and arums, tied with a white ribbon. The Empress Eugenie contributed a large cross of violets. The Duke and Duchess of Fife also sent a large cross, and this was composed of gardenias, white roses, lilies, and white orchids, the latter in long drooping spikes arranged gracefully across the arms of the cross.

Princess Adolphus of Teck's tribute was a large heart, formed of white roses, lilies and carnations, and tied with white satin ribbon; and the Princess Edward of Saxe-Weimar's tribute was a lovely wreath formed entirely of lilies. Of great beauty was the wreath sent by the Duke and Duchess of Devonshire. It was about three feet in diameter, and composed of a groundwork of white flowers, from which sprung a light feathery arrangement of cattleyas, croton and caladium leaves, mingled with asparagus. The Earl and Countess of Gosford contributed a wreath about nine feet in circumference, edged with green bay leaves, and built up with rows of chrysanthemums, double gardenias, white lilies, tuberoses, stephanotis, and double azaleas. Over this were mauve cattleyas, caladium leaves, azaleas, and croton foliage, with asparagus. The Duke and Duchess of Newcastle sent a large white cross, with a cluster of mauve orchids. Adeline, Duchess of Bedford, sent a cross of white flowers, with a cluster of pink roses tied across it. The Earl and Countess of Mornington forwarded a large white flower wreath, and a white anchor, composed of very beautiful flowers, was the tribute of Countess Cowley.

Many others were not less beautiful than those enumerated above, but mention of the foregoing will suffice to show the general character of the floral tributes which produced such a beautiful display at Windsor on Wednesday.—*Gardeners' Magazine* (English).

BROCKTON, MASS.—The Brockton Florists' and Gardeners' Club completed its organization and elected officers on Tuesday evening, December 7. The officers are as follows: President, John McFarland; vice-president, Thomas Greaves; secretary, Carl J. Dane; treasurer, John Kendregan. Carl Blomberg and Peter Barker were appointed a committee on essays and discussions.

A Dispute.

Answering the inquiry of "Muncie," it is hardly likely that both sides to the controversy will be satisfied with any reply that may be made to the query. The writer of the questions must have overlooked the adage, which is still true, that "To convince a man against his will, he's of the same opinion still." Perhaps if I choose a middle ground and say that no man who has any regard for the appearance of his houses would think of leaving flowers on the plants until they open wide and the petals fall off, I will be on safe ground; nothing perhaps could be a surer index of the sloven. If the blooms are not marketable, or in case there is no demand for them, they should be cut when ready just the same and carried out of the house. I cannot think of anything more unsightly and objectionable to an orderly person than to see flowers here and there all over a house overlooked when cutting and furnishing food for snails, wood lice and centipedes, or to be able to go and cut an armful at any time of blue Meteors or bull-head Perles. The man who habitually does this kind of thing is seldom promoted to the position of superintendent.

As to smoking, some varieties seem to bear light fumigating without any apparent injury to the blooms, Meteor and American Beauty perhaps the best, though it is apt to rob the flowers of even those varieties of their beautiful gloss and finish. Bride, Bridesmaid, Mermet and Niphetos are generally injured with even the lightest smoke, though the little that might enter from another house would hardly be sufficient to do any damage.

ROBT. SIMPSON.

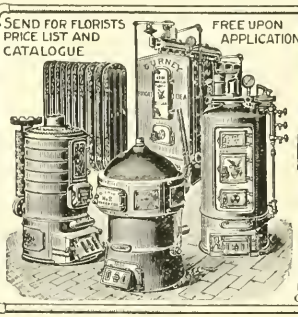
Asparagus Plumosus Nanus.

ED. AM. FLORIST: Will you please tell me whether plants of Asparagus plumosus nanus should be thrown away after they have been grown through the winter, and state how they are propagated?

Somerville, N. J. J. G. S.

Provided the plants are given a complete rest during the summer months, they will make better growth during the second year, but under average conditions it is an advantage to replace the stock every third year. Seeds are usually employed for propagation. B.

Poison for Sow Bugs.



Noting my article on "Sow Bugs" published in AMERICAN FLORIST in November, Mr. Lewis Turner, of Kenosha, Wis., gives the following as a cure: "To a quart of corn meal add enough brown sugar to sweeten, mix well together and add two tablespoonfuls of Paris green. Moisten a little with water just so it will hold together. Place it about in small quantities on or under bench or wherever the bugs may be.

Mr. Turner's remedy was a complete success. WM. E. CHAPPELL.

Garden Notes.

TWO PRETTY GESNERACEOUS PLANTS.

Among the newer gesneraceæ are the so-called African violet, Saintpaulia ionantha and the new hybrid streptocarpuses. The former is a little gem finished in blue and gold, and is altogether a most charming little pot plant. It is only within a few years that it has come into cultivation and is still a novelty to many. It is easily grown from seed or by leaf cuttings or division, and it appears to have a good many points which should make it a favorite with those who grow an assortment of pot plants for their own retail trade. Its foliage is beautiful, as all the leaves of all the family, spreading out into a great rosette. The flowers are deep violet with two fat bright yellow anthers, giving the blooms an extremely bright appearance. A well grown plant in a 4-inch pot should be a foot or more in diameter with thirty or forty slightly heart-shaped leaves, each about two inches across and an abundance of its bright blossoms which measure individually about one inch. The plant is an almost continuous blooomer during the winter and always attracts attention. Its cultivation is easy and so far the mealy bug has been its only insect enemy. It is fond of a good proportion of leaf mould and takes to bone meal kindly. A temperature of 60° does it nicely.

Of the genus streptocarpus there have been in cultivation at various times all of the twelve or thirteen known species, but it was not until they came out from the hands of the hybridizer that we had anything that gave promise of commercial value. The first hybrids sent out a few years ago were a great advance and quickly attracted the English growers, who have still further improved them in size and range of color. We have now coming in a fine lot of Veitch's new hybrids that promise to be fine. The foliage is more abundant, the blooms two inches or more across and the range of color is from white through lavender to red purple.

The plants bloom the first season from seed but should be two years old to show what they are capable of. They are easily raised from seed and treated like young gloxinias. As soon as they have developed a strong leaf we plant them out on a mild hotbed and leave them out, keeping them rather close, until September when we take them up and pot them. By this time they will be showing flowers quite freely and can be sold or grown on. If kept for the second year, which is their best, they may be kept quiet during the winter and plunged in a frame the following summer when they will be in fine condition for fall decoration or sale. They require about the same soil as gloxinias, but are not so impatient of water overhead, and so the hose can be used for mealy bug which is apt to attack them.

JOHN F. COWELL.

Buffalo Botanic Garden.

Callas.

T. R. R. & Co., Grand Rapids, Mich., write:—"Our callas are troubling us by rotting off at the surface. Can you tell us the cause and cure?"

We know of two causes. Frost, however slight, will promote decay of the tubers at the growing point, and a sudden change of the growing plants from a high to a very low temperature will produce similar results. There is no cure for plants thus injured, though the tubers will continue to grow weakly from the base, attaining full strength again in about a year. To prevent the trouble in these cases, the course will be evident.

Thrips on Roses.

Have received from "E. N. H." a package containing specimen rose plant and bunch of flowers, also letter requesting me to carefully examine both plant and blooms with a view to the discovery of the ailment of plant and disfigurement of bloom.

The appearance of the plant and also a statement in the letter lead me to think that in the effort of fighting mildew the plants have been kept too warm and close, probably both day and night, which treatment would account for the rather slender growth and thin foliage. In trying to destroy mildew, either with sulphur on the foliage, or as a wash on the heating pipes, there is always a risk of still further weakening the plants and encouraging a soft tender growth (ready prey to any form of disease), as in either case it is necessary to have considerable heat in order to derive any benefit from the sulphur. To be able to harden the maturing foliage and at the same time eradicate the mildew is no small task, but may be accomplished if we take it in hand in time and use care and common sense.

If E. N. H. will take some of the most bruised and disfigured blooms that he can find and pull the petals off one by one, carefully scrutinizing each, I think he will discover numbers of thrips in each flower, small and insignificant looking certainly but capable of wholesale destruction nevertheless. We need not look further for the cause of the ragged, blackened and malformed buds, but how about a remedy? Earlier in the season I at different times advocated thorough fumigating several nights in succession as the most rational method for destroying thrips, and I still have nothing better to suggest or recommend. Strong tobacco smoke will kill wherever the petals are unfolded sufficiently to allow it to penetrate, and if the smoking is kept up for some time it is pretty certain sooner or later to catch them all. I am well aware that strong doses of smoke will ruin the buds of such varieties as Bride, Bridesmaid and Mermet, but are not these already ruined? and if they should be crippled a trifle more that will not signify if in doing so a permanent cure is effected.

The vapor from boiling nicotine is also effective when strong enough, and is not attended with any bad results in the shape of injured blossoms, but is not always available as are tobacco stems.

Crotons.

Crotons are slowly but surely working their way into the affections of the people, and the florists are not slow to recognize that fact; and they not only desire to prepare for the demand, but are anxious to help increase it.

Where the plants that had been bedded out last summer were taken up in time, that is to say before they had lost most of their leaves, or before the autumn winds and rains had mutilated the foliage; and had been carefully potted and received the benefit of a moist warm house, not lower than 65° to 70° at night, there should be some good cuttings ready for the knife and propagating bed from this time on and for the next few weeks. It is true that crotons require more systematic handling than do most other things; but they deserve and are entitled to the little extra care they must have.

There are always some patrons of florists who desire something out of the common way, something their less fortunate brethren in this world's goods cannot so easily procure, and it is well to cater to that class of trade. Charge a good price for it, and they are often better satisfied to pay more if they are made to realize that they are getting something superior to that made use of by their neighbors.

As to propagating: Secure perfect shoots, generous in size, say not less than from 6 to 8 inches long, remove a few of the lower leaves, and we find the cuttings root just as well if potted without ceremony directly into pots varying in size according to the strength of the cuttings, and given a warm and moist corner of the propagating house; what I mean by warm is a temperature of not less than 75° to 80° at night. If the leaves have a tie of raffia to keep them within bounds they are more convenient to handle and take up less space—a great consideration in a propagating bed. They must be syringed several times a day at first, and no direct sunlight be allowed to strike them excepting a little, perhaps, very early in the morning and late in the afternoon, until they are rooted. We find crotons root readily in a mixture of "peat moss" and the fine siftings of coal ashes mixed in about equal proportions. The peat moss is imported from Germany, I believe, and in compact bales, and is quite dry. To prepare it for using it may be rubbed through a coarse screen, which renders it in better condition for handling.

One matter must be borne in mind by those who contemplate trying crotons for bedding next season for the first time, and that is not to put out a plant in any of the middle or western states before the first week in June, and then plants must be used that are already specimens in the various sizes, and they must be planted sufficiently close together to make an immediate effect. Take such varieties as Rothschild and Fasciatus, and nothing can be more effective where such effects are sought.

In localities where crotons have not already been tried the experiment should be approached with caution. One dozen plants or even half a dozen plants will tell the tale whether it is worth while experimenting further or not. But whoever gives the croton no more thought when giving them a trial than they do a coleus or a geranium or any of the commoner bedding plants, deserves to fail. Give the croton high-class culture and success, nine times out of ten, will crown the efforts of all intelligent experimenters; this of course applies only where there are no climatic disadvantages. I have seen old stumps of crotons planted out with a little tuft of very small leaves at the end of the shoot, and the man in charge pointed to them with evident satisfaction and a "I told you so" leer on his lip, and saying, "There are your crotons that are recommended for bedding; what do you think of 'em?" All I can say is that crotons will do neither themselves nor the man who has charge of them any credit by that indifferent method of treatment. Get your cuttings in at the earliest possible moment, take good care of them by giving them lots of light, heat and moisture, and a temperature of 70° at night after they are nicely rooted and established in pots, and if they are to be used for bedding purposes, plant them out at the proper time (first or second week in June in the middle states), and I warrant you they will be the delight and pride of the whole neighborhood next summer.

L. O. N.

Orchid Culture.

In days gone past, there was an idea quite common among cultivators that orchids would not grow except in structures that were built specially for their accomodation, and from the old-time custom of growing what plants were possessed in a mixed plant house among other families, there was a reaction to the other extreme, and houses were given up to even single species and their varieties as with Odontoglossum crispum or some of the many geographical forms of Cattleya labiata. This latter day development of what is by some regarded as a "craze" for orchids is all very well for those who can afford it, and is by no means to be deprecated, but I want to

emphasize the fact that in the days of orchid culture among mixed plants such as palms and ferns, just as good examples were produced as now with greater facilities and better knowledge of the requirements of the plants. Any one who can give a portion of a house that is kept at the temperature that roses require, can grow most of the orchids that are regarded as paying plants for the florist, one might go even further and say that those that will not thrive in a temperature of 55° as a minimum are not paying plants to grow. It will be understood at once that the temperature named is for severe weather when most of the orchids will have completed their season of growth. Most of them grow with the summer and rest with the dull months, and any additional heat in winter is harmful. Our first attempts were made with cattleyas suspended in a rose house, and we regarded it as a makeshift but the plants were as happy then as now, and flowered finely.

It is always necessary when we attempt the culture of a new plant to find out first where it comes from. This used to be a difficult matter but in these days of such publications as "Nicholson's Dictionary" and "Sanders' Reichenbachia" it is possible to learn all we need to know at a glance, remembering at the same time that mere latitude is not the most important, but altitude or longitude, many of our coolest orchids growing directly under the equator in Ecuador and elsewhere, and also that on the high mountains there is also perpetual snow and a frigid climate the year round on Chimborazo and Cotopaxi, and leading up to these heights orchids are found plentifully. I am glad to see that collectors are wiping away the mists that shrouded the collecting of orchids; the snake and tiger stories will soon be a thing of the past, and we shall have instead observations taken from the barometer and thermometer illustrated with snap shots from the kodak.

When we have found out the proper temperature in which to place the plant, there is one more vital matter to be settled, and it is one we have to treat delicately as it is so much disputed among growers, that is, the matter of shade for the plants. We are assured that they require sun and air in abundance in their native woods, but we must not try to make them put up with it as we have it here at mid-summer in an unshaded structure, even though the plants have been hardened to it from the early spring months. We have often seen how plants will suffer most on the first bright day after say a week of stormy weather, especially if the snow be on the ground. We have used roller shades for years past and find them excellent in their results, but a great nuisance to the grower because of the constant rolling up and down, but to the beginner, who has at hand a palm house, or one in which they are part occupants, there will be found an ideal place to grow cattleyas, lælias, cypripediums, dendrobiums, and in fact all such as are not cool plants as those that come from the Andes at 6,000 feet elevation. Air is of as much importance as shade and heat; a close steaming atmosphere such as used to be thought desirable is suffocation to these air plants.

In changing over a house for growing orchids, the only suggestion I would make would be, to have ventilators in the side walls to that fresh air could be admitted whenever the outside temperature would admit of it, whenever it was not actually freezing outside. Have the openings close to the pipes so that the keen edge would be taken off before it reached the plants. A local grower came round one day when we were punching holes in the brick walls of the then rose house and asked what it meant; later he was surprised to find what a volume of air was sucked in by these apertures in hot weather especially. Just at the time that one goes to great pains to prepare a congenial atmosphere by damping down, one has often to open the top ventilators to let it all escape, when by having side vents, one can have the freest circulation without letting the house become arid and dry. We have openings 12x24 inches between each rafter made of wood, and to swing in the center so that it is possible from the inside to open as little or as much as possible, beginning about April and using them until November, practically all the time.

As to the proper time to buy orchids; we have bought them under all circumstances from an auction of newly imported plants fresh from their native localities to an auction of established plants grown by competent men, and have no hesitation in saying that the new, unestablished article is the best each time. In buying fresh plants, they are always full of vitality though they may look shrunken enough, still there is that in them that no cultivator can replace as a few years of poor management or a change of treatment may demonstrate. They are also unflowered, and to the novice that may not mean very much, it may even sound the reverse of a recommendation, but after a season's growth and it becomes time for them to flower, it will soon be appreciated. With what anxious eyes one watches the buds unfold, and marks the prizes that often crop up among plants that are collected when out of flower, and which would never escape the collectors' hands except at a high figure. A commercial grower offered me only today among others a small plant of cypripedium, two small growths $100, presumably now first flowered from a batch of imported plants, and the third prize he has had to my certain knowledge.

There is no denying the fact that the great majority of the orchids that are of commercial value as cut flowers are the natural product of the great South American forests, and this is indeed fortunate for us, for we can get them here in little time. What are known as semi-established plants are those that have been potted by the importer and sold before flowering; these are just as good as the fresh article, but cost more and are liable to more or less injury in transportation, and we would like here to say that whenever we get a plant new to us, it has become an established rule to take it out of the pot and see what are the conditions of the roots, and it generally amounts to a repotting in new material altogether, and a fresh start as with a newly imported piece. It is too true that we have vermin enough and to spare, but the arch-fiend to the orchid grower has not yet arrived in the shape of a cockroach; (at least he did not stay, for we did once find one, and that gave rise to the present practice), slugs, snails, woodlice and cockroaches all find a refuge in the potting material, and if it is not possible to overhaul the plants at once, be sure and soak them in a tub of water deep enough to cover the pots for at least an hour, and this will bring them to the surface when they may be given a quietus.

On the arrival of imported plants, it is best to cut away every particle of dead or decaying matter such as sheaths, roots and old bulbs, wash all well and place in a shady corner until there are signs of root action, this will be visible in about two weeks, and before the roots get long enough to be broken off in the operation, the plants must be repotted in as small pots as they will go into, first filling up a little more than half full with broken porous bricks, charcoal, or crocks, and surfacing with a layer of the fern fibre before described. It is best to cut the fibre in triangular pieces so that they will fit closely in and make the plants firm and rigid, for it will be found that the young roots will not take hold well if they are not firm and are swayed about by the application of water from the hose. Stakes may sometimes be used to help and we sometimes use wires in perforated pans when the bulbs are long and heavy such as with Lælia purpurata, and would be difficult to keep upright without some such aid, After potting we soak them well, and from this time on, water as often as they get dry.

A whole chapter might be written about watering orchids, but it would not serve better our purpose than to say that orchids should never become dry at the roots, it is only a waste on energies stored up, and while drying is practiced much, and preached a great deal more, it will not work with our bright sunshine all the year even in midwinter. European growers resort to it to induce maturation because of the lack of sun, but we can safely adopt the more rational method. Cattleya bulbs and leaves contain over 90 per cent. of water when grown in their native woods, and every drop we dry out of them is so much energy wasted.

The greatest puzzle to amateurs is to find out when is the proper time to repot their plants, indeed it is not always easy to tell when best to do it, but the safest rule to go by is to watch for the new bunch of roots that emerge from the base of the last made bulb or growth and repot before they are long enough to get injured. This is always a safe rule, but it will be found that no two plants will make roots at the same time, and the result is that there are always some that are in need of attention even in mid-winter, always taking care to get the old bulbs close to the edge of the pot so that the new ones may have room in the new compost for the next two to follow, always avoiding a large shift.

Orchids do not need a large addition of material at the roots at any time; it is apt to become sour and kill all living roots the plant possesses. If at any time a plant loses its roots, and appears to be in a downward way, shake out the plant at once, wash all decaying matter from the roots, trim off all that is dead, and put into a smaller receptacle and keep a little warmer and water carefully for a time until new roots are formed. Before taking a plant out of the pot, if it be well rooted, soak it in water if possible the day before, and it will be found that the roots will leave the sides of the pot intact and those on the outside may be lifted with a knife blade, and there should be no injury or loss of vigor through repotting if these simple rules are borne in mind.

E.

The Late James Bateman.

ANOTHER of the fathers of British horticulture, has passed away in the person of Mr. James Bateman, who died November 27, at Worthing, England. He was a noted authority on orchids, and gave a large share of his wealth and time to the promotion of general gardening.

SIDEWALK FLOWER STANDS—NEW YORK.

Sidewalk Flower Sellers in New York.

In the busy retail thoroughfares of the metropolis the little flower stands shown in our illustration are familiar sights. Hundreds of people earn their living in this manner for the greater part of the year, and the quantity of flowers finding an outlet through this means is something enormous.

These street vendors, who are of both sexes, all ages and races, are a time-honored institution in New York, but their methods and their goods have undergone a great change since the time of wired flowers, bouquets and bouquet green, a generation ago, when the dealer always "made up" his bouquets in the early morning and peddled them from a big basket. The old Russian seen in one of the pictures is the last of the old line, and even he, as the photograph shows, has had to abandon his old bouquets and offer the modern substitute of long-stemmed flowers.

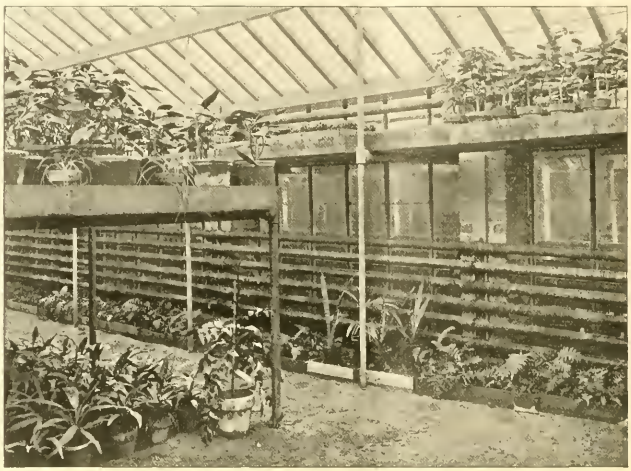
While many nationalities are still represented in the street trade, yet the great majority of those now engaged in it are the Greeks, who by their frugality, shrewdness and persistency have driven all others before them, until they not only monopolize the street trade but have encroached materially on the lines of the legitimate store florists. Some make the curbstone their only headquarters and are always prepared to "move on" with their entire outfit at a moment's notice, on the order of their arch-enemy the policeman or the approach of some truck driver who takes infinite delight in making them scurry and would lose no sleep over the fact of having run over a few of them. Others pay for the privilege of sharing with the newspaper dealers the space under the elevated railway stairs, or occupying recesses, corners and vacant doorways on private property, and many of these are provided with large and attractive showcases with glass shelves, which are housed at night in some adjoining basement and carry a stock which in quantity and variety would at any time swamp the average florist of the smaller towns. Most of those occupying these permanent stands are polite and make friends of the public easily, and an occasional comely French girl is seen whose dainty ways attract desirable customers, but of those who perambulate the sidewalks and gutters many are aggressive and offensive in manner and are neither ornaments nor helps to the prosperity of the flower business in general.

The stock carried by the street dealer is by no means rubbish. He is not long in finding out the chief sources of supply, can locate a surplus afar off by intuition, and can always manage to buy it at a low figure, which, however, is never low enough to suit him. He sells for cash and he doesn't ask credit—for he knows he wouldn't get it—but keeps his roll of greenbacks well in the foreground while he is making his barter, and this same roll wins many a hard-fought battle with the wholesaler, where a ledger account would be utterly routed. The big growers for the New York market have a friend in the street fakir whose value to them can hardly be estimated. A computation of the percentage of the entire cut of roses, carnations and violets which finds a market through these channels would give astonishing results, and the probabilities are that this element will become even more strongly intrenched and exercise a still greater influence in coming years.

Lily of the Valley.

CAN THE PIPS AND CLUMPS BE RAISED SUCCESSFULLY IN AMERICA?

The instructive article on this subject by Mr. William H. Siebrecht in a recent number of the AMERICAN FLORIST is deserving of more than passing notice. It will never do for progressive men to take for granted that because lily of the valley crowns, and many other bulbs and plants have been imported from certian localities for a number of years, they shall always continue to be so.



In every line of business, this is a questioning, an experimental age. New methods are being tried, and in floriculture, as in other pursuits, new sources of supply are being developed and will continue to develop. It is not only patriotic, but it is good business to encourage our home industries. Mr. Siebrecht's article makes it easy for any painstaking cultivator, who has at command the proper soil, to experiment with lily of the valley with the view of raising crowns suitable for forcing. It would be useless for any but painstaking men to devote time to this crop. But in the florist business today there are many who apply brains, great ability and modern business methods to their work, as witness their admirable success with specialties such as roses, carnations and chrysanthemums.

Are there not many plants which are at present imported that can be grown at home with profit to the raiser? Spiræa, Dielytra spectabilis, narcissi, pæonies, lilies, clematis, hardy roses, in addition to convallaria, suggest themselves in this connection as all likely to be grown at home in enormous quantities in the near future. Twenty-five years ago, nearly all

the tuberose and gladioli bulbs flowered in the United States were imported. This is no longer the case, simply because somebody thought they could be grown successfully at home and grew them.

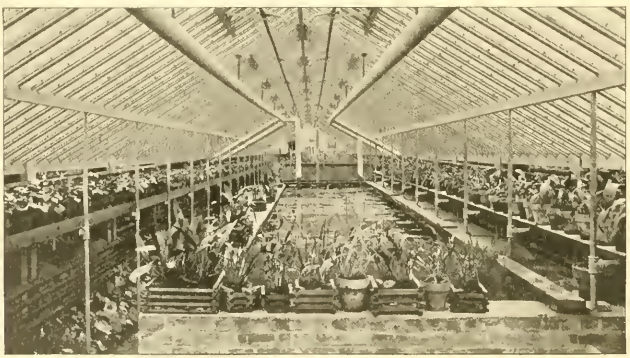
Europe has had more advantages than cheap labor in this connection. Engaged in bulb and root producing grounds, there is a class of painstaking garden laborers who aspire to nothing higher. I do not refer to the skilled gardeners, ever on the alert to improve their knowledge and their position, but to the men and women, who for very small wages, work on year after year in the same grounds, where not unlikely their fathers worked before them. Their range of knowledge may be small, but as far as they know they are to be relied upon for good work faithfully done. It will be difficult to meet this want in this country and looking at conditions from other standpoints it may be to our praise as a people that it cannot be met. But by the employment of machinery and improved methods in cultivation, I believe that American grown plants, roots and bulbs of the kinds referred to will soon be on the market.

During the past four years, florists who have grown for the market, have generally been obliged to put up with small returns from crops which in years gone by netted them handsome profits. Competition is not diminishing, and it may be that the time has come for those who are situated so that they can do so, to experiment with the production of forcing and otherwise marketable bulbs, roots, etc. After all, with each the question will be, "Will it pay?" Friend Siebrecht may favor us with his opinion on this point some day. ROBT. FARQUHAR.

SERVICE HOUSES—WASHINGTON PARK, CHICAGO AQUATIC STORAGE HOUSE, DECEMBER, 1897

The Service Houses at Washington Park.

No better planned block of working houses has ever been erected for the purposes required than are these. The houses proper are eight in number; six are 16 feet wide, one 18 feet and one 20 feet each 106 feet long together with the potting shed which has a glass roof to the north. This is 114 feet long and 20 feet wide.



The planning of the houses as well as the construction is an example of what can be done where brains, material and determination are brought to bear. Superintendent Foster and Mr. Kanst had a problem to solve in the disposition of the material on hand from the old plant. That is, glass, bricks, piping and such other wreckage always to be contended with in the destruction of old buildings. For instance, after using the glass available from the old building, to complete the new block of houses the cost of new glass amounted to only $32.00. I may say that the size of glass varies in different houses from 8x10 to 14x16, which is all right for the different kinds of plants grown. The bricks and stones from the old houses are in the columns supporting the gutters, and in other parts of the construction. The piping and iron work is also absorbed to the best advantage.

The object in construction has been obtain as much accommodation in the smallest amount of room; making, as far as possible, two houses in one, that is, a broad upper surface and a basement with as much light and convenience for general purposes as could be obtained for the welfare of the occupants. At this moment there are in the basements of the several houses are ferns, draccenas, etc. So much for the basement plan.

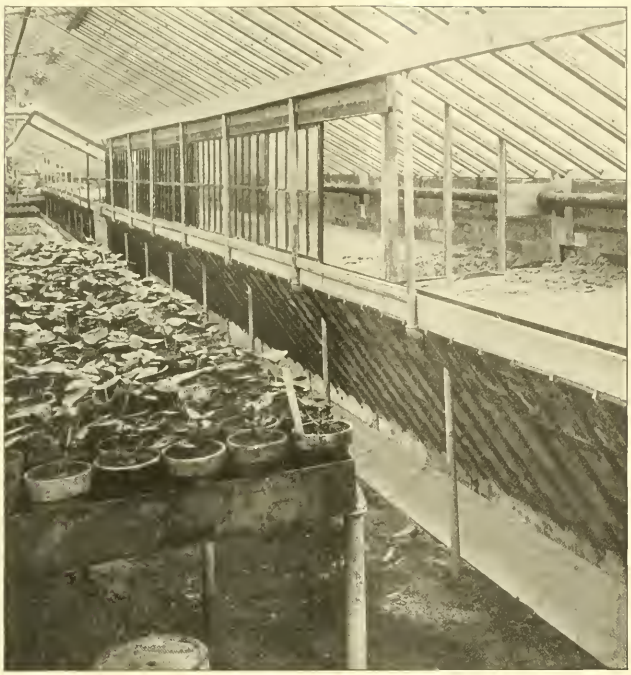
Where there are benches they are all built on the same general lines, the material being iron piping from 1 to 1½-inch diameter rolled angle iron and cement slabs. The illustrations will better explain the scheme of the side benches than all that may be written. It is well to say, however, that all uprights from the floor to benches and to purlins in roof serve a double purpose, they are about eight feet apart. of inch pipe; they are set in concrete a foot below the cement walks, and stand on a brick, and are filled around with good half-and-half cement concrete to the diameter of 8 inches. There are provisions made in the connections either to turn up or down as the case may be thus providing against any sagging. The center benches are supported by 1½-inch piping, standing on basements as in the side benches with here and there a tie pipe to the ridge. The benches have on either side, resting on the piping, a longitudinal line of 1¼-inch angle iron, there are also two lines of same in center of each bench, back to back.

Then comes the surfaces of the tables which are made of Portland cement one part, and two parts of clear grit sand, shaped in forms 18x21 inches and 1¼ thick, these are found to work admirably when placed side by side; the 18-inch way two slabs make a 3 foot bench and the 21-inch give 3 feet 6 inches for center benches. Where large plants are placed the supports should not be more than 6 feet apart. The weight of the slabs are about 35 pounds each; the cost about from 15 to 18 cents each.

The heating is from the same plant as the conservatory buildings. The mains are taken from the potting sheds to the

SERVICE HOUSES—WASHINGTON PARK, CHICAGO—SHOWING ARRANGEMENT OF PIPES AND BENCHES, DECEMBER, 1897.

several houses under the ridges protected with asbestos to the center of each house where it is distributed on either side into lines of 2-inch pipes beneath the benches. In the tropical parts are pipes close to the gutters that may be used as necessity demands. The system is complete in every detail and worthy of individual examination, especially to those contemplating building good sized plants.



The propagating house to the east has a bed the entire length for cuttings; half of this is exposed to the open; then comes a tank for the germinating of tropical lilies, next a series of closed cases, some of which have blue glass fronts, then red, yellow and yet again others are variegated.

Bottom heat can be commanded of any temperature and at any time between 75° and 110°.

Then comes the aquatic storage house with a tank 7x100 feet around the sides of which are various orchids doing splendidly. Then comes a tropical house full of good things top and bottom. Following these are temperate houses of azaleas, lilies, cinerarias. Then coming to the others we have a superb collection of plants used for summer effects out of doors.

I had almost forgotten to mention that the gutters in each house are supported on brick pillars about 14 feet apart, and that between each pillar is a portion of glass, no boards but plain glass, the object being to get as much light as possible for the basement.

The potting shed is probably as useful as any house in the block; it is 114 feet long and 20 feet wide; it is on the north side and has bench room for 40,000 2-inch pots. It has accommodation between each of the eight houses for scores of rhododendrons, conifers and evergreens. All the pots used can be stored in it. The potting benches are on trollies and when in use they are brought out into the aisle; when done with, they are pushed back underneath the plants, and there you are. J. T.

SERVICE HOUSES—WASHINGTON PARK, CHICAGO—POTTING SHED—DECEMBER, 1897.

Herbaceous Plant Notes.

In midwinter we do uot expect to see very much in our herbaceous borders; we have no flowers on our plants to attract our fancy excepting perhaps a batch of Christmas roses in a well sheltered, shady place, and we may now look for some of their blossoms if the plants are well established in their quarters, it takes them several years to get strong and vigorous, but when once in good growing condition, their flowers will appear regular every winter. In some situations December brings them out, in others we have to wait for them until January or February, but they are sure to come. The exceptionally dry season just past seems to have ripened their growth sooner than usual, and this had an influence on the crowns perfecting their buds in advance of ordinary seasons. We were able to gather a bunch of well developed flowers from a small old patch in the border on December 12, about two weeks earlier than usual. The weather had been very mild for over a week, inducing the buds to push their heads well above the foliage and opening out fast.

In rambling over the grounds my attention was attracted by the bright and cheerful appearance of the foliage on the many evergreen hardy plants; in many cases laid close to the ground, flattened out more or less by the weight of the recent covering of snow but otherwise looking bright and clean, the vivid bronzy red hue of Saxifraga speciosa was particularly ornamental in one spot with the variegated Ajuga reptans in close proximity. Not less attractive were the bronzy shades in the foliage of the various varieties of Phlox subulata and the glaucous broad leaves of Alyssum saxatile. The minute little round leaves of Alyssum alpestre formed a close mat over the ground and the somewhat stronger growing A. Gemonense shows the same pleasing hue. The various Dianthi form cushions of dark and light green, some are colored dark purplish, others light pea green and many have a silvery or glaucous color all of them surprisingly effective when flowers are absent. All the armerias also produce a good effect where planted in masses, arabis and aubrietias with their thick mass of rosettes are as fresh and green in midwinter as they are at any time in the year, erysimums are bright yellowish green and form a smooth densely woven carpet, contrasting well with the deep green of the prunellas and

SERVICE HOUSES—WASHINGTON PARK, CHICAGO—PROPAGATING HOUSE DECEMBER, 1897.

globularias, while helianthemums assume a rich glossy brown tint. The linums are persistent in keeping their narrow little linear leaves and are of a pretty color, stachys and agrostemmas are silvery white in their foliage, the iberis are of a rich very deep green at all times. The same color prevails among the mossy arenarias and in the elegant little sagina or Spergula pilifera. Asphodeline lutea keeps its gracefully arching, bluish foliage all winter and is exceedingly elegant in appearance. Spiræa filipendula with its deeply lacerated fern-like leaves is very dark green, and the roundish foliage of Heuchera sanguinea retains the gorgeous color, assumed in late fall all through the winter months. Lotus corniculatus forms a flat blue carpet and many of the sedums are well known to be remarkably effective in winter. The little rosettes of Erinus alpinus are charming when masses are grouped together. Tellima grandiflora always retains its cheerful color and most of the geums are noted in this respect. Campanulas of the persicifolia section are glossy dark green, so is Statice latifolia and the beautiful Stokesia cyanea. The bold upright foliage of Saxifraga Virginiensis has the same deep color and Lychnis viscaria and also L. semperflorens plenissima assumes a vivid purplish crimson color in irregular blotches, diffused with dark green. Anthemis tinctoria colors up well in the latter part of October and is always good until March. Onobrychis sativa is an attractive plant at all seasons, its feathery foliage being very lasting and clean at any time. Several of the veronicas may be noted for their delightful silvery, glaucous or green color; many of the pentstemons are also prominent among the desirable evergreen plants. Chrysanthemum maximum, some achilleas and ranunculus, stellaria, jasione, doronicums, a few of the irises, etc., may be relied upon to retain their freshness nearly all winter, if not throughout the season. The bold yuccas should not be forgotten here either; they surely deserve a prominent place in the garden, and the little hepaticas with their tri-lobed, bronzy leaves are pretty enough when seen in a large patch.

From the above it will be seen that the evergreen section of hardy plants is by no means very small, in fact with them we may undertake to arrange an evergreen flower border, excluding all other species, desirable as they may prove in their flowering season. If they lose their foliage, or if this becomes unsightly, we can do without them here, for the above list comprises plants which bloom early and late in the season, and with the help of a few spring and fall blooming hardy bulbs such a border could be made a decided success.

I have not mentioned even one-half of all the evergreen hardy plants here, my object being merely to draw attention to the possibility of having a clean and attractive winter garden in any northern latitude; so that when the snow is not hiding our plants we may at least see and admire the various tints in the foliage. We do not have to wait so very long for them after all; the hepaticas, scillas, crocus and snowdrops will, in many localities, appear in March, and when these have once made the beginning others will follow, and it is an easy matter to keep up a constant show until late in autumn. J. B. K.

GREENFIELD, IND.—B. W. Cline is no longer connected with the Greenfield Floral Co. J. W. Myer will continue the business as heretofore.

"Den." "Cyp."
MR. BATTLES' BOYS.

The Great Reporter—Some Boys and Mr. Battles.

Once in a long while the ubiquitous reporter does get things straight even in the horticultural department. But it is so very seldom, that the rare event calls for special comment. I clip this from the *Evening Bulletin:*

HOW A FLORIST RECHRISTENED HIS ERRAND URCHINS.

Odontoglossum Crispum is a boy, so is Dendrobium Formosum and so is Cypripedium Insigne. They are the brightest, most wide-awake boys one will see in many a day. The owners of these extraordinary names are employed by a fashionable 12th street florist as errand boys. It was their employer who christened them, naming them after three varieties of orchids. Their names for everyday use, however, are abbreviated to Don, Den and Cyp. The oldest is sixteen and the youngest fourteen years of age. These little fellows deliver flowers in Washington, Baltimore, Harrisburg, New York and Atlantic City. They never miss a train or lose their way. Their employer has the utmost confidence in them, and knows that no matter where they are sent they will reach their destination if such a thing is possible.

Even the little one, Odontoglossum Crispum, knows how to take care of himself and his flowers in a strange city under all circumstances. They have been in the employ of this florist for almost three years, and he declares he has the brightest boys in the city.

Several things will be noticed in the above item. First that the reporter got his Latin names down O. K. Second that a little squib like this is interesting to all flower buyers, especially this season when orchids are so fashionable. Third, that Battles seems to have a good idea of how to imbue his help with enthusiasm for their employment. Fourth, that the said Battles also has some notion of good advertising. And fifth, that there may be a wrinkle here for other retailers, or at least something to set them thinking. And here's hoping that a word of commendation may help to encourage the reporter to keep on publishing good items like this instead of the usual yawp about some devil-plant or other imaginary enormity that he regales the gaping multitude within his festive moments to our very great disgust. G. C. WATSON.

Philadelphia.

[Neither Mr. Watson nor the reporter say anything about the policeman. We presume his name is Copperosma and that he belongs to the Rubiaceæ.—ED.]

German Floral Designs.

The "art" of arrangement of cut flowers has been discussed in the columns of the FLORIST a great many times, and it is not our purpose to enter into the subject at present. It is interesting, however, to note that our friends across the pond are just now wrestling with arrangements which are here generally termed "monstrosities," and which our German friends call "curios," or in general terms plastic arrangement.

Many of our readers are doubtless familiar with more or less of the German publications which are devoted to horticultural and floricultural matters, but probably few are aware that a journal has entered the field which is exclusively devoted to the art of arrangement in all its details. *Die Bindekunst* (art of arrangement), a weekly publication, contains a number of interesting articles, among which he could not help noting a discussion of the subject before mentioned.

One of the writers, in an article entitled "Arrangement of Curiosities," describing the various designs that were exhibited at the recent Jubilee celebration of the 50th anniversary of the Hamburg-American Steamship Co., mentions old familiar friends. Among others the following designs were noted by the writer, Prof. W. "Anchors" in variety, both steam and sailing vessels in tremendous sizes, flags of every nation in the world wrought with a care of detail worthy of a better cause, one of the greatest achievements being the union of the German and American flags. Next we note a powerful array of locomotives, and don't let us forget a mighty "Cognac" bottle, most artistically (?) made of the single blossoms of Dutch hyacinths, a colossal "drydock," built of lily of the valley and forget-me not. "But the crowning effort, the writer continues, "was a monstrous 'lighthouse,' which rested on a foundation of cork, representing rocks. The tower was fashioned of grey moss, the window arranged with suitable flowers. The lanthorn at the top, also garnished with flowers, the glass representing the light within, being made of plates of red gelatine." And concludes Prof. W., we call this art! Can we imagine that the Lord ever created such a divine thing as a flower to have it desecrated by such arrangements as these.

The article is, however, too long to quote entire. To show, however, that there are two sides to this question, we find that Herr R. talks on it in a different strain. This gentleman being in the business for what there is in it, argues like this:

In speaking of what is termed "plastic" arrangement, that is, those arrangements that follow a given form or model, such as a pillow, an anchor, cross, or column, I have seen a great many pieces arranged with such grace and good taste, the garnishing (trimming or festooning, we should call it) so loose and pleasing as to suggest nothing of a "plastic" form. It is the true artist that will impress his own genius on his creations. Any workman with an eye to the æsthetic and an appreciation of color effect, can make such a

plastic arrangement so truly artistic that even Prof. W. could find no fault with it. So works the true artist. But how often can we in our calling follow our instincts as artists? Are we always allowed to follow our own ideas in our arrangements? I maintain that above all one has to be a man with an eye to business, providing he intends his business to furnish him the means of buying bread and butter. We are therefore often compelled to forego our own ideas in order to please our customers. If he or she insists upon having a piece made to suit their own peculiar taste, we are perforce compelled to comply with their wishes, however distasteful from an artistic standpoint such an arrangement may be. We are fully aware at the outset that the thing must necessarily be a tasteless jumble. We are also aware that such are apt to be criticised by the floricultural press, but there is no help for it. We will have to make whatever is called for, that is, if we keep an eye on business. Our customers pay the bill; that is sufficient.

Carnations.

It is getting near the time now when a grower will be able to figure up how he is going to stand in regard to success or failure for the season of 1897 and 1898. I am one of those who, when I see a variety getting left in the rear by newer ones coming along, I want to drop them at once and take on with the new. But of course, not before being thoroughly satisfied that the new one is going to eclipse some old one in the same class or color, for to linger with some pet variety for old acquaintance sake is just as bad as to buy some new variety that you have never seen on exhibition or growing. I am always kind of chuckling to myself that I was wise enough or lucky enough to discard all red carnations for Jubilee, although I know some who have had more cause to chuckle than I.

This variety is the most cheerful to look upon, both flowers and plants, of any variety that I have ever seen, at the same time I have in mind a grower who paid

A GERMAN FLORAL DESIGN.

When I started in business it was my principle to carry only the very best stock and produce only the very best work. I have been true to this principle for ten years, and during this time have often been sought for by people outside of my regular clientage. Before I would consent to make up a tasteless arrangement I would refuse such an order altogether. I found to my sorrow, however, that considering the matter from a financial standpoint it proved a failure I find that that portion of the flower-buying public who possess sufficient taste to appreciate an effort in this direction is far too small. I therefore changed my tactics to my own advantage. To sum up, I hold that one must be a business man first, artist after. He who combines the latter with the former will always be able to give to his work a true artistic impress.

Well, there you are. Our German friends seem to be as much interested in this question as we are over here, and about as near a solution. Let the merry war go on.

$10.00 per 100 for it, planted it in the field, and discarded it before housing time, owing to its being smothered with rust; if you want to see that cheery appearance of it you must plant it in the house not later than July. This year I planted inside in June all the carnations I could at that time make room for, and I am so well satisfied this is the correct way that I for one shall never plant outside again any that I am expecting to cut flowers from in winter, with the exception of seedlings, for all the varieties I have tried respond better to entire house culture.

Every flower cut is first-class from the first to the last and will always sell at a fair price, even when the market is glutted. Diseases do not bother them near as much, and you have them more under your control where you can see them and administer to their wants much better than outside. Jubilee is the only one showing rust, and that so very little that it takes a lot of hunting to find it, and I think by this way of growing it you can get rid of rust entirely.

Varieties I intend discarding for newer ones are Goldfinch for Mayor Pingree, McGowan for Flora Hill, which I must say grow with a fairly good stiff stem in this heavy clay soil. Also Mrs. Geo. M. Bradt has a better stem than seen at some places; this is a grand variety for a retail grower, although it ought to be for any grower who has the knack of turning out good stemmed stock; good old Tidal Wave has got to get up and get to make room for one that I have watched for three years, that will be sent out next spring; Mad. Diaz Albertini is an old friend of mine, at least she is not, but the carnation is. I find that what the introducers say of it is true, that if you do not grow it in summer it must do its growing after being housed before you can pick many flowers. This is one of the varieties I had to leave out until fall. I shall not discard it, as it answers my purpose too well for that; Armazindy is one of the most useful varieties of all; it fills two places: it is a very free flowering one and an elegant grower. I can never see why this variety is not more abundant in the market.

Before closing these remarks I would say do not shake your heads at indoor culture of carnations in summer. In about two years the majority of our carnation growers will adopt that method. Some will not take kindly to it, because it requires a good deal of hustling about the time they are looking forward to a vacation. Some claim they cannot afford to throw out the old ones so early; no more can you the roses; but you find it pays you better to do it in order to get your young stock agoing; others say you cannot get as many flowers in midwinter. To such I would say pay a visit to my place and see for yourself. You can easily manage that by proper pinching back before flowering time comes.

JAS. HARTSHORNE.

Carnations.

It is astonishing in these days of keen competition and progress, the slovenly way so large a quantity of carnations are placed on the market, when a little taste and judgment would alter the entire appearance of lots of such stock and largely increase the returns for it. You find many bunches of flowers in the commission houses that appear to have been cut by moonlight, taking everything as it comes, good, bad and indifferent. They are tied together with coarse, heavy twine, utterly unsuited to the purpose, and when one of these bunches contains three or four half developed flowers and a like number of poor-colored ones, the critical buyer spots them at once. The usual result is: "What's the price on these?" "Oh! A dollar for the lot."

If a little care had been exercised in preparing the flowers for market, and not cutting them, under any consideration, until they were fully developed, sorting carefully into two grades and marking one lot firsts and one seconds, satisfactory prices could have been realized.

We make it a practice to cut our flowers in time to stand at least from twelve to twenty-four hours in water, in a temperature of as nearly 50° as possible. They are placed in jars so that they stand erect before shipping. This improves the texture of the flower and keeps them in good condition while passing through the commission house. In tying up the bunches we use two rubber bands one at the ends of the stems and another about three parts up; this has proven to us the neatest as well as the cheapest way of tying them up. Of course the best way to ship carnations when sending direct to

retailer is to pack them singly in shallow boxes, but the commission men in this market (Chicago) prefer them bunched, as they are better able to handle them that way.

If you wish to have carnations for summer flowering outdoors they should be started by this time. As soon as rooted pot them up and put in as light a place as possible, giving the regular carnation temperature, choosing the white, red and the deep pink colors, as the light pink are of little value for this purpose They will need to be potted on according as they require, so as not to give them any check and be able to have good stocky plants when planting out time comes. If then properly treated they will throw lots of flowers in late summer and early fall when flowers are scarce through replanting. To the retail man that grows his own stock and needs a continual supply, it would be a benefit, but it is a question to us whether it pays to grow carnations for market this way, when the good room they take up from now till spring can be used to better advantage.

C. W. JOHNSON.

New York.

LITTLE STOCK AND CONDITIONS NOT FAVORABLE.—BEAUTIES SHORT.—VIOLETS PLENTIFUL.—THE FLATBUSH BOWLING CLUB.—LARGE QUANTITY OF MISTLETOE SPOILED.—NEW JERSEY FLORICULTURAL SOCIETY.

At present writing conditions are not especially promising for Christmas week business in cut flowers. No doubt the last day or two will bring a rush, but that will not atone for the dullness prevailing in the first half of the week. There is very little stock in market and the only plausible explanation of its absence is that it is being held "in pickle" at the greenhouses. The outlook for shipping business is very bad, no orders of any account having been received from outside localities thus far. The local retailers are doing all they can to boom the plant trade at the expense of the cut flower business, and altogether the prospect is not over-bright for those whose entire interests are tied up in the sale of cut flowers.

Bulbous stock is accumulating again, lily of the valley especially, and the best price is 3 cents, but it averages much lower; a small quantity of special grade sells for 4 and 5 cents. Roman hyacinths and narcissus are also very slow, from 50 cents to $2. Carnations will not be as plentiful and prospects are that they will average up well. Beauties are scarce now, prices advancing on all grades and no indications of a drop later in the week. Violets give evidence of being plentiful, there being a large reserve stock in readiness for market. Outlook for Bridesmaids is encouraging, but the opposite is true of Brides. Mignonette should do well. Smilax is overstocked at low figures, asparagus going freely at 50 cents a string.

The Flatbush Bowling Club met last Thursday night. There is nothing especially new about that, however, as this very jolly organization of florists meets every Thursday night and a Flatbush florist must have very serious business on hand to keep him away from the alleys. No diversion would be strong enough to tempt him, for Thursday is sacred to bowling. Everyone puts his whole heart and soul into it while there, and every roll is watched and the roller applauded or commiserated according to the success he meets. Each one picks out his favorite ball as he would a diamond. When Papa Zeller's ball goes on its slow and sinuous travels down the alley, then swings into center and topples over the whole business, a great cheer goes up; when he makes a difficult spare he is escorted to his seat in triumph, and when he happens to miss it a chorus of groans follows and they sigh "Oh! he ought to have had it." All was agreeable and harmonious last Thursday until the penny-in-a-slot machine in the corner refused to disgorge a slab of tutti-frutti for some of the boys, whereat Louis Schmutz advised them to "blankety ——, kick the blamed thing over," and Louis has just the right kind of legs for that sort of a job. George Huidmuller, Papa Zeller and Henry Dailledouze each went home with their pockets full of money captured from the pot, and Riley and Mellis stock took a tumble for the time being.

Alex. Burns did not like the proposition to rule out the greenhouse boilers from competition for the Florist Club's gold medal, at the last meeting. "What does a rose grower care about a new carnation? He'd rather have a new boiler and a new boiler don't pop up every week," said he. Charles Weathered, with the air of a man who could prove what he said, promptly informed him that "there are forty new boilers put on the market every week." Then John May murmured, "The boiler question is just as it always was and always will be—in hot water."

There is plenty of dormant wit in the New York Florists' Club, not counting Mr. John Morris, who has plenty of it on tap for all emergencies, Mr. President.

Among the best violets coming in now are those John Raynor is receiving from Sutton's big plantation at Babylon. Mr. Sutton was late in starting but there was wisdom in his manœuver, if such it was, wisdom or luck, the result is the same.

One of the down town dealers had a consignment of upwards of two hundred cases of mistletoe spoiled by heat on the way. Luckily he ascertained the condition of the stuff before accepting bill of lading and is correspondingly happy.

The New Jersey Horticultural Society will hold its annual supper and installation of officers at Orange on Monday, January 3.

Rose Notes.

Unless our friends of the weather bureau shall decide to give us a better article pretty soon, or at least something more seasonable, we may have to adopt the English style of rose growing. The damp foggy, warm and sunless weather of the last few weeks could hardly have been surpassed in the neighborhood of London. It has probably saved a few tons of coal, which is a blessing certainly these dull times, but the saving in fuel is more than offset by the diminished cut and inferior quality of the product. Before these notes appear in print we hope for crisper air and brighter skies.

The very low prices that have prevailed all through the fall will no doubt make us more eager than usual to have heavy shipments for the holiday season.

It is surprising how many people there are in the trade as well as out of it, who are unreasonable enough (a stronger adjective should be used) to think that because it is Christmas, and roses are in great demand, and bring good prices, that something in the air, or the sun, or the personality of the grower should operate to open the flowers after the "Arabian Nights" style, and it is a fact that unless the daily cut is increased from 100 to 300 per cent. there will be disappointment and dissatisfaction all round.

The end of December is the one time above all others in the whole year when we cannot in reason expect roses to produce heavily, and if we are going to run in opposition to nature and compel them to bloom we must expect nature to get even, for she surely will. I have heard of growers having increased the temperature in their rose houses 10° during the week preceding Christmas, and the poor fireman has had peremptory orders to hold it right there regardless of the conditions prevailing outdoors, and if his work did not receive very much scrutiny at other times he could reckon on a watchful eye over him then. The increase in cut may have been from 14 to 25 per cent. but towards the end of the week the quality would be off about 50 per cent., and both quantity and quality lacking during the last week of December and the early part of January.

If the stock is already soft, as is liable to be the case this year on account of moist, dull and warm weather, it will be rash folly to raise the temperature over the holidays a single degree in order to force out more bloom. The only safe course will be to maintain a minimum temperature, give as much air as possible (a little ventilation and gentle fire heat on warm humid nights will be beneficial, keep moderately dry at the root, and syringe overhead only to keep down spider.

We shall no doubt hear after the holidays of the man who kept back a whole week's cut for Friday morning, thinking he was doing a fine stroke of business, and became indignant when the commission man pronounced it stale and unsalable. It is possible to keep cut roses three days, however, at this season of the year and still honestly sell them as "fresh flowers" provided we have a good and commodious ice box. They must however be in prime condition when cut, no spotted or decayed petals. It will not do to cut immediately after syringing, such flowers cannot be held more than a day. The sorting and grading should be done immediately after cutting to save further handling and get the different lengths together in one pot. To have roses keep well we must use suitable jars, not crowd too many flowers into them, allow each bloom sufficient space in the bunch and give each pot adequate room in the cooler.

ROBT. SIMPSON.

Cleveland.

By the time that this reaches the reader the extent of Christmas business as compared with other years will be fully known; hence any forecast additional to what may have already been said at an earlier date would be superfluous. The weather has continued unfavorable (as practically the entire month so far has been) and there is no apparent prospect for much improvement excepting in so far as a moderate cold wave has frozen up the mud underfoot and made getting about less unpleasant for Christmas buyers in all lines. It is certainly to be hoped that business will show sufficient improvement in quality and prices to offset the scantiness of supply that has been evident ever since chrysanthemums have been through with. Business lately has shown the streakiness that characterized the Irishman's pig. One day there have been a few indications of fat. Then there would be a dullness that is not satisfactory at this season, although one or two stores report business as averaging fairly well.

The next meeting of the Florists' Club takes place Monday December 27 A.

NOTE.—Since judging Peter Kay, it has been ascertained that this variety is synonymous with Jeannie Falconer, which was exhibited at New York City November 10, '94, and certificated by the Society; hence certificate will be withheld. As there are several yellow sports from Mrs. Jerome Jones, and one of which (Henry Nanz) is now in commerce, it is deemed advisable to withhold certificate on the variety, Mrs. George F. Baer, until its distinctiveness can be determined.

ELMER D. SMITH, Secretary.

Suggestions on Chrysanthemum Committee Work.

Before the next chrysanthemum season comes around can there not be an improvement in the way in which certificates are awarded by the Chrysanthemum Society of America? It is certain that some change is needed. While these committees have done much good there is still too large a number of disappointing new varieties certificated by one or the other of the various committees.

How to bring about an improvement is a difficult matter. I would suggest the following as likely to be of assistance:

First, that all exhibitors be required to send three flowers before all committees, three will be just as good as six as at present, and will not take so many flowers to go around. By this means it will be seen how they show up all over the country.

Second, that exhibitors be required to give height of growth, whether a seedling or sport; and, if possible, what it came from. I believe that this plan, or something on these lines, will become necessary.

The points themselves want improving. I fail to see the necessity of having 25 points for form and 10 for fullness. They both cover the same ground, as it is impossible for a variety to be of good form with an eye in it. It is very interesting to note the difference in the reports of the various committees regarding the novelty Wm. H. Chadwick exhibited November 27. Chicago valued it highly and rightly, as exhibited here it showed up as one of the best of this year. It is good in all points with the exception of lacking a trifle in substance of petalage; not enough to harm it in any way if growing qualities are on a par with flower. New York, on the other hand, considered it just good enough to skim through.

It would be very interesting to us westerners to hear from them in what particular they consider it lacking, as judging by some varieties they have pointed up we should have thought the variety in question would have scored high.

GEO. STOLLERY.

Boston.

CUT-FLOWER TRADE HOLDING BACK FOR CHRISTMAS.—SUPPLY OF FLOWERS, IN ADVANCE, LIGHT AND HOLIDAY RESULTS LARGELY DEPENDENT ON THE WEATHER. —COLORED CARNATIONS AND BRIGHT ROSES LEADING.—HARRISII LILIES SCARCE.—PLANT TRADE GOOD.—AZALEAS SOLD OUT EARLY.—HOLLY TRADE ENORMOUS.—ALL GREENS GO WELL.—LAUREL WREATHS IN DEMAND.—A WEDDING.

The early days of Christmas week find the cut-flower market in the uncertain condition customary at this date. The local demand for flowers, outside of funeral and other unavoidable obligations, is exceedingly light, and it is not practicable for the retailer to buy up much stock in advance, as most of that offered has been detained at the greenhouse as long as its condition would permit. So much depends on the sort of weather to come that it is not possible to foresee what will become of the stock now on hand, but for the present it is certainly moving slowly at the prices asked, which are moderately advanced beyond those quoted last week, but are not nearly as high as in past years.

Colored carnations hold a leading position and the brighter roses share the special demand with them. White flowers are becalmed; no one thinks of any great run on them and prices are advanced with much timidity. It appears that there are no Harrisii lilies to amount to anything, in this neighborhood, and there is no difficulty in getting fancy figures on them. It would not take a great many, however, to overload the market, for the demand for them at Christmas is always a limited one.

The plant trade is in healthy condition. Azaleas are all cleaned up, not a plant in bloom being left unsold and many more might easily be disposed of. While there is a good supply of ornamental fruited plants and poinsettias it is a matter of surprise that the quantity and quality of flowering plants offered averages low. Chinese primroses run mostly in small sizes, good cyclamens are rare and of heaths there are practically none.

Holly trade is already far ahead of the record; despite the predictions to the contrary the quality of holly in this market is very good. Unless unexpected large consignments appear a decided shortage is inevitable. The advance call has been something unprecedented. Laurel wreaths are also far ahead of the game, and the makers are overwhelmed with orders. Southern smilax goes lively and all sorts of green material, with the exception of palm leaves and palm crowns, find a satisfactory demand.

Carrie Jeanne, daughter of J. A. Foster, Dorchester, was married on Saturday, December 18, to Chas. H. Wray, and will hereafter reside in St. Louis, Mo.

H. Alburger opposite South Laurel Hill Cemetery has a large number of ivy crosses and wreaths, and the same of holly for cemetery decoration. He pays great attention to this class of work and it would be hard to find better made up pieces. The ivy designs are made very close so that when they dry out and the leaves commence to shrivel they will not show the moss underneath. The crosses are made on a base to stand and the main body of the frame is square giving them a massive appearance; a few selected sprays placed here and there when finished give them an additional and artistic touch.

Westcott Brothers, his neighbors, have also a lot of the same class of work which will keep them very busy until Christmas day.

The top notch of the holiday prices is hard to predict; $20 is understood to be the price for the select teas by some of the select growers. Other grades will be sold for $10, $12 and $15, depending on the aggressiveness of the grower and the backbone of the dealer, quality and freshness figuring somewhat as well. Beauties will sell for from $25 to $100 per hundred, with plenty of stopping places between.

Carnations are quoted at $2 to $4 and probably a few select at $5. The few about at present would indicate that

STORE OF M. A. McKENNEY & CO., MILWAUKEE.

Philadelphia.

PROSPECTS GOOD.—PRICES RULING HIGHER. —BLOOMING PLANTS SCARCE.—WEATHER MORE FAVORABLE.

At the present writing everything is going forward at a fast pace, the object being to get in line in time for the Christmas rush. It seems no matter how the work is plowed and laid out ahead, there is always a lot that remains undone. Things that it was fully expected would be ready for the holiday business are finally pushed to one side and abandoned, the more imperative ordered work taking up all the time.

There has been for the past few years a falling off in the demand for designs of dried work for cemetery decoration. Every spare moment for weeks before Christmas used to be utilized in getting these forms ready; now, however, but few many of those that are getting tired standing on the plants will probably take the first opportunity they get to go to sleep. Violets, too, are wasting their fragrance on the desert air of their present surroundings, and there may be none left when they come to town. Prices are to be from $1 to $2. Hyacinths and valley will be plentiful at from $3 to $4.

Everybody wants to sell smilax at $12 to $15.

Harrisii lilies bring $12 to $15, lycopodium $12 to $15. Blooming plants are scarce. Small plants of poinsettia are much sought after; the market would take many more. Azaleas are also scarce, but few being in the market. No one seems to have any primroses in quantity, and so it is with all the other stock. R. Craig's cyclamens are all sold that are in flower. Solanums are all gone; the grow-

ers will certainly now have the room they are always craving for.

Everything points to a good season, and the weather, which was bad, seems to have turned for the better. K.

Chicago.

FIRE AT GEO. REINBERG'S.—ACCIDENT AT KENNICOTT'S.—PLENTY OF STOCK IN MOST LINES.—PRICES LIKELY TO RULE LOWER.—BEAUTIES, VIOLETS AND FINE CARNATIONS SCARCE.—MORE FLOWERING PLANTS HANDLED THAN USUAL.—VISITORS.

One of Geo. Reinberg's boiler sheds was burned last Friday night, together with the ends of three meteor and one smilax house. Loss, about $1,000. The fire is supposed to have been caused by the steam pipe coming in contact with the woodwork. The accident coming at this time will leave Reinberg Bros. somewhat short of Meteors for the holidays. Their stock of this rose has been extra good for this season of the year.

An accident happened at Kennicott's a few days ago. Their ice men were putting a large cake of ice into the ice box, which is about seven feet high. One of the men let go his hold and it slipped back, hitting one of the men in the face. The injured man was taken to St. Luke's Hospital.

W. W. Winterson has gone to Washington and Oregon on business for the firm of Vaughan, McKellar & Winterson, of which his son is a member.

The retail florists complain of very poor business in the cut flower line.

Green and holly are selling fairly well. Good holly is none too plentiful, but there is poor frozen stock to *burn*. The shipping trade this week has been phenomenally good. All of our wholesalers report orders largely in excess of any previous year. As a consequence prices have held up to our last week quotations, although stock has been coming in more freely than was expected. There is more stock on market to-day, Thursday, than there has been any other day this week. Monday and Tuesday stock was scarcest and prices firmest. The prospects are that there will be plenty of everything to fill all orders, except American Beauties, violets and extra select carnations, at somewhat reduced prices from those charged the first part of the week.

Never before was such quantities of pickled stock thrown on the market. Carnations that had the appearance of having been fit to cut three weeks ago, were shipped in by some growers, evidently with the expectation of getting Christmas prices.

Rogers Park Floral Co. are cutting some extra select carnations, Alaska, Triumph and Armazindy. Geo. Souster, of Elgin, Ill., is sending in some of the finest Daybreak ever seen in Chicago. They are consigned to E. H. Hunt. Fancy Mayor Pingree and Mrs. McBurney brought the highest price of any that have come to the Chicago market this season sold by the Illinois Cut Flower Co.

More flowering plants are to be seen in florists windows than ever before. Primroses, begonias, azaleas, heaths, ferns and small palms are largely displayed and are finding ready sale. The retailers have heretofore done very little in this class of goods.

Mr. G. Shachel, of Glen Lord, Mich., was in town. Mr. Foster, of the Krebs Floral Co., St. Louis, was in town Wednesday arranging for Christmas flowers. It is rumored that some of the stock Mr. Foster bought came from Belleville, Ill. What's the matter with St. Louis?

Heating Notes

Most of us have experienced the annoyance of a break-down of the heating apparatus at a time when its perfect working is most needed, that is, during a severe cold spell, and I will endeavor in the following lines to make such suggestions as will enable you to meet the above mentioned emergency with the least possible expense and loss of time.

The causes and nature of such breakdowns are numerous, but the sudden leaking caused either by a crack or the wearing away of a portion of the boiler is the most common, and causes the greatest concern, as it strikes the foundation of the heating system, a total derangement of which would mean serious loss.

In such cases, even when the leak is of considerable extent, a very efficient temporary stoppage can be effected by continuing as heavy a fire as possible and in the meantime preparing a cement in accordance with the following formula:—Take of Roman cement, clean cast-iron borings, (not rusty), which should be sifted through a piece of mosquito netting, and plaster of Paris, of each equal parts by weight, and mix them thoroughly together, and when thoroughly mixed add water until the mass reaches the consistency of soft putty, but do not add the water until the boiler is thoroughly heated and the fire is as bright as circumstances will allow; also have ready a piece of slate, tin, wood or even a piece of old carpet, large enough to cover the leaky space liberally; also have ready a poker or stick long enough to reach the leaky spot easily; then, having the necessary materials at hand, brush or wipe the leaky surface as clean as possible, moisten the cement as instructed and smear liberally over the defective surface, say about three-quarters to one inch thick, and cover with a piece of wood, tile or other substance as stated above, and if the leak be on a flat, horizontal surface place a brick or other weight over it to keep it in position, or if on a vertical surface, hold in place with the poker, and in a few minutes the leak will have been stopped.

This cement dries very quickly, adheres firmly to the iron, becomes very hard and makes a perfect stoppage, even against considerable water pressure. I have known boilers so treated to last through an entire winter, but I would not advise you to rely upon it for a longer period than necessary, but would suggest that you call a competent mechanic at the first opportunity, to advise as to the possibility of making more permanent repairs.

Florists having old boilers in use would be wise to keep some of the above mentioned ingredients in glass jars, separately in a dry place in readiness for emergencies. HENRY W. GIBBONS.

LACONIA, N. H.—C. P. Dow has been awarded damages amounting to $763 against the Laconia Gas Company, on account of injury to plants in greenhouses, caused by gas escaping from a leaking main.

SITUATIONS, WANTS, FOR SALE.

Advertisements under this head will be inserted at the rate of 10 cents a line (seven words) each insertion. Cash must accompany order. Plant advs. not admitted under this head.

Every paid subscriber to the AMERICAN FLORIST for the year 1898 will receive on request, a coupon for one five line want "adv." free, to be used at any time during the year.

SITUATION WANTED—By all round florist; good grower and propagator of roses; sober and steady. C, care American Florist.

SITUATION WANTED—Young man, German, to take charge of greenhouses; roses, carnations and foliage plants; commercial or private place. Address M K, American Florist.

SITUATION WANTED—By Scotchman, married, age 32 as gardener in first class private place; good practical experience in all branches; highest references. Address GARDENER, care American Florist.

WANTED First class rose grower; one capable of taking charge; one familiar with growing catalogue stock preferred; state wages expected Address A B, care American Florist.

WANTED—Partner in Chicago, with $1 000 cash to take half interest in well established, paying florist and greenhouse business; experienced man preferred. Address L F, care American Florist.

WANTED—Propagator of herbaceous plants in an eastern commercial place; one who has had some experience; give age, nationality, experience, reference, and wages expected. Address M T S, care American Florist.

WANTED—To lease for a term of years, greenhouse plant containing 2,500 to 5,000 feet of glass heated by hot water; must also be stocked and doing business Address CARBONDALE FLORAL DEPOT, Carbondale, Pa.

WANTED—To lease established commercial place; no half-private and half commercial place wanted; houses must be in good condition; state exact size and particulars; or I will accept a position where a thorough practical grower and manager is wanted; best of references. Address A, Lock Box Atlanta, Ga.

FOR SALE—Florist's single covered wagon; height about 5 feet, width about 4 feet, length about 7½ feet; built to order, costing $250. Used but two years. Will be sold cheap for cash VAUGHAN'S SEED STORE, Box 688, Chicago.

BUSINESS OPPORTUNITY.

One of the most valuable florists' establishments in the Middle South, ½ interest for sale, or will lease to an enterprising, wide awake business florist; 7 modern greenhouses, 25x150 ft., one 50x75 ft., three 20x50 ft., 75-foot violet house, frames, splendid windmill and watering facilities, packing sheds, office, 5 acres of splendid land for rose growing situated within easy access of Atlanta, Ga., on one of the most beautiful driveways of the city. Florist store in the Kimball House block with first-class facilities, and the best stand in the city; connections with several of the largest tourist hotels in Florida, with shipping trade in cut flowers started. This is an established business with unlimited opportunities for enlargement. Aside from the cut flower trade there is a large opening for building up a shipping trade in nursery grown roses, which thrive and make more growth here in one year than in three seasons in the North. The owner has other large interests which occupy his whole time and wants a thorough-going man who has some means and an ambition to extend an already well established business in this exceptional field. This is not a broken down or failing establishment. The owner does not desire to sell out the greenhouses, but would dispose of an interest or lease, so that an enterprising florist would have such interest as would insure his exclusive application to maintaining the high character of the present business and working for its extension. Address **JOS. THOMPSON, Atlanta, Ga.**

FOR SALE.

At less than half its cost, or for rent, about 28,000 square feet of glass with grounds and modern 12-room dwelling, built a year and a half ago; greenhouse nearly new, all heated by steam, well stocked and in good order; located on street car lines between St. Paul and Minneapolis, and a well paying wholesale business established. A splendid opportunity for a good live man. Sale price, $10,000; rent $150 per month. If you mean business, address **CHRIST HANSON, St. Paul, Minn.**

FOR SALE.

BUSINESS GOOD.—STOCK SHORT AND PRICES GOOD.—WINDOW DECORATIONS.—VISITOR.—MR. FRIES RECOVERING.

On the whole, business for the week has been very good, weddings and funerals were most frequent in the middle and latter part of the week, the latter creating a considerable part of the week's business. Roses have been scarce, owing to the dark and cloudy weather which prevailed in this section of late. Carnations, like roses, for fancy and special stock, demand a good price. The first of this week a notable change could be noticed in values of these. The supply showed signs of falling below the average, and it was therefore easier to hold out for top prices. Hyacinths and narcissus enough to meet the demand, but Harrisii are scarce.

Among the many charming window decorations seen at this time in the leading stores, Peterson, Critchell, and Sunderbruch's Sons, are again in the lead.

In one of Peterson's windows a lot of azalea (Deutsche Perle) arranged with adiantum and the background of large arecas and kentias showed off immense. Mr. Critchell, on the other side, made a grand showing of well-grown cycas, all arranged in jardinieres. He reports a good sale.

Sunderbruch's Sons' store has been, as usual, in accordance with Christmas. A large lot of saleable palms, ferns, dracænas and other foliage plants were tastily arranged throughout the store, and the window display made a grand effect from the street.

Critchell's Sons had the best holly in the city; in fact, they had a cinch on the holly trade.

Mr. P. H. Therkildson, of Ironton, O., was a recent visitor. Mr. Ed. Fries, who has been very ill with typhoid pneumonia, I am glad to report, is now pronounced out of danger.

Our bowling clubs bowled a friendly match game last week. Charles Critchell was high man of the Neversweats, while Will Schuman carried off the honor of the Evelinas. The growers beat the store boys nearly 200 pins in three games. Next week they will be out in full force and revenge is looked for.

To all readers a Merry Christmas and prosperous New Year is the wish of yours truly, H. SCHWARZ.

A Chrysanthemum Fungus.

ED. AM. FLORIST:—In September there appeared on the under side of the lower leaves of several varieties of my chrysanthemums brown-red fungus spots which ripened up and dropped a powdery substance, covering the lower leaves with a brownish red dust which I brushed off. The leaves affected with this fungus did not die and are still green. Many of the stems are now abloom from late side-breaks. The vitality of the plants did not seem affected in the least.

With abundance of light and circulation I had strong stiff stems, and when the extremely hot days of October came I kept the temperature down by spraying the glass outside and threw road dust on while wet.

Was this disease what is called "Black-spot," and will it certainly appear next year in this house if I use some of the varieties for stock plants? How would it do to fumigate the house by burning sulphur about the last of next March? This would kill everything above ground but I should not think it would affect the roots. Shall I put in fresh earth upon new benches in June? RUFUS W. SMITH.

It is not "Black spot." The description of the fungus mentioned above is that of carnation rust, and, in my opinion, was nothing more than this. We have received stock thus affected and also leaves from several localities in like condition This fungus is apparently not at home with 'mums, being soon disposed of when stock is kept in a dry, airy house. Heavy syringing of the foliage, especially if done late in the day would be likely to establish this fungus and the heavy shading in October would be apt to increase it, particularly if the hose was used freely inside. The fumes of sulphur are very destructive to all fungus spores, but should only be used when the house is empty. ELMER D. SMITH.

Chrysanthemums—Best Twenty-five varieties.

Answering P. D., New Brighton:—A list of this character is ever changing, owing to valuable additions each year made by the different disseminators, and importations of novelties from England and the continent. Many varieties of which some growers produce beautiful blooms, are almost total failures with others, but in the following list, we have endeavored to include only those that are easily grown by nearly all. Twenty-five large blooms: Mrs. Jerome Jones, W. H. Lincoln, Viviand-Morel, Mutual Friend, Major Bonnaffon, Mayflower, Eugene Dailledouze, Mrs. Henry Robinson, Golden Wedding, Mme. Felix Perrin, Minerva, Mdlle. M. A. de Galbert, Modesto, Silver Cloud, Charles Davis, Golden Gate, Mrs. S. T. Murdock, Miss Minnie Wanamaker, Helen Bloodgood, Marguerite Jeffords, Philadelphia, Mrs. Geo. West, Maud Dean, Nyanza, and John Shrimpton. The last named, though not as large as the rest, is the best and easiest grown red. This list does not include any of the novelties of 1897, which will no doubt push one or more out of this list.

The best twelve for pot plants are W. H Lincoln, Ivory, Agnes L. Dalskov, L. Canning, Minerva, C. B. Whitnall; Golden Hair, Henry Hurrell, Louis Boehmer, Geo. W. Childs, Mutual Friend, Constellation. E. A. WOOD.

THE HAMBURG INTERNATIONAL HORTICULTURAL EXPOSITION, which closed at the beginning of October, resulted in a surplus of 300,000 marks. The amount received from season tickets was 810,000 marks and from daily tickets 770,000. The receipts for rentals of dining halls and sale of privileges was enormous. This shows the interest which the German people take in horticultural matters.

BURLINGTON, VT.—A. J. Taylor has purchased the interest of C. E. Gove in the firm of Gove & Taylor, florists and seedsmen, and will continue the business of the firm as before at the corner of Church and Bank streets.

THE WEATHER.—POT PLANTS SCARCE.—VIOLETS WANTED.—CONFIDENCE MAN AGAIN.—CALENDARS FOR 1898.

Rain, snow, rain, slush, freeze has been the order for the last week. Let us hope that the freeze will continue, as it promises to do, and that we shall be blessed with good old-fashioned winter weather, with sleighing for the holidays.

Notwithstanding the unseasonable weather trade has been improving, though probably the department stores have been more favored than the florists. Stock is in fair supply, except violets and carnations, which are probably being hoarded for Christmas. The dark weather has affected roses, which are rather weak stemmed. Pot plants outside of palms and ferns seem to be scarce, though there are a few good cyclamens, Chinese primroses and begonias in sight. If any one had a nice stock of violets in pots, they would sell like hot cakes. Greens have been moving freely.

Kasting reports sales of holly, etc., far in excess of previous years. He is preparing for a heavy trade and I judge by his list that he expects a shortage of carnations and violets.

Scott expects to have a good supply of violets of his own growing.

I noticed in Palmer's some good single violets—Philadelphia stock. Singles have never been extensively grown here as they have not been in demand.

A well dressed little man walked into Palmer's store one day last week and ordered a dozen palms sent to decorate a house on Pennsylvania street, and as the delivery wagon was at the door he said he would ride with the driver and help him unload. He seemed to have a good knowledge of palms and selected some nice Kentias worth about $6 apiece. There was a warm rain falling at the time, and instead of taking the plants into the house the man asked the driver to leave them in the yard as he wished to fix them up a little before placing them. He also remarked that he would pay for them the next day, when he returned them. The next day they were sent for but neither palms nor man could be found. The people in the house knew nothing of the man except that he had asked permission to store some plants in the yard for a short time. It seems that as soon as Palmer's wagon was out of sight, the man began taking the palms away, two at a time and peddled them out around the neighborhood. He probably had little difficulty in selling them as his prices were clear way below that of the hardware stores. Palms worth $6 were sold for 75 cents. All but two of the palms have been recovered, but the man has not been found. Mr. Palmer thinks the man was a tramp florist, as he seemed so well posted in regard to plants, and thinks he may try to work the scheme in other places. Look out for him. I do not know how he explained matters to his customers, but I should suppose that the low prices would have created suspicion.

Long is out with some new floral calendars for 1898. I have not seen them but they are said to be very attractive.

C.

Eel-Worms Again.

The rose plants forwarded to me by T. & H., Arkansas, were a long time on the way; result, the foliage was badly dried and dropped off, which gave me little opportunity of judging the nature of the trouble by the appearance of the stems and foliage. There is little reason to doubt, however, that eel-worms are at the root of the matter; the roots of one of the plants received were a complete mass,—a perfect specimen of the disease in its worst stages, one which would be a splendid subject for illustrating one of Mr. Halstead's lectures on "root galls." One of the other plants was less affected, and the third showed only traces.

Experience and observation has led me to think that eel-worms on roses are very often the result of the plants being carried too long in small pots, the roots cramped, the foliage stunted and getting at times too dry. In the present case it was probably aggravated by suddenly removing all the shade from the glass when the thermometer stood at 102° to 110° in the shade, as you say for three months from that time the plants scarcely moved.

The "rascal florist" that you name, whose glib tongue and wonderfully persuasive manner, and glowing testimonials led you to engage him as grower, only to be badly deceived, I, along with others, know fairly well; he would be a splendid man to compile a "Florists' Directory," as he knows personally almost every grower of repute throughout the length and breadth of the land. Your case only emphasizes the looseness which characterizes the system of employing greenhouse men, even to fill responsible positions, and the need of a change. If a man comes along and tells us that he has been employed by some one we know to be a successful grower, we conclude right away that he is the party we are looking for, and at once put him to work; whereas, if we took the trouble to investigate, we might discover that he did not have either the experience or the ability that he professed to have. A little more care in writing testimonials would also be a boon to the trade at large.

The good coat of bone meal that the plants received may or may not have helped to make matters worse, that would depend on the quantity used, and the purity of the article. Instances are not rare where much damage has been caused by using bone cut with acids; the moral is, purchase from responsible parties who guarantee their goods.

I think if there are sufficient healthy plants left to pay for the labor I would take all out of the benches, replant the best in fresh soil, throw away the poor ones, and use the space for something else. If lifted carefully with medium balls attached they would not lose much by being transferred.

Keeping the soil wet all the time tends to prevent the trouble spreading.

EARLY SHIPMENTS PAY.—W. SCHUCHT MARRIED.—SEMI-CENTENNIAL CELEBRATION.—DECORATIONS.—B. GREGORY AND JOHN DUNLAP TOUR THE VIOLET DISTRICT.

The severe cold weather which has set in, going below zero, comes as a relief from the preceding mild but wet and cloudy weather. Sunshine is the desirable element, regardless of other conditions. The scarcity of flowers this week causes us to suspect that growers are "salting." The dark weather is cited as an excuse for the small shipments. One grower we know of sends in all he can, and makes a business of doing so before the holidays, and he appears to fare best, every flower has brought good returns for the past ten days. The quality of holly is not quite satisfactory this season. A few azaleas are shown in stores, but there appears to be a scarcity of pot plants suitable for Christmas this season.

Whitnall Floral Co. have been serving white camellias quite liberally for four weeks.

A. Kloker is driving quite a fancy wagon now, painted blue trimmed with silver.

McKenney & Co. are using quite stylish cream white boxes with gilt lettering, delivering them in a wagon to match.

Currie Bros. use a drab box with a thistle engraved.

Fox, the grocer, uses a brown box with green edges.

The other florists in town use the standard folding box.

It does not seem to be generally known that Will Schucht, who looks after the flower department in Esponheins' dry goods store, has been a married man for several weeks.

There has been considerable said in our daily papers of late about the Semi-Centennial Celebration to be given here next June. An organization is at work preparing for a great carnival. They say the ladies will conduct a floral festival; great things are to be done with flowers. They say its the month of roses (they must have been reading a poem). A committee is around with a contribution box. A Grand avenue florist has subscribed $150, and a Third street florist is considering about giving $250 (so they say). Let us wait and see before more is said.

Ellis & Pollworth have put in an extra boiler to heat the five houses leased of P. J. Deuster. The original arrangement was not equal to the task of keeping palms warm enough.

Mr. Deuster's son is running the balance of the plant and is sending into Holton & Hunkel one of the finest crops of roses and carnations that has been grown in the city.

There has been a moderate amount of decorations so far this month; perhaps the most original item was the dining room effects of a Grand avenue residence. The table was under a chandelier throwing a delicate green light. Hanging from it were two blocks of orchids at unequal lengths. Under were several pots of cattleyas and cypripediums, two or three raised up so that the various pots and blocks extended almost up to the chandelier. This was carefully filled in with Asparagus Sprengerii. It was a novelty and much admired. The sideboard was arranged with banana and orange plants, bearing a profusion of fruit. The bananas were of course procured of a grocer and fastened on, as were a few of the oranges, but they looked quite natural.

Ben Gregory and John Dunlap have just made a tour through the violet district. They report crops looking beautiful. A few "damped" leaves can be found, not enough to be of damage to the crop. Carnations are also good, particularly at Loefflers, Sylvisters and Schoenemans. A peculiar trait of the growers in their locality who are making such a success is, they stay at home and watch their houses, pack carefully and do not pay express charges on poor flowers.

THE SEED TRADE.

AMERICAN SEED TRADE ASSOCIATION.

JEROME B. RICE, Pres.; E. B. CLARK, 1st Vice-Pres.; S. F. WILLARD, Wethersfield, Conn., Sec'y and Treas.

MR. CHAS. P. BRASLAN has returned from a ten days' trip to Boston and New York.

FIELD PEAS are still offered at close prices.

ONION SETS will move more freely after January 1.

SWEET CORN though scarce, advances in price very slowly.

THERE ARE VERY FEW items in the whole seed list that cannot still be bought at contract rates. Usual December dullness certainly prevails.

A WHOLESALE GROWER who lately made an extended trip through the East, reports but moderate confidence in the outlook for 1898, and considerable anxiety among the catalogue trade—just before the battle.

Greenhouses Building.

Attleboro, Mass.—John J. Nolan; one greenhouse.

Buffalo, N. Y.—C. D. Zimmerman, one greenhouse.

Greenville, R. I.—Peter McCauley, one greenhouse.

Groveland, Mass.—Edward Parker one greenhouse.

Middletown, Ct.—Geo. Stedman one commercial house.

No. Woodstock, Ct.—Thomas Bradshaw, one forcing house.

ARE YOU growing mums? Did you read the AMERICAN FLORIST'S Chrysanthemum Forecast for 1898? If you were too busy then, better hunt up that number now and read it.

CHOICE SEEDS.

VERBENA GRANDIFLORA.

This improved strain of Mammoth Verbenas gives perfect satisfaction to my many customers, and is justly claimed to be the finest in cultivation; florets and trusses of extra large size, all the finest colors.

CHRISTMAS PROSPECTS.—PLANTS FOR CHRISTMAS TRADE.—CORNELLI & KELLY DISSOLVE PARTNERSHIP.—FRED. A. RIEMAN'S BOILERS TAMPERED WITH.

The holidays are close at hand and everybody is busy making preparations for the Christmas trade. Cut flowers will be scarce, especially good roses. Most of the florists, however, have a good supply of plants on hand. The prevailing opinion seems to be that the demand for pot plants, especially for blooming varieties, is increasing. Cyclamen, azaleas and the different kinds of begonias form the bulk of what is shown in that line, with enough primroses, cinerarias, callas, violets, etc., to add variety to the display.

In foliage plants it is noticeable that with most florists ferns have a more prominent place than in former years. Pteris tremula and several kinds of Nephrolepis can now be found in every greenhouse.

The firm of Cornelli & Kelly has dissolved partnership. Ed. Cornelli will carry on the business by himself.

Fred. A. Rieman was the victim of an ugly trick last Friday night. He left his greenhouses for his residence at twelve o'clock; when he returned at about two o'clock he found that some one had entered his place, opened the furnace door and turned the water on into the boiler. The boiler as well as the heating pipes were full of cold water. With the steam gauge showing the pressure of the city water works, with Fred very hot and the temperature in the houses down to freezing, things were pretty badly mixed up for awhile. Mr. Rieman succeeded in saving most of his stock. He estimates his loss at about $70. We sincerely hope that the police will succeed in capturing the guilty party. J.

Best Early Aster.

ED. AM. FLORIST:—Will you please tell me which is the best aster to plant for the earliest cut flowers. I wish to grow some for Decoration Day and am in doubt as to what kind to sow. M.
Greenfield, Ill.

The best early aster of value is the Queen of the Market. It is early, double, and the flowers are borne on long stiff stems. The flowers should be cut before they are fully opened. The Queen of the Earliest, or Earliest Parisian is about two weeks earlier, but the flowers are not double enough. C.

I doubt the advisability of attempting to flower asters for Decoration Day. B.

A. FARLEYENSE,

Extra strong plants from 3-inch pots in excellent condition at $3 per dozen: $20 per hundred.

Denver.

DENVER CLIMATE GETTING A BLACK EYE.—GREENS IN EARLIER THAN USUAL.—CUT FLOWERS SHORT.—PLANT TRADE NO GOOD.

The Italian climate of Colorado is getting a black eye this winter, for the mercury is in the dumps and refuses to get up in the morning or sit up nights, and cannot be coaxed up to the freezing point for its noon dinner. This state of affairs has lasted for ten days, and we hope for a break.

One comfort we have, these early snows pack in the mountains and last much better than those of spring, and assure us an abundant supply of irrigating water, and consequently good crops next summer

The Bible says "the rain falls on the just and unjust" We must be a sort of a job lot, for we are often omitted in the distribution, and consequently glad when the sources of mountain streams are abundantly supplied with snow to come down in our ditches with the summer sun.

Holiday greens appeared earlier in the market than usual, and many stores and markets had assumed their gala day dress of festoons and wreaths early in December.

Now the flower stores are busy with holly, green and mistletoe. The supply of cut flowers is very short and the plant trade no good. Unless a warm spell strikes up within a day or two primroses and mignonette plants, which are much sought after for inexpensive gifts will hold up their pretty heads on the greenhouse beds instead of gladdening the eyes of some little tot.

We of the Queen City of the Plains take pleasure in extending holiday greetings to our esteemed neighbors with the wish that florists one and all may have a very Merry Christmas and a Happy New Year.

Wyncote, Pa.

Whether it had been named after Queen Elizabeth or after some Quaker maiden, the fact remains patent that Mr. Heacock's seedling carnation is a beauty and the Craig silver cup awarded it at the Pennsylvania Horticultural Exhibition was a trophy well merited. Elizabeth is without a doubt one of the finest specimens of recent introduction. Free and vigorous, with a stem as long and as perfect as they make them in "La France." Such are its chief characteristic features.

A few steps farther and we found ourselves in the palm houses. It was a treat long to be remembered and it would be almost impossible to deseribe the sight without arousing the reader's suspicion of exaggeration. Areca lutescens and Kentia Belmoreana by the thousand; the former especially are in exceptionally fine condition, showing vigor and careful treatment. There are specimen plants, medium sized plants and small plants,—plants to suit every taste. HOMO.

Utica, N. Y.

The indications are the trade will be equal to, if not better, than last year. The warm weather experienced during the past month used up stock intended for Christmas trade, and as a consequence good stuff of all sorts will be scarce. From the way specimen plants are being picked up it bids fair to be a plant year. The market seems to be well supplied with good palms, rubbers, specimen ferns, some good azaleas, lilies, etc.

The bulk of trade in holly and Christmas greens in general seems to be done by department stores. They sell it in all ways from two for five to 29 cents. One of these same concerns offered to supply a florist at $2.75 per case, when it is advertised in trade journals at $4 to $5 per case, size not stated. As yet there are no novelties visible either in plants or bloom.

Roses will be in short supply, with carnations a good second. Violets are in great demand, with a limited cut. From the number of calls from the trade out of town I judge we are not alone in being in short supply.

F. E. Shaw, of Sunset avenue, has opened a handsome store in the Clarendon building. It is well located just off the principal street and should attract a good trade. A very large show window affords opportunity for making a good display.

Visitors in town: Mr. John Barclay, representing Elliott, New York; Mr. J. C. Grems, Oneida, N. Y.; C. B. Humphrey, Rome, N. Y. F. J. B.

Begonia Gloire de Lorraine versus Begonia Gloire de la Reine.

Your correspondent writing under the nom-de-plume of S. Dale in a recent issue of THE FLORIST, in referring to this beautiful begonia, laments the fact that it was exhibited at the Philadelphia show under the wrong name of Gloire de la Reine and even goes deeper; he fears that this may have been done with the intention of leading intending purchasers astray, so as to prevent them from being able to find it in any but the exhibitor's catalogue. As the guilty man in this case I can only join S. Dale in throwing up his hands in horror at the careless manner in which botanical nomenclature is handled (this time it unfortunately includes myself). I can only say in extenuation of the circumstances connected with this that the error was made in the rush of getting a very large exhibit ready, and that the writer unfortunately did not discover it until the last day of the show, too late to rectify it.

I would further state that the concern represented by the writer is not offering this begonia in its catalogues and has none of it for sale, and its methods of doing business being known to nearly everyone of your readers, it will cheerfully let the matter rest with them as to whether dishonest motives were connected with the mistake or not. J. D. EISELE,
Of Henry A. Dreer, Inc.

MR. FREDERICK ROEMER writes us regarding white Gloxinias: "Snow Queen or Alba, as it is called, has been cultivated here for several years. It is a pure white with yellow throat. It comes quite true from seed, is hardy, quick growing and early flowering. The new Scarlet Queen should also be mentioned; it is a grand variety with the crassifolia leaf.

NEW CARNATION

W. P. SIMMONS & CO.

Make the following statement to the readers of the American Florist.

As originators and introducers of
"Silver Spray,"
"Tidal Wave,"
"Daybreak,"
and "Rose Queen,"

each of which has, we believe, proven even better than we claimed for them. We NOW say for 1898 that

"Mrs. S. A. Northway"

possesses all the good points that go to make up a first-class and profitable cut flower sort, and that we introduce it with even more confidence than we did the others.

It is an extra strong grower.
It is free from rust or disease.
It is a profuse bloomer.
It has exceedingly strong stiff stems.
It is of exquisite form full and double.
The flower is high built, petals serrated.
The calyx does not burst.
It is delightfully fragrant (a quality lacking in many new ones.)

OUR PRICE LIST now ready, contains prices on many other plants. SEND FOR IT.

W. P. SIMMONS & CO., Geneva, Ohio.

LAMBERT BROS. 555 E. Fair St. Atlanta, Ga.

Columbus, O.

BUSINESS OUTLOOK BRIGHT.—ATTRACTIVE PRINTING FOR FLORISTS.—ROSES PERFECT AND PLENTIFUL.

It is most gratifying to note that even the most rabid of pessimists have somewhat relaxed their harping on "these bad times and goodness knows what is going to happen" them. Never in the history of this city was the business outlook brighter than it is to-day. Capital and labor are both well employed; factories are in operation, men are at work.

The general business conditions being most favorable, it goes without saying that the florists will reap some good fruit. Christmas orders are being booked quite freely and the indications are that the volume of business this season will surpass that of a year ago by a good margin.

The power of the printer's ink seems to be no longer questioned, even by the most conservative element in the craft; it is being more and more recognized as a potent factor in these days of keen competition and general "go-aheadness."

Messrs. Livingston's Sons' attractive little folder, enumerating the various plants suitable for Christmas gifts, etc., is replete with many good and seasonable suggestions; a thing of this sort is worthy of emulation.

At the Franklin Park Floral Co.'s establishment hustle and bustle seemed to be the order of the day during my recent visit. Notwithstanding the rush, however, the usual hearty welcome was extended to the scribe by the genial Mr. Knapp, that practical philosopher and all-around happy mortal, with whom, to use Emerson's words, "all things swim and glitter." It was a treat indeed to go through the houses and to behold things in their glitter. The roses and carnations are all that is claimed for first-class stock.

No rust, no disease of any kind, no complaint, no "kick coming." Mr. Knapp is especially enthusiastic over his house full of Carnots. These roses are perfect and are splendid sellers.

Mr. S. F. Stephens reports a general improvement all along the line. Mr. Stephens, among other things, grows a large variety of bedding stock. HOMO.

STATE OF TRADE.—VARIOUS WINDOW DECORATIONS.—BAD WEATHER MAKES GOOD PRICES BY SHORTENING THE SUPPLY.

The holiday season is upon us, but the store men are generally non-committal so far as giving comparisons between this and preceding seasons is concerned. About the most definite expression that can be obtained is, "Well, trade is fair and prospects are encouraging," or, "it is too early yet to say what trade is going to be, but we are having our usual orders," or, "Prices are about the same as usual," or some similar mildly optimistic remark.

The stores are mostly decorated, and some of them very prettily. At Saml Feast & Sons' the large window was carpeted with selaginella; several fine specimens of oranges, cyclamens, cypripediums and erica being arranged to show up through it, with a large Harrisii at each side. Asparagus climbed up the corners and festooned the ceiling of the window and the space between the tops of the plants and the ceiling was rendered attractive instead of vacant by having a dozen fine Adiantum Farleyense in gilt ornamental pots suspended at irregular heights and intervals by wires so fine as not to show. The ferns, which were from five to six inch pots, and very well furnished, seemed like globes of feathery green and made a very pleasing effect.

John Cook had orange plants full of fruit showing through southern smilax all the way up one side of his window, a mass of cypripedium insigne at the bottom and a beautifully grown balloon of Asparagus Sprengerii at the back. Wm. J. Halliday had his entire store transformed into a bower of green by covering the ceiling with southern smilax, which with the palms and potted plants around about concealed the straight lines of the interior completely.

Several stores have postponed their decorations till later in the week, either to have them fresh for Christmas Eve or on account of the bad weather on Monday.

The weather has been badly against bringing Christmas stock to perfection, and the able grower who has succeeded in producing first-class flowers, in spite of the clouds and rain of the last two months deserves the good prices and brisk demand that he is finding this week.

MACK.

Other Roses in a Kaiserin House.

What red and pink roses can we grow most successfully in a house with K. A. Victoria for summer and fall bloom, grown in solid beds, year after year, and kept cool in winter?

The K. A. Victoria have done well for us this year; they are planted in the north beds of a house 30 feet wide, with the north slope slightly longer than the south. We wish to plant the front and middle beds to red, pink, and perhaps a few yellow roses, and have thought of Beauty and Testout; would they do? Would La France or Bridesmaid be better or freer than Testout? What would Meteor do under these conditions from May to December? What would be best for a few yellows?

The house is high, dry, light and well ventilated.

HOYT BROS.

For solid beds and such high houses I should think American Beauty would be the red rose to grow, as it will sell anywhere if any variety can be sold. Meteor is a splendid summer rose; the only one perhaps of its class and color, but I have found that it is liable to make too strong wood when its roots have the unlimited freedom of a solid bed; very strong bottom shoots seldom produce a well-shaped or finely-colored flower, even during the hottest summer weather. This may seem strange, but it is a fact all the same. Meteor is at its best on a raised bench, in a very light house, not very far from the glass, and occupying the whole structure, so that it can have a little fire on cold nights, when other varieties may not need any.

Should past experience show that your soil is adapted to the growing of Testouts I think it would, when established, prove very satisfactory if given the south side bed, where it will be fairly close to the glass. After being rested naturally through the winter, pruned, and started slowly like a hybrid, it makes luxuriant growth and blooms most profusely. Fine Testouts will always sell summer or winter.

On the other hand, when Bridesmaid is handled properly, old and strong plants will give finer blooms in the summer than many growers cut in winter. Why not try for pink, both Testout and Bridesmaid? La France, except when it does exceptionally well, comes too washy, and ordinarily is neither a good grower nor a good seller.

As a yellow for summer work, Perle is without a rival, given a solid bed, plenty of room and liberal treatment; and it will grow and bloom more freely than any other rose that I know, and prove satisfactory in every way. ROBT. SIMPSON.

Los Angeles. Cal.

BICYCLE ACCIDENT TO B. F. COLLINS.—LIGHT FROSTS.—ORANGES PROMISE WELL—GENERAL NEWS AND PRICES.

B. F. Collins met with a serious mishap a few days ago while riding his wheel. He was bruised considerably, which will keep him housed up for a week or two. During his disability his business will be attended to by his able assistant Miss Sexton.

On the low grounds in some sections in and near the city the frosts of the past two weeks have killed the tender stuff and the cold weather generally has caused a scarcity of nearly all kinds of flowers.

Several parties are planting Roman hyacinth (imported) sets, to see if they can be profitably grown here for the eastern trade.

Mrs. Whittlesey, of Boyle Heights is cutting some fine Gontiers and other roses as well as poinsettias for our city stores. Mrs. Whittlesey has frostless ground and grows all in the open, and cuts roses all winter.

Fred. Rafferty, of Santa Ana is sending in some fine Farquhar violets.

Violet Princess of Wales is in demand here; it comes into bloom earlier than the California.

The great specialty of the Redondo Beach Floral Co. is carnations. The company is pushing ahead and will plant ten acres of young carnations within the next few months.

At the last meeting of the Los Angeles Florists' Society, Mr. Scharff of the Paradise Nurseries, Pasadena, read a very interesting and instructive essay on the eucalyptus which was greatly appreciated.

If rain does not come soon some fields of freesias will suffer and parties who are now quoting prices for large size bulbs will be unable to fill contracts.

While six degrees of frost is acknowledged in some places in the citrus belt no one will confess to any damage to the orange crop which is estimated at 12,000 car-loads of 330 boxes each.

Capt. F. Edward Gray, of the Ingleside Nurseries is about finishing another greenhouse 20x125 feet. This to be used mainly for carnations. In addition to this, during the summer, he built one lath and three cloth houses. From his carnation field he is cutting 4,000 to 5,000 daily. This is not enough to supply the demand at his handsome store 140 S. Spring street, Los Angeles.

Ruling retail prices on cut flowers, roses, 40 cents to $1 per dozen. Carnations, 15 to 20 cents per dozen; violets, 15 cents per bunch of fifty; poinsettias, 10 cents per head. D. R. WOODS.

St. Paul.

Trade has been fairly active with all kinds of cut flowers in good demand. While the supply has not been large, it has about kept even with the demand, and good stock has sold readily. Beauties have been eagerly sought after and though prices have been soaring upwards for several days, still price appears to be no object if good blooms can be obtained.

In the line of greens trade is very good. Prices, especially on lycopodium, are very low, while stocks are large. Advance Christmas orders are coming in freely, and the country trade will be exceptionally good. Shoppers are numerous and inquiries plentiful, though actual sales are a little slow. But as trade is better in all lines than last year, the florists will undoubtedly be twice glad before the end of the week. Glad to see the orders come in, and glad when the last one is delivered on Saturday.

The weather during this month has been more favorable than usual for December, and a good crop for Christmas is in evidence at nearly all of the growers' places. There is also a good supply of good plants and these will sell readily. The tendency among buyers is to buy more plants, greens, etc. and fewer cut flowers at holiday times.

L. L. May & Co. have a fine display of azaleas, lilies, primroses, cyclamen, etc. The large conservatory in connection with their store affords ample room for showing their stock to customers.

Holm & Olsen on St. Peter street have a nice display of potted plants and greens and report business very satisfactory.

Vogt Bros. have three stores during the holidays and are kept very busy with their green trade. Christmas trees are in evidence on every street corner In every vacant lot, at many of the grocery stores and on the market. This branch of the trade is not handled by the florists.

C. F. Haupt, the west side florist has a fine house of violets, and quite a large number of 'mums, kept cool and held for the Christmas trade.

R. C. Seeger another of the west side growers has a fine house of roses just in crop. His Brides and Bridesmaid are among the finest in this market. Mr. Seeger also grows carnations, violets, etc. as well as a general line of bedding plants. Every inch of space in his houses is utilized to advantage—a feature which more of the growers should imitate.

FELIX.

Chrysanthemum Frank Hardy

The SENSATION Of the Season.

Certificated by the committees of the Chrysanthemum Society of America at New York, Chicago, Boston and Philadelphia.

First prize among whites wherever exhibited. The best mid-season white to date and indispensable to every grower whether for exhibition or the cut flower trade. Plants ready March 1st and orders filled in rotation.

Price, per plant, 50c; per dozen, $3; per 100, $20; per 1000, $150. 25 at 100 rate. 250 at 1000 rate

A. HERRINGTON,

Florham Farms, - MADISON, NEW JERSEY.

The Yellow Fellow

Winner of the $100 high grade Stearns Bicycle Prize in a strong competition. It gives a large, graceful bloom under ordinary treatment and can be grown a "whopper" for exhibition. Bud tinted bronze, maturing rich bright yellow; constitution ironclad. Mid-season variety. 50 cts. each; $3.00 per dozen

Wm. H. Chadwick

A phenomenal seedling, the grandest of the year. A star production. Certificated at Chicago, Boston, New York and Philadelphia. An immense, graceful incurved bloom, waxy white, occasionally tinted pink. Growth, habit, stem and foliage simply perfect. Mid-season or late. Anybody can grow it satisfactorily. It cannot be praised too highly. Per single plant, $1.00; $8.00 per dozen.

Madeline Pratt

Certificated 1896. Named for the sweet little miss on the Chrysanthemum certificate; snowy white, high built bloom. A very beautiful flower. Early mid-season. Best four terminals grown cool. 35 cts. each; $2.00 per dozen.

Strong, healthy young stock from 2½-inch pots distributed March 1st. Advance orders already numerous.

VAUGHAN'S SEED STORE

14 Barclay St., NEW YORK 84-86 Randolph St., CHICAGO

A Word to the Boys.

You are starting now, as I understand, for the first time in actual business. A few words of advice from one who started in the same position you now hold, many years ago, may be worth your listening to.

Remember that you have sold something to your employer and are bound as an honest young man to deliver what you have sold. You have sold not merely, certain hours of your time, but you have sold your best thought and your best efforts, not limited by hours, nor circumscribed by rules. When the day comes that you can no longer give to the business with which you are connected the best that is in you, then, if you are honest and upright, as I take you to be, you will at once sever your connection with that business. Carelessness, inattention to duty and the shirking of work are forms of dishonesty only a little less in degree than the stealing of the goods of your employer.

Before beginning any work make sure that you understand fully what is required. Having a full understanding of this, let your first effort in all cases be to accurately execute it with careful attention to the smallest details. No matter how slow the work goes at first, be sure it is done right. As you become more familiar with it, you can work more rapidly, but remember that always and everywhere, accuracy is of many times more importance than speed.

If the work gets ahead of you, do not get excited and nervous, dropping one thing unfinished, for another. Keep steadily at it, finishing each matter before taking up another. Steady work wins over hasty work, every time.

If your work is done for the time being, don't stand still and wait for some one to tell you what to do next. Find something to do.

Keep your eyes open and learn every detail of the business. When you can do so, without neglecting your own particular work, help someone else. The other fellow will appreciate it, your employer will appreciate it and you will learn something new.

Be prompt in beginning work in the morning and not too prompt in quitting at night. Even if it is already quitting time it will do no harm to ask the "Boss" before you put on your coat, "Anything more to-night?"

Keep your wits about you always, and don't go to sleep over your work. Don't lounge and don't slouch when you walk.

Be accurate in your statements, don't be afraid to ask about what you don't know of your own work, but for other questions, choose a seasonable time

Above all things, don't lie. B. JONES.

[Mr. Jones says he will have something to say to employers, too, one of these days.—ED.]

Red Cedar Benches.

Visitors to the establishment of Mr. Richard Witterstaetter at Sedamsville, O., this summer while his new houses were building, noticed that he was using red cedar for benches if they were not too much absorbed in taking notes of some of his new wrinkles in greenhouse building, or in casting envious eyes on a field of Evelina. He writes as follows: "In regard to the red cedar lumber it is just double in price that of white pine. The grade I used was $35 per 1,000 feet White pine 3rd common here sells at $17.50 per 1,000. It lasts about five times as long, judging from the bench I have had in use for six years. The boards in question, if a jack plane were run over them would show a light surface, the only decay being on the end, where the side upright board passes the ends of the bottom. This I have overcome in my new houses by placing the side upon the bottom beds. The decayed ends amounted to about an 1/8 of an inch on each end. The only trouble with it is to get the right length to cut to, as it runs from 7 to 14 feet long and from 4 to 8 inches wide.

Blooming of Marechal Niel.

On page 474 of the issue of December 11 "Subscriber" asks what to do to make his plants bloom. In reply Mr. Simpson has given some good sound advice; but as the plants may possibly be in a house where it might be difficult to follow that advice without injury to other inmates of the same greenhouse, the following treatment may help subscriber, and certainly will make his plant bloom if he goes about it with reasonable intelligence. If, as he says, the plant has made strong vigorous growth, and he has not cut it back for sometime past, start by gradually withholding water at the root and after four or five weeks of this treatment, he will on examination find the eyes on the older part of the strong shoots considerably more prominent than they were at the start; the withholding of the water at the roots will also somewhat check the rapid growth of young soft foliage and wood, but not altogether Of course it will not do to withhold the water to the extent of making the wood shrivel, and it may be necessary to syringe the foliage over head occasionally to keep down red spider and other insects; by a little careful watching all these things can be avoided and yet have the wood somewhat hardened off and the eyes somewhat more prominent in four to six weeks. When this is accomplished, examine the strong shoots carefully to find the last good plump eyes nearest the young growth; at this point give the shoot a twist of two or three turns; this will enable Subscriber to double the top of the shoot back very easily so that it forms practically a letter V with the soft top hanging somewhat lower than the better matured part of the shoot; serve every shoot on the plant the same way. This will check the flow of sap and throw it back into the eyes on the older wood without giving any severe check, and diverting the flow of sap to making new growth only from the ends as is nearly always the case with Marechal Niel when pruned back without having the wood previously thoroughly ripened off.

When I used to grow this rose in houses with other teas I could always insure getting a good crop of this glorious rose for Christmas, and by careful calculation could get another good crop by first of April. It takes at this season of the year five to six weeks to get the plants into the right condition to treat as above. As soon as all the shoots are twisted, bent back and tied in position, start in gradually watering at the root, light at first, with plenty of syringing of the stems and foliage, and in about three to four weeks the buds will begin to show. As soon as you are satisfied the buds are set which they will at every eye, the plant should have liberal treatment of moisture and some liquid manure at the root occasionally. Should any eyes break into new strong growth instead of buds, twist and double back as soon as long enough to do so. This throws the whole strength of the plant into the buds instead of the young shoots.

Presuming that the treatment has been a success, as soon as the crop of buds are cut, the tops which were doubled back should be cut clean off where twisted, and the plant allowed to make another growth. This time the shoots will not be so long, but will be more numerous as the eye next to where each bud was cut will usually start into growth and make a stout wiry shoot. As soon as it is two or three feet long the same treatment recommended for first crop should be resorted to, and another good crop of flowers secured before the summer heat is too great. After the second crop is cut, the summer weather can then be used to advantage to give the plant a good rest, after which all the small useless wood can be carefully pruned out and the good wood left for future use.

This, in my experience, is all the pruning or cutting back proper any climbing rose should ever have, and if carefully followed will give the best results in blooms

A short time ago, I received a letter from a "Working Gardener" without any other signature, asking questions to be answered.

I must respectfully decline to answer any correspondent who does not sign his name. I cannot say anying about it unless the party writing said letter signs his name, the same of course to be treated as a matter confidential between himself and myself. I take this means of answering "Working Gardener," so that he will know the reason why he has not been otherwise answered. JOHN N. MAY.

Chrysanthemums—Petals Turning Brown.

ED. AM. FLORIST:—Can some one tell why every bloom on our Indiana 'mums turned brown and mouldy just before they were ready to cut? Otherwise it promises to be a valuable variety with us, on account of its beautiful color and lateness. We are running our houses with only a little heat on account of Mrs. J. Geo. Ils, which is our best and latest 'mum, being in prime at Christmas and a grand variety, barring a little weakness of stem. A. R. M.

Larchmont, Wash.

It is always very hard to diagnose a serious ailment a thousand miles or more away, and especially so in this case, as the turning of petals to a brown, as if burnt, or the petals looking as if mouldy or rotting, may result from two or three causes. The most frequent cause, however, is over-feeding, or feeding with too strong stimulants, after the flower has begun to show color. It may also be caused by a very warm, hot sun, following two or three cloudy days, the plants during the dark weather make a soft growth, and a blazing sun causes them to wilt and burn. Another cause is damp houses at night, shut up close, and not thoroughly aired. There are many red and pink varieties, Indiana being one, and a few white which are much given to this complaint and need careful attention, but, generally speaking, anything that tends to a soft growth, places the plant in a condition that the petals become easily burnt. E. A. WOOD.

BRUNSWICK, MAINE.—Mr. Jas. Dennett died on Tuesday, December 14, at the age of 69 years. Mr. Dennett established the first hothouses in this town many years ago.

ANXIETY AS TO CHRISTMAS TRADE.—DEATH OF HENRY E. BOARDMAN.—ASSIGNEE WING'S REPORT.

Flowers of all descriptions are none too plentiful, and some anxiety is felt in many quarters as to the supply for Christmas, but it is too early to predict anything concerning either their quantity or quality. The week passed without any specially brisk demand, excepting two or three little dinners which called for table and hall decorations; our florists, however, have reason to anticipate a good trade for Christmas; orders came in early this year, and many sales in plants have been made for a week or so, while in former years nearly the whole bulk of the trade had to be done in the last two or three days. The stores are all well stocked with plants, arranged into large banks and in the show windows, every space is utilized for their accommodation, even the spacious stores of Salter Bros. seem to be too small on such occasions, while all the rest of us have to submit to circumstances as best we can. We hope that every one of our florists, be he engaged in the retail or the wholesale business, will have no cause to complain of a poor Christmas trade; all should enjoy a liberal patronage so that their minds will be glad and their bank accounts show the balance on the right side, then they may have really a merry Christmas.

On December 14 Henry E. Boardman, who formerly was in the nursery business in this city, but who in later years devoted his time entirely to the breeding of Holstein cattle, died at the age of 57. Both he and his father before him were well known nurserymen in years gone by as many of our older associates will remember. The original nursery and the greenhouses have disappeared years ago; streets were laid out and residences were built up so that nothing whatever remains now to remind us of the once well kept grounds, save a few old specimen trees which escaped destruction. A wife, a son and a daughter survive him, also one brother, S. R. Boardman, who resides on North Manitou Island, Lake Michigan.

W. S. Wing, the assignee of Fred. S. Young, the nurseryman, filed his report on December 15, in the county clerk's office. The accounting shows a balance of $647.61 to be divided among the creditors. J. B. K.

SPOTS ON ROSE LEAVES.—Answering A. S., Marietta, O., the spots on the leaves are not lice as you suppose and will do no harm, except disfiguring the foliage. The fresh cow manure is the cause. It develops a small round fungus, clear, with a black spot in the center. This fungus explodes, sending the black part up in the air to fall on the leaves as it comes down. It is very sticky and attaches itself firmly to whatever it touches, soon hardening. If A. S. will look carefully across the bench when the sun is bright, he will see this operation plainly and can hear a very slight noise connected with it. The best remedy is to remove the manure at once and replace with a mulch of, at least, partially decomposed manure. Perfectly fresh cow manure should never be used as a mulch for a bench of roses not dormant. Your trouble, I fancy, if the mulch is left as it is, will get worse for about a week and then decrease and be practically over in about two weeks more. X.

87-91 Plymouth Place Chicago.....

Tiffin, O.

But few cities of this size can boast of as large a greenhouse plant as that owned by Mr. Lewis Ulrich. The plant covers five acres of ground, two-thirds of which is under glass, while more houses are being contemplated for the near future. The history of Mr. Ulrich's business is rather interesting.

Some twenty-two years ago he conducted a prosperous drug store; the love for flowers and plants with both him and his venerable mother amounted almost to a passion, and this led him to erect a small lean-to back of his store: as years passed on the place was enlarged; until, in 1882, the first two houses, known as No. 1 and 2, were erected in their present location, on Sycamore street. The demand for flowers, both locally and from the surrounding towns and villages, induced Mr. Ulrich to dispense with his drug store and to embark in the greenhouse business. In 1884 the increase in business made it necessary to erect a third house, and a year later a fourth one was built. Little by little the place continued expanding until in 1892 we find Mr. Ulrich managing fourteen well built houses in a manner that would have been a credit to one "born amid flowers."

All of the fourteen houses are built in the most approved manner, fitted up with all the necessary appliances and given perfect ventilation and heating facilities. Order and system obtains everywhere. Roses, carnations and violets of the best standard varieties are grown with marked success, though plants and bulbous stock receive their share of attention. Among the latter Mr. Ulrich has a novelty in the way of a dwarf calla, which he grows in 3-inch pots and of which he has about 4,000 plants. The entire stock was raised from a plant which his mother obtained about twenty years ago.

If there is one place in the establishment which Mr. Ulrich takes more pride in showing than another, it is one of his large carnation houses. This house covers 50x100. It is reached by way of the boiler room and is rather unique in its construction. Pipe purlins hold up the roof, and these in turn are held in position by pipe posts. The north wall is 9 feet high, and over this extends a Marechal Niel rose bush, bearing thousands of flowers. The south wall is 3½ feet high, and as the ground has a natural slope of 4 feet, the roof slopes 9½ feet. The carnations are planted in solid beds, with walks dug out between them to give head room in the lower part of the house. It is a splendid house, well adapted for the purpose of growing carnations.

Business conditions are favorable and the stock looks fine. HOMO.

Duty on Spoiled Bulbs.

I would like to see an expression of opinion in the columns of the AMERICAN FLORIST on certain features of the tariff law now in operation. I refer especially to the collection of duty on bulbs arriving in a rotten condition.

Undoubtedly all importers, as well as myself, have had already costly experience in this direction. I had in recent shipments about seven thousand white Roman hyacinths which arrived completely spoiled, and upon which I had to pay duty before learning the condition of the goods. The bulbs having been bought f. o. b. on the other side, I am out not only the cost of the bulbs but also the duty, which seems to me a great injustice. The tariff is based upon the value of marketable goods, and when only decayed and worthless stock is received there surely should be some provision in the present law whereby the duty paid on such might be returned.

I would like to know the opinions of other importers on this subject. By concerted action it might be possible to get an amendment to the above effect added to the tariff regulations. J. L. S.

SPECIAL efforts are now being made to make the American Florists' Directory complete in every detail. Florists, nurserymen and seedsmen of the United States and Canada will find it to be of great value. Advertising rates will be furnished on application.

Kraft's Plant Tonic

FOR
PLANTS, PALMS AND FLOWERS

A Wonderful Preparation for the Promotion of Plant Life, Destruction of Insects and Scale.

This is one of the greatest preparations for the use of Florists and Plant Growers ever compounded. It gives to the foliage of plants treated the bright, fresh color of healthy, growing vegetation. It destroys all insect life infecting the plant and eradicates scale.

Besides improving the color of the plant, it effects a general betterment of its condition, aiding nature in disseminating and retaining the sap and life of the plant. The Tonic makes the foliage of the plant soft and pliable, and a beautiful bright green.

For sale at Price per bottle, 25 cents.

English Advertising.

ED. AM. FLORIST. English horticultural journals have so often commented upon the exaggerated descriptions and advertisements in American catalogues that it may be well to call their attention to the following advertisements which has been running for some years in one or more garden papers. Kindly note that the advertiser is a F. R. H. S.

NEW AND RARE ROSES!!!

A rose with flowers 2 feet in circumference, a rose with perfectly green flowers, a rose nearly blue; the 3 for 5s. Pure white Perpetual Moss, pink and nearly black; the 3 for 3s. Fairy Roses, bloom in clusters, white and pink, 1 each, 2s. Japanese Roses, seldom seen, very beautiful, white and crimson, 1 each, 2s.

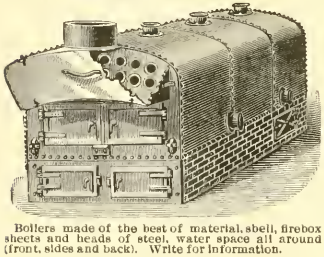
THE CARTWHEEL FLOWER!!!

White flowers, 3 to 4 ft. across; grand foliage, 12 ft. high. Plant in the open now for next summer. Strong bulbs, 1s. 6d. each; 2 for 2s. 6d. Seed 1s. 6d. and 2s. 6d. per pkt. Fuchsias, large as teacup, white, blue, yellow, the 3, 2s.; all free.

I. GOODY, F. R. H. S., Belchamp, Clare, Suffolk.

This beats "Stanley's Wash Tub."

B. A.



Harrisii Lilies.

My L. Harrisii are from 4 to 5 inches high and are in rose house temperature 58° to 60° night, 68° to 72° daytime; will they be in time for Easter, or are they too far advanced? You will kindly oblige by giving me a few points as above.

I. H. A.

Replying to I. H. A. would state that his lilies should bloom in advance of Easter somewhat, but it is always well to have the plants forward rather than backward, as they are easily held in check by reducing the temperature and giving plenty of air. B.

Economy in Boilers.

Your correspondent H. H. R., in using seven vertical boilers, is certainly consuming much more coal than the present profits in vegetable growing warrant, and his bill for labor must necessarily be on the same proportion; therefore his idea of heating all the houses from one central point is well founded. In the diagram accompanying the inquiry the levels of the several houses are not indicated, but assuming that the 10 feet wide houses are the lowest, the cellar connected with them would be the proper location for the boilers, of which there should be two, one only being fired during mild weather and both in severe weather, and also that in case of accident to one boiler the second could carry the houses along until repairs could be made.

I would suggest a continuance of the hot water system of heating, but to have it so arranged that it can be run under pressure in case of an unusually cold snap; the 4-inch cast iron pipes now in use, if of the standard greenhouse pipe pattern, can be utilized in the rearrangement.

The boilers should be placed side by side and connected together by means of 6-inch mains, from which a 4-inch main would run south along the connecting passage to the central 10-foot house where it would reduce to 3½ inches; a 5-inch main from the boilers north to the 20-foot house, thence west a 4-inch main to the three 18-foot houses, the main running across the 20-foot house being 3½ inches. In order to avoid any misunderstanding I would state that the sizes of the mains are in all cases intended as inside diameters.

I should judge from the manner in which your correspondent's plant has increased from time to time, that he is progressive, and that extensions are likely to continue, and would therefore advise that he put in boilers having an ample surplus of capacity, and even should the extensions not materialize, the surplus capacity would mean economy of fuel, also that he make his chimney flues, of which there should be two, not less than 16 inches square.

HENRY W. GIBBONS.

Simplicity in Greenhouse Construction.

During our long experience we have not only made many improvements in greenhouses, but we have so simplified the construction that building a greenhouse is no longer a matter so full of complications as to tax the patience and the ingenuity of even the most intelligent mechanic. Our

Clear Cypress Building Material

is worked out in the best manner ready to be put up, and we furnish our customers such complete detail drawings that any workman of only ordinary capabilities can put it up correctly.

THE CHRISTMAS TRADE.

Advices received from all important trade centers in the United States and Canada show a remarkable increase in the Christmas florist trade over last year. A conservative summary of these reports shows an increase of 20%. A decreased business is reported from less than 5% of the centers heard from.

Retail prices are reported the same as last year by 60%, increased over last year by 35%, and decreased by only 5% of the correspondents.

Increased demand for plants, especially flowering varieties, was stated in 75% of the reports, equal demand in 12%, and a number of the reports showing a falling off attributed it to unfavorable weather.

Carnations are evidently coming to the front. In 50% of the reports increased demand, running from moderate to phenomenal is shown, especially for fine stock. No decrease reported.

Roses have about held their own. As to other flowers reports vary so that no general increase can be shown. The same is true of green and holly.

We give below a portion of the reports received:

LANCASTER, PA.—Retail trade here was in excess of supply all around.

RICHMOND, IND.—Supply short, with quality about the same as last year.

BIRMINGHAM, ALA.—Prices much higher; supply short; quality not as good; profits small; increased demand for plants.

TERRE HAUTE, IND.—Sales heavier; prices about the same; supply short; quality better; larger demand for plants.

CINCINNATI, O.—Better sales and better prices; short supply of flowers; increased call for Meteor roses, cyclamens, fern dishes to be filled.

TRENTON, N. J.—Prices about the same; collections slow; supply equal to demand; quality about the same; falling off in demand for plants.

DAVENPORT, IA.—Sales 10% greater than last year with prices about the same. Supply short and quality off. Increased demand for plants.

LOUISVILLE, KY.—Total sales increased about 10%; retail prices the same; supply equal to demand; quality equally as good; increased sale of plants.

BOONVILLE, MISS.—About 25% decrease; prices a little better, with supply equal to demand; bought less; increased call for violets; hardly any demand for plants.

LA CROSSE, WIS.—Total sales 25% larger with higher prices; supply short. Bought more and sold at fair profit. Increased demand for roses and plants.

NEW LONDON, CONN.—One-third greater sales with retail prices about the same, enough stock for demand; increased call for plants in bloom and cheap palms.

PITTSBURG, PA.—Increased sales, averaging 30%; retail prices about the same, with supply equal to demand; quality as good. The cold weather affected the sales.

PROVIDENCE, R. I.—Total sales about the same; with little change in prices; supply equal to demand, and quality not so good; bought more; much white stuff left over.

ST. PAUL, MINN.—Perhaps 10% increase; retail prices about the same; supply equal to demand; quality not as good as last year. No special flower called for; no demand for plants.

MINNEAPOLIS, MINN.—Did not differ from last year to any great extent; retail prices somewhat higher; supply short; quality good. Increased call for carnations, violets and red roses.

MUNCIE, IND.—Trade was much better than last year; sold more greens and holly; the merchants did more decorating; palms sold well. Trade was better than during any of the past four years.

WORCESTER, MASS.—Little difference in sales, with prices a trifle higher, and supply short; quality the same; increased call for carnations, violets, and plants; holly sold better, mistletoe not so good.

LAWRENCE, KANS.—About 10% greater than last year, with little change in retail prices. Supply not equal to demand, and no call for any special flower; not much demand for plants.

DAYTON, O.—Sales equal to last year with prices about the same. Supply short; quality finer. Increased demand for carnations; decreased demand for plants. Dark weather caused light cut.

DENVER, COLO.—An increase of 40% with retail prices about the same; everything cleaned up but no shortage; wholesale prices higher, bought almost nothing; decorative plants sold more largely.

COLUMBUS, O.—Total sales about 20% less; slightly higher prices, with ample supply; stock good as a rule; violets and carnations in great demand; plants about the same. The trade was not very satisfactory.

NEW BEDFORD, MASS.—About 25% increase over last year; retail prices a little lower; supply short, except roses; quality better if anything; increased call for violets and plants, trees and Christmas greens.

PEORIA, ILL.—About same as last year. Retail prices 10% higher for carnations, but not for roses. No marked increase for any special flower. The extreme cold weather no doubt hindered sale of plants, holly and greens.

SPRINGFIELD, MASS.—Sales equal to last year; retail prices lower, supply short except bulb flowers, and quality not as good; more demand for violets and red flowers; heavy call for greens, which sold at better prices.

NASHUA, N. H.—Fully 50% more sales with prices about the same; stock equal to the demand and of better quality; increased call for carnations, plants and Christmas greens, the supply of wreaths being all cleaned up.

HARRISBURG, PA.—Slight increase, with retail prices about the same. Supply short, and quality not quite as good. Probably 20% increased demand for plants. The trade was very fair, laurel and holly selling well.

NEW HAVEN, CONN.—About the same sales and prices; great scarcity of red flowers; increased call for azaleas, primulas, and pans of hyacinths, also for all varieties of plants. Unusual demand for something cheap and showy.

BLOOMINGTON, ILL.—Volume of trade 20% better than last year, with retail prices the same; the supply not equal to the demand; quality about the same; increased call for carnations; demand for plants about same as last year.

WASHINGTON, D. C.—Total sales 15 to 20% greater; retail prices higher; supply short, with quality not so good; increased call for violets, American Beauties and orchids; large increase in demand for plants which sold at good prices.

YOUNGSTOWN, O.—Increased sales with prices a little higher; supply short; quality better; bought more, all sold at a profit. Increased call for carnations. Plants were more in demand. More greens sold than in previous years.

OSKALOOSA, IA.—Total sales about the same as last year. Prices same as last year. Supply equal to demand, quality better than last year. Increased call for carnations, holly and greens, less demand for roses. Plant trade same as last year.

ADRIAN, MICH.—About 10% advance over last year, the supply not being equal to the demand; stock superior in quality. Increased call for violets and choice carnations, especially red; also for all potted plants, particularly palms and azaleas.

LONDON, ONT.—Total sales 20% greater, with prices about the same; could have sold twenty times as many roses and carnations; could not buy at any prices; decided increase in sale of plants, probably on account of cut flowers being so scarce.

NORTHAMPTON, MASS.—An increase of 10%, with retail prices about the same; supply short; roses a little off color, other flowers fully as good in quality; not half enough carnations; every plant in bloom was quickly sold; big sale of holly, little call for mistletoe.

MILWAUKEE, WIS.—Actual figures show an increase of 20%, with prices a trifle higher; could not get all we wanted; quality about equal; purchased more, sold more; apparent increased demand for plants, but insufficient supply renders it difficult to measure.

CLEVELAND, O.—About 15% increase with retail prices ruling the same; supply of flowers barely equal to demand, but of a very fair quality. Bought no more; did not find wholesale prices lower. Carnations sold better. Increased call for plants. No peculiarity.

BALTIMORE, MD.—Slightly better in stores; worse (owing to weather) in markets; a little better prices obtained; supply apparently equal to demand; much greater call for holly; immortelles were slow and difficult sale, galax leaves with a few flowers are taking their place.

Fred. S. Walz.

Richard Witterstaetter.

THE CINCINNATI COMMITTEE, CHRYSANTHEMUM SOCIETY OF AMERICA.

UTICA, N. Y.—One-third increase, with no marked difference in retail prices. Short on lilies, roses and orchids, increased call for them. Slight increase in demand for plants. Butchers, grocers, fish dealers and fruit men handled holly and Christmas greens to the detriment of the florists.

ROCHESTER, N. Y.—About 10% ahead of last year; prices favorable in most lines; supply equal to demand except in colored carnations; quality of roses below the average, carnations were of extra large size; marked increase in plant sales, but fewer palms were sold; far greater demand for green of all sorts.

BRIDGEPORT, CONN.—Greater sales with retail prices about the same; supply equal to demand and quality a little better; carnations, violets, roses and poinsettia in demand; mistletoe sold slowly, holly in great demand. also roping and wreaths. Trade on the whole far better than last year.

FT. WAYNE, IND.—Sales 20% better, with higher prices for good stock; supply equal to demand; quality about the same; increased call for violets, carnations and plants. The city was canvassed for holly wreaths by outside parties who failed to fill the orders, thus making a rush on the regular dealers at the last moment.

WHEELING, W. VA.—Total sales greater by about 50%; retail prices 25% more; supply short; quality about the same; bought more and sold at better profits; increased call for carnations, asparagus palms and rubbers; holly and wreathing sold better than ever at higher prices; not $10 worth of mistletoe sold in the city.

ELGIN, ILL.—Sales less than last year except in funeral flowers; prices lower, and supply equal to demand. Carnations and violets poorer, roses better in quality. Wholesale prices to country florists higher; bought more. No increased call for any special flower. Decreased demand for plants. There was a desire to undersell the other fellow.

ELMIRA, N. Y.—An advance of 20% to 25% over last year; retail prices remaining about the same. The supply was not equal to the demand; the quality fully equal. The low wholesale prices failed to materialize. Not enough carnations and violets; increased demand for palms as well as blooming plants; extraordinary demand for good clean, well-berried holly, poor grade, no good.

DES MOINES, IA.—Small increase with much better retail prices; supply equal to demand. Quality better than last year. Bought more and sold on closer margins. Increased call for carnations and roses, violets and valley slow. A large increase in demand for blooming plants. Regular customers did not buy much for Christmas; and as it fell on Saturday, there was a less demand for flowers for entertainments.

MILWAUKEE, WIS.—Total sales about the same, with prices somewhat higher, and the supply fully equal to the demand, quality considerably better. Wholesale prices were not as low as last year. Large demand for Meteors and Beauties; plants about same as last year. We note that Christmas cut flower buyers asked for select stock only, as there was no trade whatever in inferior stock, as was the case in former years.

THE PHILADELPHIA COMMITTEE, CHRYSANTHEMUM SOCIETY OF AMERICA.

Chrysanthemum Society Committees.

PORTRAITS.

Portraits of the members of the Philadelphia, Cincinnati and Chicago committees of the Chrysanthemum Society of America appear in this issue. The list is complete with the exception of John Fries of the Cincinnati committee who can not be begged, cajoled or bulldozed into "gettin his picter took" Next week we shall give the active officers and the New York and Boston committees.

Work of the Chrysanthemum Committees.

The summary of the work of the chrysanthemum committees published in our last issue is well worth study not only by those interested in the chrysanthemum but by all interested in the much discussed question of the point system and of the advisability of issuing certificates for novelties under any system.

The striking feature of the work is the uniformity of the results obtained. One variety scores 87 points in the commercial scale before every committee examining it. Another scores 90 before two committees and 91 before a third and 86 and 87 before the other two, having traveled seven or eight hundred miles to reach the latter two. Another scores 90, 90, 91 and still another 93, 94, 95. When one considers that there are eleven different men acting this year, divided into five separate committees, meeting in cities as widely separated as Boston and Chicago, each man influenced by the requirements of his own market, by his own personal likes and dislikes and by other personal peculiarities, and when to these reasons for varying results are added the facts that blooms may have been shipped a thousand miles to reach one committee and been carried by the hand to another and that they must, necessarily, in many cases have been of varying quality when shipped, the results may well be considered phenomenal. The society and the gentlemen of the committees are to be congratulated.

It is quite true that results vary widely in some instances, as in former years. This is especially true in the so-called off colors. The clear whites and strong yellows have always been judged with more uniform results than the others. These colors are universal favorites in all markets and with all growers while the demand for the others varies materially in the different markets.

It would appear from the scoring in this and former years that the light or lemon yellows are judged comparatively with the deep golden yellows by some committees. In such a comparison the lighter shades will always fall behind. Whether this is proper is a serious question. Should a variety which is ahead of all other lemon yellows be scaled down because it is not a golden yellow?

Some of the scoring would indicate a somewhat differing standard for comparison among the committees. It would seem that a variety larger than any of its type, color and season, in commerce, should score full points for size, and yet it is evident that varieties are occasionally compared with those of other color, type or of different season.

Some definite action by the society as to standards of comparison seems needed both for the sake of uniformity and for the information of the public. The parentage of all new varieties should be furnished by the exhibitor and be published in the summary. "Blood will tell," and careful growers will wish to know what blood is in the seedling. Over a third of the total scores are below 85, and in only one instance does a variety reach 95, the high point of the season.

The Orchid Displays at Philadelphia.

Since the varied and chaste exhibit of orchids at the spring show of the Pennsylvania Horticultural Society eight or ten years ago, made by Mr. George Savage, who for a number of years has had charge of the Kimball collection at Rochester, N. Y., nothing has approached it in novelty and rarity until the present year, when Mrs. George B. Wilson, West Philadelphia, made a very interesting and instructive display.

Hugh Graham's exhibit was an artistic triumph, but contained nothing very new; and that is the reason, I suppose, why those that did comprise the display were not labeled. The educational features of Mr. Graham's contribution to the show were as much of an object lesson to the retail trade as to the public, and more so perhaps, though the latter could not help being impressed with the idea of what grand, exquisite results may be achieved by a display of orchids. There was a time, however, when a display of anything for competition the contents of which were not correctly labeled would be unceremoniously disqualified. It takes courage for the management to carry out these reforms, but if the Pennsylvania Horticultural Society is to keep up its prestige it will have to instruct its judges to hew to the line in the good, old-fashioned way of a few years ago. Mr. Graham's collection consisted mainly of the old type of Cypripedium insigne, C. Harrisianum, the first hybrid cypripedium ever raised from seed under cultivation, and the newer species or variety C. Charlesworthii; of dendrobiums there were the white D. formosum giganteum and the vari-tinted D. Phalænopsis, with here and there an Oncidium varicosum. Cattleya labiata also formed a part of the exhibit, and some few plants of Zygopetalum Mackayi, and one plant of a light-colored form of Vanda cœrulea were seen.

Albert Woltemate also had Cypripedium insigne, C. Spiecrianum, C. Lawrenceanum and C. villosum in his display. I do not remember ever having seen the latter species of cypripedium in bloom before at this season of the year. Orchids are guilty, however, of unseasonable freaks occasionally. There were also Cattleya labiata and Dendrobium Phalænopsis and D. formosum giganteum, and the edge of the table was gracefully draped with Asparagus Sprengerii; Adiantum Farleyense was used also to excellent advantage intermingled with the orchids. Mr. Woltemate's collection was not altogether arranged for effect because every plant therein was correctly labeled, an educational feature which must not be overlooked.

Mrs. G. B. Wilson's exhibit of orchids was very favorably commented upon by all those who appreciate and have a knowledge of orchids. One on-looker was heard to make the remark that if fault could be found with it there was too great a preponderance of cypripediums. This is pardonable perhaps, because cypripediums

are among the first orchids to attract the enthusiast, and are certainly very interesting. Mrs. Wilson's collection was made up to some extent from that of the late Erastus Corning, Esq., Albany, N. Y. Mr. Corning was one of the first Americans to espouse the cause of orchids, which was ably administered by the late and highly respected William Grey (whose lamented death was recorded in a recent issue of the AMERICAN FLORIST). A success was achieved by the combination of Mr. Corning and Mr. Grey that is recognized wherever the highest type of orchid culture prevails. It is stated by Mr. Alphonse Pericat, gardener for Mrs. Wilson, that there were in her exhibit upwards of fifty species, varieties and hybrids, all of which were correctly labeled, and further he stated that there are not less than two hundred distinct forms in the conservatories of Mrs. Wilson.

When the crowds surrounding this exhibit would admit of it, I took the opportunity of jotting down some of the more noticeable and conspicuous among them. One large cypripedium attracted marked attention because it bore the inscription: "Cypripedium Spicerianum—the original plant—Veitch, 1880." What memories these words conjure up in the minds of the connoisseur! It was this species that sold readily as a small plant, one growth with a root attached, a few years ago, soon after it was first discovered, under the hammer in an auction room in London, England, at from $350 to $500 each; now the same kind of a plant may be bought at from $2.50 to $5 each, according to the number of growths the plant has. Among the hybrids—so-called—in Mrs. Wilson's display, I noticed C. "Mrs. Chas. Canham," which is a cross between villosum and superbiens. The result of this cross is removed from Harrisianum by degrees of pedigree and excellence, and to the casual observer it would be considered almost the same. In explanation, Harrisianum is a cross between villosum and barbatum. The difference between Harrisianum and Mrs. Chas. Canham is that the latter's pollen parent is superbiens (or Veitchianum) and superbiens is a superior form of barbatum. It is very interesting to take note of these differences of parentage, even when they do belong to the same family. We also found C. vexillarium superbum (Fairieanum x barbatum.) Take notice that while Mrs. Chas. Canham may be step-sister to Harrisianum, vexillarium superbum is also half-sister, because barbatum is one of the parents in both cases. (Incidentally the people in Philadelphia are strong believers in pedigree).

C. "Celia" is the result of a cross between Spicerianum and tonsum. This was an achievement brought about by our old friend, George Savage, Rochester, N. Y., and it shall be recorded that all results from the union of Spicerianum and tonsum on either side are blood relatives of Celia. C. "Alcides" is the result of a cross between hirsutissimum and insigne. The pollen parent in the latter cross is well known to those who grow orchids, and all those crosses with insigne blood in their veins are blood relations to that good old kind. C. "Lecanum" is perhaps the best known hybrid or cross in that class, and that cross has coursing within its veins the blood of two well known families, namely, insigne and Spicerianum. But I am digressing; I had in view the mentioning of the varieties and crosses, when I commenced these remarks, of those only which were to be found in Mrs. Wilson's exhibit, and it was too early for Lecanum to be in bloom.

C. acis was the next one to attract my attention, and this combines the insigne above referred to and that of the family of Sir Trevor Lawrence, Bart. (Lawrenceanum). The latter species or variety figures in the pedigree of a number of the choice crosses of this interesting class of orchids. One of the most sought after is the one known as Lawrebel. This is the result of a cross between Lawrenceanum and bellatulum. It will be remembered that the former variety throws up flowers with very long stems, whereas the latter has little or no stem at all. Its dorsal sepal is only of medium size, while that of Lawrenceanum is quite large and the petals are quite small, or rather long and narrow. Bellatulum has very large, that is to say, broad and ample petals. Some years ago the idea struck me that a cross between these two very dissimilar cypripediums would result in a useful, distinct and beautiful hybrid. On making my idea known to Mr. Dimmock he said, "You are too late, my boy, that cross has already been made and the progeny has flowered, and it has been named Lawrebel (a combination in name it will be noticed of the two parents). He further stated that he knew where a plant of this cross could be secured and he would get it for me, which he did, and when the plant came it was fine and healthy, with foliage similar to, though somewhat modified from that of Lawrenceanum. Under the care given it here it continued to grow and flourish until on one dark and dull winter's morning it was found rotten to the core. After diagnosing the case it was decided that a cold drip had taken its precious life. Am off in a tangent again. It, however, shows in what such an exhibit as that of Mrs. Wilson will result.

In addition to those few enumerated there were a number of plants of C. insigne Chantini. This is also known as C. insigne punctatum violaceum; this differs from the type in having less numerous spots on the dorsal sepal, but what there are, are larger in size and the upper part of the dorsal possesses much more white than is usual in the older sort, and some of the spots are to be seen upon the white and these take upon themselves a purple shade. The old type of Cypripedium insigne above referred to is perhaps the best known of any orchid, and is in consequence the most plentiful, and it may be bought at a reasonable price, yet some variations among the insignes are as highly prized and have been sold for almost as fancy prices as any orchid in the list. A few examples on these lines will furnish data for another chapter at some future time.

When I started to make notes about the exhibits to be seen at Philadelphia, I fully expected to give a full list of what was exhibited there, but I find that I have occupied too much of your space already. More anon. In the meantime we must keep our minds in a receptive mood for orchid lore, and be on the alert to take advantage of what may be offered along these lines, for orchids are surely becoming more popular every day.

EDWIN LONSDALE.

Chas. W. Johnson.

Geo. Stollery.

THE CHICAGO COMMITTEE, CHRYSANTHEMUM SOCIETY OF AMERICA.

Christmas Plants in New York.

The demand for flowering plants at the holiday season is plainly on the increase. The exercise of more intelligent care on the part of plant growers in the selection of plants to be sold over the counter to customers for home adornment, the observance of better cultural methods in raising plants so that they will be better fitted to withstand the unfavorable atmosphere and treatment of the average living room, all tend to make the plants more satisfactory to their ultimate owners and to develop a popularity which they might and should have enjoyed long since if the present wise efforts to provide the right kind of stock had prevailed in the past.

The plant for the million is the Chinese primrose. Careful selection has brought the quality of seeds now obtainable up to a very high grade. Form, size and color of flowers and habit of plant are all that can be desired and their cultivation is simple. When finely bloomed specimens are offered in 5-inch pots, at $15 per hundred to the trade it is hard to see where there is much profit to the grower, but the retail florist and his customers have surely no cause for complaint, and

even the poorest can afford to own a Chinese primrose.

The cyclamen is a patrician in comparison with the primrose; and yet any admirer of plants can see full value in fine specimens grown in 7-inch pots, and a ready sale is found at $12 a dozen. More fancy and calculated to appeal to the buyer with a fat pocketbook are plants in 10-inch pans, for which the price is $36 a dozen to the trade. For these better market plants seed is sown in November, therefore they are only one year old. It takes close attention and skillful management to bring the cyclamen to perfection so early in the season and Mr. Charles Trauth, of Flatbush, who has done it within a year thereby wins for himself the credit of being one of the best plant growers for the New York market.

No less effective in decorative aspect and lasting qualities are the ornamental fruiting plants. The Otaheite orange heads the list and the Messrs. Zeller, of Flatbush, who are undoubtedly the largest producers of these showy plants in the country, find the demand increasing rapidly each year. Every plant in the houses was sold fully two weeks before Christmas. These orange trees are all raised from cuttings, struck generally in December. They bloom and fruit in the second year, but the standard in the illustration is a four-year-old plant. The standards are disbudded and trained to that form, not grafted. Repotting is done in September. The old plants coming into fruit must be kept inside, but the young stock is better off outside in frames where they can have more room and are less liable to scale, which is a great pest when they are crowded together in a warm house. Other than scale the only serious trouble is a green fungus growth due, perhaps, to the water used in syringing, which comes on the foliage. The fruit takes about six months to mature. Syringing is done every clear day and the plants require plenty of water. Cleanliness and constant care are among the most necessary points in successful orange tree culture. Packing the plants for shipment requires much skill and labor, and if confined too close, the fruit is liable to drop. Dealers should caution their customers as to the necessity of liberal watering if they expect their orange trees to retain their beauty for any length of time.

The prevailing taste for everything bearing bright red fruit makes the ardisia a very popular plant for the holiday trade. Mr. Zeller raises all his ardisias from seed. Many plants are imported, but they frequently lose their foliage and the home grown stock is the best at maturity. The seed is sown as soon as ripe, which is in July or August. They are up in two months. Then comes the most critical time in their existence. Great care must be taken in watering, as there is great danger from "damping off." Ardisias are at all times peculiarly sensitive to over watering. They should not be kept constantly wet but should be allowed to stand several days and get quite dry between waterings which, however, should be thorough when done. Plants well grown are in the shape shown in our illustration when three years old. In 6-inch pots they cost $18 per dozen.

The little fern, Aspidium tenesemense, is not generally introduced yet, but it is sure to be grown largely when its good qualities become known. On account of its persistency and durability there is no better fern for use in jardinieres. Mr. Zeller says that when a fernery is returned to him for refilling after a season passed in the dwelling house if there is a good plant left in the collection it is sure to be this little aspidium. It comes nicely from spores. The plant illustrated is in a 2½-inch pot and one year old. It is not so quick a grower at the start as some other varieties. Among the other ferns suitable for collections in small pans and jardinieres are the old favorites, Pteris serrulata, Pteris cretica and cretica albo-lineata and Onychium Japonicum, and the little golden and silver selaginellas are very useful to cover the surface of the soil. Acorus humilis, Cyperus alternifolius and other grasses may be effectively used, and Dracæna Sanderiana, Cocos Weddeliana and ardisias make fine centre plants. There seems to be rapidly increasing taste and demand for these arrangements, and the florists' supply houses give material help to the development of this taste in the many attractive forms in which they provide receptacles for these pretty little fern collections. The great point florists should bear in mind is to limit the varieties to such as will withstand the severe conditions found in the average dwelling house. The quickest way to stifle the growing popular demand for such things is to fill them with delicate subjects that are unfitted to bear exposure. Our illustration shows a 9-inch pan which can be sold at $2 to $3, according to its contents.

In azaleas, Deutsche Perle for white, Vervæneana for pink and Simon Mardner for red are all offered in well-bloomed plants and desirable sizes.

Otaheite Orange.

CHRISTMAS PLANTS IN NEW YORK.

Aspidium tensemense.

CHRISTMAS PLANTS IN NEW YORK.

Carnations.

It is now time to think about what varieties to grow for another season, and to sum up every variety under your care and make your calculations accordingly. If a variety has not responded well to your treatment by this time it is of little use bothering with it, though we should take everything into consideration before condemning any variety, especially novelties, for it is hardly natural to expect a rooted cutting of last May to be doing as well at this time as one two or three months older which had the benefit of the cool, clear, spring weather to build up its constitution. Good strong plants are as essential in carnations as in roses, particularly so with all varieties having heavy foliage and large flowers. As nearly all of the new carnations that have come under our observation are of that order, it would be well for those intending to plant any of them to get them as early as possible; and, whatever you do, don't cut them all to pieces as soon as you get them with the intention of getting as many plants for the money as possible, for it will be the dearest in the end.

The principal work we have to look forward to now besides the general routine of caring for the plants is propagating, and here as a rule, is the source of most of the troubles and drawbacks we have to contend with. I have found the best bench for propagating to be where it just escapes the full glare of the sun, but at the same time has plenty of light. We are using a bench running north and south and have a blind of cheese cloth to slip up and down on a wire right under the glass when the sun is very bright. This has proven to be the ideal place to root them. We have the bench fixed so that it is clear of the back wall, so as to give a free circulation of air, and also keep the sand the same temperature and condition all over the bench. I like a good sharp sand, a little on the coarse side, which carries the water off quick and prevents the bed from becoming stagnant. The roots are not so brittle when lifted from this kind of sand as they are when rooted in very fine sand. After the bench has been well cleaned and lime washed and any old rubbish cleaned away from underneath it, see that drainage is good but not so as to let the sand slide through with the first good watering. You are then ready for the sand which should be pounded to a depth of about 3 inches. We try in every case as much as possible to take the side cuttings from flowering shoots. Though almost equally good results are obtained from the young growths if proper care is taken in selecting them, so as not to get them too soft. As soon as the cuttings are placed in the sand give them a thorough good watering, and again as soon as the sand commences to get a little dry. Under no consideration, let your cuttings wilt for want of water, and on very bright days, or when firing heavy, give an occasional light syringing, keeping the temperature of the sand at 56° and the body of the house about the same. By carrying out this plan little trouble will be found in rooting them in about twenty one days, and they should be taken out of the sand as soon as the roots are large enough to handle. C. W. JOHNSON.

A Plea for Common Plants.

ED. AM. FLORIST:—Allow me through the columns of your valuable paper to thank Mr. A. T. Simmons, for his short, but to the point letter on "Only An Old Geranium," in your issue of December 11 (page 472). The geranium has been neglected, not only by the floricultural writers, but also by managers of exhibitions. You rarely see premiums offered for the different sizes and varieties of geraniums. There are occasionally small prizes promised, without any expectation of their being competed for or taken, but apparently just to fill up, and make a better looking schedule. That geraniums of pretty good amounts, for plants of geraniums? With five or six collections of plants anything like those Mr. Johnson had at Chicago, competing together in one room, the management would surely not miss the chrysanthemum plants, and in addition, think of the satisfaction the general public would have in being again introduced to the old favorite, in its best varieties and grown in such shape that they would wonder why it was ever left

Ardisia crenulata.

CHRISTMAS PLANTS IN NEW YORK

can be grown fit for a place in any flower show, is shown by your illustration (December 4) of Mr. Johnson's plants.

There are some complaints that chrysanthemum plants are not exhibited in as good form as they were several seasons ago, and it is proposed to omit these plants from the prize list in some towns, and give the money to large vases of cut blooms, as it is said they will make a finer display without the unsightly stakes and tying. Would it not be better to offer these premiums, which are generally off the exhibition table.

The trade papers receive support from all classes of florists, therefore it is their duty to tell of what is interesting and instructive in all branches of our business. Why could we not get occasionally our column or part column of news on the newer varieties of geraniums as well as chrysanthemums, which have pages of comments. We would be grateful for a reminder once in a while with cultivation notes about the verbena, heliotrope, fuchsia, etc. Such matter might not be

of interest to the "barons" with their 100,000 feet of American Beauties, or fields of canna plants, or 20 houses of carnations, or their acres of glass for palms, ferns and rubbers, but to a great many of your readers such subjects would be instructive and satisfactory.

To get back to geraniums, they are as Mr. Simmons said, a great part of the stock in trade of many florists. Their usefulness for a great many purposes cannot be questioned. They are the best of flowering plants for summer bedding. Few things are better for flowering in a dwelling house, where you have a south window, and a few clumps of them in tubs or vases on verandas or terraces, where not too much shaded will be found very effective.

The writer well remembers seeing, many years ago, a very beautiful garden at the Earl of Meath's place in County Wicklow, Ireland, in which geraniums formed a striking part. It was a large terrace at one side of the house, where a quantity of marble statuary was scattered about, the ground work was principally carpet bedding in dull colors. The geraniums were large old plants in tubs, some of them being 5 or 6 feet high and pyramidal in shape, others of globe or bush form, and all well flowered, but the blooms were smaller than they would likely have been on smaller plants. But the effect was very pretty as these large plants were judiciously placed among the statues. N.

Smart Quakers, Fine Carriages and a Bon Bon.

This is a great town! Last week I sent you a paragraph telling how one of our wide-awake retailers trains up and dresses his messengers and has them circulating around New York, Washington, Camden and other large but somewhat slow towns delivering orders. But he is not the only one. The other day I was shown a private letter just received by one of our Chestnut street retailers asking for a few of his latest ideas on how to get up a wedding decoration. This letter was not from Kalamazoo, either. It was from one of your high-up men in New York. And he got some pointers right away—up-to-date ideas that I have no doubt will be heralded far and wide in a few months as the latest metropolitan wrinkles.

Philadelphia is too big and broad-minded to be jealous of all this, of course, and does not mind the loud shouts of self glorification she constantly hears from certain quarters. I ran into Bart. Cartledge, of Pennock Bros., on a Chestnut street car yesterday and asked him if he often found anything new when he went to New York. For answer I got a raising of the eyebrows and a shrug! Then he said: "I had a telephone message from New York this morning. It was Mr. —— ——, the millionaire banker. He wanted to get a basket of camellias for a wedding in Washington. Could he get them? Had been all over New York, high and low and no one would undertake it. Could he get them? Why certainly! Will have them on the train for you inside of half an hour! Are you sure you know what I'm talking about? Oh, yes, that's all right; there's nothing in the flower line you can't get in Philadelphia. We're up-to-date people down here. Well I swear! I begin to think there may be something in it. I haven't been in Philadelphia since the Centennial. Must run over some time and get freshened up." And so it goes, but Philadelphia never brags. She relies on the old adage that truth crushed to earth will rise again.

While I think of it, I must not forget to mention the stunning new turn-out that your regular Philadelphia correspondent, Robert Kift, has got this winter. Naturally Robert can't very well tell you about it himself. I had to get the photograph which appears herewith at the pistol's point. Or, to put it in the style of a certain New York correspondent, I surreptitiously abstracted it. How's that? I hope the printer spells it right else there'll be a howl. Now, Mr. Printer, don't make that b-o-w-l. It's bad enough to get the poets down on you let alone the athletes. [By an unfortunate slip in the types in a recent number, Mr. Watson was made to style Mr. Law our "howling" poet, instead of "bowling" poet as written. And poets are thin skinned, too! —ED.] I see many fine rigs in my walks around town. Battles, Crawford, Heron, Craig, and others have handsome and up to date affairs, but I think Kift's is the most fetching of all.

I wish I could write like Kift. I don't want to make him more conceited than he is, but how he can get his column week in and week out and year in and year out, always so readable, polished, wise and witty, passes my understanding. "Age cannot wither nor custom stale his infinite variety." And how does he find the time? What with conducting one of the largest and finest retail stores in the city with success, giving pointers to New Yorkers, winning games at ten-pins, taking photographs, writing poetry, raising a family and helping Joe Heacock to write Scotch in his ads. I don't understand it. No wonder he's got no wool on the top of his head. It must be part of his prestidigitating genius, I suppose.

I could tell you a lot more about Kift and some other people, but I don't have to. I can lay off when I feel like it, and that's one little point where I console myself when I get to worrying because I can't write as good stuff as Robert Kift. May his shadow never grow less.

G. C. WATSON.

Pan of Ferns.

CHRISTMAS PLANTS IN NEW YORK.

ROBERT KIFT.

Begonia Gloire de Lorraine.

In reference to the new plant heading these notes, in the classic word of a recent writer, "I'm glad I spoke," for it has given Mr. Eisele an opportunity to

put himself on record. During the progress of the horticultural exhibition held in Philadelphia last November, the undersigned was given to understand, when this matter of erroneous nomenclature was referred to, that Mr. Eisele was very particular about such matters, and I could not resist the opportunity under the circumstances of publicly drawing attention to the error, and reminding whoever was responsible for the mistake and await developments.

In the various reports about the flower show above referred to nothing was said about this new begonia in any of the trade or amateurs' papers devoted to horticulture that I can now remember; but I did see B. Gloire *la Reine* mentioned in the report of the exhibition which appeared in that staid and usually correct agricultural and horticultural publication, the *Country Gentleman*. This fact among others had its influence in determining my course in this matter. If Mr. Eisele has resolved to be more careful in the future, my object will have been attained. If there is a fault to be found in this begonia, it is that apparently it will be a difficult matter to get up a large stock of it.

Respecting begonias it further reminds me that one of your contemporaries has a cultural note in a recent issue upon B. Erfurtae. Is it not Erfordia that is meant? I have seen Erfordii catalogued, but never before have I noticed the name of Erfurtae. Am inclined to the belief that this blunder is also likely to cause some confusion in the nomenclature of the begonia. Is it a begonia society that we need? S. DALE.

Some Long Island Carnationists.

C. W. Ward's carnation houses at Queens are among the most interesting places to be seen in the vicinity of New York, and Mr. Ward himself is very interesting as a conductor. His best time and thought are devoted to studying the characteristics of each variety in its growth and bloom and noting the results of the many crosses which he is constantly making, and when he achieves anything it is nothing more than he is justly entitled to. He regards Maceo and New York as his two best possessions. It would benefit New York if its flower was a little larger, but it has all the elements of profit in its growth, form, color, fragrance and prolific blooming. Maceo is one of the darkest crimsons ever put on the market. It is a wonderful bloomer and sells well in the New York market. John Young is a carnation that comes very near to the ideal perfect white and is in many respects a white Scott; it is covered with buds. Blush and White Cloud are also all right. The former is, as its name indicates, a white with a faint pink flush. It is an erect, handsome plant. Mrs. Jas. Dean has a fine crop of flowers on it and Gold Nugget is also remarkably productive for a yellow variety. Mr. Ward is working industriously on scarlets and has a number of promising one-year-old seedlings in this color. Bon Ton, a new scarlet from Massachusetts, shows up well. Lily Dean is a favorite with Mr. Ward and he will grow this variety largely next year.

The geraniums here are almost as interesting as the carnations. All the fine European novelties of the past year are to be seen, and many of them are remarkable as to color and markings.

Mr. Besold's new aspirant in the carnation line, Frances Joost, is very promising as seen in the houses at Mineola. It is a seedling from McGowan and Scott and appears to have all the good points required in a commercial variety today. In color it is more pleasing than Scott, being entirely free from the bluish cast in that variety. It is a fine grower and the strength of stem is shown by the fact that no supports of any kind are used in the beds. Mr. Besold is an enthusiast on the subject of carnation seedlings and has a large number of various types from which he expects to develop some winners. One which he grows quite largely, but is not yet satisfied to put on the market, is named Nero. In color it resembles Tidal Wave, but is a more rampant grower than that variety. Two fine lots of Harrisii lilies here are noticeable for the few traces of diseased bulbs seen.

Chas. H. Allen still ties to Scott and McGowan as his choice for money makers and his houses are planted mainly with these. He has one lovely pink seedling, with nice habit, which he has named Ada Rehan.

Harrison's White, here as in a number of other places, persists in standing still as far as flower stems are concerned, showing principally "grass," and gives the impression that it is trying to revert to the old type of border carnations.

Mr. Allen's house of mignonette is in beautiful shape, and as mignonette is not likely to be over-stocked in the New York market this year he should realize good money from it.

Dailledouze Bros. are highly elated with their success with Victor, which, together with Flora Hill, they regard as standing in the first rank among recent carnation introductions. They find them both good growers and equally good sellers. Old Hector is a sight worth seeing as grown here this year. Just now a scarlet carnation has the lead in the market and the dollars are fairly sticking out of Dailledouze's Hector benches.

OMAHA, NEB.—The stakes are being set for the Horticultural building. The contract for the carpenter work on this building has been signed, and work will be commenced within a short time.

New York.

REVIEW OF CHRISTMAS TRADE.—BUSINESS OPENS LATE.—BIG RUSH IN CLOSING HOURS.—ONLY GOOD STOCK SALABLE.—VIOLETS AND WHITE FLOWERS MOVE SLOWLY.—TRANSIENT TRADE GRATIFYINGLY LARGE.—NEW YEAR'S DEMAND NOT LIKELY TO BE HEAVY.—W. A. MANDA'S STOREHOUSE BURNED.

A review of the field after the Christmas rush finds the retail flower dealers generally well pleased. The sale of plants all through the week was gratifyingly large and the high quality of the stock which the plant growers had provided helped to make this department of the business very satisfactory to both dealers and customers. Little indication was given beforehand as to what the cut flower trade would amount to. It was well along into Friday afternoon before the rush got under way and all began to realize that the stock available was entirely inadequate for the overwhelming demand and the hustle lasted without intermission until the evening of Christmas day. The orders were such as could be put up rapidly, for the demand was almost exclusively for boxes of long stemmed loose flowers, the only stumbling block being that the demand was for the best grades only, the buyers showing a discriminating disposition, paying willingly for bright fresh goods and refusing to have anything to do with old stuff. When the sort of stock wanted could not be had they simply stopped buying flowers.

Comparatively few orders had been placed in advance, many of the best customers in the fashionable localities being still out of town. The trade was mainly of the kind known as transient and largely for cash, and showed most conclusively the welcome fact that easier times are upon us and that money is beginning to circulate more freely. Of certain things, such as American Beauty, Bridesmaid and Morgan roses and colored carnations the supply fell far short, but this fact did not help out as much as might naturally be expected on the inferior

NEW CARNATION FRANCES JOOST GROWN BY C. BESOLD.

grades or on bulbous or other white material. The sharp advance on favorite varieties, coming at the last moment and without previous warning, aroused the usual opposition on the part of the retailers, but it was unavoidable, and only the natural result of the conditions existing. Some retailers even went so far as to advise their customers to invest in plants instead of cut flowers and to buy anything under the sun rather than American Beauties. The sale of violets was rather disappointing on the whole. The reason is not fully apparent, but plainly there were too many of them to justify the prices at which they were held. Mignonette was a notable instance of a flower, not bright colored that enjoyed a phenomenal run and brought good prices without protest of any kind.

From the wholesalers' standpoint results were less satisfactory. The responsibility was theirs of finding a market somewhere and somehow for the avalanche of white roses, Roman hyacinths, lily of the valley; Paper White narcissus, stevia, smilax and adiantums that was piled in on them, and for the accumulations of the week that had been piling up while the retailers were attending strictly to their plant trade; and between the critical disposition as to quality, before alluded to, on the part of the buyers on the one side and the large receipts of undesirable stock on the other, their position was not altogether a happy one. Many growers added to the vexations of their commission men, without benefiting themselves in the least, by scaling up their grades, making No. 2 roses class as No. 1 and No. 1 class as fancy, and by mixing defective stock through the good, apparently in the hope that it would slide through unnoticed in the hustle and hurry of holiday trade. But it only made confusion, disappointment and recrimination. To add to the worry, many lots of flowers came in frozen and with the contrariness of such things, these frozen consignments were usually valuable stock, the rubbishy stuff coming in without a mishap.

The wholesalers were companions with the retailers in lacking all previous knowledge of the demand that was to spring up in the last hours and lamented the fact that they had been so hasty in unloading stock which might have realized so much more if it had been held in reserve. There were heaps of deformed Beauties in evidence, very difficult to dispose of, while perfect specimens brought fancy figures. Carnations, when of fancy varieties, were the most satisfactory stock of all; but violets proved very unwieldy and the demand for them was exasperatingly slow.

The present week finds a fair supply of everything in market, the only thing that appears to maintain holiday prices being carnations of the better grades. All other stock has reverted to prices prevailing previous to the rush. Flowering plants are abundant in the store windows, and it is evident that Christmas did not quite clear them out. Doubts are expressed as to whether New Year's will make any impression on business. Of late years it has cut no figure. The weather is likely to be the greatest factor; if clear and bright there will be no stringency in any line.

The cool warehouse of W. A. Manda at South Orange was burned down on the night of December 23. The building and contents were partially insured.

The next meeting of the Florists' Club (January 10) is likely to bring out a large attendance. The first exhibition for the gold medal will be an attraction, and the question of the annual dinner will be settled.

Chicago.

INCREASED DEMAND FOR PLANTS FOR CHRISTMAS.—VARIOUS PLANTS USED.—HIGH PRICES FOR CUT FLOWERS.—HARRISII IN FAVOR.—OTHER WHITE FLOWERS WENT SLOW.—DEMAND FOR CARNATIONS PHENOMENAL, PRICES DITTO.—MORE CUT FLOWERS SOLD THAN EVER BEFORE.—WHOLESALE BUSINESS SHOWS AN INCREASE OF 20 PER CENT.—RETAIL BUSINESS IN CUT FLOWERS DECREASED 10 PER CENT.—BUTCHERS HANDLE HOLLY.—A NEW FLORIST SOCIETY TO BE ORGANIZED.—RICHARD PRESCOTT BREAKS A LEG.

The weather Christmas week has been all that could be desired, a little cold for those that had plants to deliver but otherwise fine winter weather.

The Christmas trade in plants this year has broken all records. Many retail dealers on account of the exceedingly high price of cut flowers the forepart of the week went skirmishing around the greenhouses for blooming plants to trim up their show windows with. Some very good displays were made and at a much less cost than it could have been done with cut flowers. More plants were brought to the notice of purchasers in this way than there would have been had the prices of cut flowers been more reasonable. The result has been highly satisfactory. Nearly all the plants have been sold at good round prices, very few being left over. All kinds of house plants were in demand, though blooming plants of bright color were prime favorites. Cyclamens and azaleas were sold in larger numbers than ever before. Tulips and Roman hyacinths were sold in pots and pans.

Weinhoeber had quite a good display of pans such as are used for ferneries, filled, some with three or four primroses, some with Roman hyacinths, others with tulips, and all sold well.

John F. Kidwell says his trade in blooming plants at Christmas has been on the increase for several years and this year has been phenomenally good. Many lilies were sold in pots, in fact Christmas trade was somewhat after the style of Easter trade.

Never before have cut flowers brought such prices at wholesale in Chicago as were obtained during the past week, quality of stock considered, although some varieties of roses have heretofore sold for a day or two at as high prices as those obtained last week. Prices reached high water mark Monday five days before Christmas. Stiff prices prevailed all through the list, though there was no particular scarcity of anything, except good Bridesmaids. Any other stock could be got if one was willing to pay the price. Stock became more plentiful toward the end of the week but prices held firm, only a few white flowers being left over.

Harrisii lilies were the only white flowers that were in especial demand. There was a much larger supply than ever before but they were all sold and more could have been sold at good prices.

There was a good supply of narcissus and Romans which went slow and would not have sold so well had they not in many instances been substituted for white carnations.

Carnations sold better than ever before and at higher prices. Some fancy Mrs. McBurney and Mayor Pingree were sold at $10 a hundred wholesale, and it is reported that retail sales were made of these varieties at $2 and $2.50 per dozen. Many very poor carnations brought four cents at wholesale. Selected stock, common varieties, 5 cents, fancy varieties, 6 to 10 cents.

Much more pickled stock was marketed than ever before both in carnations and roses. Contrary to expectations more flowers were sold this year than ever before at Christmas and at better prices.

Very few wholesalers report less sales than last year. Bassett & Washburn report trade highly satisfactory this week, about double the same week last year; Reinberg Bros. about the same as last year, they have more glass but were off crop; Rogers Park Floral Co. report business about that of last year; E. C. Amling 40 per cent better than last year; Prince better than last year; Kennicott 25 per cent better; Lynch 20 per cent better; Hunt 13 per cent better. From the reports received we have estimated an increased wholesale business of about 20 per cent over last year.

Wholesalers report a better feeling among their country customers than ever before, very little complaint having been made. The city buyers only do the kicking.

Holly and greens which a few years ago used to be the retail florist's principal source of profit at Christmas are being made and hawked in such quantities that there is not much in it for the florist.

Very few retail florists report business as good this year as last, while the sales on the 24th and 25th were about up to the same days last year, the three days previous, Christmas prices had to be paid for all stock, which made retail prices so high that very few sales could be made that allowed a fair margin of profit. From reports of very many retailers we estimate that the retail trade in cut flowers during Christmas week is fully 10 per cent less than last year. This is made up in part by increased sales of plants. Less holly and greens were sold by the florists though more were sold by fakirs and butchers than ever before.

There is a prospect that there will soon be a new florists' society started in Chicago. Those having the matter in charge report the prospect is that a society will be organized that will be a benefit to the trade.

Richard Prescott for many years with Charles W. Northrop, LaGrange, Ill., fell and broke his leg while decorating at Riverside the day before Christmas. He was taken to the Cook County Hospital.

Mr. Frank Van Assche representing Thos. W. Weathered's Son is in town this this week.

Since Christmas, trade has been good both at wholesale and retail. Prices, although more reasonable, have held firm. The prospect is that stock will be more plentiful after New Year's. Several large crops of roses and carnations are coming in.

Blair Winter, of Winter & Glover; had a substantial Christmas remembrance in the shape of $3,000 in solid coin of the realm.

Boston.

CHRISTMAS TRADE LATE BUT LIVELY.—COLD WEATHER MADE A SCARCITY.—COLORED FLOWERS IN GREAT DEMAND AND SHORT SUPPLY.—PRICES NOT UNDULY ADVANCED.—EVERYTHING CLEANED OUT, INCLUDING "PICKLED" STOCK.—TREMENDOUS SALE FOR HOLLY AND LAUREL.—PLANT TRADE ACTIVE BUT QUALITY OF PLANTS BELOW AVERAGE.—ARTHUR NEWMAN'S RESIDENCE BURNED.—A FINE ELECTRIC SIGN.

A memorable day for Boston florists was wintry December 24. With the mer-

cury down in the icy regions and the wind howling and whirling up great clouds of dust and rubbish in its effort to make life as uncomfortable as possible for shoppers and others who found it necessary to be out of doors, a very snug wrapping of cotton and paper was required to protect plants and flowers, and the problem of safe delivery under such conditions added much to the labors and perplexities of the busy day. In this respect December 24, 1897, was a duplicate of December 24, 1896, but the street car strike of a year ago made things much more disagreeable than they were this year. A clear sky and bright sunlight also did much to atone for unfavorable conditions and brought a rich complexion to Bridesmaids and other varieties with blushing propensities, which had presented a somewhat washed out appearance earlier in the week from the effects of a protracted combination of dark weather and cellar storehouse.

Of late years it has been dangerous business to hold flowers for a chance boom but this was one of the infrequent occasions when that policy was not productive of loss, for the arrangement of the weather through the week reversed the usual rule and there was starvation instead of a surfeit on the last day. Business had been very slow in starting. Trade in "greens" was fine but advance orders for flowers were not forthcoming and the retailers had good reason to look with distrust on the prospects. To the wholesalers came the first premonitions of the coming onslaught. Early shipping orders had been few and far between and the refrigerators were packed to the doors. Things started to move on Wednesday and on Thursday they fairly hummed. Telephone bells kept up a continuous jingle and telegrams came thick and fast, many bearing signatures that had been strangers to Boston shippers ever since last Easter. Welch Bros. and Sutherland kept a large force of extra men busy and at McCarthy's and Galvin's the same lively hustle was observed.

The great pinch came on colored flowers, the supply being far short of the demand. This was true of everything with any pretense to red or pink color, from fancy American Beauty down to third quality carnations and existed in increasing ratio from Thursday morning until the end of the game. But white flowers are better than none and the final rush gathered in everything, even stevia. When you can sell stevia you can sell anything and for the first time on record stevia was sold out clean. Weather conditions being against the profitable carrying on of much street trade in cut flowers, the sidewalk vendors gave their attention to "greens" and the regular stores appropriated everything that was offered—good, bad and indifferent. Accumulations of draggled roses and drowsy carnations left over from the abundance of the previous week all found takers finally and even the blue Beauty and black bull-headed Meteor were absorbed. There was many a wry face and doleful protest but no escape and by the time Boston's Christmas bird usurped the table dedicated to the illustrious beau, the tired florists had all locked their doors and departed leaving nothing but emptiness behind.

Much of the stock obtainable was "pickled," and unavoidably so, because of the absence of any demand for deliveries during the early part of the week. Receipts of bright, fresh material at the time it was most needed were very light and all such was sold in advance at prices not exorbitant, considering the conditions. Some extra special Bridesmaids were sold as high as $4 per dozen, but few roses, other than Beauties, brought more than $16 per hundred. There was a big hunt for Beauties at 50 cents to $1 each. Three to three and a half was prevailing price for good carnations of standard varieties and many more could have been sold. Hector, Scott and Daybreak were valuable property on Friday and a small consignment of "Bong Tong" brought a gilt edged price. Violets were sufficiently plentiful for the demand which was at no time particularly brisk, $1.50 being accepted gladly for good stock. Bulbous stock, being for the most part white, moved slowly with no advance on regular rates.

The demand for holly continued unabated to the end. Despite all predictions to the contrary the quality averaged very good. Considerable embarrassment resulted from late arrival of a number of large invoices and the temporary shortage afforded a good pretext for an advance in prices which early rivalry had cut down close to first cost. Laurel wreaths met with a tremendous demand, those that had been offered as low as 8 cents on Monday being held as high as 40 cents on Friday at the markets, and the supply of laurel festooning fell far short of the demand at 12½ cents a yard, which is double the ordinary price. The small, flat wreaths of holly leaves had a very limited call and seem to have lost their popularity, doubtless because buyers have learned that they look well for but a few hours in a warm room. English mistletoe arrived late. It was in good condition but the demand was light.

The cut flower business of the retail establishments was restricted to the 24th and 25th and the demand was confined almost entirely to boxes of cut flowers. Plant trade had been very good all through the week although this department of the business here suffered from the inferior quality of the plants offered. Many of the azaleas showed the effects of severe forcing. Cyclamens and primroses averaged far below the usual trade standard, and fern pans were, oftener than otherwise, filled with adiantums and other frail subjects entirely unsuited for use in the trying atmosphere of the dwelling house. Until the plant growers for the Boston market make a better showing than they did this year the Christmas cut flower trade is not likely to be dislodged from its position of pre-eminence. Not much attempt at display was to be seen in the florist's windows, palms, poinsettias and stock of similar character that would not require much attention or replenishing being most in evidence and a few bunches of holly and mistletoe suspended with scarlet ribbon overhead.

The fine residence of Arthur Newman at Brookline was destroyed by fire at 3 o'clock on the morning of December 24. Very little of the valuable furniture which it contained was saved. The fire is supposed to have been caused by an overheated furnace pipe.

J. Newman and Sons have their sign written in electric lights over the front of their store on Tremont street. It makes a very conspicuous object when lighted up at night.

J. T. Butterworth has been bringing in some well flowered Christmas roses. They are very appropriate and much liked for the holiday season.

The first freesias of the season appeared at George A. Sutherland's last week.

Visitors in town, Wm. Appleton, W. S. Hogg and Wm. Flanagan, Providence, R.I.

St. Louis.

MARKET REVIEW.—ROSES.—CARNATIONS.—TRADE NOTES.—THE BOWLING CLUB.

Christmas week closed with the dealers all satisfied, both in regard to prices and quantity of trade. It seems every grower held back his stock for not only a few days, but weeks, and the consequence was there was an unprecedented amount of stock shoved into this market at the last moment. Orders that were taken at top prices were quickly countermanded by the dealer, who is always ready to take advantage of any heavy receipts. The growers are largely to blame for this state of affairs. I have always advised them never to hold their stock too long; ship it in when it is ready to cut, accept the regular market prices, and in nine cases out of ten you will be ahead on the deal. All growers imagine that the dealer is very anxious for stock on Christmas day and will snap up most anything in the shape of flowers; in this the grower finds himself mistaken, for the dealer when he has a large quantity to select from only pays top prices for very select stock, and the balance is sacrificed at very low figures. The week following Christmas finds the dealer with lots of orders for balls, receptions, weddings, etc., and for the New Year's day they all say that orders are heavy.

Beauties are arriving this week in very limited quanties, and the stock generally very poor; Carnots always sell well if fancy; Brides and Bridesmaids are in liberal supply, and stock generally good; Meteors are still very poor and in big demand; Woottons are way off color and selling poorly; Perles are in good demand, stock, however, is not what it ought to be. California violets are selling well at good figures; the same may be said of double violets; single violets are getting more plentiful. Harrisii lilies sold well during the week. Callas are always in demand for funeral work. Narcissus and Romans are selling well. The demand for smilax has increased during the week. Carnations are beginning to appear more plentiful in this market. It seems the scarcity which has existed in our market up to Christmas has been noticed by the northern shippers, and as prices have always been at the top notch, they are beginning to send their stock to this market.

Geo. Waldbart, the popular Grand avenue florist, has been left very busy this week and reports a bigger trade than ever.

Fred. Ostertag, formerly of Ostertag Bros., has opened up a very fine establishment at 717 Vandeventer avenue. We wish you good luck Fred.

Mr. Herbert Heller, the hustling end of the South Park Floral Co., returned home this week after overseeing his big shipments, and some of the boys say a certain west end lady was the real cause of his stay here.

The bowling club had their regular bowl last Monday night, and a full house was present. Emil Schray was high man for three games with a score of 544; Chas. Kuehn second, 519; C. Beyer third, 503. High single score was made by E. Schray, 214; second, Frank Gillmore 199.

A. J. B.

WAYNESBORO, PA.—On Christmas morning we had the pleasure of seeing a clear yellow sport on our Kaiserin roses. Christmas trade was better than last season.

Philadelphia.

TRADE ALL RIGHT.—FLOWERING PLANTS SCARCE.—PRICES ABOUT SAME AS LAST YEAR.—POOR WEATHER.—WRAPPING TROUBLES STOREKEEPERS.—MILLIONAIRE ORCHID GROWERS OUT FOR CASH.

The Christmas of 1897 has come and gone and each can tell whether the trade came up to his expectations. So far as we can learn, the general opinion is that it was all right. Some men are jubilant and say it was the best Christmas they ever had, others wear a contented look and say it was quite up to former years while a few would like to have seen it a little better. There was not much new offered, probably a few more made up baskets of foliage and blooming plants, but nothing different in single pot plants. In fact flowering stock was quite scarce, there being but little variety and much of that not up to the mark. There was a great plenty of fine palms and ferns, and while they sold fairly, people seemed to want color. Jerusalem cherries sold very well, in fact we believe none were left. Ardisias were in good demand, but the stock would have gone better with just a little more finish to it; a few more berries and a better color would have moved them all. A well grown plant perfect in every respect is rarely left after such a rush as Christmas or Easter, but stock very nearly up to the mark is often seen standing unsold, becoming in the end a total loss. It is the polish of perfection that compels admiration. A little more care, a little attention at the right time would have put on the finish and moved the stock into the first class.

Flowers of nearly all kinds were scarce. We noticed very little pickled stock. Carnations had been hustled about so lively that they had no time to get sleepy, and there was scarcely enough to go around. Beauties were in great demand, the highest grade especially being sought for. In fact, there was but little of anything left unsold on Christmas morning, and many orders had to be filled with stock cut that day, prices were about the same as last year, Beauties selling from $25 to $100 per hundred. Teas of all kinds ranged from $8 to $20, a few specials bringing $25. Some Carnots sold as high as $30, and seemed to be worth it. Carnations worth looking at brought $3 to $4 while a few fancies sold from $6 to $8. The top price for violets was $2, except for a few extras for which $2.50 was demanded. Plenty, however, sold for $1.50 and some for $1, which was too much for them. California brought from 75 cents to $1.50 per hundred, the latter, some extras handled by Ed. Reid, were very fine. Valley was hardly up to the mark, and sold from $3 to $4, while some extras brought as much as $6. Hyacinths and narcissus moved lively at $3 to $4. Holly and other greens seemed to sell well, and most stocks were cleared up.

The weather for the week before had been very dull and cloudy, scarcely any sun and for two or three days previous, and Christmas day there was from 10 to 12 degrees of frost. One large grower said that although he had increased his plant the past season, he had not cut half as much as for last year's holiday trade. Another whose specialty is Meteors, said that $500 was a low estimate of what he had lost on account of the dull weather. The storekeepers had their own troubles, as everything had to be wrapped securely. This hinders prompt delivery at busy seasons. Several carloads and quantities by boat, of Southern needle pines were thrown on the market and sold on the streets at 10 cents each, three for 25 cents.

The December meeting of the Horticultural Society was graced by a fine collection of cypripediums from the Roebling collection at Trenton, N. J., Mr. Clinkaberry bringing them in in person.

John Burton's seedling white carnation, "Alba Superba," sold readily at $8 per hundred, about 600 of this charming novelty found their way to the retailers.

At the next regular meeting of the Florists' Club, which is to be held next Tuesday evening, Albert M. Herr is to deliver a paper on "The Newer Carnations." All who have any choice new varieties or well grown standard sorts are invited to forward them to Horticultural Hall, Broad street, to reach there not later than 7 o'clock Tuesday evening. Quite at interesting display is expected.

Most of the cattleyas which came into the Philadelphia market came from millionaire Twombly's conservatories, Madison, N. J. It will not be very long before all orchids grown for commercial cut flowers will be grown either by the retail florists themselves or by millionaires.

One of the innovations brought into play by the retailers was the use of coupes in delivering orders. Mr. Battles was the first one, we understand, to put this new move into operation. The weather was certainly very trying, and taxed the ingenuity of the retailers as well as the growers and wholesalers to get their flowers delivered on time and in good shape. K.

Cincinnati.

BUSINESS INCREASING.—PLANTS SELLING WELL.—DEATH OF KARL WOLF'S SON.—FRED. WALZ SICK.

Christmas is a thing of the past and the growers as well as store men are well pleased, having done a good business in their various lines. The storemen and wholesale houses report an increase of 25% over former years. The supply of roses was not equal to the heavy demand, many thousands could have been sold had they been available; it seems as though mostly all our leading growers were off crops. In carnations the supply and demand were well balanced, they reached all the way up from $2 to $5 per 100 with the exception of 1500 Evelinas which sold readily at $6. Violets came in on the home stretch, very few could be seen the first part of the week, but on Thursday and Friday morning several growers unloaded their stock and surprised the retailers. Valleys were in good demand and sold readily at $5 per 100; Romans $3 and narcissus brought $4 to $5.

Christmas green and holly was a drug on the market and sold at any price offered. Imported mistletoe was scarce, only a few of our Fourth street stores could afford to handle this expensive article; but southern or American mistletoe sold well, and more has been used than in former years.

The market was exceptionally dull, owing to the cold snap we had, and it was therefore very difficult to handle and dispose of plants. Several growers brought in small lots and report fairly good trade.

Hoffmeister Floral Co. had an extra store engaged for their Christmas greens and plants, while their regular store was replete with a full line of decorative plants and flowers. Miss Carrie Hoffmeister reports satisfactory business.

Mr. Karl Wolf, of Cumminsville, has our sympathy in the loss of his bright little boy, December 20.

Mr. Fred. Walz is on the sick list.

H. SCHWARZ.

Milwaukee.

CHRISTMAS TRADE SATISFACTORY.—PALMS AND FERNS SOLD WELL.—GREAT DEMAND FOR FLOWERING PLANTS, WITH SHORT SUPPLY.—MORE CHURCHES DECORATED.

The Christmas trade on the whole was quite satisfactory, but one has to take a general average of all reports to arrive at such a conclusion. Several retail dealers report increased sales to a gratifying extent, curtailed by their inability to procure more stock. There appears to have been no waste.

Palms and ferns sold well, but the demand for flowering pot plants could not be satisfied; it is impossible to estimate what could have been sold if the stores had had a supply such as is usual at Easter time.

The question of holding dormant stock over, as is done with valley, presents itself. Here is a field for enterprise.

Cold weather during the week made the delivering difficult, particularly for those who had decorations. The churches were more generally decorated than for the past two years.

One peculiar circumstance is noticeable this season in comparison with the past; that is the almost complete monopoly of Milwaukee trade by its own wholesale market. Years ago Chicago was our main dependence. A very small percentage comes from there now. Another feature is noticeable and may solve the "fakir" problem. Florists put holly and green on sidewalk and paid attention to the transient trade. It made the fakir less conspicuous. They really encroached upon what he considers his field of operations. If this is followed up the storekeeper may hold his own. C. B. W.

Syracuse, N. Y.

INCREASED TRADE.—DULL WEATHER PROMOTES IMPORTATIONS.—GREENS GO FREELY.—RED FLOWERS IN DEMAND.—GROWING PLANT TRADE.

Christmas trade has been very satisfactory. The majority of retailers report their trade as equal to that of last year, while some say an increase of from 5 to 15%. The weather of the week preceding Christmas was anything but favorable to the production of flowers, consequently import shipments were much larger than usual, which to use the remark of many, has taken lots of gilt off the gingerbread. Not a glimpse of the sun the whole week, and the temperature remained below the freezing point the whole time, culminating Friday evening with a temperature of 6° above zero and a strong northwest wind, causing the safe delivery of such flowering plants as lilies, azaleas and begonias to be carried on at serious disadvantage. Holly and other greens, with the exception of mistletoe, were of much better quality than usual, holly especially well berried and very green. But this is about all the good we can say about it, for this branch is not confined to the florists and seedsmen alone. This year, much more than formerly, the groceries and meat markets were well supplied on almost every hand, selling it at from 10 to 15 cents per pound, However, the florists managed to clear out at the little better figure of 25 cents per pound, and holly wreaths sold better than ever before at 50 cents to $1.50

each. There was but little call for ground pine and mixed wreaths.

The amount of flowers placed on sale was about equal to the demand, with the exception of Beauty roses and carnations, which were short, owing in a great measure to some shipments going astray. There was a very noticeable increased call for red flowers, such as red carnations (which were very short) and poinsettias, and also high grade American Beauties. The quality of all flowers other than roses was up to last year's standard, out-of-town roses being poorer, very weak stemmed and flowers soft. The general run of retail prices obtained were as follows: Beauty $9.00 to $18.00 per dozen, Maids, Brides, Mermets $3.00, Gontier Perle, Niphetos $2.00 to $2.50, Meteor $3.00 to $6.00, carnations 75 cents to $1.50, violets $3.00 per 100, valley, hyacinths and narcissus $1.00 per dozen, Harrisii and callas $3.00 dozen, and poinsettias $6.00 dozen heads. Smilax did not sell well for some reason, the demand being more for cut ferns and asparagus.

There is no doubt that nice flowering plants are gaining steadily in favor for Christmas time. An increase of 25% over last year was noted in this line, while palms and ferns sold about the same as last year. Some attribute the increase to the high price of cut flowers, but that is almost always the case at Christmastide. Others say they give more general satisfaction than cut flowers. Azaleas were the favorites, followed by cyclamens, lilies, primroses and cinerarias. The only plant that did not sell so well as formerly was Begonia incarnata. Unfortunately the weather is a very serious drawback with which we have to contend at this time of the year in this line. Careful and safe delivery is not only very expensive but takes a great deal of time papering and tying up. So far but very few complaints have been received of plants frozen or bruised. P. R. Quinlan & Co. had their store re-decorated in white and gold for the holidays, which, with the addition of more electric lights, gives it a very lively and attractive appearance. Their two windows were noteworthy, one arranged with white azaleas banked by Harrisii lilies, ground pine, and adiantum being used for ceiling and festooning, the other of red azaleas (var. Apollo) and well berried holly.

ALPHA.

Rochester, N. Y.

THE WEATHER.—BLOOMING PLANTS DECIDED FAVORITES.—FUNERAL WORK AND RECEPTIONS USING UP SURPLUS STOCK.

Christmas week started in quite mild and pleasant. We were in hopes that these conditions would prevail until the rush of business was over, but before the 22nd zero weather was upon us, with snow and high winds in the bargain. The severe cold snap lasted until about noon on the 25th, when the thermometer went up fast above the freezing point. It was not the ideal weather for plant or flower delivery, the utmost care in packing and wrapping would not prevent the freezing of a few packages in the many hundreds sent out. It is really miraculous that not more of them were damaged.

Our florists are well pleased, however, with their Christmas sales generally; some of them had laid in too generous a stock of cut flowers, but taking all in all, comparatively little was left over. Scarlet carnations were short in supply; nothing else was really scarce exactly, some mignonette and a lot of white roses remained unsold. Violets were in good demand, as usual, and perhaps a few thousand more could have been disposed of. Romans and Paper Whites were very plenty, so were stevia and white carnations. Roses, on the average, were not as good as we would wish them to be for the best trade. Prices obtained were fully as good as in past years, but varied considerable with the quality of the goods offered.

The plant trade would have been highly satisfactory to all if the wrapping and packing for delivery could have been done away with, much extra labor and precious time had to be expended on plants, thus lessening the original profits to some extent. Blooming plants were decided favorites this year, azaleas, poinsettias, begonias, cyclamens, stevia, hyacinths, lilies and primroses with a few well grown Bougainvillea Sanderiana and a limited number of good early cinerarias was about all offered here in this line. Quite a large number of ferneries in all sizes and shapes were sold, but the sales in palms were not as large as anticipated. Very large quantities of greens were used everywhere, more in fact than ever before, but there was a generous supply on hand; all were amply prepared for an increased demand, and plenty of good holly is yet stored in the commission house, owing to belated arrivals.

The weather now is quite moderate, between 20° and 30°. The week commenced with a good demand for funeral work, which gave an outlet to surplus stock of white flowers left over from the holidays. A number of receptions are also going on daily since Monday and the demand for flowers is unexpectedly brisk; for the end of the week several orders calling for more elaborate decorations are on the books of various firms, and New Year's week is likely to prove a profitable one for our florists. K.

Delaware, O.

Business here is improving. The writer on Christmas Eve met our genial florist, Mr. Joe Cunningham with a gallon of oysters in each hand for the supper of his extra help. There is no better fellow alive than Joe, as all his friends call him, certainly no more honest and reliable than he is. On Sunday forenoon I meandered up to Joe's plant, and being an old florist myself we like to compare notes and again I launched at Joe the question, "how is business?" "Well," said Joe, "of course we won't look over the books, as this is Sunday, but last night I went over them and I've done fairly well this Christmas;" and for once in 11 years, all the time I have known him, he acknowledged that business was good. I find that Joe is not the only florist that way. D. G.

SITUATIONS, WANTS, FOR SALE.

Advertisements under this head will be inserted at the rate of 10 cents a line (seven words) each insertion. Cash must accompany order. Plant advs. not admitted under this head.

Every paid subscriber to the AMERICAN FLORIST for the year 1898 will receive on request, a coupon for one five line want "adv." free, to be used at any time during the year.

SITUATION WANTED—By an experienced grower, age 27; well up in roses, carnations, etc. etc.; highest references; single; wages $25 per month. Address GROWER, care American Florist.

SITUATION WANTED—By a German, first-class grower of roses, carnations, 'mums, violets; would like to change his present situation. Address GROWER 113, care American Florist, Chicago.

SITUATION WANTED—By a reliable, industrious young man in park or private place; single, 23 years of age, seven years' experience, good references. Address G, care American Florist, Chicago.

SITUATION WANTED—By an experienced grower of roses, carnations, 'mums, etc., to take charge of commercial place; age 27, single; strictly temperate; steady position. Address B, care American Florist.

SITUATION WANTED—By Scotchman, married, age 32, as gardener in first class private place; good practical experience in all branches; highest references. Address GARDENER, care American Florist.

SITUATION WANTED—By practical florist and designer as foreman; specialist in rose growing, carnations 'mums, violets; references, age 36 disengaged January 1st. State highest wages. Address G W., care 691 W. 9th st., Canton, Ohio.

SITUATION WANTED—One who has had some experience in decorating and filling designs; is a good harmonizer of colors; would like to perfect himself in that line, with a strictly up-to-date Eastern firm. Where can I find such a firm, and what will I have to pay for such knowledge. PENNA., care American Florist.

WANTED—First class rose grower; one capable of taking charge; one familiar with growing catalogue stock preferred; state wages expected. Address A B., care American Florist.

WANTED—Partner in Chicago, with $1,000 cash, to take half interest in well established, paying florist and greenhouse business; experienced man preferred. Address L F., care American Florist.

WANTED—Propagator of herbaceous plants in an eastern commercial place; one who has had some experience; give age, nationality, experience, reference, and wages expected. Address M T S., care American Florist.

FOR SALE—Greenhouse plant of 5,000 feet of glass in Jamestown, N. D.; price $1,500; ½ cash, balance may be paid in cut flowers. Address W. W. SEEKINS, 921 E 3rd St., Duluth, Minn.

BUSINESS OPPORTUNITY.

One of the most valuable florists' establishments in the Middle South, ½ interest for sale or will lease to an enterprising, wide awake business florist: 7 modern greenhouses, 25x150 ft., one 30x75 ft., three 20x50 ft., 75-foot violet house, iranzee, splendid windmill and watering facilities, packing sheds, office, 5 acres of splendid land for rose growing situated within easy access of Atlanta, Ga., on one of the most beautiful driveways of the city. Florist store in the Kimball House block with first-class facilities, and the best stand in the city; connections with several of the largest tourist hotels in Florida, with shipping trade in cut flowers started. This is an established business with unlimited opportunities for enlargement. Aside from the cut flower trade there is a large opening for building up a shipping trade in nursery-grown roses, which thrive and make more growth here in one year than in three seasons in the North. The owner has other large interests which occupy his whole time and wants a thorough-going man who has some means and an ambition to extend an already well established business in this exceptional field. This is not a broken down or failing establishment. The owner does not desire to sell out the greenhouses, but would dispose of an interest or lease, so that an enterprising florist would have such interest as would insure his exclusive application to maintaining the high character of the present business and working for its extension. Address JOS. THOMPSON, Atlanta, Ga.

WANTED

A man to take charge of a fine cemetery, married, small family, English; work in greenhouse in winter; nice house to live in and 1 acre of garden; a steady place, with set wages to right man. Address

THE MORRIS FLORAL CO., Morris, Illinois.

For Sale or Trade.

Or will rent to responsible party on long time. The greenhouses all stocked, heated with hot water, containing 4000 feet of glass, gas, water, electric light, sewer connections, hydrants through houses and yards, and stable connected with store which has fine cellar with five living rooms in second story, on one of the main thoroughfares in heart of city; electric cars at door connect with all parts of the city. Address

S. J. SMITH,
21 E. Lee Street, Lawrence, Kan.

FOR SALE.

At less than half its cost, or for rent, about 28,000 square feet of glass with grounds and modern 12-room dwelling, built a year and a half ago; greenhouse nearly new, all heated by steam, well stocked and in good order; located on street car lines between St. Paul and Minneapolis, and a well paying wholesale business established. A splendid opportunity for a good live man. Sale price, $10,000; rent $150 per month. If you mean business, address CHRIST HANSON, St. Paul, Minn.

FOR SALE.

Greenhouses in one of the best cities in Wisconsin. A good investment and a money maker for a hustler. Owner must retire on account of poor health

For particulars write **ELLIS & POLLWORTH,** Milwaukee, Wis.

Philadelphia Holiday Markets from the Growers' Standpoint.

Crops of flowers were lighter this Christmas than was expected by the growers, especially those of a higher class, such as American Beauty among roses and cattleyas among orchids. Crops of choice flowers are generally light for Christmas. What made it somewhat worse for the grower was on the Thursday preceding Christmas a very heavy northwest wind blew a gale with the outside thermometers registering 14° to 15° above zero. This shortened the crops very perceptibly. This fact perhaps had its effect upon the retailer for he would give the grower no peace nor rest, ordering large quantities of the choicest flowers and endeavoring to exact promises for given quantities for the treble X stock. Who can blame them? They would not be so anxious if these choice gifts of nature and developments of skill and care could be produced at will, or stored away and brought out in any quantity at a given time like kegs of nails!

We all realize the hardships of the retailer at Christmas and Easter, but does the retailer ever give the grower a passing kind thought? Apparently not. It may seem foolish and unnecessary, but there was many a grower who did not sleep a wink during Thursday and Friday nights; what with the high wind and cool weather and the anxiety to give every retailer all he had ordered and to get it to him just when wanted to the minute in good shape, was a strain of which even the retailer apparently has not the slightest conception.

This is a mutual business; the grower and retailer are each necessary to the other, but the methods brought to bear upon the grower at certain seasons of the year by the retailer would indicate that they were natural enemies and each must of necessity be antagonists. The grower is frequently, and with truth sometimes, accused of bringing in to the retailer on the morning before Christmas what he chooses to designate "pickled" stuff. The retailers are largely responsible for this state of affairs. They need probably ten times as many choice flowers on the day before Christmas as they do on any other day, excepting, of course, at Easter, and they appear to think and act as though all that the grower had to do was to touch a button, or wave a wand, and presto! Cattleyas by the bushel and Beauties by the mile would magically appear ad libitum ad infinitum.

A fact to be deplored among some of the store keepers is that no matter how well they may have been served at Christmas time, they will without ceremony turn the grower down a few days after and justify themselves in the action by unjustly complaining about the prices. Retailers guilty of such practices are spotted, and may rest assured that there is a hereafter, and there will surely come a time when the grower may with justice retaliate. The philosophy of reciprocity can never be put into practice with more satisfactory results than among the retailers and wholesalers and growers of flowers.

American Beauty, fancies, brought readily $100 per 100 wholesale, and were as good as we ever had here before at Christmas time. Some that were brought in from other centers were not so good as the home grown product at the same price. Cattleyas were bought at $40 to $50 per hundred; most of these came from out of town. Unfortunately some shipments from a distance were frozen and utterly ruined. Whether the grower, the retailer, or the express company will stand this loss is problematical; the grower generally has to pocket these losses. Cypripedium insigne could be had in any quanty, the highest price paid was $15 per hundred. The wise retailer used these wherever practicable, associated with "Romans" and "Valley," and a dash of green, were easily and quickly put up in boxes, gave satisfaction and the profits would be made according to the conscience of the dealer. This class of flowers are a great help at Christmas, because there is hardly any limit to the quantity which may be produced, and the wholesale price is very reasonable.

The ever popular Bridesmaid was in evidence in large quantity and the quality was first-class. Meteor also came in for its share of calls, and the prices were $25 per hundred for the best. There was not enough Carnot to cut any figure at these holiday times. It will hardly pay the grower at the tea rose prices. The only way for the grower to realize a profit from this rose is to send in only the select buds, destroy all the poor ones and work up a fancy trade at remunerative prices, otherwise it will have to be dropped. L.

Providence, R. I.

Your correspondent stopped at one of the evergreen stands down town, and while there a well dressed lady, who was looking at some very nice laurel wreaths, full two feet in diameter and well made, the selling price was 25 cents. She ventured to ask if he would sell four for 50 cents. On being refused she did not purchase.

Messrs. Butcher, Johnston and Rennie have resumed their stations after their illness.

Christmas is now over and we are getting things into line for the next call. On the whole trade was quite satisfactory. Roses were a little off, but the price compared with the quality, $2 per dozen was about the price for fair stock; selected brought $3. Carnations sold for 50 cents per dozen, and from that to $1 for real choice varieties. Scarlets and reds sold at sight and were quickly disposed of, while white varieties seemed to hang fire, and many of us had a fair stock left over. Violets were a little in excess of the demand, but brought good prices, $2 per hundred. Mignonette and bouvardia sold well. M. J. Leach, of Pawtucket, has the credit of marketing the only Harrisii lilies, which, by the way, were well grown.

Geo. Kelley and Mr. Miller, of the Rhode Island greenhouses, had the cream of azalea plants. Other dealers were a little tardy with theirs; they sold well. Other small pot plants, such as primroses and cyclamens, found ready market, while larger plants of palms, etc., seemed to go a little slow. About $1 seemed to be the size of the limit of capital to be invested, although there were some exceptions to this rule. There is an increasing demand for Christmas ferns and all good holly was cleaned up, and some were obliged to order by telegraph to New York, as the markets here were exhausted. If holly dealers would grade their stock and charge a fair price for No. 1 goods, and sell their inferior stock at a low figure, it would give much better satisfaction, as well as saving many hard words and lots of "kicking."

Good fortune favored us on Christmas day, as the weather moderated decidedly from the day previous, which enabled us to deliver plants and flowers with less liability of freezing, thus avoiding the experiences of last year. LITTLE RHODY.

THE AMERICAN FLORIST

Subscription $1.00 a Year. To Europe, $2.00.
Subscriptions accepted only from those in the trade.

Advertisements, 10 Cents a Line, Agate; $1.00 per inch. Cash with Order.

No Special Position Guaranteed.

Discounts, 6 times, 5 per cent; 13 times, 10 per cent; 26 times, 20 per cent; 52 times, 30 per cent.

The Advertising Department of the AMERICAN FLORIST is for Florists, Seedsmen, and dealers in wares pertaining to those lines ONLY.

Orders for less than one-half inch space not accepted.

Advertisements must reach us by Wednesday to secure insertion in the issue for the following Saturday.

Address THE AMERICAN FLORIST CO., Chicago.

THE AMERICAN FLORIST wishes to hear from its readers. Tell us what you like about the paper—tell us what you do not like about it—if there is anything. Let us know what you would like to have in its pages. If you have anything new send it along. If anything of interest occurs in your town write to us. Whatever interests you interests THE AMERICAN FLORIST. If you can write more readily in German, Swedish, French or any other language, do so; we can read and translate it. We may not always be able to publish your letter, but if you send us your name and address (this will not be published if you say so) we can write to you. If you wish information on any subject, your questions will be answered by the best specialists in the country. Do not forget to say, "saw your advertisement in THE AMERICAN FLORIST," when corresponding with advertisers.

OWING to the increased number of pages, and increased circulation of this paper, advertisers who are desirous of making changes or sending in new copy for their advertisements would confer a favor on the management by seeing that the same reaches this office not later than Wednesday morning of the week in the issue of which their insertion is desired. The great amount of work entailed in maintaining the standard of excellence which has made the AMERICAN FLORIST famous renders the above request necessary.

W. A. McFADDEN.

THE WEATHER.—CARNATIONS SOLD WELL, ROSES SLOWLY.—INCREASED CALL FOR POT PLANTS.—BUSINESS REPORTED BETTER.—DECORATIONS AT THE UNION LEAGUE CLUB BALL.

The weather clerk never could have selected from his varied stock of weather for all occasions a more miserable article than that shoved off on the florists for use on the Thursday preceding Christmas. It could not possibly by any stretch of toleration, have been graded higher than the very worst of job lot culls. The wind blew out of the northwest all day with the velocity of a blizzard. The temperature, low enough in all conscience to start with, kept descending until we had about twenty degrees of frost in addition to the high wind, and then to crown all, the snow fell in sheets, rendering the use of delivery wagons on the ice coated streets the hardest and most dangerous of work for horse flesh. Oh, it was fine! On Friday the wind died down, but the cold stayed right with us and every plant, excepting with those who preferred the excitement of rushing wildly for shelter every time they jerked one out of their wagons, had to be carefully overcoated for the occasion. Having the wagons out for long periods of time, with the doors constantly being opened, added greatly to the hazardous character of flower delivering. Friday night the thermometer fell to within three or four degrees of zero, but the weather cleared off beautifully, so that Saturday the temperature rose rapidly, and by about the time that we didn't need to care a tinker's objurgation how hard it snowed, blew or froze, the weather had become almost ideal—or at least as nearly as it ever attains to that point in Cleveland during the winter season.

There had been a constant impression current for a long time that flowers would be short in supply, more especially carnations, and this impression was justified by the outcome Carnations in the stores, with only one or two exceptions, were sold out in nearly every instance early in the day. They were far and away ahead of other flowers in the popular estimation and sold at fully as good prices as in any former year, in some instances, bringing more. At a wholesale rate of 3 to 4 cents for ordinary stock, however, there was a necessity for at least as high a rate as usual to allow the retailer any margin.

Roses have been variously reported. With some they were in good demand and sold well. Others found them to go but slowly, and then only by reason of the dearth of anything else. The high price was ordinarily assigned as a reason for this. American Beauties were rather short, some lots shipped in being frozen when received. A good many were off color and sold poorly in consequence. Good ones seem to have sold very well.

Violets seem to have been in sufficient supply with all but one or two stores, and usually sold in a satisfactory manner.

Orchids were not very much in evidence and what there were to be had sold as a rule.

Bulb stock was practically confined to Paper White narcissus and Roman hyacinths which sold about the same as usual, both in quantity and price. They have a place for filling in in discretionary orders or for mixed flowers, and cannot be dispensed with, although there is no money in handling them and there is only a comparatively slight call for them for their own sake.

The most noticeable feature—and in this there is absolute unanimity in the reports—was the increase in the call for pot plants of all sorts, although as would naturally be supposed, blooming plants were much in the lead as compared with palms and other foliage plants. Azaleas were much the most popular plants that were offered. They sold well in all the sizes that were offered, being mostly plants that retailed at from $1.50 or $2 up to about $6. Cyclamens and primulas, begonias in variety and poinsettias also sold very well. Outside of palms, pandanus Veitchii and utilis, araucarias and Otaheite oranges were offered for the consideration of the buying public.

Business has been generally reported as considerably better than in former years, with prices as a whole not varying a great deal, increase being usually estimated at from ten to twenty-five per cent. In nearly every instance when inquiry was made, it was found that good stock was sold out, although, of course, where there was considerable variety offered, it would naturally be found that there would be some small surplus in some few things, but not enough to be a serious matter.

Smith & Fetters secured the decorations for the annual ball of the Union League Club, one of the important social functions of the season. A great deal of work is connected with the contract, which was carried out very nicely in every way. A good deal of holly, laurel, wild smilax went into the work, especially for wall decorating and garlands overhead. One of the prettiest rooms was one used for dancing. The color scheme of the room is in white and gold and lent itself for that reason to a very effective and artistic decoration. The huge mantel was decorated with palms and vases of Harrisii lilies, with a generous allowance of Meteor roses which were beautifully contrasted with the yellow, white and green of the room itself and the subordinate decorations. White azaleas were also used very effectively in the work. The president's reception room had La France roses for the principal feature of the mantel and Bridesmaid roses elsewhere. Throughout the entire lower floor palms were used in profusion. In the dining room upstairs no attempt had been made at elaboration of decoration, everything in that line being confined to simple flat decorations or informally arranged tall vases of roses in different varieties.

AMERICAN SEED TRADE ASSOCIATION.

JEROME B. RICE, Pres.; E. B. CLARK, 1st Vice-Pres.; S. F. WILLARD, Wethersfield, Conn., Sec'y and Treas.

A LONDON LETTER of December 15 reports seed trade dull in common with other general lines of business.

SEVERAL LILY GROWERS in Bermuda are reported to have injured their planting stock of bulbs by immersing them in a solution of corosive sublimate. Much of this stock has since rotted.

HOLLAND GROWERS, December 15, predict that hyacinth prices will be higher next season. Tulips will be as cheap or cheaper. Narcissus Von Sion and N. ornatus may advance slightly. Other miscellaneous sorts which have generally sold well this year will hold their own. The future of the bulb trade is encouraging.

IN FLOWER SEEDS, cobæa is short, phlox higher, nasturtium more plenty, marigold scarce, smilax short, asters will advance from first quotations.

Greenhouse Building.

Keene, N. H.—Ellis Bros., one commercial house 25x50.

Portland, Me.—Frank Dudley, one conservatory.

Rahway, N. J.—Wm. Saling, range of commercial houses.

Newport, R. I.

Business the past Christmas was not as good as previous years. Roses and carnations were scarce. In pot plants hyacinths, primroses, azaleas, cyclamens, were for sale with little demand. Holly wreaths tied with large bows of red ribbon and wreaths of same material with star of immortelle set in their center found ready sale. Palms and rubbers were in little demand.

Carl Jurgens on the 24th inst. shipped 26,000 valley. He has at present growing on benches about 145,000. The orders he received for roses at Christmas far exceeded his supply. Mr. Jurgens has apparently soured on smilax and has taken up the growing of asparagus. Beauties grown on solid beds on his place have been very productive and given much satisfaction.

Mr. Arthur Griffin, late gardener for J. J. Van Alen has gone to Long Island.

J. J. BUTLER.

New Orleans.

As is often the case, we are at the end of December without having had frost heavy enough to have killed any plants in our gardens. The consequence is we have an abundance of roses, heliotropes, geraniums, violets and the like. Still the market plants do not sell very much yet, and it will be the same for about another month at least. Roses in pots sell well, but we regret to notice a new departure in raising roses in too large quantities for the market and offering them at too low a price. This way of treating roses as cabbages will not benefit the trade. It may be well enough for a grower to raise in quantities if it be to ship his stuff away, but when he works to glut his own market he is making a mistake.

Northampton, Mass.

Florists all report a big trade and say that they could have sold double the amount if they could have obtained it. Roses were the slowest sellers, owing to the high prices, but none were left over; Romans were in good supply and sold well; valley not over plentiful; violets were extra good and sold quickly; Paper Whites are not largely used here, but the rather limited supply was all disposed of at good prices; the flower for which every one asked was the carnation, of which the supply was not large, and orders were refused for them after Wednesday; undoubtedly double the amount received could have been sold. Holly sold well, although some was of rather poor quality; mistletoe was good but did not meet with large sales, most buyers preferring the red of the holly.

In potted plants the supply was limited to palms, ferns, primulas, cyclamen and a few azaleas and marguerites, also a few foliage plants. Everything in bloom met with ready sale and a goodly number of palms and ferns were also disposed of.

The severe weather made the delivery of plants rather hard, but by the use of plenty of wrapping material and quick time in transit all were safely delivered

G. W. THORNLEY.

Des Moines, Ia.

Christmas trade was not as satisfactory as formerly, owing to a shortage of flowers, and as a result much of the stock that was handled was shipped, and the prices were far too high for any profit. There was a larger demand for plants in bloom than formerly, and good palms found a ready sale; also plumosa in pots.

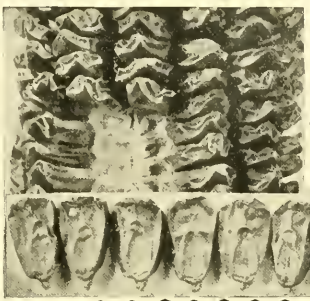
The people will not tolerate extortion in prices, and the sooner the wholesaler and retailer understand this the better for all. High prices in cut flowers aided in selling plants.

Holly and greens were too plentiful for any florist to sell much. Groceries, ten-cent stores, hardware and wall paper houses had it. In fact one grocer had two cases of holly from a wholesale florist that many of our retail florists are in the habit of patronizing.

We are not anticipating much of a New Year trade, as our people do not patronize the florist very extensively at that date.

J. T. D. F.

BRYAN, O.—Trade for Christmas was the best we have had in several years. Plants, palms, ferns, cyclamen and primroses being in the lead; smilax sold well.



C. C. WOXSETLER.

INCREASED DEMAND FOR POT PLANTS.—"OLD FASHIONED" WEATHER.—BOTANIC GARDEN CONSERVATORIES.—RHODODENDRONS FROM SEED.

Christmas, with its joys and surprises, rush and worry, is over, and it is the concensus of opinion that the business was fully up to the average of previous years, notwithstanding the recent opening of several new stores. Wholesale prices were, as usual, high, and undoubtedly this tended to keep sales down. Particularly was this true in the case of double violets, for the supply in sight was small, yet the prices were so great that there seems to have been enough stock to cover the money offered. A noticeable feature this year was the increased demand for pot plants for presents; the supply of medium priced flowering plants being insufficient to meet the demand. There is always a good call for medium priced plants in bloom, ranging in price from 75 cents to $2. Chinese primroses, cyclamens, begonias, poinsettias, etc., sold rapidly. Azaleas also sold well, but fruiting oranges do not seem to have moved so freely. We undoubtedly need a greater variety as well as a larger number of flowering plants at this time.

I am told that the business began earlier in the week than usual, but this does not seem to have relieved the final rush to any great extent.

The weather was classified as "old-fashioned," and necessitated careful wrapping to withstand the cold. However, we are generally prepared for cold about this time and I do not hear of much loss by frost. There was probably some damage to plants by hasty packing.

It is a relief to turn from the emptied houses of the commercial men, to the conservatories of the Botanic Garden which are now bright with the usual display of seasonable plants. The display of orchids here though small, is very creditable, and the show of cattleyas, calanthes, lælias, odontoglots and oncidiums is good. At present there are some remarkably good plants of Lælia autumnalis atrorubens in bloom. The sprays are very strong and carry from seven to ten blooms. Of course there is the usual collection of botanical species that are hardly showy enough for the trade. The cyclamens are not yet at their best, but are beginning to be quite conspicuous. I counted the blooms on a 6, 7 and 9-inch pot, and found respectively 67, 90 and 102 wide open flowers. These plants are still loaded with buds and will be a sight in two or three weeks. There are also in bloom a fine lot of cinerarias, heaths, reinwardtias, primroses, both Chinese and obconica, as well as Forbesii, floribunda, etc.

Some very fine forms and colors of obconica grandiflora rosea fimbriata and cristata are to be seen.

Apropos of an article in a recent issue of the FLORIST on growing rhododendrons from seed in this country, I may add that in the garden can be seen a beautiful lot of fine bushy plants of Sinensis indicum and mucronatum, that were grown by that prince of propagators, Jackson Dawson, of the Arnold Arboretum. No better plants could be imported.

C.

JOLIET, ILL.—Christmas trade has been good, fully up to former years. The last few days of sunny weather brought out stock in good shape. The only kick is having to compete with the large grocery stores. HARTSHORNE.

Good VALLEY is scarce—of the ordinary there's an abundance!

HOW'S THIS?

VALLEY PIPS. Watson's Best Berlin. $12.00 per 1000. These are the very finest selection of 3 year pips, all large and uniform in size and carefully packed. Quality unsurpassed. I will sell in unbroken cases (2500) @ $11.50 per 1000; cash.

CHRISTMAS TRADE REVIEW. — RETAIL PRICES.—'MUMS STILL USEFUL.—INCREASE OF BUSINESS.

In many respects Christmas trade was truly ideal. The weather the fore part of the week and till Friday was cold, the thermometer registering near zero most of the time. This, however, did not deter the shoppers from coming out, and buoyed up their spirits and loosened their purse strings. Stock generally was of good quality and abundant. Trade in other lines was good showing that people had money to spend and spent it freely.

Cut flowers sold well, though high prices deterred many from buying. Stock was generally good though some poor pickled flowers were sent in. It is strange that many of the growers will never learn the inevitably disastrous results of holding cut flowers for days and weeks in order to realize high rates at the holidays. After all the retailer loses most by such practices, and indirectly the grower also suffers. The evil could be remedied largely by wholesalers and commission men refusing to handle poor flowers at all. Let us hope growers, wholesalers, commission men and retailers may some day get together realize, their dependence on one another and resolve to put down the ever recurring hoodoo pickled stock.

Retail prices were as follows: Beauties, 75 cents to $1.25 each; Brides, Bridesmaid, Siebrecht, Testout and Meteor, $2.50 to $3 per dozen; Wootton, Perle, etc., $2 to $2.50 per dozen; carnations, 75 cents per dozen; Romans and Paper Whites, 75 cents per dozen; valley 75 cents to $1 per dozen; violets, $3 per 100; Easter lilies $3 per dozen. The greatest demand was for Meteor and the supply was not equal to the calls. Some belated 'mums of third or fourth grade were brought in and were very useful in making up assorted boxes.

Plants sold very well; good azaleas bringing $1.50 to $10 each. There was a good call for lilies and cyclamen plants. The greatest demand in plants was for palms which sold very readily, and at such reasonable rates that hundreds were disposed of for Christmas gifts.

The demand was good for holly, but lycopodium loose and made up sold slow at retail. Needle pines and wild smilax were not used to any great extent.

While the aggregate of sales has not been determined, I am confident they will show a net gain of 25% over last year's sales and the best in the history of the business in this city. FELIX.

Trenton, N. J.

Christmas at this point was an ideal one, with crisp, frosty air, bright sun, and quite a good deal of skating—for the first time this season.

There is a decided improvement in general business, the potteries especially working with more steadiness, and they are the leading industry here. Of course the store florists (and through them the growers) participate in the improvement. They report business about the same as last year in some cases, while others report a falling off. It seems probable the fine weather—favoring outdoor sport—curtailed the social functions demanding flowers, etc. JAMES MACPHERSON.

LYNN, MASS.—Gibbs Bros. have opened a store at the corner of Munroe street and Central avenue.

JOHN WELSH YOUNG,
.....GERMANTOWN, PA.

Worcester, Mass.

Flowers were not at all plentiful for Christmas, occasioned by the continuous dark weather that the growers have had to contend with, and consequently prices stiffened up considerably, though most of the trade keep prices as near the regular thing as is consistent with a fair profit.

Roses and carnations are very much off crop; what we are getting are of good quality and are bringing good prices. Violets are fairly plentiful and are retailing for $3. Harrisii lilies, white Romans and Paper White narcissus are plentiful, and in consequence of the shortage in roses, carnations sold well. A few good 'mums are still coming in and moving rather slow. Bouvardias, stevia, callas, and antirrhinum in white and yellow fairly plentiful and bringing good prices. There was a large increase in the sale of fern dishes in the various sizes and styles, retailing from 50 cents to $5. Palms, ferns araucarias, etc., sold well, and a few good cyclamens readily brought fair returns. Cyclamens and azaleas were just a little too late for the Christmas trade, I suppose on account of the dark weather. Holly wreaths and branches sold better than ever before, and laurel wreaths and roping, mistletoe, evergreen wreaths, long needle pines, etc., all were in good demand. A. H. L.

LATER.

Christmas trade was fully up to our expectations, the scarcity of flowers being the greatest cause for grumbling, but we sold all we had at slightly advanced prices, and we didn't lose much time sleeping either. There was a great demand for carnations, and unfortunately they were not at all plentiful; roses were also very scarce. Violets were a little more plentiful and sold well at good prices. Lilies, Romans and narcissus we had in quantity, and Lange's house of bouvardia, mostly scarlet, proved to be a bonanza.

Plants sold well, palms, ferns, ficus, etc., and lilies, cyclamens, azaleas and in fact anything with a bloom on it sold at sight.

There was also a big sale of green goods. Holly sold out very early, and there was practically none to be had after Friday noon; laurel, evergreen, pines, etc., moved rapidly, but mistletoe went more slowly.

If it had not been such a miserable, dark month and we could have brought out our blooms we would have broken all previous sales.

There will be a big demand for New Year's, and stuff is going to be very scarce. A. H. L.

Newport, R. I.

Never has the Newport Horticultural Society listened to a more interesting discourse than the illustrated lecture on Jamaica given on the 22nd instant by Mr. John Farquhar, of Boston. Although the night was wintry, yet every available seat was occupied and the deepest interest was manifested throughout. Mr. Farquhar practically covered Jamaica by views of rare features in plant life, of which he exhibited a grand and varied display; also views of the natives, their huts, crude conveyances, and general life. At the close of the lecture a vote of thanks by the society was extended Mr. Farquhar for the masterly and most interesting manner in which he handled the subject. J. J. BUTLER.

NEW GARNATION

"Mrs. S. A. Northway"

A soft shell pink, developing to nearly pure white.

OUR MASTERPIECE.

W. P. SIMMONS & CO.

Make the following statement to the readers of the American Florist.

As originators and introducers of
"Silver Spray,"
"Tidal Wave,"
"Daybreak,"
and "Rose Queen,"

each of which has, we believe, proven even better than we claimed for them. We NOW say for 1898 that

"Mrs. S. A. Northway"

possesses all the good points that go to make up a **first-class** and **profitable** cut flower sort, and that we introduce it with even more confidence than we did the others.

It is an extra strong grower.
It is free from rust or disease.
It is a profuse bloomer.
It has exceedingly strong stiff stems.
It is of exquisite form full and double.
The flower is high built, petals serrated.
The calyx does not burst.
It is delightfully fragrant (a quality lacking in many new ones.)

OUR PRICE LIST now ready, contains prices on many other plants. SEND FOR IT.

W. P. SIMMONS & CO., Geneva, Ohio.

FIREFLY

A RUST PROOF .....CARNATION.

Bright scarlet and positively **RUST PROOF**. It is as prolific as Scott, of good size and form, and its keeping qualities are unsurpassed. We have tested it four years.

Our stock also includes all the Novelties of '97 and '98. Send for prices.

Christmas Plants in Chicago.

The increased number of flowering plants to be seen in the florists' windows during the past two weeks proves that they are in demand and appreciated, and that there are many interested in plants as well as cut flowers. This is all on the lines of right—there will be just as many cut flowers sold as ever, and the plant trade will thrive also.

In addition to the plants mentioned in last Chicago notes, let me suggest Solanum Capsicastrum, three or four distinct kinds, two or three capsicums, Rivinia humilis and Ardisia crenulata, all berry-bearing plants so expressive for Christmas. It should, however, be borne in mind that all these plants require to be well grown. Don't tuck them away into a corner until about a week before Thanksgiving when you expect to have them in fine bushy growth, healthy leaves and covered with berries, because it won't be so

During November when the football season is on and when particular colored flowers are required, how would S. A. Nutt geranium do for a crimson; then any good double scarlet for a red, and any cherry color for cherry. These plants would require special treatment during August and September, could be grown in 5-inch pots, each plant to bear four to five good trusses. These plants could be off the benches by December 1. They would pay. J. T.

Utica, N. Y.

Christmas, 1897, was marked by one of the coldest days of the season. Friday before Christmas we experienced almost a blizzard. This must have had a depressing effect on quite a proportion of the florists' trade. It not only kept people indoors but made the delivery of large plants a slow and laborious task. Considering these things and the fact that nearly all report an increased demand in both plants and cut flowers, we have cause to give thanks.

In plants there were some good azaleas, mostly Dutch Perle, white, and Simon Mardner, pink. These were picked up at sight. Harrisii lilies were not in as much demand, although a great many were moved. Pans of Roman hyacinths, jardinieres filled with lily of the valley, Paper Whites in large pans, Begonia multiflora, primroses, etc., comprised the bulk of flowering stock. Palms, rubbers, some fine araucarias, as well as specimen ferns were in increased demand.

In cut flowers the call seemed to be for stock in order named—carnations, roses, violets, valley, Romans, lilies, and last of all chrysanthemums. Some occasional flower buyers still think that these last are at their best at Christmas. There were a few to be had but were like the last run of shad.

The churches confined their decorations to holly and Christmas greens, very few flowers being used. There are a few good decorations noted for the coming week which will take about all the stock visible. The trade as a rule are well pleased with Christmas, 1897. F. J. B.

1150 Tremont Building, - BOSTON, MASS.

Dahlia Shows of 1897.

Of the dahlia shows of the season just closed those of the Massachusetts Horticultural Society in Boston and the American Institute in New York hold the foremost place. In the Boston show the dahlia was only a single feature of the regular annual show, but the classes were well filled, the competition keen and close, and the display ample enough to have constituted quite a respectable show by itself. It is hoped that the society will see its way clear in the near future to establish a special dahlia show. There is ample material and a well arranged schedule embodying numerous classes which will undoubtedly bring out an exhibit of which all concerned may be proud. In the schedule of the present year, provision was made for general display and for classes of twelve blooms each of show, pompon, fancy, cactus and single varieties. The addition to this list of a class for decorative varieties will cover the field very fully, and such an addition will also afford the means of drawing a close line of demarkation between the true cactus varieties and the decorative varieties.

The New York show differed in making the dahlia the feature of the week of September 27, and the schedule was based mainly on display of different kinds. The schedule embraced two distinct sections, one for professional or commercial growers, the other for amateurs, with classes substantially identical. The leading class called for display of not less than 100 varieties, not less than 6 blooms each. Other classes called for best display of single dahlias (not less than 100 flowers), best display of cactus and best display of pompons. The remaining classes called for best collection of 50 varieties, of 25 varieties and of 10 varieties, which was interpreted best 50, best 25 and best 10 blooms and brought out only show and fancy varieties in combination. The class of not less than 100 varieties (6 blooms each) was not otherwise restricted and was intended to cover all varieties in one comprehensive display.

The fundamental differences in the two schedules are apparent from this statement of the manner in which they were drawn up. It is not my purpose here to criticise either, but simply to give the widest circulation to the details of both and to call special attention to these details as I hope in a succeeding article to formulate a scheme which shall combine all the leading features of both, which in its entirety shall be a suitable basis for a show of the most extensive character, and which by simple abridgment, can be adapted to the smallest town or county fair.

Between schedules like the above and the premium lists of many county fairs which gave the dahlia no recognition and no place, there is a wide interval, filled in systematically or unsystematically as the case might be, and where the prizes vary from slight to substantial. Here lies the opportunity for every dahlia grower to advance the interest in that flower. Let influence be brought to bear to secure specific substantial recognition for the dahlia at all local fairs. At the very least let premiums be offered for the largest and best collections, and let proper facilities be provided so that the exhibitor can make a creditable display and do himself justice.

Some societies are entirely destitute of anything in the shape of bottles or racks for display of blooms. Where the exhibitor is left to his own expedients entirely, in order to secure effective display, dissatisfaction is certain to arise. Let local florists and horticulturists bring all necessary influence to bear to secure such inexpensive provisions for floral display as are absolutely necessary. A supply of vases and bottles with suitable racks once procured can be maintained in a good state of efficiency at small outlay, and they are worth to any fair many times their cost. H. F. BURT.

Taunton, Mass.

MAGNIFICENT NOVELTIES

12 of the finest GERANIUMS ever introduced; fancy varieties, novel colors, new types; the latest from England and France; ready now for..... $ 3 50

JACOB W. MANNING,

The Reading Nursery, READING, MASS.

ESTABLISHED 1854.

Society of American Florists and Ornamental Horticulturists.

The amendments to the By-Laws adopted at the meeting in Providence last August will go into effect on January 1st, 1898, on which date the annual assessment for the ensuing year will be due from all paid up members of 1897. All those whose dues for 1897 remain unpaid at that date will be considered as having withdrawn from membership. Delinquent lists will be discontinued and membership may be resumed at any time on the payment of the regular admission fee of $5.00, or the Life Membership fee of $30.00.

All those who contemplate becoming members during the year 1898 are earnestly solicited to do so at the first of the year so that they may receive prospectuses and other society announcements as published. This is particularly urged in the case of Trans-Mississippi members, that the officers may be informed as to whom they may rely upon for active participation in the Omaha Convention, for which detailed plans must soon be formulated. WM. J. STEWART, Sec'y.

Flower Show Suggestions—What to Offer Prizes for.

This is a good time to outline your premium list for next season. In doing so it is advisable I think to calculate on catering first to the consumer, or more properly to say the public who employ the florist and support him. It is from that part of our population that the flower show gets its support, and any branch of horticulture undertaken, which does not lead to the appreciation of this valuable element in society, is an unwise expenditure of energy. This includes all the work which a retail florist is called upon to do, such as decorate a dinner table, a reception room, fit up a conservatory, arrange plants in a bay-window, arrange vines and shrubbery or perennials for a permanent decoration of the lawn. Everything that is desirable for beautifying a home is what demands the florists' taste and skill, and the flower show is the proper place for him to display it. The next division consists of the production of such stock as the florist uses, plants, cut flowers shown individually, vases, baskets, moss, palms, ferns, etc. The third includes those items which interest at first the grower—a new variety, a new method of growing, its naming. They all have their place at the show, and each section has the advantage of being able to compare notes with the other, but in arranging your premium list these three sections should be kept separate.

It is my purpose to suggest a premium or two for what I consider the first section. Mantel and table decorations have been competed for quite commonly. Cannot we make a departure? When a florist calls on a customer who is about to give a reception he is shown over the house, and the lady of the house generally says: "We have decided to receive in this corner and if we put the musicians over there can't you screen them off some with green or palms so as to look pretty and not take up too much room?" Then she says: "How do you think a frappe bowl would do here? Well, you have seen the rooms; now Mr. —— I wish you would arrange them to look as pretty as you can for the 20th, but I think you had better furnish the green work and foliage necessary and use the flowers which are sent in; there are always so many flowers sent in."

This represents fairly well the feelings most every lady has who orders decorations. When she goes to a reception she is on the look-out for the little odd features of interest. A florist shows his real skill and art by adapting his arrangements to suit surroundings. Would it not be well to offer a prize for, say the most artistic arrangement for parlor decoration incorporating twenty dozen roses as they are usually sent in? This is what a florist is asked to do continually. Why not contrive to bring out the ingenuity for this at a show, also the decoration of punch bowls, the prettiest screen for music? Some such feature properly advertised would attract the ladies.

Then another item of interest, which I think should be more carefully cultivated, is the arrangement of the window in a "sick room." It will include plants to give it permanence and vases for more frequent changes. There is no better medicine for our dear ones, and the highest awards should be offered to those who accomplish the most gratifying results.

AMERICAN FLORIST COMPANY, 324 Dearborn St., CHICAGO, ILL.

EVELINA

at the present time is a mass of bud and bloom. Xmas week a house 16x80 produced 1000 flowers which sold readily at $6.00 per 100, and will continue to produce same number per week for some time to come.

EVERY FLORIST

who has seen it, without exception, will try this sterling variety another season, and it is claimed by everyone who has become acquainted with Evelina to be the most prolific bloomer in commerce and first-class in every respect, and predict for it a grand future.

THE HIGH ESTEEM

in which Evelina is held by the Cincinnati growers is shown by the fact that I have already booked orders for over 7000.

EVELINA

is a pure white, of large size, good form and substance; an extraordinary strong calyx; is fragrant and borne on long stiff stems that always carry the bloom erect; it is an extra free, early and continuous bloomer; is of good habit; a strong, free and healthy grower. Last year quite a number of plants produced from 30 to 50 flowers by the first of January. She won the Ward Cup for best commercial white at the Cincinnati meeting of the American Carnation Society; also a certificate of merit at the Indianapolis and Chrysanthemum shows. Orders now booked and filled strictly in rotation for strong, well rooted cuttings at

$10.00 per 100. $45.00 per 500. $80.00 per 1000.
50 at 100 rate. 250 at 500 rate. 500 at 1000 rate.
Cash or satisfactory reference, please.

R. WITTERSTAETTER, Sedamsville, Ohio.

Helpful Reminders.

Christmas marks the turning point from shortest to longer days. Without a clock or calendar, an observing gardener could tell by the behavior of his plants that a change was taking place. A general outline of what you want or need to supply your trade from January 1 to July 1 should be planned now. Each person must do his own thinking on this point. If you are not confident of your own ability to do this, you will at least appreciate the suggestions of others better, after having tried. Just now you are offered special bargains in bulbs of various kinds; be careful, it will cost as much to bloom a bulb that you pay one cent for as if it cost you five cents, the growing and marketing is the principal expense; besides if you have all you can do well don't put new work on your hands; if you are sure it will not pay to hire help enough to care for them properly don't think of purchasing. Make careful calculations, taking into consideration what other stock you have provided. Bulbs planted now will come on well for spring use, but a bulb out of the ground until December is of no value for winter bloom.

The flower buyers are hungry for pretty flowers different from roses, carnations, hyacinths, tulips and narcissus. They are all good and must be provided in ample quantity. If you haven't enough to keep up a supply until May, you can bring into the warmer house some of those which you planted in September that are now well rooted and replace them in the cool pit with bulbs you purchase now. Freesias have come in to relieve the monotony during the last few seasons, but I wish to bring to your notice three varieties of bulbs which are of much value in oppressing the hunger of flower-buyers now, and they are about the least expensive, viz.: Spanish iris, the Bride gladiolus and Ixias. If you are an artist in your line of work, you will not be another season without a succession of these from March until June; they must be handled with all their foliage.

Florists within a moderate distance of larger cities where the wholesale market is well established need not be concerned about the exact date for blooming a moderate amount of lilies, for cutting, as they can be had before and after your own crop comes in, but for pot plants you should be most careful. Do not neglect the demand for the present, but arrange as many of your potted lilies as you can spare in such temperature as will bring them in for Easter. Good potted lilies have been a scarce article and are sure to be this season.

For winter and Easter blooming pot plants, the opportunities for providing such stock as azaleas, spiræas, genistas, etc., are about over. Beyond taking care of what you have, nothing can be recommended at this date, but what shall you provide for spring work? Make out a list of what will be necessary to supply your trade to their liking. If you will want 2,000 geraniums, scarlet, pink and white —determine whether your varieties are as good as can be had; do not propagate from a plant that is not a first-class variety; there is as much labor, heat and space required to raise a poor variety as a good one. The cost of production is what you pay for your stock, and you cannot afford to pay as much for an inferior variety as a competitor does for a beauty. You have time now to procure necessary stock. Throw out what is not worth at least 25 cents for every square foot of glass it takes in a house you maintain a temperature of 50° in. The same is true of cannas, heliotropes, fuchsias, ivy geraniums, and all the stock necessary for spring bedding. Also provide now such seed as you will require for your spring stock. If you use maurandya vines in your boxes and vases start them at once and order all the seed now. If you do not arrange your plans and specifications now you are sure to be out of harmony when the spring hurry comes. The varieties to prepare, the quantity of each and the method for accomplishing the desired results, is a matter that varies with conditions. The caution and advice given above applies to every one managing greenhouses for the retail trade. The latter considerations apply differently to different florists.

Brockton, Mass.

The meeting of the Gardener's and Florist's Club on Tuesday evening, December 21, was an enthusiastic one, and much useful work on the final processes of full organization was accomplished, although the demands of holiday trade kept many members from participating. Geo. Hollis was added to the Committee on Essays and Discussions, and there was a general discussion concerning violets and carnation rust. It is expected that Oakes Ames will lecture before the club on the evening of January 4, and John Farquhar will give an illustrated talk on interesting horticultural subjects on January 18.

Yellow Foliage of Roses.

The foliage of our roses is very yellow at present, and we cannot understand the reason; the Brides and Maids seem to be the worst. They were planted in June in a short span to the south house 130 feet long, the glass is perfectly clean, and they get lots of sun and plenty of ventilation every day. They do not seem to have been overwatered at any time, and we have been keeping them on the dry side for some time, and giving all the air they could stand. Soil was the same as we grew them in last year. They are perfectly clean in every way and there is no mildew on them; and we run fires every night, keep the Brides and Maids about 58° at night, Perles at 65°. The Perles are growing very freely and are all right, except a few that are very light in the color; gave them all a top dressing of about one inch of well-rotted manure and soil, mixed about three weeks ago. They are having the best of attention in every way, and we cannot understand what is the matter. We are going to try some wood ashes on part of a bench.

TEXAS SEED & FLORAL CO.

It is often very difficult to understand the puzzles and solve the problems in rose growing, even when the plants are constantly under our eye; how much more so when they are located two thousand miles distant. Sometimes, as in this instance, when the treatment has been the very best, and such as in past seasons has given satisfactory results, yet, without any apparent reason, they refuse to make the growth or the bloom that we naturally expect to see. Science teaches, and we all know it to be true, that behind every effect there is a cause; we see the effect, but how difficult sometimes to trace back and discover the cause.

If the root action is all right I shall say it is probable that either the house has been run too warm, the plants have had too much stimulant, or some vital element is lacking in the soil. For light-colored foliage I have sometimes dissolved a 3-inch pot full of nitrate of soda in 50 gallons of water, and the same amount of sulphate of ammonia in a similar quantity of water, and with this have watered the benches once a week, using the two chemicals alternately. It makes a very weak dose and cannot injure anything. Common soot from soft coal is excellent for toning up rose foliage, and may be spread over the surface of the soil as a top dressing. A cement barrel of soot to 1,200 square feet of bench area will not be too strong. Some soils will not bear very much wood ashes; would not advise more than from 75 to 100 pounds to a house 20x100 feet. ROBT. SIMPSON.

What is Pickled Stock?

Answering inquiry of "Subscriber," Worcester, Mass., I will state that he must be very fortunate in buying fresh stock at the holiday times, otherwise his inquiry would be unnecessary. I do not think there is one florist in a hundred who buys cut flowers for the holidays but knows what pickled stock is, and for the benefit of this one I say, so called pickled stock is flowers which the grower holds from one to three weeks before sending them to market, and this stock then is ready for the waste barrel; still, the grower thinks the commission man ought to sell it at the highest market price, which the commission man often does, but the result is that the stock is not paid for, because, when received at destination they drop while taking them out of the box, this is what we call pickled stock.

The market two weeks before the holidays is short of stock, when good prices could be secured for roses and carnations, and I am sure that a grower would average more on the whole than he does in his method of pickling, and give full satisfaction. BROTHER FLORIST.

Secretary Alger at War with Florists.

Secretary Alger has turned down the Washington florists who have protested against the superintendent of buildings and grounds distributing cut flowers among government officials, Congressmen and their friends. The Secretary of War defends Colonel Bingham and says the custom shall continue to be recognized while he is in authority. In answer to the florists' protests he says that the small distribution by the government does not affect, in any large degree, the florists of this city; that on the contrary they cultivate a taste for flowers; that it is better to make this use of the flowers than to permit them to go to waste, and claims there is no legal obstacle in the way of a continuance of the custom.

HERKIMER, N. Y.—James F. Barclay, of Brooklyn, has purchased the greenhouses of C. C. Baum on Liberty street, and will take possession January 1.

Fern Notes—New Adiantums.

The introduction of new species is now becoming extremely rare, yet we are making up for this by constantly getting varieties among home-raised seedlings; we have also had a few very pretty hybrids introduced, among which may be mentioned Adiantum Bessonianum. This shows some affinity to scutum or Ghiesbreghti; it is of erect growth, with stiff wiry stipes, the pinnules are of the size of scutum but closely set, overlapping as in Pacottii, it is very free growing and promises to become a useful addition for decorations. It received a first-class certificate from the Royal Horticultural Society about a year ago, and the stock was recently distributed at Messrs. Protheroe & Morris' auction rooms. A large number of plants being sold at 5 shillings each.

A very interesting batch of seedling adiantums was raised at Mr. H. B. May's nursery a few years ago. Out of two or three hundred plants nearly all showed some variations. The seed fronds were Æmulum and Waltoni diffusum, the spores of which got mixed by accident, whether this resulted in hybridization taking place or an ordinary freak of nature it would be difficult to say, for although I have often sown mixed spores I have never seen another instance where so much variation has occurred. Of those referred to above two have received first-class certificates and four "awards of merit" from the Royal Horticultural Society. The last to receive distinction being named A. fasciculatum. A first-class certificate was awarded to this a few weeks ago. It is of erect growth; the fronds are irregularly branched from the base, the stipes and rachis being almost black, the pinnules vary in size, the terminal being larger and deeply lobed; it forms a compact symmetrical plant.

A. Hemsleyanum which received the same award about three years ago has large finely cut fronds standing erect, but curved towards the extremities sufficiently to give it a graceful outline. As a table plant or for vases it is one of the most effective. A. Schneideri has small nearly triangular fronds borne on rather long stipes, the pinnules are closely set and of a soft pale green. A. plumosum is somewhat similar but of dwarfer habit, forming a dense compact plant. A. tenellum is a very pretty variety with broad spreading fronds. A. elegantissimum, may be regarded as an improvement on gracillimum, it has large much divided fronds, with very small wedge-shaped pinnules; this was the first to receive distinction and has proved to come true from spores. I may add that all of the above may be readily increased by divisions, if this is done carefully before the pots are too full of roots they start away freely; the best time to divide the adiantums is while they are growing freely, the same plants may be divided two or three times during the season and will do better than those allowed to stand longer. They should be kept close and well shaded for the first few days, but care should be taken not to give too much moisture either at the root or on the fronds. So many people have the idea that ferns require excessive moisture, that it cannot be to strongly urged that over watering is one of the greatest evils in fern culture. A. HEMSLEY.

Carnation Rust.

ERRORS IN ESTIMATING THE VALUE OF REMEDIES.

Answering G. N. T., California:—The preparation you used is essentially the old Peter Henderson mildew mixture. The addition of sulphate of copper practically makes the Bordeaux mixture. The results of your experiment are not conclusive because you have done as florists are very apt to do, i. e., treated your whole house instead of leaving a certain number of plants untreated as a check. The writer personally has had a good deal of experience with this matter of rust and has been lead by apparent success in treatment to make some very rash statements, much to his subsequent sorrow. Under careful culture, without special treatment, rust very often almost entirely, or entirely, disappears in the house. If, under such circumstances, we have been trying a new remedy, we are apt to ascribe a feature to the remedy which it does not deserve.

In future experiments of this kind if you wish results to be of value, we would advise that you leave a certain number of plants in the house untreated, being careful to give the treated and untreated plants equally favorable situations and equally good care. If under such conditions the untreated plants still continue diseased and the treated ones show an improvement, you then have a fair reason to believe that the remedy is of value.

X.

M. O. W.—The nurserymen whose names appear in our advertising pages, can doubtless supply your needs in the way of species and varieties of salix.

Speaking about **FLORISTS' SUPPLIES**, we have been tinkering away at this line of work ourselves for about 20 years. We ought to be able to sell you by this time, don't you think? There are mighty few wholesale men who are not Specialists in this line. Here are a few sample PRICES.

VAUGHAN'S SEED STORE, 84 & 86 Randolph Street, CHICAGO.

The Government Seed Shop.

CLEVELAND FLORISTS' CLUB TAKES ACTION.

For many years the national government has distributed seeds free of cost over the entire country. This practice is continued much to the injury of seedsmen, florists, gardeners and horticulture in general.

To explain in brief: The government by its purchase and gratuitous distribution of seeds becomes a direct and formidable rival competitor of the seedsman. The amateur, inspired by his gift of seeds to enter the field of horticulture becomes a rival of the legitimate florist. Horticulture in general suffers in common with the seedsman and florist, who, at all times, have at heart its promotion and advancement.

Why these particular crafts should be made the victims of governmental gratuities is an unanswered question. It would be eminently more fitting and a great deal more practicable to distribute groceries and clothing, and thereby achieve the same end, which, it appears, is the paternalism of a few politicians whose motive is the advancement of self interest at the government's expense.

The following preamble and resolutions were unanimously adopted at a meeting of the Cleveland Florists' Club, held December 27, 1897:

WHEREAS, In view of these facts, we consider that a great injustice is wrought the seedsmen and florists of the country; and,

WHEREAS, The expenses of the government would be decreased by the discontinuance of the practice of free seed distribution to the extent of one hundred thousand dollars, be it

Resolved, That we, the Cleveland Florists' Club, protest against the further appropriation of moneys by Congress for this purpose, and be it also

Resolved, That a copy of these resolutions be submitted by the secretary to each senator and representative from Ohio. G. A. TILTON, Secretary.

The Cleveland Florists' Club is rather worked up over the question of governmental free seed distribution, wherein they are undoubtedly perfectly right. The idea of distributing free seeds is just about as logical in its practical outcome at least as would be free coal, or free beer, or groceries, or anything else of common use that people ordinarily expect to pay for individually, if they use the article. Congressmen distribute the stuff among their constituents in the most absurd manner, without regard to the practical utility of the seeds to the recipient, thereby often entailing an absolute waste of the seeds, which is bad enough; or in other cases taking that much business away from the legitimate dealer, which is worse. "Rouse ye patriots, wake to glory!" or words to that effect. A.

Tempering Water.

ED. AM. FLORIST:—From the time of my first apprenticeship in the greenhouse business I have felt the need of some means of warming the water with which we feed our plants. While realizing the necessity of water, I have also realized that in the sudden chill which the plants receive from water often as low as 36° or 38° a severe setback would result, causing a delay in bloom and maturity and a lack of vigor.

A few weeks ago in looking over your advertising columns I noticed a tempering apparatus described for which claim was made that it would do away with my troubles as above mentioned. It was not without some misgivings that I had one put in, for as our heating is the open circulating hot water system, I did not expect much satisfaction from it. However, it was duly installed and the results are so far beyond my most sanguine hopes that I feel it a duty to inform my fellow gardeners of its perfect workings. I am now able to keep up a steady stream of water of almost any temperature I wish, as it is always under the control of the operator. I have two houses of Cattleyas which have improved wonderfully since the temperer has been in use. I also had connections made with the barn and poultry yards which we consider a great improvement, as we can give the live-stock the benefit of warm water in severe weather. JAMES ELLIOTT.

Hackensack, N. J.

Wooden Greenhouse Walls vs. Brick.

ED. AM. FLORIST:—I must take issue with Robert Simpson when he says, "For greenhouses of moderate cost nothing can be better than locust or red cedar posts and properly designed weather-boards with building-paper between."

The use of wooden posts may be slightly cheaper in first cost but I am very much surprised at Mr. Simpson telling us that masonry walls are in such disfavor in the States. I am obliged to build a brick or stone wall as I am within the fire limits; but if not, I certainly should not build on cedar posts if I could see my way to use brick.

The kind of wall which I have adopted and which I think the best until I see a better, is constructed as follows: Excavating to a sufficient depth to avoid frost, I build a nine-inch wall up to about a foot above the ground. I then reduce it to a single brick, outside, placing a 2x4 bond timber on top of the inner side of the wall where left off. At intervals of from four to six feet I build in header bricks to hold the bond timber solid, continuing the header to top of wall, putting in bond timber every two or three feet in height. The wall when built to full height is well plastered inside to close any crack in the joints. It is then sheathed vertically with matched sheathing, giving a hollow wall, brick outside and wood within. I have given this wall a ten year's trial and am satisfied that it cannot easily be improved upon, being as good today as on the day it was built, while houses built on the cedar post plan are in the last stage of decay and must be renewed next season. Even in the matter of cost the difference is not so great as some may think, when we pay $22 per thousand for sheathing (inside and out) then rough boarding, scantling, building paper, paint, nails, etc.

Toronto. W. J. LAING.

Kraft's Plant Tonic

For PLANTS, PALMS and FLOWERS

...A Wonderful Preparation for the Promotion of Plant Life, Destruction of Insects and Scale...

This is one of the greatest preparations for the use of Florists and Plant Growers ever compounded. It gives to the foliage of plants treated the bright, fresh color of healthy, growing vegetation. It destroys all insect life infecting the plant and eradicates scale.

Besides improving the color of the plant, it effects a general betterment of its condition, aiding nature in disseminating and retaining the sap and life of the plant. The Tonic makes the foliage of the plant soft and pliable, and a beautiful bright green.

For sale at Price per bottle, 25 cents.

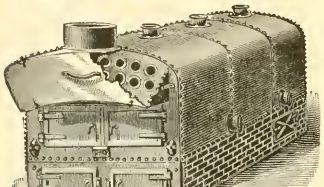
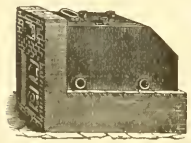
Fuel.



ED. AM. FLORIST:—Can you enlighten me as to the most economical fuel to use? I am now burning soft slack under my 50 horse-power return flue boiler, set in brick, with ordinary fixed grate bars. The slack coal costs me $2.40 per ton. Nut will cost $2.90 per ton and pea hard coal will cost $3 per ton. Could the soft slack be mixed with the hard coal in any way satisfactory? would a shaking grate be of any value and, if so, where can one be procured? SUBSCRIBER.

Referring to "Subscriber's" inquiry I would say, judging from results which have come under my immediate notice, that the cost of a full season's supply of fuel at the per ton prices mentioned, would be about the same for either of the grades named, but in the using of the pea hard coal a considerable saving in labor would be effected, and the annoyance of smoke and soot, and foul flues and chimney would be avoided. I would therefore give a marked preference for the hard coal. With such a fire, a suitably constructed shaking grate would have advantage over the common fixed bars. There are several styles of shaking grates made, but in order to advise as to where to procure one suitable for "Subscriber's boiler, I should know the exact size of the opening in the fire box in which the grates rest, and if possible have a sketch of the firebox and its setting.

HENRY W. GIBBONS.



WACO, TEXAS.—The local floral society has become a state organization, and will in future be known as the Texas State Floral Society. It was felt that the time had come for Texas to have an association of its growers of flowers, that thereby a better system of interchanging ideas and methods could be adopted. An exhibition will be held annually in the fall, at which numerous cash premiums are to be offered. J. W. Barnett is now acting president.

Heating Notes.

In addition to the method of temporarily repairing leaks in boilers, described in my last notes, I have often found a few handfuls of oatmeal or of finely pounded rice placed in the water, very effective, but you may fail in the use of this if you follow the usual practice of throwing it into the expansion tank, and trusting to luck that it will reach the boiler, as, if rice is used, it usually falls to the bottom of the tank and stays there, and if oatmeal, a portion of it will sink, some of it will float around on the top of the water, and some will be carried along the return pipe by the circulation of the water, the bulk of it however, staying in the tank until it has given up considerable of its starchy matter into the water, and by the time this water has reached the boiler, very little of the benefitting quality remains, it having been deposited along the entire length of the return pipe. My practice has been to take an empty tomato tin, or something equally as handy, and with a couple of nails, fasten it to the end of a stick so that it stands at right angle to the stick. Then pack the tin full of oatmeal or of the pounded rice, and pass it down the tank until the mouth of the tin comes directly opposite the opening into the return pipe, then place the mouth of the tin close to this opening, and by rapping the upper end of the stick shake the meal directly into the return pipe, when the flow of water will carry it directly to the boiler. The meal then becomes thoroughly soaked during its passage to the boiler, and on reaching the hotter water contained therein gives up its starchy matter, a portion of which is carried by the leaking water into the crack, where it finds lodgment, becomes baked, and soon accumulates in sufficient quantity to stop the leak, unless the flow of water through the opening be very strong. While this method is not always effective, it is so often so, and is so simple that it is well to bear it in mind for trial in case of emergency, and in case of leaky pipe joints, especially caulked ones, it is always beneficial. HENRY W. GIBBONS.

Butted Glass.

This is no longer an experiment, it has come to stay. There are various ways of making Butted Roofs, but the best way is with the

Clipper Bar.

With this bar you can make a roof that is absolutely free from drip, and glass cannot be torn out by the wind. Butted glass makes a tight roof, a warm house and saves fuel. It lasts longer, looks better and costs less than the old-fashioned roof. But do not think that this is the only bar we sell, for it is not; we furnish what people want and there is nothing in greenhouse material that you cannot get from us, and all of open-air-dried Cypress clear of bright sap, stained sap, knots and all other defects.

SPECIALIZING IN DAHLIAS

Was there ever such a riot of color? Twenty-six acres of dahlias in full flower, the plants sturdily standing alone instead of falling on their heads and not a stake in sight! It was enough to make anyone a dahlia enthusiast for life. The Philadelphia show of the American Dahlia Society was good for sore eyes, but the lack of "green" in the beautiful vases was fresh in my mind, and here were the plants flourishing and swaying with life and motion. How they grew and how they enjoyed it!

The hard red clay about Philadelphia is not the soil for dahlias. Nineteen miles "over in Jersey," at a little station called Atco, is the dahlia farm of W. P. Peacock & Co. Lawrence K. Peacock, author of "The Dahlia," our only modern American book on the subject, is the life of this enterprise, and the story of his success is an interesting one. It began with the variety Nymphæa, which nature gave Mr. Peacock a few years ago while he was raising seedlings in a small way. This one variety, perhaps more than all other factors combined, is responsible for the new interest in dahlias in America. Doubtless a hundred thousand plants of it are in the gardens to-day, for Mr. Peacock has sold forty-five thousand roots and plants himself to the trade. Mr. Frank C. Bruton (who knows dahlias) was quick to bring it to the notice of Wm. Henry Maule, and through this house the variety was popularized. A revival of interest in dahlias was impossible, that is, a new furore over the old ball-shaped sorts that were the delight of our formality-loving ancestors. Nymphæa was a "new lead," and opened the way in this country for a new kind of popularity, an enthusiasm due chiefly to the looser, freer, fluffier forms of the cactus and semi-cactus types which only needed to be seen by a chrysanthemum-loving public to be appreciated.

The delicate sea-shell pink of Nymphæa is unique. It is the standard beside which all the other blush whites and light pinks are streaky, harsh, coarse-veined or muddy. There are two kinds of large vase-effects with Nymphæa, which are peculiarly irresistible. The removal of the "green" often makes the round formal blooms of the "show" type look huddled, hunched up, or cabbage-like. A mass of Nymphæa dahlias without a vestige of foliage presents a new, distinct and charming picture. "Water-lilies!" is the delighted exclamation one hears all day long at the shows. The other large vase effect is somewhat similar, when the delicate foliage and multitude of dainty, drooping buds are used to loosen up the mass and set off the exquisite color of the flowers. It is my sober conviction, based upon two years' acquaintance with some five hundred sorts of dahlias, that Nymphæa has far greater value in America at the present time for artistic cut flower decorative work than any other variety. I predict that it will be a standard material all the year round in all the large cities that have true artists in this line of work.

On the plant, the water-lily effect is not so striking, as the bush is rather tall and open, graceful and attractive in itself. The variety has been discarded by some English professionals, partly, perhaps, because the flowers are usually only medium-sized, but chiefly, no doubt, because its peculiar requirements are not known. English soils are usually heavier than ours. Nymphæa is emphatically adapted to sandy soils. The flowers are sure to be pallid in close and shaded yards. The amateur cannot color the flowers well unless he can supply plenty of sunshine and a good circulation of air.

Mr. Peacock raises dahlias for roots and uses potash for that purpose as heavily as for potatoes, yet the balance between the vegetative and reproductive phases of the plants' life history seem to be fairly kept. The exhibition flowers are selected from the fields, and have the same care with all. The two hundred thousand cut flowers sold during the present season were really a waste or by-product of the main business. By the latter part of September, eighty thousand perfect but short-stemmed flowers had been delivered to a Philadelphia department store. Doubtless these gifts to purchasers have advertised the new creations in form, and helped to popularize the dahlia in general. Such a trade as this is, however, quite different from the long stemmed flowers used by florists, which comes nearer to being a sacrifice to an individual plant than a benefit, as in the case of the short-stemmed blooms.

The secret of Mr. Peacock's success in the growing of dahlias is his tillage. Frequent tillage is the basal fact in his whole system. Conservation of moisture is undoubtedly his greatest problem. The cul-

tivator is always going, and so are the plants blooming, throughout nine weeks without a drop of rain. I consider Mr. Peacock a "crank" on cultivation. He talks of "hills" that I cannot see even by stooping, declares that the manipulation of the cultivator requires more intelligence than any other part of the work, and believes that he can save and make the most money by doing all he can of that work, even in the busy season. Thorough tillage, he believes, is the chief factor in his success.

Feeding dahlias that grow in a nearly pure sand is more like a greenhouse than an out-door problem. Mr. Peacock applies his nitrogen, phosphoric acid and potash after a rough practical formula: 100 pounds of "nitrate," 400 of bone and 200 of high-grade "sulphate" are thoroughly mixed and applied at the rate of half a ton to an acre, though here again Mr. Peacock's "hills" make a difference. Seven carloads of manure were broadcasted last spring on a portion of this dahlia farm. The use of manure in the rows only, he thinks is mistaken economy, the plants being started off at too fast a pace and left with too many leaves to support in drought and not enough nourishment. Dahlias two years and clover two years is his only rotation of crops.

The merits of his single-stem branching system are best seen in the seed stock, which is planted earlier than the rest. The roots are planted deep and only lighly covered, the shoots coming up thicker, shorter-jointed and darker green than through a deep covering. As soon as two pairs of leaves show themselves the shoot between the upper pair is pinched out, whereupon the four waiting side shoots develop into long arms, while the original stem thickens into a strong supporting trunk, which, however, rarely shows above ground as the successive shallow cultivations gradually fill up the trench and even cover the bases of the four long arms. This filling-in makes a sort of cushion or buffer which gives elasticity to the whole bush and enables it to retain its position safely during wind storms. This ingenious device does away with stakes and tying altogether.

It is difficult to see seven or eight hundred varieties and discover the few that are of the highest relative importance. The more of perspective I get, the more prominently emerge three or four varieties which I shall presently name. They are semi-cactus sorts, or what the Germans call "cactus-hybrids." (The word "decorative" sometimes used by the English is about as non-significant as the terms "show" and "fancy"). Now this class is, (so Mr. Krelage, of Haarlem, the chief Dutch dealer, told Prof. Bailey,) the class of greatest commercial importance in Europe to-day, the show, pompon and single sections being in demand only among amateur fanciers who have grown collections for years. The show type is the almost perfect sphere, the true cactus form is precisely that of Juarezii as pictured in 1879 in the *Gardeners' Chronicle*. These, then, are only two forms, two types, albeit we have them both in almost every conceivable color. Between these two extremes of form; the spherical and the flat and fantastic we have very many intergradient forms for which there are no words in the language, shapes of True Model, Harry Freeman, E. A. Fannell, Maid of Kent, Little Cactus, Wm. Pearce, Mrs. E. C. Monroe, all of which partake of the fullness of the show type and the freedom of the cactus. The show and the cactus, then, are only two types, and this great intermediate semi-cactus section represents at least twenty shapes, each one of which is worth producing in every color in the dahlia's range.

Now the pure cactus dahlias are later in coming into bloom than the show kinds and perhaps less productive. The flowers are often too short-stemmed, and will not carry so well as the round sorts. They are eminently the thing for skilled amateurs who have the best conditions. The semi-cactus varieties are, in varying degrees, better than the pure cactus sorts in America for commercial purposes. Wm. Agnew is actually earlier than the show kinds, which represent the highest selection because they appear to be a conservative class which is a large and permanent element, especially in the old world. Clifford W. Bruton is as large, and fine, and full, and free as some of our best yellow chrysanthemums.

These two, Agnew and Bruton, are the results of plant-breeding of the highest type. They are ideals realized I am well acquainted with the parents concerned in these pedigrees. Nymphæa is a chance seedling. I know nothing about propagating dahlias, but I have seen an acre or more of each of these three sorts and believe they are thoroughbred commercial varieties. Wm. Agnew, indeed, comes dangerously near that impossible conception, the "all-round variety." Its rich, strong scarlet is suffused by just enough of scarcely perceptible orange to make it brilliant and lively in shade or under the artificial lights which kills all our superb dark reds, with a velvety finish, John Bragg, Matchless, Black Prince, and twenty others. The habit of plant is distinctly attractive; the cut flowers will carry well; the size is great; the productiveness ideal; and in some localities the earliest of all dahlias.

John Elitch is a red variety not quite so good for exhibition, with a different form of flower, and taller bush, which deserves to be tried by every one in the East who cares especially for dahlias. I feel sure that the four varieties named above are among the twelve best semi-cactus sorts for commercial purposes in this country. John Elitch owes its origin to W. W. Wilmore, a dahlia specialist of Denver, Col. His catalogues are beautifully illustrated. I wish the AMERICAN FLORIST could prevail upon him to write of his methods and experience for the benefit of the Eastern florists. WILHELM MILLER.

Ithaca, N. Y.

Some Useful Begonias.

Begonia Socotrana, while not new, is not as well known or appreciated as it deserves. It is worthy of extensive cultivation as a winter bloomer. It comes into flower about November 1, and lasts until February. Its flowers are a pleasing shade of pink and having long stems they are excellent for cutting. A good point in its favor is that the blooms do not drop and litter the foliage and benches as is the case with most varieties but they wither on the stem.

Begonia Socotrana is the parent of quite a few of the new hybrids, such as Gloire de Lorraine, John Heal, Winter Gem, etc. Each plant is composed of a cluster of bulblets which when pulled apart will make separate plants, flowering as in the illustration after two years. If the cluster is left unbroken it will make from two to ten breaks, one from each bulblet, thus giving a large flowering plant. It is easy of cultivation. The bulbs are dried off in spring, shaken out of the soil and laid away in sand until August 1 when they are potted and started up again.

Begonia semperflorens gigantea rosea is a superb variety of the fibrous rooted section and unexcelled for showy winter effect. It is of the simplest cultivation. Cuttings are struck in February or March, planted out in the open ground in spring, given one or two pinchings during summer and potted up in the fall. Begonia incarnata requires similar treatment. Our illustrations are taken from views in the greenhouses of Cornelius Vanderbilt, at Newport, where Robert Laurie is gardener. Mr. Laurie is one of the young gardeners who has already taken a leading position among his fellows. His ambition is unbounded and his enthusiasm is of the catchy kind which inspires those with whom he comes in contact, while his good nature and companionable qualities make him hosts of friends wherever he goes.

BEGONIA SEMPERFLORENS GIGANTEA ROSEA AT THE BREAKERS, NEWPORT, R. I.

BEGONIA SOCOTRANA.

Fuchsias.

If you would get a reputation as a great grower in your town, the fuchsia will respond to a systematic and generous treatment as quickly and give as good results for value received as anything I know. There is only a limited demand for them generally, it is true, but what few are needed might just as well create as favorable an impression as possible, and that without much extra trouble or expense.

Now is a good time to put in cuttings if we would have creditable plants when spring trade opens. To proceed, select strong newly made shoots that have been produced upon the old stock plants in a house that has been supplied with air and light in abundance and in a night temperature of from 50° to 55°. Pot the cuttings at once into 2½-inch pots, using soil that is light, moderately rich, and porous; place them in a temperature of 60° keeping them well sprinkled and shaded from the direct rays of the sun until well rooted. It should here be stated that great care must be exercised so as to never allow the cuttings to wilt at any time, either from lack of moisture or too much heat. After they are well rooted they may gradually be inured to more light and air, and given a position close to the glass and in a night temperature of not higher than 55°.

As soon as the young plants are thoroughly well rooted, they should be given a shift into well drained pots 5 or 6 inches in diameter, according to the strength of the young plant and the variety, using as a compost something similar to that recommended for the cuttings, with perhaps the addition of a little more loam. Great care in watering must be exercised at this stage of the young plant's existence or failure will more than likely be the result. They should have enough water, but not too much. One good watering to settle the soil will suffice after the repotting for a day or two, when the caution above referred to must be brought into play. Soils are widely different in the several states, and indeed in the same locality sometimes the difference is very great. Three or less miles from where this is being written the soil is composed largely of rotten rock (mica-schist). The mica or so-called isinglass in it glistens and sparkles with great brilliancy, whereas the soil here, though some mica is present it is in very small quantity and hardly noticeable, and the soil generally may be classified as clayey loam.

For the well doing of fuchias our soil requires an addition of leaf mold, or Jersey peat, or peat moss, or well rotted refuse hops, or thoroughly well decomposed stable manure, or anything of the character indicated, and some sand or the finer screenings from coal ashes which have passed through a screen of ¼ or ⅜ of an inch mesh.

The plan herein recommended for starting young fuchsias has been practiced with unqualified success for a number of years, and it cannot fail to be uniformly successful if carried out with intelligence.

The fuchsia is never so beautiful when in full flower as when grown in a natural, pyramidal and graceful manner. The air and light space which each plant receives under this method of treatment with the other concomitants advocated is the secret of success, because there can be no crowding, if our advice is carried out, thus giving the side shoots a chance to break evenly and develop uniformly. The cultural methods herein advocated for starting the young fuchsias cause the side shoots to assert themselves with

equal possibilities, and that is the secret of the whole process. The same results, of course, may be obtained if the old style of propagating is carried out, provided, let me admonish, that the cuttings are not allowed to remain too long in the sand after being rooted, and are not permitted to remain in the small pots longer than possible after filling them with roots. Many varieties make natural pyramids, and all the training they require is for the leading shoot to be tied neatly to a straight stake. The flower buds will first appear on the leading shoot, and these should be religiously picked off until others appear uniformly upon all the shoots alike. Such plants cannot fail to attract attention and call forth favorable comment wherever seen.

I know the publishers of the FLORIST and readers thereof would be pleased to see photographs of plants grown as pictured herein, and a premium of five dollars ($5) is hereby offered for the best photograph of the best grown plant grown in the way recommended, subject to the approval of the publishers of this horticultural trade periodical, and the merits to be decided by whomsoever they shall appoint for that purpose, and who shall have the privilege of using for illustration in its columns any or all of those which are submitted and are entered for this competition. For further particulars or other information desired, write to the undersigned through the FLORIST and a reply will be cheerfully given. L. O. N.

P. S.—Entries for this competition should be recorded with the American Florist Company not later than February 1, 1898, and the methods adopted in growing should be carried out as nearly as possible according to those herein noted, and that cuttings should not be admitted in the contest that have been put in before January 1, 1898.

L. O. N.

A Problem for the S. A. F.

We hear numerous complaints about the lack of appreciation of this society, which is manifest by the poor attendance at the summer conventions, and complaint is made of the so-called auxiliaries absorbing so much attention that the old S. A. F. gets little thanks for what has been done. Letters have been written and published, arguing with the florists at large, that it was to their advantage to become a member and attend these annual meetings. To listen to this sort of talk year after year and note the general lack of response to the continued appeals would argue that the florists generally didn't know what was good for them. Great stress is put upon the entertaining programme lasting four days out of the 365, leaving 361 days in which nothing is done. It has been claimed that the trade journals destroyed the membership by publishing the best of the proceedings within two weeks for $1, and the directors of the S. A. F. have talked of prohibiting the journals from publishing the essays, etc., well this would be right in line with the present policy of do nothing. A man who goes to the trouble of preparing a valuable paper free of charge to be read at an S. A. F. convention, does it with the generous impulse; if he finds it's to be given only to a comparative few who pay $3 a year for it he will naturally prefer to sell his efforts to a journal. There is no use in curtailing the usefulness of the journal in order to sell its own reports at a high price after they are several months old.

In place of trying to coax florists to pay $3 a year for what they do not demand,

BEGONIA SOCOTRANA AND B. INCARNATA AT THE BREAKERS, NEWPORT, R. I.

it is the business of such an association to attend to such work as all feel the need of 365 days of the year in place of only four days. The business of the Chrysanthemum and Carnation societies is very important; the whole office work could be more economically done under the supervision of one secretary, the printing of one report including each department would be a saving. The S. A. F. really conducts no business now that is not done by many local clubs. A club has an essay every month or two weeks, conducts a flower show, has two or three social gatherings annually covering much the same ground The object of a national society should be to accomplish such results as cannot be done by individuls or local clubs. There is plenty of such work to be done; if there was not there would

BEGONIA SEMPERFLORENS GIGANTEA ROSEA.

he no use in spending as much money annually as the S. A. F. costs. I will suggest a few branches of work which we all feel a need of and which cannot be done locally or personally.

We want statistics of trade. Arrangements should be made with all wholesale dealers to report monthly the gross sales, amount of express charges and returns to growers on roses and carnations separate. Arrangements should be made to have stock properly graded. Each large city should have an inspector who should be appointed by the S. A. F., and work under their rules and regulations. His reports should be filed at headquarters monthly, all dealers who co-operate should be given a stamp to paste on their packages, rules and regulations would have to be carefully planned and changed from time to time as experience would teach.

Then we should have a national committee on arbitration to act upon all complaints between members (to exclude lawyers), also between members and express, railway, telegraph or insurance companies and conduct their cases. Today if you apply to your express agent for some damages, he sends word to the superintendent who immediately inquires, "What is their trade worth to us," if it's a person who cannot afford a law suit he is "turned down" without regard to the merits of his claim, if the Society could control the whole express business many improvements could be made, and each florist who was a member would feel secure. There is not a more important matter before us for consideration today than the fixing of responsibility for damage to plants in transit. Every one in the country is afraid to order plants after November 1st, the shipper refuses to stand any loss and the common carrier refuses to allow for temperature or time, what is the florist to do but pay for what he does not get. There is work here for the strongest six men the S. A. F. can produce. Every member of the S. A. F. should be protected against such injustice whether he be rich or poor, it takes united effort now-a-days, and we will get it united if we go to work.

There is another matter, while we need protection in business we want more knowledge, we want knowledge disseminated in a way that all can absorb. The S. A. F. should arrange a few first-class extension courses of lectures to various local centers where a given number of members come together, charging a good price to outsiders.

There are other matters for consideration but these are enough to start with. If they are taken up with a determination much good will result. It comes quite close to forming a trust which is the order of the day.

There should be a national exhibit of plants suitable for Christmas on December 10.

There should be a national exhibit of chrysanthemums, cyclamens, etc., in November.

There should be a national exhibit of carnations and bulb stock in February and stock suitable for Easter. C. B. W.

"Rascal Florists."

Referring to Mr. Simpson's notes in the December 25, issue, a subscriber signing "Molly" says that the farther west you go the more "Rascal Florists" you meet. True! Molly—Too true! and Canada thistles and ox-eye daisies and English sparrows and other things also infest the western country, but they came from the east.

CANNA MLLE. BERAT.

"Molly" suggests that every florist claiming to be competent be compelled to furnish a certificate from some florists' club, and that such certificates shall not be issued unless the applicant has a good working record of not less than five years.

Canna Mlle. Berat.

Canna Mlle. Berat (Crozy) the subject of the illustration is probably the nearest approach to a pink color of anything yet produced. It is a soft shade of rosy carmine, foliage green, height, 4 feet.

Carnations.

DETERIORATION OF VARIETIES.

A great deal is said regarding the deterioration of carnations, and very often the originator of the variety in question is blamed for ever having sent out such a variety, when, in fact, the variety was all right and the grower perfectly justified in distributing it, but after having been generally and extensively grown for from five to ten years, for some reason it seems to be more susceptible to disease, and the flowers are not up to the standard in color or quality, and it is generally decided that it will no longer pay to grow it. "It has deteriorated," and now the important question arises: Why has it deteriorated, and from what cause?

It seems to me that the causes are only too apparent and that they are many. I am not of the same opinion as many, who claim the high state of cultivation given by some of our best growers tends to prematurely wear out a variety. I don't believe that good light, ventilation, feeding and watering, and keeping the plants clear and free from insects ever deteriorated a variety in the least, but that the cause is traceable in every instance to injudicious or bad cultivation at some stage of its life.

To illustrate my idea I will give the history and life of a few well known varieties. Portia was a seedling plant seventeen years ago this winter, and for the past fifteen years has been in general cultivation. Perhaps no variety of the color has held up so long and well that has been so extensively grown. I attribute the wonderful vitality of this variety to the fact that it is only a half-blood remontant carnation, the father parent being a hardy

or what is known as a garden carnation. Still, while it has retained to a great degree its vitality with many growers, the blooms are not as large as they were a number of years ago, but with a few of our best growers, who have kept their own stock and given it good cultivation, it is still the most profitable scarlet. Silver Spray, for some six years after the distribution of the seedling, was the most profitable white variety in cultivation and the demand for the stock was very large. About this time the rooted cutting business started, and the growers, eager to fill orders and make all they could out of it, propagated every cutting they could get, healthy or unhealthy. "It has deteriorated."

William Scott is, to my mind, the most profitable cut flower variety ever sent out by Mr. Dorner, yet we hear of growers who claim that Scott has deteriorated, and it is not to be wondered at, but is in no way the fault of Mr. Dorner. The next year, after this variety was sent out, I visited a place on Long Island where they had two large houses of it. The day was bright and sunny. I found a small boy looking after the place, not a particle of ventilation was given, and the thermometer stood at 85°. I asked what night temperature was kept and the boy said 65°; that they were crowding it for all it was worth as the demand for rooted cuttings was great, and they were offering it in the florists' papers for $15 per 1000 by mail. Possibly some of these growers who are finding fault patronized this would be philanthropist, who through his greed to get all he could out of Scott, was willing to supply those patrons who bit at his cheap offer with stock that had been forced to death. Such stock, I hold, a grower would be better without, at any price, and the man who has no scruples against doing this kind of business is unworthy of the support or patronage of the trade.

Yes, Scott will deteriorate, and so will each and every good new variety until such time comes that many of the causes which produce the effect are removed, or the hybridizers are able to conceive some method of breeding whereby the new varieties will possess a constitution of the texture of the finest Bessemer steel, and not susceptible to injury by fire and brimstone. In my next I purpose to more fully describe some of the causes as I see them.

A. T. SIMMONS.

The Newer Carnations.

[Read before the Florists' Club of Philadelphia, January 4, 1898, by Albert M. Herr, secretary American Carnation Society, Lancaster, Pa.]

There are so many of the newer carnations that it is hard to talk about them without making a descriptive catalogue out of your talk. So if there are too many names and too much descriptive matter, blame it on the originators.

In the first place, from a cut flower grower's point of view, there are too many new carnations. If the number could be reduced, to say four each season, there would be more in it for everyone concerned. As it now stands the general grower simply cannot afford to try them all, and the consequence is very often he does not try any. This is a loss both to the originator and to the grower. It limits the sales for the respective originators and causes them an extra expense in the matter of advertising, etc., to get their carnations before the growers. The grower frequently misses a very good thing, and only takes hold after the variety has become common and the bottom dropped out of the profits, so to speak. But like the poor, we will have them with us always, and the next best thing we can do is to try all we can, and gather from the experience of others what we can; then put the two together and make up our list for growing next season.

Among the newer whites we have Flora Hill, Harrison's White and Nivea. Flora Hill has had its praises sounded everywhere and needs none of mine. Nivea is doing all right around Boston. It is a weak grower in the field, but comes all right when planted in the house. Harrison's White was unfortunate in coming out with Flora Hill, the latter so far eclipsing it in all commercial respects. Nevertheless it has some good points. With me it is a fine upright grower, producing fairly good flowers on long stiff stems, but it has not made from 1000 plants, $10 worth of flowers to date, and this is certainly a serious drawback. I have it in the cool end of a house, and possibly it may do better in some places, but of numerous inquiries sent out I have received only two answers from men who will give it a second trial.

In fancy, we have Lily Dean, a variety that is very easily grown and produces a fine large flower. Mrs. Bradt, as almost everyone knows, has an immense fine bloom on a very weak stem which has improved greatly this season grown in a stiff clay soil. In a moderately cool house, I am inclined to think, it will make a standard sort. Maud Dean might be called a fancy, but I am afraid it will not become popular on account of its being hard to handle just right; but if handled right it is a fine sort. It should be planted as early in August as possible, and being a decided cropper you should have two or three lots and keep them topped so as to follow each other. By this method a continuous crop can be obtained.

In scarlets, there are a number, Robin Hood, Jahn's Scarlet and Morello. Robin Hood is a seedling of Hill's and had made some good friends, although it has to be grown carefully to produce strong stems. Jahn's Scarlet is called the "Poor Man's Scarlet." It was raised and introduced by P. Fisher. It is a free bloomer of fairly good size on a fine strong stem. It is an excellent keeper and slightly fragrant. Morello makes very large flowers in heavy soil and slightly smaller ones, but more of them in a lighter soil. It has made many friends in the west. Mrs. McBurney, one of Hill's, is somewhat of a disappointment as to color, otherwise it is a good variety, being free and healthy.

Mayor Pingree is perhaps one of the best of last season's introductions. To get the best results the cuttings should be taken early and grown right along so as to produce good, large plants. It does not want much pinching if you want early and continuous flowers. It likes a heavy soil and a few more degrees of heat than Daybreak, but will produce almost equally well in light soils. C. A. Dana, sent out by Cottage Gardens, I have not been able to see growing, but I understand it is a good variety. Possibly there are others worthy of mention, but I have been a bit pushed with work and have not had time to look up the back trade papers for their names. The same applies to the new ones for this season.

We are promised two good scarlets, one Bon Ton to be sent out by the Cottage Gardens and F. A. Blake. It is of Portia habit, with larger flower and stronger stem; this would indicate a good variety. Firefly, by Hancock, is promised as a perfectly rust proof and otherwise good variety. This will be a welcome addition to those who are so afraid of the rust in Jubilee. In whites there are four clamoring for popular favor. White Cloud, called a white Daybreak because of its resemblance to that variety in foliage and strength of stem. John Young called a white Scott for the same reasons. Jack Frost is claimed by its orignator to be an ideal white.

Evelina, the winner of the Cottage Gardens' Cup at the last meeting of the American Carnation Society held in Cincinnati and seen by a number of us then, was certainly a fine variety. I am told it is even better this season, and that would indicate that it was a good one to try. Mrs. James Dean is a very light pink of good commercial qualities, and New York a cerise pink that has captured the popular taste in the New York market. The Messrs. Breitmeyers, Simmons, and others are pushing forward pink varieties. They will no doubt all be in evidence at our Chicago meeting and reviewed by the trade papers, so, as I have not seen them, will leave that for later on.

One that I have seen plant and flower of is Empress, a crimson, and as we are badly in need of a good one in this color, it will no doubt hit the popular fancy all right. Gold Nugget promises to be one of the gems of the season from all indications, and there is certainly room for a few "Gold Nuggets" among carnation growers. There are a host clamoring for favor with the growers and a lot of originators reaching for their money. We hope both the growers and the originators will come out ahead for 1898, for it is not questioned that the majority need a little good luck, good times, or whatever you may choose to call success.

Taken all in all, the new carnations are fascinating, both to the introducers and to the general public and certainly to the growers. The buying public are beginning to look for something new each year, and we can do no better than cater to their tastes, but let us be sure first that they are an improvement over existing varieties, and then try and test them thoroughly before sending them out. In this way there would be fewer disappointments and more successes, and the extra care would redound to the introducers' credit and consequent success, and to the growers' finances. But even as it now is the few successes are so distinctly such that they overbalance the failures, and so the merry war goes on.

Carnations.

Now is the time when the carnations should be getting in the good work required of them. If the best results are to be had they must not be neglected in any way whatever. The man that watches and cares for them, looking carefully to every little minor detail is bound to be very near the top in producing fine blooms.

Keep the plants cleaned of all yellow or diseased leaves and at every favorable opportunity give all the ventilation possible, without causing a cold draught. I must say right here the best remedy against red spider and weak stems is fresh air, but the carnation will soon rebel if treated very often to extremes of temperature, therefore do not let your thermometer go much above 60° on bright days, without a crack of ventilation, and in the afternoon, with a falling temperature outside, gradually bring your house down so as to strike the night temperature with a little steam on, as soon as the rays of the sun have left the glass.

The plants will be growing very fast

E. A. Wood, President.

Elmer D. Smith, Secretary.

John N. May, Treasurer.

OFFICERS OF THE AMERICAN CHRYSANTHEMUM SOCIETY.

now and the stems will need to be tied quite often to keep them good and straight. Do not leave the disbudding until the side buds are half developed, but rub them off as soon as large enough to handle, without disturbing the main bud. Remove all side shoots down to the length of stem required. This will give the main bud, which is the one upon which all depends, all the show possible.

In taking your cuttings it is not a wise plan to entirely strip the plant of everything in sight in the way of a shoot, for this has a tendency to make the flower burst its calyx. It is much better to go over them about every fourteen days, thus leaving the plants something to be working with, without throwing all the strength into the flower.

The beds will be full of roots now and a sharp lookout should be kept, so as not to let the soil dry out, especially when you have to do heavy firing. The beds are liable to get dry at the bottom and still look in good condition on top, so the safer plan is to take a trowel and examine them every little while. When watering do not wet the foliage any more than you can help, except sometimes at the end of the greenhouse near the boiler. You may get a touch of red spider there and then I would advise taking a little salt water, about a 3-inch pot to 3 gallons of water, and give the affected plants a good syringing early on a bright day.

Chrysanthemum Society.

PORTRAITS.

In last week's issue we published the portaits of the members of the Philadelphia, Chicago and Cincinnati committees of the Chrysanthemum Society of America.

In this issue we publish portraits of the active officers and of the members of the New York and Boston committees, completing the list. During the past season Mr. Dailledouze was the only regularly appointed member acting at New York.

CHRISTMAS ROSES.—A display of Christmas roses at the Schenley Park conservatories is causing great interest among the public. Why are these interesting and easily handled plants not more often seen in our parks?

New York.

NEW YEAR'S TRADE MODERATE. — FINE STOCK OFFERED.—CHEAP STOCK SELLS BEST.—PRIZE BOWLING AT FLATBUSH.—A FINE NEW CARNATION.—GARDEN AND FOREST DISCONTINUES PUBLICATION.—LOCAL NOTES.

New Year's business was, as it has been for a number of years, of but moderate size and the official birth of Greater New York, although it furnished occasion for much noise and hilarity on the public thoroughfares did not seem to materially affect the sale of flowers as some sanguine people had been hoping. There was an abundance of stock of all kinds in view, and no special rush on the part of buyers to obtain it. In fact, they held aloof more than is common on ordinary days, with the evident purpose of breaking up prices, which on some lines were based on a sort of timid "me too" arrangement as compared with Christmas rates. A noticeable feature of the stock offered was that the quality was of the best. This applies especially to roses of which the cheaper grades had been well sold out. Closing prices on good stock were low, as compared with anticipations. There is a probability that low prices will prevail all through the present week, but as the weather is very cold a heavy over-stock is not looked for. Carnations maintained their position better than any other flower, but they were not cleaned up as well as hyacinths, lily of the valley, etc., which were taken freely, apparently, because they were cheap, which was just the opposite of the Christmas experience.

The annual bowling and "grab-bag" prize drawing of the Flatbush Bowling Club took place on the evening of Thursday, December 30. Until the last year or two the "prizes" were "surprises" with little value excepting the fun they created at the expense of those who received them. Evolution has been at work in Flatbush as elsewhere, perhaps because of its admission to Greater New York, and this year's trophies comprised all kinds of useful and costly articles from jewelled scarf pins and silk handkerchiefs to gold mounted pipes and silver mounted whisk brooms, the only article in the least amusing being a French talking doll which fell to the lot of Eugene Dailledouze. At the conclusion of the evening's festivities "Papa" Zeller mounted a chair and made a neat little speech, wishing all the boys a happy New Year and expressing the hope that he might be with them again next year, which was received with shouts of approval.

A new star in the carnation line is the Gov. Griggs which is coming in to Raynor's from Jos. Towell of Patterson. It is but little removed from Daybreak in color, but is a more solid and shapely bloom with much better stem.

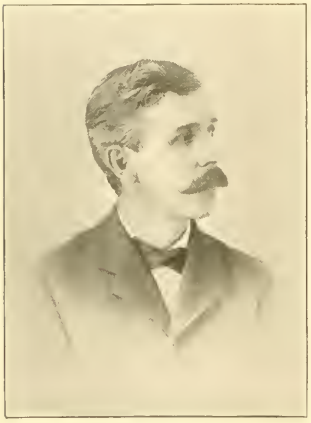
Many market gardeners and growers of bedding plants are trying Palmer's new hot-bed mats. If, as is claimed by the manufacturers, these protectors are water-proof they will prove very serviceable.

The National Florists' Board of Trade which has its offices at 271 Broadway, reports an evident improvement in horticultural trades all over the country.

Garden and Forest has been discontinued at the close of its tenth volume.

L. C. Bobbiuk has gone on a brief European trip.

E. C. Horan is receiving white lilac of unequalled quality for the season.



Geo. T. N. Cottam has been quite sick for two weeks.

Yellow jonquils are plenty in market, but they sell poorly.

Boston.

BUSINESS DULL.—LECTURE BY JOHN FARQUHAR.—BEQUEST FOR THE HORTICULTURAL SOCIETY.—A LOVELY CYPRIPEDIUM.—LOTS OF FIRES.—TELEPHONE ECCENTRICITIES.—LOCAL NOTES.

The particular feature of the flower trade this week is its insignificance. The money must all have been spent at Christmas, and the bondholders have not yet realized on their New Year dividends. Out of town orders are more filling than local demands, so the wholesalers say, and the retailers are confining themselves mainly to funeral work, which happens along just now very opportunely. There is an abundance of stock in market, all varieties and all grades, and prices have settled back pretty near where they were when Christmas gave them a boost. It is expected that after a few days, how-

Arthur H. Fewkes.

James Wheeler.

THE BOSTON COMMITTEE CHRYSANTHEMUM SOCIETY OF AMERICA.

ever, matters will improve and the regular winter business begin to assert itself. In the meantime all are taking lessons in patience and hopefulness.

The special attraction at the January meeting of the Gardeners' and Florists' Club, which was held on Tuesday evening last, was a stereopticon lecture on "Plant Life in Jamaica," by Mr. John Farquhar. Mr. Farquhar had a very large collection of interesting photographs which were recently taken and the audience, which included ladies, was duly appreciative. Officers were installed previous to the lecture.

The legacy to the Massachusetts Horticultural Society under the will of the late Francis B. Hayes has been decided by the Supreme Court to be valid, and thus a long controversy is ended. The amount that will come to the Society through this bequest is not yet known, but it may amount to two or three hundred thousand dollars.

On Saturday, January 1st, W. W. Lunt was awarded a silver medal at Horticultural Hall for a plant in bloom of Cypripedium bellatulum album. This variety was first exhibited by Sir Frederick Wigan, of East Sheen, England, at the Royal Horticultural Society's exhibition on June 11, 1895.

The schedule of the exhibitions for the year 1898 has been issued and may be obtained from the secretary, Robt. Manning, Horticultural Hall, Boston. The sum devoted to premiums amounts to $8,100. The first large exhibition will be the Spring Exhibition, which will take place on March 22, 23, 24 and 25.

A fire occurred on the night of December 24 at the greenhouses on the estate of Mrs. Peck, at Arlington, which are leased by David Duncan. Loss on building estimated at $500. Mr. Duncan's loss on stock is set at $1,200. Overheated boiler.

The greenhouse of Charles Dean at Roxbury was damaged by fire on the night of January 3, to the extent of about $500. The fire originated in the cellar.

Fire damaged the store of C. R. Dane to the amount of $300 on the morning of January 4.

A pile of coal close to the furnace in the greenhouse of A. Christensen at Stoneham, containing about thirty-five tons, caught fire on the night of December 19. The firemen saved the building and stock.

Be careful on orders coming over the telephone. A telephone order for a floral piece to be inscribed "From the Teachers of the —— School," was interpreted and executed by a local florist as "From the Peaches of the —— School."

Another recent case of a similar character was a design for the "Aldermanic Chamber," but which, when delivered, was found to read the "Automatic Chamber."

Luke J. Doogue, lately in business on Boylston street, has gone into insolvency. Liabilities about $16,000.

Visitors in Boston: S. S. Pennock, Philadelphia, Pa.; M. J. Leach, Pawtucket, R. I.

At the January 15th meeting of the Massachusetts Horticultural Society Mr. John K. L. M. Farquhar will deliver a lecture on "Horticulture in Holland." Stereoptican illustrations will make the lecture very interesting and entertaining.

Chicago.

WHOLESALE STORES WORKING ON SUNDAY.—PERSONAL NOTES.—ATTRACTIVE DECORATIONS FOR A WEDDING.

For the past six or seven years the Chicago retail dealers have made very little preparation for New Year's trade, carrying for that day only slightly more than the average stock. Whether it was caused from the fact that New Year's came on Saturday, and they had to buy their stock on Friday to carry them over till Monday and they had failed to secure a stock sufficient for three days instead of two, or from largely increased sales, all were sold out Sunday morning.

At the wholesale stores Sunday morning, lined up along the counters like a company of soldiers at roll call, were the retail dealers anxious for their turn to be waited on to whatever was left, and if the roll had been called, nearly every retail dealer would have been found either present or accounted for. Retail trade was better all through the week between Christmas and New Year's, much better than usual; New Year's day trade was good and there is a much better trade now than there has ever been since I can remember so soon after the holidays. Heretofore for a week or more after New Year's trade after the rush of the two preceding weeks has seemed to come to a stand-still, very little going on. Since Christmas there has been a steady healthy trade.

The wholesalers report shipping very good and although flowers are coming in more plentiful, still nearly all are being sold, very few are held over.

Andrew Miller of the Central Floral Co., who was at home sick for about two weeks at Christmas, is again at his post behind the counter ready to wait upon all who want anything in the floral line.

Joseph Curran is now with O. J. Friedman, on Michigan avenue and Van Buren street.

Mr. P. J. Hauswirth, 318 Wabash avenue, furnished the decorations for the Seipp-Madlener wedding which took place January 4 at the residence of the bride's mother, widow of the late Conrad Seipp, Thirty-third street and Michigan avenue, which is one of the most beautiful

Eugene Dailledouze.

NEW YORK COMMITTEE CHRYSANTHEMUM SOCIETY OF AMERICA.

in the city. The ceremony was performed in the hall room under a large canopy, decorated with asparagus, dotted with Bridesmaid roses and white doves. All the doors on the parlor floor were draped with asparagus, dotted with Bridesmaid roses. The tables were decorated with large vases of Bridesmaid roses with Asparagus Sprengerii. At the bridal table was another large canopy similar to the one under which the ceremony was performed, under which the bride and groom sat at supper. One hundred and fifty strings of asparagus and 2500 Bridesmaid roses were used in the decoration.

Philadelphia.

PRICES LOWER.—BEAUTIES IN DEMAND.—BOWLING AND SHOOTING.—GOOD CARNATION DISPLAY.—REPORT OF EXHIBITION COMMITTEE.

The old year departed this life in one of the most disagreeable days of its existence, the weather was wretched and the cash drawers of the retail florists, oiled up and prepared for quick work, had a comparatively easy time of it. In spite of this great drawback there seemed to be plenty to do, and most of the stores were obliged to keep open all day on the first, which was clear and cold and brought out the shoppers. Prices were a shade lower on carnations and from 15 to 20% off the Christmas rates for roses. Nothing in carnations worth having sold for less than $3 per hundred, with the select going from $4 to $8. Beauties varied with the size from $12 to $75 per hundred, there being but very few of the extras however to be had. For the past six or eight years the glass area devoted to this rose has increased from 20 to 30% each season, but this ever increasing space seems scarcely sufficient to raise enough for the demand, which seems to nearly always keep ahead of the supply.

This is not entirely local, however, as the fame of the Philadelphia grown Beauties has gone out over the land and Washington, Boston, Baltimore, Pittsburg and other large cities draw largely on our market for their supply of this rose. S. S. Pennock now handles more Beauties in a day than used to come to this market in a week. Ed. Reid is also a large shipper and these, with his fancy California violets are making him famous. Fred Ehret supplies the uptown stores in addition to his shipping trade with Beauties. It is a poor retail establishment in this city that does not carry a few Beauties in stock. Violets seemed to sell well at good prices, bringing from $1 to $2 per hundred. If we could only tell the same story about them as with the Beauties, what a satisfaction it would be. Eisenhart, of Holmesburg, is about the only man who gets near the mark, growing some good stock. He makes a business of violets; grows nothing else. There is room, however, for plenty more such growers. Nobody sends us good Marie Louise. Why shouldn't they be grown here as well as up the Hudson?

Robert Craig is able to be about again and has just returned from a short visit to J. N. May at Summit, N. J. W. K. Harris now has a phone and finds it to be a great convenience as do his city customers. Nearly all the large growers are now to be reached by telephone, and from the amount of time saved it is a wonder that this means of communication was not adopted years ago. Exorbitant rates which have recently been reduced was the principal reason. There has been considerable bowling recently, the first event of last week, being a contest for turkeys which were carried away by Brown in the first class with a score 181. The second class prize was won by A. Lutz, score 163, and Charley Cox carried off the third class bird by a score of 144. New Year's day was celebrated by an open house, considerable bowling was indulged in for prizes three in each class. W. J. Baker in the first class put up the highest game, a fine total of 214, but not having declared the game to be for the prize it did not count. R. Kift was first with 203, L. Brown second with 188, and G. Anderson third 185. A. Lutz won first prize in second class with 162, King next 160 and John Walker third with 146. Third class, George Watson, who is always winning something, was first 154, Charlie Kohlert followed with 149 and George Moss brought up the rear making 121. The prizes, the same in each class, were a fine pocket book and card case, a silver match box and a pocket knife. The members of the Gun Club are having their semi-weekly shoot, besides taking part in the large tournament going on between the various clubs of the city. They are very near the top and may win out, which would be a great honor.

Charles H. Fox has succeeded to his father's business, the elder Mr. Fox retiring. Mr. Chas. H. Fox will continue the business at both places at present.

H. Bayersdorfer & Co. have rented space and enlarged quarters in the Novelty Electric Building adjoining their old establishment at No. 56, and their address will henceforth be Nos. 50-52-54 and 56 North Fourth street. The new quarters give Messrs. Bayersdorfer & Co. an enormous area available for storage and the handling of a very extensive stock easily and quickly. The entire establishment is lighted by electricity.

The carnation meeting of the Florists' Club, for so the January gathering may be called, held last Tuesday night, was a great success from a carnation point of view, although the excellence of the display warranted a larger attendance. There were over 50 vases, some with one hundred blooms and nearly all in fine condition. The appended report of the committee on exhibits gives such a good and detailed account that we will not attempt to improve on it, except to say that the president never saw a finer one. Albert M. Herr's essay on the newer carnations was a thoroughly up-to-date paper and contained much that was of interest and value about the divine flower. He received a formal vote of thanks from the club. The display of E. G. Hill from Richmond was of fine flowers which had not carried well for some reason. A vote of thanks to those contributing flowers was directed to be sent by the secretary, who by the way should also have a vote, as to his efforts almost entirely was due the large showing made.

In the discussion of Mr. Herr's paper, Mr. Geo. Stollery of Chicago extended to all an invitation to be present at Chicago at the annual meeting of the Carnation Society February 17th. Mr. Ward, of the Cottage Gardens, thought the proper test of a new carnation was the number of blooms that were returned sold after they were put on the market. What the buying public thought of a flower was the essential point. He kept a close record of what his plants did and the best results was twenty-five to a plant up to January 1. Six flowers to a plant is a good general average for all plants on table up to January 1. Many men throw away a good variety because it did not come up to the great claims made for it by the introducers which would have been profitable if continued with, if so much had not been expected of it. C. S. Swayne of Kennett Square said the carnation belt was up in arms against spider, aphis and commission men. It was very hard to grow fine carnations and he thought that neither storekeepers nor commission men appreciated fine flowers as they should. Wm. J. Baker asked on behalf of the commission men, how much Mr. Swayne got for his carnations six years ago and how much more he got today? Mr. Swayne said that undoubtedly prices were now better but the flowers were finer and had been made so by the grower which had enabled the commission man to develop the prices of today. Mr. Besold and others made remarks.

The following resolution, introduced by Geo. Watson, condemning government distribution of seeds, etc., was passed unanimously:

WHEREAS, We consider the present expenditure of over $100,000 annually by the Government for the free distribution of seeds of ordinary vegetables and flowers to be prejudicial to the best interests of the seedsmen, nurserymen and florists of the country, and

WHEREAS, We also consider this distribution to be a perversion of the original intent of the framers of the law

Resolved, That we petition the national legislature to abolish this free seed distribution, and that no moneys whatever be appropriated for this purpose hereafter, and that the secretary of the club be instructed to forward a copy of this resolution to each of the congressmen from the city and county of Philadelphia, and both the senators from the state of Pennsylvania.

John Westcott is to prepare a paper on blooming plants for Christmas to be read at the next meeting. Thos. Cartledge, on account of his continued illness, asked to be released from the position of treasurer of the club. He has held this so long and conducted it so ably for the best interests of the organization that the resignation was only accepted with the hope that his health would so improve that he would soon be able to accept the post again. Adolph Farenwold who for the past nine years has so ably conducted, in the position of foreman, the establishment of Joseph Heacock has resigned. Here is a chance for any one desiring a first-class man who as a rose grower has proved himself to be one of the very best. Mr. Farenwold is at present undecided as to his future movements and may go into business for himself.

J. Atkinson, of Edgewater Park, is laid up with pneumonia.

Visitors in town: W. Besold, Mineola, L. I.; Mr. Ward, Queens, L. I.; Geo. Stollery, Chicago; C. S. Swayne, Kennett Square; Mr. Weber, Oakland, Md. K.

EXHIBITION COMMITTEE'S REPORT ON CARNATIONS.

Your committee beg to report that the exhibits comprise a long list of well grown varieties, including many novelties, in describing which the committee can scarcely do full justice in the short time allotted to them, and difficulty in properly distinguishing the exact color by artificial light.

R. Witterstaetter, Sedamsville, Cincinnati, O.—Evelina, white; good calyx; good stem.

Wm. Swayne, Kennett Square, Pa.—Empress, dark maroon; large flowers on good stiff stem

Hugh Graham.—Vase of fine blooms of well known variety Victor.

Mr. Fick, amateur, Philadelphia.—No. 14, exceptionally fine large white; with good calyx; compact flower; also Laura E. Doty, pink; Kathryne, white, and Mrs. C. M. Fick, pink.

Stollery Bros., Argyle Park, Chicago, Ill.—One plant and vase of bloom of new carnation, Argyle; plant seems to be clean, healthy grower; flowers produced on long stiff stems; bright dark pink in color; large good shaped flowers.

Collection of seedlings, H. Weber, Oakdale, Md.—A number of which give promise of being first class varieties.

Vase of new rose, Mrs. Robt. Garrett, large, delicate pink, fine form.

Henry A. Niemeyer, Erie, Pa.—Uncle Sam, variegated variety; Pluto, crimson; Goliath, red; Snow Queen, white; Rob Roy, red.

C. F. Baker, Utica, N. Y.—Red Jacket, scarlet; Oneida, good pink; both full fine flowers, and likely to prove good commercial varieties.

E. G. Hill & Co. Richmond, Ind.—Painted Lady, large fine dark pink; exceptionally good; Psyche, variegated white and pink, large and full; Seedling No. 1,000, large pink, full flower. All these varieties are exceptionally fine, with good stems and large blooms.

The Cottage Gardens, Queens, N. Y.—Collection of new varieties, many of which are likely to prove valuable additions to our list of commercial kinds, especially Bon Ton, scarlet; White Cloud, white; and John Young, another good white. Other varieties are New York, crimson seedling; Mrs. Jas. Dean, blush and scarlet seedling; a particularly fine collection in its entirety.

F. A. Blake, Rochdale, Mass.—Vase of scarlet Bon Ton; on strong stems; fine.

E. J. Weaver.—Bird in Hand, white; lightly penciled red; good calyx; gives promise of being a good sort.

C. Besold, Mineola, N. Y.—Two vases and one plant; Mrs. Frances Joost, a large flowered pink variety; on good stems; plant shows a clean robust growth.

Chas. S. Swayne, Kennett Square, Pa.: Sweetheart, white, deeply penciled with red.

Wm. P. Craig, Philadelphia.—Collection of standard varieties; Flora Hill, white, a fairly well known variety of the present day; Victor, pink; Mrs. G. M Bradt, variegated, good heavy stem, large full flower; Harrison's, white; Mayor Pingree, yellow; Lily Dean, large variegated variety; Jubilee, scarlet; Maud Dean, blush, with deep pink center.

John Burton, Chestnut Hill, Philadelphia.—Vase of Alba Superba, large pure white, on long erect stems, well formed globular bloom, will undoubtedly become one of our standard varieties.

F. HAHMAN.
A. LUTZ.
J. W. COLFLESH.

Cincinnati, O.

Our storemen report a very good trade during last week, and on Thursday orders came in freely for New Year's, and a noticeable feature among the retailers was that orders came in earlier this year than heretofore, making it easier to fill orders. A scarcity was felt in blooming plants and more cyclamens and primroses could have been disposed of. There was an abundance of salable foliage plants such as palms, ferns and Rex begonias, although plants did not move as well as in the previous week.

At the beginning of this week our wholesale houses have been doing a fair shipping trade and the outlook for the remainder of this week is very encouraging, several swell weddings and social events are noted to occur.

Mr. Fred. Walz is still confined to his room.

Mr. Anthony Fisher is seriously ill with throat trouble.

Fire broke out at 1 a. m. New Year's night in Julius Baers' basement, burning and scorching the entire fixtures in the store above. The damage to cut flowers was not great, as the ice box in which all flowers were stored away for early delivery was not injured. The fire was caused through some electric wires in the cellar. Fixtures were fully covered by insurance.

H. SCHWARZ.

St. Louis. Mo.

MARKET REVIEW.—CUT FLOWER TRADE.—PERSONAL.—CLUB AND BOWLING NOTES.

The new year was ushered in with receipts very light and trade correspondingly low. The weather has not been very favorable for trade. The retailers, however, say that they expect lots of trade for January, as it is a month devoted to all kinds of festivities, and all of them have booked ahead large orders for decorations, receptions, balls, etc. Owing to the cold weather we have had during the past week the death rate has increased to such an extent that for some days the retailer was at a loss where to procure his stock for funeral designs. As far as we could judge all dealers were satisfied with their holiday trade, as orders were plentiful with lots of stock to select from.

American Beauties continue to be off crop, and receipts very light. Meteors still continue to be scarce in this market and are selling higher than any other flower; Brides and Maids are plentiful and of fine quality; Carnots continue to be scarce and demand increasing; Perles are also scarce in this market; La France are improving and find ready sale; Woottons are very poor stock, consisting mostly of nubbins.

Harrisii lilies were in better demand and selling readily. Callas were sought for funeral orders this week and the market cleaned up. Romans sold readily at good figures. Narcissus were poor and neglected. Asparagus and adiantum ferns sold well. Smilax was in good demand and supply was plentiful.

Carnations are still in good demand and receipts are very light. The expected glut in this article has not yet materialized, and carnations are selling higher to-day than the average rose stock.

California violets are very scarce in this market and always command a good figure. Double violets are arriving more plentiful, but the dealer neglects this variety if he can secure the Californias. There are only a few southern violets in this market and sell very readily.

Ayres Floral Co. were deluged with funeral orders this week in addition to several large decorations and their regular trade were well satisfied with the beginning of the new year.

Chas. Schoenle, of Washington avenue, had several large decorations during the week and reports a good trade with plenty of big decorations in sight for January.

The regular meeting of the Florist Club will be held next Thursday, January 13, and a big attendance is requested, as business of importance will be transacted. There will be some important essays read that will prove instructive to all. The club will also set a date for its annual smoker, which is looked forward to by both the old and the young members.

There was a full attendance at the Bowling Club and some high scores were made. High man for three games: Kuehn 587; Kunz, second, 530; Sander, third, 528. Single high score: Kuehn, 228; Kunz, 218; Sander, 200. A. J. B.

Buffalo.

This is the time when people are supposed to "swear off," turn over new leaves, form new resolutions, etc. As to Buffalo, I am happy to say that, so far as the florists are concerned, there is no need to worry about them, for they are on a pretty high moral plane now. However, it is possible that they, like others, have learned somewhat from the experiences of the past year, and there may be room for some good resolves of a purely business character. Of course the most important of all is to resolve to renew their subscriptions to the AMERICAN FLORIST promptly and to induce everyone in the trade to subscribe at once. This done, the country is safe for another year. The carnation growers might resolve away the "rust" and the violet growers the "disease." In fact, if you will stop to think a moment, there are doubtless many other things that might be corrected by proper resolutions. After making out the January bills you will have plenty of time, while the money is coming in, to fix up all such matters.

New Year's Day is not what it used to be anyhow. The good old-fashioned custom of making calls has fallen into "Innocuous desuetude" and consequently the demand for button-hole bouquets and table decorations is not so good as formerly. There are, however, a few more formal functions that are occurring about this time that help business out. And there is a sort of echo of Christmas in the air, as, for instance, Long's floral calendars and short-stemmed tulips. The trade for the week has been fairly good, considering that everyone connected with the trade was worked out and sold out at Christmas. Having interviewed everybody that would stand it, I have yet to hear any complaint in regard to the holiday trade. The carnation growers struck a regular Klondike. Altogether there is a good prospect for a happy new year.

Old-fashioned winter weather prevails, and coal is falling rapidly. The weather has been rather dark though and blooms open slowly.

The park rinks are crowded with skaters, among whom an occasional florist is seen.

The Park Commission is again wrestling with the plans and specifications for the conservatories at the Botanic Garden, and it is hoped that the matter will be settled soon. The trouble has been that the money available is not quite sufficient to build the range according to the accepted designs. It would be a great pity to be obliged to alter the present plans, which provide for a very handsome and complete range of houses.

Scott had one of the biggest jobs of the season so far, the decorations for the Buffalo Club reception, which came off during the past week. It was very elaborate.

Another item of business was the decoration of the Mayor's office for January 1. The office was nicely decorated with palms and foliage plants, and the floral work was copious. It would seem that several of our store men had a slice.

We had a short though very pleasant visit during the week from Mr. E. M. Hoffman, one of Elmira's leading florists.

C.

San Francisco.

CHRISTMAS TRADE REVIEW.—ACCIDENT TO E. W. M'CLELLAN.—SUCCESSFUL FLORISTS' BALL.—NEWS NOTES AND VISITORS.

Trade in this city for Christmas and the holidays was very good indeed. Good prices prevailed everywhere, but there was a noticeable scarcity of good stock, in fact all stock was scarce; roses were in great demand and brought very fine figures. Brides and Maids of first quality brought $1.50 per dozen, and second class stuff brought $1. A much larger quantity could have easily been disposed of at the same figures. Beauties were scarce and the quality could have been improved upon; they brought fancy prices. Some very good Kaiserins were to be seen, and they brought about the same figure as Brides. Not many Testouts were to be had. There was also a scarcity of Perles. Violets seldom, if ever, were so scarce as this season. This is undoubtedly due to the fact that we are now experiencing the heaviest and longest siege of frost since 1876. The weather is extremely cold and has done much damage to outside stuff. The orange crop in the southern part of the state has also suffered severely. As for violets Marie Louise was by far the more plentiful and brought $2 per dozen bunches. Californias and Princess of Wales were very scarce and up to the present time of writing the scarcity continues. They will probably be scarce now until we have a rain. Carnations were also in heavy demand, with a short supply, and prices ranged accordingly. Scott was the leader, closely pressed by Daybreak and Portia. Some very excellent Flora Hills were to be seen, and I am informed they brought very fancy prices. Uncle John and McGowan were sent into the market in fine shape by Sidney Clack. Carnations as a rule brought from 35 to 50 cents per dozen. Roman hyacinths sold very well this season, in fact we could not get enough to supply the demand. The average price received was 50 cents per dozen. Paper White narcissus also brought a fairly good price. There were few if any chrysanthemums. A few Illuminator were to be had, but of very inferior quality.

Smilax and all green sold well. Large quantities of red berries were brought in from the mountains in the adjacent counties, but did not bring a high price.

Funeral work has also been active in this city on account of the death of several prominent citizens.

The sales of potted plants was about equal to that of former years, but there was a noticeable absence of palms in salable sizes.

Mr. J. G. Morley, of the Redondo Floral Co., was in this city last week looking at our methods of carnation culture. Mr. Morley has about ten acres of carnations at his place in Redondo Beach, all grown outside, and he says some are much finer than the blooms grown under glass in the vicinity of the city.

Mr. Chas. Navelet, of San Jose, spent several days last week at his new store in Sacramento, and reports trade as very good in that city.

Mr. E. W. McLellan, of Burlingame, was severely burned by an explosion of steam last week. Mr. McLellan together with Mr. Chas. Mitton was repairing a pet-cock in one of his rose houses, when it flew out of the pipe burning his hands very severely and also scalding Mr. Mitton's face. It will be some time before these gentlemen will be about again as the result of the accident.

Mr John Gilmore has resigned his position as foreman of the rose-growing establishment of Mr. A. Pottet.

Mr. Lester L. Morse, of C. C. Morse & Co., has returned from an extended Eastern trip and reports the prospects for the seed trade as good.

Mr. Tom Landrum, of C. C. Morse & Co., was in this city during the week.

Mr. H. Seulberger, of Oakland, went down to Menlo Park on a business trip last week.

Mr. Paul W. A Grallert, well known as a carnation grower, had some of the finest Flora Hill carnations for Christmas that ever have been brought into this market. In fact they were so large that he received $1 per dozen for them, which is considered a very high price in this city. This carnation has done splendidly with most of our carnation growers and next season will see a large quantity of it planted.

The florists' ball which was given recently was both a social and financial success, and to the management is due much credit for the way it was carried out.

J. M Kimberlin, the seed grower who has been in the East, returned accompanied by his nephew.

This season quite a lot of holly was shipped down from Oregon. The quality of the stock was very good, and it brought a very good figure in this market.

The shipping trade to Oregon, Utah, and Washington was much short of what it was in former years. This is probably on account of the great scarcity of flowers in this market. Several of our leading growers report a heavy demand for stuff, but say that the supply was not at all equal to the demand.

Mr. M. Lynch, of Menlo Park, has just completed the planting of 75 acres of sweet peas.

Mr. Jas. Johnstone has resigned his position with E. W. Hopkins, Esq., at Menlo Park

Misses Cecelia M. Head and M. Allie Chase have opened a flower store at 9 A Stockton street to be known as the "Las Palmas."

The suit of John H. Sievers vs. City of San Francisco, which has been pending in the courts now for several years, has at last been decided in favor of Mr. Sievers, and the sum of $3,500 damages has been awarded him.

Mr. Arthur Cann, manager of the Garden City Floral Co., of San Jose, was in town during the week. He reports the Christmas trade in San Jose as very good.

Mr. W. H. Talbot, of Redwood City, is erecting a fine greenhouse on his premises.

Frank Pelicano & Co. had an unusually fine display of orchids in their windows during Christmas week.

Mr. K. S. Murray was a visitor in town last week. METEOR.

Toronto.

LOOK OUT FOR THE PALM SELLER.—TRADE NOTES.—OPPOSITION BUSINESS BY THE GOVERNMENT CONSERVATORIES.

Some of the boys here have been watching the FLORIST for the last few weeks to see the report of a certain enterprising traveler having been more fully identified by the trade in the cities favored by his visits. I refer to the individual who has been dealing in palms in Detroit, Toronto, Buffalo and probably other cities, not yet heard from. There seems little or no variation in his methods, and it is somewhat surprising that he has not "struck a snag" before now. Let us hope that he may meet his Waterloo soon. His victim here was Cotterill from whom he obtained about fifty dollars worth of palms and sold them at a small percentage of the value. Fortunately the police here have been able to recover nearly all the stock from the persons, who purchased it, so that Cotterill really loses very little.

Christmas here seems to have been about the same as last year, so far as I have been able to learn. Cut flowers were all sold and more could have been sold at the same prices as last year, with the exception of roses, which for some reason were somewhat cheaper.

Plants of the right kind seem in favor. Is there not a point here not sufficiently observed by the trade? It is next to impossible to control the supply of cut flowers, so as to meet the demand at moderate prices at this season, but would not the same skill and pains that are put forth to get more cut flowers, if applied to growing choice plants, produce more satisfactory results. There are any number of plants that could be grown and regulated, so as to be in good condition, at the right time, much more easily than roses, carnations, etc. As a very large percentage of the stock sold by florists at Christmas is sent out as presents, it should not be very difficult to divert the attention of buyers from the cut flower counter to a really fine display of plants, varying from the humble mignonette or primula, to majestic kentia, giving sufficient scope in prices to meet the purses of all lovers of flowers.

The florists here can sympathize with their Washington brethren in their discomfiture in the matter of the opposition business done by the Government Conservatories. It was ever thus. The public official, who has, through a systematic misdirection of the public resources, made sufficient friends among influential persons, becomes so entrenched, that to correct the abuse is a matter of extreme difficulty to be undertaken only by a person having no other business and prepared to make a nuisance of himself for an indefinite period. TORONTO.

Omaha.

HOLIDAY BUSINESS.—JOHN BATH NOW WITH A. DONAGHUE. — PARK COMMISSIONERS PUT UP ANOTHER HOUSE.

Now that the holidays are something of the past, and we have had time to right ourselves and remove some of the holly thorns that found hiding places in our fingers during the rush, and upon looking over the sales we find a neat credit to merchandise account, much larger than for several years past. Prices advanced about a hundred per cent on the Monday preceding Christmas and a few utterances of "Robbery!" were heard from some of the summer patrons.

Roses sold out clean at from $1.50 to $2.50; Beauties, $6.00 to $12.00; carnations, 50 to 75 cents; Romans and Paper White moved slowly at 50 cents; the last of the 'mums were wiped out and sold fairly well at 75 cents and $1.00 per doz.; violets were very scarce, but those sold brought $2.00 and $2.50 per 100.

The holly and garland trade was also very heavy. Good holly could not be got at any price Friday (24th) afternoon; the demand for this stock was so much heavier than expected that no one was prepared for it, and good stock could not be had from the commission houses here, they had plenty of the southern holly, which was not a good color and poorly berried.

Business, as a whole, was somewhat different from that of former years.

December, until about the 20th, was very quiet, and some of our dealers, who are inclined to look at the dark side of things, made predictions for a very quiet Christmas, but by Wednesday we were "up to our chin" with work, and orders coming in by the basket. Christmas Eve found us all willing to admit there was a great deal of truth in the old saying "There's no rest for the wicked." By Saturday noon almost all were sold out and had closed up shop and gone home to gaze at old Santa's donations.

New Year's business was far below that for Christmas, although this was also heavier than expected, with prices about 25 per cent lower. Palm sales were not quite as numerous as in 1895 and 1896, although a great many ferns, small plants and azaleas found a market.

John Bath, who has been with Hess & Swoboda for a number of years, has accepted a place with A. Donaghue.

The park commissioners found it necessary to put up another house at Hanscom Park to accommodate the large plants which were given to the city last fall by Mr. Herman Kountze, also those purchased of Mr. W. J. Hesser of Plattsmouth. G. R. H.

Rochester, N. Y.

TRADE GOOD AND PROSPECTS BRIGHT.—INTERESTING ORDER BY MAIL.

The supply of cut flowers of every description all through New Year's week was short, much more might have been disposed of because the demand was rather brisk every day in the week, not only was the ordinary everyday trade very lively, but social events crowded each other in close succession and most of these called for more or less elaborate decorations, so that all stock coming to market was eagerly bought up by the dealers at good stiff prices. When Friday came, none of our florists had a very large stock of cut flowers on hand, consequently everybody sold out clean long before noon on New Year's day. The week may be set down as a very busy one and growers as well as retailers have every reason to be satisfied with their earnings. It is true that the regular New Year's trade of late has declined year after year, yet a fair amount of orders may still be looked for on that day with certainty, and quite a lot of stock is disposed of here. As flowers were scarce, plants were pushed to the front whenever possible, there was a limited number of azaleas in most of the stores, they all found buyers, begonias, primroses and a lot of cyclamens and cinerarias were there in quantity and quite a number of medium sized palms were also disposed of.

The present week, the first in the new year, started in very promising, the demand is good all around so far, the only obstacle to overcome seems to lie in the difficulty of obtaining an adequate supply of stock, but now as the days grow longer we may also expect more sunshine and the scarcity of flowers is not likely to continue much longer. Our florists look with increased confidence to a possible revival of prosperity, encouraged by the present bright outlook, although there are some doubting Thomases among them, who give it as their opinion, that the splurge will only be of short duration. Let us hope that these parties are in the wrong and that our trade will be booming once more in 1898.

A munificent mail order astonished one of our florists one day last week; it came from a generously disposed lady in one of the towns of this state and read as follows:

"DEAR SIR.—Will you please send by return mail, so they shall reach me here on Monday afternoon at the latest, some red roses, pink ones and some yellow. I enclose here 12 cents. Yours respectfully,

Miss L. V. D., W—, N. Y."

Two cents postage was taken out and the remaining 10 cents were returned with regrets, explaining that roses were a little scarce at present; they were selling at $3 per dozen and for this reason it was impossible to accommodate her this time. K.

ONEIDA, N. Y.—The greenhouses of Frank Paige, located at the western limit of the village, were badly damaged on the morning of December 28, by the explosion of a steam heater.

Catalogues Received.

At less than half its cost, or for rent, about 28,000 square feet of glass with grounds and modern 12-room dwelling, built a year and a half ago; greenhouse nearly new, all heated by steam, well stocked and in good order; located on street car lines between St. Paul and Minneapolis, and a well paying wholesale business established. A splendid opportunity for a good live man. Sale price, $10,000; rent $150 per month. If you mean business, address CHRIST HANSON, St. Paul, Minn.

FOR SALE.

Greenhouses in one of the best cities in Wisconsin. A good investment and a money maker for a hustler. Owner must retire on account of poor health

For particulars write ELLIS & POLLWORTH, Milwaukee, Wis.

San Jose, Cal.

Christmas trade was never better than this one just past. There was a great scarcity of all flowers, with the possible exception of carnations. Violets were decidedly scarce, and brought fine prices, as also did roses. Hyacinths and narcissus were much in evidence, but all were sold out completely. The prices realized were much higher than those of former years. There was not much of a demand for palms or potted plants, but holly and red berries sold fairly well.

Chas. Navelet's large store had a splendid appearance during the holidays. He had a fine window display of palms and ferns, and says he is very well satisfied with the amount of trade done.

Mr. G. Lehmann, the carnation grower near Oak Hill Cemetery, has a very large crop of carnations on at present, and being of a fine quality, is obtaining good figures for them.

Mr. E. Bourgnignon's roses were in splendid condition, and his cut was very large. He also had a large quantity of carnations and bulbous stock, for which he says he had a heavy demand.

The Garden City Floral Co.'s pretty store on San Fernando street had a very excellent display of plants and cut flowers. Arthur Cann, the manager of the company, informed me that trade was splendid, but says he could not get enough stock to supply his customers.

Mr. Tom Landrum, of C. C. Morse & Co., was in town during the holidays.

Mr. C. C. Morse spent several days in Gilroy last week looking over his extensive seed farm. The weather has been fine for the seed grower. The rain has kept away and given the growers a chance to plant their crops early. I am informed that the growers who did not contract for their onion bulbs last season will have to go without any this season, as they are bringing $2 per sack in the open market. METEOR.

Polypodiums.

Taking the large number of species now included in this genus, there are comparatively few that are useful for florists' work, though a great number are desirable where anything like a collection of ferns is grown. There are also some which though not showy as pot plants, are very serviceable for the rock fernery, or for covering rough walls. Most of the polypodiums have spreading rhizomes and may be propagated by division, but those extensively grown for market are raised from spores. And I find many of the choicer sorts may also be had from spores, and make much better plants than divisions Some time ago I raised a fine batch of P. nigrescens and they are quite nice plants for 5-inch pots, but I find it difficult to get good plants from divisions, or from any that have once become stunted. The broad pinnate fronds are of a deep green, with a bright surface, the stipes (or stalks) are almost black, hence its name. A curious characteristic is the spore cases are sunk as if they had been pinched in, and the surface of the fronds show regular lines of protuberances like knots.

I lately met with a variety called terminale which has some resemblance to the above, but the spore cases are not sunk, the fronds are also of a thicker texture. Seedlings which have come freely seem likely to make compact, useful plants. P. musæfolia, we do not often see seedlings of this. I find that we now have quite a large batch, which are growing away freely and should make useful plants. P. subauriculatum, perhaps better known as goniophlebium s. may be raised from spores, and though it takes some time to make good plants; they are very effective, especially when grown in suspended baskets. I have seen the long drooping fronds used effectively when cut. They are particularly adapted for the tall trumpet vases when used for chrysanthemum blooms.

Polypodium aureum is too well known to need any description, but I may mention that when two or three seedlings are grown together in the same pots they flourish much better, and do not get so tall and straggling. The variety glaucum, which has a more distinct blue tint, is of smaller growth; it does not come so free as the type but it is worth persevering for, as it makes a very distinct and pretty plant. Sporadocarpum is similar to the above but has slender rhizomes and the fronds stand erect, while glaucum has quite a drooping habit. P. plumosum is a distinct little species, the deep green pinnate fronds grow nearly erect, and have a pretty curve, giving them a feather-like appearance. My previous experience of this has been from divisions, and I have found it rather slow and delicate; but a nice batch of seedlings now coming on seem to indicate more vigor, and they may prove much more useful than those from divisions. A. pectinatum is of similar habit but makes much larger fronds. Both of these succeed best under cool treatment.

P. Mayenianum (perhaps better known under the name of Aglaomorpha m.), also called the bears-paw-fern, is a noble looking fern; when well grown, the stout rhizomes are thickly covered with brown woolly scales. The lower portion of the fronds are pinnatifid and of a thick shell-like texture, the upper portion when fertile is pinnate and much contracted. It comes freely from spores but is very slow, and requires some skill to grow it successfully. If once plants get stunted they are far from being handsome, but when well grown it is one of the most attractive ferns we have. It should be grown in suspended baskets, or shallow pans will suit it better than pots, as it requires some surface to spread over and does not root deep. P. heracleum, the barren fronds much resemble those of the last named, but when fertile the spore cases are dotted over the entire under surface of the broad pinnules and the rhizomes are not so conspicuous.

A great many distinct species might be referred to and may be equally worthy as those named above. And I think many of them get neglected, and are not seen in good condition, consequently are condemned as being useless, but grown on freely and kept clean they have quite a different appearance Over-potting and over-watering are two evils which often occur. Most ferns with spreading rhizomes do not root deep, therefore plenty of drainage should be used, and shallow pots or pans are preferable, especially for the larger specimens. A. HEMSLEY.

Address THE AMERICAN FLORIST CO., Chicago.

Fuchsia Photographs.

We desire to call attention to an offer made by one of our contributors under an article on fuchsias which appears elsewhere in this issue. The fuchsia is one of our most decorative greenhouse plants when well grown, and certainly it has been far too much neglected in the past. The late C. M. Atkinson used to exhibit some good specimens at Boston, and we know that creditable plants are not difficult of production if the cultural details are given ordinary attention.

The plan of awarding a prize to the best fuchsia photograph sent to this office is therefore cordially endorsed by the publishers of the AMERICAN FLORIST. We shall reproduce the most meritorious photos in our columns as they come to us through the year, and at the end of the current year Prof. Cowell of the Buffalo Botanic Garden will select the prize winner from the plants thus illustrated. Prof. Cowell's decision shall be final.

Camden Has a Grievance.

Mr. Watson's article in a late issue classifying Camden along with New York and Washington as a slow town has called forth a vigorous remonstrance from one of its citizens He says: "I want you to take back what you said about Camden. It is the only town I could make any money in and I object to having the city of Camden classed with such towns as New York and Washington."

We apologize. Camden is all right. Everybody knows it. We were about to write Mr. Watson a very severe letter in regard to this matter when the thought struck us to examine his copy and lo! the mystery was explained. Mr. Watson had written Baltimore and the stupid printers had blundered.

N. B. If Baltimore objects we may have to examine that copy again. We propose to keep on the right side if we have to ruin the character of every compositor in the office Up to date neither New York nor Washington has said a word.

TRADE INCREASING.—ENLARGING A SEED STORE.—MONTHLY MEETING OF THE CLUB.

The store men are pleased with this year's holiday trade, reporting an increase from 15 to 25% over last year The growers also are well satisfied as far as prices are concerned, but most of them were very short of flowers.

The greatest demand being for cut flowers; their scarcity and high price helped to increase the sale of pot plants; although blooming plants sold better than last year, it is evident that the demand was not as great as expected, as many of the florists have quite a number of plants left over.

In holiday greens the florists had so many competitors and prices were so low that it did not pay to handle these goods.

With the Bertermann Floral Company pans and baskets planted with bulbous and other blooming stuff and ferns cut quite a figure in their sales.

Wiegand & Son report a large increase in the sale of palms.

Henry W. Rieman is very well satisfied with the behavior of his roses, two of his houses were in full crop at Christmas. With these and a good supply of carnations he had to buy but very little in the cut flower line.

John Heidenreich, our leading market man, shows an admirable ability to have the right thing at the right time. He had ready and disposed of a big lot of azaleas, a large patch of lilies of the valley, and a few hundred chrysanthemum blooms, besides a general assortment of plants and cut flowers.

Huntington & Page are engaged in overhauling and enlarging their quarters on Market street. Indications are that when the work is finished they will have one of the finest seed stores in town.

The monthly meeting of the club was held last night at Thron's place. A resolution was passed and forwarded to the Board of Public Works urging that body to employ a city forester, who is to take care of the trees in the city of Indianapolis. "She is not a bit too shady," and therefore such a man is highly desirable.

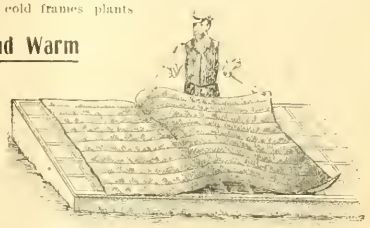
R. Witterstaetter, of Sedamsville, O., sent a sample lot of his new white carnation Evelina, which was greatly admired by the members of the club. Several of them intend giving it a trial next year.

J.

Chrysanthemum Merry Christmas.

In this new late white variety the F. Dorner & Sons Co. seem to have produced a good thing. Sample blooms received a few days since were in excellent condition, showing no trace of the flabby limp appearance so common in chrysanthemums cut at so late a date.

The flower is a reflexed white about 5½ inches in diameter, form, stem and foliage good, with plenty of substance to the flower. The fact that it is in perfection for Christmas and New Year's should make it valuable.



BELOIT, WIS.—Christmas trade has been good, nothing left over. Our own stock brought the money, commission stock sold at cost, and glad to dispose of it. Blooming plants sold well. There was a large wedding decoration on New Year's day at the Goodwin house, palms, ferns, etc., were used, also lots of green wreathing and holly. Extra electric lights were put in and hidden between holly and palms, then the windows were darkened

Palmer's Hot Bed Mats

FROST PROOF

Made expressly for winter covering of hotbeds, cold frames plants and seeds of all kinds.

Indestructible, Cheap and Warm

WILL not harbor mice or vermin. Easily handled. Dry out quickly after rain. Have now been in practical use three years. Cost less than old-fashioned straw mats and entirely take their place.

MADE IN FOLLOWING GRADES:

No 1 **Burlap Cloth,** filled with combination wool and quilted, seams 3 inches apart and edges firmly bound.

Size 40x76 inches, 50 cents each.
" 76x76 " 75 " "

Made any length, 76 inches wide, at 12 cents per running foot.

No. 2 **Duck Cloth** outside, filled and quilted same as No. 1.

Size 40x76 inches, $0.75 each.
" 76x76 " 1.00 "

Made any length, 76 inches wide, at 16 cents per running foot.

No 3—**Waterproof,** made of oil duck, filled and quilted same as Nos. 1 and 2.

Size 40x76 inches, $1.00 each.
" 76x76 " 1.25 "

Made any length, 76 inches wide, at 20 cents per running foot.

That these mats are a **much needed improvement** over anything heretofore used for the same purpose, is demonstrated by the large demand and many testimonials from prominent men in the trade. Everyone using Hot Bed Mats should give them a trial.

WE ALSO MAKE **QUILTED HORSE BLANKETS** the Cheapest, Warmest and Strongest in the World.....

THE SEED TRADE.

AMERICAN SEED TRADE ASSOCIATION.

JEROME B. RICE, Pres.; E. B. CLARK, 1st Vice-Pres.; S. F. WILLARD, Wethersfield, Conn., Sec'y and Treas.

THE executive committee of the American Seed Trade Association will meet in New York, January 20.

THE importance of northern Michigan as a potato growing section is evidenced by the handling in Traverse City the past season of 820,000 bushels worth $287,000.

SECRETARY WILSON of the Department of Agriculture is said to be as strongly opposed to the government free distribution of seeds as was his predecessor.

DUNKIRK, N. Y.—The big seed store of L. J. Baxter was destroyed by fire on the morning of December 31.

CHICAGO.—Mr. Chas. P. Braslan is making a flying trip to the Pacific coast. Mr. S. F. Leonard has been laid up with a severe cold for part of the week.

NEW YORK.—Wm. Elliott & Sons are getting ready for a big spring trade. A handsome set of new flower seed drawers is being put up. Weeber & Don report a very heavy sale of mushroom spawn this season. J. L. Schiller is renovating his establishment throughout.

Trouble with Boilers.

Replying to the inquiry of "G. K.", the prime cause of his troubles is that the boiler is not half powerful enough for the work put upon it. For the effective heating of the range of three even span greenhouses 20x90, one 20x60 and one 10x60, of ordinary commercial construction to a temperature of about 60°, not less than 13 square feet of grate surface is required, whereas the boiler in question contains only 5 square feet. The diameter and height of the chimney are ample for the present boiler, but would be deficient in height for boiler or boilers of the requisite capacity. The fuel in use, being of a rich gaseous nature, requires thin firing, and in order that the resulting gases may become ignited previous to entering the flues, ample combustion space is necessary, and it is evident, from the action of the fire as described by "G. K.", that his boiler is deficient in this respect. This trouble may be partially remedied by the admission of air into the firebox by means of a series of holes drilled in the fire door, or, better still by the introduction of air by means of a pipe into the combustion chamber immediately at the back of the bridge wall. HENRY W. GIBBONS.

CHICAGO.

WHEN writing to any of the advertisers on this page please mention the AMERICAN FLORIST.

Montreal.

The holiday trade, this year has been ahead of all previous records, good prices, were obtained and everything went. The only disagreeable feature was the weather, the mercury hovered under zero all day, the natural consequence of which was lots of frozen plants even with the best intentions.

The better prices obtained for good plants this year was marked. One retailer received $10 each for 12 specimen azaleas, and could have disposed of more of the same class; any kind of an azalea in bloom sold at good paying prices.

Cut flowers were not up to the quality of last year, owing to the unfavorable weather, but the home grown stock was much better than the imported by several degrees. This fact may be owing to an erroneous idea in the minds of some of the American wholesale men, that anything is good enough for the "Canuck." We know of one Boston firm who had reason to change their opinion in this respect when they received a box of three hundred Meteors back from Montreal on Christmas morning accompanied by the intimation that first-class stock was ordered and nothing else will suit our trade. BEAVER.

Propagating Ficus.

Mrs. K., of West Marietta, Ohio, asks "How to start the top cuttings of the ficus plants." The Ficus elastica, commonly called the rubber plant, is what the query refers to, no doubt. To proceed, cut two or three of the leaves from the stem intended for the operation, leaving six or eight leaves thereon, counting from the top of the shoot, then with a sharp knife give an upward cut of at least an inch, somewhat on a slant, taking care not to cut much beyond the center or the pith part of the shoot. A little wad of moss, a piece of charcoal, a chip, or in fact anything, may be put into the incision. The object of this is to keep the two cuts from growing together again. Then carefully and securely bind some damp, though not wet, sphagnum moss, or the rough parts of peat moss, around the cut, and the day after the operation moisten the moss thoroughly never allowing it to become dry thereafter until roots are seen penetrating through the material, when it may be severed from—for want of a better term—the parent stock. It should then be potted into a well drained 4, 5 or 6-inch pot according to the size of the now rooted cutting; the latter size is the most generally used. It should have a place in a house of not less than 60° at night in a moist atmosphere, shaded from the direct rays of the sun in the daytime and protected from the heating medium at night until it becomes accustomed to its new environment, when more light and air may be given. Be careful never to allow the young plant at any stage of its existence to suffer for the want of water. As to soil, this ficus being a strong feeder, it should be rich and at the same time porous, so that it may be given lots of water without danger of souring. L.

OIL CITY, PA.—Mr. W. M. Deyoe has added two carnation houses to his plant. A handsome dwelling for his own use with a conservatory immediately adjoining it are receiving the last finishing touches. Mr. Deyoe does a general retail business and finds things very encouraging. HOMO.

A Word to the Employer.

As a matter of simple business policy, aside from any other reason, it pays in the end to deal squarely with your employes. One who takes advantage of the ignorance or necessities of his workmen is sure to suffer when the workman has a chance to "get even," and sooner or later he generally is able to more than even things up.

The man who keeps another in his employ with whom he finds it constantly necessary to use harsh manners and methods in order to secure a proper amount of careful work is a "chump," and he who uses such methods unnecessarily is equally wrong. There are plenty of good workmen in the land, and fair pay and decent treatment will secure and retain them. A certain number of dollars invested in reasonably high-priced help will nine times out of ten bring better returns than the same amount expended for cheap help. The man who works for unreasonably low wages will, either though lack of inclination or lack of ability, fail to give returns in quantity or quality of work done—generally in both. If he is a competent man, forced by necessity to work for less than his worth, at the first opportunity he will leave without hesitation.

Few employers realize the actual expense in breaking in new men. There is loss of the workman's time and of the employer's time, often serious damage to stock and frequent loss of customers through mistakes. Nearly all men quickly respond to kindly words and acts from those in authority over them, and the few who do not should not be kept on the place. Discipline is of course to be maintained and errors to be corrected. A good man, however, is not to be too harshly reprimanded for an occasional mistake.

Every employer knows, or should know, the value of the work being done by each one of his men. When the time comes that he would prefer granting an increase of pay to any man, rather than lose his services, it is sound business policy to voluntarily grant the increase. A dollar's increase of salary in this way is worth five, as an investment, given after a demand for it. Finally after years of faithful service on the part of an efficient man who has mastered all the details of your business and gained the good will of your customers, secure a continuance of his services, and an increase in his efforts for the good of the business by giving him an interest in the profits.

Almost every town can show an example of a business house, once well in the lead, gradually falling back to second place, then to third, and finally to no place at all. The history of such cases is nearly always the same. An able and energetic man, by hard work and careful attention, builds up a very profitable business. His income becomes large and he gets on in years. He begins to give more attention to spending the income, and leaves more and more of the details to the able and energetic young man whom he has "brought up to the business." He forgets that the young man is ambitious, and that as he sees business flourishing under his management he becomes possessed with a desire to place himself where his abilities may bring profit to himself rather than go to aid in the swelling of some one else's bank account. Some fine day he opens up on his own account on the other side of the street. The older man wakes up to find he has lost his grip on the business and is out of touch with his customers. The trade goes to the new establishment, and all the profits are lost through being unwilling to give a part to the man who had earned it.

B. JONES.

Battle of the Flowers at Pasadena, Cal.

The battle of flowers and the floral procession leading up to it, known as the tournament of roses, took place Jan. 1.

The city was crowded with people, there being thousands of visitors. Every available spot along the route of the procession was thronged with men, women, and children. There were nearly three miles of six and four-in-hand coaches and drags, victorias, landaus, surreys, floats, carts, sulkies, bicycles, and many other conveyances, and hundreds of horsemen, artistically covered with flowers.

The battle of flowers was a magnificent spectacle. It was a battle, a storm, a cyclone all in one, in which the youth and beauty of the community bore the part of warriors.

HAMMONDTON, N. J.—Frank L. Bassett, well known locally as a botonist and a member of the Philadelphia Botanical Club, died on December 31.

GOOD WEATHER THE PAST WEEK HAS MADE FLOWERS MORE PLENTIFUL. — DROP IN RETAIL PRICES.—FLOWERS FOR CHARITY BALL.

The past week has been one of old fashioned wintry weather combined with lots of bright sunshine, which has made flowers of all kinds more plentiful, with the exception of a lull in trade for two days after Christmas, business has been very brisk and the supply of flowers has been about equal to the demand, with a possible exception of carnations.

New Year's trade consisted chiefly of cut flowers, very few plants, flowering and otherwise being called for, the majority report trade a trifle better than last year, but anyway it does not take any great exertion to handle it; as at Christmas, an extra call was noted for red flowers, which were very scarce. Gontier roses that were in good supply had an unprecedented demand; it is much cheaper than Meteor and gives general satisfaction, developing beautifully in the home. There is no question but what this old variety when grown on a suitable soil will be perpetuated many years hence.

Retail prices dropped directly after Christmas to our city's normal winter rate of Beauty $6 to $12 per dozen, other roses $1 to $2; carnations 50 cents and violets $2 per 100.

Bulbous stuff with the exception of valley has got to such a low ebb in price that the best that can be done with it is to use it up in assorted flowers.

The charity ball occurs this week which always calls for many flowers, especially violets, and with the other orders now on the florists' books for other seasonable doings it seems that there are prosperous times for the next few weeks at least.

ALPHA.

AND they still call it Chrysanthemum Niveum in England, but the sting is removed when it is described as an excellent variety.

A. FARLEYENSE,

Extra strong plants from 3-inch pots in excellent condition at $3 per dozen; $20 per hundred.

CHAS. T. DARLING, Stony Brook, L. I., N. Y.

Providence, R. I.

Business for the past week has been very fair, New Year's greetings accompanied by flowers have made the little spurt naturally looked for at this season of the year. The municipal inaugural exercises also kept those having a "finger in ths pie" very busy for a day or two. Space will not admit of any elaborate description of floral handiwork. Among these the most noticeable was a large horseshoe of mixed flowers and roses and a yacht under full sail, made of white carnations and Roman hyacinths, resting on a base of tennissimus to represent water. These were made by Timothy O'Connor. Wm. Appleton, Jr., displayed his usual good taste in a huge horseshoe standing about 6 feet high made of roses, carnations and other choice flowers. James B. Canning also came in for his share of artistic arrangement with a horseshoe made of pink and white carnations resting on a base of roses. Among many other pretty designs coming from Ed. J. Johnston's was a four leaf clover very tastily gotten up. This with two large baskets of violets with other flowers from Wm. H. Wing adorned the desk of his honor Wm. C. Baker. M. Sweeney made quite a hit in a large horseshoe on a base with a vacant chair made of white and pink cape flowers with the emblematic dove suspended over the chair. There were scores of baskets, bouquets, etc., from other florists, that were beautiful.

Richard Harrison, of the Rhode Island Greenhouses contemplates the building of two more houses for Beauties and Victorias; they will be 180 feet long and 28 feet wide.

James McVeigh has opened a flower store on Westminster street, corner of Snow.

Irvin Z. Dodge has severed his connection with D. D. Waterman.

Robert Hogg is much improved in health since his western trip.

LITTLE RHODY.

W. P. SIMMONS & CO.

Make the following statement to the readers of the American Florist.

As originators and introducers of
"Silver Spray,"
"Tidal Wave,"
"Daybreak,"
and "Rose Queen,"

each of which has, we believe, proven even better than we claimed for them. We NOW say for 1898 that

"Mrs. S. A. Northway"

possesses all the good points that go to make up a first-class and profitable cut flower sort, and that we introduce it with even more confidence than we did the others.

It is an extra strong grower.
It is free from rust or disease.
It is a profuse bloomer.
It has exeedingly strong stiff stems.
It is of exquisite form full and double.
The flower is high built, petals serrated.
The calyx does not burst.
It is delightfully fragrant (a quality lacking in many new ones.)

OUR PRICE LIST now ready, contains prices on many other plants. SEND FOR IT.

W. P. SIMMONS & CO., Geneva, Ohio.

FIREFLY A RUST PROOF .....CARNATION.

Will be out early in the year. Write for advertising rates.....

American Florist Company, 324 Dearborn Street, Chicago.

Terse Remarks by the Judge.

One who refuses to perform the conditions imposed upon him by the terms of a contract of employment cannot recover for a breach thereof by the other party.

To one engaging in service with knowledge of an unsafe place or appliance the master is under no obligation to alter or amend the condition of the place or appliance.

A person cannot be made to pay damages for his acts unless they were done in such manner and at a time which show that he was acting in disregard of the rights of others.

Where money is voluntarily paid, with full knowledge of all the facts, it cannot be recovered, although it may have been paid upon a void demand, or upon a claim which had no foundation in fact.

An agreement with a creditor of a partnership to release one member of a firm from his liability on a partnership debt, and accept the other partner as solely liable thereon, must be founded on a valuable consideration to be binding.

What is a suspension of payment has been a subject of much controversy in the courts; but in general it may be said that a person is insolvent, and suspends payment, when he is unable and fails to pay his debts in the due and ordinary course of his business.

A tenant who gives his notes for rent, does not, by paying all but the last one of them, waive all claims for damages because of fraudulent misrepresentations made by the landlord at the time of the execution of the lease, but may set them up as a counterclaim in a suit brought to collect the last note.

STORAGE CANNOT BE COLLECTED AFTER BURNING OF GOODS.—Where a contract for storage provides that the goods shall be stored for a certain length of time for a certain sum, and they are burned before the term of storage has expired, the supreme court of California holds (Cunningham v. Kenney, 38 p. 645) that no recovery for storage can be had, even though the loss has been occasioned without the warehouseman's negligence. It would, however, be otherwise if the contract provided for payment in such case as well as for exemption from liability for the loss.

THE MORRIS FLORAL CO.

MORRIS, ILL.

Mention the American Florist when writing to advertisers on this page.

Los Angeles, Cal.

RAIN WANTED, BUT FROST ARRIVES.—DAMAGE TO FRUIT TREES.—PERSONAL POINTERS.

From the "Land of Sunshine" we must send a tearful tale of woe and disappointment. We have been looking and hoping for a month or more for rain; frost came instead, and what a frost. On the mornings of December 19 and 20, from 2 to 12° of frost were reported from different localities. About three inches of rain in our stocking would have been a more acceptable Christmas present. General reports from all sections show that the damage resulting from the protracted cold weather and heavy frosts is less serious than was expected, and is confined mainly to low exposed grounds, where flowers, early vegetables, young citrus trees and some fruit are frosted. It is too early yet to ascertain with any degree of accuracy what percentage of the orange crop is injured, good guessers say from 10 to 25%. On the low peat lands in Orange county all the celery that was not banked up is seriously injured. As in the orange crop it will take time to tell the percentage of loss.

I interviewed the leading florists in the city, and a number of the growers. All were expecting a largely increased holiday trade, and orders were coming in freely; it was noted the orders were larger and the people more liberal than usual, but the frost spoiled all this, and flowers of all kinds were scarce. Where thousands were expected tens were cut. Growers with from three to eight acres of carnations, whose daily cut should run from 800 to 1200 blooms per acre, could not get over 10% of that number. One party who was averaging one hundred dozen bunches of violets daily, picked seven dozen in the two days before Christmas. Thus I might go on through the list and show how all lines were shortened up in the same way, and yet, strange as it may seem, some districts escaped entirely. There was a limited supply of open air roses, callas and poinsettias that were uninjured and helped the dealers amazingly, but every florist was obliged to refuse orders. One store refused orders for carnations for shipping aggregating over $200. Smilax was uninjured and thousands of strings were used in decorating. Many wagon loads of a native holly (so-called) with bright red berries were readily disposed of.

All the stores were well supplied with palms and ferns and many customers who could not get cut flowers purchased plants.

B. F. Collins has recovered from his bicycle mishap and was able to hustle around for flowers for a week before Christmas.

Alfred Roedder, the well known florist of Shorb Station, had a fine supply of ericas and lilies of the valley in bloom for the holiday trade.

Capt. F. Edward Gray with characteristic energy was well supplied with eastern holly and mistletoe which found ready sale.

Jacob Dietrich, 12th and Wall streets, city, makes a specialty of palms, ferns and asparagus, and finds that branch of the business profitable. D. R. W.

Portland, Me.

The average of reports indicates that Christmas trade was the best in several years for the dealers. The growers have suffered from the unfavorable weather. Carnations, roses and violets all sold out clean at good prices. Niles Nelson sent the best Marie Louise Violets to the Portland market that have been seen here for a long time. His azaleas and Boston ferns brought good prices also. Holly enjoyed a big sale with all the dealers.

E. J. Harmon & Co., J. W. Minott & Son and Dennett, the florist, all report an increased and satisfactory trade in both plants and cut flowers. Albert Dirwanger found the demand about the same as in past years, S. C. Dennett & Co., a larger flower trade but diminished plant business.

Duty on Spoiled Bulbs.

Referring to communication from J. L. S. in a recent number of the AMERICAN FLORIST, regarding duty paid on bulbs received in bad order, there is apparently no clause in the Dingley bill covering goods arriving in a rotten or broken condition. This is unfair to the importer as the goods on which we pay duty are entered for consumption and if in bad order cannot be consumed. Yet we are compelled to pay the duty on these goods before we can examine them and cannot get the same refunded to us if, after having paid the duty to procure the goods, we find that the shipment or part of the shipment is rotten and unfit for use.

This matter should be placed before the Secretary of the Treasury, asking him to either allow the inspection of perishable goods before the duties are paid, or to provide for the refunding of duties which have been paid on goods which are afterwards found to be rotten; such goods being shown to an inspector from the Custom House in proof of the claim. We trust the AMERICAN FLORIST will take this matter up in its valuable columns and that the discussion may result in some arrangement which shall be fair to our importers. W.

This question of the injustice of the tariff law as it now applies to imports of perishable goods is one of much importance to American dealers in such stock, for the competitition and methods of recent years have cut profits on these goods to such a degree that but a very narrow margin is possible, even under the best conditions, and it seems reasonable that the presentation of the facts to the proper authorities should bring about some relief, such as our correspondent suggests. It is pleasant to contemplate, however, that the time seems to be approaching when we shall be independent of the foreign supply and American-grown lily of the valley, hyacinths, Harrisii lilies, tulips and rhododendrons, shall take the place of those we now import. We believe that the right soil, climate and and other conditions necessary for the production of all these can be found somewhere in this country and that our wide-awake growers are now started on the right track to demonstrate it conclusively.

The valuable contribntions in our columns in recent issues are the beginning of an agitation which, if well followed up, will be the means of turning into the pockets of American growers many thousands of dollars annually which now go out of the country for stock, much of which is spoiled, diseased or otherwise unfit for consumption. X.

Nashville, Tenn.

The holiday trade in this city was noticeable for several characteristics different from former years. There was a decided falling off in the bulk of trade of fully 25% below last year and former years, and the prices realized were exceedingly moderate. Nashville buyers have as a general thing never been able to fully realize why prices should jump one hundred per cent and more, just at the time when they were wanted and this has caused a general slacking up in Christmas trade.

There was very little shipped stuff brought to this market, the leading florists having an abundant supply from their own greenhouses and were therefore able to control prices. The quality of cut flowers was not equal to former years and hardly up to standard; the gloomy, cloudy weather of the preceding six weeks very greatly affected all roses and other stock.

Roses averaged $1.50 per dozen for Brides, Maids, La France, Meteor, and Perle. Choice extra select in Maids and Brides brought $2 in a few instances. Carnations retailed at 75 cents, Romans at 50 cents per dozen, violets at 75 cents per hundred American Beauties averaged $6 per dozen, a few short stems going at $4.

CURREY & CO.

JOHN N. MAY'S NEW CHRYSANTHEMUMS
FOR 1898

ALICE F. CAREY (Carey). A beautiful light shade of pink, reflex, having excellent keeping qualities with extra good foliage and stem. A grand commercial flower. Season, middle of November. Average, 3½ feet; terminal buds. Certificate C. S. A. 40 cents each; $3.50 per doz.; $25.00 per 100.

CHEMPWEC. Clear bright yellow, sport from Silver Cloud. Large flower with good stiff stem and foliage well up to the flower. An extra good shipping commercial variety of good vigorous constitution. In season 1st to 15th of November. 3½ to 4 feet; crown or terminal buds. 40 cents each; $3.50 per doz.; $25.00 per 100.

DOLORES. 84 points. A massive incurved deep yellow with broad petals of the largest size, with exceedingly stiff stem and foliage close up to the flower. One of the best and strongest growers we ever raised. 4½ feet. This is a late variety not fit to cut before the 20th to 25th of November; crown or terminal buds. 40 cents each; $3.50 per doz.; $25.00 per 100.

MINNEWASKA. 91 points. Bold heavy flower almost globular in form; straight and strap petals of a distinct shade of deep pink. As a late exhibition variety this will prove very valuable; also a good pot variety. 3 feet. 40 cents each; $3.50 per doz.; $25.00 per 100.

MISS GLADYS VANDERBILT. Certificated, 92 points. Pearl white with lemon shaded center; an exceedingly fine thing and a decided novelty both in form and general build, and an extra good commercial or exhibition flower. In season 1st to 15th of November; crown or terminal buds; 3½ to 4 feet. 50 cents each; $3.50 per doz.; $25.00 per 100.

ROBERT G. CAREY (Carey). A very beautiful globular incurved white of good substance and good keeping qualities. An extra fine exhibition or commercial variety. Will be a standard variety for all purposes. 4½ feet. Best on terminal buds. In season 15th to 20th November. Certificate C. S. A. Very valuable as a late white of good form. 40 cents each; $3.50 per doz.; $25.00 per 100.

SPOTSWOOD (Carey). A beautiful high built incurved light yellow, somewhat in the style of Bonnaffon. This variety will certainly make a reputation for itself both as an exhibition and commercial flower. An extra good keeper; very valuable to succeed Bonnaffon as a late yellow. 4 feet; crown or terminal buds. Certificate C. S. A. 40 cents each; $3.50 per doz.; $25.00 per 100.

Good strong plants ready March 1st, 1898. Also all the new varieties of other raisers.

The Winter Landscape.

To one situated, as I am, in the midst of a new garden where the plantations are still young, and the views therefore broad and comparatively unobstructed, the value of shrubs and herbs, in their winter aspect, is exemplified in whichever direction the eye is turned, and it seems to me that everyone interested in the planting of grounds, either small or great, cannot pay too great attention to effects that tend to lessen the dreariness of our long northern winter.

Although the deciduous plants have for the greater part been denuded, yet there are a few that still retain more or less of their leaves and either green or bronze or brown, they still give a semblance of life to borders that would otherwise be bare and dreary. Of green things that persist, we have in this locality, in addition to the conifers, not many that are of sufficient height to show bravely above the snow; but there are a few, and because they are few we prize them highly. Among those of lower growth few can equal the mahonias. Their dense and beautifully formed leaves are equal to the European hollies, and the rich bronzy shadings are unequaled in any evergreen that endures our climate. Berberis repens, on the rocky mounds, is almost as good, but much dwarfer. The privets, too, hold their foliage long into the winter, and some species, like Ibota, retain their deep green, in sheltered places, until the spring is fairly upon us. The kalmias and evergreen rhododendrons are not to be forgotten, though they are not common enough in this limestone region to be a prominent feature; still, when planted in well prepared soil in sheltered nooks, they are noble objects and extremely effective. Some of the honeysuckles retain their foliage well, and on north slopes and walls the English ivy is prominent. Yucca filamentosa and its varieties are good winter plants, standing erect and showing their green spears through any ordinary snow.

The boxes, with us, get so badly burned as to render them painful to look at as spring approaches, but occasionally when placed on the north side of other plants they winter fairly well.

We have a goodly number of fruiting plants that endure well into the winter. Many of the barberries are good and some of them, like Thunbergii, are loaded with crimson berries throughout the winter. There are the cornuses, too, with red, white and blue fruits, and which on that account might well make the genus a candidate for the position of national flower.

A well fruited specimen of C. florida is a striking object and worth an effort to obtain. C. stolonifera, C. paniculata, C. asperifolia and others give us white fruit, and circinata, sericea, stricta, and alternifolia present various shades and tints of blue. The best of the wax berries are the well known Symphoricarpus vulgaris and S. racemosus; the former with abundant dark red berries that last through the winter, and the latter with large white fruit which disappears much earlier. Ilexes, both verticillata and lævigata are now in fine condition and will continue so for a long time. They are both excellent plants for waterside planting. Euonymuses of sorts are still in fair condition and present quite a range of warm colors with their peculiar winged fruit. The "wax-wort," Celastrus scandens is still draping the wilder thickets with its brilliant sprays.

Taken all together probably, the great rose family offers the largest number of good winter fruiting plants. Of the roses proper, perhaps our native Carolina rose is as fine as any. It is so abundant in its fruitage, so brilliant in its coloring and so enduring. The sweet briar is fine, too, with its orange red hips and the dog rose and many others are worth growing. Rosa rugosa is grand with its clusters of mammoth apples, but its glory disappears earlier than that of species whose fruit is not so meaty. The genus pyrus contains some gems also, arbutifolia being a profuse bearer, the berries do not last well, however, but the "rowan tree" or "mountain ash" is bright with us until the birds have gathered the crop. Many of the thorns are valuable in this way, being profuse producers of brilliant fruit, the most enduring of which is, with us, the hawthorn. Our common sumac is good; its dark velvety red clusters persisting for many months.

There are, of course, many others of value, but I am confining myself to those which are conspicuous here at the present time. I know that down over the bank the high bush cranberry and other viburnums, the black berries of the privet and other shrubs are most interesting and are not to be forgotten by the planter.

For color effects in winter probably the trees and shrubs with colored barks are more valuable than those having showy fruit. As I look out at the borders and mass planting, there are so many warm browns, olives, grays and purples having decided color value that it seems difficult to paint a picture without them all. However, to select the most striking and valuable, let us start with the willows. Here we find pale green, olive, browns, yellow and orange, making a fine warm belt of color in the low grounds near the lake. More decided are the red and purple stems of the cornuses, that increase in brilliancy, until in March they are aflame.

These and others are the pigments that the artist has at his command for the production of his winter landscape, bearing in mind that at another season his colors will change and that his picture will be viewed from another standpoint. Whether his winter picture be the silvery birches against a dark background of spruces, a luminous mass of willows skirting an ice field, or a belt of dogwoods against a heavy forest, he must remember that the summer will surely come and that his combination must still be acceptable.

JOHN F. COWELL.

Buffalo Botanic Garden.

Annapolis, Md.

Mr. Seidewitz's plant, comprising twenty-five houses and covering over 40,000 feet of space, is located on a hill top, overlooking the Spa creek, and a more magnificent view than that which greets one's eyes upon reaching it would be hard to imagine. For miles, as far as the eye can reach, you behold nature in its manifold attractive aspects. Here is a rolling field and there a stretch of woodland; here is a hill and there a dale while the silvery creek, extending away in the distance, lends a special charm to the whole panorama. The view is indeed worthy of an artist's brush as well of the best efforts of the most imaginative mind.

My object, however, was of a somewhat more prosaic nature. A stroll through the houses soon convinced me that the inexorable law of cause and effect was in no small degree responsible for that exceptionally fine and vigorous appearance of Mr. Seidewitz's general stock. It is a case of systematizing things, of adopting a method whereby the special requirement of one plant does not interfere with that of another. Thus four houses are given exclusively to carnations, four to roses, two to palms, three to ferns, one to Araucaria excelsa, one to azaleas, one to smilax, etc. I need hardly add that therein lies the whole secret, if a secret it be, of the successful grower.

Cyclamens galore! I noticed between 9,000 and 10,000 grown in flats, while those ready for the market are all that could be desired. Acacias—some specimens measuring from 10 to 12 feet, bushy and full of buds—are also grown with marked success.

THE COTTAGE GARDENS,
QUEENS, N. Y.

Herbaceous Plant Notes.

PROPAGATION BY ROOT CUTTINGS.

Some of our hardy plants propagate very freely from root cuttings made at any time during the winter months; the roots should be cut into pieces an inch or more in length and then either potted off into thumb pots or if room for these cannot be spared, boxes are the next best thing, but I prefer to pot them at once, because in the boxes they usually start rather uneven, some of the weaker and smaller ones are smothered by their stronger neighbors. When you are short on Œnothera Youngii or O. speciosa, this is the quickest way to obtain a stock strong enough to bloom abundantly the first season. You may have a few gaillardias with extra large flowers or of special desirable color, or maybe some of the mammoth English named varieties; these may be rapidly increased in the same manner, much faster in fact than by green cuttings and with equal surety, while seed sowing would not reproduce the same variety nor perhaps the same strain.

Nearly all the hardy geraniums can be grown from the roots without any special trouble. Thermopsis fabacea and T. montana are both decidedly slow growers if raised by seed, but when grown from root cuttings, will make good flowering plants inside of two years generally. If a new or scarce variety of phlox of the decussata or paniculata section is to be propagated fast, there is no doubt that this will prove the quickest way; quite a number of campanulas, those with a creeping root stock, will readily respond to the same treatment; the chelones also are among the plants which have been and are now increased in that manner. Epilobium angustifolium and its variety E. a. album are quick growers, producing great masses of flowers the first year. The same may be said about the polygonums and the saponarias, the latter, however, suckers so freely that we seldom are short of stock, but the splendid deep colored, early and late flowering S. Caucasica fl. pl. is very rare yet, and by cutting up the roots of a clump we are sure to have an ample supply for next fall. Plumbago Larpentæ will make fine flowering plants in a season, and as this beautiful fall bloomer has been in great demand for the last two years, it is well to have a stock of them on hand. Silphiums and statice will respond nicely to the same treatment; Bocconia cordata and the Japanese anemones hardly need mentioning here, nearly everybody is well aware that these are increased in that manner quickly and successfully, but that the dodecatheons will do under like circumstances, may not be known to many. Some of the plants mentioned above are not at all particular in starting, the pieces of roots will form eyes anywhere and come up in a short time, no matter how carelessly they are thrown into the pots or boxes, but it is not so with all of them; if we should treat the gaillardias, for instance, as roughly as I have seen anemones treated, not a single plant could we expect to start up; there is a right way to do everything and if it is worth doing at all, we should do it well, so gaillardias, phloxes, statice, dodecatheon, geraniums and some others should always be planted, top end up, just even or better still a little above the ground; particular care is necessary not to overwater the batch at any time, especially before they have fairly started to grow.

A cool house is preferable to start them in; the temperature of a violet house would just suit the purpose and it is best not to hasten on the growth, give them time and encourage root growth rather than the tops. Early in April, when the little pots are set out in a frame, the tops will grow fast enough and about May 1 most all will be strong enough to be planted out in the open ground. When potting the little roots use a light soil, with plenty of clean sand mixed in with it; heavy soil retains the moisture too long, and there would be danger of ruining the whole batch by keeping the soil too wet. A few weeks will elapse before you can notice the formation of eyes or buds around the top end of the cuttings, and when these are once developed you may be sure that the treatment and temperature was just right for them.

Rochester, N. Y. J. B. KELLER.

The Christmas Trade.

Below we give a few additional reports from distant points, received too late for publication in last issue:—

LOSANGELES, CAL.—About 50% increase over last year, retail prices higher on account of scarcity of flowers; owing to unprecendented cold weather outside flowers were almost worthless; increased call for carnations and roses; more plants were sold than ever before, but scarcity of cut flowers may account for this.

ONECO, FLA.—Trade a trifle larger with retail prices about the same, and quality better; slightly increased demand for plants. Our general business and collections seem much better, and leads us to look for a good spring trade.

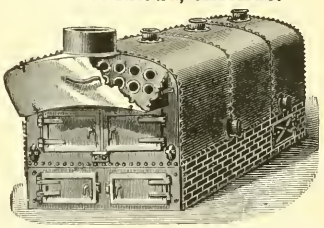
SAVANNAH, GA.—Best Christmas florists ever had; sold everything, retail prices about the same; supply short and quality the best; increased call for decorative plants in general.

SAN DIEGO, CAL.—Total sales were 10% greater; retail prices were about the same; very short supply; bought a good deal and sold all; increased call for violets; the demand for plants was greater than ever before. The most unfavorable weather experienced in the past ten years, causing the supply to be poor and short.

ATLANTA, GA.—Did 40% more business than last year; prices and quality about the same with a short supply; increased call for violets; limited supply of plants.

HALIFAX, PROV. N. S.—About 10% greater sales; retail prices the same; supply equal to demand; increased demand for plants; less church decoration, demand for plants and flowers for this purpose decreased about 30%.

NEW ORLEANS, LA.—Total sales about the same, the supply not quite equal to demand; quality fully as good; there was a large demand for ferns.



MONTREAL, CAN.—Decided increase in total sales; prices about the same; roses and carnations were very short; more blooming plants and palms were sold; more advance orders than usual. Imported roses and carnations were very unsatisfactory.

LITTLE ROCK, ARK.—Total sales 10% less; retail prices for roses and carnations 25% higher; quality not so good; bought more and sold at a good profit.

OTTAWA, CAN.—Greater sales with prices about the same; supply not half equal to demand; quality not so good; flowering plants had the call; delivering plants in 16° below zero weather is—to say the least—interesting.

PATTERSON, N. J.—About the same sales, with no change in prices; supply short; quality not up to the standard owing to the dark weather; large call for flowering plants; decrease in demand for palms.

(NOTARY PUBLIC) 271 Broadway, NEW YORK.

Keep Wide-Awake.

The gradual but positive change that is taking place in garden decorations, behooves those who are interested in the production of material to be wide-awake. This applies probably more particularly to those ertablishments that do a general local trade, rather than to large concerns that are specialists in a few lines. The steady progress that hardy perennial plants have made together with many forms of hardy shurbs, has taken the place of color decoration to a great extent, not that color decorations are in poor form, providing they are properly placed, but because the former are the very best for such purposes. In the garden there is a place for everything that will harmonize with the architecture, the scope of the ground whether it be large or small, together with outlaying surroundings. Whatever is not amenable to the above should be considered out of place, and ought not to be recommended.

With regard to hardy perennial plants and shrubs, there is no doubt in my mind that for certain positions there is nothing equal to them, providing they are properly cared for. To run away with the idea that when they are once planted they will go on for years without care, is absurd and ridiculous, yet this is what some people say and may so believe. My experience is that they require as much attention as other parts of gardening to make them a success.

The best kinds are those that thrive in any given locality, which can be determined by experiment and observation. The extent of our country is too vast, and the climatic difference too great to give a list suitable for all. A list of say 50 shrubs and a list of 50 hardy perennials from two widely separated parts in each state would, in my opinion, be of great assistance to all the readers of the AMERICAN FLORIST, for depend upon it, perennials and shrubs will soon be as necessary to a florist as are cannas and geraniums.

In comparing the cost and maintenance of hardy perennials and shrubs, with that of such plants as require the protection of a greenhouse from November to May, the balance will be decidedly in favor of the former. Furthermore in the disposition of the material, the former can be planted between March 25 and May 1, and again between last of September and first of November, and when plants are not disposed of, from many kinds sufficient flowers may be cut to pay for their care and the rent of the ground each year.

But you cannot make a cent out of perennials and shrubs unless you care for them any more than you can out of anything else. One day last spring I was finishing some planting about 150 miles from Chicago and required about 50 shrubs and as many perennials. The nearest local florist lived about five miles away and I drove over and met him at the entrance of his store, inquiring for what I needed. Why sure, says he, I have got just what you want, fine stock from Rochester and Painesville. Away we went, and to my disgust what did I find, bunches of spiræa, weigelia, hydrangeas, Philadelphus and lilac that were heeled in just as they were received from the nurseries the spring previous. He would sell 'em cheap because the people wouldn't buy round there. What would I give for them? Not a dollar for the lot, I replied. This man had an acre or more of ground with nothing on it, yet he lets valuable stock that he paid actual cash for go to waste.

A man like this will never have a good word for shrubbery, yet the people in his immediate neighborhood would prefer to buy of him rather than send 250 miles if they could get what they want. Now don't imagine that I advocate that florists shall turn their whole attention to the above subjects, because it is not so. I want them not to forget to carry good stocks of the best 6 to 12 cannas; good stocks of the best 12 geraniums and grow them well, not pot them in 4-inch pots end of February, stand them as close together as possible, soak them every day with water, let them root through the pots and into the benches and then on the first hot day when bedding begins, fume and sweat and swear because the stock is no good. Grow them cooler, give them less water, turn them round once a week, giving them a little more room each time, and with two or three trusses on each at bedding time, you may sweat but you won't swear. Add coleus, verbenas, heliotrope, petunias, nasturtiums, transplanted asters and dwarf zinnias, together with a score or more good things for which there is always sale, providing the stock is well grown.

J. T.

POUGHKEEPSIE, N. Y.—The next meeting of the Dutchess County Horticultural Society will be held at the courthouse on January 12, at which time the annual report of the secretary and treasurer will be made, and officers for the ensuing year will be elected. The annual dinner will take place in the evening at the Nelson House.

Speaking about FLORISTS' SUPPLIES, we have been tinkering away at this line of work ourselves for about 20 years. We ought to be able to sell you by this time, don't you think? There are mighty few wholesale men who are not Specialists in this line. Here are a few sample PRICES.

14 Barclay Street, NEW YORK.

VAUGHAN'S SEED STORE,

84 & 86 Randolph Street, CHICAGO.

Some Evanston, Ill., Growers.

About two miles north of Chicago, in the beautiful suburban city of Evanston, Mr. M. Weiland conducts one of the most flourishing floral concerns in Cook county. Mr. Weiland has been in business here for a number of years, and last summer he decided to rebuild. All the old houses were removed, very little of the old material being used, except the pipes. The place—as rebuilt—has about 70,000 feet of glass, divided in about two equal sections, one section east and the other west of the Chicago, Milwaukee & St. Paul Railroad tracks; east of the tracks are seven houses 25x160 feet with a shed about 14 feet wide running parallel with the railroad and across the end of the houses; coal is unloaded from the cars directly into the shed. The houses are all glazed with 16x24 glass, thus giving about all the light that it is possible to obtain in a greenhouse structure. These seven houses are devoted to roses, all of which were in first-class condition. Beauties were very good, although a little off crop. A house of Kaiserins were extra good, and Mr. Weiland considers this his best paying rose; it pays well in winter and extra well during summer and fall. Testout is also a favorite at this place, and I never saw it done better. West of the tracks are five houses 25x200 feet, four in carnations and one in violets, besides three smaller houses devoted to palms, ferns and miscellaneous stock. The carnations were the best we had seen in many a day. The varieties included Goldfinch, Meteor, Lizzie McGowan, Scott, Portia, Daybreak, Tidal Wave, and also two benches of a variety not in commerce, it is a sport from Tidal Wave, raised on this place, and called Evanston. The habit of growth is about the same as in Tidal Wave, though as seen a little stronger grower. The flower is entirely distinct in color in summer, about like Portia, now it is a very light and pleasing shade of scarlet. As grown here and by Mr. Weiland's son-in-law, Mr. John Didier, situated about two miles from here, it certainly is a money maker. Mr. Weiland has not decided whether he will put the plants on the market. All the varieties grown here were strong and healthy except Daybreak, which was a little rusty, and Lizzie McGowan, a little weak.

About three blocks from Mr. Weiland is the place of our old friend, Mr. J. S. Forster, which he conducted for several years before he accepted a position in Mr. J. C. Vaughan's seed store. While he was in the seed store his greenhouses were rented, and the place shows plainly a lack of interest on the part of his tenant. Mr. Forster took hold of the place again in October and is just getting it in shape. He is growing carnations, which are good considering the late planting; also a miscellaneous stock for retail trade.

John Muno's place was next visited, and here carnations and roses only are grown. Many of the roses were two-year-old stock. These had produced the best results so far and were likely to continue to do so. They were planted in a light sandy loam, very little attention having been paid to selection of soil, yet the stock was strong and healthy.

The establishment of John Didier, 4138 Ridge avenue, was next visited. This consists of five houses 25x200 feet, four in carnations and one in violets. The houses were built a year ago last summer, and were, when the writer visited them, in first-class order. The walks and everything about the place were neat and clean. The plants had also received their share of attention, each one being carefully disbudded. The stock was fine, healthy and vigorous here, and Mr. Weiland's sport was found in better shape than at its home. Strong, healthy plants that showed every indication of having produced a large crop of flowers for some time past, and seemed likely to continue in this way for many weeks to come. Mr. Didier has a bench of Meteor carnations that are very fine; also a house of Scotts that could not be in better shape. Some of the best Scotts we have seen this season were being cut in this house. The Daybreaks and Meteors were also very fine. This is a model place, glazed with 16x24 glass. The gutters are about six feet high with no partitions between the houses; the walks, though a little too narrow, answer very well for carnation growing. There appears before one on entering an immense garden of carnations, with only the few posts upon which the house rests to obstruct the view.

Two blocks south, at 3993 Ridge avenue, Mr. Chas. Swanson holds forth. Mr. Swanson rented the greenhouses last fall; they are old and dark, yet the carnations were in the best of health and condition. Mr. Swanson is well satisfied with his venture thus far. J. T. A.

CLEVELAND, O.—The business formerly run by J. Smith, Sr., will hereafter be known as Smith & Son.

Grand Rapids, Mich.

Christmas trade was good, and all are unanimous that it was a good time. There was a noticeable increase in the demand for palms and flowering plants for presents. Holly sales are on the increase and Christmas green is a thing of the past, people did not buy it as heretofore and every dealer got stuck on it. First-class violets sold readily at 35 cents per dozen, but poorer stock is still on hand. The demand was for roses and carnations.

Crabb & Hunter's Christmas specialty was violets, they were the finest ever offered here. Henry Smith reached the top notch on roses and his selects fetched fancy prices. The Grand Rapids Floral Co. made a financial hit with poinsettias. Not a bad idea to be the only one stocked up in one particular line for a novelty, it usually takes. G. F. CRABB.

Kraft's Plant Tonic

For PLANTS, PALMS and FLOWERS

...A Wonderful Preparation for the Promotion of Plant Life, Destruction of Insects and Scale...

This is one of the greatest preparations for the use of Florists and Plant Growers ever compounded. It gives to the foliage of plants treated the bright, fresh color of healthy, growing vegetation. It destroys all insect life infecting the plant and eradicates scale.

Besides improving the color of the plant, it effects a general betterment of its condition, aiding nature in disseminating and retaining the sap and life of the plant. The Tonic makes the foliage of the plant soft and pliable, and a beautiful bright green.

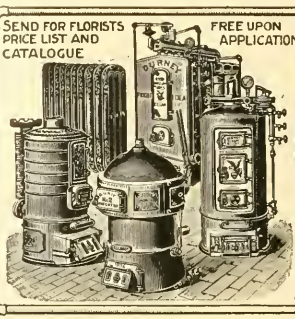
More About Grates and Fuel.



Noticing a communication from "Subscriber" in the issue of January 1 relative to the quality of coal which is most advisable for use and as to the advisability of putting in a "shaking grate," I feel tempted to say a few words in addition to your reply. Your advice to use pea coal is in accordance with my views; but while I do not feel warranted in saying do not put in a shaking grate, I would recommend Subscriber to hold on awhile, first becoming convinced by his own practical experience that such an expense is advisable. In burning pea coal very little shaking is necessary, in fact, you cannot use it economically unless you refrain from shaking often. Firemen who first learn to burn hard coal of the larger sizes after being accustomed to wood or soft coal invariably make the mistake of "poking" too often. The same is true of those who change from large size hard coal to the pea size; once in 24 hours for mild weather and twice for cold weather is enough. The easiest way to light a fire is to use some coke, which lights easily with wood. When the fuel is nicely burning, be careful to have the grate completely covered, for a corner or two uncovered will allow a draught to pass through and deaden the fire. For a successful pea coal fire it is necessary that the grate be completely covered and the mass should be even or smooth. It requires some practice to throw on the coal in order to spread it evenly. It burns like oil, afterward forming a crust, completely covering the grate surface and requires more fuel when the patches of live coal amount to about two-thirds of the surface. Do not break this crust, but spread a layer of coal about half an inch thick over the whole. If a hot fire is needed repeat often, thicker if it is milder and you wish the fire to last longer; but do not break this crust or use the poker until it is piled up 8 or 10 inches, and never put on over two inches of coal at once. You will get about as much heat from two inches as from three inches.

It is best to regulate matters so that your fire place may be cleaned at 2 or 3 p. m., so that you are not bothered at night to do more than shovel in coal. When you clean out run your poker under the fire, pulling it backward and forward. The ashes fall through like flour, and if any heavy clinker breaks off have a rake at hand to pull it out of front door. When you have all the fine dust worked through, and the large clinkers out on one side, that is, half of the grate surface, pat the fire down smoothly, spread some of the live coals from other side on top, put on a layer of fresh coal, apply draught and delay cleaning other half until next time of firing. This is the way we burn 150 tons annually, and we do not think the shaking grate would be a decided improvement. We burn the same coal in one of Hitchings' reservoir boilers, which has a shaking grate; it works well, but I have some misgivings about the large grate of that character doing so well where the thickness of fire is comparatively small. W.

Frame-Sash Lifter.

ED AM. FLORIST:—I have in mind to build some frames on the ridge and furrow plan with the path excavated about 26 inches deep in the middle of the frame. Can some one suggest a cheap but practical lifter to raise the sash continuously, or rather every other sash on each side of the roof? Such a lifter as can be made at home without the expense of buying the patented ones? SUBSCRIBER.

With frames so low as "Subscriber" describes the lifting machinery would have to be on the outside. This can be done by placing a row of posts along the side of the frames. The posts should be six or eight inches higher than you wish to raise the sash. Fasten a small scantling along the top of the posts; get a galvanized iron clothes-line, fasten three or four small pulleys to the scantling over which run the cable; procure as many small pulleys as you have sash to lift and fasten one to the scantling directly over each sash to be lifted. Commence at the opposite end of the cable from where you wish it to be worked. Take a piece of window cord and fasten to the sash by a staple or any suitable contrivance, run it over the pulley and fasten to the cable about ten or twelve inches in advance of the pulley, then fasten the sash that you have hitched to down and draw the cable tight from the other end; fasten a piece of window cord to each sash, run through the pulley and fasten about ten inches in advance. The best way to make the cord fast to the cable is to take an awl and split the cable, run the cord through it and fasten; take small copper wire and wind around the cable on each side of the cord.

Galvanized cable costs about 35 or 40 cents per 100 feet; the pulleys about 35 cents per dozen. Either a block and tackle, a lever or windlass may be used to give the required power. J. T. A.

KANSAS CITY, MO.—Christmas trade about the same, with little change in prices; supply equal to demand and stock a little better.

The Right Cypress for Greenhouse Material.

Have you heard of Cypress Greenhouse Material that has not been satisfactory? If you have it does not follow that Cypress is not the best lumber to use. There is White Cypress, Yellow Cypress and Red Cypress; there is Cypress that grows on the high lands and Cypress that grows in the swamps.

All of these different kinds are not suitable for greenhouse purposes. Do you know which kind is best and do you know that kind when you see it? If not you would better buy from those that do know and will deliver exactly what they sell. We introduced Cypress for greenhouse construction and pushed it to the front. We know all about it. For fifteen years we have made a specialty of furnishing it, and during this time we have built up a reputation that we can not afford to jeopardize. We send out the best only.

would recommend Style "C" of the

"Spence" Hot Water Heater.

This style is especially adapted to the use of wood and the poorer qualities of hard and soft coal. If you would rather use hard coal, style "B" would suit you better. . . . . .

THE BUSINESS SITUATION

At the close of 1897 reports were requested from our correspondents in all parts of the country, covering the business of 1897 in comparison with the previous year and opinions asked as to the outlook for the coming year. Instructions were given that reports should be delayed until books were balanced and actual, instead of estimated results could be given. The reports cover both the wholesale and retail branches of the florist, seed and nursery trades, and from their large number and the high standing of the firms reporting, we believe the results are well worth careful consideration.

In general, a decided increase in the volume of business is shown and an exceedingly hopeful feeling as to future prospects Shorter credits, larger percentage of cash transactions, decrease in losses by failures and a decided tendency toward more careful and conservative methods, together with the almost universal better feeling render the outlook for the coming year an exceedingly bright one.

Among the florists, the wholesale lines show the greatest increase, and the plant trade is, as was to be expected, rather better than the cut flower trade.

The nursery trade in the Pacific states has been exceedingly active and satisfactory. In the middle and southwest, nursery stocks are short and higher prices, therefore, anticipated. Nurserymen from Illinois east and south report no decided shortages but a general feeling of confidence that prices will be good and demand better.

The seedsmen in the retail and catalogue lines, while not reporting a decided increase last year, are looking for an increase this year, although it is too early to judge at all accurately. Seed growing is so affected by climatic and personal factors that it is a waste of time to attempt to draw conclusions from growers' reports. The wholesale seed trade shows only a slight advance. Shortages in certain lines and good retail prospects cause anticipations of better things to come, however.

The following are summaries of all the lines in the different states:

STATE.	COMPARISON WITH 1896.	PROSPECTS.
Alabama	Heavy increase	Excellent.
Arkansas	Slight increase	Good.
California	Decided increase in nursery lines; others moderate	Excellent.
Colorado	Slight increase	Much better.
Connecticut	Slight increase	Fair.
Delaware	Slight increase	Good.
District of Columbia	Marked increase	Very good.
Florida	Slight increase	Good.
Georgia	Marked increase	Excellent.
Illinois	Moderate increase	Good.
Indiana	Moderate increase	Good.
Iowa	Decided increase	Good.
Kansas	About the same	Not encouraging.
Kentucky	About the same	Fair.
Louisiana	About the same	Fair.
Maine	Moderate increase	Good.
Maryland	Decided increase	Much better.
Massachusetts	Moderate increase	Much better.
Michigan	Marked increase	Excellent.
Minnesota	Moderate increase	Fair.
Mississippi	Slight decrease	Better.
Missouri	Decided increase	Good.
Montana	Moderate increase	Fair.
Nebraska	Slight increase	Fair.
New Jersey	Moderate increase	Good.
New York City	Conflicting reports	Encouraging.
New York (outside of the city)	Moderate increase	Good.
North Carolina	Decided increase	Good.
North Dakota	Decided increase	Excellent.
Ohio	Decided increase	Excellent.
Oklahoma	Decided increase	Good.

STATE.	COMPARISON WITH 1896.	PROSPECTS.
Oregon	Moderate increase	Good.
Pennsylvania	Marked increase	Good.
Rhode Island	Moderate increase	Fair.
South Carolina	Slight increase	Fair.
South Dakota	Slight increase	Good.
Tennessee	About the same	Better.
Texas	Moderate increase	Excellent.
Virginia	Slight increase	Good.
Washington	Marked increase	Excellent,
Wisconsin	Moderate increase	Fair.
Wyoming	Decided decrease	Not promising.

Starting Specimen Chrysanthemums.

Lengthening days remind us that it is time to commence the propagation of chrysanthemums for specimen plants. Varieties for this purpose should be of medium height, and the stems well clad with healthy foliage. The flowers should be erect, fully double, of medium size and distinct color. I make a trial of twenty-five or more new varieties every year, but it is seldom that more than three or four prove suitable for exhibition. Among a list of desirable varieties will be found many old ones. Our stock plants are now in cold frames. By giving them good protection we are enabled to obtain cuttings at any time of nearly all the varieties we wish to grow. Some few, especially those grown as single stemmed specimens, are shy in producing cuttings. These we place in a more genial temperature, our object being to get in our batch as near as we can together. Stock plants which have been kept in a higher temperature than the cold frame continue growing, and in such cases it is better to cut them back than take overgrown cuttings.

Opinions vary as to the proper time to take cuttings. I have been in the habit of inserting them early in January. While this gave a longer season of growth, it often happened that cuttings taken so early ran to bloom prematurely. Some are ruined for the season and others considerably set back, while a few break again and make good plants. Ivory, Cullingfordii and John Shrimpton have made good plants, after breaking into bud early, and pompons are liable to behave in this way. My experience has been that cuttings struck about the middle of February make the best plants, although one lot of prize winners I know of were started in March. Preference should always be given to root cuttings over those growing on the stem. When I find a variety that persistently refuses to make root cuttings, producing only stem cuttings, I shake it out, put it into a smaller pot and grow it directly into a specimen. The only fault I find with such is that they make specimens of too large a size.

Chrysanthemums will root in any temperature above freezing, and in England it is customary in many places to insert them in pots placed in cold frames. By this plan it is claimed the plants are strengthened in constitution, but I am not aware that it makes much difference, especially in a plant that responds to good culture so quickly as does the chrysanthemum. We use an ordinary propagating bed with a bottom heat of about 60°, and a minimum air temperature of 50°. This insures quick rooting, giving us the space for other stock. Cuttings should be prepared with a sharp knife, and shorn of a few of the lower leaves, and the tips of the upper ones, which would otherwise hang about the base of the cuttings and encourage damping. When this takes place it is almost impossible to prevents its spread through the whole bed. They will need a liberal supply of water for the first few days, and thorough shading when the sun shines. They should be rooted in about three weeks and then may be put into small pots, using a rather light compost.

The following list of new varieties are well worth trying as specimens: Mrs. J. Withers, Martin A. Ryerson, West Newton, President Leon Say, J. H. Woodford, Lawn Tennis, Casco and Katherine Leech. T. D. H.

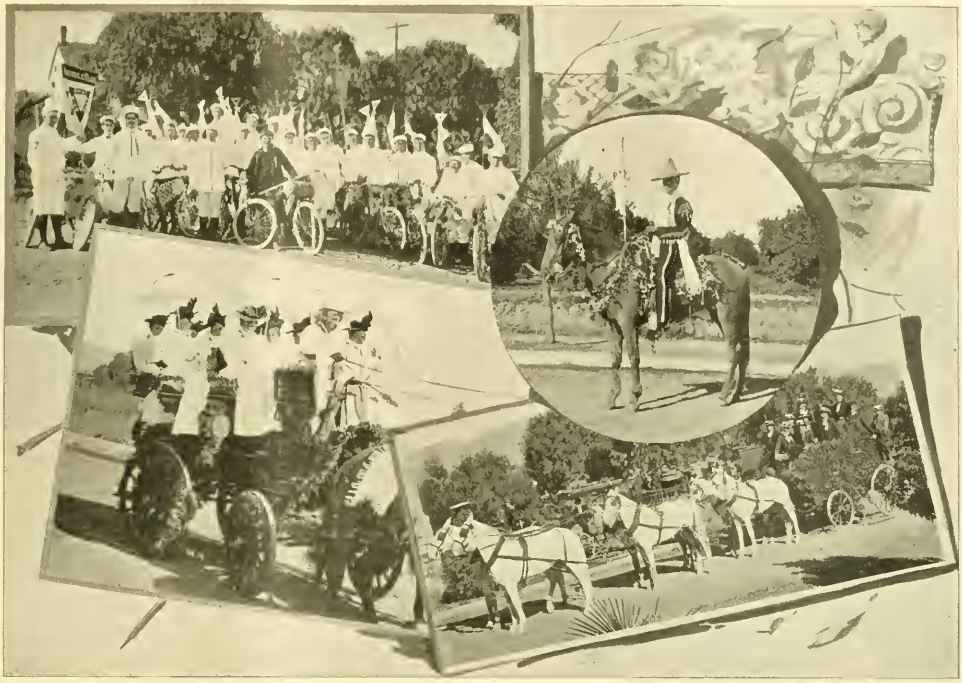
Notes on Some of the Newer Sweet Peas.

The past season was a peculiar one in the vicinity of Detroit, and seemed to have a curious effect upon some varieties of sweet peas, notably Blanche Ferry, Extra Early Blanche Ferry and Little Dorrit. I had nine different stocks of these sorts planted in trial, occupying altogether some seventy-five feet of double rows, and among the thousands of flowers produced there was not a single normal colored blossom, all being to a greater or less degree like the sport called American Belle, with pink or pink and white striped wings instead of the nearly white ones of the normal flower.

It is a curious fact that the two stocks of Little Dorrit (which were from unimpeachable sources) should show precisely the same sportive tendency as the Blanche Ferry though I understand that Mr. Eckford developed it from entirely different strains. Some of the identical lots of seed used were planted in other Detroit gardens and also at Toledo, Ohio and on the Huron Peninsula; and while the Detroit flowers were like my own, the Toledo and Huron plantings furnished some of the finest and most typical colored blooms I ever saw. This known variation in these varieties illustrates the effect that cultural conditions often have over the sweet pea and make it probable that some of the other varieties of which I am to write developed abnormally and behaved differently at Detroit than at other places.

The Bride. This new white is certainly well worthy of a place. The vine, while not quite so hardy and floriferous as that of Emily Henderson is more so than that of Blanche Burpee, and the individual flowers are fully as fine in size, form and color, in fact cannot be distinguished from those of the latter sort. The especial merit of the variety, however, is in its length, strength and grace of flower stem and the disposition of the blooms thereon, being one of our best sorts in these respects, and forming an exceedingly graceful bunch. To me this quality of gracefulness of stem and poise of flower is an important element of merit and should be considered in the same way as size form and color in estimating the relative merit of varieties. Sweet peas are seldom enjoyed as a single stem, but either as growing on the vine or gathered into a bunch to add to the attractiveness of dress or surroundings, so that availability for this purpose is surely worthy of consideration.

Prima Donna. This is quite similar to Katherine Tracy and I will compare it with that variety. At Detroit it was a very vigorous grower, producing a great number of flower stems, each with three or four blossoms, four to the stem being as common in this variety as three in the other. The stems are heavier and the flowers more stiffly placed and less gracefully poised and roll much more, so that though there are more of them they formed a less graceful and effective bunch and the row at no time looked as brilliant as that of its American rival. In color as grown at Detroit they are about alike, both being a uniform shade of soft and delicate but brilliant rose pink or blush crimson, rather better diffused and more persistent in Katherine Tracy.



The standard of the English sort was a little—and but a little—the largest and best in form, being a little fuller at the base. At first it is well expanded and nearly flat with just sufficient incurve to give grace but it soon rolls forward in a way which though graceful, lessens the effectiveness of the flower, while that of the American sort remains boldly expanded till it fades. The wings were larger and better formed but to my taste less gracefully rolled. I saw the two varieties growing in the same gardens in New York and Vermont where they developed relatively about as at Detroit, but in Canada Katherine Tracy did much better, being very large and persistent and fine in color, while Prima Donna did not do so well as at Detroit. On the other hand in California Prima Donna did decidedly the best, being far better in size, form and color and the standard rolling much less than at Detroit, while as grown there Katherine Tracy was no better in size and was poorer in color than in Michigan, and very much inferior to the Canadian blooms.

Royal Rose. This seems to me the largest and finest formed sweet pea yet introduced The plant is strong growing and produces a good number of stout flower stems bearing two or three close set and a little stiffly poised flowers. The standard is of immense size and of great substance; it is nearly round with its longest diameter a little below the center. It is boldly expanded and remains nearly flat till the last. The wings are very large and thick, beautifully incurved rather than rolled and retain their form better than most. If taken off and laid flat the pair will exactly cover the standard. In color the flower is a cold purple pink, something like, though a shade darker, than Apple Blossom, and it is nearly the same shade throughout except in the back of the standard, where it is darker. This is a magnificent flower, but it is one to admire rather than love and in spite of its size and beauty it is not likely to become as popular as some of its softer colored and more winning sisters.

WILL W. TRACY.

The Tournament of Roses at Pasadena, Cal.

Nowhere in all his course did the sun shine on a fairer scene or a happier people than when Pasadena "received" the new year with her ninth annual tournament of roses. As grandly and gaily as in the years gone by, blue and gold—the tournament colors—the blue for her mountains and her skies the gold for her oranges and poppies of her hillsides and her valleys, gaily fluttered on every side, for the entire city was magnificently decorated. Along all the principal avenues and streets, from poles, wires and every available place, proudly floated and waved banners and streamers. Business houses and private residences were lavishly decorated

THE TOURNAMENT OF ROSES AT PASADENA, CAL.

with the same festal colors. There is but one Pasadena and one tournament of roses on New Year, and the wonderful display this year fully merited the admiration and applause that greeted it by the multitude that came to see this unique spectacle.

The day was perfect, what in the east would be termed an ideal spring day, and the myriads of people who thronged the streets were clad in the daintiest of summer attire. Twenty thousand is the estimated number of visitors. They saw a floral procession a mile in length, men and women, animals and vehicles almost hidden from view in their garlands of flowers. There were wagon loads of roses, carnations, callas, acacias, orange blossoms, marguerites and marigolds, poppies and poinsettias, pines and pepper branches, and unnumbered strings of smilax. It is estimated that over one ton of flowers, vines, etc., were used for the fire department's tasty decorations. Whence came all these? It was expected that owing to the recent frosts there would be a great scarcity of all kinds of flowers, but the immense quantity used on this occasion was a revelation even to old residents here and shows how rapidly vegetation recuperates in this favored clime.

For weeks all those who intended participating in this reception had been planning something that would merit first prize, for be it understood there is a generous rivalry for prizes, and each one endeavors to surpass all others in his class. Thus it is that so much time and so many flowers are used to produce the artistic effects that are so charming We would gladly describe each of the individual entries in this wonderful procession but space will permit of a brief note of only the most interesting. Scores must pass unnoticed whose merit deserve special mention, but the editor will frown and say cut it short.

Our illustrations show four interesting entries in the procession. The coach of the members of the Chamber of Commerce of Los Angeles was drawn by six white horses and the decorations were very elaborate. The Hotel Green coach was drawn by bay horses, the harness wrapped in green and scarlet and this effect carried out in the decorations also, red geraniums being principally used. The ladies in the coach were all costumed in white with scarlet "furbelows" and trimmings. The young men's bicycle club with decorated wheels and white costumes made a very noticeable display; the young man in the black costume has just finished a 14,000 mile journey on the wheel beside him. The other figure is a young man representing a Spanish Cavallero. He carries the first prize banner.

Good Geraniums.

By request I give a list of the best and most deserving varieties for general cultivation as they have come under my observation. I do not claim that this list contains all the varieties worth growing, nor shall I confine myself to the new varieties, but name the best sent out during the past twelve years, omitting the new ones to be offered for 1898, thus giving a list of good varieties that can be purchased at a price within the reach of any grower. The varieties best adapted for massing or bedding purposes are marked thus "X," yet many of the others are fair bedders, but they are especially suitable for market purposes owing to their fine flowers or distinct colors.

Double scarlet—x M. Alphonse Ricard, x Acteon, x J. J. Harrison, x W. P. Simmons, x Wm. Kelway, Mme. Bacot.

Single scarlet—x Theodore Theulier, x M. P. Olombel, x W. A. Chalfant, Athlete, Deuil de Miribel.

Double dark red and crimson shades—x S. A. Nutt, x A. Dupre, x Mme. Dupont, x Le Cid, Edward Dauglede, Eugene Lambert, Francois Magnard, x M. A. Borie, aine.

Double white—x Mme. Buchner, x La Favorite, x Mme. Ayme Chevreliere.

Double salmon shades—x Wilhelm Pfitzer, Beaute Poitevine, x Dr. Audiguier, Ruy Blas, x Gloire de France, x Mme. Wettstein.

Single salmon shades—x H. Dauthenay, x Mrs. E. G. Hill, x Van Dael, x Baronne de Scalibert, x Mrs. A. Blanc.

Double pink and rose shades—x Emile de Girardin, x Mary Hill, Claire Fromont, x Comtesse de Castries, x Francis Perkins (Bailey's Pink), Surprise, x Le Contable, x Catulle Mendes, Marguerite Pinon, x De Lacepede, x Duc de Mertemart.

Single pink and rose shades—x Granville, x Mme. du Luc, x Madonna, Mme. Alphonsine Thome, M. Poirier.

Single white—x L'Aube, x Mrs. J. M. Garr, x Marguerite de Layre.

Other distinct colors—x Mme. Bruant, Fleure Poitevine, J. Sallier, Dr. Argueyrolles, x Pres. Victor Dubois, x Mme.

Jaulen, Baron Foache, Camille Bernardin.

The above varieties are described in nearly all the leading wholesale catalogues, hence I will not take room for description here. In conclusion I wish to say a word to that class of geranium growers who make the claim that their customers only demand about three varieties. I pity the patrons of such a man. If growers will include in their stock some of the new and distinct colors, they will be surprised how speedily their patrons will appreciate the new and good things in geraniums, as they do in new carnations. A. T. SIMMONS.

DENDROBIUM NOBILE IN 6-INCH POT.

Dendrobium Nobile for Christmas.

Here is a photograph of one of the Dendrobiums, nobile, grown for the holiday trade in 6-inch pots; they were grown in a close atmosphere all last summer until September 1, when we removed them to a lighter and more airy house, keeping them only moderately moist, but they were not allowed to become dry at any time. The temperature in this house was at no time above 80° and since October, when fire was started, we endeavored to maintain a night temperature of between 50° and 60° with an increase of about 10° in the day-time. The joints commenced swelling slowly soon after the plants were hung up near the glass in this house, and those in the warmer end came out splendidly just in time for the holiday trade.

Most all of our plants are home-grown young stock, not imported; it takes several years to produce good-sized plants, but when four or five rooted top growths are placed together in a pot or pan, we may generally expect a fair specimen of the size mentioned after two years' growths from the start, some of the smaller and weaker growths may not be in that shape until the season after that. They are, however, very easy to manage and when grown together with palms cause but very little extra labor. They receive their waterings while we are syringing the palms, occupy no valuable space, because they are suspended from the roof over the other plants, and are repotted but once a year. We have some larger and older specimens which do not receive a yearly repotting, merely a removal of the top layer of sphagnum; some of these plants are in 10-inch pans and have for several years produced remarkably long and stout canes under the same treatment; they are not yet in bloom but are well set with buds. J. B. K.

An Old School Florist.

On December 29 last, a reception was held in honor of the eighty-third birthday of John Dick, which was attended by many of the members of the craft of this city who called to extend their congratulations, present him with a cane and pass a few hours with their old friends once more.

Mr. Dick has lived in Philadelphia since 1836, coming here from Edinburgh, where he was born in 1814. He landed in this country with a good constitution, the lawful amount of clothing and a determination to get along. This was the extent of his capital. He soon secured employment, however, working for Andrew Dryburgh, a commercial florist, and as a private gardener to Dr. Pepper.

In 1838 he started in business with James Ritchie, at America and Oxford streets, the firm name being Ritchie & Dick. It may be interesting to state that their friends advised them against the venture, as there were already two firms well established, Andrew Dryburgh and James Sherwood, and there would not be enough business for them all.

Their location was a matter of concern to them; the refusal of a large plot of ground on which the building of the Union League now stands on Broad street below Chestnut, for the up-town property, proved be be a grand mistake, the Broad street land value being worth now at least $600,000 while the place selected would not realize one-tenth of this sum at the present day. It has long ceased to be a floral establishment.

The firm of Ritchie & Dick, in spite of the great competition (?) was quite successful. One of their early ventures, that of forcing strawberries, proved a failure, Mr. Dick saying that when they bloomed they were found to be all "he uns" and would not set fruit.

In 1850 Mr. Dick purchased a farm of some fifteen acres at Fifty-second and Darby Road and erected some greenhouses, and here commenced a business which grew to be one of the largest in the country. He grew largely the then popular plants of the day, camellias, daphne, Olea fragrans, gardenias and azaleas, and did a large business in the southern states, where this class of plants were hardy. Later on he was a large importer of new plants from Europe and made many trips abroad to personally inspect the novelties. He was among the first to import the new geraniums, coleus and other bedding stock. These he grew in large quantities, often devoting a house or more to one variety. During the busy spring season the wagons of the dealers stood in long lines waiting their turn at his gates. He also conducted a city store for the sale of seeds and plants, first at Second and Market, afterwards moved to Twelfth and Market, and finally to 1721 Chestnut street, where he continued until 1876, when he sold out to J. Kift & Son. During the time the camellia was in demand, Mr. Dick had large quantities for sale, the holiday price being $50 per hundred.

Mr. Dick was a great economist and built his houses at comparatively small expense. They were erected mostly on the side of slope facing south with the sill but a foot above the surface of the ground. When the house was low, the walks were depressed to give head room. He invented a saddle back tubular boiler, with hollow grate bars for water, so as to absorb all the heat possible.

JOHN DICK.

At one time he was quite largely interested in the nursery business and was an extensive grower of fruit and shade trees.

Mr. Dick was a good judge of real estate and made many profitable investments. His holdings now adjoining his homestead amount to about thirty acres, which has grown very valuable and is being rapidly encroached on for building lots.

About 1883 he sold his interests in his greenhouses to his son, John Dick, Jr., who continued the business for a time. The houses have now all been removed and nothing remains but the old homestead, where Mr. Dick still resides.

Mr. Dick has a very kind and genial disposition and is a man of correct habits. He believes that tobacco and liquors are injurious to the system and never indulges in these luxuries. He has always been very methodical and never believed in forcing himself to fatigue. His custom has always been to take a nap after dinner even in the busiest season.

Mr. Dick's family consists of three daughters and one son. The Halliday Bros., of Baltimore, are his grandsons. His wife, who was a sister of his former partner, died a few years ago. In appearance Mr. Dick is quite hale and hearty and his only infirmity is that his memory for dates and faces does not serve him as well as in the days of "Auld Lang Syne." K.

Politics and Horticulture in New York.

To plough ahead in Tammany
Your soil should be well spaded;
'Tis well to be a Gardiner
And keep the ground well Grady-ed.

But flowers exposed to too much sun
Soon wilt and droop quite faded;
And thus 'tis good, as understood,
To keep your plants well Shea-ded.

The fine arts, too, are good to know,
And that your voice be heard,
'Twere well to practice singing, so
You'll Carroll like a Bird!

—*New York World.*

Cypripedium Rothschildianum Crosses.

Mr. A. Herrington was in Philadelphia a short time ago, and it was a treat to come in contact with the man who has recommended that a course in cypripediums would appear to be in order at the winter meetings of the Florists' Clubs. Personally, nothing would please me better. The difficulty would be in securing sufficient teachers to go around. I have a plan to propose which I will unfold later on.

It was interesting to listen to Mr. Herrington when speaking about hybrid, or rather seedling orchids, the results of crosses, especially among cypripediums. Here is his list with Rothschildianum as one of the parents:

Name.	*Raiser.*	*Parents.*
Massaianum	Sanders	C. superciliare x C. Rothschildianum
A. De Lairesse	Sanders	C. Curtisii x C. Rothschildianum
Mars	Sanders	C. Harrisi'm x C. Rothschildianum
Neptune	Sanders	C. Io-grande x C. Rothschildianum
Lord Derby	Statter	C. Rothschildi'm x C. superbiens
Excelsior	Statter	C. Rothschildi'm x C. Harrisianum
Y'mir	Measures	C. Hookeræ x C. Rothschildianum
W. R. Lee	Lee.	C. superbiens x C. Rothschildianum

Of the above one only appears in the 1894 edition of Williams' Orchid Grower's Manual, the first one on the list, namely, Massaianum, and they are all of European origin. Mars and Excelsior it will be noticed have the same parentage, the difference being that the crosses are reversed. Lord Derby and W. R. Lee are blood relations, and in this case also the crosses are reversed, and it is a noticeable fact that there is a close relationship between the two varieties mentioned, and the one raised by Mr. H. Clinkaberry and named Edwin Lonsdale, for superbiens (sometimes called Veitchianum), is a superior form of barbatum, and barbatum is one of the parents of Mr. Clinkaberry's seedling. It is presumed that they are all sufficiently different to warrant the retaining of distinct names.

Here comes another ticklish point. It appears that since the above list of cypripedium crosses has been made known by Mr. Herrington, he has learned that a seedling has been raised in the orchid houses of H. Graves, Esq., which has the identical parentage as that of Mr. Clinkaberry, and which flowered for the first time over a year ago and again during the year just passed. Here is where something more than a school is necessary. Supposing the two varieties which originated in the respective establishments of Messrs. H. Graves and C. G. Roebling, on comparison prove to be so nearly alike as to render it unadvisable to retain the two distinctive names. Which name should have priority, that is, if Mr. Graves' seedling has been given a name? In my judgment the name given to Mr. Roebling's seedling should be given precedence, because it has been publicly exhibited with a name attached, and recognized by the award of a silver medal by a horticultural society, which has a standing in the world of horticulture nearly everywhere.

Since exceptions have been made to the reports which appeared in the trade papers in reference to the standing of this variety among seedling cypripediums, it behooves us to endeavor to make a statement in relation thereto. The committee of arrangements of the Pennsylvania Horticultural Society desiring to do justice to Mr. Roebling's seedling, sought orchid experts among the visiting brethren and secured Messrs. John Thatcher and F. L. Atkins, the latter is well known as having been connected for a number of years with the late firm of Pitcher & Manda, and the former was until recently orchid grower in the gardens of Homer Bass, Esq., England, and now with Charles Dissel, Esq., Wynnewood, Pa. These two gentlemen are enthusiastic lovers of orchids, and after deliberately examining the plant and flower, with the description handed in, recommended that the Pennsylvania Horticultural Society make an award of a silver medal, and the statement that it was believed to be the first seedling cypripedium, the result of a cross in which Rothschildianum was one of the parents, to flower in this country or in Europe, was to the best of my recollection made incidentally and was not a part of the judges' report.

The remedy against a repetition of similar errors would be for an orchid committee to be appointed by the S. A. F., whose duty it shall be to solicit registrations of all seedling orchids as soon as in bloom, with pedigree and descriptions, and if possible let it be exhibited before any regularly organized horticultural society or Florists' or Gardeners' Club, and if it be found sufficiently distinct to warrant the giving of a varietal name, let it be done, and in that way we would have a permanent record for our guidance in the future, as these records would be reported to the S. A. F. at its annual meetings, and thus become a part of the proceedings and be printed in the published records of that good old society. L.

CYPRIPEDIUM EDWIN LONSDALE.

Carnation Notes.

When the little white roots or feeders push through the soil, as they are doing now, it may safely be taken for granted that the plants are in vigorous health and searching for nourishment. This is therefore the proper time to supply more food; but before we attempt its application, it will be well to remove all the scum and loose dirt that may have gathered on the surface of the beds, taking care that under no circumstance the soil is so far disturbed as to injure the young roots. The best food for present use will be found in a mulch of well decayed manure and good live soil thoroughly mixed and in equal parts. This compost should be reduced to a tolerably fine condition, for it has been found that when the soil is applied in a rough state, the beds are liable to become stagnant on account of the presence of many hard lumps of earth which retard the circulation of air in the beds, thus preventing that periodical drying-out which is essential to a healthy condition of the soil.

Good sheep manure makes an excellent mulch, if one is so situated as to be able to procure it easily, and chicken manure

is also good. But in using both these manures, it is necessary that some care be exercised so as not to apply them when they are in a very green condition, for they are then very fierce and quick in action. This caution, however, should not be carried to the opposite extreme, employing that mass of dust and dried chips, of little or no strength, which is sometimes given the name of sheep manure. In the case of such varieties as are slow in maturing, the addition of a little nitrate of soda to the mulch will be beneficial—the full of a 5-inch pot to sufficient mulch to cover 50 linear feet of a 6-foot bench, thoroughly mixing the nitrate with the soil.

In using nitrate of soda, we prefer it only moderately crushed, for several applications of water are then necessary before it dissolves, thus insuring to the roots a gradual and extended rather than a large and immediate supply of this stimulant. The soil here contains little or no lime, and we find it an advantage to supply the deficiency to some extent in the preparation of our bench compost, especially in the case of weak stemmed varieties. This also requires renewal in some measure just now, and therefore, before the mulch is applied, we scatter a light coating of wood ashes over the surface of the beds. Bone meal, in the case of varieties with stiff stems and heavy growth, serves the same purpose to our entire satisfaction. But as the conditions and circumstances of the growers are so varied, rules as to the use of fertilizers so impossible of universal application, the foregoing hints are not to be interpreted as other than mere suggestions which practical men will modify or enlarge upon according to the needs of their different soils and their favorite varieties.

C. W. JOHNSON.

Flower Shows.

THE BOSTON POINT OF VIEW.

Chrysanthemum exhibitions in Boston are given by the Massachusetts Horticultural Society, the prize list being based on the annual appropriation made by the executive committee, subject to the Society's approval, in December of the previous year. The schedule for the full list of exhibitons of the incoming year is printed and distributed to members of the Society on January 1. As the Massachusetts Horticultural Society is a wealthy organization, owning its exhibition halls and in receipt of a substantial annual revenue, the financial question has not the importance here that it necessarily assumes in most other localities. In fact, out of over twenty exhibitions which are regularly scheduled for each year all are free to the public excepting two, one of which is the Chrysanthemum Show, and in making up the premium list the advancement and development of horticulture is the main consideration with the committee, the question of financial support being a minor one.

To make the show an exponent of the best achievements in chrysanthemum culture up to date, an artistic and professional success, neglecting no class, is the first aim of the schedule committee and the arrangement committee. Uniformity is sought in vases, labels, tables and other adjuncts, and business cards are prohibited in all cases. Blooms shown on flat boards are not provided for, being regarded as deficient artistically and practically as the important points of stem and foliage are absent in such arrangements. Exhibitors of previous years are freely consulted in making up the schedule and their suggestions and criticisms as to specifications in the various classes are given careful attention, it being rightly assumed that if the preferences of exhibitors are reasonably catered to, the best and fullest results are thereby assured.

Neither of the Society's halls are large enough to accommodate the chrysanthemum exhibition, which is thus of necessity divided into two sections, the cut flower section occupying the lower hall and the plants the upper hall. This makes the employment of music as an attraction of the show somewhat awkward and it is not done, although there is no question that it would assist in drawing a larger attendance than is attracted by the display of plants and flowers alone, for in these realistic, hustling days of kinetoscopes and "continuous performance" houses, exhibitions of "still life" are a very feeble attraction. The time honored stuffed Santa Claus in the big store windows has had to give way to the live reality and in the familiar rug weavers, cigarette makers, candy pullers and muffin bakers we recognize the concessions of the storekeepers to the demand of the restless public for something that "goes."

In the earlier days of chrysanthemum shows when Mikado music and chrysanthemums were twin "fads" (it was mammoth pumpkins a generation earlier) the twisted and eccentric freaks that the chrysanthemum culture of the times brought forth excited the public curiosity for a while and supplied the sensational features so essential to financial success, but this could not last always and today we find that chrysanthemum shows, intensely interesting as they are to experts and growers, have lost much of their magnetism for the general public, and that although many thoughtful and well-meaning men have tried to tell us how to manage successfully grand flower shows (they are all "grand" now-a-days), the discouraging fact comes home to us with increasing frequency each year, that flower shows unaccompanied by sensational features are almost sure to fall short when the cash receipts are counted and that even in conjunction with other attractions they are rather risky investments. It is plainly evident that the public are pretty well satisfied to get their knowledge of floricultural progress from the windows of the enterprising florists, which costs them nothing, and their recreation in the more sensational and exciting entertainments now so generally provided.

It seems that this discouraging condition is not confined to any one locality but prevails in nearly all quarters and to affairs managed according to varying standards. Unfortunately, not many of our horticultural societies or florists' clubs are able to do as the Massachusetts Horticultural Society does, year after year, and young organizations will wisely hesitate before venturing on such enterprises without having first obtained such guarantees as to premiums and other expenses as will secure them against possible embarrassment, while the other societies may find it necessary to discontinue their exhibitions or make such reductions in their premium lists and changes in their policy as will be a great misfortune for the cause of practical floriculture.

CYPRIPEDIUM BELLATULUM ALBUM.

Cypripedium Bellatulum Album.

This lovely pure white form of Cypripedium bellatulum was exhibited for the first time in this country at Boston, January 1, by Mr. W. W. Lunt, who was awarded for it a silver medal by the Massachusetts Horticultural Society. Cypripediums as a class have not enjoyed that popularity for commercial cut-flower purposes that they merit, because of the absence of bright clear self colors and in many of the much-lauded varieties of recent introduction the novice finds but little to enthuse over. The flower we illustrate is an exception. May we not reasonably hope that the labors of our patient cypripedium hybridizers may yet result in placing within reach of our commercial growers, varieties with flowers as handsome as this white bellatulum, but (there's always a "but"), with longer stems. Mr. Lunt grows Cypripedium bellatulum in a rather high and moist temperature and in as strong light as possible, except direct sunlight.

Carnations Psyche and Painted Lady.

The subjects of our illustration are new varieties grown by E. G. Hill & Co., Richmond, Ind.

Psyche is of the Helen Keller type but said to be a free bloomer and very easy to do.

Painted Lady is a red of fine size and build and a very free bloomer. It is between the color of Tidal Wave and scarlet. Both varieties were exhibited at Cincinnati last week.

CARNATIONS PSYCHE AND PAINTED LADY.

Chrysanthemum Certificates.

Mr. Stollery's views as presented in a recent number of the AMERICAN FLORIST are alike interesting and valuable.

The best way to determine the value of a novelty submitted to the society for a certificate is exactly what is wanted, and anything that has a practical bearing upon the subject will be accepted as an article of faith in the chrysanthemum creed. The officers of the society are alike popular, genial and efficient, and I am assured, desire all resultant good possible. What the society should strive for is a stronger membership—active and associate. The annual membership fee of but $1 ought to line up the entire rank and file of the trade, and an annual exhibition under the auspices of the Chrysanthemum Society of America would be extremely gratifying to all concerned.

But we hear on all sides that horticultural enterprises of this sort are nonpaying, and therefore to provide suitable exchequer we shall need to enlist the interest and aid of enthusiastic amateurs and connoiseurs towards maintenance. Surely there are some fortunate individuals who possess spot cash from some lucrative wheat deal or other to help us out. The poor grower is liberal to the extent of his resources, but is flat down as to pocket. Why not advertise for an exhibition fund and endowment? the very novelty of which might attract some prince of beneficence! Something like this, say, Wanted! $1,000,000 endowment!! for the worthiest horticultural enterprise extant—to be established in the humanitarian interests of art and nature, irrespective of creeds or adverse opinion, and the same to constitute a perpetual memorial of perennial good-will to the race in matters horticultural!

It is plain to be seen that the inception is monumental. All that is needed is a substantial base and corner-stone of cash in hand. Provide me the cash and I will consult at once a horticultural architect, some generous-minded soul who will draw the plans liberal enough, but not draw too heavily on our resources. Say, but it would boom the chrysanthemum business, now wouldn't it? Every class would be represented and still there would be room for more novelty and less monotony—and we wouldn't need to fret, worry or wonder where in thunder the money was coming from to liquidate expenses. Expense account is the hardest of all to liquidate, nobody seems willing to "shake" or "set 'em up!" Just think of it! An endowed flower show! Why, every city would scramble for it, and congress would have to decide the matter, like the World's Fair, and a national charter would be presented complimentary, and the band would play national airs! It would rival a Madison Square horse show without any horse-play, and this would be the millenium era of horticulture!

Aerial flights of fancy often reach remote possibilities, while prosy plodders actually prefer conventional ruts. The world is wide! All of which may be considered nonsense, still if you will read "between the lines," can you not discern some method in my madness? "Trifles light as air unhinge a world's history." To go back to the point of convergence. Judging chrysanthemum novelties—sports and seedlings—my thought on the subject is to accept Mr. Stollery's offer as to three specimen blooms—and to gain a certificate let them pass at least three of the committees. This ought to determine enough comparative merit to entitle an award. Geographically it is almost impossible to reach all the committees, in good form, with novelties. It really seems necessary to have the work of one committee corroborate another.

There ought to be some classification of colors, shades, tones and tints, as the equation of personal taste presents diverse inequalities. One creamy white scores low, another higher, and still another high, low, Jack and game! 25 points. Several of the yellows fare the same way. Color means simply color and not variety. I believe the variety is often judged with the color, instead of separate. In speaking of variety I naturally refer to individuality. In puzzling over the report of the general committee, taken as a whole, what do we understand by fullness? I always supposed doubleness was the special significance. Wm. H. Chadwick is thoroughly double to the center; it has never shown the least suggestion of an eye, and yet the different committees scale it 9, 10, 14, 15. A sport of Mrs. Jerome Jones, with an eye, scores 14 points. When Mrs. Jerome Jones or Maud Dean are well done the eye is fully covered and is no objection; again its prominence is an objection. Here is a nice point for discrimination, and another is size, that is still more of a bugbear. The question before the house is, how large must a chrysanthemum bloom measure to score the full number of points? Don't all speak at once, gentlemen. The work of the committee is not to see how many varieties can be turned down, but to judge fairly those that possess distinctive merit. And it must be plainly shown that points count as per accepted schedule. Withal there is too much latitude for personal taste and prejudice.

As for myself I have no individual grievance with any of the committees; however, there is some needed revision of the present system of judging, and some of the measures involved are vital. Aside from its bloom, let me once see a variety growing and I can satisfy myself better as to its intrinsic merit. Equality of growth and bloom is the desired Mecca.

GROVE P. RAWSON.

Flower Show Suggestions.

A correspondent calls attention to the successful run of the international exhibition at Hamburg, Germany last year, and contrasts it with the failure which has so far attended the effort to make flower shows popular on this side of the water. To the greater love for art which prevails among the Germans is attributed in large part, the favor which such institutions find there, and the origin of this is carefully traced and placed to the credit of the teaching imparted to the youthful mind in school days, while our educational system tends rather to promote commercial enterprise. It is further held that there is a lack of variety in our exhibitions, and that the large premiums are too frequently given to the specialties

of a few exhibitors as opposed to the great variety of common plants which from their associations and simplicity of culture appeal to the public in general.

In conclusion Mr. E. advocates an extension of the consideration already given gardeners and their employers in these matters, suggests an admission fee graded to meet the circumstances of the various classes of a community, with a 5-cent ticket for school children, and teachers free, and advises that competent persons be appointed to describe the exhibits for the newspapers.

Philadelphia.

GOOD PROSPECTS FOR A BUSY SEASON.—PRICES DOWN.—MR. HEACOCK SELLS HIS NEW PINK SEEDLING, ELIZABETH.—VISITORS.

Orchids seem to be having a season of popularity just at present, as in several large entertainments the past week or so they have been used lavishly. Graham is right in it with the large private balls, most of which functions are held in Horticultural Hall, and the decorations for which are generally of an elaborate order. At a large private ball at the Bellevue Hotel the floral furnishings, which consisted largely of asparagus, cypripediums and cattleyas were furnished by H. H. Battles.

There are quite a number of large entertainments ahead and the prospects of a busy season are good, although just at present and since New Year's the transient business in the stores has been anything but good. There is an abundance of good stock around, roses now being at about their best. The weather, which has been cloudy and murky the past few days has affected the color a trifle, but the extras show up all right.

Prices are down a trifle, the high grade teas now going for $8 to $10. A few of the very select bring $15, but they have to be extra fine. The second division stock ranges from $4 to $6, at the latter price some really good Brides and Maids are to be had. Beauties from $7.50 per dozen down, are to be had in quantity, the majority bringing $2 to $5 per dozen.

Carnations average $2 for good stock; from $2.50 to $3 is asked for the highest grade, and even $4 for some special variety. A very good quality can, however, be had for $1.50 per hundred, and the fakirs on the streets offer what appear to be quite nice flowers at 20 cents to 25 cents per dozen, their buying price being probably $1. A little more of this mild weather will probably send prices to a lower grade, and yet many growers say they don't pay at much less than $2, and those who grow fancies say the extra care eats up the fancy price.

Mr. Heacock has sold his new pink seedling Elizabeth, to Messrs. John May and Robt. Craig. It is a very fine flower and will be heard from in the future Several other firms were after it but Messrs. Craig and May bid the highest and secured the stock.

Young ferns suitable for the table fernery are now very scarce. There is always a great plenty of stock early in the season, but January generally finds the market bare, and it is so again this season.

Daffodils are slow appearing, none being offered as yet; probably it is just as well for the growers.

Nice plants of azaleas seem to have lost their novelty and for the present are not very good money makers for the florist.

Visitors in town: John N. May and Julius Roehrs. K.

Moss Bank on Greenhouse Wall.

Our illustration shows a portion of a wall in the greenhouses on the W. S. Wells estate at Newport and it suggests a way in which many a bare and unsightly spot in commercial establishments might, with little trouble and expense, be made very attractive. The wall is of cement, and the facing of sphagnum moss six inches thick is held in place by copper wires running both ways, about three inches apart and fastened to galvanized screw eyes. The moss is mixed with an equal part of leaf mold. A great variety of dwarf growing plants will be found to thrive well in such a place. Adiantum cuneatum, A. Farleyense, A. reginæ, Ficus repens, lycopodiums and fittonias are all especially appropriate, and a rich effect is gained by the addition of a few Rex begonias and scarlet flowered anthuriums. Orchids that have come into bloom in the greenhouse look pretty also suspended among the ferns. The only care required by the moss bank is a dash with the hose when the houses are syringed. Once a year, in the spring, it is entirely renewed. Andrew S. Mcikle is the gardener in charge of the Wells estate.

Philadelphia from a Grower's Point of View.

Pennock Brothers had a quantity of the Golden Gate rose in their large and showy window on Monday last. It did not strike me as being a desirable variety for the growers of this city to go into on a large scale, and if a variety is not worthy to be grown on a large scale, it is not worth while growing it at all. Growing "odds and ends" possibly may be all right for the florist who grows and sells his product at retail. It is true that occasionally a customer in the larger cities may take a fancy to a flower because it is odd, but a remunerative trade cannot be built up on those lines at present, apparently. I have tried it, and a flower no matter how beautiful it may be in itself, cannot be sold to advantage from a grower's standpoint unless it has a market value; what I mean is, it should be quoted in the market reports to be appreciated, for the retailer invariably puts a very low estimate as to price upon a flower he knows little or nothing about. American Beauty flowers the first year it sold in Philadelphia at Christmas brought only $2.50 per dozen wholesale. This price was—take them as they came—no

MOSS BANK ON GREENHOUSE WALL.

grading. The fact was there were not enough of them to make a price. I was told today by two florists from Greater New York that the very best Beauties at the recent holidays in that city brought as high as $24 per dozen wholesale. Is this not high-water mark?

To return to the rose Golden Gate. I agree with those who have stated that its name is a misnomer. There is nothing golden about it, neither in color nor in value, according to my notion. It has been compared with Souv. du President Carnot, but it is certainly not as beautiful either in form or color as this newer rose. It lacks the delicate life in color that Carnot possesses.

I also saw a vase of the new rose Mme. Chatenay at the same place, and I am more favorably impressed with this than I am with Golden Gate. It may be considered by some to be too much like La France, and it does resemble that good old rose very much in form and color, and I am inclined to think that where La France finds favor, this new rose will eventually displace the old favorite. When La France and the "Madam" are placed together for the purpose of comparison, La France looks very blue, and that is the difference between them; La France is a blue pink and Mme. Chatenay is a red pink, the color of the latter being much more lively than that of the former.

Pennock Brothers have used many more orchids this year than ever before, especially of Cattleyas and Cypripedium insigne. Here again, the odds and ends of orchids do not find as ready sale as formerly. This is accounted for largely, I think, because the customers have become more familiar with them and know them by name better than heretofore; and another, which perhaps is the greater reason, is because the two sorts mentioned may be had in larger quantities. It has been questioned, however, whether Cypripedium insigne pays the grower at $8 to $10 per 100, which is the price the New York market reports quote; they may perhaps when compared with carnations. Mr. H. H. Battles used about 2000 Cypripedium insigne last week and will use this week nearly 500 Cattleyas, the former adorned his window on Saturday and the latter on Monday last. When seen in large quantities like they were on these occasions they surely are very impressive and must help the business. Good for H. H. Battles. L.

Boston.

EXHIBITION OF CHINESE PRIMROSES.—SILVER MEDAL FOR AN ODONTOGLOSSUM.—LECTURE ON FRUIT GROWING.—TRADE VERY QUIET.—WEATHER REPORT FOR DECEMBER.—MR. DOYLE LOSES HIS MASCOTS.

The first exhibition of the year took place at Horticultural Hall on Saturday, January 8. The display of Chinese primroses was very good, but the plants were at a disadvantage, owing to the fact that the size of pots specified in the schedule had been increased, and the change being a recent one the effects of the re-potting were noticeable. Mrs. B. P. Cheney, Jos. H. White, J. L. Gardner and E. S. Converse were the principal exhibitors. J. H. White and W. E. Coburn made attractive displays of individual blooms arranged in fifties on flat dishes on a bed of selaginella, the blooms showing a gratifying advance in size and variety of coloring over those shown in past years. Freesias were shown in good shape by W. N. Craig and Mrs. E. M. Gill. In some of the plants of Primula stellata, exhibited by J. L. Gardner, the size of the flowers was remarkable, many of them approaching in size and fullness the best of the improved sinensis type. J. E. Rothwell exhibited a well bloomed plant of Odontoglossum Vuylstekeanum, an odd and pretty species, for which he received a silver medal. The medal was for the plant, not for the name; the poor plant was not responsible for its awful name.

A lecture of more than usual excellence was delivered by J. H. Hale, of South Glastonbury, Conn., on the commercial side of fruit growing, which attracted an audience that nearly filled the hall, and was followed by a most interesting and exhaustive discussion on this very important subject. It is unfortunate that these lectures and the exhibition are held in the same hall. The exhibits cannot be examined during the meeting with any comfort, and the constant moving about in the vicinity of the tables disturbs the speakers.

Business has been at a standstill since New Year's, little being done except funeral work which, as on many similar occasions in the past, has helped out wonderfully to dispose of the accumulating stocks. White flowers have their innings just now, although there are enough and to spare of all colors. About January 15 an improvement may be looked for, if past seasons are any index for the future.

According to the December report of the Boston weather station there were only nine clear days last month; seventeen cloudy and five partly cloudy days. The highest temperature recorded was 64° and the lowest 9°, the mean being 34°. The total precipitation was 3.92 inches. The average for twenty-seven years has been 3.38 inches.

Four handsome yellow cats, which have been a special attraction at the store of W. E Doyle and the pride of their owner for years, were found dead one morning last week, suffocated by gas escaping from a main.

Visitor in town: A. N. Pierson, Cromwell, Conn.

Farfugium Maculatum.

This is an excellent keeping plant for the dwelling house and its boldly variegated leaves are very attractive. It is not a new plant but is not grown by the trade as generally as its merits would warrant. It thrives best in a temperature of 45° to 50° and requires plenty of water. In summer the plants may be plunged in pots in a well shaded cold frame. Mr. Chas. Zeller, who grows it in quantity, propagates Farfugium maculatum by division of the roots. He has found the variegation to come true in seedlings but has had no success in raising them on account of liability to damp off.

New York.

CLUB MEETING.—LARGE ATTENDANCE.—A FINE EXHIBITION.—PRES. PLUMB TAKES THE CHAIR AND RECEIVES A PRESENT—INTERESTING PROCEEDINGS.—BUSINESS QUIET.—PRICES TENDING DOWNWARD.

The event of the week was the meeting of the New York Florists' Club on Monday evening. It was the best meeting the club has had for years and undoubtedly only one of many of the same kind that are in store for the members during the year 1898, as it is the general opinion that President Plumb's administration will draw out the full resources of the organization. There were about seventy-five gentlemen present and twelve proposals for membership were handed in. The tables bore a showy display of plants and flowers, the first exhibition in competition for the coveted gold medal which is to be awarded at the end of the year.

The retiring president, Mr. Henshaw presented the newly elected officers, one after another, in a graceful manner and then President Plumb took charge of the proceedings. Here followed a most happy incident the gift to Mr. Plumb of a handsome gavel from the members of the club, the presentation speech being made by Mr. John Morris. The gavel was especially interesting, being made from the wood of a hickory tree which grew at Mt. Vernon, Va., and which was recently cut down because it obstructed the view of the Potomac from the mansion, the gardener at Mt. Vernon, Mr. F. A. Whealan, having kindly furnished the gavel, which members of the club had had

FARFUGIUM MACULATUM.

silver mounted and suitably engraved. Mr. Morris made a most eloquent and patriotic address and in conclusion said that although there were many gentlemen present who had experience in crossing roses and carnations, yet it had remained for the New York Florists' Club to make a successful cross between the American hickory and the English Plum(b). There was much applause and enthusiasm and Mr. Plumb made a fitting reply.

A discussion on the matter of prizes resulted in a vote that a silver and a bronze medal be offered for the second and third best exhibitions respectively in the gold medal competition and a proposition to let down the bars and award certificates of merit without adhering to the stringent rules heretofore prevailing was emphatically voted down. The report of committee on the exhibits for the evening gave A. Schultheis 60 points for a group of azalea plants, W. A. Manda 72 points for Abutilon Savitzii, 42 for Cypripedium media superba and 55 for Anthurium Scherzerianum giganteum and C. W. Ward 76.37 points for a collection of handsome carnations, including New York, John Young, Gen Maceo, Bon Ton, White Cloud, Blush and several others of his best productions. Frank Niquet showed a vase of a new seedling carnation which he has been growing for the past three years and has named Kate Brown. It is a lovely light cerise in color, with many other excellent qualities and was pronounced by John H. Taylor to be one of the sensations in the carnation line, an opinion which many others endorsed. R. Witterstaetter was represented by a white seedling carnation named Evelina.

The discussion on the question of annual dinner served to bring out the wit and eloquence of several members in a most entertaining fashion, Samuel Henshaw's ideas as to an alderman's capacity, John Morris' diagnosis of the after effects of over indulgence in rich viands, and the veracious experiences in this line as presented by Messrs. Asmus, Taylor and Weathered, who were afterwards constituted the dinner committee, being valuable contributions to the general fund of information on this very important subject.

A vote of thanks was extended to Mr. Whealan, to the exhibitors and the retiring officers. Messrs. W. J. Stewart, J. H. Troy and A. L. Don were appointed a committee on essays and publications, and Messrs. May, Keller, Roehrs, Hafner, Burns and O'Mara on exhibitions, for the ensuing year. A generous lunch was provided by the president-elect, and it was nearly midnight when the pleasant gathering dispersed.

Business in general continues quiet, with little to interest or excite going on. Many varieties of flowers are in over-supply, violets suffering especially in this regard, and prices are very low all through the list. This last week of bright weather has made a big difference on roses, the cut having increased considerably and the quality having improved greatly. The weather for the preceding six weeks had been anything but favorable for the rose growers, being dark and warm, thus making the application of artificial heat impossible if the plants were to be kept healthy. Carnations are accumulating, and unless improved demand sets in quickly prices must suffer greatly.

Miss Riley, the bookkeeper at J. K. Allen's store on Twenty-eighth street, has sustained a great bereavement in the death of her mother. Miss Riley has made a large circle of friends among the frequenters of the store, and there were many handsome floral offerings at the funeral from local customers.

Vice-president Jas. M. Logan, of the Florists' Club, and Mrs. Logan sail for a two months' visit to Scotland on the Furnessia on Saturday, 15th inst.

The New York Gardeners' Society had an interesting meeting on January 8, a paper and discussion on tuberous begonias being the special subject.

Visitors in town: J. C. Vaughan, Chicago; R. Vincent, Jr., Baltimore; W. Atlee Burpee, Philadelphia; Wm. Falconer, Pittsburgh, and W. C. Barry, Rochester.

Milwaukee.

Since the New Year began there has been a noticeable change in the flower trade. The society events have been confined to card parties, small dinners, etc., for which particular flowers in small quantities were asked for. Funeral work has very largely increased, mostly for elderly people, using many cycas leaves, violets, autumn tints, etc.; some very beautiful arrangements have been made using principally ferns and stevia. It is the custom to request "No flowers" and the family provides all that is necessary. Of course some flowers always come in, but they are from most intimate friends; the arrangements are left in the hands of the family florist, and are more satisfactory than when Tom, Dick and Harry sends in all sorts of conundrums.

The principal society event was the Charity Ball on the 12th; it was held in the Alhambra, the florists' work was a trifle out of the common, and was truly the most gratifying feature, the floor was laid over the chairs on to the stage, so that the parquet was not visible; the stage was set with a beautiful landscape, the florist arranged a foreground for this setting with plants and vines, taking in the arch and boxes on either side. The ladies wore and carried flowers—some of them—but some florists apparently over-estimated the demand when they provided stock in the morning. The use of violets appears to be gaining on the roses.

The supply of adiantums is a trifle short in this market now. Very little bulb stock, except freesias, which are good quality. Beauties are a disgrace, but it is felt necessary to have a few on hand; other varieties are good. Lilies and callas sell out clean every day. Carnations are popular, but the supply is quite large, so that some days there is a surplus. Good mignonette is in market, and marguerites have made their appearance.

A. Billings has concluded to give up pot plant growing, and confines his benches to cut stuff.

Currie Bros. have had the finest looking window in town for two weeks. A few early azaleas, mostly white, are to be seen, but there is a scarcity of flowering pot plants. The weather since January 1, has been as near perfect as could consistently be asked for. C. B. W.

Chicago.

RETAIL TRADE DULL.—GOOD BEAUTIES VERY SCARCE.—FLORIST CLUB'S MUSICAL.

The retail trade which had been very good since Christmas up to about a week ago, has gradually drifted back to decided dullness. During the past week there has been quite a large number of weddings and receptions but no very elaborate decorations were made. Several storemen have good orders ahead and anticipate a revival of business very soon. Shipping trade continues good. Wholesalers report trade steady, no large amount of stock accumulating, and no very great scarcity of anything. Violets, which are very much better in quality than they have been heretofore, are now in full supply.

Walter Hefferon, salesman for E. H. Hunt, exhibited Marie Louise larger than silver dollars. Mr. Amling and Poehlman paid wagers made by them that the flowers were not that size. Harrisii lilies have been a little short during the week and prices higher.

Good Beauties are very scarce. Many that are coming in are off color, the outside petals are a dark brown, giving the flower a soiled appearance. Good Meteors are in demand and bring better prices than other roses usually classed with them in price. White carnations bring from 50 cents to $1 per hundred more than the colored varieties. Some very good tulips are on the market and are selling well. There is plenty of good valley in the market from this year's pips, it sells well at $2.50 to $4 per hundred. Romans and Paper Whites are not wanted.

Mr. Judson Kramer, of I. N. Kramer & Son, of Cedar Rapids, Iowa, visited Chicago this week. While here Mr. Kramer took occasion to visit some of our growers and gathered some good points on carnations and their culture and incidentally learned something of the size of the city. Mr. Kramer is convinced of the fact that a man may start for the depot in Chicago at four o'clock and not be able to get there in time to catch the six o'clock train.

The Florist Club gave a very creditable musical and literary entertainment Thursday evening at their club rooms. The hall was well filled with gentlemen and ladies in about equal proportion. The room was decorated with wild smilax, roses and carnations. One vase of seedling carnations, contributed by Fred. W. Timme, attracted much attention; there were in the vase about a dozen varieties, all of which were good, and I have no doubt some of the seedlings exhibited will win a name and a place in the market later on. The club quartette, consisting of Chas. W. McKellar, Ed. F. Winterson, E. H. Kissell and Chas. H. Balluff was much in evidence during the entertainment. They were the first and last on the programme. They rendered their part well. The number and heartiness of the encores accorded them showed plainly that their efforts were highly appreciated. For amateurs all did their parts well. But to me, and I think to many others, the best single feature of the entertainment was a part not on the programme. One of the number being absent, Mr. Grant called upon Mr. Flint Kennicot, he having in former years been in the theatrical profession. Mr. Kennicot asked for the privilege of procuring a substitute which being granted, he called upon his daughter Grace, a young miss of about thirteen years. She recited "Shamus O'Brien" in a way that would have done credit to a professional elocutionist.

Cincinnati.

ANNUAL MEETING AND ELECTION OF OFFICERS.—AWARDS MADE.—A NEW CARNATION.—VISITORS.

The annual meeting and election of officers of the Cincinnati Florist Society was held at the club room January 8. The association embraces the growers, storemen, private gardeners and employes of our city parks, and the annual meeting is generally an occasion of much social en-

joyment. The meeting was well attended, twenty-three members being present. Mr. E. G. Gillett was unavoidably absent, and Mr. Ed. Hoffmeister was elected temporary chairman. Secretary Wm. Murphy read his annual report, followed by treasurer B. George. The sum of $694.68 was reported expended, and $690.18 received during the past year, leaving a deficit of $3.50. Messrs. Bartlett and Schwarz were then appointed an auditing committee to examine the books, and reported them O. K. A vote of thanks was tendered the retiring officers for efficient work. The election of officers resulted as follows: President, R. Witterstaetter; vice-president, Albert Sunderbruch, Jr.; secretary, H. Schwarz; treasurer, B. George; and W. Murphy, director.

Mr Theo. Bock, our genial judge, made the following awards during the afternoon: Sunderbruch's Sons carnations, Ruby, Scott, Queen of the West and Daybreak; roses, Brides and Maids, valley, azalea, narcissus and Roman hyacinths. City greenhouses, Pandanus utilis, Araucaria excelsa, Dracæna indivisa, Ficus elastica, Primula obconica, and a collection of ferns. E. G. Hill & Co., for Flora Hill carnation, and a special for the following seedlings: Arbutus, deeper than Daybreak in color, with petals very heavy; the flower is large and full, but not crowded with petals, stem perfect and erect, color irresistible, like the heart of Carnot rose; Painted Lady, a large and well formed flower, held in a strong calyx, stem 18 to 24 inches, and foliage showing no signs of disease; the color is a pure red, resembling that of Wootton rose; Psyche, a decidedly improved H. Keller, color very similar, but with stiffer stem and larger blooms; Prima Donna, an aspirant for favors in 1899. I predict a grand future for this new comer. The flower is very full and rounded and of large size, color a pure true pink, a little brighter than Hermosa rose, with a strong stiff stem and perfect calyx. Thom. Windram for Bridesmaid roses. Wm. Murphy, Daybreak, Portia, Jubilee. Armazindy, Trimmph and Peachblow carnations. George & Allen, Perle roses, Morgans, Beauties and Meteor; Adiantum cuneatum, Harrisii, and a special certificate for best general display. Witterstaetter, as provided under rule 8, special for carnation Opal, new, an improvement on Daybreak, especially in stem; also Evelina, the grandest white of the day. Too much cannot be said of this debutant.

Mr. Anthony Fisher, who has been seriously ill for some time, is reported as slightly improved, and hopes are now entertained for his recovery.

Mr. George Gause, of Richmond, Ind., was a caller this week.

Mr. E. G. Hill attended the show on Saturday last.

Mr. C. R. Rogers, of Chicago, has been with us the past week in the interest of the AMERICAN FLORIST; he speaks well of the Queen City and finds the boys wide awake. H. SCHWARZ

Bursting Carnation Calyxes.

In answer to "Subscriber's" inquiry as to what is the cause of Daybreak, Scott and Portia bursting their calyxes during the months of November and December, I will say that varieties with very thin calyxes if over watered or kept too warm during dark cloudy weather, are very apt to burst their calyxes, and to guard against this it is best to keep them a little on the dry side rather than too wet during such weather, and have a little steam running through the house, regulating the temperature, with the ventilators so arranged as to insure a pure and dry atmosphere. C. W. JOHNSON.

SITUATIONS, WANTS, FOR SALE.

Advertisements under this head will be inserted at the rate of 10 cents a line (seven words) each insertion. Cash must accompany order. Plant advs. not admitted under this head.

Every paid subscriber to the AMERICAN FLORIST for the year 1898 will receive on request, a coupon for one five line want "adv." free, to be used at any time during the year.

Buffalo.

PRICES TAKE A DROP.—BUSINESS RATHER QUIET.—CONTRACT AWARDED FOR NEW PARK CONSERVATORIES.—PERSONAL ITEMS.

We have had a few days of bright sunny weather and the plants under glass show the effect of the late dark days by promptly wilting. The sun, however, has had a good effect on carnations, violets, etc., which are now opening more freely. Prices have taken a drop and business is rather quiet, save for rather more funeral work than usual.

On Tuesday the Park Commission decided to award the contract for the new conservatories to Hitchings & Co., of New York City. The amount available at this time, for the work is about $100,000. This is not sufficient to complete the work as designed, but will be enough to build all but four of the houses. It is hoped that the additional amount needed may be provided the coming spring.

The plans, which were made by Lord & Burnham, provide for a range of nineteen houses, of which eleven are to be exhibition houses and six houses especially designed for growing young stuff.

The main front, which faces the main entrance to the garden, will be 330 feet, and consists of five houses, a central house 80 feet in diameter and 64 feet high. This is connected by curtains 75x35 feet to two houses each 50 feet square. From these square houses extending backward, and at right angles, are two houses 100 feet long by 25 wide. Turning another angle, at either end of these, are two houses one 60x40 feet and one 75x25 feet. These houses form, as will be seen, a quadrangle, in which are placed the boiler house and the propagating houses. The entrance is through a very handsome vestibule with offices and other necessary rooms on each side. Some rather unique features have been designed at the request of the directors which will be spoken of at a later time. The foundations and cut stone will be limestone from the local quarries. Heated with hot water.

It is reported that Wm. McMillan, late park superintendent, will make a visit to Scotland after an absence of about forty years. The daily papers speak of his having accepted the position of superintendent of the Pittsburgh, Pa., parks. What there is in the rumor I know not.

Mr. John L. Brothers, for some years auditor of the department, has been appointed temporary superintendent of the parks in Mr. McMillan's place.

I met Mr. Fred. Lewis, of Lockport, on the street the other day and he was smiling the satisfied smile of a man who has been producing good violets lately. C.

Obituary.

Kwai Pahn Lee, of the firm of Henry & Lee, Chinese and Japanese bulb importers of New York city, died of appendicitis at his home in Yonkers on Sunday, aged 41 years.

Mr. Lee was a native of Canton, China. He came to America in 1878 and entered the Free Academy at Norwich, Conn., to complete his education. He afterwards graduated in 1881 and entered Yale University, but was recalled by his government before completing his course. On returning to this country he entered the Lehigh University. After completing his studies there he was a member of the Chinese Legation at Washington for several years, but was forced to resign his position on account of ill health. For his services he was knighted by the Chinese government but never used his title. He afterwards entered into the Chinese and Japanese bulb business in connection with Mr. Henry.

Mr. Lee was a gentleman of great refinement and had a natural aptitude for study, in which he distinguished himself at the Free Academy and at the colleges; was also greatly interested in athletics and while at college was a prominent base ball player. Mr. Lee had a large acquaintance among the wholesale houses in this country, by whom he will be greatly missed.

A widow survives him and it is understood she will continue his interest in the firm of Henry & Lee.

Toronto.

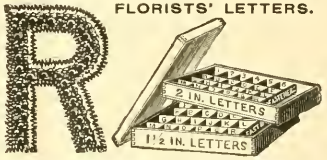
King street, Toronto now possesses what might almost be called the model retail florist establishment. Tidy has just moved into his new place, one block farther west, where he, no doubt, will be prepared to hold up his end as "Tidy, the Florist," which proud title has been his boast since about the period of his emancipation from the chrysalis of knee-breeches. More power to his arm, and may his shadow never grow less.

Passing along the dollar side of King street, pedestrians can look through a neat, tidy, little shop into a fine conservatory giving a glimpse of a section of tropical scenery, while the sleigh bells jingle at their backs and Jack Frost riding on the wings of rude Boreas, nips their ears and noses. Let us hope that the temptation offered may be irresistible, and that many shekels may be gathered in by "Tidy, the Florist."

Carnations are evidently the coming favorite flower for house decoration, and are none too plentiful at present; they are frequently very difficult to get. People refuse to take roses as a substitute, even at a reduced price. Carnations they want and carnations they will have. Sometimes persons wanting a dozen or two carnations for a small table, and not being able to get the color or variety they wish, buy a small plant of cyclamen, primula or fern, as a substitute, rather than roses, which they say "fade too quickly" or are "too dear"

Would it not be worth while to consider the question of regulating the prices of roses and carnations, as compared with each other, grading carnations upward and roses downward, so as to regulate the profit on the growing of the two. It seems to be pretty generally conceded that of the two, roses pay much the better on the average. Therefore if we can grow carnations profitably at present prices, we could grow roses cheaper, provided the market could be made to absorb the whole product. There is no doubt as to carnations of first-class quality being susceptible of a slight increase over the price at which they are sold to-day.

The weather at present is delightful and bright, with temperature just about freezing point. If we would give a report of the weather, that we shall have a week hence, would it not be much more interesting than a report of what it was a week ago? It has always seemed to the writer that a report of the weather a week old is just about as interesting as roses of the same date. TORONTO.



And the Nashville Papers Do It Too.

A story is told by a florist, of the society editor's description of a recent social function. Said florist had sold to the hostess eight American Beauty roses, which were placed in the center of the refreshment table. In the account of the affair the society editor mentioned that the "decorations were American Beauties" and in the resume of society's doings in the Sunday issue, the "home was profusely decorated with American Beauties." And there were only eight roses there!

DULL WEATHER AND SLOW TRADE.—CLUB NOTES. — PERSONAL. — BOWLING CLUB SCORES.

The week opened with dark, gloomy and rainy weather for the first three or four days and trade suffered to a great extent, the downtown florists especially complaining. If it were not that the dealers had plenty of decorations, weddings, etc., to work on, it would have been one of the dullest weeks of the season. Receipts are increasing and prices are very low for this season of the year. During the latter part of the week the weather was good and the fine warm days with sunshine that we have had will stock up this market and we will have to look for still lower prices for the coming week.

American Beauties are arriving in better quality, and while prices have dropped somewhat they are still sought for by the trade; Kaiserins, Brides and Maids are plentiful and of good quality; Meteors are still scarce in this market and the demand for them has been big; Carnots are arriving in very light quantity and generally in poor shape; Perles are in good demand, with receipts very light; Woottons are more plentiful and are looking better; La France still continues to be scarce.

California violets have arrived more plentiful during the last week, and our home growers all say that their blooms are now coming out in good style. While the price has dropped considerably, it will still continue to be the seller in this market among violets. Double violets are neglected. Single violets are very much cheaper and with the advent of southern stock we look for cheaper violets for the rest of the month.

Harrisii lilies are coming in plentiful; Calla lilies have been scarce; Romans and narcissus have been neglected; smilax is more plentiful.

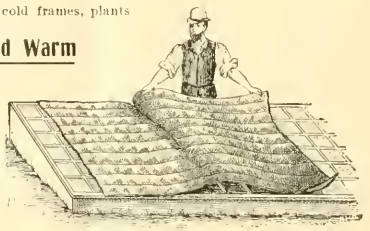
The regular meeting of the members of the St. Louis Florist Club was held at Odd Fellows Hall on Thursday. The attendance was one of the best for a long time. Papers were read by Messrs. J. F. Amann, of Edwardsville; Wm. C. Young, J. J. Beneke, Wm. Trillow, of Belleville; A. Meyer, Sr., R. F. Tesson and Frank Fillmore. There was no date set for the annual smoker and same was left in charge of a committee. The debate on the admission of a new member was very spirited. Altogether the meeting was lively and interesting.

Ostertag Bros. have been kept hustling this week with some big decorations. You can always count on Henry when there are any big decorations in sight.

Eggeling, the South Grand avenue florist, who caters to the best trade in town, reports business very good.

The Bowling Club last Monday inaugurated a series of cocked hat games and all the boys were glad of a change, and from the scores made the first night at that game, already think of sending a challenge to any florist club in the country. Carl Beyer was high man for three games, 134; Beneke, second, 123; Fillmore, third, 114; high single score, Fillmore, 45; Weber, 44; Beneke, 41.

A. J. B.



WACO, TEXAS.—The organization of the Texas State Floral Society was completed on January 5. Mr. J. W. Barnett is the president and Mrs. Louis Crow, secretary.

Palmer's Hot Bed Mats

FROST PROOF

Made expressly for winter covering of hotbeds, cold frames, plants and seeds of all kinds.

Indestructible, Cheap and Warm

WILL not harbor mice or vermin. Easily handled. Dry out quickly after rain. Have now been in practical use three years. Cost less than old-fashioned straw mats and entirely take their place.

MADE IN FOLLOWING GRADES:

No. 1—**Burlap Cloth**, filled with combination wool and quilted, seams 3 inches apart and edges firmly bound.

Size 40x76 inches, 50 cents each.
" 76x76 " 75 " "

Made any length, 76 inches wide, at 12 cents per running foot.

No. 2—**Duck Cloth** outside, filled and quilted same as No. 1.

Size 40x76 inches, $0.75 each.
" 76x76 " 1.00 "

Made any length, 76 inches wide, at 16 cents per running foot.

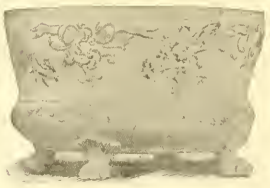
No. 3—**Waterproof**, made of oil duck, filled and quilted same as Nos. 1 and 2.

Size 40x76 inches, $1.00 each.
" 76x76 " 1.25 "

Made any length, 76 inches wide, at 20 cents per running foot.

That these mats are a **much needed improvement** over anything heretofore used for the same purpose, is demonstrated by the large demand and many testimonials from prominent men in the trade. Everyone using Hot Bed Mats should give them a trial.

PATENT APPLIED FOR.



WE ALSO MAKE **QUILTED HORSE BLANKETS** the Cheapest, Warmest and Strongest in the World....

FALL CATALOGUE NOW READY.

THE SEED TRADE.

AMERICAN SEED TRADE ASSOCIATION.

JEROME B. RICE, Pres.; E. B. CLARK, 1st Vice-Pres.; S. F. WILLARD, Wethersfield, Conn., Sec'y and Treas.

THE early orders from the first seed and plant catalogues which are usually mailed soon after December 15, are at this date eagerly scanned for indications of the trend of trade for the coming year. Of course the early catalogues have been mailed to the southern states, and the comparisons can not yet cover the whole country but so far as they go, we give a few comments. W. H. Maule, Philadelphia finds the new orders (mainly Texas business) from 25% to 50% larger in size individually and an equal percentage of increase in volume.

Jno. Lewis Childs, of Floral Park, whose showy ten ounce (5 cents postage) catalogue is more largely devoted to plants, finds 1898 trade so far about the same as last year.

J. R. Fuller & Co. of the same place report their first ten days advertising results very encouraging.

W. Atlee Burpee & Co., of Philadelphia, report business for the same date no better than last year.

W. C. Barry, of Ellwanger & Barry is pleased with a 30% increase in volume of trade received through their agents.

The work of these travelers coming as it does from personal solicitation with the horticultural buying public seems to us an encouraging incident of the 1898 prospects.

NEW YORK.—It is reported that owing to rebuilding operations at 15 John street, Messrs. J. M. Thorburn & Co. have taken the building at No. 36 Cortlandt street, which will be entirely remodeled with a new and imposing retail front.

NEW YORK.—Friday, January 21, has been decided upon for the meeting of the executive committee of the American Seed Trade Association. It will be held at the Park Avenue Hotel, beginning at 10:30 a. m.

The State Florists' Association of Indiana.

The 12th annual meeting of this association will be held at the Agricultural rooms, State Capital, Thursday, January 20. There will be an exhibition of roses, carnations and other cut blooms, blooming plants, begonias, ferns, palms and other plants. Certificates of merit will be awarded to well-grown blooms and plants. Vases furnished by association. The exhibition will be open to the public from 2 to 6 p. m.

J. S. STEWART, President.
R. A. MCKEAND, Secretary.

Pittsburg.

TRADE STEADY AND FAIRLY GOOD.—MEETING OF THE PITTSBURG AND ALLEGHENY FLORISTS' AND GARDENERS' CLUB.—INTERESTING MEETING OF THE BOTANICAL SOCIETY OF WESTERN PENNSYLVANIA.

Trade is recovering somewhat from the lull after the holiday rush and is now what may be termed fairly good. The florists have figured up their Christmas business which was with the exception of the tree business, the best Christmas trade they have had for several years. The tree trade (in Allegheny especially) falling off a little from that of the year before. All in the business are congratulating themselves, that the big snow storm of December 31, did not occur on the 24th, else there would have been much more trouble and expense. The entire street car system was tied up, and delivery of orders was completely paralyzed from about noon until the next day, New Year's.

The Pittsburg and Allegheny Florists' and Gardeners' Club met on the 13th inst. Nomination of officers for this year being the most important business on hand, the election taking place two weeks later.

The Botanical Society of Western Pennsylvania held its regular monthly meeting at their rooms in Pittsburg, Carnegie Library building, Schenley Park, on Thursday evening, January 6, at which quite a number of new members were admitted. The interest in this society is growing wonderfully, the attendance on this night, one of the most inclement of the season, being very good evidence of that fact; if it had been at all decent weather, the room would have been uncomfortably filled. The papers and subjects presented for consideration and discussion were very interesting and instructive.

The executive committee of the society reported through Superintendent Wm. Falconer that they had arranged for subjects for the entire year at each monthly meeting which will cover a large variety, and be of equal interest to any that have preceded them, the next subject will be medicinal plants by Dr. Koenig, every lecture or address will be supplied with all necessary specimens required. The idea of the society is to make botany popular and cultivate a love for the beautiful and useful in floriculture, etc., and to that end the fee has been reduced to $1 and these meetings arranged for, which are entirely free and open to the public.

The wisdom of such a departure is being shown by the greatly increased membership and attention. The florists will most certainly reap a great benefit in the end, and it is hoped they will all lend a helping hand to the society. It is impossible, for want of space, to give a list of all specimens shown, there were over three hundred all correctly labeled and tabbed. Mr. John A. Shafer, curator of the society, afforded valuable assistance in putting the exhibit in proper shape for showing it in regular order. He is very busy arranging the herbarium of the society, which when completed will be one of the finest in the country. REGIA.

READING, PA.—The establishment of John G. Brown, at 121-123 South 5th street, has been closed by the sheriff on an execution in favor of Milton H. Schnader.

THE FLOWER MARKET.—NEW STORE.—LEGAL ACTION.—ACCIDENT TO MR LYNCH.—PERSONAL MENTION.—SEED TRADE NOTES.

Business has been rather quiet in this city since the holidays and prices on many articles have dropped considerably. New Year's trade was fully up to expectations and everybody did a good business, and consequently are satisfied. There has been a very strong demand for carnations during the past week. The stock was not plentiful and very good prices ruled. Roses are about the same as when last noted with the possible exception that some have had a slight drop in price. Brides and Bridesmaids are now bringing 75 cents and $1 per dozen, the same quality of stock brought $1.50 last week; Beauties are selling very well and are bringing fine prices; Testout is rather scarce but of good quality; Perles and Meteors can also be had, but are not holding up in price as was expected. Carnations are of fine quality and are bringing 35 cents per dozen. Flora Hill seems to be the best white to be had, but we cannot get one-half enough to supply the demand. This kind is going to be extensively planted this summer, so we may expect something fine next season. Violets are coming on a little better than for some time past. The chief fault we have with them is that they are very short stemmed and sometimes very pale in color on account of the frosts. Californias and Princess of Wales are still scarce and selling rapidly at good figures. Marie Louise is of poor quality; few, if any, Swanley Whites are to be seen. The same may be said of the Czar. Smilax is in good demand and the quality of the stuff is excellent.

Mr. Chas. P. Braslan, of Chicago, who has been here for a few days on a business trip, departed last night for home. Mr. Braslan reports trade as booming.

Messrs. R. S. Bates & Co. have opened a store at 13 South San Joaquin street, Stockton, with a branch store at the corner of Park and Sutter streets.

M. Lynch, of Menlo Park was injured while hunting in the Coast Range mountains last week.

F. Pelicano & Co. had a $1,000 decoration during the week for the Tevis ball. The decorations were very elaborate consisting chiefly of carnations.

Mr. M. Dooley has accepted a position with E. W. Hopkins, at Menlo Park.

Mr. Thos. Stevenson at 11 Powell street suffered a very severe loss last night in having his handsome store under the Columbia Theatre completely gutted by fire.

The recent rains which we have just experienced will prove of great benefit to the seed growers. Nearly all growing crops of vegetable and flower seeds were badly in need of rain. Onion planting is progressing slowly. This is chiefly due to the great difficulty in getting bulbs to plant. The fortunate growers who contracted ahead for their supply are jubilant, while their less fortunate neighbors who depended upon getting their stock when the bulbs were ready, found that they could not pay from $2 to $2.75 per sack for bulbs to plant for seed, consequently the acreage is very small this year compared with previous years.

METEOR.

Syracuse, N. Y.

The Charity Ball which occurred on the 5th inst. was held in the Alhambra, which is a very large and spacious building making an elaborate decoration a very costly affair. Owing to the nature of the ball the appropriation was not very large for the decoration, still it was apparent a very pleasing piece of work could be done at the figure. Norway spruce 10 to 12 feet high were used extensively with grand effect. The galleries were draped with festoons of evergreens, relieved with holly wreaths, while the stage and orchestra were grouped with palms, together with the arc lights being heavily draped with smilax, gave the whole affair the appearance of a seasonable holiday function. As predicted the event called for an extra amount of choice flowers, Beauty roses and violets being the favorites.

Owing to the continued mild and bright weather, flowers of all kinds are plentiful, violets coming in in greater numbers every day, which are selling well. An extra call for funeral work has let but few flowers go to waste.

The first monthly meeting of the Central New York Horticultural Society for 1898 was held last Saturday evening, the principal business was President S. T Betts' address in relation to what should be done the coming year.

ALPHA.

NEWARK, O.—Geo. W. Penny, florist, died January 4 at the family residence in the East End.

EVELINA

at the present time is a mass of bud and bloom. Xmas week a house 16x80 produced 1000 flowers which sold readily at $6.00 per 100, and will continue to produce same number per week for some time to come.

EVERY FLORIST

who has seen it, without exception, will try this sterling variety another season, and it is claimed by everyone who has become acquainted with Evelina to be the most prolific bloomer in commerce and first-class in every respect, and predict for it a grand future.

THE HIGH ESTEEM

in which Evelina is held by the Cincinnati growers is shown by the fact that I have already booked orders for over 7000.

EVELINA

is a pure white, of large size, good form and substance; an extraordinary strong calyx; is fragrant and borne on long stiff stems that always carry the bloom erect; it is an extra free, early and continuous bloomer; is of good habit; a strong, free and healthy grower. Last year quite a number of plants produced from 30 to 50 flowers by the first of January. She won the Ward Cup for best commercial white at the Cincinnati meeting of the American Carnation Society; also a certificate of merit at the Indianapolis and Chrysanthemum shows. Orders now booked and filled strictly in rotation for strong, well rooted cuttings at

$10.00 per 100. $45.00 per 500. $80.00 per 1000.
50 at 100 rate. 250 at 500 rate. 500 at 1000 rate.
Cash or satisfactory reference, please.

R. WITTERSTAETTER, Sedamsville, Ohio.

St. Paul.

TRADE EXCEPTIONALLY GOOD.—DELIGHTFUL WINTER WEATHER.—PERSONAL NOTES.

New Year's trade in this city was exceptionally good, not that a large quantity of flowers was disposed of January 1, 1898, but the aggregate of sales from Wednesday to Saturday was very satisfactory. Shipping trade was good, and several large city decorations for receptions, etc., helped swell the volume of trade, while the annual charity ball, and its attendant demand for flowers, rounded up a week of the best business on record.

Since the first, funeral work, shipping trade, a few social functions, an occasional wedding and other calls for flowers have kept the most of us on the jump. Surely the year starts in auspiciously.

As most stock is now "off crop" the quantity brought in is hardly equal to the demand. White flowers are particularly scarce, as well as yellow roses. Red roses and carnations are in good demand, with the supply rather short.

L. L. May & Co. have commenced cutting some single Von Sion which are very pretty and attractive and sell readily. Valleys, Harrisii, Paper White and Romans are all in good demand for weddings and funeral work.

We have had and are now enjoying the most delightful winter weather on record. The days are warm and cloudless, with the thermometer ranging from 40° to 60° above zero. Coal men have long, dejected features while the florists are proportionately happy. Snow is all gone and plants in open wagons are delivered without wrapping. Think of this, ye dwellers of Philadelphia, New York, Boston and Buffalo, and come to the great Northwest above the blizzard line.

Henry Krinke displays as fine a lot of blooming plants as we have seen in a long time. Primroses, cyclamen, azaleas, etc., abound in great profusion and are done to the queen's taste. Henry always manages to have a nice display of good plants when other places are barren.

Vogt Bros. have discontinued their store on West Third street.

W. G. Bunde, with J. C. Vaughan, is in town for a few weeks. He reports a very gratifying trade here in his home city.

FELIX.

Cleveland.

Business since the holidays has been very good with nearly all the florists, as society has been putting its best foot foremost in the matter of balls, receptions and "blowouts" of all descriptions, and as a natural consequence flowers have been none too plentiful. Carnations continue rather scarce, a condition that appears to have been chronic nearly all the season so far. It does seem as though carnations in general are not blooming as freely as in other years. Roses have been good and not in over supply, although it is likely, that with a crop just about coming on with most growers the situation will ease off slightly. Violets are in pretty good supply and are of good quality, selling about as usual. The demand for these is usually fairly steady and few are wasted.

Bulb stock of the Dutch sorts does not show up to any extent as yet. At least not sufficiently to be considered as a factor in affecting the demand for other flowers. A few tulips (Proserpine) is about all that are to be seen. The flowers are very good, but the stems are still very short.

Miss Eadie leaves town in a day or two. She goes to Tampa, Fla., and may be gone for six weeks or two months. A.

Death of Lily Dean.

On Monday, January 3, 1898, at her home, Lily Dean, third daughter of Mr. and Mrs. James Dean, died of consumption after a lingering illness. She was indeed a lily, and up to within a short time even before her death, always had a bright cheerful smile for every one she knew. A more devoted loving daughter could not be found in the broad land.

The funeral services were held at the Reformed Church, 52d street and 3d avenue, Brooklyn, on Wednesday, the 5th. The floral tributes from a wide circle of loving friends were very numerous; many of the pieces were exceedingly chaste, and the entire church was filled with the many friends who assembled there as a token of respect and sincere sympathy to her parents in their sad bereavement. The interment was in Greenwood Cemetery.

GRAND RAPIDS, MICH.—The Florists' Club has decided not to have a chrysanthemum show this year. The election of officers of the club resulted as follows: President, N. B. Stover; vice-president, G. F. Crabb; secretary, Alfred Hannah; treasurer, H. Van Velden.

CHAS. T. DARLING, Stony Brook, L. I., N. Y.

Rochester, N. Y.

Pleasant and mild weather prevailed during the past week. The agreeable weather conditions had a beneficial effect on trade perhaps, for sales over the counter were better than usual at this time of the year, and otherwise the demand was also rather brisk, so that the supply of flowers could be cleared up regularly every day. Not too much stuff is coming into this market, although in some lines the scarcity was not so apparent as in the preceding week.

Carnations are perhaps more plenty than any other stock, but by no means too abundant; roses and violets remain decidedly scarce, but an improvement in quality is noticed everywhere.

Prices have not changed materially since last report, growers are satisfied with them, excepting perhaps with the rather low figures on mignonette, which does not bring more than $3 per 100, and they claim that this is an entirely inadequate compensation for the work bestowed upon each individual spike, I believe they are not unreasonable in their claims and they ought to get more for them, but on the other side the storemen say that their customers will not take them at a higher price, so there is no help for it at present.

Immediately after the holidays we generally experience a lull in the cut flower business, but this year the Rochester florist had no reason to complain in this respect up to date, whether these favorable conditions will continue for any length of time is a matter of doubt with many, while others are inclined to think that the improvement will be lasting. J. B. K.

Election of Officers of the Florists' Insurance Association.

The Board of Directors have elected the following officers for the first year: President, J. G. Esler, Saddle River, N. J.; vice-president, M. A. Patten, Tewkesberry, Mass.; treasurer, E. H. Michel, St. Louis, Mo. The secretary, W. J. Vesey, Ft. Wayne, Ind., was elected at a previous meeting when the board of directors were chosen. The Association is now ready to do business and desire that all applications be forwarded at once.

In regard to steam pipes in contact with wood, there is not the slightest danger in the greenhouses where everything is moist and the pipes are partially cooled, but, in the boiler room where everything is dry as tinder it is certainly dangerous to have wood heated near the igniting point. Hence the pipes here should be properly air spaced or insulated, at least near the boiler. The importance of this was shown in the recent fire in the Reinberg houses. W. J. VESEY.

W. P. SIMMONS & CO.

Make the following statement to the readers of the American Florist

As originators and introducers of
"Silver Spray,"
"Tidal Wave,"
"Daybreak,"
and "Rose Queen,"

each of which has, we believe, proven even better than we claimed for them. We NOW say for 1898 that

"Mrs. S. A. Northway"

possesses all the good points that go to make up a **first-class** and **profitable** cut flower sort, and that we introduce it with even more confidence than we did the others.

It is an extra strong grower.
It is free from rust or disease.
It is a profuse bloomer.
It has exceedingly strong stiff stems.
It is of exquisite form full and double.
The flower is high built, petals serrated.
The calyx does not burst.
It is delightfully fragrant (a quality lacking in many new ones.)

OUR PRICE LIST now ready, contains prices on many other plants. SEND FOR IT.

W. P. SIMMONS & CO., Geneva, Ohio.

FIREFLY

C. F. BAKER, Utica, N. Y.

Carnation Rust.

ED. AM. FLORIST.—Will you kindly let us know through your columns what should be done with rust on Silver Spray carnations? W.

It has been the general experience of the best growers that little can be done to help rust-infested carnations, beyond removing the diseased leaves and keeping the foliage dry, together with careful attention to every minute detail of skillful cultivation. Keeping the pipes well painted with sulphur wash, as in rose-houses is advisable. Under these conditions rust frequently disappears almost entirely. Varieties very susceptible to rust when grown in the ordinary way, are often almost free from it when grown under glass through the summer.

Much of the stock of Silver Spray has been so weakened by bad methods of propagation that it is very susceptible to disease. B.

AURORA, ILL.—Peter Freeman of the firm of Freeman Brothers, the North Lake street florists, has purchased the floral stock belonging to Frank Haywood of Cedar street. Mr. Freeman will rent the Haywood greenhouses and start in business alone.

THE MORRIS FLORAL CO.
MORRIS, ILL.

The Horticultural Society of Chicago.

The annual meeting of the Horticultural Society of Chicago was held Saturday, January 8. The old officers were re-elected except that Mr. Harry G Selfridge was made second vice-president. President Chadwick and Secretary Egan, who have done so much for the society in the past, will thus still be at the helm.

The treasurer's report showed a large increase in the funds on hand and exceedingly satisfactory results from the last fall exhibition.

Forty-seven new members were admitted, among whom were the following well known florists: E. G. Hill, Richmond, Ind., Fred. Dorner, Lafayette, Ind., John T. Muir, Emil Buettner, Anthon Then, G. H. Peiser, Thos. Wallis and John C. Ure.

Santa Cruz, Cal.

At the annual meeting of the Santa Cruz Floral Society, held January 3, the following officers were elected: President, Mrs. H. C. Cooper; vice-president, Mrs. Krugar; secretary, Dr. J. P. Parker; treasurer, E. Leedham; botanist, Dr. Anderson.

There have been a few light frosts, but they have done no serious damage.

Thomas Thompson did a good Christmas business in carnations, which he grows to perfection; also in Paper White narcissus, grown outside, some thousands of which he sent to San Francisco.

BULB.

ORANGE, N. J.—The annual dinner of the New Jersey Floricultural Society was held on the evening of Monday, January 10. About thirty-five gentlemen participated, and it was a very enjoyable affair all through, lasting until 1:30 a. m. President Malcolm MacKorie sat at the head of the table and all the other officers were present. Speeches were made by Dr. Kitchen on "Our Ladies," Dr. Dodge on "What has Science done for Horticulture," A. Herrington on "Our Sister Societies," W. A. Manda on "Floricultural Progress during the past ten years," H. Bird on "The Importance of Little Things;" W. Duckham on "The Private Gardener" and J. Withers on "The Horticultural Press;" George Smith and others contributed entertaining songs.

GERMANTOWN, PA.—Monday, January 10, at the annual meeting of the Germantown Horticultural Society the following officers were elected to serve for 1898: President, Edward Neville; vice-presidents, Charles J. Wister, Albert Woltemate and Robert Le Boutillier; secretary and treasurer, George Redles, Jr.

The Wm. H. Moon Co.

Among Chicago Growers.

There are several cut flower stores in Chicago conducted by ladies, and quite a number of retail florists employ young ladies as assistants; but to Mrs. C. A. Foote, of Downer's Grove belongs the honor of being the only lady in this vicinity who carries on the business of wholesale rose growing, and if the appearance of the place is any criterion, she manages it very successfully. Mrs. Foote has a large establishment devoted mainly to growing Brides, Bridesmaids, Meteors and Perles for the cut flower market. The Perles are very good, making just now a strong healthy growth with plenty of flowers and very few bullheads, and the Brides and Bridesmaids are very much above the average in health and vigor. Meteor appears to be a favorite with Mrs. Foote, and some of the very best blooms of this variety shipped to the Chicago market during the present season were grown here. The foreman, Mr. J. Goolen, is right up-to-date with Meteors, and they are seldom seen in better shape than he contrives to have them.

The greenhouses formerly owned by D. B. Fuller, and rented last spring by the Hinsdale Rose Company, have been put in first-class condition. With the exception of one filled with Harrisii and longiflorum lilies, all the houses are devoted to carnations, and the varieties grown include McGowan, Silver Spray, Ivory, Scott, Albertini, Bridesmaid, Daybreak, Tidal Wave, Fred. Dorner, Lizzie Gilbert, Rose Queen and Helen Keller. The McGowans are good; Silver Spray a back number; Ivory good; Scott excellent. A house of Daybreaks are very good, the clean and healthy plants bearing a heavy crop of well colored flowers. But of the dozen or more varieties grown here, Rose Queen must be selected as the leader, and it must be said that we have never seen this variety in better condition. Rose Queen has been discarded by many Chicago growers on account of the poor showing it made last season. With some of our best growers the calyxes burst so frequently and the flowers were of such poor quality in other respects as to be absolutely worthless. But there are several hundreds of flowers and buds of this variety in one house here, and not one of them shows a trace of split calyx. The color of the flowers is magnificent, and the foreman, Mr. Fred Jones, is highly pleased with his Queens, as indeed he has ample reason to be. The Helen Keller plants are making a strong growth, producing an abundance of flowers which only partially open and wither on their stems. As none of the flowers develop fully, Mr. Jones has become disgusted with Keller and is turning it out to make room for young stock. The Hinsdale Rose Co. have here ten acres of ground which is in an ideal situation for greenhouses. The place is within one-fourth of a mile of the station, and the ground has a natural rise of about twelve feet to the hundred from the south to the north. The scarcity of water is a great drawback, but it is expected that the city water will be installed next summer.

On the opposite side of town from the Fuller greenhouses is located A. H. Saxon, who for a number of years was gardener to W. H. Rand, Esq. This place consists of four houses devoted to violets, carnations and pansies, but Mr. Saxon has been in poor health for a year or more and his many Chicago friends in the trade will now be glad to learn that he is somewhat better. J. T. A.

JOHN N. MAY'S NEW CHRYSANTHEMUMS
FOR 1898

ALICE F. CAREY (Carey). A beautiful light shade of pink, reflex, having excellent keeping qualities with extra good foliage and stem. A grand commercial flower. Season, middle of November. Average, 3½ feet; terminal buds. Certificate C. S. A. 40 cents each; $3.50 per doz.; $25.00 per 100.

CHEMPWEC. Clear bright yellow, sport from Silver Cloud. Large flower with good stiff stem and foliage well up to the flower. An extra good shipping commercial variety of good vigorous constitution. In season 1st to 15th of November. 3½ to 4 feet; crown or terminal buds. 40 cents each; $3.50 per doz.; $25.00 per 100.

DOLORES. 84 points. A massive incurved deep yellow with broad petals of the largest size, with exceedingly stiff stem and foliage close up to the flower. One of the best and strongest growers we ever raised. 4½ feet. This is a late variety not fit to cut before the 20th to 25th of November; crown or terminal buds. 40 cents each; $3.50 per doz.; $25.00 per 100.

MINNEWASKA. 81 points. Bold heavy flower almost globular in form; straight and strap petals of a distinct shade of deep pink. As a late exhibition variety this will prove very valuable; also a good pot variety. 3 feet. 40 cents each; $3.50 per doz.; $25.00 per 100.

MISS GLADYS VANDERBILT. Certificated, 92 points. Pearl white with lemon shaded center; an exceedingly fine thing and a decided novelty both in form and general build, and an extra good commercial or exhibition flower. In season 1st to 15th of November; crown or terminal buds; 3½ to 4 feet. 50 cents each; $3.50 per doz.; $25.00 per 100.

ROBERT G. CAREY (Carey). A very beautiful globular incurved white of good substance and good keeping qualities. An extra fine exhibition or commercial variety. Will be a standard variety for all purposes. 4½ feet. Best on terminal buds. In season 15th to 20th November. Certificate C. S. A. Very valuable as a late white of good form. 40 cents each; $3.50 per doz.; $25.00 per 100.

SPOTSWOOD (Carey). A beautiful high built incurved light yellow, somewhat in the style of Bonnaffon. This variety will certainly make a reputation for itself both as an exhibition and commercial flower. An extra good keeper; very valuable to succeed Bonnaffon as a late yellow. 4 feet; crown or terminal buds. Certificate C. S. A. 40 cents each; $3.50 per doz.; $25.00 per 100.

Good strong plants ready March 1st, 1898. Also all the new varieties of other raisers.

JOHN N. MAY, Summit, New Jersey.

CORRECTION CORRECTION

What does it mean

when the temperature of your greenhouse goes too low? You may answer this question from your own experience, but if you want to avoid such a misfortune, get a **thermostat**, or tell-tale. This can be placed in the greenhouse and the bell in sleeping room, or any other place, and may be depended upon to ring the bell should the temperature fall below the required degree. The thermostat may be adjusted to ring bell if temperature is too high. Price complete, Thermostat, bell, battery and wire, **$5.00.**

THE CONARD & JONES CO.
WEST GROVE, PA.

It will be better for everybody if you mention the American Florist when writing advertisers on this page.

Worcester, Mass.

At last we are having clear, bright weather, and in consequence we are getting plenty of flowers that are of fine quality.

In roses we are getting fine Brides, Maids, Perles and Gontiers and the demand, which is up to the ordinary, just about uses up the supply.

Violets are good and more plentiful than ever before, and are selling well at $2 per hundred retail; a few good Princess de Galles are coming in and sell better than the doubles.

Carnations are as popular as ever and the quality is fully up to the standard. Scott is now coming in its old-time form, and Breaks were never better. Albertinis are exceptionally good and are bringing good prices, and the same can be said of Eldorado; in white, Storm King is the leader. Of the new varieties tried here this season Victor and Nivea are easily the best. C. A. Dana is improving very much, and a small bench of Maud Dean, at Lange's, are doing finely, and sell at sight. Harrison's White proved a disappointment; plants are strong and healthy, but so far have not averaged two blooms per plant.

Valley is plentiful now and we are getting some fine freesia; antirrhinum in white, yellow and pink is coming in in small lots and sells readily at $1.50 per dozen; Harrisii is a regular thing since Christmas and is moving fairly well.

Trade is holding up well after the holidays and from appearances now will hold steady during the season; prices are about the regular thing.

The writer took a run to Shrewsbury a short while ago to visit H. A. Cook's establishment, and as usual found everything as neat as wax, and the carnations looking much pleased with their quarters. Mr. Cook grows Scott and Daybreak, but most of his place is planted with Nivea, and it certainly looks grand; his new house containing some 5,000 Nivea is a sight to behold, and worth traveling a good way to see. His seedling No. 1, a light pink, much the color of Mrs. James Dean, and of stronger habit than Nivea, is a grand thing and will probably prove a decided acquisition.

C. D. Thayer, who has been quite ill, is convalescent.

Potter & Cousins have discontinued their Main street stand. A. H. L.

Cypripediums and Coelogyne Failing to Bloom Properly.

J. M. H. says: "My Cypripedium insigne plants do not bloom very well and I have also a plant of Coelogyne cristata in a 7-inch pot which does not give many flowers and those do not last long after cutting. What information can you give me about these plants?"

Ans. We find that Cypripedium insigne does well under the following treatment: For an old plant first take a hammer and break the pot, disturbing the roots as little as possible, for they love to cling to the pot and pot-sherds, then wash away carefully all (so-called) peat, etc., in clean water and re-pot in fresh broken pot-sherds, with an occasional lump of hard-wood charcoal, to within two inches of the top of the pot. Surface it over one-half inch thick with the tops of sphagnum, alive and green if possible, if not, use dry moss until you can get green.

We put our Cypripedium insigne out of doors in a partially shaded spot June 1 to September 1 and always deluge them with water from the hose, excepting as they start to flower, when we stand them away from the light that they may throw their flowers on as long stems as possible. When buds are swelling we move them well to the light, close to the glass to get fine flowers with strong full color.

Those plants destined to flower early must be grown under glass all summer, but returns are best from out of door plants. Weak liquid manure once a week through the summer is beneficial to a marked degree.

Coelogyne cristata should never be disturbed at the root, as such treatment is extremely repugnant to them, but should the bulbs begin to push over the sides of the pot, carefully break the pot and just as carefully take a syringe and wash away all potting material which seems to be in bad order and then re-pot into a larger pot giving good drainage, using sphagnum moss with fern-roots from which the dirt has been well shaken out, mixed with coarse sand or fine gravel, some pot-sherds and now and then a lump of charcoal. Set the plant so that the center will be the highest.

We grow our plants out of doors June 1 to September 1, and when brought in, some are put in a cool, some in an intermediate and some in a warmer temperature, thus prolonging the blooming season. They are always watered freely, except for six weeks after blooming, during which time they are kept on the dry side. They get weak liquid manure every five days during the growing season until the flower stems begin to push when it is withheld.

Cut the sprays of flowers always at dusk; put the stems in cold water and set in a cool place until morning, and they will last nicely, unless they have been left on the plant until ready to collapse. Few things are more beautiful than this chaste and elegant white flower in sprays, and with us they bloom profusely. Charcoal used to a moderate extent in potting orchids, is, to a certain degree beneficial, but should always be from hard wood.

O. R. KIDS.

Cash With Order **C. H. JOOSTEN,** 193 Greenwich St. New York

Nashville, Tenn.

The usual dullness following the holidays has characterized the floral trade lately. Social functions have been on the small and early order, calling for but few floral garnishings. New Year's day, which formerly was the biggest day in the calendar, passed without any unusual call whatever. The day was not observed in the least socially. Following our Centennial Exposition the youth of the city, who constitute a large factor in flower buying, have been unable to bestow the usual polite attentions of this kind upon their lady friends.

The stock under the mild weather of the past few days has improved wonderfully and both Brides and Bridesmaids are fine in size and color. Perles are plentiful and American Beauties are fully up to standard.

Roses are retailing at $1 and $1.50 per dozen, with $3 and $4 for Beauties. There seems to be a scarcity of Romans and narcissi; carnations are in sufficient supply. One firm is still cutting some very nice chrysanthemums suitable for funeral work.

Out-of-town calls are good, creating a demand when the city trade falls off. A number of fashionable weddings, teas and afternoon receptions are on for the present week. Violets are in demand always though there are no double violets, only the Schoenbrunn and California in this market. American Beauty always outranks other roses as a favorite, at the uniform price of $3. M. C. DORRIS

Piping for Hot Water.

Working gardener asks why two houses out of four should work satisfactorily, and the other two not, all being piped alike. The explanation in his inquiry is a direct answer to his own question when he says that the returns from the two houses which do not work satisfactorily enter the boiler directly oposite the fire, or as he describes it the hottest place in the boiler; such being the case, the back pressure on these returns is too much to allow free circulation. In connecting up boilers whether it be steam or hot water, the returns must always enter the boiler at the lowest point possible, and for steam, especially, as far back from the fire as reasonable; also for the latter it is much best to drop the return as low as possible before intering the boiler. This forms a trap which is always full of water and prevents the back pressure from the steam affecting the circulation.

The first change which Working Gardener made in the piping, i. e., from the 3-inch overhead feed for 12 2-inch returns into 6 flows and 6 returns with the highest point at the farthest end from the boiler with pet-cocks for air, was correct and should have worked all right if his returns to the boiler were in the right position and large enough to carry the volume of water back freely; to insure this the returns from all four houses should enter the boiler at not more than two openings, and these as above described should be as low as possible and as far from the direct action of the fire as possible. Of course the main returns should be large enough to take the volume of water back to the boiler freely.

Another point to consider is that when two returns come together they should never enter the main directly opposite each other, as the two streams will certainly check each other and prevent the steady flow necessary for an even circulation. The main trouble with Working Gardener's system is that part of his returns enter the boiler in a comparatively hot place and the others in a cooler place, instead of which they should all enter at the coolest part of the boiler. Those entering at the latter place allowed a free circulation which kept the hot water moving freely in the two houses and relieved the boiler of any extra pressure, and at the same time prevented the others from circulating. If the level of the flow and return pipes are even in all the houses there can be no difficulty in making the water circulate evenly if the returns are all connected to those behind the bridge of the boiler. JOHN N. MAY.

Kennett Square, Pa.

The name Kennett Square (sometimes pronounced Cannot) is in all probability a misnomer. Carnationville would have been a more suitable name, for wherever the eye is cast one beholds a range of carnation houses, some large, some small, but all at par as to the quality of the flowers. Nor would it be fair to assume that the boys out there "Cannot square" things. On the contrary, "fair and square" seems to be their motto, and a more honest body of growers would be hard to point out. None, however, need my praises.

Accompanied by Albert M. Herr, of carnation fame himself, our first call was on Wm. Swayne. As usual, his carnations showed the results of the best of treatment, the foliage looking strong and healthy, the flowers perfect. It was his Empress, however, that interested us most. Tall and graceful with a stem as thick and erect as a cane, her crimson majesty towered far above all the other varieties. In the words of Mr. Swayne, "The Empress has made her debut, and has come to stay."

At J. M. Palmer's establishment we found things equally interesting; his two red seedlings, designated as No. 333 and No. 12 look decidedly promising, while his Kohinoor, a white one dotted with a delicate pink tint, has already achieved some degree of popularity in the Philadelphia market.

At Louis B. Eastburn's place we discovered two white seedlings; both look fine, though another year's test will be required to decide their commercial value.

Chas. S. Swayne's Sweetheart, a white, deeply penciled with red, is all that its name implies.

Thompson Bros. and H. Hicks & Son are likewise in the front rank, both Portia and Cartledge being grown in either establishment with marked success. Lizzie McGowan, for white, seems to be still in the lead, though Flora Hill is rapidly coming to the front.

A new departure with some of the growers is the cultivation of mushrooms and tomatoes. Both find a ready sale in the Philadelphia market. HOMO.

NEW FORCING ROSE

MRS. ROBT. GARRETT

Hybrid tea, rich soft pink, buds very long, flower extra large, delightfully fragrant, rivaling Bridesmaid in color, but larger and much more productive. A sturdy, vigorous grower, a money maker and a triumph of American skill. The best firms in the country are investing in it. It has won numerous prizes and has elicited the most favorable comment from critical judges. Price $3.50 per doz.; $25.00 per 100 in lots less than 1000; $225.00 per 1000. Orders booked now, delivery March 15, 1898. Correspondence solicited. Address

Helpful Reminders.

Florists who make a business of decorating should be on the lookout conconstantly for pretty plants, especially those which withstand considerable handling, while palms are the most popular plants in use, a progressive florist will not depend on them for the pleasing effects. You can hardly get along without them, but they should not predominate in an ordinary decoration. All varieties are good. One of the most useful plants is the stevia; it comes in after the chrysanthemums are almost past; it is so light, sweet and feathery, if handled carefully it is the prettiest plant for this season, the old-fashioned tall variety. I would not give a cent for the dwarf except for a few plants of the variegated, which is dwarf. This variety in contrast with carnation plants, and the flowers of Daybreak and Wm. Scott or others of such shades is beautiful. Although you do not grow carnations, keep a few pot plants on hand for color effect of the foliage, and do not try to get along without these two varieties of stevia. The Swainsona is also extremely useful; you should have a few plants of this in two lots; use one while the other is recovering, as they don't stand dissipation well, but are so useful that you cannot afford to be without them; they are rapid growers. A few 10-cent plants very soon become decorative plants; keep them staked in greenhouse, but you will have to remove most of the stakes when you get them in place. If you want to use any of this vine cut, be sure and cut it the day before using or it will wilt so badly that it looks forlorn. The several varieties of bamboo are beautiful, easily managed and they are as pretty as an areca palm for many places, they are so easily handled. Just at this month they are at a standstill, but next month they will begin to make new leaves and it is best to procure stock early. They are sure to become popular as soon as generally known. The Echeveria metallica is easily grown and a plant that pleasingly attracts much attention. A plant that will keep days without roots if cut, it's an old fashioned plant, but too little known. The Aucuba Japonica, green leaves with yellow markings, grows dense and stands any amount of handling. Grevillea robusta, easily grown from seed, is graceful, particularly when new growth is on, causing a diversity of color. The old Veronica variegata with its light lavender feathery flowers is so easily taken care of and is far prettier in many places than a "stove plant," such as a pandanus, which is so easily damaged. Always keep on hand a few nice pots of grasses. Arundo donax variegata is particularly good; the Egyptian papyrus is extremely useful; the "dusty miller," Cineraria maritima, with its white foliage should be kept on hand; the Asparagus Sprengerii is a new plant and one of the most valuable plants ever handled by your humble servant; you can do anything with it. Some pots on hand now are sending out beautiful plumes three feet long; they keep cut for days, make beautiful hanging pots and take the place of ferns in many situations; and I have left for the last the Spiræa Anthony Waterer, none of the descriptions given in recent advertisements do this plant justice and the illustrations are very misleading. The party who made the cut certainly never saw the plant, and strange to say, I never saw any printed description of this plant, but what omitted one of its most striking features, that is the coloring of its foliage; many of the leaves are marked with white and delicate pink; its habit of growth is drooping; some of the most beautiful table decorations have been made with it; flowers are pink.

All the plants mentioned above, excepting stevias, are invaluable for decorators because they are available the whole year. When you come to consider fancy ferns, crotons, anthuriums and other stove plants, they are adapted for special care and conditions and expensive treatment, but those mentioned are good universal varieties, and should be provided in January before new growth starts; they are all easily propagated; they are also useful for conservatory and window decorations, and sell every month in the year. The wholesale growers are beginning to learn this, and are providing them for florists who have no greenhouses of their own, but you who have them should make arrangements now to provide yourself with ample stock of this nature, this is the time. C. B. W.

NEWARK, N. J.—Flowers and the stock of a florist's store were piled promiscuously in the gutter in West Park street, near Broad, this morning. They were the stock of Arnold B. Hoffman, florist, and had been put out for non-payment of rent.

AMESBURY, MASS. — The Henry Hill greenhouse, which has been conducted by M. F. Wentworth, was burned on the morning of January 4. Cause, an overheated furnace.

Vaughan's Pansy Seed

This is the time to make another sowing of Pansy Seed if your plants have rotted off.

VAUGHAN'S "INTERNATIONAL" oz., $10.00; ⅛ oz., $1.50; trade pkt., 50c.

Shipment of Plants to Michigan.

We are in receipt of the information given below from the general agent of the American Express Co. at Chicago.

The laws of Michigan, Act 137 laws of 1897, Section 4, provide as follows:

"Whenever any trees, shrubs, plants or vines are shipped into this state from another state, country or province, every package thereof shall be plainly labeled on the outside with the name of the consignor, the name of consignee, the contents and a certificate showing that contents have been inspected by a state or government officer, and that the trees, vines, plants or shrubs therein contained appear free from all injurious insects or diseases. Whenever any trees, vines, plants or shrubs are shipped into this state without such certificate plainly fixed on the outside of the package, box or car containing the same, the fact must be reported within twenty-four hours to the State Board of Agriculture, by the railway, express or steamboat company, or any other person or persons carrying the same; and any agent of any railway, express or steamboat company, or any other person or persons who shall violate this section shall be deemed guilty of a misdemeanor, and upon conviction thereof shall be fined in any sum not less than twenty-five nor more than one hundred dollars, or imprisonment in the county jail not less than five nor more than thirty days, or may be so fined and imprisoned in the discretion of the court, and any such fine shall be paid to the State Board of Agriculture."

Agents of this Company at points in other states from which such shipments are made to points in Michigan have been instructed to call the attention of shippers to above laws.

The form of certificate to be pasted upon box or package as recommended by the inspectors is as follows:

".....,.....189...

I hereby certify that I have examined the nursery stock and premises of..... ....of ..... and find no indication of the presence of San Jose scale or other dangerous insect, pest or fungus disease.

....., Inspector."

Our agents have not been instructed to refuse this matter, but unless provisions of the law above quoted are complied with, we would be obliged to do so. It is of course the duty of the shipper to furnish certificate of inspection which must be delivered together with the shipment.

The Date of Easter.

Easter is a moveable feast of the church, established to commemorate the Resurrection, and like some other festivals was adopted by the early Christian fathers from one of the pagan customs which had secured a hold on the affections of the people, namely the feast of Ostern, the Goddess of Spring. It occurs at different dates according to the moons phase on the 21st of March.

The earliest that Easter Sunday can occur is March 22, and it has only occurred that early twice in the past century, the latest it can occur is April 25. It is the first Sunday after the first full moon after the 21st of March. It will occur April 10, 1898; April 2, 1899; April 15, 1900. Paste these dates up now, it will save some hunting up when planting time comes around again for Easter stock.

The rustic feasting of our forefathers at Easter was their sacrifice to the Goddess; the modern American makes his sacrifice in a box of American Beauty roses or some other choice offering and generally personifies the Goddess in the shape of his wife. The said Goddess may also be propitiated by fine raiment or a bonnet which she wears. Many men think it equally a good time to buy new clothes also; they generally find themselves looking shabby about that time and if they can afford it bedeck their persons in honor of Ostern.

WORCESTER, MASS.—We are in receipt of the programme of the winter meetings of the Worcester County (Mass.) Horticultural Society. It provides for weekly meetings with interesting papers and discussions at each meeting. An annual reunion and banquet announced for March 9, shows that our Massachusetts friends appreciate the "creature comforts."

PATERSON, N. J.—John J. Werne, a florist employed at Cedar Lawn Cemetery, died suddenly of heart disease on the morning of January 4.

Kraft's Plant Tonic

For PLANTS, PALMS and FLOWERS

...A Wonderful Preparation for the Promotion of Plant Life, Destruction of Insects and Scale...

This is one of the greatest preparations for the use of Florists and Plant Growers ever compounded. It gives to the foliage of plants treated the bright, fresh color of healthy, growing vegetation. It destroys all insect life infecting the plant and eradicates scale.

Besides improving the color of the plant, it effects a general betterment of its condition, aiding nature in disseminating and retaining the sap and life of the plant. The Tonic makes the foliage of the plant soft and pliable, and a beautiful bright green.

Partnership.

Every business man should have some knowledge of how far a partner may legally bind his firm. This is important in dealing with one member of a firm, in order to be assured that one can force the firm to carry out his agreements. It is also especially important for a partner, to enable him to understand fully what he may safely do on the firm's account and to what an extent he is in danger through the dishonest acts of his associates.

It has been said that taking a partner was as serious a matter as taking a wife and that the results of a mistake in the one case were almost as serious as in the other. There is more than a grain of truth in this. Let the partnership agreement be as strictly drawn as possible and the duties and powers of each partner defined to the minutest detail, this only defines the obligations of the partners to each other and has no bearing on their relations to outside persons. Unless it can be proved that definite knowledge of the limitations of a partner's powers has been conveyed to a person dealing with a member of a firm, such limitations will not allow the firm to repudiate any contract made in good faith with such partner. Of course the agreement must be in the usual lines of business of the firm, and in accordance with the common customs of business.

A purchase of coal, or plants or greenhouse glass by one of the partners in a greenhouse establishment would be binding on the firm and the firm would have to pay the bills even though the partnership agreement especially provided that the partner in question should have no such authority. The only recourse would be to hold the offending partner responsible for the loss occasioned by his acts. On the other hand one would run a risk of having a sale of a stock of goods or a house and lot or any other article, manifestly out of the line of the business, repudiated by the firm under like circumstances. If it can be shown, however, that the partner in question had been in the habit of making similar purchases on the firm's account, then the purchase will probably hold good.

The safe method to pursue in transactions departing from the usual line of a firm's business is to require the assent of all the partners, while in ordinary matters the signature of one partner is sufficient. B. JONES.

J. G. SWAHN'S SONS, P. O. Box 78, MINNEAPOLIS, MINN.

From Steam to Hot Water.

ED. AM. FLORIST: I enclose plans of a house that I built last year for carnations. It is heated by a Furman steam boiler, and I would like to inquire through the columns of the FLORIST: 1. If there is piping enough to heat by hot water to 60° with zero weather outside? 2. What changes would have to be made to substitute hot water for steam? Would like to use same boiler if possible. J. L. L.

In answer to the inquiry of J. L. L., relative to the heating of a carnation house, the heating surface now in the house, which is proportioned for steam heating, would not be sufficient for heating by means of hot water. For the heating of such a house by hot water, to a temperature of 60°, about one square foot of radiating surface (outside surface of pipes) would be required for each 3 square feet of glass contained in the roof and ends of the house; thus, for each lineal foot of house, which contains about 54 feet of glass, 18 square feet of radiating surface would be required, whereas the 28 lines of 1-inch pipe and 3 lines of 2-inch flow mains, only contain about 11½ feet of surface, leaving a shortage of about 7½ feet, which is equal to about 12 lines of 2-inch pipe. The circulation of water through long lines of 1-inch pipe is very unsatisfactory in ordinary greenhouse heating, in consequence of the very slow circulation, resulting from the excessive friction of the water in the small pipes. I do not favor anything less than 1½-inch pipes for a greenhouse circulation of such a length and would give a preference to 2-inch pipes. Thus, to heat the above house to 60°, if the 1-inch pipes are to be used, I would advise adding one more 2-inch overhead flow, substituting four 2-inch returns for the three 1¼-inch ones now in, and doubling the number of 1-inch runs; but the more satisfactory method would be to throw out the 1-inch pipes now in, and use 4 2-inch overhead flow, 4 2-inch main returns, and 24 runs of 2-inch pipes under the benches. As to the possibility of using the present steam boiler for the hot water heating, I cannot speak, as no description nor dimensions are given, but if your correspondent will write me, I will be pleased to assist him.

HENRY W. GIBBONS.

Cypress
Greenhouse Material.

We are the pioneers in Clear Cypress Greenhouse Material. We discovered that Cypress is better than any other wood for greenhouses from top of posts up and we introduced it, and fought for it against many prejudices, and finally succeeded in bringing it into general use.

Others have attempted to follow where we lead, others are trying to reap what we sowed, but we have the experience and are recognized as experts in greenhouse construction.

Marie Louise Violet.

After a varied experience—extending over many years—in the culture of violets, it is only within the last few years that I have been able to feel pretty sure of coming out on the right side by spring. For the benefit of your readers, who may be interested in the growing of these plants, I will endeavor to explain our method of growing. I do not say that this is the right way, and it no doubt differs materially from the modus operandi of many successful growers, but it will go to show that with violets, as with all other classes of plants, there is more than one right way to grow them successfully. I have found by experience that more shekels are gained by studying carefully the needs of the plants in your own particular locality, the style of houses, aspect, etc., and more especially the soil that is available, than in trying to imitate a successful grower in a totally different locality.

Our violet houses are span roof, small glass sash of the ridge and furrow style, each house 10x110 and about 8 feet from floor to ridge. As four of these houses are entirely open to each other, this gives an almost solid surface of bed 40x110. The violets are planted in solid beds which are about 2 feet deep, upon an ash bottom, and from 3 to 5 feet from the glass, thus admitting of a free and constant circulation of air through all the houses.

Sometime during June or early in July, as other work will admit, about 6 inches of the old soil is removed. The remaining soil is well manured and thoroughly dug, a good coating of bone meal and about 3 inches of horse and cow manure mixed is put on top, after this the beds are filled with good rich soil usually the same as we mix for the roses. The violets are now planted about 6 by 8 inches. We use either rooted cuttings from flats or divide the old plants as we plant. We have tried both methods and see no difference in the results, but if the weather be very warm the rooted cuttings will take hold quicker. As fast as a bed is planted it is thoroughly soaked from top to bottom, no shading is used whatever, and no sash are removed. The ventilators are put up full and are never let down until frost; but remember this, the beds are kept thoroughly soaked all the time, no other care is taken of them except weeding and cutting off the runners, this latter work during September and October is quite an item with us; the plants grow like weeds, and need constant attention to keep them from forming a complete mat.

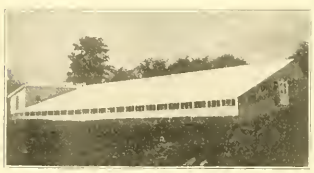
From October on, more care is taken with the airing and the temperature, the latter ranging from 40° to 45° at night to 65° and 75° on sunny days, but the beds are always kept soaking wet, consequently red spider is an unknown factor, for we never syringe overhead, always striving to maintain a dry atmosphere, as we don't like to encourage spot. Under the above treatment the plants produce good flowers, long stems and good color; last year they averaged forty-four flowers per plant. This may not be a good average but anyway it is a satisfactory one, and as we retail our own flowers we certainly come out on the right side of the ledger. We grow a few white violets, as there is always more or less demand for them. These we find are more productive when grown on benches with 10° more heat than the Marie Louise requires. The Swanley White is the variety we use, and this will produce immense flowers when allowed to fully develop, but if the soil be too rich, many of the flowers are apt to revert to the parent color, which, I should judge, is that of the old Neapolitan now so rarely seen, unless it be under its new name of Lady Colin Campbell, for I fail to see the difference. This latter variety is probably the most productive and hence the most profitable violet I know of, if one could sell the flowers. We tried it two seasons, but no one would buy them at any price.

The California we also experimented on with the same result. What a rank grower this is! If the leaves were only edible what a splendid salad plant it would make, but for cut flowers—not in this section. Nothing will go but the Marie Louise at present; and, as it is the most difficult to grow, the price of violets will stay up for a while yet, or until fashion changes. F. GOLDRING.

A Violet House of Novel Construction.

Thinking the florists of the country might be interested in a description of my "slope house," I append a few lines setting forth as briefly as possible the location, size, materials, heating and piping of the same, together with personal views upon the advantages of such a style of house I trust it may be kindly received.

To begin with, this house is situated in an open field on a knoll which slopes to the southwest on an average of eight feet in fifty; while it is so situated as to be sheltered from the heaviest north winds, yet during the summer we get the benefit of every breeze that moves, since there are no buildings adjoining to intercept the currents of air. It is 50x100 feet, built entirely of cypress and red cedar, has no sills and rests upon posts set two feet in the ground, four feet, six inches apart.



center to center; the eaves are four feet from the ground, and as may be inferred from above, the eaves of the north side are eight feet above the south ones; the roof is ten feet from the ground at its apex; the sash bars of the long span are forty feet, while those of the north or short span are fourteen feet; of course the long span faces the south, or, as this actually stands, southwest

The glass is 16x24, which is preferred in order to obtain the greatest possible amount of light, and is bedded in putty, which makes a very tight roof.

The sash bars are of cypress, 1⅜x3 inches, with drip groove, supported on four rows of purlins made of 1-inch iron pipe with posts of the same material seven feet apart; each sash bar is securely fastened to the purlin by means of an ordinary pipe strap, which not only holds the bar firmly for the glaziers, but stiffens the whole structure as a permanent fixture.

A point upon which a good deal of advice has been given "gratis" is the ventilation; but for all that has been and is said, the ventilation is perfect, which is obtained by a continuous row two feet wide at both sides under the eaves, and one at the highest point three feet wide, also continuous, which is operated completely by a single lift of Carmody's "meat saw" appliance.

The portion of "stagnant air" lying midway up against the roof, between lower and upper ventilators, does not exist, since heated air always tends to rise. The beds are of the solid type, being divided so that the space actually planted is 42x96 feet, which contains 6,000 plants (exactly) under 5,400 feet of glass.

The boiler, cast iron, for hot water, is located near the southwest corner of the house, six feet below grade; the heat is distributed through six sets of coils of 1½-inch iron pipe, which are hung on ordinary hook plates, screwed to wooden cleats, which in turn are clamped to the uprights by means of an ordinary axle clip, which are sold in all hardware stores; at the eaves there are three coils, at the purlins only two.

Just here I wish to say there is no difficulty in maintaining an even temperature throughout, notwithstanding opinions to the contrary; it is, however, maintained only by proper piping to counteract the tendency of heated air to leave the lower side. The closed tank system is used under pressure of about ten pounds to the square inch; the efficiency of this boiler is shown when I say that we use about 2,700 feet of 1½-inch iron pipe, while theory calls for about 3,000.

Our success may be perhaps in the soil, in the style of house, or more likely owing to the constant care and attention of George A. Saltford, the florist, or possibly to a combination of all these.

Among others these points of preference present themselves to my mind:

1. It costs less to build on this plan than on any other, considering the total area enclosed.

2. The large glass surface exposed to the direct rays of the sun is very favorable to a large production of violets at this season of the year.

3. Owing to its size the temperature is not so quickly affected by a change outside, as is the case with other styles, or in smaller houses.

4. The system of ventilation admits of a very low temperature during the heated period.

To those who think of building I would say if you have the right spot, build on this plan by all means.

In conclusion I would invite most cordially all readers of the AMERICAN FLORIST to inspect it for themselves, as our latch string is always out and we shall be pleased to extend to you all a hearty welcome. So come and pay us a visit and see for yourself. J. W. FEETER.

Highland, N. Y.

Chrysanthemums.

GROWING FINE EXHIBITION PLANTS.

It is a whole year's work to grow specimen chrysanthemums for exhibition. You must propagate early. It is a good plan to have a stock plant of each of the varieties you wish to grow—in a 6-inch pot—in a nice cool place; they will then make good cuttings. The latter part of December is a good time to put cuttings in, although with some varieties a later date will do.

As soon as well rooted, cuttings should be potted in 2½-inch pots, and placed in a cool house, as near the glass as possible. Start pinching as soon as they begin to grow, for if you want to make good specimens you have got to make a systematic business of this pinching. It will not do to allow your plants to run away up and then cut them back, for then the wood has got hard and it will take a long time to break. The plant does not feel it when the wood is soft, but goes right along and makes another break. Every second joint should be pinched, that is rubbing out the little tip.

It is well to propagate a few more of each variety than you intend growing; this is also a good plan with new varieties that you wish to try. They take up but little room and you can discard as you go along. By the time they are ready for 7-inch pots you can tell whether they are going to make good plants or not. Shift along into larger pots as they require it, from 2½ to 5-inch, from 5-inch to 8-inch, never allowing them to become pot bound. About June 1 they will be ready for the last shift, to 10-inch or 12-inch, as may be required in the prize schedule.

Syringe your plants every good day, using any nozzle that throws a very fine spray. Continue pinching out the tips. Some varieties are apt to send up one or two extra strong shoots, making long joints; pinch these at first joint. Some varieties will require a few short stakes to keep them in shape. Water carefully after putting in flowering pots till they get started again to make new roots.

Pinching should cease about July 20. Some advise that the tall growing varieties should be pinched later, to keep them down, but it will not work; along in August you will find that the wood gets hard, especially in the tall varieties. Your plants will now require lots of room; keep them as near the glass as possible, turning them around as often as twice a week, for they grow so rapidly at this time that they get out of shape very quickly. By the middle of August you will have to do some staking. Willow stakes are the best for this purpose. Cut them in winter, bundle them up to keep them straight and put in a dry place.

As soon as you think flowering pots are getting full of roots start to give a little weak liquid manure, say about twice a week, being careful to keep it sweet. A good way to do it is to put manure in a bag which place in a small tub in one corner of the house where you grow the plants, then dilute to the strength you want in the watering pot, renewing the same every second watering. Some varieties are liable to begin to look yellow at this stage; a good tonic in such cases is a very weak watering with soot water; also there is nothing better for light foliage than a dressing of Clay's fertilizer; it acts quickly but must be used very carefully.

Along in September increase your waterings with liquid manure, giving the stimulation weak and often and changing from cow to sheep manure, as the plants seem to be fond of changes in food. Probably after the plants have set bud some varieties will begin to lose a lot of the bottom leaves; you are getting too good to them; withhold manure water for a short time and give a few weak applications of soot and lime water: it sweetens up the soil. Give plenty of air, be careful not to crowd your plants and look out for mildew.

By October 1 the plants will be ready for the finishing stakes, and it pays to take a little extra care and time in this work. In fact, it is a job you cannot hurry if you expect to be in the swim. After they are staked they require an abundance of water, three times a day mostly. Don't allow them to suffer for water as it tells at once on the foliage. Some varieties wilt badly after being staked, but this does not seem to hurt them much. When the flowers commence to show color weaken down the feed, but continue the weak manure waterings every day up to the time of the show.

Now you have your plants all staked and showing color; will they be in time for the exhibition? A few cloudy days and the plants seem to stand still; they must have sun to finish them. The weather clears up and they just hustle; you will have enough to fill your classes. Some varieties will not be ready; never mind, your neighbors are in the same box. You get the exhibition over and have hardly time to breathe until it is time to start in again to prepare for another year. KIOTO.

Geraniums.

In the prevailing chase for something new, deserving and useful plants are often neglected and do not receive a fair share of the attention of the horticultural press, and frequently are neglected by the florist himself, through his efforts to grow something new, striking and rare. The geranium has been so long with us, is so well known (as cultivated in the past) by everyone, that of late we have seen or heard but little about it save the annual advertisements of rooted cuttings for sale. There are but few plants suitable for brilliant color effects, that successfully withstand our trying climate and among

those that do the geranium stands pre-eminently first where continued color effects in low-growing flowering plants are required, and because of its comparative easy culture and the certainty of success if proper varieties are selected, the newer sorts of merit deserve more attention than they have thus far been given. When visiting several establishments where geraniums are largely grown, I have remarked some who confine their list of varieties to two or three. "A good scarlet, a good pink and a good dark red is what we grow." This limited set of varieties makes it very convenient in propagating large blocks of young plants, "it's easier looking after the labels," but unfortunately it makes it necessary that Mrs. A., B. and C. must have geranium beds exactly alike and give no range nor scope for the satisfying of varying individual tastes.

Mrs. A. may favor the brilliant capucin scarlet of J. J. Harrison, Mrs. B. the bright soft vermilion of Alphonse Riccard and Mrs. C. the bright salmon scarlet of double General Grant; but ten chances to one when either considers a scarlet geranium bed she will be confronted by a mass of double Grants and nothing more. The same may be said of all the other shades of color. S. A. Nutt, La Pilot or W. P. Simmons will be the only crimsons shown, possibly Aurora, Fairy Queen or Poitevine will be the only varieties in pink. During the first years of my greenhouse experience geraniums were grown each spring and a local bedding trade developed. Many times I heard the exclamation, "Oh! yes, that is very nice, but I had it last year. Mrs. Jones always has a bed of that, and really I am tired of it. Cannot I have a bed of some other plants?" Such requests lead me to gather in an assortment of different varieties and I soon learned that variety was as pleasing in geraniums and would be appreciated fully as much as variety in other plants.

The selection of suitable bedding varieties while not beset with the difficulties of choosing new and profitable carnations is nevertheless not the easiest task. If the single varieties, especially in the new English section would only cease dropping their petals and mussing up the foliage an assortment of magnificent colors could readily be made up to please the most fastidious of tastes; but there are but few singles that give good satisfaction for bedding purposes, and it is the doubles and the semi-double or Bruant section that give us our best bedding sorts. Many times I have been asked, What are the best bedding geraniums? While the question is not easy to answer, as the same sorts will vary in different localities, any florist embarking in the geranium trade would certainly get some fine sorts from the following list:

Double scarlet—Alphonse Riccard, vermilion scarlet, with us the best of all; J. J. Harrison, capucin scarlet, the brightest of all; double General Grant, salmon scarlet, intense, fine; Acteon, vermilion scarlet, equal to Grant.

Double crimson or maroon—S. A. Nutt and Leonard Kelway head the list. Nutt is a tall grower and Kelway dwarf. Marvel and La Pilot are nearly if not quite as good as Nutt; Phonograph I think is equal to the last two, and all are excellent bedders.

Double salmon pink—Beaute Poitevine is pre-eminently the leader of this section, dividing honors, however, with Gloire de France and Fairy Queen. Madame Jaulin, a new semi-double Bruant possesses great merit, and I believe it is one of the most chaste and attractive of the late introductions. Republique, a beautiful shade under glass, will be grand if it stands the sun.

HOUSE OF GERANIUMS—GROWN AT COTTAGE GARDENS, QUEENS, L. I.

Double pinks—Bonnatt leads the deep pink varieties, with Bonne de Villenova a good alternative. Among the lighter shades, Mrs. Parker and Agnes Kelway are bright, chaste and desirable, while Mary Hill should not be overlooked.

Double whites—Comtesse de Harcourt and Madame Buchner head the list, and are rather better than La Favorite, which, however, is still a first-class variety.

There are but few of the fancy doubles suitable for bedding, as many lose their distinctive coloring under the hot midsummer sun and heavy autumn rains, and unless the grower wishes a long list he may safely omit them.

There are a few single varieties that may well be added to every good collection. In scarlets Rev. Atkinson has always been our favorite; the color is as rich as in S. A. Nutt, and it is as free a bloomer as any. Single Grant, Athlete and James Kelway are all first-class.

Single pinks—There are two varieties that lead all others for brilliant pure coloring and freedom of bloom, Benj. Schroeder and Gertrude Pearson. Midsummer, a delicate chaste peach pink, cannot be excelled; it is totally distinct from any other variety. Madonna, a soft clear flesh pink, is fully as distinct as Midsummer.

Light salmons—Mme. de la Roux heads the list; it is identical with Mme. Ch. Molin, save in habit, which is one-third dwarfer. Mrs. E. G. Hill is second to none in size of flower and profusion of bloom; Mrs. A. Blanc is a rich, deep apricot salmon, strong and vigorous; but it will be superseded by H. Dauthenay, equally as good in color, dwarfer in habit and a much freer bloomer.

In the Miranda section Madame Bruant is novel and striking and possesses the best constitution. Mme. Hoste and Camille Bernardin are splendid varieties under glass.

The above list covers a wide range of valuable varieties that have passed the experimental stage. If the list is too long it could be cut to the following:

Doubles—A. Riccard and J. J. Harrison, scarlet; S. A. Nutt and Leonard Kelway, crimson; Beaute Poitevine and Madame Jaulin, salmon; Bonnatt, deep pink; Mrs. Parker and Mary Hill, light pink; Mme. Buchner and Comtesse de Harcourt, white.

Singles—Benj. Schroeder or Gertrude Pearson, pink; Mme. de la Roux, light salmon; Midsummer or Madonna, flesh; H. Dauthenay, apricot; Mrs. E. G. Hill, deep salmon; General Grant, scarlet; Rev. Atkinson, crimson.

Fancy singles—Madame Bruant, Mme. Hoste and Gettysburg, making twenty-two varieties in all.

Some may protest that good varieties are missing from the above list. True, and whenever you limit any list you will shut out many good varieties. It suffices, however, to say that any florist who can not do a good business from a house of well grown plants of the above varieties, has either missed his calling or squatted down in the wrong locality for geraniums.

When placing geraniums on the show benches, do not kill their colors by setting all the shades of pink, scarlet, etc., side by side. Divide them by blocks of complementary colors; the scarlets may be divided by blocks of whites, the pinks by the dark crimsons and maroons, etc.

Above other things grow your plants well. Do not have lanky, spindling plants topped off by a lean, thin flower spike. Keep the plants low and stocky, and feed and air your young stock sufficiently to produce a dwarf well rounded plant with a healthy truss of flowers that shows the true character of the variety. Then they will sell.

The greatest fault of the average florist is attempting to grow too many plants in too small a space. C. W. WARD.

RECENT German experiments show that alum, aluminum sulphate and iron sulphate produce blue flowers when applied to Hydrangea hortensis.

Some New Cannas.

The following are among the best new varieties offered this season:

Goliath—Fine crimson; uniform dwarf habit, never exceeding three feet in height; large dark green foliage; early and continuous bloomer; similar in color to Bouvier, but darker.

J. D. Eisele—Vermilion scarlet, overlaid with orange; strong, free grower; three and a half feet.

Furst von Hohenlohe—An ideal yellow bedding variety; upper petals pure yellow; lower one slightly marked with crimson; neat, compact habit and free flowering.

Sam Trelease—Rich glowing almost scarlet color; round flower; three feet high. Raised by Mr. Jas. Gurney, superintendent Tower Grove Park, St. Louis.

Sunray—Distinct striped variety; large size, rich bright yellow with brilliant scarlet stripes and dashes.

America (Italian)—Rich orange salmon, feathered and veined with scarlet; fine bronze foliage; six feet.

CANNA ALLEMANIA

Allemania—Very large flowers, six and a half inches in diameter; upper petals salmon, broad golden yellow border; very handsome variety; green foliage.

La France—Splendid dark foliage, flowers orange scarlet. J. D. EISELE.

Carnation Notes.

The days are gaining in length, with a noticeable increase in the amount of sunshine, and as a consequence the plants are making much faster growth and rapidly exhausting the food supply in the soil. The applications of liquid manure should therefore become more frequent as the season advances, and now we find it necessary to supply nourishment in this form about once a week, that is, if the weather is such as will permit of the benches becoming sufficiently dry in the specified time. One must be certain that the beds are in the right condition before applying liquid manure—guess-work will not do—and if very dry they should be well watered in the ordinary way before applying the stimulant.

In using liquid manure, it is advantageous to change the character of the food occasionally, as the constant use of any particular kind tends to enrich the soil with some one or two elements, leaving it destitute of others equally necessary to the welfare of the plants. We use about two buckets of manure to fifty gallons of water, and apply with a Kinney pump. This may not be such an up-to-date method as that practiced in some of the very large establishments, but for small places it is a much cleaner and safer way of doing the work than carrying it around in the watering can. There is in addition a great saving of time, as by the old plan the work occupies fully three-fourths longer.

Unless the grower is in the rooted cutting business, where lots of roots are necessary to insure the stock travelling long distances in safety, it is best to get the cuttings out of the sand before the roots are very large. They are then easier to handle, and we find that they take to the soil more quickly. Furthermore, if allowed to remain in the sand long after they are ready for the soil, they soon get drawn and weakly, and this is a great mistake if profitable plants are desired. After taking the cuttings from the sand, they should be planted in flats that are well drained, using good soil. Take care, however, that the soil is not too rich, as they will then make a soft, sappy growth, and the object is to avoid this and secure plants of the sturdiest character. Some growers fix one of the greenhouse benches for the rooted cuttings, and this is a good place for them; but if not available the flats will serve the purpose just as well.

The plants in any case should be in a light and airy house, kept free from weeds and fumigated about once a week to keep down insects. It is an error to suppose that because they are so small, about three inches high, with no three or four cents sticking out all over them, they do not need as much watchfulness as the flowering plants. These will be the flowering plants next season, and they should not be weakened by any neglect so early in their struggle through life. I have noticed the flats from six to eight inches deep used by some growers, but consider it far better to make two flats of the same amount of lumber and fill them nearly to the top with soil, so that the young plants stand well above the box. There is then no trouble with decayed leaves.

C. W. JOHNSON.

American Carnationists.

At the risk of being called visionary, I offer the following suggestions, and trust that they will be freely criticised, in the trade papers and at our meeting in Chicago.

As the $500 proposition made sometime back, does not seem practical, I now propose that I will be one of twenty or more to donate annually $25 for the use of the American Carnation Society. One-half of the money thus donated to be used towards offering premiums at our annual exhibition; the other half to be used toward the running expenses of the society on the following lines.

That a committee of three be appointed to take charge of the interests between the shipper, of either flowers or plants, and the express companies. Let this committee get up a shipping label and have it copyrighted for use by members of this society only. Give them power to enforce care being used in handling of goods shipped under this label. Rivalry between the express companies and the knowledge that this committee is backed by a good live society, would soon cause them to accede to any reasonable demands made by said committee.

There should also be an arbitration committee appointed to whom could be brought all differences, of any magnitude, between members for adjustment. This would still further improve trade relations between members of the society; although the society, by its mere existence, has already accomplished this to a great degree.

A reference list should be established and issued three times a year, September 1, January 1, and June 1, giving the bad pay purchasers throughout the country, both growers and retailers or storemen.

A blank form should be gotten up giving the principal characteristics of carnations that are grown, old and new, or being introduced, and these filled in by twenty or more members from different localities.

Bulletins containing such reports to be sent twice or three times during the year to all members of the society.

All of these things would take money, as the men who do the work should be fairly remunerated for their trouble, but I believe they could all be done, and the actual expenses of the society met with the $250 and the annual dues received.

Other lines of work would develop and could be added as the membership increases. This it would be bound to do if the benefits are confined to the members only (where they rightly belong); but not excluding trade papers from matter to which they are entitled,

This society should be and can make itself worth considerable more than the $2 annual dues to every man who grows carnations and to every store that handles them. There is only one thing necessary and that is for every member who can, to attend the meeting in Chicago determined to put his shoulder to the wheel and make it a business meeting of business men. Those carnationists who are not members should come and join and make 1898 the most successful year of the American Carnation Society.

A. M. HERR.

Ferns.

SOME POINTS OVERLOOKED BY GROWERS.

There is a constantly increasing demand throughout the entire year, for small ferns for filling ferneries. These should be well-grown stock in 2, 2½ and 3-inch pots, with but a small proportion of the latter size. The demand is not so heavy through July, August and September as during the remaining nine months of the year.

This trade has never been properly supplied. The wholesale growers prepare all this stock for fall delivery, when vast quantities are put on the market, often at ridiculously low prices. By midwinter it is sold out and no more is to be had. The market is supplied about six months out of twelve. Young fresh ferns should be in stock in March, as well as September.

Most varieties of ferns can be grown from spores to the proper size, in from six to ten months, according to the variety and mode of treatment. They are in salable condition as soon as well established in 2-inch pots. When they become root bound in 2-inch pots, and before they become stunted in the least, they should be shifted into 2½-inch pots. In this size they should be sold, if possible, as but a comparatively small proportion is wanted of a larger size.

It was not my intention in this article to give cultural directions but to call attention to a long felt want. Fern spores planted from now on till the first of May would find ready sale next winter at remunerative prices, while those planted at an earlier date, and grown along through the summer, would be dumped on the market in the fall when there is always a glut of such stock and consequent low

CORNER OF L. L. MAY & CO.'S CONSERVATORY AND RECEPTION ROOM, ST. PAUL.

prices. It makes very little difference whether you grow ferns to wholesale or only for your own retail trade, with too many full grown plants in the fall there is a temptation to try and hold the stock and work it off, which often costs more than it would to have grown on young stock to take its place. These remarks apply particularly to the Chicago market but they also apply in a greater or less extent to every city in the country.

There never has been a year since ferneries first came into fashion, when ferns were not plenty in the fall and there never has been a year when ferns of suitable size were not scarce in the spring.

J. T. A.

Dahlia Notes.

A PLEA FOR SPECIAL DAHLIA SHOWS.

The leading object in all horticultural exhibitions should be the promotion of the science and the art of horticulture. This should determine the nature and the scope of the exhibit. The public exhibition is one of the most powerful means of arousing interest and enthusiasm in the culture and use of flowers of all descriptions. It educates public taste, stimulates inquiry, and in a commercial point of view promotes the interest of the market grower by enlarging the demand for his products and extending their use.

The dahlia now occupies a prominent place in the fall shows and but few persons realize its possibilities as the basis of a special exhibition. The rose and the chrysanthemum have gained this recognition, but the merits of the dahlia have been slow to be appreciated. A distinct impetus has recently been given to its culture in this county. A few years ago collections of even a hundred varieties were rare, now they are becoming common and large growers frequently receive several orders in a single season for collections of that size. The seed catalogues plainly show the tendency by the greater amounts of space allotted to descriptions and announcements of good varieties.

This extension of culture has already laid the foundation for special exhibitions. Material has become plentiful. Some growers can stage from five hundred to a thousand varieties and numerous others can display a hundred or more. Very few persons have the slightest conception of the enormous development of varieties, and their multiplicity as a necessity in a show devoted to a single flower. Such a show, therefore, would be calculated to create a strong impression and exercise a powerful influence. At the outset the extent of the display ,would be dependent upon the larger growers, but the proper distribution of awards and the impulse given to extended culture, would quickly lead to strong competition among smaller growers as well as among the specialists.

The dahlia is a flower with qualities fitting it for extensive and lasting popularity. It requires no expensive outlay or preparation to bring it to perfection, no special trained skill in its cultivation, only the observance of a few simple principles common to the culture of all plants. Being an open air plant, it can be grown by any one having garden room. It blooms continuously and freely for two or three months. It can be used very effectively as the foundation of many decorative designs, and herein, and in the demand growing out of its increasing cultivation, lies its value to the professional florist.

The keeping qualities of both flower and foliage, rare in most flowers grown in the open air, render it peculiarly adapted to show purposes, as it will endure even a critical inspection for two or three days after cutting. The length of the period during which it continues in bloom allows the selection of such time for an exhibition as is best suited to local conditions, some part of the month of September being in most cases best. Of its various recognized classes, single, show cactus, pompons, fancy and decorative, the first three are so thoroughly distinct as to secure as much variety in an exhibition as could be obtained from the display of three different species of flowers, while the pompon and decorative classes are sufficiently different to add materially to the variety of the show and to prevent the dulling arising from

excessive uniformity. So distinct in fact are the newly developed cactus forms that people unacquainted with them almost uniformly fail to recognize the blooms when first seen as belonging to the dahlia family. Furthermore, it is a noticeable fact that the cactus and single forms commend themselves to persons to whom the set type of the show dahlia is distasteful and those who are pleased with the latter have little liking for the cactus type.

The dahlia comes at an intermediate time, between the rose and the chrysanthemum, the only flowers which have yet achieved the distinction of special shows, and so comes into competition with neither. It crowds nothing aside, but will occupy the gap between the two leading exhibitions of the present time. Its variety of size, color and form admit of almost bewildering variety of combination and display, and from every point of view in which the matter may be examined it shows itself pre-eminently adapted to the purposes of an exhibition exclusively its own. H. F. BURT.

About Pansies.

This is just about the time when we begin to think of spring, and pansies are the first plants we hope to have in good condition when the time comes for opening up the early plantings for out of door decoration. Those pansy plants that were transplanted in frames should be looked over. It may be some of them have been suffocated by a too dense covering of the frames. It is best to look at them anyhow, and if it is found that instead of 500 plants there are only 100 left, as may be proved on opening the frames, something must be done to repair the damage. Sow at once a batch of seed, and let it be the very best there is in the market. The seeds should be sown thinly in boxes, pressed firmly into the soil and covered with fine compost to a depth not exceeding one-eight of an inch. Place the flats in a temperature above 45°, but not higher than 55°, and as soon as the plants show three leaves prick them out about one and one-half inches apart in the flats and place them as close to the light as possible. Two inches of soil will be sufficient in the flats. By March 15, these little plants will be strong enough to transfer into frames, and these should have a little fermenting material underneath to prevent the checking of the plants during chilly nights. It is advisable during March to provide the frames with a covering of sufficient thickness to prevent the possibility of freezing.

It has been demonstrated in many cases that pansies sown in January and well cared for, were superior to those sown in September and grown in cold frames all through the winter. It is also claimed that the latter do not cost nearly so much as those sown the previous autumn. It must, however, be borne in mind that from the time the spring or winter sown pansies were committed to the soil they did not lack anything that was necessary for their welfare. There is plenty of time to sow pansies now if your winter frames have suffered, so do not hesitate to try it. J. T.

RAHWAY, N. J.—Charles Bedman, a well-known florist, whose place is on Washington street, East Rahway, was found dead in his home on the evening of January 11. Apoplexy is supposed to have been the cause. Mr. Bedman was 53 years of age and leaves a widow and six children.

HENRY SCHWARZ.

A Cincinnati Florist.

Henry Schwarz, a well-known figure among the Cincinnati florists, was born December 8, 1864 at Annweiler, Rhine, Bavaria, Germany, and after receiving a good school education he went as apprentice at the age of 15 to J. B. Dochnahl at Neustadt, where a general line of nursery stock, greenhouse plants and budded roses were grown. At the age of 18 he landed in New York in fall of '82, and the following spring entered the employ of Louis Siebrecht, Hinsdale, L. I., where he worked until 1885. He then turned his attention to cemetery gardening for one year at Charles Ilfrichs', Middle Village, L. I. His next move was to Cincinnati, where he served one year at B. P. Critchell's establishment under Thom. Caldwell. Thence he went to Nanz & Neuner's, Louisville, Ky., and from there to the well-known establishment of E. G. Hill & Co., at which place he took charge of the chrysanthemums for exhibition, taking the most first premiums at the Indianapolis show in 1888. On December 1, '88 he left Richmond to pay a visit to his folks at home. After a four months' journey abroad he came back to the United States and entered the employment of Siebrecht & Wadley (now Siebrecht & Son). A young lady near Cincinnati who attracted his attention could not be persuaded to go East and therefore he was compelled to go West in spring of 1890, when he took charge of the O. J. Wilson private garden, Clifton, Cincinnati, and was married. Here he remained nearly two years and in the fall of '91 started in business for himself at his present place, Price Hill, a suburb of Cincinnati. He has been one of the active members of the Florists' Society since its organization and was recently elected its secretary.

Mr. Schwarz is the representative of the AMERICAN FLORIST in Cincinnati and the Cincinnati society is to be congratulated on securing as secretary so able, energetic and faithful a worker as we know him to be.

Politics in Paterson, N. J., Parks.

The enforced resignation of Mr. Otto Buscek, park superintendent at Paterson, N. J., seems to be another case of the removal of a good man to make room for a man with "a pull." There was no pretense at assigning a cause and no attempt to show any fault on his part. Mr. Buscek is said to be a bright young man, well educated and well posted in park work, and even in the midst of a heated discussion over his retirement, no word was said against him.

Our Chicago readers will at once recall, in this connection, the case of Mr. Pettigrew, whose removal was brought about in the same way, in defiance of the protests of the best citizens of the city and of every newspaper of any prominence. Recent political changes have been signalized by more removals in the north and west side parks. No one so eminent in his profession as Mr. Pettigrew was removed in the latest changes, to be sure, but simply because there were none such to remove. Chicago has been equally disgraced, however, in both cases, for the later removals have been wholesale in number and in many cases the only qualifications which seem to have been required of the new appointees has been the ability to sign their salary vouchers and to do "cultural" work at the primaries and ward meetings.

Comment is useless. It is a rotten state of affairs and we can only hope Mr. Buscek may succeed in finding a locality where something besides political "pull" is of value.

Herbaceous Plant Notes.

Mention was recently made in these columns of some extra fine Primula officinalis, which had been brought on under glass with cool treatment. The stems were remarkably stout and long, the flower heads very large and full. They sold readily in the market as cut flowers and I believe Mr. Arnold, the successful grower, is preparing for another supply this year again, but they will not be in flower for several months yet, because Mr. Arnold for some reason seems to prefer to grow them in frames without artificial heat; if he had them in a cool, light and airy house, there would be no trouble to flower them at any time from February until spring, providing, however, that the plants had previously been subjected to a hard frost and were perfectly at rest when taken into the house.

Most all of the hardy primulas respond readily to a gentle forcing and the one I would especially recommend for that purpose is P. cortusoides, though we may not be able to have it quite so early as the first mentioned, for it is naturally a later bloomer, but their delightful soft shades in blush, pink and rose are certainly most charming, and the flowers, I believe, would sell even more freely than those of the yellow P. officinalis. In former days, I used to put up some plants of this distinct, and without doubt, most beautiful species in late fall, set them in a cold frame to give them a rest for a month or six weeks before taking them to a violet house or other cool place, and at other times I would dig up the clumps as they grow in the bed outdoors late in November, and plant them undivided in the violet bed under glass, either may well insure a good crop of flowers without much extra labor, and perhaps less care than the violets would demand. In later years we have only occasionally potted a few plants for winter or spring blooming, stock having always been rather limited with us, and there never was any too much room to spare under glass, yet I think honestly, that a bench planted with these primulas would in most cases bring in

more money than the same space occupied by violets.

We have again this year a few of these plants in a corner of a carnation house, they are now only showing above ground, but will soon grow freely, and we expect to cut quite a lot of flower stems from them before March. Primula cortusoides, of which P. c. Sieboldii is only a variety, has rather large cordate and somewhat wrinkled foliage, the edges of the leaves are irregularly and deeply serrated. The flower stems are straight and erect, standing well above the foliage and are crowned with large umbels of lighter or deeper rose-colored flowers, the back of the petals is very often shaded much darker than the inner surface and the individual florets vary in size from 1 to 1½ inches across. When grown under glass the stems are usually from 10 to 12 inches long, but outdoors their height is 2 or 3 inches less; the stems are stiff enough to carry the weight of the dozen or more open florets and have remarkable keeping qualities, on the plants as well as in a cut state, superior in fact to P. officinalis, for the undeveloped flowers in the center of the umbel will open out in succession after being cut and inserted in water. The root stock is creeping, new crowns are formed annually under ground, but near the surface; outdoors they are rather late to start into growth, but when the young foliage appears once, we may look for the flower buds shortly after.

We have no miffy or fastidious plant here to deal with, extremely hardy as it is, it will endure our severest winters without the slightest injury, no protection against frost is needed. I have never seen a plant winter killed, but of course, they, like other plants, have their preferences as to soil and exposure. In a light and open soil, not too dry, they make a fine growth, in stiffer ground the roots are not so numerous and the leaves are shorter; in all cases a slight shading, either natural or artificial is of great benefit during midsummer. Divided into single crowns early in spring, good strong plants can be grown in a single season; they do not occupy much space and may be planted rather close in a bed, but far enough apart to admit of convenient hoeing and cleaning between the plants. Mulching with lawn clippings or other short light material on the approach of hot and dry weather will assist in retaining the much needed moisture in the soil; and an occasional liberal dose of liquid manure is very beneficial; they rather like this feeding, but rank or undecomposed manure of any kind in the ground has a detrimental effect on their welfare, and should be avoided. If the surface of the ground is kept loose and open, we may expect each plant to form from three to six new crowns during the summer; everyone of these will produce at the least calculation three flower stems and sometimes twice as many. This would give us an average of at least a dozen stems to every plant, and very likely more money could be demanded for this product than for that of a clump of violets, occupying about the same amount of space on the bench; there would also be a saving of two or three months' time in fall or spring, when the bench might come handy for other purposes.

J. B. KELLER.

American Carnation Society.

CONVENTION ARRANGEMENTS.

Arrangements have been made to hold the convention February 17 and 18, at Chicago, at the Auditorium hotel; both exhibition hall and rooms for meetings will be in the hotel. A special rate of $3.00 per day, American plan, has been secured by the committee, and rooms can be had in the Auditorium Annex on the European plan by those who wish. Mr. P. J. Hauswirth, 318 Wabash ave., chairman of the local committee, will see that rooms are reserved for those who request him to do so. Mr. J. T. Anthony, 318 Wabash Av., has been appointed Superintendent of the Exhibition, and to him should be addressed all inquiries from intending exhibitors.

form of the flowers is all that can be desired and it is claimed to be remarkably free in bloom, the cut flowers keeping and developing well. The rose is being introduced by the American Rose Co. and by H. Weber & Sons, Oakland, Md. H. Weber & Sons were awarded a cultural certificate for this rose at the American Institute Exhibition in New York last week.

Introducing a New Rose.

S. L. H., Ohio, has a promising yellow sport from Pres. Carnot and wishes to know how to introduce it.

THE NEW ROSE—MRS. ROBERT GARRETT.

New Rose—Mrs. Robert Garrett.

The subject of our illustration is the new rose Mrs. Robert Garrett. The American Rose Co., Washington, D. C., say that this is one of the few hybrid teas which do not go to sleep in winter but that it remains in active growth through the season. The color of the flowers in a properly grown specimen is an exquisite shade of pink. It is said to be superior in color to Madame Caroline Testout (this is high praise indeed). The

We judge that it has only lately sported and that S. L. H. can not as yet have had a chance to test its stability or value. Of course the first thing is to propagate it, using the utmost care in every detail. This had best be done by single eye cuttings.

The resulting plants must be given the best of treatment to secure a rapid vigorous and healthy growth. They must not be touched with the knife, however tempting the chance to make cuttings

from the young plants may be. Such a course will inevitably weaken the rose and destroy its constitution, and the past history of the trade is full of instances of this kind of folly. If the rose proves to have merit S. L. H. will lose nothing by making haste slowly. It will sell whenever he offers the stock, while if it proves of small value or reverts to the original type, as such things often will, it is far better for his reputation and ultimate profit that this happen while still in his hands.

When the plants have reached proper size and strength they may be allowed to bloom sparingly. The habit of the plant and the style and quality of bloom should be studied carefully with a view to learning its defects, its good qualities will probably be all too evident to him. We are all too prone to think our own crows are a little blacker than any other.

If no serious defects become evident and it seems to remain fixed, propagation can be proceeded with, but in no case must anything but good strong wood be used and no plant must be cut back sufficiently to give it serious check. Grafting on strong growing varieties will probably be the quickest way, with results as good as by cuttings, if the propagator is familiar with this method, if not, propagation by cuttings will be advisable. The best position in the best house will of course be given, with plenty of room for light and air, but undue forcing or high temperature, in order to obtain rapid growth is not to be thought of. When a sufficient number of strong plants for propagating has been obtained a number can be prepared and benched for bloom, and after they flower S. L. H., if he has watched with careful eye and unprejudiced mind, will have an accurate idea as to whether his production has sufficient merit to warrant his staking his reputation on disseminating it.

The methods to be used in introducing a new plant are many, and a whole volume could be written upon the subject. One thing is conceded by everyone, however, that is, that liberal advertising in the trade papers is absolutely essential.

We shall endeavor at a later date to give S. L. H. and others of our readers the benefits of the experience of some of the gentlemen who have been eminently successful in this line.

Annual Meeting of the State Florists' Association of Indiana.

The annual meeting of the State Florists' Association of Indiana was held today at the agricultural room of the State House with thirty-five members present. The most important issue before the meeting was the chrysanthemum show. President Stuart, in his opening speech, urged the association to try everything possible to hold another show this year. He attributes the financial failure of the last show to the general business depression prevailing at that time, and not to the lack of interest by the people.

After a lively discussion, a committee was appointed to make further investigation, and report at the July meeting, which will be held at Richmond.

The election of officers was disposed of in short order: President, J. D. Carmody; vice president, J. Bertermann; secretary, R. A. McKeand; ass't secretary, Fred Huckreide; treasurer, G. T. Huntington; executive committee, Fred Dorner, H. W Rieman, W. Bertermann, E. G. Hill and A. Parker.

A vote of thanks was extended to the outgoing officers and our new president made one of his grand speeches that will be long remembered by the florists.

In connection with the meeting, a flower and plant show was held which, although small, contained some very fine exhibits. Certificates of merits were awarded as follows: Carnation, best white, Evelina, R. Witterstaeter, Sedamsville, O.; red, Jubilee, South Park Floral Co., Newcastle, Ind.; pink, Albertini, South Park Floral Co., Newcastle, Ind.; yellow, Seedling, Fred Dorner, Lafayette, Ind.; variegated, Helen Keller, South Park Floral Co. Violets, South Park Floral Co. White roses, Bride, South Park Floral Co.; pink roses, Bridesmaid, South Park Floral Co.; red roses, Meteor, H. W. Rieman, Indianapolis. For best display of pot plants, the Bertermann Floral Co.; for primroses E. Huckreide & Son, and for azaleas, H. W. Rieman.

The meeting adjourned at 9 p. m. for the banquet, where your correspondent is going to join the boys, after mailing this letter, and if he is not able to mail a supplementary letter before 11:45 p. m., you may safely conclude that the banquet was a grand success. [We failed to receive the supplementary letter.—Ed.] J.

Tropaeolum Vesuvius.

This little gem was raised about nineteen years ago by Mr. Potter, gardener at Seacliffe House, Haddingtonshire, Scotland, and introduced to the public by Downie, Laird & Laing, of Edinburgh. It is surprising that it is not abundantly grown in this country, as it is a splendid bedder. Being very dwarf it is especially

TROPÆOLUM VESUVIUS.

useful for edging purposes. The plant is but six inches in height, foliage small, the bright scarlet flowers standing well above the foliage. It likes a warm and dry situation. It seeds but sparingly and must be propagated from cuttings. It will be given a good trial at Newport the coming summer by Robert Laurie. The plant shown in the photograph was in a thumb pot.

New York.

UNSATISFACTORY WHOLESALE MARKET.—VIOLETS LOWER.—PLANTS EXCELLENT IN QUALITY.—AMERICAN INSTITUTE SHOW.—LOCAL ITEMS.

Business in the wholesale cut flower market is far from satisfactory, and complaints regarding present conditions and prospects are general. Yes, this is the same old story, and it is getting just a trifle monotonous but it's a fact, for all that, and will doubtless continue to be a fact, indefinitely, and the correspondent must maintain his reputation for truthfulness, so "what are you going to do about it?" Only a man with very limited perception expects to find it otherwise, for so long as one thousand roses are supplied and only one hundred wanted or one thousand roses wanted and only one hundred supplied there is bound to be trouble. Carnations, the same and violets, ditto. So far as violets are concerned all indications point to lower returns from their sale, regularly hereafter, as the number of growers raising them successfully has multiplied and the receipts are enormous. Violets have had the credit of being a very remunerative crop for this market in past seasons and the effect of this belief has been a big increase in the area of glass devoted to their culture.

At no time in the past have flowering plants of such uniformly high grade been offered in this market as are seen in the flower stores this season. There is nothing rare or novel in the selection, which comprises azaleas, cyclamens, primulas, ericas of several species and other old favorites, but the average quality is exceedingly creditable to the growers who make flowering plants their specialty. The most reasonable argument ever offered for tissue and ribbon decoration—its usefulness in covering bare stems and other blemishes in specimen plants, never applied with less force than this year.

At the American Institute meeting on January 12th certificates were awarded to J. H. Dunlop for Lady Dorothea, a sport from Sunset rose, J. N. May for rose Clara Watson, American Rose Co. for rose Mme. Chatenay, and C. H. Allen for Allen's Defiance mignonette. C. L. Allen delivered an interesting lecture on "Intensive Farming."

W. F. Sheridan is receiving from F. W. Miles, of Plainfield, blooms of an enormous white carnation, a seedling which he has named Monarch. It heads the list on fancy prices.

On January 20th L. C. Nash starts for Florida where he expects to spend about two weeks luxuriating in green peas, strawberries and similar delicacies.

At MacDonald & McManus' are to be seen some of the finest Cattleya Trianaes in size, color and form that have ever been offered in this market.

Philadelphia.

GOOD STOCK SCARCE.—EASTER LILIES.—LADIES' RECEPTION ON WASHINGTON'S BIRTHDAY.

There has been a protracted spell of bad weather in this neighborhood recently.

Good flowers are scarce, it takes a man who has an order for fine Beauties for instance, to be very alert or else he will have to add an apology with the other fixings in order to satisfy his customer. The price is a shade lower, $7 per dozen instead of $8 being now asked for the specials. A good medium flower with stem eighteen to twenty-four inches is sold for $2.50 to $4 per dozen, this is the most popular size, and there are probably twelve dozen of these sold to one of the specials. High grade teas sell from $8 to $10; a few specials bringing $12 to $15, these are also scarce, and many that should be in the second-class masquerade in the first.

Carnations are fair, some good, many bad. Look out for the new kinds; they

get such high culture, and such elegant accomodations at home that when they come to be thrown on the world they can't stand the strain, and soon bow their heads, close their sleepy countenances and are no more. In other words the grower leaves them on the plants to sustain their reputation as to quantity, and then when they have served that purpose, they are sent to market and their fine size attracts buyers, who as a rule are disappointed, as such flowers almost invariably go to sleep the next day. Most all carnations are left on a little too long, at least half the stock that comes in should have been picked a day sooner. A trifle smaller flower that will keep a day longer is the best for the retail florist in the end. The $1.50 carnation is now getting quite common and the $2 kind have to be pretty fine. Violets appear to be plentiful, and are a shade lower, $1.25 being now high.

We see our friend L. says that the retail florist does not appreciate a good thing when it first bursts into view, that $2.50 per dozen at Christmas for Beauties was all they would pay the first year or so, and big and little were counted, everything went. Well that was many moons ago, business was good in those days, ranges of glass were going up everywhere. The growers as a rule sold without difficulty their entire stock of flowers, there was no grading. Considering everything, demand, size of Beauties in those days, we question whether roses of the same quality would bring any more in these times, and we have wintered and summered it and know all about it. Yes, Mr. L., the retailer does know a good thing when he sees it, and he often pays a good big figure for what is said to be a good thing, but isn't.

Easter lilies are now bothering the growers for as they develop so also does the disease, and many, very many, have to be thrown out. W. K. Harris has dumped about one-third of his stock which is a great percentage unless the balance of his stock is fine, very fine. A table of Japanese longiflorum is looking very well, there being but little disease among them.

R. Craig has gone to Atlantic City for a week to recuperate.

The ladies' reception at the Florists' Club rooms is to be held on Washington's birthday. This is to be a gala occasion and it is to be hoped that all of the old bachelors will be present and show that in spite of their lonely state they are not without hope. K.

The Blue Marguerite.

The common marguerite with its white, daisy-like flowers and silvery leaves, is familiar everywhere. A closely related plant has yellow blooms and is useful in much the same way as the white one, although not near so common or so popular. But the blue marguerite, otherwise known as Agathæa cœlestis, is very seldom cultivated in this country, and yet it is a very beautiful plant and useful in producing flowers during the winter months. The accompanying illustration shows the plant at its best as a winter bloomer. The leaves are deep green in color, the flowers of a lovely sky-blue tint with yellow disk—the former a rare and precious color in our greenhouses.

A. cœlestis is easily grown. Cuttings of the half-ripened wood root freely in heat during the spring months, and their subsequent treatment may be pretty much the same as that given chrysanthemums grown in the open and potted in autumn. The plant, however, requires a trifle more heat than chrysanthemums during the late autumn and winter months. It is sometimes rather difficult to procure suitable material for cuttings on account of the free-flowering character of the plant, but this difficulty is easily removed by cutting back a few specimens to a moderate extent in January or February, thus causing a new growth from which cuttings may be selected in abundance later on. The blue marguerite has been used as a bedding plant in England with very favorable results, and it would be difficult to imagine a floral scene of greater attractiveness indoors or out than one composed of blue and white marguerites, judiciously blended with a view to obtain the most from the variety of color afforded by the flowers and foliage of both plants.

AGATHÆA CŒLESTIS.

Boston.

TRADE IMPROVING.—DAFFODILS IN.—POPULARITY OF LOOSELY-BUNCHED VIOLETS.—SILVER MEDALS FOR NEW CATTLEYAS.—A FINE SHOW AT OAKES AMES'.—BAYERSDORFER HITS IT ON VASES.—LOCAL ITEMS.

A slight improvement in business is noted, and a steady movement seems to have set in, relieving the stagnation that has prevailed ever since the holidays. Whether it indicates a permanent revival remains to be seen but it is gratifying to be able to say that things look brighter all along the line. Carnations, which moved slowly, are going a little better, roses and violets also, although in the case of violets their abundance has brought the price down lower than is customary in midwinter. There are a good many daffodils and jonquils coming in now, the Von Sion being the most welcome, but rather undersized so far. Warren Ewell, who is the mainstay for this market in these bulbous flowers has begun to make his regular daily trips and has now pans of daffodils and tulips in pretty good shape, the tulips comprising a number of bright varieties that in previous seasons have not been offered until a considerably later date. There is a general disposition in this market to break away from the time-honored method of bunching violets in flat-headed formal bunches and many customers will accept them only tied very loosely, with the individual blooms at varying heights and the foliage mixed among, instead of arranged around, the flowers. Doyle is receiving a great many Lady Campbells of very fine quality bunched in this way, and finds that buyers prefer them.

On Saturday last, cattleyas were shown at Horticultural Hall by several exhibitors, silver medals being awarded to C. G. Roebling for an enormous bloom of Cattleya Trianæ Clinkaberryana and to Oakes Ames for C. Trianæ Lilian Ames, a new variety that turned up among a lot of recently imported plants, a superb white bloom, marked only with soft crimson and some yellow veins in the throat. From J. E. Rothwell came Cypripediums Leeanum, var. Masareehanum, Bellona and Ceres and James Comley showed a quantity of his seedling Acacia grandis. A very entertaining lecture with stereopticon illustrations on the bulb farms of Holland was given by J. K. M. L. Farquhar.

A visit was made recently to the greenhouses of Oakes Ames at North Easton, where Carl Bloomberg is gardener, by a party of the local enthusiasts and they were surprised to find the great improve-

ment that has taken place there within the past year. Many handsome Cattleya Trianæ are in flower and in the big aquatic tank which occupies most of one house many nymphæas are already blooming.

Newman & Sons have introduced a quantity of Bayersdorfer's tall willow vases for use in their store and windows, and find them exceedingly serviceable as well as attractive. The vases are of graceful design, silvered, with a tin lining to contain water.

W. H. Elliott has been appointed assignee for the late concern of Doogue & Co. Mr. Elliott is just recovering from a severe case of appendicitis.

M. J. Aylward will vacate the Wales place at Dorchester on July 1, and locate at Stoneham where he has bought land for greenhouse purposes.

Hector, the well-known canine companion of D. L. Taylor for many years, has followed Mr. Doyle's pet cats to the other shore.

Mr. Wm. Nicholson, Framingham wishes to communicate with anyone in the New England States who intends going to the carnation meeting at Chicago.

Visiting Boston: M. Rice, Philadelphia; H. Dreyer, New York.

Cut Flower Price Lists Received.

We are in receipt of cut-flower price lists from the following firms: Wm. F. Kasting, Buffalo, N. Y.; Kennicott Bros. Co., Chicago; E. C. Amling, Chicago; W. A. McFadden, Cincinnati; Holton & Hunkel Co., Milwaukee; C. A. Kuehn, St. Louis, Chas. G. Fleckenstein, St. Louis.

RYE, N. H.—W. Wallmark, who has done business for the past seven years on the South road, has disposed of his interest in the establishment to Messrs. Robert Frazer and James Manual, and will discontinue business here.

SITUATIONS, WANTS, FOR SALE.

Advertisements under this head will be inserted at the rate of 10 cents a line (seven words) each insertion. Cash must accompany order. Plant advs. not admitted under this head.

Every paid subscriber to the AMERICAN FLORIST for the year 1898 will receive on request, a coupon for one five line want "adv." free, to be used at any time during the year.

SITUATION WANTED—In east by florist, seven years' experience, single, 26; good references. Address I H A, Shippensburg, Pa.

SITUATION WANTED—By florist to take charge of greenhouses, best of references.
JOHN THOMPSON, 22 Courtland St., Norwalk, Ohio.

SITUATION WANTED—By a competent store man, late with Freidman; reference given by Chicago wholesale florists. R A, care AM. FLORIST

SITUATION WANTED—By an A No. 1 manager of wholesale or retail store; twelve years' experience in prominent cities. Correspondence solicited G, care American Florist.

SITUATION WANTED—A competent seedsman wants situation with a reliable seed house; can speak Dutch, German or English; correspondence solicited. H, care American Florist.

SITUATION WANTED—By an experienced gardener and florist, to take charge of private or commercial place; age 38, married. Best of references.
CHICAGO care American Florist.

SITUATION WANTED—By young man as assistant for general greenhouse work; several years' experience; single, sober and reliable Address LAWRENCE, care American Florist.

SITUATION WANTED—By a practical, sober and trustworthy man, single, middle aged and American; private or commercial. Best references Address DUTCHESS, care American Florist.

SITUATION WANTED—By an experienced grower of roses, carnations, 'mums, etc., to take charge of commercial place; age 27, single; strictly temperate; steady position. Address B, care American Florist.

SITUATION WANTED—By married man; practical all-round florist and gardener; capable of taking charge; 25 years' experience in Europe and America; good references. Address A B, care American Florist.

SITUATION WANTED—By a first-class decorator; 15 years experience in Philadelphia, ten years with Hugh Graham & Son, five years with John Dick, Sr. HARRY C. MOORE
41 South York St., Rochester, N. Y.

SITUATION WANTED—By practical florist of 17 years' experience, good cut flower grower, roses, carnations, etc. Competent to take charge; would work on shares. Reference and bond given. Address RELIABLE, care American Florist.

SITUATION WANTED—By a practical florist and designer; No. 1 rose grower; violets, 'mums, carnations a specialty. Now disengaged. Age 38; best references. Address W H, care 164 E. Main St., Alliance, O.

SITUATION WANTED—By practical florist and plantsman of experience and executive ability in all the requisites of commercial places; general propagation, landscape and outdoor operations. For more particulars address PRACTICAL, care Am. Florist.

SITUATION WANTED—By first class grower of cut flowers and blooming pot plants, also working foreman; German, single, age 35, 20 years' experience and best references Address C H, P. O. Box 693, New Rochelle, W. Chester Co., N. Y.

SITUATION WANTED—As foreman with some retired party by a practical grower of roses, carnations, violets, 'mums, palms, ferns and general stock, forcing of bulbs; a life experience; references O K, Address FOREMAN, care American Florist.

SITUATION WANTED—By a first-class grower of cut flowers and general greenhouse plants, as working foreman, 15 years' experience, single, age 29. Best references given; states preferred; will be at liberty February 1 Address ROSE GROWER, P. O. Box 693, New Rochelle, N. Y.

SITUATION WANTED—As foreman in cut flower establishment, mostly roses and carnations; must be up to date in conveedences; by all-round man, single, American, nine years' experience; don't use tobacco or drink; west preferred; good wages expected. References ROSES
2840 Cottage Grove Ave., Des Moines, Ia.

SITUATION WANTED—By an experienced all-round grower of roses, carnations, 'mums and general stock; good designer and decorator; capable of taking charge of a commercial place, good worker, sober and honest. German, 32 years of age. Good references; disengaged Feb. 1st Address F C R, Converse Greenhouses, Webster, Mass.

Care of St. Louis Cut Flower Co....
1620 Olive St., - ST. LOUIS, MO.

A New Ventilating Device.

The drawing herewith presented represents a new apparatus for greenhouse ventilating, patented by E. N. Pierce & Sons, of Waverly, Mass. Mr. Pierce, in describing the device, says: "We have endeavored to produce an apparatus that would not be liable to get out of order; hence, in its construction we use no set screws or bolts. We have also tried to overcome what seemed to us a serious defect often encountered on account of the sash not all starting at the same time or opening exactly the same distance. We think we have accomplished this by using two racks running on one wheel and pinion; one horizontal, the other vertical. The horizontal racks are connected together and one end of the vertical rack attached to the sash. It is operated by a direct pull from one end, causing every pinion wheel to revolve at the same time and carrying up every ventilating sash the exact distance which the horizontal has moved—be it one-half inch or two feet. For power we use a worm, but hydraulic pressure, bevel gear or sprocket wheel could be used. We are unused to technical terms and may fail to make ourselves understood, but the device seems to work all right, nevertheless."

Horticulture in Holland.

[*Abstract of a lecture by John K. M. L. Farquhar before the Massachusetts Horticultural Society.*]

Holland presents to the horticulturist many interesting features of her own. For two hundred years years she has supplied the nations of northern latitudes with bulbs from which to raise flowers to brighten their conservatories in winter and their gardens in spring, and she has established a constantly increasing business, the monopoly of which seems assured to her for ages to come. Her exports of bulbs and nursery stock now aggregate five million dollars annually.

Such elaborate flower stores as we have in Boston are not found in Holland. As we pass through Rotterdam or Amsterdam we see a flower market where a few men and women do the business, the flowers being chiefly of the more ordinary kinds, brought there in the morning and sold at low prices, and by noon the business is over. Dutch horticulturists devote most of their energy to supplying the wants of other nations, their home trade —especially in cut flowers—being exceedingly small.

In Holland we find no such gigantic greenhouses as may be seen on large estates in England, such as Chatsworth or Sion House, hardy trees, shrubs, vines and herbaceous plants being more generally depended on for landscape decoration. This policy we find successfully exemplified in Boston's new parks. Many of the residential streets and even the narrow business streets of Rotterdam have valuable space devoted to trees—more, I think, than our citizens would be willing to allot under similar conditions.

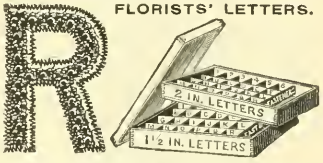
Haarlem is the largest city of North Holland, and the trade center of the bulb-growing district. If we proceed by steam train from Haarlem by way of Vogelenzang we pass through extensive bulb fields, towards the Lake of Haarlem. There is, however, no Lake of Haarlem now; only a great canal, surrounded by seventy square miles of lowland that fifty years ago was lake. Here on the western side of the canal we find the finest hyacinth ground in Holland. The soil is of various kinds—peat, clay and sand; the last being what is chosen for hyacinth culture. It is prepared by giving it a heavy application of cow manure, which is brought to the fields in boats from Leyden, Amsterdam or Rotterdam.

Hyacinths, narcissuses and tulips are set in trenches six inches deep; crocuses, scillas and snowdrops in trenches three inches deep. Before the cold sets in all the planted fields are thickly covered with reeds, which grow along the edges of the canals, and are cultivated in the north of Holland for this purpose. Great care is taken to prevent frost from reaching the bulbs, for as they are planted early in autumn they soon make long roots, and frost reaching the bulbs would raise them up and detach them from their roots. Spring flowering bulbous plants are rapid growers, requiring a large supply of nourishment, and unless their roots are well developed in advance of the top and kept in good condition, they will be unable to furnish the needed food, and failure, or partial failure, will result.

Large growers are prepared to furnish from four to five hundred sorts of hyacinths. Now, we prefer the single varieties, and the list of sorts is not as long as formerly. The propagation of hyacinths is by offsets, which form at the base of the bulbs. The largest bulbs are cut across the base several times or hollowed out, to increase the number of offsets which are formed. More of the single pink variety, Norma is grown than any other. One grower's trade requires 80,000 of them annually, the product of about two acres.

The average grower must cultivate in all about four hundred and fifty varieties of tulips. Of these about four hundred are varieties of the ordinary garden species. Tulipa Gesneriana, which was introduced to Western Europe from Turkey in 1554. Tulips are propagated by offsets, each root producing two, or sometimes three, salable bulbs, and perhaps one or two of smaller size, which require another season's growth before they are fit for market. They are also easily raised from seeds, the seedlings coming at first self-colored; while they remain so they are known as breeders. These have been made very popular recently under the name of Darwin. After a few years of cultivation they break away from their original color. If a white tulip comes striped or marked with another color, it is called a Byblœmen. Of this class the rose or red-tinted Byblœmens known as "roses" are perhaps the most desirable. A tulip having a yellow ground marked with another color is called bizarre.

In the early part of this century tulips having variegated flowers were most esteemed. To-day such self-colors as Gold Prince, the beautiful rose-carmine Proserpine, Vermilion Brilliant and the white, yellow and scarlet Pottebakkers are most esteemed. There are, of course, exceptions; the most conspicuous is the noble Keizerskroon, crimson with a wide edge of yellow. The tulip has become with us the most popular of the spring flowering bulbs. We use from a million and a half to two millions here in New England annually.



Daffodils are now receiving more attention from hybridizing than any other class of bulbs. Although the largest and finest bulbs come from Holland, they are extensively grown in England, Ireland, the Island of Guernsey and France. Japanese lilies are seldom grown in Holland; the Dutch dealers find it cheaper to import them from Japan.

The bulbs are lifted by hand, as spades or forks might injure them. They are carefully laid in baskets and conveyed by boat to the warehouses, where they are carefully dried and counted out into bags. When needed for shipment, buckwheat chaff is put in to prevent bruising. The value of bulbs exported annually from Holland aggregates three million dollars, the United States taking about $300,000 worth.

On the southerly side of the Lake of Haarlem are the nurseries of Boskoop. We see in these nurseries many plants which are not hardy enough to survive our winters, for many of which there is a large demand from England.

R. K. J.—Dianthus Caryophyllus is the botanical name of the carnations cultivated under glass in England and in this country.

WE have received the schedule of premiums offered by the Worcester County Horticultural Society for the year 1898. Secretary Adin A. Hixon, 18 Front street, Worcester Mass.

SOME GOOD VIOLETS.—We are in receipt from Loeffler Bros., Watertown, Wis., a bunch of Marie Louise violets which in size, color, fragrance and stem are exceedingly fine—in fact about as near perfection as we remember to have seen them.

CARNATION KATHLEEN PANTLIND.—We have received a bunch of this new pink carnation from Hopp & Lemke, East Grand Rapids, Mich. The color is an exquisite shade of pink, similar to Albertini. The flowers are of good size on long stiff stems, calyx extra good. It is a very attractive flower and is said to be from Daybreak x Scott. This is good blood.

ALBA SUPERBA CARNATION.—Mr. John Burton, of Philadelphia sends to this office a box of this new white carnation. In stem, calyx, form, color and fragrance it is all that can be asked. We understand that the variety is exceedingly free and continuous in bloom. In general style it resembles Daybreak very much, but apparently greatly surpasses it in strength and vigor. It looks as though Mr. Burton has something in Alba Superba which will fill a long felt want.

Greenhouse Building.

Freeport, N. Y.—Chas. Lenker, two commercial houses, one 25x200, one 14x300.

Lyndell, Pa.—Wm. Marshall, one greenhouse.

Williamstown, Mass.—J. A. Torrey, one commercial house.

Albany, N. Y.

A careful estimate places the Christmas trade here at one-third larger amount than that of last year. On cut flowers prices averaged higher than last year but they sold well, and this is true also of plants, both foliage and flowering, the demand for the latter, azaleas especially, exceeding the supply. Holly and Christmas greens enjoyed a bigger sale than ever before.

Mr. Thomas Davidson, who has conducted a florist business in Albany for the past forty years, is dead. Mr. Davidson was a successful business man, made many warm friends, and was prominent in local republican politics.

ELECTRO FREE TO CATALOGUE TRADE.

CARNATION "ALBA SUPERBA"

Originated on our place four years ago. We have grown it in the field all summer and transplanted to benches, and we have grown under glass all summer, and it does well in either case, the field-grown plants giving the best crops, but those kept under glass producing the finer flowers.

☞It is with the greatest confidence that I present the best claims of this new white Carnation to the trade. It is a beautiful clear white, and as may be seen in the illustration herewith presented, is almost perfect in form, closely resembling the Gardenia; indeed the petals being of such unusual size and substance, the pet name of "**The Gardenia Carnation**" is made very appropriate to this notably distinct flower.

☞The flowers are all of good size, measuring from 2 1-2 to 3 inches in diameter.

☞There may be varieties with a tendency to bloom more freely than this one does, but for a flower of this quality, I do not know of any. It has a stout, erect and very long stem; in fact the unusual length and strength of the stem, will, without doubt, render it, in that respect, the ideal Carnation for some time to come, as it too often happens that flowers of good size, color and form, but lacking in this very essential qualification, cannot be used to the best advantage.

☞Another of its grand good points is that I have never yet, under the treatment given it here, seen a burst calyx. It handles and keeps well, and does not "go to sleep" easily.

☞In habit it is robust and free-growing, being similar in that respect to Daybreak, every shoot throwing up a flower stem. It is a continuous bloomer and not a cropper. Plants will be ready March 1, 1898.

Price to the trade.
$10 per 100. $60 per 1.000

Address

John Burton

Chestnut Hill, PHILADELPHIA

Chicago.

The wholesale market has been quiet during the week. There has been a great falling off in the quantity of roses received, but as the demand has been light, only slightly better prices have been realized. Good roses of all kinds are scarce, but sufficient in quantity to fill the light orders received.

About the usual quantity of carnations are coming in, but on account of the shortage of roses they find a ready sale.

Violets are in greater supply and selling freely at slightly reduced prices. Supply and demand on the Harrisii lilies are about equal. Good tulips of many varieties are now in the market and bring good prices, although they are not sold in large quantities. They are principally used to decorate the windows of the retail stores.

Good valley is offered, but is not much called for. Romans and Paper Whites are neglected. Retailers report trade somewhat improved. Some complaint is made about the high price of Beauties, but there are not enough to supply the demand at the prices asked.

The subject for the next meeting of the Chicago Florist Club is "Pot Plants Suitable for the Market." Joseph Reeve will open the subject with a paper, and George Stollery will tell about the plants he saw grown for the market down east.

Alfred J. Brown, of Grand Rapids, was a visitor this week.

The committee on entertainment of the Carnation Society have been a little slow about coming to a decision as to the location of the exhibition, but it seems they had something worth while, up their sleeves. They have succeeded in getting suitable rooms in the Auditorium Hotel, so that both the exhibition and meetings will be under one roof and close together. There is no better hotel in the city than the Auditorium and Mr. Hauswirth, the chairman of the committee, has been fortunate in securing the rooms and the reduced rate of $3.00 per day. Rooms without meals can be had in the Auditorium Annex, adjoining the other hotel. Mr. J. T. Anthony, the superintendent, will make headquarters at 318 Wabash avenue. "J. T." knows all about the show business and if the exhibitors do their duty, he will make the exhibition a grand success.

Buffalo.

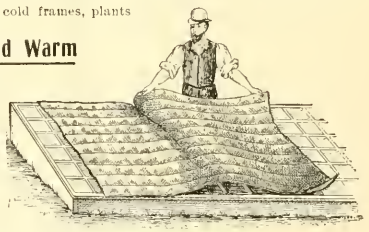
RAINS AND FLOODS.—BUFFALO FLORISTS VISIT CORFU.—NEW CARNATION GENESEE.

Business continues about as usual; that is, quiet. The only thing that has really boomed during the week is the Buffalo river and its daughters, the Cayuga and the Cazenovia. The rains came, the ice broke up, and lo! the flood. For a while it was doubtful if Messrs. Hewson, Buddenborg and other of our South Buffalo florists could continue to do business without the aid of boats, but as usual they kept their heads above water.

On Thursday the quiet little hamlet of Corfu was visited by a calamity almost as severe. A squad of Buffalo florists including Palmer, Long, Scott and our retired florist, Christianson, set out for the above place to visit Scott's establishment, and see just how the new carnation Genesee looks when it is well done. You can imagine that the poor carnation and several other things had a hard time to pass such an aggregation of talent, but they all agree that for a medium sized, good stemmed, free blooming white, Genesee is hard to beat. Other varieties looked very well indeed, and shows that the good country air which we hear so much about, tells. The Professor who was to have joined the above party was detained by the flood

It is plain to all that if we could give a verbatim report of the conversation which occurred on the trip it would be one of the most valuable commentaries on plants in general, and carnations in particular, that was ever presented to a confiding public.

Flowers seem to be plenty and good. Single violets are gaining favor here. C.



BROOKLYN, N. Y.—Mrs. M. Nopenny who has been conducting stores on Grand street and Ewen street, is missing and her relatives with the assistance of detectives are hunting for her.

Palmer's Hot Bed Mats

FROST PROOF

Made expressly for winter covering of hotbeds, cold frames, plants and seeds of all kinds.

Indestructible, Cheap and Warm

WILL not harbor mice or vermin. Easily handled. Dry out quickly after rain. Have now been in practical use three years. Cost less than old-fashioned straw mats and entirely take their place.

MADE IN FOLLOWING GRADES:

No. 1—**Burlap Cloth,** filled with combination wool and quilted, seams 3 inches apart and edges firmly bound.

Size 40x76 inches, 50 cents each.
" 76x76 " 75 " "

Made any length, 76 inches wide, at 12 cents per running foot.

No. 2—**Duck Cloth** outside, filled and quilted same as No. 1.

Size 40x76 inches, $0.75 each.
" 76x76 " 1.00 "

Made any length, 76 inches wide, at 16 cents per running foot.

No. 3—**Waterproof,** made of oil duck, filled and quilted same as Nos. 1 and 2.

Size 40x76 inches, $1.00 each.
" 76x76 " $1.25 to $1.50 each.

Made any length, 76 inches wide, at 20 cents per running foot.

That these mats are a **much needed improvement** over anything heretofore used for the same purpose, is demonstrated by the large demand and many testimonials from prominent men in the trade. Everyone using Hot Bed Mats should give them a trial.

THE SEED TRADE.

AMERICAN SEED TRADE ASSOCIATION.

JEROME B. RICE, Pres.; E. B. CLARK, 1st Vice-Pres.; S. F. WILLARD, Wethersfield, Conn., Sec'y and Treas.

THE NEXT meeting of the American Seed Trade Association will be held at Old Point Comfort, Va.

NEW YORK.—Wm. Elliott & Sons having repainted their establishment throughout, interior white, exterior bewitching pale green, are being advised by their friends to give a grand "opening" in barn-warming style, commemorative of the event.

DISEASE OF JAPANESE LILY BULBS.—Referring to certain statements which have been made regarding the disease of the Japanese lily bulbs, Messrs. H. H. Berger & Company advise us that Lilium Harrisii bulbs have been exported from Bermuda to Japan, where attempts are being made to propagate and grow the same, and the first importation from this stock was made the past season. In this way the Bermuda disease might become disseminated through the Japanese stock, but this remains to be seen.

California Notes.

The sweet pea acreage for 1898 is much larger than in 1897.—Radish, spinach, salsify and lettuce will be sown about as usual—carrots and table beets will not be as largely grown.—The growing of sugar beet seed is increasing. It is currently reported that Spreckels, the sugar king, proposes to grow all his seed in California; if the industry is rightly handled the state should soon supply the world with this seed.—Onion acreage is said to be only 10% or 15% of what it has been in the best years. The onion bulbs for planting are very scarce and selling at $2.75 per 100 pounds in San Francisco. Many growers discouraged by the low prices of the past two years and present surpluses sold their bulbs last fall, believing it more profitable to do so.—So far the rain-fall as reported by the California Weather Bureau is materially below the normal, this with the cool weather is not encouraging for the seed crops.—On the whole it would seem reasonable that onion prices will advance materially at an early date.

Northampton, Mass.

Trade has not been particularly brisk since Christmas, and stock has been plenty and of good quality, with the exception of Kaiserin and Meteor roses, which are decidedly poor. Prices have dropped to the usual winter level, but the public has been indifferent. Let us hope that this state of affairs will soon pass away.

Mr. H. W. Field has opened a branch store at the lower end of Main street.

At the annual meeting of the Horticultural Society the following officers were elected: President, Mr. E. P. Copeland; vice-presidents, E. J. Canning, Mrs. Mary Mann and Merwin Allen; directors, E. P. Copeland, Geo. Campbell, D. McGregor, G. W. Thorniley, Alex Parks, Jas. King, M. C. Parker, W. W. Lee, J. H. Demonde and J. Cole; botanist to the society, Dr. W. F. Ganong.

A motion to consolidate the offices of secretary and treasurer was submitted to the society, and will be acted upon at the February meeting. G. W. THORNILEY.

Thornless Roses.

Mr. W. N. M., referring to the garden of thornless roses at Assisi, Italy, asks if it would not be interesting to await the result of the crossing of this rose with some of our commercial varieties. Replying to him, these so-called thornless roses are not exactly strangers to the horticultural world, as we have them in the Banksias and one or two other species. The variety De la Grifferie which is the favorite stock with many of the French nurserymen is also practically a thornless rose, but as far as I have ever been able to ascertain, these thornless roses only bloom once each season, and it is possible those seen by the above writer may have been the De la Grifferie, as they will, if allowed to make liberal growth and then have a reasonable rest such as the climate would give where these were seen, produce a grand display in their blooming season, of good sized flowers in clusters of a bright rosy pink color. Hybridists as a rule are not looking for varieties that will only bloom once in a season (even if they are thornless) as the general desire is to have varieties that are perpetual bloomers or as nearly so as possible, and the florist especially demands only those which will give a constant supply of fine blooms for nearly the whole year round. If we wish any evidence to prove this just take the case of Marechal Niel. A more glorious rose can hardly be found than this when well grown and bloomed in perfection, and yet they are hardly to be found in any of the large centers where flowers are in constant use. Some years ago I asked one of the leading retail florists in New York why he did not want Marechal Niel any longer. His answer was, why simply because you cannot guarantee me a steady supply, and when yours are done blooming every one else is in the same condition, and by the time I had educated my customers up to want Marechal Niel, I had no more left to offer them. What my trade demands is a steady supply of the same class of roses; so I am afraid W. N. M. will have to wait quite a long time to see the results asked for above, at least from the busy florist.

It would certainly be exceedingly interesting work and study for the enthusiastic amateur having the time to devote to it, and the result obtained by such crossings may prove much more valuable to the horticulturist than is generally supposed; as an educator it would be invaluable, and we are all schoolboys yet with that good old dame nature as the principal teacher. JOHN N. MAY.

Jersey Items.

S. C. Nash, the Clifton rose grower, has gone south to look after an orange plantation which he has purchased in Florida. He will return in about a month.

A small fruit grower, who has a nursery not many miles from Paterson, N. J., recently read an essay before the New Jersey Horticultural Society at Trenton, N. J. An old farmer from the southern part of the state began asking the essayist questions about strawberries, and before the dialogue ended, it developed that the south Jerseyman had forgotten more about strawberries than the essayist had ever known. Moral: Be sure you are master of your subject before you read an essay.

Ed. Sceery, the Paterson florist, had the honor of having the handsomest piece of floral work at Trenton when the New Jersey legislature assembled. The design was presented to assemblyman John Donahue, of Paterson, by his friends. RUSTY CUSS.

DIXON, ILL.—We are advised by Mr. J. W. Davis, of Dixon, Ill., that the financial difficulties of the firm of Davis & Baird have been adjusted and that O. L. Baird has acquired the business and assumed all liabilities.

BUSINESS QUIET.—ROSES IMPROVING IN QUALITY.—PRICES DOWN.—VISIT FROM INDIANAPOLIS FLORISTS.—PERSONAL MENTION.

Business the past week has been rather quiet, and the market has been entirely in favor of the buyer. There was not an over-supply, but the demand was light, and stock of all kinds accumulated rapidly. Quite a reaction has been felt since Saturday for the better, and the first part of this week roses and carnations were cleaned out daily, especially roses, which were largely sold in advance of arrival. Roses are fast improving in quality, but prices have dropped considerably during the past two weeks. Violets are in good demand, with an equal supply. Some well-grown mignonette is coming in from Karl Schweitzer's place.

Sunday, January 16, a delegation of ten of the Indianapolis florists came down to give us a hasty call. They arrived early and started at once to the home of Evelina; they highly praised this new introduction, and were well pleased with its general appearance. From here Mr. Will and Christ. Murphy escorted the boys to Murphy town, and after inspecting the carnation industry here they partook of some light refreshments. Mr. C. C. Murphy had his big four-horse team ready and gave these Hoosier friends a delightful drive through that romantic country, over to J. A. Peterson's place, Westwood. I am sorry to say I have not yet heard how they enjoyed that five-mile trip on C. C. Murphy's tally-ho. Christ., I understand, handled the ribbons with much skill. At Mr. Peterson's place they were welcomed with a warm reception, and they in turn were very much delighted with all they saw. "Call again" was the password.

Mr. H. Weber, of Oakland, Md., was a caller the latter part of last week.

Mr. Will Gray, for the past five years manager of J. A. Peterson's Fourth street store, has severed his connection with that firm. H. SCHWARZ.

St. Louis.

STOCK SCARCE.—PRICES ADVANCED.—ST. LOUIS FLORISTS VISIT BELLEVILLE.—TRADE NOTES.

Stock has been scarce; there was not near enough to fill orders and prices advanced to holiday figures. Although the weather seemed favorable for big receipts, all growers report that their cut was very small, and in some cases their crop will be off for a few weeks. Decorations were plentiful this week, and the retailer was kept hustling trying to secure enough stock, and consequently a great many orders were placed outside of the city. All dealers report plenty of work ahead till Lent.

American Beauties have been very scarce. Brides, Kaiserins and Bridesmaids sold rapidly; hardly any Carnots are coming in; Meteors very scarce, and command top prices; Perles are more plentiful; Woottons are selling well for want of other red stock; La France are very scarce. Harrisii lilies are in good demand, also callas; Romans and narcissus are more plentiful and selling well. Smilax has been scarce. California violets are more plentiful, and are selling at figures where all dealers can handle them; double violets go slowly; single violets are in large receipts, and sell cheap. Carnations are arriving in good shape and find good sales on account of the scarcity of rose stock.

At the last week's meeting of the St. Louis Florists' Club an invitation was extended by the Belleville growers to visit their plants. It was accepted and sixteen florists attended the excursion. They were met at the depot by a committee of Belleville florists, headed by Mr. A. J. Halsteadt, the genial president of the St. Louis Florists' Club, and visited the following greenhouses: St. Clair Floral Co., W. L. Hucke, Michael Semmler, West End Floral Co., A. G. Fehr and G. Gooshart. After inspecting all the plants, and taking in all the sights of the city, they returned to St. Louis very well pleased with their reception, and all voted the Belleville members "jolly good fellows."

The St. Louis Cut Flower Co. report a good trade, and their good looking president, Eugene Michel, is kept hustling looking for stock. Owing to rush of funeral orders Mr. Jules J. Beneke came very near missing the excursion to Belleville.

The Krebs Floral Co. at their handsome Olive street store are kept busy, and Mr. Fred Foster reports plenty of work ahead. Last week at the St. Nicholas hotel they put up one of the swellest dinner decorations of the season.

Mr. Frank M. Ellis, the manager of the Mound City Cut Flower Co., is sick at home with pneumonia, and the trade all hope for his speedy recovery.

There was a full attendance at the meeting of the Bowling Club Monday night, and the boys are all glad of the change to "cocked hat." There was some good rolling. Mr. Carl Beyer was high man. J. J. Kunz second, Beneke third. High single score, C. Beyer.

A. J. B.

Death of Henry S. Rupp.

Henry S. Rupp, of the firm of H. S. Rupp & Sons, Shiremanstown, Pa., died at his home, of heart failure January 14, in his 72nd year. Mr. Rupp was prominent as a nurseryman, seedsman and florist. He was a member of several horticultural societies, and one of the pioneer horticulturists of his state. The firm with which he was connected had a widespread reputation for its strain of Chinese primula, and was one of the first to engage in the mail plant trade. Mr. Rupp was a model citizen, and he had a host of warm friends in the trade. He leaves a widow, four sons and two daughters. His death is the first break in the immediate family group, which is rather remarkable, the ages of the children ranging from 30 to 40 years. The concern of which Mr. Rupp was the head has been closing out the nursery department of the business, and will in future confine its operations to the seed and floral departments, under the management of Mr. John F. Rupp.

WORCESTER, MASS.—The list of lectures as arranged for the weekly meetings of the Worcester County Horticultural Society this winter is out. Only one of them touches floriculture and that is "What the Roses have Taught a Minister." Is this an instance of retrogression?

FITCHBURG, MASS.—The business of F. O. Willard has been sold out to Joseph Fuller, of Leominster. Mr. Willard has been in business at his late stand for nine years.

Cleveland.

ROSES AND CARNATIONS A LITTLE WEAK.—PRICES HOLDING UP.—VISIT TO J. M. GASSER'S PLACE.

Roses are coming small, poorly colored, and in many cases weak in the stem, light colored and thin in the foliage, conditions that only better weather can improve. Carnations, too, that ordinarily stand a good deal of unfavorable treatment with equanimity are generally a little below the mark, being rather undersized and in most cases have a more serious fault, lacking strength and stiffness of stem sufficient to hold them upright. Judging from some of the stock, both roses and carnations, coming from sources outside the city, the unfavorable weather conditions are not entirely confined to Cleveland grown stock.

Prices hold pretty nearly to the level of the first drop from holiday rates. Aside from the weather, business on the whole has been sufficiently good to prevent any great decline in any event. Indeed, nearly all the stores report a very satisfactory trade ever since the holidays, although the period of most intense social activity must undoubtedly close very soon now. The shortage of flowers that has been quite a feature will then likely disappear.

The writer, with others, took a trip out to J. M. Gasser's Rocky River establishment lately for the purpose of looking through the houses under the guidance of Mr. Bartels, who is in charge. Carnations are the leading feature in these houses, and, owing to congenial surroundings and efficient care, they certainly do well. Like nearly everyone, Mr. Bartels swears by Scott as the best all around carnation, both as to freedom of bloom, ease of culture, adaptability and desirability of color. The flowers here were large and perfect, and that peculiar bluish tinge often seen in Scott, and which sometimes detracts so much from its appearance, is practically eliminated. A darker pink seedling resembling Tidal Wave somewhat, but more desirable, seems to be a very good thing. Daybreak seemed to be rather in a sportive mood (or should we say sporty?) here, for in addition to the Philadelphia variation known as Victor, and an identical one of local origin, there is a whole house of a pure white sport that seems to possess all the desirable qualities of its parent, with which it is identical, save in the one point of color. Albertini and Bridesmaid are also grown, and while good when they do bloom, are too shy about doing so, to make them profitable commercial varieties. Mayor Pingree, Eldorado and Buttercup are grown for yellow, though the enterprising party from Detroit seems to be decidedly on top. Eldorado here, as almost everywhere else, this year seems to be very badly rusted. Mrs. Duhme, Lily Dean and Mrs. Bradt were also seen in fine shape, beautiful in color, size and form.

SWEET PEA REVIEW.—*By the Sunset Seed and Plant Co.*—Wm. Doxey, San Francisco, Cal., 1898. The third edition of this intertaining and useful booklet comes to us in a brand new dress and in greatly enlarged form. It is certainly attractive in appearance, and its contents are just of that concise and exact character which appeals to those who do not care to lavish time and study on prolix sentimentality. The lists and descriptive notes are alike valuable, the illustrations, gems of the photographer's and engraver's arts. The pamplet in short, is no more or no less than its title implies—a review of the sweet pea up to date—and all growers of this flower will find it helpful in making selections for specific purposes.

BOG AND WATER PLANTS.—*By Wilh. Monkmeyer, Curator of the Leipzig University Botanic Garden.*—Gustav Schmidt, Berlin, 1897. We have in this publication an excellent account of the history, culture and uses of all the plants considered available for the decoration of the bog and the water garden. The plants are grouped under their natural orders, and thoroughly indexed. The text, of course, is in German, and each one of the 190 pages bears the stamp of careful and conscientious work, such indeed as only a skilful writer and competent gardener could turn out. The numerous illustrations are admirable in every respect. Such a book is certainly worthy of a substantial cloth or leather cover in place of the stiff paper binding which holds its parts together.

FRYEBURG, ME.—C. F. Goodnow, of Sudbury, Mass., has built a large greenhouse here for cucumber growing. The Sandwich, N. H. *Reporter* is so elated over this enterprise that it devotes nearly two columns to a description of its magnitude, quoting from the bible to prove the antiquity of the cucumber and instancing the entertainment to the Sultan Khosroyschah in the Arabian Nights to demonstrate the cucumber's high standing at that remote time. Wonder if they had Jamaica ginger in those days?

BUSINESS FAIR.—CLUB MEETING.—NEWS NOTES AND PERSONALS.

Business has been fairly good since last report; the usual run of social functions, but none of them of unusual magnitude or any novelties in the style of decorations to notice, and the regular line of funeral work have formed the bulk of trade during the week, which in amount is a good average after holiday week.

The Pittsburg and Allegheny Florists' and Gardeners' Club held a regular meeting on the evening of January 13, with a better attendance than usual. The report of the secretary showed the club was in a good position financially, with a list of nearly 100 members in good standing after dropping forty names from the roll of members at this meeting. New officers are to be elected January 27. This being nomination night, the following were nominated: For president, John Bader, E. C. Reineman; for vice-president, James Semple, E. C. Ludwig, Geo. Oesterle; treasurer, James Semple; secretary, T. P. Langhans; assistant secretary, E. C. Ludwig; executive committee, three to be elected, Gustave Ludwig, P. S. Randolph, W. Loew, Jacob Miller, Louis Schmidt, Theo. F. Beckert. Mr. J. C. Grant was elected a member.

Mr. F. H. DeWitt, of Wooster, Ohio, of DeWitt & Co., carnation growers, and representing the American Rose Co., of Washington, D. C., attended the meeting, making a very good display of his specialties. The Empress carnation grown by Wm. Swayne, attracted the attention of everyone, a very dark crimson and also very fragrant. Northern Lights, a new seedling and one pink and white, 73 W, their own raising, were also much admired. Of the roses, Golden Gate and Mme. Chatenay were liked the best.

At Mr. Patterson's, Market street, Mr. Flemm reports business very fair, but no rush at all; prices satisfactory.

Mr. Henry Ludwig, who is back again with his brother, Gustave Ludwig, Allegheny market, reports business steady, but could stand more of it without injury to their health.

Mr. Robert Faulk, sales-agent for Hartman Bros., is serving his country at present as a juryman in our county court, and Mr. Gustave Ludwig will commence doing so in two weeks; it looks as if florists were pretty well thought of hereabouts.

Mr. Lincoln I. Neff, Sixth street, reports business with him as very satisfactory; could do more, but with the present condition of all business he has nothing to complain of. REGIA.

W. P. SIMMONS & CO.

Make the following statement to the readers of the American Florist

As originators and introducers of
"Silver Spray,"
"Tidal Wave,"
"Daybreak,"
and "Rose Queen,"

each of which has, we believe, proven even better than we claimed for them. We NOW say for 1898 that

"Mrs. S. A. Northway"

possesses all the good points that go to make up a **first-class** and **profitable** cut flower sort, and that we introduce it with even more confidence than we did the others.

It is an extra strong grower.
It is free from rust or disease.
It is a profuse bloomer.
It has exceedingly strong stiff stems.
It is of exquisite form full and double.
The flower is high built, petals serrated.
The calyx does not burst.
It is delightfully fragrant (a quality lacking in many new ones.)

OUR PRICE LIST now ready, contains prices on many other plants. SEND FOR IT.

W. P. SIMMONS & CO., Geneva, Ohio.

NEW PINK CARNATION

Mrs. Frances Joost

SEEDLING from McGowan x Wm. Scott; tested for four years. It is of an exceedingly pleasing color and proved itself an early and most prolific bloomer. It makes in a short time a fine bushy plant, and has the form and habit of what carnation men say make an ideal plant. Positively free from rust. The stem is strong and heavy enough to carry the large flower erect without tying of any sort. Calyx perfect; never bursts. It is a good keeper and a good shipper. You will make no mistake by trying a few. Rooted cuttings ready now. All orders filled in rotation. As the sale of the stock of this Carnations will be limited, it is advisable to order early if you want any. Satisfaction guaranteed.

CASH WITH ORDER.

Price, $2 per doz.: $10 per 100: $75 per 1000.

DAN'L B. LONG, Sales Agent, BUFFALO, N. Y.

St. Paul.

Trade has fallen off somewhat and sales are lighter than for several months. Society seems to be taking a rest before the final plunge preceding Lent. The main call now is for funeral work, with an occasional wedding thrown in to make things lively.

Good stock is scarce. The enormous Christmas cut seems to have sapped and drained the plants and the recovery is slow.

Red roses and red carnations are in the greatest demand, while everything sells readily from violets to callas.

Plants sell slowly though there is the usual demand for small palms and ferns. But flowering plants, though much in evidence, are not in great demand.

L. L. May & Co. have a fine lot of cyclamens just in their prime. I do not think a better strain was ever grown in the city. Their strain of cineraria is also unsurpassed.

Carl Johnson, the genial clerk in L. L. May's retail store, was married January 19 to Miss Wallin of this city.

THE MORRIS FLORAL CO

MORRIS, ILL.

Indianapolis.

These spring-like days have made flowers come out somewhat faster, but they are lacking in color and substance, and as business has been unusually quiet, they were hard to get rid of.

The Florists' Fire Association is slowly but surely gaining ground in this city and we may hope, that in the near future all of the florists will be members of our association.

John Hartje, John Heidenreich E. A. Nelson, I. Nelson, R. McKeand, C Sonnenschmidt, A. Vollrath and A. Wiegand formed a party and made a trip to Cincinnati last Sunday. R. Witterstaetter and E. G. Gillett met the boys at the depot and took them to breakfast, which had been ordered by the two gentlemen. After breakfasting the car was taken for Mr. Witterstaetter's place in Sedamsville, and as intended they spent most of their time there. They found Mr. Witterstaetter's carnations all looking well, especially two houses of his new one, "Evelina" which was unanimously pronounced very fine.

After partaking of the fine spread and having had a good time in general, they were taken in a four-horse coach to "Murphy Town," so-called because everybody there is named Murphy, and all occupy their time with growing carnations. One of the Murphys is perhaps a little more distinguished from the rest by his blackberry wine, which was something delicious.

The last place visited, was that of J. A. Peterson. Here things were found as they always are, neat and clean. The center of attraction were his violets, "Prince of Wales." It was whispered about that flowers picked from them sold at $10 a hundred at Christmas. Mr. Peterson happened to tell his visitors about having had all his chickens stolen a few nights ago and the boys were wondering whether it was the man who paid $10 for the violets. J.

Millepedes in Rose Beds.

I have a thousand-legged worm, as I call it—something similar to a wire worm—all through my rose beds. They are brown in color and hide during the day in manure or soil, coming out at night to literally cover surface of beds. There are large numbers of them, and they curl up when taken from the soil. Can you give name and how to destroy them?

These are commonly called millepedes, and may be banished by occasional watering with highly diluted kerosene emulsion—thirty parts of water to one part emulsion B.

Phormiums.

"Cemetery" says: "I grow a few phormiums, the variegated kinds, for centers of vases in exposed situations and think there is nothing so good. We are troubled, however, with their dying back at the tips of the leaves and turning brown. Can you tell me how to prevent it?

In reference to above, I have seen very large clumps of this useful plant (Phormium tenax variegata, I presume is meant) growing in California, where it is of course quite hardy, and nearer the east I have seen it used in so-called subtropical effects in outdoor gardening, but I have never noticed the trouble as indicated in "Cemetery's" query. However, the reason for the dying back of the tips of the leaves is not far to seek, I think, for in New Zealand, where this "flax" is a native, it is found to grow best in moist and swampy places, and a vase in an exposed position in the dry atmosphere of the central states in this country is just the opposite to what it has been accustomed to in its native habitat. Give this New Zealand flax an abundance of water, say two or three times a day, in the dry, hot weather of American summers, and I feel sure greater satisfaction will be the result. E. L.

MEETING OF THE GARDENERS' AND FLORISTS' CLUB.—AGAIN THE PALM SWINDLER.—BOARD OF TRADE BANQUET.

There was a good attendance of members at the regular monthly meeting of the Gardeners' and Florists' Club last Monday evening. It being the first meeting of the New Year, the lively interest taken in the proceedings by the members augurs favorably for the success of the club during the year 1898.

The subject for the evening's discussion was "Stove and Hothouse Plants," but as the gentleman who was to have supplied the essay was unavoidably absent, the time allotted to discussion was occupied in answering questions from the "Question box." One question relating to the growing of dwarf poinsettias brought out the answer to strike the young shoots in July and grow on rapidly in good light. The use of coal tar on greenhouse benches and walls, brought out varied opinions, some holding that it was dangerous to use it inside a greenhouse for any purpose, while others stated that they had used it for years both for painting benches and walls without experiencing any injury to the growth of plants, the only objection to its use being the difficulty of applying it. Several questions relating to the treatment of stove plants were answered very satisfactorily, and finally to destroy greenfly vaporizing with Nikoteen was recommended in preference to fumigating with tobacco.

The secretary presented his final report of the chrysanthemum show, showing that all accounts had been paid, the prize winners having received 40% of their prize money.

A committee was appointed to make all arrangements for the annual dinner, which will take place on Monday, the 24th, after the election of officers.

The palm swindler has visited Montreal, Mr. Girdwood being the victim, his plan was something like this, a few days before Christmas a gentleman called at a house on Guy street where there is a greenhouse, and asked permission to store some palms which he was receiving by rail, for a couple of days. He then proceeded to Mr. Girdwood's and purchased $125 worth of choice palms, requesting that they be delivered to the address in Guy street, and as the occupant of the house was known to be all right Mr. G. accordingly sent the palms, but as the driver did not bring the money back, he was sent next day to make inquiry and found that the palms had been taken away a short time after being brought there, by the gentleman who owned them The detectives being put on the job succeeded in recovering almost the whole lot in different houses in the vicinity, where they had been purchased from the stranger, but the interesting individual himself has not been located yet to my knowledge.

The board of trade banquet to the retiring mayor, Mr. Wilson-Smith, came off a few nights ago; about 400 sat down, including the Governor General of the Dominion and all the dignitaries of both church and state. The room was elaborately decorated with plants from the city greenhouses. I mention this fact to show the sort of competition the Montreal florists have to put up with. BEAVER.

January 15.

NEW

CHRYSANTHEMUMS FOR 1898

Alice F. Carey, Chempwec, Dolores, Minnewaska, Miss Gladys Vanderbilt, Robert G. Carey, Spotswood, at $3.50 per doz.; $25.00 per 100.

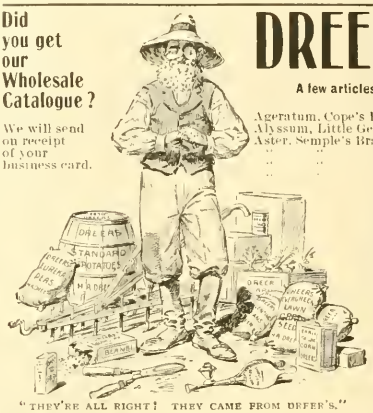
BUSINESS GOOD.—SUPPLY SHORT.—PRICES HIGH.—A PARTY VISITS BUFFALO.

Another busy week for our florists has passed, though last Saturday's business was very slow and quiet; rain and snow were falling night and day, and the miserable stormy weather kept everybody at home; whoever was in need of a few flowers for some purpose, had to order them by telephone or else do without them. This week Monday and Tuesday, several social events and a grand reception given at the residence of one of the foremost families in the city, caused a general demand in every quarter. The supply was decidedly short and second grades had as good a chance of being cleaned out as select stock, which is not always the case here. Prices remain high in all lines owing to the active demand; good stock always brought fancy prices ever since the middle of December. The scant supply of good roses is most sorely felt by those few storekeepers who have to satisfy the whims of the richer class of people. Walt. Salmon is the only local grower for this market; his roses are good but he is unable to supply the steadily increasing demand. Salter Bros. have their own rose houses and sell their entire crop over the counter, but have to buy additional stock most every day. Others who have less glass are compelled to get along as best they can; the supply ordered direct from out of town growers by these florists is not always up to the standard and once in a while even unsatisfactory, still they must have the stock and have to put up with this misfortune.

A little party of our florists, composed of two Salters, Fred. Schlegel, Walt. Salmon, Steph. Berri, Geo. Arnold and two Kellers paid a long contemplated visit to their brethren in Buffalo last week. They could not find W. Scott at home, he was away in Corfu on his farm, but as there is no lack of hospitality among the florists of that city, the strangers soon were escorted by a number of Buffalonians from place to place, and last they were taken to W. J. Palmer's plant at Lancaster. All had seen some of Mr. P's unsurpassed Daybreaks and were eager to see the plants in their home. It was a rare treat to look through these houses where thousands of long and stout stems are capped with as many large-sized, finely colored flowers, or buds, and the grower may justly be proud of such results, as everybody had to admit. All the plants are kept as clean and neat as wax, not only the carnations, but all other stock as well. Mr. P. is not very well satisfied with the behavior of his lilies this year. Many thousands are grown here, and he will surely have a very fair supply of good plants for all purposes, but he says there was too large a percentage of diseased bulbs among them, more than ever before, and he is disgusted with them apparently, though the plants he has left are healthy and thrifty.



The Rochester delegation, after viewing the houses, wanted to go to Corfu; the Buffalo element wanted them to return now for a game of ten pins and tried hard to hold on to their guests for the rest of the day, but without success. So here they parted and the Rochestrians went on in search of W. Scott on his so-called farm. They easily located him, busy and jovial as ever, none the worse for his sore leg. His carnations are in excellent shape; he speaks very highly of the new white, Genesee, and equally well of the scarlet Dazzle.

In the agreeable company of such a host as W. S., the time passes before we know it and it was getting late; there was but one train more which the visitors could take, else the party would be compelled to stay over night, and as the next day was a Saturday, the majority of the Rochestrians could not afford to be away from their business at this busy day.

TRADE GOOD.—GROWERS DOING SPLENDIDLY.—ELECTION OF OFFICERS, STATE FLORAL SOCIETY.—INTERESTING LECTURE.—ORCHIDS MORE POPULAR.

Trade continues to be very good in this city. Most stock is rather scarce. The fortunate growers who have good crops of roses and carnations are doing splendidly. The heavy frosts still continue to keep the violets back, but occasionally a friendly rain helps things wonderfully. The California and Princess of Wales are very scarce this season and are bringing good prices. Marie Louise is a little more plentiful than the former sorts, but the frosts seem to take all the color out of it. The stems are also very short. A few more Swanley White are to be seen this week than last, but the rains have made the blooms dirty and muddy, and the bunches have to be dipped before being put on the market. Roses are still scarce, but as a rule are of excellent quality. Not so many Testouts are to be seen as formerly. Of Beauties the supply is short and price high. Mr. Lynch's Brides and Maids are especially fine.

Carnations are in good demand and bring good prices. Mr. Sidney Clack has a fine lot of carnations, particularly whites. A few Mayor Pingree can be seen, but they are not being brought in in sufficient quantity as yet; some extra fine Armazindy are also finding their way into the market.

Smilax is in good demand, but all the growers seem to be sold out with a few exceptions. The prices brought are fair. Roman hyacinths are coming in rapidly now, but are not bringing the prices they did last week. Some Harrisii can be had but are of rather poor quality and high in price. We hear many complaints this season from the growers about Harrisii.

Palms, ferns and decorative plants are moving slowly. Extra fine pansies are to be seen in some of the stores. Many well-grown cyclamens are exhibited, but the florists tell us that like all potted plants the demand is very small.

R. W. Laake has opened up a retail store at 340 Sutter street.

Domoto Bros., of Fruitvale, have an elegant stock of Cycas revoluta on exhibition at their nursery. They also have many thousand seedlings, and report a growing demand for this plant.

The California State Floral Society held its sixth annual election of officers at Central Hall on the 14th inst. and elected the following officers for the ensuing term: President, Prof. E. J. Weekser, of Berkeley; vice-president, Mrs. L. O. Hodgkins, of San Francisco; treasurer, John Henderson, Jr., of Berkeley; secretary, Emory E. Smith, of Palo Alto; corresponding secretary, Mrs. W. H. Smyth, of Berkeley; accountant, Mrs. T. L. Walker of Alameda; directors, John Hinkle, of Oakland, and Mrs. J. R. Martin, of this city.

The reports showed that the past year was the most prosperous in the history of the organization, the society having paid off all its debts and still having a balance of $300 in the treasury. A committee from the California club appealed to the society in behalf of the floral carnival to be held in Union Square during the great mining jubilee, and received every assurance of the hearty co-operation of each member of the society. It is the intention of the committee to have an immense tent erected in Union Square in which the florists and wholesale growers of the city and vicinity shall display their plants and flowers to good advantage. It is to be hoped that the florists and nurserymen will do all in their power to make the display a creditable one.

A visit to Paul Grallert's carnation house shows many interesting things. Mr. Grallert tries every new variety that is introduced, he having at the present time several valuable new seedlings. Flora Hill he considers the finest of the newer sorts and next season will plant largely of it. His houses of Scott and Portia also are worthy of special mention.

Mr. Frank Pelicano has been making a very fine display of orchids in his windows lately. He says these beautiful flowers are gradually becoming more popular, and the demand for them increases yearly.

Mr. John H. Sievers, at 25 Park street, also had a fine lot of orchids during the holidays, all of which he says brought good prices. METEOR.

S. A. F. "Problems."

It should not be necessary, at this day, to say a word in proof of the value of organization and co-operation, and while all may not agree as to the practicability of the S. A. F. undertaking all that C. B. W. proposes in a recent issue of the AMERICAN FLORIST, yet none will deny the desirability that something be done to enable our national society to strengthen its position and enlarge its influence. Undoubtedly C. B. W. is right in saying that there is plenty of work to be done, and he strikes the keynote when he asserts that "it takes united effort now-a-days, and we will get it united if we go to work." No society can reach its full measure of usefulness unless the rank and file of its membership realize their individual obligations, and not until we stop asking, "What is the society doing for me?" and begin to inquire, "What can I do for the society?" will the desired revival be a reality. Here is the hopeful phase of C. B. W.'s contribution. The fact that one member of the society has waked up and turned his attention from the engrossments of his own business long enough to suggest some live issues that might, through the instrumentality of a national organization, confer some broadly practical benefit to our profession, although it may be remarked in passing that it is to be regretted that C. B. W. did not think to carry or send his ideas to Providence last August. Yet "it is better late than never."

While this society of ours may fall short of the standard some of us would set, yet its record up to the present moment is clean and honorable, and singularly free from the selfish or debasing influences which very few such organizations escape. Among its steady supporters have been many of the noblest men engaged in horticultural pursuits, and its official representatives have been selected in a broad and liberal spirit, without prejudice as to social position, creed, nationality, or other consideration; asking only that they be honorable men, loyal to the cause and faithful to the trust confided to them by their fellow members. But however earnestly the officers may work, it avails little if they cannot enlist the interest of the members. It is easy to say that "It is the business of such an organization to attend to such work, as all feel the need of 365 days in the year." That is just what those whom the society has made its official representatives have been anxious to find out.

The time for the annual session of the executive committee is approaching, and there can be no better time for the presentation of suggestions as to new channels for the society's activities. These gentlemen leave their homes and business in an inclement season and travel long distances to meet together—for what? I know from experience how earnestly they discuss every proposition looking to the society's increased usefulness, and how disappointing is the response made to their annual appeal to the members for suggestions in that direction. If the members of the organization see the need of work in specific lines, they should take this opportunity to press their convictions. It is the hungry man who is best able to tell what he wants, and not until he has been refused at home is he justified in appealing to the public.

EX-MEMBER EXECUTIVE COMMITTEE.

ROCHESTER, N. Y.—William McKay, florist, and Miss E. J. Barclay were married on January 10.

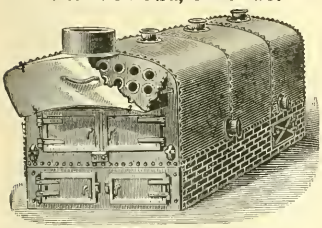
EUCLID, O.

Helpful Reminders.



Some benches have been made vacant since the passing of the holidays, and there are many pots of lilies, both Harrisii and longiflorum underneath. The lilies should be moved up to the light at once and given plenty of space, otherwise they will grow tall and lanky. It is well to spread sphagnum moss on the benches between the pots, taking care not to move the latter. The moss helps to retain the moisture and prevents sudden wilting. Most of the growers have now cut the last of their stevia, but a few pots should be saved for cuttings, same as chrysanthemums, and the remainder thrown away. Where the stevia has been handled properly it will have been found profitable and such growers will increase their supply. The old-fashioned tall growing variety is the most desirable around, and if given half the care generally bestowed upon chrysanthemums the results will be most gratifying. All begonias should be repotted now and cleaned up, new growth and flowers in March and April being most desirable. Where there are a few feet of bench space to spare, plant a few pots of smilax. These will supply a nice spring crop and come in just when it is always scarce. Bring in some tulips and narcissus now; they are just as well under the bench where they get half light in a temperature suitable for palms and ferns.

Look over ferns, both pots and benches; many of them start growth this month and the young fronds should have an opportunity to develop perfectly. Take out all the dead pieces, giving a slight mulching of leaf mold. Where the pot plants need shifting, put in a piece of sod at the bottom, but if the stock is large, it is always better to defer re-potting until later in the season. Do not take off all the fronds even though there is no use for them; the best of the old fronds should remain on the plant until the new fronds are half grown Sow some seeds now of lobelia, maurandya, salvia, centaurea and cobæa. It is quite early for cobæa, but this plant so commonly fails that it is best to start early with a few seeds and make cuttings from the first batch of plants if they grow well. Pyrethrum aureum should also be started now. Pick over azaleas, removing the new leaf growths that may be starting around the flower buds. This growth should not be allowed to develop until after the flower has attained its full size. Begin now to think of Easter. A few pots of Deutzia gracilis should be moved in now. This plant will do under the bench in a cool house for two weeks, giving more light and plenty of room as soon as the leaves begin to show.

Bring in all the potted shrubs now and arrange to place the pots on the ground or on benches covered with soil or moss. These plants do not take kindly to board benches over pipes,—but perhaps it would be well to give here the entire modus operandi of handling shrubs. Every retail florist has call for shrubs in spring. A list of the most desirable varieties should be made out and ordered from a nursery, not less than twenty-five of each, for they come at reduced rates in that quantity. Get plenty of Spiræa Van Houtei, Weigelia rosea, white lilac and Hydrangea paniculata. These plants should be secured early in spring, potted and sunk in rows in the open ground and they will thus be in readiness for the trade of spring, summer and winter, forming in general a taking and profitable investment. The pots should be taken up in November, before hard frosts set in and placed on their sides, forming a pyramid-like pile, which should be covered with manure and litter. The plants are moved indoors in January, taken out of the soil and put back in the pots with fresh soil and grown on for Easter trade. It pleases customers to be told at Easter that the plants they are purchasing in full bloom are hardy and suitable for their lawns. The first thought may be of the expense attending the use of so many large pots, but all these pots can be used during the summer for chrysanthemums, and in autumn the chrysanthemums go out in time to make way for the shrubs.

For PLANTS, PALMS and FLOWERS
...A Wonderful Preparation for the Promotion of Plant Life, Destruction of Insects and Scale..
This is one of the greatest preparations for the use of Florists and Plant Growers ever compounded. It gives to the foliage of plants treated the bright, fresh color of healthy, growing vegetation. It destroys all insect life infecting the plant and eradicates scale.
Besides improving the color of the plant, it effects a general betterment of its condition, aiding nature in disseminating and retaining the sap and life of the plant. The Tonic makes the foliage of the plant soft and pliable, and a beautiful bright green.

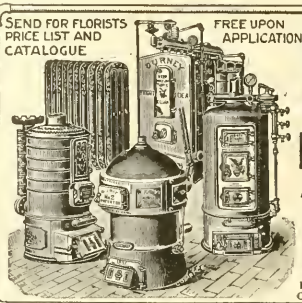
Cheap Cement Walks.

Answering "Regular Reader" as to the best way to make a good cement walk in a greenhouse I would state that it is not necessary to have the material of which it is made, more than three to five inches thick. But it must be put down properly. First make the bottom of excavation the same shape as the top of finished walk, that is a little higher at the center than at the sides. Then make it firm by tramping or pounding. If the ground has been filled in to bring it up to grade, be sure that it is well settled down. There should be a board or curb of some kind along the sides of the walk while the work is being done, so as to make the sides quite straight, as any uneveness at the side will be the first place to break, and this will often cause a general breaking up of the cement. This curb can be removed when the walk is finished.

The best material to put with cement is broken stones or gravel, but any rough hard stuff will do. We have made a pretty good walk with coal cinders and cement, but ashes are too soft to make the best kind of a job. It is not necessary to have the stone of equal sizes, in fact we think it better to have them from two inches down to coarse sand in size, but of course, free from clay, the finer stuff will fill in between the larger and make a solid mass. If using coarse gravel, I would surely add a lot of sand to it, as this would save cement, and make a cheaper path.

The important part of making a concrete path or wall is to mix the materials thoroughly, and this can only be done when they are dry, that is before water is added. Using one part cement to eight or ten of gravel or stone, select some hard level floor convenient to your work, and put there as much gravel as you can handle in fifteen or twenty minutes. Level it over about six inches thick, then scatter the cement evenly over the top and turn three or four times, now put on enough water to wet all parts of it, and turn over a few times, when it is ready for use, and may be shoveled into the path to the required thickness. Roll it, or firm it down immediately in some way. this must be done before it begins to dry or set. Finish off the top with a layer of finer and richer mixture say one part cement to three or four parts sharp sand. Mix this well while dry and put on thick enough to level up all over, usually one-fourth to one-half inch is enough of this finer mixture.



Most any grade of cement will do for this purpose, but the poorer the cement, the more must be used in proportion to the sand or gravel. We always think it best to use cement of a pretty good quality. N.

NEW BEDFORD, MASS.—The annual election of officers of the Gardeners' and Florists' Club was held in Masonic hall, January 10. The following officers were elected: President, William Keith; vice-president, Robert Mitchell; secretary, Peter Murray; assistant secretary, Thos. S. Dahl; treasurer, Charles H. Waite; executive committee, James Russel, James Garthley and Andrew J. Fish.

One Man Who Gets Satisfaction From the Express Companies.

About getting satisfaction from express companies for damage or delay, I can hardly agree with brother C. B. W. I am not so important a shipper that the question of the value of my business is worth the thought to the superintendents to whom my complaints may come, but it has been my experience that if a complaint was just I got satisfaction from the express company. Most of my shipping is with the American Express company. If a box of flowers is delayed beyond reason, or is damaged in their hands, I have always got what I asked for. I state the facts in the case and name the amount of damage, and as soon as possible a report is made and the claim settled, but I would say be careful to always be just with the express company. The Adams Express company brings me the greater part of my flowers, and I also ship some by them, and the same courtesy is shown by their agent and officers.

Not long ago I sent a box by them marked "to be delivered before 6 p. m. to-day," stating the date. It was not delivered until the next morning, although it arrived about 4:30. As it was for an evening party, the flowers were of no use; the express company settled.

I use a special tag, which has explicit instructions to express agents and possibly here is in part the reason for getting such easy justice, but I fail to get any recognition of the 20% special rate to florists, unless the shipment is so marked from the office at the starting point.

Ho! for Chicago!

Carnationists already have the fever in their bones, and the mind's weather eye guaged towards the next annual meeting at Chicago, where a royal welcome awaits them and an equally good time all around. When their congress is in session, I fancy that carnation lore will reel out no end of interesting experience, yes, and the convention-al air will be spicy with discussions—before and after—certicates are awarded.

Spiciness is a naturally inherent quality with carnations, most people like it, and sniff it from afar.

Chicago is well located for a carnation convocation and exhibition. Chicago has flower-loving people and is recognized as a horticultural center. I will not dispute it even being the center of the universe. I both like and respect Chicago, and the World's Fair opened people's eyes generally as to its marvelous industries and possibilities. In several respects Chicago is as great or greater than Greater New York! Eastern horticulturists envy as well as admire its earnest progressive spirit, executive ability and superior management. In the matter of flower shows, I believe it is the only city on record for '97 that came out ahead, with money in the treasury! and this, too, with an extensive, elaborate and expensive exhibition.

It is fully expected that the carnation exhibit will be phenomenal, excelling in quantity, variety and quality over preceding years. If this display could be made public, and suitably staged in the right place, it might be made a source of revenue to the society. So far, this has not been the policy of the society, but it would be educational and further interest the people in the people's flower. Comparatively few retail buyers know the possibilities of the carnation, to most of them a carnation is a carnation; red, white or pink, and expect the same average price for any variety or quality. The biggest ones, however, are always preferred, but no increase in price, mind you. Customers would like exhibition blooms at Greek's prices. If the Grecks—in habitat—annoyed the Turks as they do the poor florist, I don't wonder there was war! The flower loving public needs to be educated as to grading carnations, same as roses.

This is being practiced in some sections, but not all. Rarely a customer fails to appreciate the ratio of variety and quality, as to roses, but grade the price of carnations proportionate to quality, and the issue is more problematical. Carnations all look alike—to some people. In my experience but one name is universally known, namely, "Daybreak"—some get it "Sunrise"—that is not so far out of the way. After Daybreak, Scott is intelligently asked for, the names of other varieties are unknown quantities with the mass of buyers. "I want a couple of dozen red pinks, and be sure and put in some asparagus."

"Would you like Portia, Jubilee, Bon Ton, Morello or Red Jacket?"

"Oh, bother with the names! I want some nice ones. What are carnations per dozen?"

"Twenty-five to fifty cents."

"Twenty-five cents is all they ask down the street. Don't forget the asparagus. Here's your half-dollar."

O, tempora! O, mores!

Grow good carnations, grade them and likewise grade your customers. The carnation belt is so flexible that it takes in the whole country. The best way to grow a good carnation is to know the variety, and you can better supply the requisite conditions. It is rather fancy business growing fancy carnations for ordinary trade.

Considered from a pecuniary standpoint, 'tis but "casting pearls before swine," and the fancies "go to sleep," in fact are sleepier as a rule, than the common herd. A smaller wide-awake carnation sells better at Easter than a big sleepy head. A fully done carnation may be a peach over-ripe. But if a carnation flower was as durable as a chrysanthemum bloom, I would go out of business, and trust my luck to Klondyke.

There is some sentiment to a withered rose, my lady wore it in her hair, and I will cherish the precious mummy, for a bookmark, and sigh at the mere sight of it! But I will draw the curtain on the passing of carnations and chrysanthemums, no one cares to see this act.

There is no occasion to brace up the popularity of the people's own flower, as it belongs to the people, it is common property. So let the public see what is being done by carnationists and the carnation society.

Send in exhibits from any available source and provide that these visitors shall be properly taken care of. Full many an excellent variety is not generally known. Laura Vick is a scarlet Tidal Wave. Those who grow Tidal Wave satisfactory would find this sport a paying sort. The color is bright. Another sport from Rochester is a clear white Daybreak, grown by J. O. Pridmore. Several so-called white sports of Daybreak are greenish or dull, this one is really white. Mr. Marquisee of Syracuse has a rose pink seedling Columbia, that is very promising indeed, and several others for

that matter. He has one entire house devoted to seedlings to hear more of later. Mr. Baker, of Utica, has two fine ones in Red Jacket and Oneida, "Argyle," of Stollery Bros., is already well known around Chicago. Genesee is a prominent white in Buffalo and vicinity.

Never before was the country so full, even to overflowing, of good things. Let them be represented at Chicago. Send good specimen blooms—not too mature—carefully time your shipping, and enclose a show card with the name of the variety and grower. If you decide to enter for a certificate, be on hand yourself to look after preliminaries, and above all things see that your candidate is bristling all over with "points" at least eighty-five straight. GROVE P. RAWSON.

Carnations.

DETERIORATION OF VARIETIES.

I will confine this article to the origination and dissemination of new varieties and the part it may have in their deterioration.

The hybridizer who recommends the use of some certain variety as a parent plant because it will produce 80% or 90% double flowered seedlings, and who seemingly has no higher aspiration than simply to obtain a large percentage of double flowers regardless of all the other and most vital points that should be taken into consideration by his class would, as a rule, confer a favor on the trade by either retiring from active service or amending his ways, for certainly there is no one thing in the carnation business that requires more study, thought and care than the origination of new varieties. The most important of all objects to be kept in view is the development of varieties with stronger constitutions that will better stand the poor cultivation (or rather the bad homes they will have to live in) and abuse they are sure to receive from many growers after they are disseminated.

I do not mean by strength only varieties having very large grass, for often a large fat growing seedling does not possess much vitality, and is quite liable to be a subject of disease. It is no sign of health and strength because a person may be corpulent, but quite often the reverse.

It is impossible to decide from the seedling plant as to its future habit. Very often it will improve the second and third year and almost entirely change in its habit of growth and bloom, but more often it will grow poorer. A seedling that shows any signs of a diseased or weak constitution during the first three years should be discarded as soon as the trouble is discovered, and under no circumstance should it be used to breed from. Consumption is hereditary and so is a weakly debilitated constitution in carnations. It is a mistaken idea to think they will "grow out of it." I have never known of a single case where they did not grow worse rather than better. We should not loose sight of the fact that our idea of a perfect flower is exactly opposite in most cases to that of nature. Nature's perfect flower or plant is one that has strength to freely reproduce itself, while our ideal perfect flower must be of a certain standard of size and form, and as we approach this standard we do so at the sacrifice of the strength and vitality of the plant. It therefore stands us in hand to be careful in breeding to maintain and develop so far as possible strength and vigor of plant.

The practical hybridizer will keep record of every cross that he makes and take notes of the result as to strength and vitality of plant, blooming habit, size and form of bloom, and color of the seedlings obtained. These notes should be kept in a book for reference to guide him in future work. A thing that is worth doing at all is worth doing well.

As to the culture of new varieties before being disseminated I do not recommend the very heavy feeding given by some growers, for a variety should show itself profitable under good ordinary culture before it is sent out, and in case it is only profitable under the best of culture, it should be so stated when sent out, for it is impossible for many growers to do this owing to circumstances which they can not control.

These notes are not directed to any individual originator. I welcome each and every good variety, no matter who the originator may be, nor do I wish to discourage any one in his efforts, but believing as I do that carnations are but in their infancy and that we have every reason to expect to have as many desirable colors and shades for cut flower purposes in carnations as we now have in roses, and that the demand will increase for them from year to year. Let us, as originators, in no way lend a hand to check them in their onward march. Remember one thing, that there is no law compelling you to send out a set of seven or any other number each year and that simple variation in color of a seedling (even though it is a valuable color) alone is not sufficient justification for its dissemination. It is a successful grower that gets a money maker once in two years. They don't come by the score or by chance. Be as careful as possible you will sometimes even then make mistakes, but for the best interests of all they should be as few and far between as possible.

In conclusion allow me to say to the hybridizers that with us rests, to a great extent, the future of carnations, and if heretofore you have been careless and thoughtless in your work, to commence anew and set up some mark to work for, keeping in mind always the important point, strength and vitality of plant. You will meet with many failures, but remember it took five generations to produce Daybreak. I wish you all the greatest success in your work.

In my next article I will write of some of the "innumerable species" of propagation—the species that have yellow streaks in them. A. T. SIMMONS.

Carnation Notes.

Three weeks from this time the carnation will reign supreme, and the American carnationists will assemble in Chicago to introduce their new candidates for popular favor and also to show the progress made with the divine flower during the past year. It is now time for all intending exhibitors to think about completing their plans, and one of the most important things to be considered in this connection is the scale of points adopted by the American Carnation Society, under which all blooms will or should be judged. Take, for example, the scale for the large vases and all vases of standard varieties. The principal feature is color, with a possible twenty-five points, and it is therefore necessary that every flower be of a clear and decided color. Washy or "blue with age" blooms will not score very high under this head, and many a premium is lost to otherwise good flowers through just such defects.

The next thing on the programme is stem with twenty points, and these with the color points come within five of half the possible total of one hundred. Then we have size, form and fragrance with fifteen points each, followed by ten for substance. Now with regard to form, all the flowers should be as even as it is possible to have them, rejecting those with bursted calyxes and also those that show any tendency to revert to the original single form, for if entered in the open classes they are certain to run up against some of the pets of the seedling growers, which by all account are the best that have ever been seen. The points in the seedling classes are more evenly divided, bringing in fifteen points for calyx and ten points for plants. In the selection of plants choose those with open flowers, but showing also buds and shoots in various stages of development, as habit and growth count high here.

Let all flowers develop fully before cutting, which should be done early in the day, before the sun gets at them. Several varieties, especially those with petals of a waxy texture, will have an old and bruised appearance about the edges if cut when the sun is shining full upon them. Such blooms appear to lack substance, and their appearance is bound to condemn them. All blooms should be stood in water at least twenty-four hours before shipping, and arranged in the jars so as to give each individual flower plenty of room to expand perfectly. The place in which they are stood should be dry with dull light and a temperature of 50°. This not only stiffens the stems, but also improves the flowers very much.

C. W. JOHNSON.

THE LATE HENRY MICHEL.

Death of Henry Michel.

Died at Marion, Ind., January 20, Henry Michel. He was one of the pioneer florists of St. Louis, Mo., and was one of the best known men in the trade. He was born near St. Louis, 1841, and was engaged in the floral and seed trade there until 1889, when he was attracted to natural gas fields and towns of Indiana. He located at Marion, where his labors

WELL-HOUSE, GARFIELD PARK, CHICAGO, JANUARY, 1898.

were crowned with great success, having in a few short years established a splendid business and a magnificent home. Deceased leaves a wife and one son.

Impressions Made on a Westerner by an Eight-Days' Trip Among the Big Ones Down East.

[Paper read before the Chicago Florists' Club, January 27, 1898, by George Stollery.]

Arriving at Philadelphia a few hours before the Carnation Exhibition held there, I had time to examine their fine place of meeting. How thankful the florists of Philadelphia ought to be that they have such a place. The exhibition was only fairly attended, considering the good showing of carnations. As all the varieties have been mentioned in the trade papers, I need not describe them here.

My first call was at Will Craig's place, and I spent a very interesting hour among his carnations (of which most of the plants grown consist). I found all the novelties of last year, giving me a chance to see them growing side by side. Flora Hill was doing well, also Jubilee and Pingree. Harrison's White here, as at every place I saw it growing, was making a poor showing. Lily Dean was exceptionally good, making one of the finest benches of carnations I have seen; no other variegated can compete with it in beauty and chasteness.

On my way back to the city I called on Robt. Craig and found him just recovering from a severe illness. At this place the entire plant is devoted to pot stuff, palms, crotons, azaleas, Harrisii, hybrid roses, etc. Areca lutescens he has in unlimited quantity, in all sizes. Azaleas too are exceptionally well grown, being one mass of buds. There was a large quantity of Crimson Rambler in 6 and 7-inch pots four feet high, trained on sticks, that will make a fine showing at Easter. Hugh Graham's place came next, the home of Victor, and it certainly is at home. He had one house full at the time I was there. It was one of the finest sights I have ever seen in carnations; flowers in quantity, large and well formed, with good stems. If it could be done out this way like that, no one should be without it. It is somewhat stronger than its parent. Palms were here also in large quantity.

Mr. J. N. May was next on the list. Roses are mainly grown here, and grown extremely well. Beauty was in the best of health and in fact everything was doing remarkably well. One bench of Clara Watson rose looked well. This rose has a most beautiful color and should find a ready sale.

In carnations, a house of Lily Dean was good, one could say extra, if it had not been outclassed by a variety planted in the next house of the same general outline, only flowers a great deal larger. I believe this is unnamed at present. Mr. May says it is bringing $10 per 100 in the New York market. He has some other seedlings on trial that will undoubtedly be heard from later. One thing that impressed me at this place was the general cleanliness and neatness of the whole plant. What a pleasure it is to walk through such a place. Leaving Mr. May's, I went to Mr. E. Asmus', Hoboken, N. J. Stock in general was remarkably fine, especially carnations, which were the finest I saw on my whole trip. The varieties were limited. The most striking were Victor, Daybreak, Mrs. Bradt, Flora Hill and a new red seedling, Mars, I believe it is called. Can't Mr. Asmus give us a few pointers on how it is done?

Next morning I made my way to the New York Cut Flower Co. to see the stock come in. A large amount of it came in, packed for the different retail stores. In fact most of it did. This saves a great deal of handling and bruising. One thing I noticed especially was that the salesman picked out the stock himself, instead of letting every Tom, Dick and Harry do it for him. This is a point some of our wholesalers might take a lesson from.

Dailledouze Bros.' place is the home of all carnations. As the man said, there was no bad beer, only some better than others, so one might say of carnations at this place. Planted a good distance apart and tied up neatly, they are a sight worth going a long way to see. The place has prosperity printed on it plainly in every direction. Mr. C. Allen was next. Scott was there doing the best that I saw anywhere. A house of Asparagus Sprengerii was giving a large crop, planted out in a solid bed; strings three to four feet long, and plenty of them. Allen's Defiance mignonette does not seem to be able to defy disease, as it was pretty badly used up.

C. W. Ward's Cottage Gardens: Here I found a large assortment of plants, both in benches and in pots, all showing without exception extra good cultivation. Palms were stocky and grown cool; they were in the best of health. Cannas and geraniums were extra good. Of the latter he has a very fine assortment. In carnations he has very little besides his own and Dorner's novelties and seedlings on trial. All varieties were clean and healthy, and were carrying a large crop of flowers. On my return trip I had a stop-over of an hour or so and called on Wm. Scott, at Buffalo. I saw here Genesee, the new white carnation that is being introduced by D. B. Long. It looks as though it should prove a good bread and butter carnation. My next stop was at Toronto, at Mr. John Dunlop's. I found roses doing grandly; Brides and Maids, Perles, Hoste and Sunset were extra good; Beauty was only fair. It looks as though he has a good thing in his new rose, Lady Dorothea I believe is the name; a sport from Sunset, it is decidedly better color than its parent. His carnations were below the average, but he has some seedlings that should be heard from later.

An hour's ride brought me to Mr. Dale's, Brampton, and here I saw the best roses I had ever seen. Brides and Maids, Perles and Hoste were immense, flowers as large as Beauties, and large quantities of them. The plants were very large and foliage like leather, making the finest example of health that one could wish.

With this place I finished my rambles, having met with the greatest hospitality and attention from everybody visited that it has been my good fortune to meet.

A Crozy Introduction of 1897.

The flowers of Secretaire Chabanne stand out from the spikes separately in such a manner as to attract attention. Its color is a beautiful orange with deeper shadings; flowers large and round, foliage green; extra strong grower and free flowering, and stands three and one-half to four feet high.

CANNA SECRETAIRE CHABANNE.

ROSES.

Notes.

It is now quite time to look over the ground for next season and decide what we shall grow and which discard, also how much space shall be devoted to each variety. It won't do to simply put in a batch or two of cuttings of each, aiming only to have enough and to spare, or when we come to plant next summer we may find ourselves short on certain kinds and "long" on others; Meteor, perhaps, to spare with no chance of selling, Beauties short and must pay a long price or fill up the house with some other variety. If we would just now take whatever time the task might require and perfect our arrangements for next summer's planting, we could in most instances avoid having any large surplus left on our hands at the end of the season, representing so much space and labor lost; neither should there be any occasion for disappointment over stock that didn't "pan out" as the seller assured us it would.

Last summer I had so many complaints reach me (through my connection with the FLORIST) because of inferior rose plants purchased in various parts of the country, and had so many inquiries for really first-class stock which could be depended upon that I took the occasion to say in my notes at the time how apparent it was that while poor third-rate plants were always to be had cheap (?) there was no money in them for either grower or purchaser, but the man who would furnish a good article at a fair price (a good price) would have little difficulty in finding a market for all of his product. It is worse than galling, though, after paying a good price and expecting to receive good plants, to find we are no better off than our neighbor who bought cheap. One difficulty in the way of securing choice rose stock is the fact that nearly all of the most successful growers positively refuse to take from their plants more wood than is needed to replenish their own houses; but I am straying away from my subject. The point I wish to make is, that the way to have good stock is to raise it rather than have to purchase, and to raise only such kinds, and as many of each as you are certain to use, or have a reasonable chance to sell.

It is fortunate for the rose grower (cut flowers) that he hasn't so many varieties on his list as the chrysanthemum man, and so is not in as bad a predicament as that gentleman when it comes to a revision of the list, still it is often very difficult to decide whether to continue to grow a certain variety or otherwise. In determining what varieties, and how many of each to grow, I think every man is his own best judge, the local demand for a certain rose, and our ability to grow it should be the sole factors in helping us to decide. I think we make a mistake in giving valuable space year after year to kinds that never do well with us; no matter what the demand may be if we can't grow a rose successfully I think it is much better to leave it alone and plant something that we can grow.

The tendency at the present time, especially near large cities, is to make a specialty of one or two kinds—such as the soil or locality favors, and by giving undivided attention to these a superior article is produced and the house soon becomes noted for its A1 Beauties, Meteors or Maids, as the case may be, which would not happen if many kinds were handled and only a few flowers of each found their way to the market. A safe rule in all cases it seems to me is to plant heavily of those kinds that grow the finest and bloom the best, whether it be Beauty, Meteor, Bridesmaid or some other variety, (provided always that the variety is a good seller) it is seldom advisable to hang on to a rose, however much we may admire it, after it has ceased to be popular.

So much has been said in these columns about the selection of wood for cuttings, and the importance of this matter is so generally understood that it is perhaps unnecessary for me to enlarge upon this feature now; I wish to mention one

thing, however, that we should never lose sight of when taking, making, and potting off cuttings, namely, that the cutting we are handling is the very same plant in miniature that is to bloom in our greenhouses next season; what we sow now we shall reap later, if the foundation we are laying is weak and feeble it is idle and foolish to expect to build a strong and perfect plant. We do not get a new plant each year but simply a continuation of the old, and the mature blooming plant is the cutting rooted and developed, nothing more. How important then to have a cutting that is sound in every fiber, not a little puny thing, or a golden leafed species; not some hard scrubby stuff that has been securely hidden away from the sunshine for many weeks, but the richest colored, freshest looking and best developed shoot the plant has formed is the one that should be lopped off and find its way into the cutting bench. The question of blind or flowering wood is not so important as health, vigor, maturity and lustre of foliage.

Some growers believe in putting in one large batch of cuttings, enough for their needs, and so get through with it at once; it may be more trouble and expense to protract the propagating season, but by doing so we have the advantage of a larger choice of wood that should amply compensate for extra trouble.

ROBT. SIMPSON.

Black Spot of Rose Leaves.

One letter in the morning mail will ask for information about the black spot, and contain a long account of the ruin it has brought. In the afternoon the complainant is visited and the writer stands face to face with the facts. Before returning home a run is made through the houses of another grower of roses, and when he is asked about the black spot the reply comes that he does not care a fig for it. What there is of it in the houses it is claimed is a real benefit.

It goes without further saying that all rose growers are not agreed upon the destructiveness of the black spot. The leading varieties vary and when a grower has his houses filled with the American Beauties the black spot may be quite different than when the rosarian is growing chiefly the Bride or the Bridesmaid.

In short, some sorts are much more susceptible to the black spot than others, the reason for which is not yet well understood. The tendency of plants to do this or that is as obscure a function in floriculture as anything one can mention. Were it not for this strong individuality of varieties much of the interest in growing roses would soon disappear. Every grower comes to know these indescribable qualities, though it may baffle him to put his knowledge of them into cold print.

ROSE LEAF SHOWING BLACK SPOT.

Take the country through there is not a more conspicuous rose trouble than the black spot. Growers differ greatly as to the nature of the trouble, but this comes from a confusion of the terms cause and condition.

The direct cause of the black spot is a fungus as distinct in its characteristics and methods of producing offspring as the rose upon which it grows. The common name it has received is very descriptive for the fungus produces in the foliage dark almost black patches unlike those caused by any other fungus of rose leaves. This fungus Actinonema Rosæ, Lib. has been known as a recorded species for over seventy years, having been described by Libert in 1826.

Unlike the rose mildew the younger leaves do not show the black spot and generally only the full-sized ones show the characteristic patches of the black spot caused by the actinonema. Next to the darkness of the oval and often confluent patches the most marked effect of the fungus is the yellow color of the areas of the leaves not covered by the spots; in fact the two abnormal colors intensify each other and make the foliage sickly indeed. About the time a leaf gets yellow and black it falls away and when the disease is unusually prevalent the older leaves all fall and are to be found upon the ground, under the nearly naked canes. The effect of the actinonema is not confined to the spot, and the loss of green throughout the leaf and its separation from the stem only show plainer than words can describe the injury the fungus may do.

We are now ready for a description of the work of the fungus, that is, of the ravaged leaf. At first there is a slight browning of the foliage in small patches as shown in several places upon the terminal leaflet of the leaf in the engraving made from a drawing from actual specimens. At this time the leaf is still green, but as time passes the spots deepen in color the fungus growing denser and sending its fine threads throughout the leaf, and the green is being replaced by yellow. A few weeks later and the final stage of destruction is reached; the working green is all replaced by the inactive yellow contents throughout the leaf and the spots become black with an ashen central area when the leaf is entirely dead. The large leaflet upon the right hand

EVELINA—PRIZE-WINNING VASE AT ST. LOUIS.

shows the black spot in an advanced stage and when the spores are formed in abundance. By the time this stage is reached the leaf has usually fallen from its attachment and the fungus goes on growing and maturing a large crop of spores borne upon the surface and by means of which the fungus perpetuates itself by spreading to the healthy foliage of roses.

It is not the purpose to burden the reader with a technical description of the fungus itself, which would need drawings of microscopic views. Let it suffice to say that it spreads by spores and these must be prevented from forming or kept from getting to healthy leaves if the disease is to be held in check.

Remedies. When greenhouses and open grounds are badly infested with the black spot it is eradicated with difficulty largely because the spores are widely distributed and in great numbers so that they are ready to produce the disease when an oportunity offers. It is not easy to entertain the thought that these germs are multiplied almost to infinity upon a comparatively few badly infested leaves and being small are unseen but ever present sources of new outbreaks. The first thing to do is to destroy all foliage that is affected by picking and burning. This means with hardy roses as well as those indoors. Leaves should not be left upon the soil to propagate the trouble, as they will do in a short time.

In the next place the healthy foliage needs to be sprayed once in ten days with a fungicide. There is very little use of doing this unless it is with thoroughness and followed up closely. New foliage soon makes its appearance and unless the sprayings are frequent the germs get established and then spraying will not reach the case. It needs to be remembered that spraying is a preventive and not a cure. A leaf with the black spot established in it is past cure by spraying, but the spraying of it may kill many of the spores it is producing and in that way be effective.

Various sprays are used and none of them are just what rosarians desire, for all coat the foliage somewhat and thus injure the output for market. Thus Bordeaux mixture while effective has the objection of whitening the leaves with lime. Cupram is a good mixture and is used by some. A potash compound in which the lime of the ordinary Bordeaux is replaced by caustic potash is also being used.

BYRON D. HALSTED.

Helpful Reminders.

From now until March 1 is the best time to propagate. After the sun's heat becomes strong, the temperature and moisture are more difficult to regulate for anything so delicate as cuttings, so it behooves you to accomplish as much as possible in this line of work at once, also bear in mind that cuttings taken from pot plants strike root the most readily and be sure your knife is quite sharp. If you have not the proper stock plants of verbenas or petunias, they can be grown from seed if sown by February 1, provided you secure good seed; the undesirable shades of blue and magenta predominate in the common seed, but it can be had in separate colors and saved by dealers that can be relied on. Do not calculate on taking cuttings, but sow plenty of seeds while you are at it; let them develop blooms early and throw out the ugly ones. After you have sown seed carefully, cover thinly with pulverized sphagnum moss; this prevents sudden drying of the soil while germinating. Place the flats under a bench where there will be no drip; there is no use for them on the bench until they begin to form leaves.

Now is the time to doctor your damaged palms. Most every retail florist owning a greenhouse has spoiled more or less palms, just enough to render them worthless for immediate use, but too valuable to throw out. A palm is one of the most sensitive plants about having its roots interfered with, and if it is desirable to do so at all no time should be lost. A palm which has lost most of its foliage, either entire or so damaged that it is of no value, has suffered at the root in nearly every case. The plant will not be of value until two, three or four new leaves are developed; they start growth now, and form new roots. The pots are full of roots and in order to develop good leaves more nutriment must be provided; in some cases sheep manure or other fertilizer may be applied, but in the majority of cases fresh soil and more room is desirable. To shift them to a larger pot would be increasing size of pot as palm decreased. It is best to wash out what soil there is carefully and cut out any roots you are sure are lifeless. Put back into the same pot with fresh sweet soil. Place all of these together, selecting a suitable place for your hospital, and keep them there until they are in first-class condition; go over them once a week, and cut off a damaged leaf wherever you find it crowding a new one for space and light. The leaf will be looking quite respectable in six months. To cut off all the damaged leaves at once would be an injury. Any Grevilleas, or bamboos, you may have should be shaken out now and put back into same pots. Set them wide enough apart to break out on sides if they are large plants. You can set other plants between which are shorter and do not mind some shade. For smaller plants of Grevilleas sow seed now, it is a most valuable plant for decorating and in some cases for vases or veranda boxes.

Asparagus seed should be sown now. You cannot afford to be without Sprengerii or tenuissimus. The plumosus is also excellent, but the most useful is tenuissimus in open ground, same as smilax, and the Sprengerii in pots, either hanging or set up on cedar posts cut in blocks 12 inches long. The plumosus requires at least 12 feet to grow in. You can always get a few strings when necessary; but a bed of tenuissimus is always ready, and of a size you can use for almost any purpose. Pieces from 1 to 3 feet long are much prettier than any other variety.

Now is the time you are entertained evenings by reading the glowing descriptions of the wonderful novelties for the season, the numerous chances of a lifetime offered you. If any of them are not too extravagant and interest you, ask the S. A. F. to appoint a committee to report on them within a year, and wait for the report, before spending any amount of money. Good things keep.

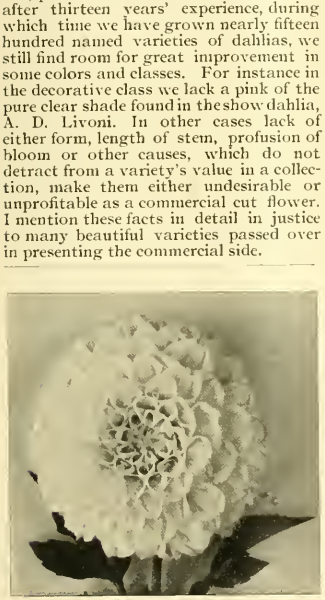
C. B. W.

SOUTH SIDE FLORAL CO., NEW CASTLE, IND.

Photo taken Christmas Week, 1897.

Alaska Carnation.

The illustration is of a house at the establishment of the South Side Floral Co., at New Castle, Ind., taken Christmas week. The white carnations are the variety Alaska with which the company has been very successful and which they find the most profitable of all the varieties they grow.



They use a heavy rose soil and planted the house with field plants the first week in August. They grow it cold with plenty of air. Night temperature is 50°–54° and an endeavor is made to keep the day temperature as near 60° as possible. The plants have been kept on the dry side and no feed used till January 1. Cutting was begun October 1 and the plants have been n constant and profuse flower ever since

Dahlias for Florists.

That the dahlia is the coming popular flower is evident by the events of the past few years. Flower lovers want something new continually and the cactus, decorative and improved types of single dahlias are not only new but surpassingly lovely. It is not, however, my intention to reiterate or dwell upon what all florists have learned from the recent course of events, but to give such information as will be of service to them.

The dahlia as a cut flower has its place, but of the hundreds, yes thousands of varieties, very few are profitable as commercial cut flowers. In dahlias, as in many other industries, there has been too much generalizing, and not enough explicit information. This I have learned from the hundreds of letters received during the past year, asking specific questions in addition to general information. Most prominent among these specific questions is the request for the best five, eight, ten or twelve, as the case may be, varieties of dahlias for "commercial cut flowers," "cutting," "design work," etc.

The decorative cactus class is undoubtedly the most valuable for artistic and finished effects. Pure clear colors and shades are also necessary, and no matter how beautiful an individual flower may be, its value to the florist as a cut flower is questionable if it does not present a bright refreshing effect in bouquets or decorations. Beside clear colors the flowers must have pleasing forms, long stems, if graceful and arching so much the better, and above all must be free bloomers. It is impossible to say which is the particular best flower for color, preference, etc., prevents. I will state, however, that after thirteen years' experience, during which time we have grown nearly fifteen hundred named varieties of dahlias, we still find room for great improvement in some colors and classes. For instance in the decorative class we lack a pink of the pure clear shade found in the show dahlia, A. D. Livoni. In other cases lack of either form, length of stem, profusion of bloom or other causes, which do not detract from a variety's value in a collection, make them either undesirable or unprofitable as a commercial cut flower. I mention these facts in detail in justice to many beautiful varieties passed over in presenting the commercial side.

DECORATIVE CACTUS DAHLIA—HENRY PATRICK.

Out of the large number of varieties I can safely name the following as the six best decorative cactus dahlias for cut flower purposes: Clifford W. Bruton, pure yellow; Countess of Pembroke, delicate lavender; Henry Patrick, pure white; Mrs. E. C. Monroe, creamy sulphur; Nymphæa, light shell pink; Wm. Agnew, intense dazzling red.

In the other classes the six best for cutting are as follows:

DECORATIVE CACTUS DAHLIA CLIFFORD W BRUTON

SIX BEST SHOW DAHLIAS.

John Walker, pure white; A. D. Livoni, pure pink; Pluton, pure yellow; Mrs. Dexter, rich salmon; Willie Garrett, bright red; Ruby Queen, ruby red richly shaded.

SIX BEST FANCY DAHLIAS.

American Flag, red and white striped; Frank Smith, maroon tipped white; Lottie Eckford, white spotted and striped purple; Miss Browning, yellow tipped white; Penelope, white flaked lavender; Uncertainty, variegated white to maroon.

SIX BEST POMPON DAHLIAS.

Catherine, pure yellow; Eleganta, pure pink; Fairy Queen, sulphur yellow, edged peach; Le Petit Jean, fine shade of red; Prince Charming, white tipped purple; Snowclad, pure white.

Beside their value as cut flowers there are other reasons why the thrifty florist grows dahlias. A collection of the best varieties has proved a most profitable investment to many small florists who first grew them as an ornament to their ground. For instance, with room for 100 plants, ten, twenty, even fifty or 100 varieties can be grown. It is not unusual to be able to cut from five to ten flowers from a plant at a single cutting. Hence the grower can dispose of a large number of cut flowers, beautify his grounds and dispose of all his surplus roots to his customers by taking orders at good prices while they are in bloom. In fact a florist in Massachusetts has to purchase one to two hundred roots each year in addition to his own stock to supply his local trade.

L. K. PEACOCK.

New York.

BRIGHTER BUSINESS OUTLOOK.—RECEIPTS OF FLOWERS GREATLY REDUCED.—CATTLEYAS AND VIOLETS OVERSTOCKED.—NOVELTY IN RETAIL DESIGN WORK SCARCE.—FLATBUSH TROUBLE.—A GLASS WAGON.—LOCAL NOTES.

The past week has seen increased activity in the cut flower trade, and the aspect is much brighter than at any time since Christmas. The better conditions are not entirely the result of increased demand but may be attributed in part to the decreased production, the effect of the previous warm dark weather which left the roses and carnations generally in an enervated condition. There is consequently a healthy demand for the quantity coming in and where the quality is all right prices follow suit. Cattleyas are too plentiful just now to make former prices possible and the buyers having become discriminating where but recently they were clamorous, it has become necessary to grade these flowers as is done in other lines, and so prices vary from $15 up to $35 per hundred with the outlook rather poor for the lower grades. Violets are also having considerable trouble on account of over-stock and conditions on these have not shown much improvement over those reported last week. This is the case, too, with lily of the valley and Roman hyacinths. Tulips are coming now in very good quality, with sleek well-filled flowers and stems sufficiently long, and as they are not yet too plenty the good ones are doing fairly well.

The retail establishments find an improved local and transient trade, and old customers are beginning to put in their appearance once more after the seclusion into which they seemed to withdraw after the holidays, but there are few dinner parties or social affairs of any magnitude as to the floral decorations. Nothing really novel has been evolved yet this season in that line, and, in fact, efforts in this direction are not always assured of appreciation even when they are the products of the customers' own ingenuity, and there is a disposition to fall back on the old-established but always safe, plain mound of flowers for a center piece. One florist tells of the discomfiture that followed his carrying out the plans of a would-be artistic customer as to table decoration. It was an oval table and a long narrow bank of green was constructed and a tank of water with gold fish was inserted in the center, but the resemblance of the whole affair to a casket, the tank answering to the opening in the lid, was such that the hilarity of the occasion received a rude shock.

Flatbush is in deep mourning, for George Huidmuller the frolicksome little spare-maker of the bowling club is about to move to Weehawken, N. J., where he has taken a position with Fritz Dressel. D. Y. Mellis recently entered a car carrying his favorite ball in a cover marked with his initials D. Y. M. which an impulsive passenger interpreted to mean dynamite and in two seconds Mr. Mellis was left the sole occupant of the car.

The annual dinner of the New York Florists' Club will take place at Muschenheim's Arena on Saturday evening, February 26th., instead of February 19th, as previously announced. Change of date was made because it appears that some members who would like to attend the dinner will be in attendance at the Chicago carnation meeting at the time originally set.

The most sensational florists' vehicle yet seen here has recently been put on the road by a new Columbus avenue firm. Roof, sides and ends are entirely of glass with the exception of a light frame work. It attracts considerable attention as it goes along and is all right unless it should encounter a bad boy with a stone.

H. H. Francis is sending mignonette of unusual beauty to John Young. Special fancy lily of the valley from Carl Jurgens sells for double price.

The Old Guard ball took place on Tuesday evening and was the cause of quite a demand for flowers.

Recent visitors: Bart. Cartledge and Robert Kift, Philadelphia.

Boston.

BUSINESS INTERMITTENT.—BULBOUS FLOWERS SELLING VERY SLOWLY.—CARNATION EXHIBITION.— ORCHIDS AT HORTICULTURAL HALL.—VISITORS.

Trade rather slow, with occasional spurts that develop brief periods of hopefulness alternating with longer periods of the other extreme, White flowers have just enjoyed a little boom—that is, white roses and carnations mainly for bulbous flowers, white or otherwise are very slow property at present. Violets, as before noted, move sluggishly and at prices low for the season. Mr Butterworth, Mr. Ewell and others of lesser fame who make bulb forcing an important part of their business assert that the aggregate sales of this stock, as it goes this winter, do not realize enough over and above cost of bulbs to pay for expenses of marketing.

The exhibition of carnations at Park street market on Saturday last was not as large as that made in December. The Ward collection was as usual a prime attraction. The "star performers" were Fisher's Mrs. T. W. Lawson, Blake's Bon Ton and Besold's Frances Joost, Patten's Klondyke, Witterstaetter's Evelina, Roper's May Whitely and Mayor Quincy, Tailby's Wellesley and a number of unnamed seedlings from these and other contributors all showed up well. D. B. Long sent a vase of Genesee but it was received in bad order and so was seen at a disadvantage. It is said that the next exhibition of the series is to be held at Horticultural Hall.

The attractive features at Horticultural Hall on Saturday were Odontoglossum Wardianum from Carl Blomberg and Cypripedium President McKinley from H. T. Clinkaberry for both of which certificates of merit were awarded, and a group of interesting orchids from J E. Rothwell, as well as promiscuous exhibits from a number of contributors. The lecture was on growing new vegetables, by Aaron Low.

Visitors in town: Chas. H. Allen, Floral Park, N. Y.; C. Besold, Mineola, N. Y.; C. W. Ward, Queens, N. Y.; C. Warburton, Fall River, Mass., and F. A. Blake, Rochdale, Mass.

Nashville. Tenn.

QUALITY OF ROSES IMPROVED.—HOW THE FLORISTS OF NASHVILLE LOST THE CONVENTION.—NO FLORISTS' CLUB.—CAPITALISTS IN THE COMMERCIAL MARKET.

Flower trade for the past two weeks has been looking up, and the supply has hardly been equal to demand. There have been many receptions and afternoons which has had the effect of quickening floral sales, and helping out the florist. The quality of all kinds of stock, especially roses has been greatly improved, though the supply is short, on all flowers. There has been no especial demand in funeral flowers though there is a little doing all the time in this branch. There has been nothing very striking or new in floral designs. One of the largest and handsomest pieces was made for an afternoon reception. It consisted of an American Beauty basket, in which eight dozen Beauties were used. The basket itself was the green and white "dish-rag," shaped something like a hat, and the roses completely filled it. It was much admired, and was supposed to have brought a small fortune, but only the florist and his customer know about that, with the assurance that the latter paid no more for it than she was obliged to, and the florist declared that he made nothing on it.

The genial Daniel MacRorie was here last week looking, as one of the florists put it, as "natural as life and about twice as large." He was in a very good humor, and reported a fine trade all through the southern country.

Mr. MacRorie tells a good one on the florists in this city, which explains to them how they lost the florists' convention of last year, during our Centennial Exposition. The managers of the latter were trying to gather in all the conventions meeting in 1897, and succeeded in making this the convention city of the year. The mayor, city council, chamber of commerce and exposition managers sent an invitation to the florists' convention to meet in this city. The letters of invitation were read before the convention and very favorably considered until some one asked if the florists of Nashville had invited them. All the letters of invitation were looked over and no florist's name appeared, and Nashville lost the convention, and now it seems that the florists themselves had instigated the invitation, worked up the interest, but had failed to add their own letters to those sent by city and exposition officials.

M. C. DORRIS.

Milwaukee.

Miss M. A. McKenney the Milwaukee street florist and Mr. Fred Davis her cashier are to be married in the spring. The heavy snow is causing some trouble but nothing serious. Two rafters in Whitnall Floral Co.'s house got tired holding up a drift and began to lower it, discovering it just in the nick of time saved a bench of adiantums a cold bath, but there is sure to be some disappointed florists throughout the state, who are calculating on flowers which will be on "snowed up" trains. Street car tracks are abandoned this evening. Many places of business closed before dark to let employees go home safely. C. B. W.

Rochester, N. Y.

FAVORABLE CONDITIONS.—TRADE STEADY.—PRICES AND QUALITY.—PLANT NOTES.—VISITORS.

Considerlng that no great social event which called for any lavish floral decorations were booked for the week, we must admit that trade has been uncommonly favorable for the disposal of all kinds of flowers, because no. overstock in any line could be noticed, notwithstanding the increased cut of our growers who were able to send in almost double the usual quantities of flowers, brought on by a few very bright days assisted by the almost continuous moderate weather. None of our retailers were exactly overburdened with work, but a steady demand for small lots cleared the market every day. Prices are fair and firm on all good stock.

In A1 roses the scarcity continues, select teas bring readily from $8 to $10, inferior grades from $5 to $6. Meteors are $10 to $15; few Beauties find their way to this market and these few go off at fancy figures. Carnations of the general run bring $1.50 to $2, fancy are sold at $3. Mignonette is still disposed of at $3, and violets being very plenty, have come down to $1 for the best. Callas are quoted at $1.50 per dozen and are a rather scarce article. Smilax is again improving; the inferior article in the market last week was sold as low as 6 cents, while now our supply from another source brings readily 15 cents. Valley is in good demand at $4. Paper White and Romans $3. Tulips in all colors are first-class, $4 is their present price. Heliotrope $2, and forget-me-not is 10 cents per bunch of a dozen.

In the plant department, things are not quite so satisfactory, sales are few and far between at present, though a goodly number and a great variety of first rate flowering stock is offered in nearly all the stores. Bulb pans and fern dishes are more frequently sold than high priced specimen plants.

Visitors: Arnold Ringier, representing Barnard & Co., Chicago, was in town and reports business as booming along his route, for a more successful trip he never made before. Walter Mott, the Dreer representative of Philadelphia also was in town and expressed the same favorable opinion in regard to trade condition in his section. J. B. K.

Philadelphia.

THE WEATHER.—PRICES REMAIN THE SAME. H. H. BATTLES HAS THE GRIP.

Tommy Butler, who once grew a house of fine Brunners, but has never since done it again, says in speaking about the protracted spell of bad weather that has been our lot during the month just closing, that it is nothing extraordinary, that we always have some kind of weather at this time of year Well, we suppose Tommy is right, but we notice that it does not take him long to go over his route these dreary mornings, and that other growers are in the same plight, and all agree that the weather is to blame for the trouble.

There seems to be enough stock to go around, however, although it is not allowed to stand long in one place, and little if anything is carried over from one day to another. Prices remain about the same, but the grading is scarcely done according to the liking of the storekeepers. Selected Teas are selling from $7 to $10, seconds $4 to $6. A few specials bring from $12 to $15. Beauties are scarce. Growers say they never cut so few flowers considering the number of plants under cultivation as at present. Prices are still about the same from $3 to $8 per dozen. Carnations are used up almost as fast as they come in, the majority now go for $1.50, a few select at $2, while some extras bring $3 and $4. New valley now comes in fairly well clothed and sells for from $3 to $4.

Daffodils are now here for the season and bring from $4 to $5. There is plenty of freesia at from $1.50 to $4. Violets are quite easy, and $1 is high for the doubles, extra Californias bring 60 to 75 cents. Business has been good considering that shopping weather has been so poor. Graham still continues busy with the large private balls. At a large dinner dance held in Horticultural hall last Wednesday evening the decorations were very elaborate. Cattleyas were as thick as dogwood blossoms in spring time and other choice flowers kept them company. Mr. Graham said it was one of the finest decorations they had ever had and their list is a very long one.

Asparagus Sprengerii is now asked for quite frequently although it is called generally the new asparagus, as Sprengerii is most too much for the ordinary customer. A man who can furnish this in quantity will certainly be in it for the next season or two at least.

Robert W. Greenlaw, the obliging representative of N. F. McCarthy & Co. of Boston has been with us the past week. He says that his firm's business has grown wonderfully the past few years and that they now furnish everything in fresh stock from flowers to made up f

designs, as well as every requisite used in the business. When Mr. McCarthy lived in this city we called him "Nic" for short, he was one of the boys, his fine baritone voice was always listened to with pleasure when called on for a song. His rendition of the "Heart Bowed Down" at one of the club dinners is still green in our memory, almost the entire company was moved to tears and proceeded at once to drown their sorrow with whatever was within reach. May we hear him again soon.

George C. Watson's shipping boxes for retail florists should be in the cellars of the storekeepers at all times. A box on hand when it is wanted is worth a dozen on the way. Many an express order has missed the train because ten or fifteen minutes was lost hunting up or making a box at the eleventh hour.

H. H. Battles has been laid up for the past two weeks with a bad attack of grip, he is slowly recovering but it will be a week at least before he will be out again. K.

Chicago.

BAD WEATHER.—ROSES SHORT.—FIRST SHIPMENT OF TULIPS.—MEETING OF THE FLORISTS' CLUB.—DEATH OF MRS. INE.

The weather clerk worked off on Chicago during the past week some of the worst samples in his collection. Rain, hail, snow, wind and cold. It is lucky for Chicago that it was only a stray lot of samples, and not in his regular Chicago stock, especially the wind. The greenhouses have been covered with snow and ice. Very few roses have opened. Less have been received at the commission stores this week than any other week this winter. On the other hand the weather was so disagreeable that very few customers ventured out to buy flowers, and retail trade has been nearly at a standstill, very little doing except an occasional funeral order.

Violets are plentiful and cheaper. Carnations in good supply. Roses of all varieties short, Brides and Maids are very scarce and bringing nearly Christmas prices. Tulips are plenty, many of them very poor; a few fancy ones find ready sale. Many of the poor ones find their way to the waste-box where they properly belong.

Klehm Nursery sent in the first shipment of their La Reine tulips last Saturday. Charles A. Samuelson purchased the lot. Charley is on the lookout for whatever is choice in the cut flower line.

Geo. Piepgras is receiving regular shipments of very fine lilac.

Lloyd Vaughan, of the firm of Vaughan, McKellar & Winterson, left here Wednesday night for the East on an extended business trip.

The meeting of the Chicago Florists' Club Thursday evening was very well attended; several new members were elected. Frank Leslie, who strayed away and was lost for a time among the lakes of Wisconsin, was taken back into the fold. P. J. Hauswirth reported what had been done by the committee appointed to make arrangements for the meeting of the Carnation Society, to be held here in February. The club was well satisfied with the arrangements made by the committee. The order of the evening was a paper by Joseph Reeves on growing potted plants. The subject was timely and well received. A very lively discussion followed the reading of the paper, participated in by most of the members present. All seemed to be alive to the fact that there was a growing demand for the better class of flowering plants, especially for the holidays.

Mr. Geo. Stollery gave an account of his trip to the East, which appears elsewhere in this issue.

Mr. R. Witterstaetter exhibited a vase of Evelina carnations which were much admired by all present.

The many friends of Leopold Ine, superintendent of the Bohemian Cemetery, will be pained to hear of the death of his wife. She was buried last Sunday.

St. Louis.

BIG DEMAND FOR ROSES AND STOCK SHORT.—CLUB NOTES.—PERSONAL MENTION.—BOWLING CLUB WELL ATTENDED.

There has been a big demand during the week for roses, carnations, etc. Receipts continue to be very light for this market and the dealers are kept very busy hustling around to secure enough stock for their orders. All growers report a very light cut as it is between crops. We all hope, however, that the bright weather we have had during this week, will have a tendency to produce a big cut for the coming week.

Beauties continue to be very scarce, not half enough received to go round. Kaiserin and Brides have been in good demand. Carnots are very scarce, hardly any arriving here, although the demand is strong for this flower. Bridesmaids are now coming in good shape and always find ready sale. Meteors are scarce, and very few fancy among the stock. Perles are more plentiful. La France are coming in better. Woottons are also arriving in good shape.

Harrisii lilies are more plentiful. Callas are scarce. Romans and narcissus have been bringing a better price lately. Southern daffodils and jonquils have made their appearance. Tulips also are showing up this week. California violets are cheaper. Double violets are neglected. Southern violets are plentiful.

Carnation receipts have been somewhat heavier this week, but there is a lack of fancy flowers among them. Most stock is coming in rather small and with weak stems.

The committee having the annual smoker of the St. Louis Florists' Club in hand report favorable progress and all things point to a much better time than last year which was considered pretty "hot stuff."

Messrs. Wilson, Connon and Lingenbrink, comprising the florist end of the Klondike expedition, started on their long journey this week, and all threaten upon their return to St. Louis with bushels of nuggets to open up some of the finest florist establishments in the country.

Mr. John Quinn, the popular North Grand avenue florist, reports business booming.

Mr. Ellis, of the Mound City Cut Flower Co., will be about again this week after quite a severe spell of sickness.

Mr. E. J. Bertermann, of the Bertermann Floral Co., Indianapolis, was in town this week and was kept busy calling on the trade.

There was a large attendance at the meeting of the Bowling Club Monday night and some good games were rolled.

A. J. B.

Cincinnati.

BUSINESS FAIR.—FLOWERS SOMEWHAT SHORT.—FURIOUS GALES.

Business the past week was fairly good, considering the weather, with rain and hail alternating, and cloudy weather for nearly two weeks. Flowers of all kinds are somewhat scarce; this applies especially to roses. Violets are more plentiful now and took a drop to 75 cents per 100.

On January 22 a furious gale, the heaviest known for years, swept over this city and vicinity, continuing for eighteen hours at the rate of seventy miles an hour. People were frightened at its intense velocity; trees and fences were blown down and much damage done to greenhouses. Up to this writing I have heard of but a few. B. P. Critchell's Sons and the Hoffmeister Floral Co. were among those who suffered most. At the western hills the wind assumed the proportion of a hurricane; it blew for twelve hours during the night with unabated fury. A chimney at my place was blown down, breaking glass and sash bars to the extent of 300 feet. Planning and remodeling will be on the programme this coming week.

Mr. Ch. Raynor, of Anchorage, Ky., was a caller. H. SCHWARZ.

Grand Rapids, Mich.

THE CLUB DISCUSSES VIOLETS.

The Florists' Club held a meeting January 18, at Henry C. Smith's on West Bridge street. Previous to meeting the members took pleasure in inspecting the greenhouses which are in fine shape, everything so neat and clean, and the plants healthy and vigorous. The rose houses were exceptionally fine.

Henry Van Velde read a paper on violets. Solid beds versus benches met a diversity of opinions, some preferring solid beds, others benches. The question: "Can they be grown under glass successfully all summer?" was answered in the affirmative, Crabb & Hunter having one bench grown in that way very successfully, although the method of removing the glass in summer is preferable. The soil used is two parts clay, one part black muck and one part cow manure; pot up runners in March and plant direct to the bench in June and July. Some claimed good success from planting in the field first. The sash should be put on from September 15 to October 1 in this locality, according to the weather, the temperature to be 40° to 45° at night, a little higher day time; in dull cloudy damp weather it is preferable to run the temperature as low as safety will allow, so as not to induce a soft growth of foliage which is weakening to the plants.

Geo. F. Crabb was elected reporter.

After a bountiful repast a vote of thanks was tendered Mr. and Mrs. Smith for their hospitality. GEO. F. CRABB.

Harrisburg, Pa.

There seems to be an impression abroad that Harrisii bulbs are deteriorating in quality, and that the diseased condition of the majority of the plants this season is chiefly due to this fact.

As a matter of course, complaints are expressed on all sides, some being inclined to blame the dealer, some laying the fault at the door of the bulb grower, while in the majority of cases both are denounced as unscrupulous fellows. Whether the fault lies with the one or the other, or with the grower himself, I shall not attempt to discuss. Suffice it to say that if an identical grade of bulbs coming from the same dealer is grown successfully in one place, and vice versa in the other, as I have had occasion to observe during my recent travels, there is something in the method of growing. At C. E. Taube's, for example, the Harrisii are in the pink of condition, strong, vigorous and healthy. What is

simply this," explains Mr. Taube, "I prefer starting my Harrisii late and keep them going rather than start them early, and then keep them back. The change of temperature, from a higher to a lower one, as is often practiced, is by no means conducive to the vigor of a Harrisii plant. It has been invariably my rule never to keep a plant in check, if once started, and the less so—by chilling it." That his rule seems to be of the right sort, the plants that I saw amply prove.

Social events of one sort or another have been the order of the day during the past two weeks, and the florists evidently have no "kick a-coming." The introduction of society buds in the gay capital of the keystone state generally means an increased demand for the florists' buds. Then the "grim harvester" comes in for his share. Funeral work was by no means scarce of late. HOMO.

Cleveland.

Business continues to demand all the good flowers coming in. The reason of this relation of supply and demand (as far as strictly local production is concerned) is to be found in a general and long continued underproduction rather than in any marked increase in quantity of flowers sold. Why this shortage should be so is not easy to explain entirely upon the theory of long continued dull weather, although that is undoubtedly a factor in bringing about such a situation.

Dutch bulb flowers are coming in in better quality and quantity and are now pretty fair in stem and general appearance. Double Von Sions are coming in also and are good, showing a full percentage of salable flowers. A few Dutch hyacinths, Norma, Charles Dickens (blue) and Blanchard are also seen. They are pretty fair in quality, but of course not so good as they would be with a little less severe forcing. In tulips the varieties are still the early forcers, La Reine, Yellow Prince and Proserpine mostly. They sell usually at from $2 to $4 per hundred, according to quality.

The Philadelphia carnation sport Victor has a counterpart that originated in town with H. A. Hart. At least Mr. Hart was the only one to realize the worth of such a departure of the usual Daybreak color. It has been interesting to note the actions of the two stocks under varying culture and conditions. Many growers claim (and apparently with good reason) that the two are identical in all their growing and blooming qualities; others with equal enthusiasm are sure that there is a decided difference in favor of the Philadelphia variation in the matter of blooming, both as to size and freedom. In some places both are to be seen doing equally well with Daybreak. With some neither seems to equal the parent. In one case the Philadelphia sport has outyielded both the local Victor and Daybreak. The flowers of the Philadelphia variety in this instance are very fine and in every way sustain all claims made for the variety; the Cleveland sport has, however, been marked for the slaughter. You pays your money, and takes your choice. A.

SITUATIONS, WANTS, FOR SALE.

Advertisements under this head will be inserted at the rate of 10 cents a line (seven words) each insertion. Cash must accompany order. Plant advs. not admitted under this head.

Every paid subscriber to the AMERICAN FLORIST for the year 1898 will receive on request, a coupon for one five line want "adv." free, to be used at any time during the year.

SITUATION WANTED—By a first-class rose grower; 15 years' experience. Good references. Address D W, care American Florist.

SITUATION WANTED—By a competent store man, late with Freidman; reference given by Chicago wholesale florists. R A, care Am. Florist.

SITUATION WANTED—By an A No. 1 manager of wholesale or retail store; twelve years' experience in prominent cities. Correspondence solicited G, care American Florist.

SITUATION WANTED—By A-1 general cutflower grower; good decorator. Recommendations furnished; German American; 30 years old. Address Y G, care American Florist.

SITUATION WANTED—By an experienced gardener and florist, to take charge of private or commercial place; age 38, married. Best of references. CHICAGO care American Florist.

SITUATION WANTED—By first-class florist; ten years' experience in growing cut flowers and bedding plants. Address F W, care American Florist, Chicago.

SITUATION WANTED—A competent seedsman wants situation with a reliable seed house; can speak Dutch, German or English; correspondence solicited. H, care American Florist.

SITUATION WANTED—By practical florist and plantsman of experience. In commercial or private place, California preferred. First-class references. For particulars address A Z, care Am. Florist.

SITUATION WANTED—By practical florist of 17 years' experience, good cut flower grower, roses, carnations, etc. Competent to take charge; would work on shares. Reference and bond given. Address RELIABLE, care American Florist.

SITUATION WANTED—By a successful rosegrower having charge of rose houses for ten years, would take charge of same; best of references; age 31; married, no family Address P. MURRY, 67 Broomfield St., Boston.

SITUATION WANTED—By a thorough, practical florist and designer. A No 1 rose grower. Carnations, 'mums, violets specialties. Now disengaged; age 38. Good references. Address W H, care 164 E. Main St, Alliance, O.

SITUATION WANTED—By an American as foreman by one who understands rose growing and carnations (the latter preferred), also forcing of all kinds of bulbs. The best of references. Strictly sober. Address W H, care American Florist.

SITUATION WANTED—As foreman with some refined party by a practical grower of roses, carnations, violets, 'mums, palms, ferns and general stock, forcing of bulbs; a life experience; references O K. Address FOREMAN, care American Florist.

SITUATION WANTED—As foreman in cut flower establishment, mostly roses and carnations; must be up to date in conveniences; by all-round man, single, American, nine years' experience; don't use tobacco or drink; west preferred; good wages expected. References. ROSES, 2040 Cottage Grove Ave., Des Moines, Ia.

SITUATION WANTED—As foreman or manager in large commercial place by a first-class grower of roses, carnations, 'mums and general stock; life experience, married, age 36; has been foreman in large establishments for the past ten years; only reliable parties who wish a first-class man need answer; best of references Address ROSE GROWER, care American Florist.

WANTED—Seed and plant catalogues. Address B. F VANDERVATE, Galena, Ill.

WANTED—The address of Carl Jorgensen, Dane, Amager. Address L. JENSEN, South Butte, Mont.

WANTED—A quantity of second-hand sash, in good condition, size 3x6. Address W A, 196 Lexington St, Watertown, Mass.

WANTED—A few good half-tones sweet peas. Send list and prices to ERVIN UTLEY, 264 Westmoreland Ave, Toronto, Canada.

WANTED AT ONCE—A good man for palms, ferns and orchids. Send references H. F. HALLE 548 W. Madison St., Chicago.

WANTED—To lease for a term of years about 10,000 feet of glass; houses must be modern and in good location. J W D, care American Florist.

WANTED—For general greenhouse work, an active and reliable young man. Wages $20 per month and board; willing to increase wages if suited. Address H KADEN Gainesville, Tex.

WANTED—To know the whereabouts of Charles M. Weinz; was last heard of in Hillsbury. Will hear of something to his advantage. Address METEOR, 113 State st., Chicago.

WANTED TO EXCHANGE—A Bausch & Lomb Microscope, power 375 diameters; for Vinca major variegata. For particulars address THE ALCOVA GARDENS, Covington, Ga.

WANTED—A competent man for cut flower department and making up floral designs and bouquet work; also one that understands decorating and general greenhouse work. Apply CHARLESTON GREENHOUSES, 309 Meeting St., Charleston, S. C.

WANTED—Young man thoroughly experienced in the best class of retail florist business; must be first-class in window, table and wedding decorations, also design work. Apply with references, ability, etc., stating wages expected. J. H. DUNLOP, 445 Yonge St., Toronto, Can.

WANTED—At once, an A1 grower of roses and carnations, American; must have the best of recommendations; young man preferred and single; also a second man who understands growing and who would not object to working in store a few hours each day and attending to small palm house; one who can make designs and do decorations. Address AMERICAN care American Florist.

FOR SALE—One Alaska refrigerator in first-class condition. JOHN H. ORTH & CO., McKeesport, Pa.

FOR SALE.

Greenhouses in one of the best cities in Wisconsin. A good investment and a money maker for a hustler. Owner must retire on account of poor health

For particulars write ELLIS & POLLWORTH, Milwaukee, Wis.

BUSINESS CHANCE.

A1 opportunity for practical grower. I wish to sell one-third or one-half interest in a well-established Florist Business in a live western city; 15,000 feet of glass, several acres of land, full equipment of plants, tools, teams, and local store at cheap rent. Present owner is not a practical florist, and must have a reliable grower who will take money interest and increase the plant to double present size. Can show fully the advantages of the place, on application. A reliable man can have easy terms on purchase. Address

"BUSINESS," care Vaughan's Seed Store, 84 Randolph St., Chicago.

Valuable Greenhouses FOR SALE

A Rare Opportunity—Seven Greenhouses in St. Louis County with or without stock, for sale cheap. Owner has other interests requiring all his attention. A bargain. For further particulars address

E. H. MICHEL,

Care of St. Louis Cut Flower Co....

1620 Olive St., - ST. LOUIS, MO.

Everybody is more pleased if you say "saw your ad. in the American Florist" when writing.

Buffalo.

BUSINESS STEADY.—EASTER QUESTIONS.—BIDS RE-OPENED FOR PARK CONSERVATORIES.—PERSONAL.

Business conditions remain about the same as last week, with perhaps rather more than the usual amount of funeral work to help out. Flowers are plenty enough and of good quality. Talk begins to run on the Easter question and the growers of lilies are considering the advisability of giving a little more or a little less heat, as the case may be. Tulips seem to go better this season than for several years past; possibly there are not so many grown this year. Rebstock is showing the finest tulips in the town just now, fine long stems and well colored.

I went out to Rebstock's Elmwood avenue establishment the other day, and had a good look around. There are lots of Easter lilies in sight there, and a very fine lot they are too. Very little of the disease was to be seen, in fact they are the best lot I have run across anywhere. A house or two of azaleas show that he is loaded for Easter, and the general run of stock was in good order. There have been great changes at this place since I was there last; two new houses have been added and a fine new office building has been erected facing the avenue. The structure is in the old English style of architecture, with the upper stories leaning towards Canada.

The only modification of the style is in having large plate glass in the lower part of the office windows. Altogether it is a very neat structure and well adapted internally for the purpose. Joe has the earliest asters in town, I think—nice dwarf little fellows in 4-inch pots, quite a novelty. I also noticed a new stable for the accommodation of the fast horses, which may or may not be a legitimate part of a florist's outfit.

Speaking of lilies generally, they are poor. Some of the boys have been badly hit this year. One lot that I saw the other day were more than half worthless from the disease. In fact with the exception noted above, I have not seen a decently clean lot of lilies this season. Very little encouragement to buy Bermudas next year.

There is no betting on how the conservatories at the Botanic Garden are coming out. I hear that the Park Board have for some reason re-opened the bids for the superstructure, rejecting everything heretofore accepted. It is to be hoped that the work will not be delayed much longer, or they will not be ready for the new century.

Mr. Walter Mott, representing Henry A. Dreer, of Philadelphia, was in town the last of the week. This is quite a change of programme on his part, as he usually figures to be in the sunny south during these midwinter days.

Park Commissioner Harry Balsley, of Detroit, made a visit also, primarily to look over the park system here, and incidentally to furnish whatever pots are needed in this vicinity. C.

San Francisco.

BUSINESS GOOD. — VIOLETS CONTINUE SCARCE.—OAKLAND TRADE EXCELLENT. —PERSONAL MENTION.

Business is good and prices are fair, roses still holding up to a very good figure, notwithstanding the fact that the quality is hardly as good as that of the past two or three weeks. Brides and Bridesmaids continue to be the leaders. Prices on the above named varieties range from 50 cents to $1 per dozen. Beauties are still scarce, and consequently the fortunate few who have them are obtaining fancy figures for their crop. Testout, which last season was a great favorite has seemingly fallen from grace and now is called for only occasionally. Perle and Meteor are fairly good and bringing good figures. Some very nice Cecile Brunner roses may be seen with some of the florists. This little rose is quite a favorite with the florists in this city, and enjoys a steady demand at all times. Some very excellent Belle Siebrecht roses are coming in from across the bay, and good figures are prevailing for them. Few, if any, Pierpont Morgan are to be seen this season, although last season there was quite a large supply of it, but it never brought paying prices, and consequently was discarded to a great extent by many of the growers. A person does not see as many Catherine Mermets now as formerly. Occasionally a few extra fine blooms come into the market.

Violets still continue scarce, that is, all the giant-flowered single varieties, such as California and the Princess of Wales. The cold spell has put quite a damper on them this season and I may add here that many of the plants not only have stopped blooming but have been killed entirely by the severe frosts. A few secluded spots have escaped injury, but these are not numerous. Marie Louise and Swanley Whites are of very poor quality, the stems being extremely short and the blooms off color. They are bringing from $1 to $1.50 per dozen bunches. Roman hyacinths are coming in rather freely, but the demand is small. There was quite a demand for narcissus and Chinese lily flowers, last week being Chinese New Year. Tuberoses were also much sought after by the Celestials during that time. Lilium Harrisii is still short with prices good. Smilax is in good demand and the stock scarce and of poor quality, being very short. Orchids, principally Cattleyas, can be had of a few of the leading florists. They are in good demand this season and the prices realized are very satisfactory.

Mr. M. Lynch is beginning the erection of a new rose house 25x150 to be devoted to American Beauties.

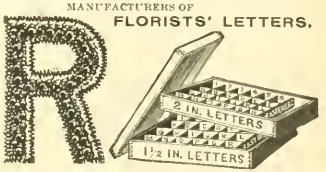
The California State Floral Society held a meeting on the 17th inst. regarding the flower show to be held during the great mining jubilee. They decided to co-operate with the California Club and to do all in their power to make the show a success. It will be held in Union Square and will last from the 27th to the 30th of the present month.

Mr. J. Seulberger, of Oakland, reports trade in that city as very good during the past week. He had several very large decorations.

Mr. L. Ford, formerly of Seattle, has resigned his position with Mr. R. D. Fox, of San Jose, and as yet is undecided as to his future movements.

The California Nursery Co. reports trade as very good. Their nursery contains 600 acres.

Mr. Chas. C. Navlet, of San Jose, was in town during the past week.



Work on the large Academy of the Sacred Heart, at Menlo Park, is progressing rapidly. The grounds are to be laid out in a very elaborate manner. Mr. A. B. Westland is in charge. METEOR.

Everybody is more pleased if you say "saw your ad. in the American Florist" when writing.

Sixty Years in Business.

The well known concern of Henry A. Dreer this year celebrates its sixtieth anniversary, and the happy event is marked by the publication of a beautifully illustrated account of the firm from its inception to the present day. The founder, Mr. Henry A. Dreer, died in 1873, after a brilliant and highly successful career, when the task of caring for the varied and important interests of the house devolved upon its present head, Mr. W. F. Dreer. It is hardly necessary to enlarge upon the splendid results which have attended the efforts of the latter gentleman. Our readers one and all know full well that the firm name of Henry A. Dreer stands for all that is best in the broad domain of horticulture, and we feel that every individual in the trade will commend the integrity of this honored house and join us in extending to it our heartiest congratulations and best wishes for continued prosperity in the years to come.

New Carnation Genesee.

Sample blooms of this new white carnation which D. B. Long, of Buffalo, is distributing, were sent to this office recently. They arrived in poor condition and an accurate judgment as to quality could not be had. The color is white, size medium and stem good.

Cut Flower Price Lists Received.

We are in receipt of cut flower price lists from the following firms: Kennicott Bros. Company, Chicago; W. A. McFadden, Cincinnati; Bassett & Washburn; Chicago; Holton & Hunkel Co., Milwaukee.

Lilium Longiflorum for Easter.

ED. AM. FLORIST:—"How large ought Lilium longiflorum to be now in carnation temperature to be in good shape for Easter?" L. MINN.

In reply to the above, the growth should not be smaller than from six to eight inches tall to insure flowers for Easter. When the buds are showing from one-half to one inch in length they will then stand a night temperature of from 65° to 70°. Florists who make a specialty of growing this class of plant for Easter may find it necessary to change the temperature several times between the time the buds show and and the week immediately preceding Easter. It requires close observation and keen judgment to get these crops in at just the right time, but it pays, and what little trouble may be deemed necessary should be entered into with a will and a determination to succeed, and the results cannot fail to be generally satisfactory. W. K. H.

A New Plan for 1898.

BURPEE'S SEEDS

are sold only in sealed packages.

Seeds of the best quality cost very much more to produce than do seeds of the ordinary commercial grade. And yet many merchants having little or no knowledge of the value of **High-Class Seeds**, purchase their supplies wherever they can be obtained the the cheapest.

It has been brought to our notice that some merchants will buy a bill of seeds from us, obtain copies of our catalogues and show cards and then purchase a portion of their supplies from other seedsmen, who, growing '*cheap seeds*," can sell at much lower prices. In many cases planters who purchased from their local merchants, thinking that they were obtaining **BURPEE'S SEEDS**, got only a few of our seeds (perhaps in packets), and otten the seeds bought by weight or measure were of inferior quality, falsely sold on our reputation, but for which we were not in any way responsible.

This deception was brought so prominently to our attention the past year that we debated seriously whether we should not decline altogether to sell **BURPEE'S SEEDS** at wholesale, and announce in THE FARM ANNUAL FOR 1898 that **BURPEE'S SEEDS** could be obtained only direct from Philadelphia. Further consideration, however, showed us that this would hardly be fair to the honorable merchants who had been handling our seeds exclusively for years, and in whom we could place confidence. Therefore we decided upon the plan announced below:

Hereafter we will sell Burpee's Seeds ONLY in sealed packages.

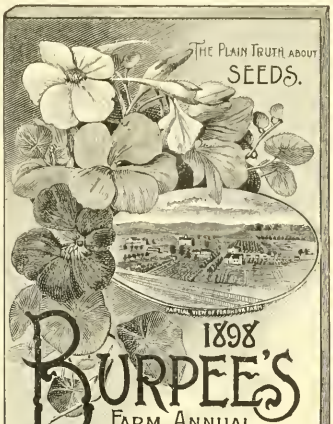
Packets and ounces, in the *Spangler Water-tight Bags*, are sealed as heretofore, and bear, plainly printed, either **our firm Name or Registered Trade-mark Monogram**, protected by United States Letters Patent. Quarter-pounds, pounds, pints and quarts, done up in paper bags or cartons, will have pasted across the top **a green label**, worded as follows:

REGISTERED W B TRADE MARK

BURPEE'S
Seeds That Grow
...For 1898...
Genuine Only if this Seal is Unbroken.

Seeds in Bulk,—that is, Peas, Beans, etc., by the peck or bushel, and large quantities of small seeds in bags, will have **each sack sealed with our Trade Mark on a leaden seal.** ☞This plan will be a protection to honest merchants from competition with other seeds claimed to be **BURPEE'S SEEDS**, and at the same time will be a guarantee to the purchaser.

Our Only Salesman is **our annual Catalogue.** We employ no travelers, but will quote prices by mail at any time.



LARGE DEALERS WHO SELL ON THEIR OWN REPUTATION CAN BUY IN BULK FROM US, AS HERETOFORE.

As stated above, every sack leaving our warehouse will be sealed, but, of course, the contents, being in bulk, can be handled as desired,—except that they must not be sold as **BURPEE'S SEEDS, except in original packages.**

Burpee's Farm Annual

...1898...

THE LEADING AMERICAN SEED CATALOGUE

Mailed Free to Planters Everywhere.

A handsome book of 141 pages. Tells all about **the Best Seeds that Grow.** All the illustrations are true to Nature, and the descriptions have been written at FORDHOOK FARM, where we conduct the most extensive trial grounds in America. **It tells the Plain Truth about Seeds.**

Novelties for 1898.

Never before have so many First-class Novelties been introduced in any one year.

In VEGETABLES

Besides the long-keeping AUSTRALIAN BROWN ONION, introduced last year and still controlled by us, we introduce THREE NEW TOMATOES, each of distinct character and real merit, the GOLDEN EAGLE MELON, a new PEPPER from Japan, a new American LETTUCE, and offer, for the first time, the wonderful extra early wrinkled GRADUS PEAS at a moderate price.

In FLOWERS

Besides BURPEE'S PINK CUPID, which is sold in our original sealed packets by seedsmen all over the world, we introduce EIGHT OTHER NEW SWEET PEAS, WHICH CAN BE HAD ONLY DIRECT FROM US. Among other Exclusive Novelties, we would mention the WHITE DEFIANCE BALSAM, the giant-flowered SUNLIGHT and MOONLIGHT NASTURTIUMS, and the beautiful new PRESIDENT MCKINLEY PANSY, as of surpassing merit.

In PLANTS Besides the usual Novelties, we have two of our own exclusive introduction. These are the beautiful NEW DWARF GLORIOSA CANNA and the wonderful free-flowering BURBANK ROSE—the best of seventy-five thousand seedlings raised by the world-famous "WIZARD OF HORTICULTURE."

To Keep Abreast of the Times every one who gardens either for pleasure or profit, should read THE FARM ANNUAL FOR **1898**, which is brighter and better than ever before. Write TO-DAY! and you will receive a copy by return mail.

BURPEE'S BLUE LIST for 1898

has been mailed already to all **Florists** and **Market Gardners** who are upon our mailing lists. Any others can have it on application. It gives what are termed **"wholesale prices" to those who plant for profit.** The prices are considerably lower than in BURPEE'S FARM ANNUAL, but, of course, not so low as the **Trade Prices** quoted in

BURPEE'S RED LIST for 1898.

This **Wholesale Catalogue** for **the trade** is mailed **ONLY** to **dealers** who buy to sell again. It cannot be mailed either to florists or market gardeners who buy *only for their own planting.* ☞In applying for this catalogue you must enclose business card or other evidence that you are **a dealer in seeds.**

THUS WE HAVE TOLD THE STORY OF OUR

THREE CATALOGUES for 1898.

To which are **YOU** entitled? Every reader of THE AMERICAN FLORIST should certainly have one or more. ☞**ALL** have been mailed to our regular lists and if **YOU** have not received the right catalogue, **please write TO-DAY** and it will come by return mail.

W. Atlee Burpee & Co. Seed Growers Philadelphia, Pa.

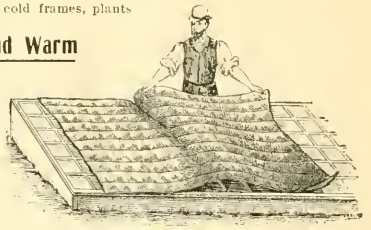
Philadelphia From a Growers' Standpoint.

American Beauty roses are very scarce, so are other roses, but first-class Beauties appear to be the most scarce. Jos. Kift & Son used 500 at a farewell dinner on Monday evening last, 150 Cattleyas were also used; for the boutonnieres, Dendrobium nobile were used. Plants of Asparagus Sprengerii, Nephrolepis exaltata Bostoniensis and seventy-five 5-inch pot plants of Adiantum Farleyense were used in the decorations. This may not seem a lavish use of Farleyense for New York or some other cities, but it is not often that so many are used at one time in Philadelphia. It is good for the business. The ferns and asparagus plants were easily supplied by growers around this city, but many of the Beauties and cattleyas came from New York. It is to be hoped the prices will be kept up. The retailers ought to be willing to at all times pay good prices for flowers, because by their process of figuring the higher the price they pay for them the more money they make.

Carnations are plentiful. Victor is making a good many friends. Everybody who knows anything about it is speaking a good word for it. Hugh Graham is to be congratulated upon his good fortune in securing so valuable a prize. John Burton's "Gardenia Carnation" is commented upon favorably. It is a first-class variety from the English standpoint, that is to say, it is without serrations, as may be seen by the illustration on page 663 in last week's issue, and as seen growing at its home.

Would Asparagus Sprengerii pay to grow as the so-called smilax is grown and its nearer relative, A. plumosus nanus, upon strings? or is it destined only to be grown and used as a pot plant? I am inclined to think that it may, can and will be used both ways. Mr. Battles likes it as a green, and that speaks well for it. I have a few plants of it growing in a solid bed with American Beauty roses, and it is climbing all right.

At the meeting of the Florists' Club, which is to be held on Tuesday next, February 1, John Wescott will deliver an address upon "Desirable Flowering Plants for the Holidays," and it is to be hoped that plants suitable for that gay and festive occasion will be on hand for the purpose of illustrating the talk. Any person who has something useful that is not common should embrace this opportunity of drawing public attention to it. We are promised more of the newer carnations for this meeting also, and it affords an excellent chance for the members and their friends to look upon a good new variety, so everybody please forward what they may have worth showing, prepaid, to the secretary, Edwin Lonsdale, Horticultural Hall, Broad street, to reach there as early in the day as possible, so that they may be put into water and given an opportunity to freshen up a bit after their journey and before the meeting opens.



I am reminded on looking over plants of Begonia Gloire de Lorraine that your correspondent, S. Dale, was wrong when he made the statement that this hybrid is a mule, as apparently it is producing pollen grains and there were certainly some pistilate flowers present, but whether seed will be produced or not remains to be seen. We must patiently await developments.

Am favorably impressed with the somewhat new Browallia speciosa major for winter blooming. It is free flowering and the individual flowers are similar in form and color to a single violet. L.

Palmer's Hot Bed Mats

FROST PROOF

Made expressly for winter covering of hotbeds, cold frames, plants and seeds of all kinds.

Indestructible, Cheap and Warm

WILL not harbor mice or vermin. Easily handled. Dry out quickly after rain. Have now been in practical use three years. Cost less than old-fashioned straw mats and entirely take their place.

MADE IN FOLLOWING GRADES:

No 1—**Burlap Cloth**, filled with combination wool and quilted, seams 3 inches apart and edges firmly bound.

Size 40x76 inches, 50 cents each.
" 76x76 " 75 " "

Made any length, 76 inches wide, at 12 cents per running foot.

No. 2 **Duck Cloth** outside, filled and quilted same as No. 1.
Size 40x76 inches, $0.75 each.
" 76x76 " 1.00 "
Made any length, 76 inches wide, at 16 cents per running foot.

No. 3—**Waterproof**, made of oil duck, filled and quilted same as Nos. 1 and 2.
Size 40x76 inches, $1.00 each.
" 76x76 " $1.25 to $1.50 each.
Made any length, 76 inches wide, at 20 cents per running foot.

That these mats are a **much needed improvement** over anything heretofore used for the same purpose, is demonstrated by the large demand and many testimonials from prominent men in the trade. Everyone using Hot Bed Mats should give them a trial.

PATENT APPLIED FOR.

WE ALSO MAKE **QUILTED HORSE BLANKETS** the Cheapest, Warmest and Strongest in the World....

THE SEED TRADE.

AMERICAN SEED TRADE ASSOCIATION.

JEROME B. RICE, Pres.; E. B. CLARK, 1st Vice-Pres.; S. F. WILLARD, Wethersfield, Conn., Sec'y and Treas.

ONION sets are ruling from 25 to 60 cents per bushel higher.

THE executive committee of the American Seed Trade Association held their January session in New York city on the 21st and decided, as already stated in our columns last week, to hold the next annual meeting at Old Point Comfort, Va. Those present were, President J. B. Rice, Secretary S. F. Willard and Wm. Meggat, E. B. Clark, A. N. Clark, A. L. Don, W. H. Grenell, S. W. Woof, W. Atlee Burpee, C. L. Allen, Albert McCullough, Jas. Vick.

NEW YORK.—News in the seed trade is scarce. Most all are engaged in preparing for the rush that they hope will come. Southern business is holding out quite satisfactorily. The wholesale garden seed trade is suffering, apparently from overproduction. Green pod beans are being offered as low as $1 a bushel, and even this ruinous figure brings but few takers, most of the larger houses being sellers. There is undoubtedly much '95 and '96 stock in first hands and with the large yield in most items for '97 the congestion does not show any signs of abatement. There has been no profit in the wholesale trade for the past three years and it is not surprising that certain houses have abandoned it. Unless the situation improves radically soon there will be few left as wholesalers pure and simple. Firms with a local trade among farmers, truckers and amateurs have undoubtedly had the best of it lately and are probably the only ones that can show a good balance on the right side of the ledger. Murmurs are heard in reference to the recent meeting of the executive committee of the Seed Trade Association, it being said that no practical steps for the general good of the seed trade were suggested, most of the time being taken up in the discussion of minor matters and the need of a broader spirit is keenly felt. Visiting New York: Albert McCullough, Cincinnati, O., and Henry C. Johnson, Los Angeles, Cal.

On Tuesday night, January 25th, thieves got away with the handsome brass letters on the windows of Vaughan's Seed Store on Barclay street. Several neighboring stores were deprived of their signs in like manner.

The Free Seed Distribution.

A well-known horticulturist contributes the following valuable suggestion for the seed trade columns of the FLORIST: "I think that a little earnest effort would induce Secretary Wilson to see that by sending collections of flower seeds and flowering bulbs to school districts who would promise to plant them in the school yard and take proper care of them, he could do far more than by the present system of free seed distribution. They could be sent as coming from the Department of Agriculture at the request of the congressman, and it seems to me that there would be far more political advertisement and advantages in the whole school district knowing that Senator Buncomb had sent them some fine flower seeds for their school yard, and being reminded of it by the flowers, than by one or two or a dozen receiving seeds which most of them did not care for.

Some ten years ago, the Michigan Horticultural Society distributed to district schools which applied for them, such collections, and the good done is in some cases evident to this day. In an instance noted last summer, I believe the sale of flower and vegetable seed in the district is five times what it would have been but for the interest started by the school garden which was the result of one of these donated collections of seeds sent ten years ago."

Free Seed Distribution Again.

Hon. Asbury C. Latimer, of South Carolina, introduced the following bill in the house last Friday, relating to the distribution of seeds, trees, bulbs, and so forth.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled: That all seeds, trees, bulbs, shrubs, vines, cuttings and plants purchased and propagated by the Secretary of Agriculture, as required by law, shall be distributed to the agricultural experiment stations and colleges in the several states and territories, and all seeds, trees, bulbs shrubs, vines, cuttings and plants propagated by the agricultural stations and colleges in the several states and territories of the United States shall be distributed to such persons as shall request the same; and the sum of $2,000 shall be alloted to each state and territory, to be paid to the agricultural stations and colleges for the purpose of growing and purchasing seeds, trees, bulbs, shrubs, vines, cuttings and plants for distribution, as aforesaid, and to pay the expense of such distribution.

Sec. 2. That the seeds, trees, bulbs, shrubs, vines, cuttings and plants distributed by the Department of Agriculture and the agricultural stations and colleges under the provisions of this Act shall be transmitted in the mails of the United States free of charge of postage.

Sec 3. That all acts or part of acts inconsistent with this are hereby repealed.

The above was referred to the Committee on Agriculture and ordered to be printed. REYNOLDS.

RAFFIA New consignment just arrived by Str. Maine. Having purchased on a very favorable market, and wishing to move the stock quickly, make the following special low quotations for prompt orders:

Syracuse, N. Y.

It is pleasing to chronicle business is still good; the usual run of social functions have called for large quantities of flowers and decorations. The Knights Templars' ball gave an unusual stimulus to business. The custom of carrying instead of wearing flowers was very noticeable at this grand affair; while Beauty roses and violets predominated, large bunches of Daybreak carnations and Maid roses were greatly in evidence.

We are experiencing the same exceptional mild weather for the time of year as many others; it may not be seasonable, but it has been extremely pleasant for those who had decorative work, and at the same time transient trade over the counter has been greatly augmented by it, at least that is our experience here.

The supply of flowers has been good, with hardly enough to go around, up till now, when roses are beginning to get scarce, many houses being off crop. However, bulbous stock is coming in and helps materially to fill up the gap. Daffodils are fine, and, the same as last year, are favorite flowers, retailing at from 75 cents to $1 per dozen. Tulips, now being longer stemmed, find a readier sale, fetching 75 cents per dozen.

Last year it was yellow and pink all the while, no reds at all. Owing to these circumstances, but few reds were ordered for this year, but there is the mistake; everything since Christmas has been red—red teas and so forth are the go. Valley is exceedingly good, but it does not go so well as formerly. Violets are plentiful and the price has dropped to retail at $1.50 per 100. Harrisii are scarce, but callas are plentiful and have an unprecedented demand. ALPHA

Worcester, Mass.

With plenty of sunshine and the temperature not too low, we are getting plenty of good flowers.

Von Sion and Trumpet Major narcissus are now coming in in good salable condition, and tulips in a greater variety of colors and plenty of stem. Lily of the valley has improved a great deal, and is now moving much better than earlier in the season.

Trade started in rather slowly the first of the week, but steadied up by the middle and is running very smoothly at the present time, with nothing extraordinary in sight. A. H. L.

THREE NEW CALIFORNIA SWEET PEAS

Originated by M. Lynch, Menlo Park, Calif.

THE BRIDE

THE BRIDE This beautiful large, white-seeded variety is the best White Sweet Pea to date. It is a pure white selection from Mrs. Eckford and is the strongest germinator among all the white-seeded varieties—so often poor growers. Grown for the cut-flower market of San Francisco in competition with the other high class whites, it has brought the highest figures over them all, taking first rank among all the whites. The flowers are pure white of fine substance, large and of true grandiflora type. Beside this every seed will grow. Perfect flowers were cut as early as April 16 last year. Price, per lb., $2.00; 1-4 lb., 60c; oz., 20c; pkt., 10c.

The Cornell Bulletin in naming the best Sweet Peas of each color, classes The Bride first as a white, with Emily Henderson second and Blanche Burpee third.

Frank Pellicano, a leading florist of San Francisco, stated: "We can sell more Bride Sweet Pea blooms than those of any other variety which we have ever handled."

Prof. Tracy, in a recent review of some of the newer Sweet Peas says: "The especial merit of this variety (The Bride) is in its length, strength and grace of flower stem, and the disposition of the blooms thereon, being one of our best sorts in these respects, and forming an exceedingly graceful bunch."

EMILY LYNCH The earliest of all Sweet Peas. Sown alongside of Extra Early Blanche Ferry it was in bud in 69 days, while the latter showed no sign of buds at that time. It blooms two weeks earlier than Extra Blanche Ferry. The standard is pink, shading to bright rose, wings buff suffused with pink. Grandiflora style. A great advance on Duke of York. Price, 1-4 lb., 60c; oz., 20c; pkt., 10c.

CALIFORNIA This is the best "self-color" in soft pink, of the shade of Daybreak Carnation, the lightest self among all Sweet Peas. The form and size are perfect. Rev. W. T. Hutchins says of it: "It is different from all our other self-pinks and a good thing." Price, 1-4 lb., 60c; oz., 20c; pkt., 10c.

Mr. Lynch has sent us his entire stock which we offer to the trade as above.

EVELINA

Is the grandest mid-winter carnation extant. This is the unanimous opinion of all who have seen it growing and predict for it a grand future. Surpasses Wm. Scott.

Send your name and address and receive illustrated and descriptive price list of Evelina.

R. WITTERSTAETTER, Sedamsville, O.

Los Angeles, Cal.

Heavy rains continuing over several days have greatly improved matters in this locality, but sharp frosts followed, making the air decidedly chilly and sharp.

Redlands and Riverside and vicinities were treated to a genuine snow storm. It was a rare sight to see the orange trees laden with their wealth of golden fruit, and the branches bending and many breaking under the over burden of their mantle of snow. The temperature was above freezing and the only damage was the breaking of the branches.

The Board of Horticultural Commissioners of Los Angeles county report that under their orders and supervision more than 700,000 citrus trees have been fumigated during the year. The cyanide process has been used exclusively and gives great satisfaction. Some of our florists and nurserymen are experimenting with the process to cleanse all stock from scale and mealy bug.

The seed business is showing a decided improvement since the rain and the dealers are correspondingly happy.

The Germain Fruit Company have recently exported 25,000 pampas plumes. This company are the largest dealers in plumes on this coast.

Mrs. M. B. Boyce, one of the leading growers of Santa Monica, will only confess to two white frosts this winter.

The University Farmers' Institute, under the auspices of the University of California, had a three days' meeting in Los Angeles on January 3, 4, 5, conducted by Prof. A. J. Cook, of Pomona College. Much valuable practical information in relation to fruits and flowers was disseminated.

A visit to the floral stores shows ready sale for all good stock that is brought in.

H. McTier in charge of the famous Gould place at Santa Barbara was in the city attending the Farmers' Institute as a delegate.

Mr. J. H. Ross, of the Park Nursery Co., Pasadena, has been incapacitated for two weeks with a boil in the ear. One of the firm says he is afflicted with a swelled head since that city made such a great show at the Tournament of Roses.

Sweet peas (I mean the blooms) are for sale at some of the stores this week.

D. R. W.

Tailby's New Scarlet Carnation

BUSINESS FAIR AND PRICES LOW.—KLONDIKE FEVER AMONG FLORISTS.—CHANGES IN THE SEED TRADE.

Trade continues in a fairly good condition and is generally satisfactory, taking everything into consideration; stock of all kinds, with the exception of roses, is abundant, and of good quality, and prices low enough to command a much larger trade than is being done. Roses are selling, retail at from $1.50 per dozen up; carnations, 35 to 50 cents per dozen, very fine ones bringing more. Tulips, freesias and narcissus 50 cents. Lilies from $1.50 up; violets 50 cents per bunch up.

It is reported among the trade that one of our heaviest firms, growers, have the Klondike fever very strong, and are seriously contemplating the advisability of selling out and going there this season.

Mr. John Muchi, of Sharon, Pa., is sending some fine carnations to market here and this week he sent to Mr. Gustave Ludwig several specimen of seedling carnations white, yellow, yellow pink-edged and a very dark red that have more than ordinary merit, none of them are named as yet. Mr. Ludwig reports trade fair, this week he has secured the order for two decorations at the Willard Hotel for the annual banquet of the Medical Society and also the "Elks" of that place, being one of the latter himself, he will know how to place the stag's head in the proper position.

Messrs. C. Beckert & Co., 95 Ohio street, Allegheny City, flour and grain merchants have bought the fixtures, drawers, etc., of the seed department of Mr. Dell and will open a complete seed department at once with a full assortment of new fresh seeds. They have been selling a few seeds for about three years but will now be able to supply any quantity in full variety of farm, garden or flower seeds; the firm is A1 in every way and will no doubt do a large business in the new venture.

Mr. Wyland of De Haven, suffered the loss of having his barn unroofed on Tuesday night, the big wind storm of Saturday night started it and the second one finished the job by removing it; beyond a few trees, no other damage was done; his greenhouses fortunately were not injured at all.

Mr. Wm. J. Boas, representing Edwards & Docker, Philadelphia, was a visitor this week. REGIA.

Poughkeepsie, N. Y.

The annual meeting of the Dutchess County Horticultural Society was held at the court house on Wednesday afternoon, January 12. Officers for 1898 were elected as follows; President, George Saltford; vice-president, Herman Asher; treasurer, Jas. S. Sloan; secretary, A. A. Loughren. Auditing, exhibition and essay committees were appointed and matters connected with the exhibition for next fall were discussed at length.

The annual dinner took place in the evening at the Nelson House. The tables were lavishly decorated and in all respects the occasion was a notable success. President Saltford in his address stated that there are now 123 members enrolled and that although the exhibitions have not been profitable financially, the society is in a prosperous condition and has a balance in the treasury. Other speakers were Patrick O'Mara, R. E. Connell, John I. Platt, F. L. Atkins, C. B. Weathered and C. J. Reynolds, and T. J. MacPherson sang several songs.

Caladiums.

An inquiry is received as to how to keep caladiums from rotting. L. Minn, the inquirer, states that he has been keeping them in a basement on dry sand away from drip in a temperature of about 50°. The temperature in which they have been kept is entirely too low. They should never be subjected to a lower temperature than 55°, and 60° is better. The best way to do now is to remove all the decayed parts and apply pulverized charcoal to the wounds, and place them in as high a temperature as is indicated above. It is a mistake to keep them too dry when at rest, but since they have developed a tendency to rot moisture applied now might accelerate the trouble. Bury them in dry sand in a 60° temperature and await developments. Examine them occasionally to ascertain whether the rotting tendency has ceased or not; if it has, all is well; if not, it will be difficult to save them. Hereafter when a caladium shows a tendency to go to rest in the autumn, allow it to do so gradually by withholding water at longer intervals each time, but do not keep them entirely dry or they will rot in the center. The low temperature is at the bottom of all the trouble of rotting in this case, I feel sure. L. E.

MENDOTA, ILL.—Samuel Edwards, the widely known nurseryman and horticulturist, died January 24. He established the "Evergreens" in Lamoille in 1854, had been president of the State Horticultural Society and a writer of note on nursery subjects.

LA GRANGE, ILL.—Mr. Frank Nielsen has removed from Riverside and now has three greenhouses at this place.

If you have not received our Wholesale Price List send us your business card and we will mail a copy.

SPECIMEN AZALEA.

DREER'S "SPECIAL OFFER" OF EASTER FLOWERING STOCK

AZALEAS

We are carrying in stock an immense quantity of Azaleas for Easter forcing; the plants are in good condition and finely set with buds; the varieties we offer are only the best commercial sorts.

As these plants can be more safely shipped when in bud, we wish to impress the importance of early orders. We will not be responsible for injuries arising from late shipments when the buds are developed.

Pot-Grown Lilacs for Forcing.

Fine pot-grown plants, bushy and covered with buds, Charles X, and Marie Lagraye, 50c each.

Metrosideros Floribunda. Bottle Brush.

We have a fine lot of both tree and bush shaped plants of this useful plant, in fine shape for forcing for Easter.

Bush shaped plants with 12-inch bushy crowns, $1 each.

Standards with stems 20 inches high and 12 to 15 inch crowns, $1.50 each.

Acacia Armata.

A pretty spring flowering variety which produces its flowers in globular heads from the axils of the foliage in such a manner as to completely envelope the plant in a pleasing light yellow; an excellent plant for Easter forcing, succeeding under the same culture as the Azaleas. We offer a fine lot of well-budded specimen plants in 7 and 8-inch pots, 26 to 30 inches high, $2.00 and $2.50 each.

See our Flower Seed "Ad" in this Number.

HENRY A. DREER, 714 CHESTNUT ST., PHILADELPHIA, PA.

Indianapolis.

TRADE STEADY.—BAD WEATHER.—THIEVES VISIT THE STORE OF A. WIEGAND & SON.

Since my last report the store trade has been steadily increasing, and is now reported very satisfactory; on Market also a very decided improvement is noticeable. In consequence the grower finds ready sale at fair prices for his flowers.

Every florist if he is an owner of glass, has been on needles on account of the extraordinary weather we have had. Even the traditional oldest citizen can not remember anything like it in January. The wind blowing a gale at the rate of 55–58 miles an hour for at least twelve hours, then sunshine for a day or two, followed by a thunderstorm, then another gale as bad as the first one, and to cap the climax, the announcement of a cold wave.

As present indications are that very little building will be done this year, the man with the clear cypress lumber has poor prospects in Indianapolis.

Mr. Chas. Schafer, of Chicago, paid a visit to Indianapolis florists on Monday. He spoke very interestingly about his houses and his way of growing carnations. Mr. Schafer admired the clean appearance of the buildings in our smokeless city.

During the night from Sunday to Monday thieves paid a visit to the store of A. Wiegand & Son, entering the store through an adjoining greenhouse. The only things taken were three overcoats and several pairs of trousers out of an anteroom; but to judge from the way they searched drawers and scattered papers around, they were after more valuable things. Their search was in vain, however.

Mrs. Chas. Rieman who grows Albertini for the first time this year, is very enthusiastic about this carnation in general, and particularly so about a lighter colored sport of it, that happened to be among the lot she bought. This reminds me, that at the state meeting show of last week the judges awarded the certificate for the best pink to a vase of Albertini, which goes to show that in spite of many good pink carnations of more recent introduction, Mr. Dorner's old favorite is still decidedly in it.

Some of the florists are making up a party to pay a visit to the South Park Floral Company, in New Castle, to see how this company grows those magnificent cut flowers they exhibited at our last two shows. F.

SALT LAKE CITY.—The Florists' Society held its last meeting at the offices of the Hubbard Floral Co.'s greenhouses. There was an unusually large attendance. Mr. James Williams of the city cemetery read an interesting paper on the leading varieties of spring flowering plants, which was followed by a general discussion on topics of interest to gardeners and florists.

PORTSMOUTH, N. H.—Robert E. Capstick was married to miss Mary A. Quinlan on January 20.

Grafting Belle Siebrecht Rose.

L. Minn complains that his Belle Siebrecht roses are not vigorous and wishes to know if in the absence of Manetti stock on which to graft this rose he could root-graft on the briar. We will presume he means the English dog rose (Rosa canina). The claim is made by some of the English and other European rosarians that this briar as a stock suits the less vigorous roses best, of which "Belle" may be classified as one, on which to work them; then again in some quarters it is believed that this briar has a predisposition to take a rest in winter, which, if true, is a serious drawback when the object in view is roses for winter blooming. My own private opinion is that the variety grafted (the scion) has as much, if not more, to do with the inclination to rest as has the stock upon which it is grafted. The best Belle Siebrecht that I have heard of have been those grafted on the Manetti and growing in a solid bed. This rose, like most hybrid teas, is subject to black spot, and if it can be kept clear of this malady fairly good returns may be looked for even when grown on its own roots. It should be grown in a temperature of not less than 60° at night, and 2° or 3° higher will do it no harm. L.

Carnations Chrysanthemums

NEW AND STANDARD VARIETIES

Our new Trade List will embrace the leading novelties of 1898 and 1897 as well as the best standard sorts. Address

H. WEBER & SONS, - Oakland, Md.

NEW CARNATION

Fuchsias.

A grand lot of summered-over stock in small pots that will make early blooming plants, $3 per 100.

W. P. SIMMONS & CO.

Make the following statement to the readers of the American Florist.

As originators and introducers of
"Silver Spray,"
"Tidal Wave,"
"Daybreak,"
and "Rose Queen,"

each of which has, we believe, proven even better than we claimed for them. We NOW say for 1898 that

"Mrs. S. A. Northway"

possesses all the good points that go to make up a first-class and profitable cut flower sort, and that we introduce it with even more confidence than we did the others.

It is an extra strong grower.
It is free from rust or disease.
It is a profuse bloomer.
It has exceedingly strong stiff stems.
It is of exquisite form full and double.
The flower is high built, petals serrated.
The calyx does not burst.
It is delightfully fragrant (a quality lacking in many new ones.)

OUR PRICE LIST now ready, contains prices on many other plants. SEND FOR IT.

W. P. SIMMONS & CO., Geneva, Ohio.

ST. LOUIS CUT FLOWER CO.

1620 OLIVE STREET,
ST. LOUIS, MO.

The American Carnation Society.

The next meeting of this society will be held in Chicago, February 17 and 18, 1898. The headquarters of the society will be the Auditorium hotel, they having given us a rate of $3 per day on the American plan and $1.50 per day on the European plan. This rate is, considering the standing of the Auditorium, a very low one, and we can congratulate ourselves on being thus favored.

Mr. J. T. Anthony has been appointed superintendent of the exhibition, and all inquiries regarding space and other matters pertaining to the exhibition should be addressed to him at 318 Wabash avenue, Chicago. All shipments of flowers are to be made to the same address, and they must all be prepaid in full.

The exhibition and the meeting will both be held in the Auditorium hotel, and with such an efficient man as Mr. Anthony at the head of the exhibition, it will certainly not be the fault of the Chicago Florists' Club if the coming meeting and exhibition are not the best in the history of the society.

For entry cards and premium lists address the secretary, Albert M. Herr, Lancaster, Pa.

Signed: W. N. RUDD, President.
Attest: ALBERT M. HERR, Sec'y.

C. F. BAKER, Utica, N. Y.

Providence, R. I.

Not long since your correspondent, in company with several other gentlemen, upon invitation visited Mr. S. J. Reuter at his place in Westerly, R. I. We were met at the station by the genial host and taken to his home, where a repast was set before us. After an hour of social intercourse we were shown about the place, where we had the pleasure of discussing and contrasting the merits of the several varieties of carnations, roses and violets he grows. Mr. Reuter has thirty-one houses all equipped with modern improvements, and everything neat. The two new rose houses were especially fine and the plants in perfect condition. We could see why everything that comes from his place was A1 and always in demand.

A seed imposter of German extraction is among us again. He has succeeded in victimizing several people about here. One story he tells is that he is a member of a big seed house in the west and spending a vacation for his health, and to pay expenses is introducing this choice seed. He represents the plant perfectly hardy, blooming profusely, a beautiful white and pink flower, very attractive, etc. He displays the seed in a small bottle and has a magnifying glass to show you that there is no deception. He sells any quantity you may desire, but always insists on amounts exceeding 50 cents. The seeds are all right and every one will germinate, and whoever plants them will have as nice a batch of clover as they ever saw. He is a man about 50, medium height, dark complexion and fond of his pipe and other good things, and his make-up would be a good sign for a fifth-rate beer saloon.

Mr. Sidney Barker, of Barrington, R. I., takes the palm on violets. An eye witness said that a silver half dollar would not cover some of the blooms he is picking.

Wm. Butcher reports unusual activity in the line of funeral work for the past few weeks. LITTLE RHODY.

PEORIA, ILL.—J. C. Murray had the decoration for the Clark reception at the Woman's Club last week. It was perhaps the most elaborate affair ever seen at this club. The decorations were palms, rubber and other plants, asparagus, smilax and wild smilax. The only color used, outside the supper room was poinsettia bracts. The supper table decorations were principally American Beauties.

Among Chicago Growers.

Nothing gives the average florist more pleasure than to visit the places of their brethren in the trade where everything is kept in perfect order and the stock grown in the best style. Such a place is Mr. E. Buettner's, of Park Ridge. Mr. Buettner has about ten acres of ground, over 70,000 square feet of which is covered with glass. In the erection of the houses every effort was made to construct them in the best possible manner.

The first range of houses was built about eight years ago, and the others six years later, but all have been kept in such perfect repair it is difficult to distinguish the old from the new. Carnations and roses are chiefly grown, though a much larger variety of flowers may be found here than in any other place in the vicinity of this city. Valley and all bulb stock are forced in large quantities. The valley is coming on in all stages of growth, and some now being cut is very near perfection for so early in the season. Tulips in several varieties, all well grown, are now fit to cut. Narcissus Von Sion are making good progress and will be in full bloom in a few days.

Some of Mr. Buettner's Harrisii lilies are badly diseased this year, and a large proportion of the plants have been thrown away on this account. Those that are left, in different stages of growth are doing nicely—some of them only six inches high, others in full bloom. Mr. Earl, the foreman, always grows American Beauties well, but this season he has surpassed himself, and the product is exceptionally good. Mr. Buettner makes a special effort to bring his roses along in summer and fall, so as to have as many as possible around the holidays, and he has succeeded admirably this season, nearly every house being in full crop at the proper time. In addition to Beauties, the Bride, Bridesmaid, Meteor and Belle Siebrecht are all very good, though not up to the remarkably high standard attained with Beauties. The method of propagating tea roses is a little different here than that ordinarily pursued. Very long cuttings are used, that is, they are four or five inches in length. Mr. Buettner claims that by this method he gets stronger breaks and heavier growth in the earlier stages. His American Beauties, however, are increased in the usual way from two-eye cuttings.

A house of mignonette was well grown, but it would probably have been better to grow only one variety rather than several in mixture. Mr. Buettner plants his carnations closer together on the benches than is usually done, the average distance being about ten inches. Some of the stronger growing kinds appear to resent the crowding, while others, such as McGowan and Scott, seem to luxuriate in their close quarters. No better blooms of these two varieties can be found in the market than are grown here, and with the plants set so close together that they completely cover the ground, I doubt whether a greater number could have been grown on the same amount of bench space. One house was filled with marguerites just commencing to bloom in 7-inch pots. Across the end of several houses, occupying little room that could be otherwise utilized, are boxes of heliotrope covered with bloom. A large variety of flowers are grown outside in summer, including peonies, delphiniums, campanulas, coreopsis, sweet peas, asters, etc., all the ground being devoted to this work. Mr. Buettner disposes of all his floral products to his former partner, Mr. E. Wienhoeber. J. T. A.

The Price of Violets.

Florists representing four leading cities were recently asked the price of violets, and the following characteristic replies where given:

New York.—Not the fashion now.
Boston.—Eternal vigilance.
Philadelphia.—Let us try the 'phone.
Chicago.—How many?

BURLEY & TYRRELL, 42=44 Lake St., CHICAGO.

Allentown, Pa.

Business is rather encouraging. Decorations and funeral work have kept the florists more than ordinarily busy of late. Anything in the cut flower line has sold readily at fair prices. At Christmas while the demand for palms, ferns and decorative plants was far ahead of any previous season, in cut flowers the demand rather exceeded the supply.

Mr. John F. Horn has commenced building a violet house to cover 10x100. The violet is still a somewhat scarce article in this section, though popular and in favor with the public.

Mr. A. B. Ellsworth contemplates building an additional rose house to cover 20x200. It is needless to add that Mr. E. never does anything by halves and that the new rose house will be no exception to his standing rule: "Whatever is worth doing at all is worth doing well." Mr. Ellsworth, by the by, has been tendered the nomination for mayor. His efficient services during the past three years as select councilman, and his business-like methods of conducting municipal affairs, make him especially desirable for the office. HOMO.

Newport, R. I.

The annual meeting of the Newport Horticultural Society was held on the evening of the 12th inst. The following officers were elected for the year: President, James McLeish; vice-presidents, Benjamin F. Tanner, John T. Allan; recording secretary, John J. Butler; financial secretary, Andrew Meikle; treasurer, Richard S. Gardiner; sergeant-at-arms, Thomas Beattie; executive committee, James McLeish, Alex. McLellan, Robert Laurie, Richard Gardiner, James Boyd, Bruce Butterton, John Milne, A. K. McMahon, John J. Butler. Auditing committee, Joseph Gibson, William Burton, Arthur Griffin.

The meeting was one of the largest ever held by the society. All seemed intent on furthering the interests of the organization, and there was considerable talk for the benefit of the entertainment committee, which committee is expected to attain to the degree of A 1. A series of entertainments is proposed. The constitution was amended in several particulars, associate members being provided for. It was also partially decided that the society give an exhibition the coming fall. The organization of a Bowling Club is a probable new feature.

The following members received medals for last fall's exhibits in the hall. The society's medal to Arthur Griffin for begonias; bronze medal to Robert Laurie for Begonia Socotrana; and bronze medal to Alexander McLellan, for chrysanthemums. J. J. BUTLER.

It Grows on Him.

After a man has owed you money as long as two years he begins to believe the account is not right. At the end of three years he thinks you are a thief.—*Atchison Globe.*

The Treatment of Rose Seeds.

ED. AM. FLORIST:—What is the best way to treat rose seeds? Must they be stratified, or can they be sown in flats and treated as ordinary seed flats?

SUBSCRIBER.

The inquiry of your correspondent refers to a matter which has been agitating my own mind the past few weeks. To be perfectly candid, I do not know which is the better plan to treat rose seeds. When in Lyons, France, some years since, Messrs. Guillot, Pernet and other French rosarians planted their rose seeds in the open ground in prepared borders. Mr. Guillot's border was about three feet wide and raised about four inches above the path. At Waltham, England, Messrs. W. Paul & Sons used practically the same plan, Mr. Paul stating that the seeds often took two seasons for their germination. On the other hand the late Mr. H. Bennett germinated his rose seeds in pans under glass, and at the time of my visit he had not less than 8,000 young seedling roses which had been potted eight or ten weeks previous. Mr. Bennett laid much stress on the necessity of having the hips thoroughly ripened before gathering in the fall, adding that when this was done there was little trouble in getting rose seeds to sprout. A few weeks since I sowed some twelve hundred rose seeds in two flats using a loamy soil with a good mixture of sand in it, covering the seeds with a light peat. They were placed in a very cool house and the writer trusts that as the season advances nature may help along the work which has occupied no little time and care in crossing, etc.

Mr. Thorpe in talking on this same subject a few weeks since, gave it as his opinion that it was a mistake to freeze tea rose seeds, expecting help from that process On the contrary he cited the native home of Rosa Indica as indicating just the opposite course. Some resort to filing the hard shell of the seed, thinking thereby to hasten germination, but my experiments in this line have not proven satisfactory. Some start their rose seeds in a warm hot-bed (manure) in the spring with fair results, My judgment is that for all tender roses the seed should be sown in November and December and given a suitable length of time in which to come up; if the seeds are well ripened and mature, many of them will begin to peep through the soil in April and May. The soil should be kept uniformly moist.

E. G. HILL.

Binghampton, N. Y.

Mrs. M. L. Barnes and Mr. Wm. M. Moore have consolidated their interests, the name of the firm being Barnes & Moore. In addition to their greenhouse establishment on Oak street, they have opened a flower store at 77 Court street, in the very heart of the business center.

Mr. Moore reports trade as very satisfactory, the demand for palms, ferns and plants of all kinds being quite brisk and on the increase.

Since my last visit to this city some four years ago, Mrs. Barnes has made some substantial additions to and general improvements about her greenhouses, the plant covering over 8,000 feet of space.

Mr. M. N. Mills is reported to be on the sick list.

At Jas. B. Tully's, things show up in fine shape. His plants, as usual, show the effects of good treatment. HOMO.

Something About Potash in the Soil.

Prof. Heiges at the Farmers' Institute meeting held at Horticultural Hall week before last said he knew of no practical means to estimate the value of potash in the soil from general appearances, but there are a few general principles which may be observed and should be a guide.

First, soils that have been covered by woods will always contain a sufficient amount of soluble potash. The decay going on in the forests of deciduous and of everygreen trees produces potash, or rather leaves potash, but more especially the slow decay of fallen branches. Micaceous soils, or soils containing silver and gold, are rich in potash, though it may not always be available. Limestone soils are also rich in potash. A plant will sometime assimilate more potash than it actually needs, and this is where the burning of a given plant and analyzing the ashes thereof will be misleading. It is certain that farmers are paying too high a price for the potash contained in wood ashes; that it would be cheaper to purchase it in the form of muriate of potash. L.

Roman Cement.

In answer to the inquiry of "L.," regarding Roman cement, it is an English importation, and I doubt if it can be procured outside of a few of the larger eastern cities, as it is an expensive cement, and one very little used in this country, excepting in costly sub-marine masonry. Any of the better grades of domestic hydraulic cements may be used with good results, and even a good quality of Portland cement will answer, but the hardening process is a little slower than with the Roman. HENRY W. GIBBONS.

OTHER SPECIALTIES

LEMON OIL INSECTICIDE This is at the head of the list for a reliable insect destroyer; it is the best and cheapest in the market used now by the leading growers for destroying the Mealy Bug, Scale, Thrip and Red Spider. We have received a large number of testimonials. 40c per pint; 75c per quart; $1.25 for 2 quarts; $2.00 per gallon; 5 gallon keg for $9.00.

NIKOTEEN Does not injure the most delicate plants. Extensively used for fumigating and syringing. 200 lbs. of tobacco in one pint of Nikoteen.

This is one of many testimonials:

DEC. 29th, 1897.

"Yours of the 28th inst., asking my opinion of Nikoteen is at hand. I have been using Nikoteen for about one year and find it the cleanest and cheapest form of using tobacco for Green Fly.

It requires less labor to use it than it does to put the stems in the walks and to take them out again, and is more effective and costs less money. I only use stems to make tobacco water with. There is another great advantage it has. It never cripples the buds, nor do they ever smell of it, but it will kill the fly if properly applied. I am about out of it; please send me another case of ten bottles."

Very truly yours, JOSEPH HEACOCK, Jenkinton, Pa.

CANE STAKES This is the cheapest and most durable plant stake in the market, especially for tying of Lilies. 8 to 10 feet long. 500 for $2.50; $5.00 per 1000; 5000 for $20.00.

It will pay you to send us a trial order. We guarantee satisfaction to our customers.

The Fuchsia Contest.

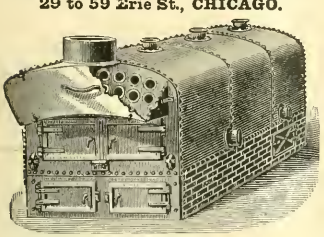
P. C., N. Y., says, "I have read with much interest in the issue of the FLORIST the article on fuchsias and the offer made for the best plant photographed. As I would like to enter as a competitor, I must ask a few questions:"

Question 1. "Should the plant be grown in a certain sized pot, or may it be grown in any size?" There is no restriction on the size of the pot to be used. This will enter partly into the contest. The committee on award will, no doubt, judge from the photograph whether a suitable sized pot has been used by its appearance in the picture or otherwise.

Question 2. "Must the photograph be taken at a given date or at a time when the plant is considered at its best?" As stated to another inquirer, the photo should be taken when the plant is thought to be at its best, and this will also be a matter of judgment for the cultivator to exercise.

Question 3. "If a plant is grown big in a small pot, would it receive more consideration than one just as large or bigger in a larger sized pot?" Because a plant is grown big in a small pot may or may not have a great deal of weight with the committee, because this contest was originated primarily for the purpose of practically demonstrating the ease with which beautiful plants of the fuchsia may be grown for spring or early summer sales. Thus a large plant in a small pot might look out of proportion and spoil what otherwise might make a good picture, and it might or it might not be considered a practical plant to offer for sale.

Question 4. "What sized pot would you suggest to grow the plants in?" We prefer not to give advice as to size of pot to use, leaving that from this time on entirely to the judgment of the grower.



Question 5. "Is it necessary to have the name of the variety with the photo?" The name of the variety must in all cases accompany the photo, as this will be a part of the educational features intended.

Question 6. "Are the first flowers produced from the tips of the shoots best, or do they improve later on?" Some varieties produce flowers in abundance, but small in size, and in others the individual flowers are larger, though few in number. In the climate of New York the best flowers are those generally which open first.

The other questions asked are covered in replies to other querists.

Mugwump, Joilet, Ill., after declaring that he has a little inclination to enter the contest, asks among other things. "What variety is best to grow?" We prefer not to give advice in this direction, because what might be best for Illinois might not be the best for New York and vice versa. L. O. N.

Boilers made of the best of material, shell, firebox sheets and heads of steel, water space all around (front, sides and back). Write for information.

OUR NEW BOOK
The
Tropical.... Orchard House

FIFTEEN years' experience in the culture of tropical fruits under glass. Opens a new industry to the horticulturist, profits greater than anything which can be grown under glass, and an unending source of pleasure to the amateur. This book gives plain practical instructions for the culture of all tropical fruits. Every florist needs it—you can get pointers from it. The Tropical Orchard House is a coming popular feature of gardening.

Kraft's Plant Tonic
For PLANTS, PALMS and FLOWERS
...A Wonderful Preparation for the Promotion of Plant Life, Destruction of Insects and Scale..

This is one of the greatest preparations for the use of Florists and Plant Growers ever compounded. It gives to the foliage of plants treated the bright, fresh color of healthy, growing vegetation. It destroys all insect life infecting the plant and eradicates scale.

Besides improving the color of the plant, it effects a general betterment of its condition, aiding nature in disseminating and retaining the sap and life of the plant. The Tonic makes the foliage of the plant soft and pliable, and a beautiful bright green.

Fuchsia Contest.

Replying to inquiries respecting the above, the time limit in said contest should not be longer than July 1, when the photographs should be in the hands of Prof. Cowell at the AMERICAN FLORIST office.

The idea the writer had in mind was to encourage the better growing of plants for spring sales. My first awakening to the realization of the necessity of growing at least some specimen plants for spring sales was a number of years ago when I first entered a commercial establishment. In looking out for the future, I selected a few plants of each variety of "only those old geraniums" and gave them extra care as to repotting, and more space between each plant, and labeled them "stock plants;" and notwithstanding the fact that an extra price was asked by my employer they gradually but surely were being sold, and despite my indignation at the loss of my pets, which was the cause of some good natured merriment "in the office," it was a wholesome lesson to me, and one which I have never forgotten.

A variety of fuchsia which is not at its best before June 15 is not of much value for retail trade, because the bulk of the plant trade is over by that time. The plant should be photographed when at its best—when there are some flowers open at the ends of each shoot, and the name of the variety should accompany the picture. By way of advice, if the prospective prize winners in this contest do not possess a camera of their own, don't attempt to take the plant to the photographer, but bring the photographer to the plant, and the chances for having a good plant to be photographed are much better than if the plant was taken to the photographer.

Am pleased to note that so much interest is being manifested in this matter.

L. O. N.

MIDDLETOWN, CONN.—Henry Fountaine has a case against the gas company for plants and flowers damaged by gas escaping from a leaky pipe; if not settled otherwise, he proposes to bring a suit for damages.

Plain Writing.

ED. AM. FLORIST.—You will doubtless confer a favor on all of your advertisers if you will write and publish an article on the importance of plain writing and full postoffice address.

We recently received a postal card that was anything but plain. We could only guess at the signature. After a good deal of study we concluded that the heading was Warsaw. The state not being written we turned the card over to find it in the post mark, but the post mark reads "Pittsburg and Chicago P. O." indicating that the card was mailed on train and in one of four states, Illinois, Indiana, Ohio or Pennsylvania. We turned to one state after another in a national directory and found that each one of these states has a Warsaw. We sent a postal card to each one of them and if we have properly guessed the name, we will probably get another communication giving the full address that we requested.

LOCKLAND LUMBER CO.

Another Problem for the S. A. F.

We are told by Ex-Member of the Executive Committee that they are in constant need of suggestions. Presuming that they will not object to an open letter I suggest that steps be taken at once to organize an S. A. F. court of equity, having three members elected—one retiring each year—whose duty it shall be to decide cases of dispute or differences, where adjustment by a third party is necessary, arranging that members agree to submit such troubles to this court and abide thereby; this will save law-suits and much expense. The boards of trade in all large cities do this and I do not see why a national society should not do so.

C. B. W.

LANCASTER, PA.—At the recent meeting of the State Horticultural Society, Morris Brinton, Jr., read a good paper on the newer carnations and roses. Officers for 1898 were elected and the next meeting will be held at Harrisburg.

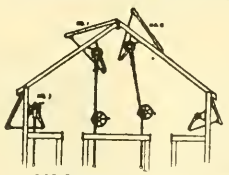
Cypress Greenhouse Material.

We are the pioneers in Clear Cypress Greenhouse Material. We discovered that Cypress is better than any other wood for greenhouses from top of posts up and we introduced it, and fought for it against many prejudices, and finally succeeded in bringing it into general use.



Others have attempted to follow where we lead, others are trying to reap what we sowed, but we have the experience and are recognized as experts in greenhouse construction.
